(b) Upon investigation pursuant to paragraph (1) of section 5 of the act, proposed contract providing for the establishment of joint passenger-train service between Seattle, Wash., Tacoma, Wash., and Portland, Oreg., and for division of earnings therefrom, found to be in the interest of better service to the public, to promote economy of operation, and not to unduly restrain competition, and the terms and conditions under which such division is proposed to be made are just and reasonable. Puget Sound Portland Joint Passenger Train Service, 96 I. C. C. 116.

(c) Northern Pacific and Soo have applied for approval of their proposal to establish a joint passenger train service between Minneapolis and St. Paul, Minn., and Duluth, Minn., and Superior, Wis., and to divide the earnings therefrom under the terms and conditions set forth in a certain contract between them. If applicants proposal is approved, the N. P., and Soo late night local trains will be discontinued and the Soo early afternoon nonstop trains will become late afternoon between the Twin Cities and Duluth. All other trains of applicants move interstate between those points. HELD, proposed division of earnings between the applicants will be in the interest of economy of operation and will not unduly restrain competition, and the terms and conditions under which such division is proposed to be made are just and reasonable. Joint passenger train service 107 I. C. C. 495.

IV. CLAIMS FOR DAMAGES.

§14¾. In general.

See Claims; Reparation.

(a) Under the common law, a carrier may waive a provision for written notice of injury to passenger. Edmondson v. Missouri Pac. R. Co. (Mo. 1924) 264 S. W. 470.

(b) While a carrier is liable for actual and punitive damages for insulting a passenger in the enforcement of the law or its rules, still the court will look to the whole case and consider the circumstances, and will restrain the award to reasonable limits. The facts of the case considered, a verdict in excess of $1,000 will be deemed excessive. Illinois Cent. R. Co. v. Cox (Miss. 1924) 100 So. 520.

§16½. Redemption of Tickets.

(a) Refusal and failure of the Director General to make refund on unused portion of a mileage book found

to have resulted in an overcharge. Tariff provision provided for refund upon presentation of unused portion of the mileage book, and this constituted a rule or regulation which determined the aggregate of the legal fare for the service performed and, being a part of the published tariff, could not therefore be disregarded. Previous findings in 98 I. C. C. 476, affirmed and reparation awarded. Carpenter v. Director General, 101 I. C. C. 333.

V. OPERATION.

§17. In General.

See Evidence §18.

(a) Upon investigation pursuant to paragraph (1) of section 5 of the act, proposed contract providing for the establishment of joint passenger-train service between Seattle, Wash., Tacoma, Wash., and Portland, Oreg., and for division of earnings therefrom, found to be in the interest of better service to the public, to promote economy of operation, and not to unduly restrain competition, and the terms and conditions under which such division is proposed to be made are just and reasonable. Puget Sound Portland Joint Passenger Train Service, 96 I. C. C. 116.

§18. Publication and Tariffs.

See Tariffs.

(a) Provisions of section 6 with regard to publishing, filing, posting and observing tariffs must be complied with in the issuance, sale, use of mileage, excursion, or commutation passenger tickets and joint interchangeable mileage tickets. The rules governing the sale, use and redemption of mileage books should be a part of the tariff under which they are sold. When included in the tariff the provision for the redemption of tickets is of equal force with other provisions therein. Carpenter v. Director General, 98 I. C. C. 476, 478.

VI. EVIDENCE AND PROCEDURE.

§19. In General.

See Evidence; Procedure Before Commission.

ALL CITATIONS

Arizona Corporation Commission v. A. E. R. R. Co., 85 I. C. C. 76; Beatrice Creamery Co. v. L. & N. R. R. Co., 85 I. C. C. 377.

PAST RATES

See Evidence §29, §43; Reasonableness of Rates §25.

PEDDLER CAR SERVICE

See Cars and Car Supply §9¾; Classification §17 (3e), §22 (x); Distance Rates §3 (4o).

(a) Rates on peddler-car quantities of fresh meat and packing-house products from Fort Worth, Tex., Oklahoma City, Okla., and Wichita, Kans., to points in Arizona, New Mexico, and Texas differential territory, found unduly preferential of packers at said points of origin and unduly prejudicial to complainant packer at El Paso. Bases for reasonable and nonprejudicial rates prescribed for the future. Peyton Packing Co. v. A. E. R. R. Co., 100 I. C. C. 4, 20.

PENALTY CHARGES

See Classification §16 (p), §16a; Demurrage §7½, §16 (a), §16½.

(a) Upon arrival of shipments at originally billed destination they "were placed in public delivery yard ready for delivery." Complainant's customers refused shipments and carrier's agents were notified by telegrams confirmed by letters to "reship" to new destination. HELD: Since definition of reconsignment clearly indicates that shipments must still be in custody of carrier and shipments here involved never left carrier's custody until they were delivered at ultimate destination, they were reconsignments and not reshipments and penalty charges accruing thereunder were not illegal. Stetson, Cutler & Co. v. N. Y., N. H. & H. R. R. Co., 91 I. C. C. 3.

PER CAR RATES

See Live Stock Shipments (o).

PER DIEM CHARGES

See Cars and Car Supply §11¾, §11⅞; Demurrage §2 (n), §18¼; Switch Tracks and Switching §9b; Tap Lines §12½.

PERCENTAGE RATES

See Advanced Rates §5 (2) (e), §7 (8), §17 (y); Class Rates §1 (e) (m), §2 (3k); Classification §1 (1); Evidence §43¼; Express Companies §23; Local Rates and Combinations (aa) (ff); Through Routes and Joint Rates §13 (4g).

(a) Rates on bedroom furniture from Nashville, Tenn., to eastern and Virginia cities found not unreasonable, but unduly prejudicial to complainant and unduly preferential of competitors at Chattanooga, Tenn., to extent that percentage relationship of rates to first-class rates from Nashville exceeds percentage relationship of contemporaneous rates to first-class rates from Chattanooga. Standard Furniture Co. v. N., C. & St. L. Ry., 91 I. C. C. 27.

(b) Considering difference in transportation conditions in western territory as compared with the East, volume of movement, distance traversed, and density of traffic, rates on wool and mohair in the grease from intermountain territory to Pacific coast terminals, for application on shipments moving locally or when destined beyond, found unjust and unreasonable. Reasonable basis of maximum percentage rates prescribed for future. Wool Rates Investigation, 1923, 91 I. C. C. 235, 272, 273.

(c) Considering volume of traffic, its seasonal nature, and expense of assembling and returning equipment, fourth-class rates on fresh tomatoes from points in Silver Creek district in New York, to Pittsburgh, Pa., found unreasonable to extent they exceeded 80 per cent of fourth class. Reasonable maximum rates prescribed and reparation awarded. Heinz Co. v. Director General, 91 I. C. C. 358.

(d) Sixth-class rate on imported flaxseed from New York Harbor points to Buffalo, N. Y., found unreasonable as compared with rate on flaxseed between same points in opposite direction, and to extent it exceeded 60 per cent of New York-Chicago rate less 2 cents. Reasonable rate prescribed and reparation awarded. American Linseed Co. v. E. R. R. Co., 91 I. C. C. 663.

(e) Complainant attacked class and commodity rates from Duluth, Minneapolis and St. Paul, Minn., Chicago, Ill., and points taking same rates, and all points east of the Mississippi river and north of the Ohio and Potomac rivers to Watertown, S. D., as unreasonable and unduly prejudicial to Watertown and unduly preferential of Sioux Falls and Aberdeen, S. D., Sioux City, Iowa, and Pipestone, Mankato, Minneapolis, and St. Paul, Minn., Watertown is 320 miles southwest of Duluth, 214 miles west to southwest of Twin Cities 593 miles northwest of Chicago and 103 miles north of Sioux Falls. It is served by the Northwestern, Rock Island, Great Northern and M. & St. L. **Rates From Duluth.** From Duluth the Watertown and Sioux Falls the short line is the G. N. From Duluth to Sioux City the short route is over the G. N., to Twin Cities and Omaha Line beyond, although the single line of the G. N., is only 12 miles longer. The short line to Aberdeen is the G. N. The rates to both Sioux Falls and Sioux City are the same, and are materially lower than to Watertown, although the distances to the latter point are shorter. The outbound class rates from Watertown, Sioux Falls and Aberdeen to points in South Dakota are all on basis of the South Dakota intrastate scale. This scale has also been extended by the carriers from Sioux City to points in South Dakota. Generally speaking, the level of the rates is, and properly should be, somewhat lower east than west of the Twin Cities and somewhat lower south of Sioux City than north and west of that point. The hauls for the short line distances from Duluth to Watertown, Sioux Falls and Aberdeen are in the territory in which the higher rate level prevails. HELD, class rates from Duluth and related points taking same rates to Watertown, S. D., are unreasonable to extent they exceed rates ranging from 121c first class to 22c class E; further that the class rates from Duluth and points taking same routes to Watertown are unduly prejudicial to Watertown and unduly preferential of Sioux Falls and Aberdeen to extent they exceed rates reflecting the following relationship to the contemporaneous rates from Duluth to Sioux Falls and Aberdeen; from Duluth to Watertown the reasonable maximum rates above prescribed, and from Duluth to the preferred points the following class rates which will be reasonable maximum rates: to Sioux Falls rates ranging from 129c first class to 23c class E; to Aberdeen 133c first class and 24c

class E. **Rates from Twin Cities.** HELD, class rates from St. Paul and Minneapolis and related points taking same rates to Watertown, S. D., are not unreasonable but are unduly prejudicial to extent they exceed rates to Sioux Falls by more than first class 7c class E. 1c. **Rates from Chicago.** In 1912 increased class rates from Chicago and St. Louis, Mo., to Watertown were found justified in 26 I. C. C. 635. In 1912 the average of the class rates to Watertown was 109% of the average of the class rates to Sioux Falls, while at present it is 122%. HELD, class rates from Chicago and points taking same rates to Watertown are not unreasonable but are unduly prejudicial to extent they exceed 107% of the rates to Sioux Falls. **Rates from Points East of Chicago.** The present basis of constructing rates from points east of the Indiana Illinois state line to Watertown is by applying the local or proportional rates from such points to Chicago, La Crosse or Mississippi river crossings and adding thereto the full local rates beyond. Watertown has a scale of proportional rates from the Mississippi river which are the same as the Aberdeen rates, but on all classes except on third class the local rates from the Mississippi river to Watertown are lower. The record leaves no doubt that the density of traffic is greater to Sioux Falls than to Watertown, and the Commission can not entirely lose sight of the fact that the rates to Sioux Falls are influenced to a greater extent than the rates to points beyond Sioux Falls by the lower rate level to the Missouri river cities. HELD, class rates to Watertown from points east of the Indiana Illinois state line are unreasonable to extent they exceed the rates from points of origin to Mississippi river and proportional rates from River crossings to Watertown rates ranging from 110c first class to 20c class E. **Commodity Rates to Watertown.** A large number of carload commodity rates are published from points of origin embraced in this complaint to Sioux Falls but comparatively few to Watertown, where such commodity rates are published to Watertown they compare favorably with rates in effect to Sioux Falls. The same general conditions affect the commodity rates to Watertown as affect the class rates. The commodity rates should be aligned somewhat on the basis of Sioux Falls commodity rates and should not exceed the ratio of the corresponding class rates to Watertown and Sioux Falls for the class in which the commodity is rated in the governing classification. Watertown Chamber of Commerce v. A. & W. R. R., 101 I. C. C. 427.

(f) Complainant attacked commodity rates charged on crude sulphur from Baltimore, Md., to Detroit, Mich., as unreasonable to extent they exceeded 78% of the rate from New York to Chicago less the port differential of 3c. Rate charged 31.5c prior to July 1, 1922 and 28c on and after Oct. 25, 1922. From July 1 to Oct. 25, 1922 rate was 25.5c. Short line distance is 594 miles. Rates from Baltimore are less than from New York by the port differential of 3c. From New York the rates to Chicago and Detroit are 36.5 and 31c, respectively, for short line distances of 896 and 693 miles. Between points in central territory crude sulphur takes 75% of sixth class by exceptions of the official classification. For movements within trunk line territory the Commission has found in numerous cases that 80% of sixth class is reasonable, 89 I. C. C. 383 and 87 I. C. C. 613. The 28c commodity rate under attack is 82.3% of the sixth class rate of 34c from Baltimore to Detroit. Defendants absorb the labor charge for loading from pier to car, which amounts to 32.5c per ton as import bulk freight. When the domestic rate on crude sulphur was established, this allowance was made the same as on import sulphur. No such allowance is made on other domestic traffic. Deducting this allowance from the 28c rate the net amount received by the carriers is 77.6% of the sixth class rate. HELD, rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Detroit Chemical Works v. Canton R. R., 101 I. C. C. 671.

(g) Rates on steel billets from South Kearney, N. J., Baltimore, Md., and Philadelphia, Pa., to Huntington, W. Va., substantially 82 per cent of the New York-Chicago rate, which basis was established to Huntington following Jobbers' & Mfrs.' Bureau of Huntington, 57 I. C. C. 64, found not unreasonable or unduly prejudicial because not related to rate to Pittsburg as 82 is to 60. Earnings and transportation conditions are matters to be considered regardless of the percentage formula, and earnings under rates assailed compare favorably with those under rates to other c. f. a. territory destinations for similar distances.

West Virginia Rail Co. v. P. R. R., 93 I. C. C. 215.

(h) The commission can not accept the percentage formula as a measure of reasonableness of rates or as a criterion of their lawfulness in other respects, matters to be considered being rather earnings and transportation conditions. General Chemical Co., 83 I. C. C. 582. Toledo Cooker Co. v. N. & A. Ry., 93 I. C. C. 271, 273, 274.

(i) Fifth-Class rates on fabricated steel tank material from Haynesville, La., to El Dorado and Smackover, Ark., and from Couchwood, La., to Smackover, found unreasonable to extent they exceeded 60 per cent of fifth class prescribed in the Shreveport case, 48 I. C. C. 312, 354, and in Galveston Commercial Asso., 57 I. C. C. 390, for application on iron and steel articles between points in same territory. Reparation awarded. Parkersburg Rig & Reel Co. v. M. P., 93 I. C. C. 667.

(j) Upon contention that as lard substitute is but cottonseed oil, the commission should prescribe peddler-car rates on lard substitutes which are 130 per cent of the c. l. rates on cottonseed oil, FOUND, Contention ignores the refining process which cottonseed oil undergoes in its manufacture into lard substitute, difference in value between the two articles, and character of the containers. Interstate Cotton Oil Rfg. Co. v. A. T. & S. F., 95 I. C C. 171, 175.

(k) Rates on rig irons, in straight carloads, found unreasonable to extent they exceeded 85 per cent of the rates contemporaneously in effect on oil-well outfits and supplies. Reasonable rates prescribed and reparation awarded. Parkersburg Rig & Reel Co. v. C., R. I. & P., 95 I. C. C. 181.

(l) Proposed increased commodity rates on glucose products from Chicago, Ill., and certain points in Iowa, to South Dakota destinations north and west of Sioux Falls and east of the Missouri River, designed to make such rates approximately the same percentage of the contemporaneous fifth-class rates as obtain to Sioux Falls, Sioux City, Iowa, Minneapolis, Minn., and other destinations in the same general territory, found not justified, in view of the fact that the record does not disclose that the class rates afford a proper basis upon which to construct the commodity rates proposed to all of these destinations. Glucose Proucts to South Dakota, 96 I. C. C. 579.

(m) Rates on newsprint paper from points in New England, New York, and Canada, and from Philadelphia, Pa., to Baltimore, Md., substantially on the sixth-class basis applicable within trunk-line territory, found not unreasonable. While bases of rates in other territories are varying percentages of sixth class, the entire rate structure within and to trunk-line territory is in issue in a pending general investigation and no sufficient reason exists for selecting newsprint for advance consideration. The commission's decision in the Ontario Paper Co. case, 95 I. C. C. 66, upon which complaint relies, was made on consideration of newsprint rates and distances in evidence and not primarily on consideration of the relationship of newsprint rates to sixth class, although the basis found reasonable from Thorold Ontario, to New York, was approximately 80 per cent of sixth class. Washington Publishers' Asso. v. B. & O. R. R. Co., 98 I. C. C. 339.

(n) In judging rates to or from points in the percentage groups, it has been the practice of the commission to consider earnings and transportation conditions and not the mere relationship to sixth class. See General Chemical Co., 83 I. C. C. 582, and Grasselli Chemical Co., 89 I. C. C. 383. Washington Publishers' Asso., v. B. & O. R. R. Co., 98 I. C. C. 339, 344.

(o) Upon attempt to prove that the Buffalo-New York sixth-class rate on newsprint is unreasonable to the extent it exceeds 80 per cent of sixth class, and that rates from the other points of origin involved should be derived from the new Buffalo-Baltimore rate by means of present relationships. HELD, no question as to relationships of rates from other points of origin to Buffalo is pressed in this proceeding and commission's decision is without prejudice to any conclusion on that question which may be reached in other proceedings. Washington Publishers' Asso. v. B. & O. R. R. Co., 98 I. C. C. 339, 344.

(p) Class rates on paper tablets, paper bags and wrapping paper from Birmingham, Ala., and Atlanta, Ga., to Jackson, Miss., found not unreasonable or otherwise unlawful. No sound reason appears for prescribing rates on

these articles which reflect certain percentages of corresponding class rates, as sought by complainant. Rates published in 66 I. C. C. 571 and 64 I. C. C. 306 do not bear a uniform percentage relation to first class, and those to Jackson resulting from those cases do not reflect same percentage relationships to corresponding first-class rates. Commodity rates established pursuant to last cited case were not prescribed as reasonable maxima. The record is convincing that the class basis is reasonable and proper for these occasional carload shipments. Jackson Paper Co. v. A. G. S. R. R. Co. 98 I. C. C. 442.

(q) Rates on cement plaster from Plasterco, Plasterco Junction, and Hamlin, Tex., to destinations in Alabama, Florida, Georgia, Kentucky, Mississippi, and Tennessee, from and after July 1, 1922, found unreasonable to extent they exceeded by more than 20 per cent rates in effect August 25, 1920. Reparation awarded. Texas Cement-Plaster Co. v. A. & M. R. R. Co., 98 I. C. C. 519.

(r) In the first decision in the Certain-teed Products case, the commission did not find, as complainant here contends, 80 per cent of the contemporaneous fifth-class rate to be proper on roofing materials. The commission found undue prejudice to the extent that the percentage of the commodity rates to the fifth-class rates to interior jobbing point exceeded or might exceed by more than 20 per cent the percentage of the commodity rates to the fifth-class rates on like traffic to border points. Fargo Commercial Club v. A. & W. Ry. Co. 98 I. C. C. 691, 719.

(s) Class rates from Fargo N. Dak., to Malta, Melstone, and Myers, Mont., and to all points in Montana west thereof not more than 900 miles from Fargo over short-line routes, found unduly prejudicial to Fargo and unduly preferential of St. Paul and Minneapolis, Minn., to extent they exceed rates which are less than corresponding contemporaneous rates from St. Paul and Minneapolis to same destinations by 25 cents on first class, and on other classes by amounts ascertained by applying the same percentage to first-class rates so constructed as are reflected by corresponding contemporaneous rates from St. Paul and Minneapolis to same points. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691, 727.

(t) The commission has repeatedly urged uniform class percentages where the same classification applies. The class rates here involved should accordingly be revised so as to reflect uniform class percentages. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691, 728.

(u) In 95 I. C. C. 181 the Commission found rates attacked on rig irons, carloads, from Parkersburg, W. Va., to Louisiana, Arkansas, Oklahoma, Kansas, Montana and California as unreasonable to extent they exceeded 85% of the rates on oil well outfits, subject to minimum of 40,000 pounds and awarded reparation. Upon reconsideration, previous order affirmed as to rates for future but reparation denied. Parkersburg Rig & Reel Co. v. C. R. I. & P. Ry., 107 I. C. C. 182.

(v) Contention that rates on deciduous fruits which exceed rates in effect prior to June 25, 1918, by greater percentages than in the case of the corresponding rates on other transcontinental traffic and certain traffic within mountain-Pacific territory results in undue prejudice to shippers of deciduous fruit, not sustained. Defendant's witness testified that while rates used in complainant's comparisons were fairly representative, these rates were established because of competition with water lines operating through the Panama Canal, which competition has rapidly increased during the past few years, or to preserve carriers' tonnage, whereas deciduous fruits do not meet water competition, one experimental shipment by water having proved a failure, and conditions affecting rates used in complainant's comparisons are substantially different from those surrounding rates in issue. Calif. Growers & Shippers Protective League v. S. P. Co., 100 I. C. C. 79, 88, 90.

(w) Rates on fresh deciduous fruits, other than apples, from California points to eastern transcontinental groups, found not unduly prejudicial as compared with lower rates contemporaneously maintained on apples to and from same points. Apples load more heavily, which is a matter of considerable importance, and are subject to water competition which affects the all-rail rate, another feature which distinguishes them from other deciduous fruits. Calif. Growers' & Shippers' Pro-

tective League v. S. P. Co., 100 I. C. C. 79, 80, 105.

(x) Upon further hearing, original report 64 I. C. C. 477, and upon original hearing of consolidated cases, FOUND: Failure of defendants to provide and maintain from Paxton and Spring Garden, Calif., to Wabuska, Nev., on ores and concentrates, rates similar in all respects as to conditions under which such rates are applicable to those contemporaneously maintained on like traffic from Spring Garden to Garfield and International, Utah, but not in excess of 60 per cent thereof will be for the future unduly prejudicial to Wabuska and unduly preferential of Garfield and International. Mason Valley Mines Co. v. W. P. R. R. Co., 100 I. C. C. 180, 204.

(y) Upon further hearing original report, 80 I. C. C. 335, reversed, and rates on rig irons from Iola, Kans., to Tulsa, Okla., found not unreasonable. The present record does not substantiate the original finding that "there is a regular and substantial movement." In Parkersburg Rig & Reel Co., 95 I. C. C. 181, the commission found that rates on this commodity were unreasonable to extent they exceeded 85 per cent of the rates contemporaneously in effect on oil-well outfits, thus fixing the relationship between oil-well supplies and rig irons provided that the rate applicable on oil-well supplies is a reasonable maximum rate; while the present rate on oil-well supplies is 92 per cent of the Class A rate prescribed in Memphis-Southwestern Investigation, 55 I. C. C. 515, it has not been proven a reasonable maximum rate. Bradford Rig & Reel Co. v. Director General, 100 I. C. C. 261.

(z) Following Lissberger & Co., 78 I. C. C. 467; 81 I. C. C. 645, commodity rates on zinc dross from Middletown and Cincinnati, Ohio and Ashland, Ky., to Newport News, Va., which were less than 85 per cent of the contemporaneous sixth-class rates found not unreasonable but charges on like traffic from New York, N. Y., to same destination found to have been unreasonable to extent they exceeded 85 per cent of sixth class rate. Reparation awarded. Lissberger & Co. v. C. & O., 101 I. C. C. 23.

(aa) Rate on wood pulp from Thomson, N. Y., to Whippany, N. J., found unreasonable to extent it exceeded and exceeds rates equal in amount to 90 per cent of contemporaneous sixth-class rate from and to same points. Reasonable rate prescribed for future and reparation awarded. United Paperboard Co. v. G. & J. Ry., 101 I. C. C. 171.

(bb) Rates on feeder cattle from points in Arizona on defendants' lines, except the Tucson, Cornelia & Gila Bend and the Apache, to points in California, found unjust and unreasonable to extent they exceed 80 per cent of the rates on beef cattle from and to same points. Reasonable basis of rates prescribed. Arizona Cattle Growers Asso. v. A. Ry. Co., 101 I. C. C. 181.

(cc) Percentage rates on strawboard from and to points in central territory and from points in that territory to Canadian and trunk-line territories found not unreasonable, unjustly discriminatory or unduly prejudicial as compared with lower rates prescribed for application on certain papers and paper articles to and within western territory in Certain-teed Products Corp., 73 I. C. C. 82, and other cited cases. Lafayette Box Board & Paper Co. v. A., C. & Y. Ry., 101 I. C. C. 273, 275.

(dd) Rates on cedar pencil slats found unreasonable to extent they exceeded 120 per cent of the rates on lumber of same species. Reasonable rates prescribed for future and reparation awarded. Dixon Crucible Co. v. P. R. R., 101 I. C. C. 415.

(ee) Combination rates assessed on common unglazed doors, in straight or mixed carloads, from points in Oregon and Washington, to destinations in trunk-line and New England territories, found unreasonable to extent they exceeded 115 per cent of rates on lumber, prescribed in Anson, Gilkey & Hurd Co., 78 I. C. C. 495. Reparation awarded. Pacific Mutual Door Co. v. A. A. R. R., 101 I. C. C. 633.

(ff) Rate on imported newsprint paper from Houston, Tex., to Oklahoma City, Okla., found unreasonable to extent it exceeded rates based upon the distance scale prescribed in Memphis-Southwestern Investigation, 77 I. C. C. 473, 564, and the percentage relationship found reasonable in Minnesota & Ontario Paper Co., 66 I. C. C. 571. Reparation awarded. Oklahoma Publishing Co. v. A., T. & S. F., 101 I. C. C. 635.

(gg) Between points in c. f. a. terri

tory crude sulphur takes 75 per cent of sixth class by exception to the official classification. For movements within trunk line territory 80 per cent of sixth-class is a reasonable basis. See 89 I. C. C. 383; 87 I. C. C. 613. Detroit Chemical Works v. C. R. R. Co., 101 I. C. C. 671, 672.

(hh) Departure from the percentage formula in making commodity rate is not in and of itself a violation of section 1 of the interstate commerce act. In principle there is no more reason under section 3 than under section 1 for requiring either conformity to or equal departures from the percentage formula. The earnings and transportation conditions are matters for the exercise of judgment as much in the one case as in the other. Detroit Chemical Works v. C. R. R. Co., 101 I. C. C. 671, 673.

(hha) Commodity rates, reflecting 78 per cent of class basis, on helical springs from Chicago and Waukegan to New Orleans found not unreasonable when applied to occasional shipments. Crescent Bed Co. v. A. & V. Ry., 102 I. C. C. 419.

(ii) Complainant attacked rates charged on vegetables, carloads, from Florida to Wichita, Kas., as unreasonable, unjustly discriminatory and unduly prejudicial. Complainants receive from Florida carloads of cabbage, celery, potatoes, tomatoes and other vegetables and job in less carload quantities to points in Kansas and northern Oklahoma. In so doing they compete with Kansas City, Mo., Topeka, Kas., and Oklahoma City and Enid, Okla. Wichita is in the south central part of Kansas and is served by the Santa Fe, Rock Island, M. P., Frisco, K. C. M. & O., and Midland Valley. Rates from Florida points to destinations in Kansas and to Kansas City, as well as to destinations in various other western states such as Iowa, Nebraska, Minnesota and South Dakota, are joint through rates published in sectional tariffs and composed of separate factors as follows: (a) from points in Florida to Jacksonville, (b) from Jacksonville to Ohio and Mississippi river crossings, and (c) from those crossings to destinations. The factors to Jacksonville are not attacked. The factors from Jacksonville to Ohio and Mississippi river crossings in most cases are the same as the rates to those points on traffic destined thereto, but are lower than the rates which apply locally from Jacksonville. The distances to Wichita is 107% of that to Kansas City, 102% of that to Topeka, 98% of that to Enid, and 105% of that to Oklahoma City. The rates reflect the following percentage to Kansas City: cabbage 138%, tomatoes 136%, cabbage 124%, potatoes 130%, other vegetables 136%; the rates to Wichita reflect the following percentage of those to Topeka: celery 117%, tomatoes 120%, cabbage 110%, potatoes 110%, other vegetables 120%. Numerous routes are open for the movement of vegetables to Wichita, Kansas City, Topeka and other destinations. A Kansas City jobber can route a car from Jacksonville through Wichita to try the market there and later send it to Kansas City at a through rate lower than the rate to Wichita. HELD, rates on vegetables, carloads, from Florida to Wichita, Kas., unduly prejudicial to extent the factors from Jacksonville exceed 110% of rates to Kansas City; that rates on cabbage and potatoes not unreasonable, but rates on other vegetables unreasonable to extent the factor from Jacksonville to Wichita exceeded 159c prior to July 1, 1922 and 143c thereafter, reparation awarded. Wichita Chamber of Commerce v. A. & V. Ry., 109 I. C. C. 368.

PERISHABLE FREIGHT

See Inspection; Protective Service.

(a) Complainant attacked commodity rate charged of $1.25 on cabbage, carloads, from Washington to St. Louis, Mo., between November 1919 and February 1920, as unreasonable and unduly preferential to extent it exceeded 94c. Shipments from Tacoma, Seattle, Kent, Thomas, North Puyallup, and Auburn, Wash., distance 2,377 miles. A commodity rate of 94c applied on onions and potatoes from and to the same points. This rate also applied on cabbage from California group points. HELD, rate

attacked unreasonable to extent it exceeded 94c, reparation awarded. Meyer Vasquez Produce Co. v. Director General, 89 I. C. C. 437.

(b) Considering volume of traffic, its seasonal nature, and expense of assembling and returning equipment, fourth-class rates on fresh tomatoes from points in Silver Creek district in New York, to Pittsburgh, Pa., found unreasonable to extent they exceeded 80 per cent of fourth class. Reasonable maximum rates prescribed and reparation awarded. Heinz Co. v. Director General, 91 I. C. C. 358.

(c) In reissuing a tariff carriers unintentionally increased arbitrary on fruit, vegetable, and grape packages over rates on lumber, to a basis higher than that authorized in Increased Rates, 1920, 58 I. C. C. 220. HELD: Burden of proof is upon carriers, and since they failed to justify the rates, as increased, unreasonableness found to extent that arbitraries exceeded those authorized in cited cases Reparation awarded. Package Sales Corp. v. U. P. R. R. Co., 91 I. C. C. 697.

(d) Complainant attacked commodity rates on fresh deciduous fruits other than apples, carloads, from California points to eastern transcontinental groups as unreasonable, and unduly prejudicial as compared with rates on apples, carloads, from and to the same points and by comparison with the level of the rates on other commodities in general. Deciduous fruits constitute the most important part of the perishable freight from California to the east, which traffic is by far the greatest of any handled by the transcontinental carriers serving California. Deciduous fruits constituted 29.3% of the total number of carloads of all kinds of freight handled eastbound by the Santa Fe, during the first 11 months of 1923. The S. P., handles more deciduous fruit than the Santa Fe. The S. P., and Santa Fe are the principal originating trunk lines, followed by the W. P. The Salt Lake handles a relatively small amount of the traffic. A considerable portion of the traffic originates on branches of these lines, but the bulk of it originates on their main lines. There is also a substantial movement from points on short line connections of these carriers. Shipments from points on the S. P., or its short line connections north of the Tehachapi are moved to Roseville, Calif, and assembled. These move to Ogden, Utah, where they are delivered to the U. P., and the latter handles them to Council Bluffs Transfer, Iowa. At this point the trains are broken up and the cars distributed, principally between the Northwestern and Milwaukee, although the I. C. receives a comparatively small portion of the traffic. Most of the traffic moves over these lines to Chicago. The S. P., assembles shipments from south of the Tehachapi at Colton, Calif., about 57 miles east of Los Angeles. The movement over the S. P., via El Paso, Tex., is light in comparison with the movement via Ogden. The bulk of the Santa Fe traffic originates in the southern part of the San Joaquin Valley, is assembled into trains at Bakersfield, Calif., and moves direct over that line to Chicago. The W. P., assembles its traffic at Sacramento. The bulk of it is delivered to the U. P., at Ogden, and the movement beyond is similar to traffic originating on the S. P. The Salt Lake traffic is assembled at San Bernardino, Calif., and is delivered to the U. P., proper at Ogden. Beyond Chicago the Erie system handles the bulk of the traffic to New York, the Pennsylvania delivers most of the traffic to Pittsburgh and Philadelphia, and the B. & O., delivers it at Washington, D. C., and Baltimore. The M. C., carriers most of the traffic to Detroit and Buffalo. The N. Y. C., delivers at Cleveland, and it turns over to the B. & M., the traffic from Boston. The traffic ordinarily moves in refrigerator cars under refrigeration must be stopped enroute for reicing at various points and expedited schedules are maintained. The present schedules are 154 hours from the assembling points to Chicago, the Erie schedule from Chicago to New York is 65.5 hours. These schedules are slower than those maintained prior to federal control, but they are faster than those for citrus fruit and other freight except fresh vegetables and cantaloupes. The rates are blanketed from all points in California to large destinations groups in the east. The rates attacked are higher than the rates in effect on June 24, 1918 by 41% from Group J and 50% to other groups. Complainant contended that the rate of $1.50 on apples compared with the rate of $1.73 on other deciduous fruits to most of the eastern groups results in undue prejudice and preference as between the shippers of the respective fruits. If the rates on apples from California were increased to $1.73, it would place the shippers of California apples at a disadvantage in competing with those from the north

coast territory, and it is doubtful whether it would be of any substantial benefit to the shippers of other deciduous fruits. The record in this case shows affirmatively that the deciduous fruits here under consideration are moving freely under the present rates, and that the volume of movement has increased greatly during recent years. Complainants prediction that unless lower rates are secured there will be a substantial reduction in tonnage may not be realized. The prediction is based upon the unfavorable financial return to the producers at the time of the hearing, and for a period prior thereto. But this record does not justify the conclusion either that this condition is likely to continue or that it is undue in great part to the rate structure. It is suggested in the record that the unfavorable financial results are chargeable in large measure to overproduction, to inability of the eastern market to absorb the supply. If this is so, economical laws, and not the rate adjustment, will sooner or later bring about a reduction in the movement, and such a reduction would be desirable. The record herein does not show the comparative levels in market value of the various commodities over a reasonable period of years. HELD, rates attacked not unreasonable or unduly prejudicial as a whole, complaint dismissed. Calif. Growers & Shippers Protective League v. S. P. Co., 100 I. C. C. 79.

(e) Complainant attacked commodity rates charged on a mixed carload of beets, carrots, turnips and cabbage, shipped May 26, 1921 from San Fernando, Calif., to St. Paul, Minn., as unreasonable. The beets, carrots and turnips were in bags and cabbage in crates, shipment moving via S. P., E. P. & S. W., Rock Island, C. G. W., 2,315 miles, charged $1.665. Contemporaneously defendants maintained rate of $1.255 on beets, carrots and turnips in mixed carloads and on cabbage in straight carloads, and effective April 24, 1922, this rate was reduced to $1.10 and made applicable on beets, carrots, turnips in bags and cabbage in crates. HELD, rate attacked unreasonable to extent it exceeded $1.255, reparation awarded. August Ammon v. S. P. Co., 101 I. C. C. 37.

(f) Complainant attacked commodity rates charged on bananas and cocoanuts, straight or mixed carloads, since Sept. 25, 1920 from New Orleans, La., Gulfport, Miss., and points taking same rates to Oklahoma and Arkansas City as unjust unreasonable and unduly prejudicial. In No. 14436 complainants attack rates charged on bananas and cocoanuts, straight or mixed carloads, since Nov. 3, 1920 from New Orleans and points taking the same rates and from Mobile, Ala., to certain points in Texas as unreasonable. Bananas and cocoanuts are not grown in commercial quantities in the United States but are imported from Central America principally through New Orleans and to some extent through other ports. The movement of bananas is steady and continues throughout the year. Cocoanuts move mostly during the Thanksgiving and Christmas season, and generally in small quantities in mixed carloads with bananas. Bananas are shipped in ventilated refrigerator cars, and except in the summer months, do not require icing. Prior to Sept. 25, 1921 the rates from Gulfport to the above named points, except Arkansas City were made on a combination basis, based on New Orleans, the factor up to New Orleans being 24c. Sept. 25, 1921 the same rates were published from Gulfport as from New Orleans. Destinations in 14436 are Dallas, Fort Worth, Wichita Falls, Sherman, Abilene, Stamford and Quanah, Tex. Movement from New Orleans is over the T. & P., or S. P., and connections. Prior to Jan. 1, 1922 the rates to these points was $1.215. On that date it was reduced to $1.095. Bananas are rated third class, carloads, minimum 20,000 pounds. Upon this record it is established that the rates attacked are too high, and that some reductions should be made, but the record shows that complainants proposal would result in rates unduly low. Defendants have equalized the port of Gulfport with New Orleans, but in prescribing rates from Gulfport the Commission can not disregard the greater distances therefrom. HELD, rates attacked unreasonable from New Orleans to extent they exceed $1.085 to Arkansas City and 97.5c to Wichita Falls, and other points related thereto, and rates from Gulfport 4c over New Orleans, reparation awarded. Dawson Produce Co. v. A. & V. Ry., 101 I. C. C. 196.

(g) Complainant attacked commodity rate charged on grape fruit, carloads, from Phoenix, Ariz., to San Francisco, Calif., as unreasonable. Distance over A. E., and S. P., is about 930 miles, over the Santa Fe 800 miles. Rate charged was $1.37 prior to and $1.235 from and

after Jan. 1, 1922. On April 12, 1922 the rate was reduced to $1.02 and on July 1, 1922 to 92c. The class C rate during the period of movement was $1.02 but on Jan. 1, 1922 class rates applicable to carloads of fresh fruits and vegetables were reduced 10%. HELD, rate attacked unreasonable to extent it exceeded $1.02 reparation awarded. Levy & Zenter v. A. T. & S. F. Ry., 101 I. C. C. 361.

(h) Rates on melons and cantaloupes, in straight or mixed carloads, and on melons, cantaloupes, and vegetables, in mixed carloads, from Imperial Valley points in California to Douglas, Ariz., found not unreasonable. Rates charged in no instance exceeded class C, the basis prescribed by commission on such traffic in Murray & Layne Co., 59 I. C. C. 552, and other cases, and present rates are the same as or lower than corresponding class C rates. Buxton-Smith Co. v. E. P. & S. W. 92 I. C. C. 227.

(i) With the possible exception of livestock traffic and such commodities as move in refrigerator cars, the record indicates that the vegetable traffic requires special services, equipment, and facilities that are not required by other commodities referred to, thereby increasing the difficulties and costs of transportation. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55, 63.

(j) Respondents proposed to amend rule 630 H of perishable protective tariff by adding to the exception numbered 2 the further exception: carriers parties to this tariff will not furnish iced refrigerator cars for loading by the shippers with fruits and, or vegetables, less than carloads, moving between points governed by the Illinois classification. Rule 630 H, in connection with rule 600B provides, among other things, that no charge will be made for the service of icing, reicing, or refrigeration of less than carload shipments of perishable freight in straight or mixed lots, minimum 15,000 pounds, between points governed by the western classification, including Illinois and Iowa classification. The effect of the proposed amendment would be to withdraw the rule in so far as its application to fruits and vegetables between points in Illinois classification territory is concerned. The overlapping of the rules in so far as they apply to fruits and vegetables from Illinois classification points should be corrected, but the Commission is not persuaded that this should be accomplished by withdrawing a part of rule 630 H. HELD, schedules not justified. Refrigeration of L. C. L. perishable freight 107 I. C. C. 179.

(k) Imposition of charges provided in rule 240 (A) of perishable protective tariff No. 1, in addition to applicable freight rates, on fresh meats and packing-house products initially iced as by consignor and delivered to carrier with instructions not to reice in transit, from points in Washington, Oregon, California, and Nevada to interstate destinations, found to result in unreasonable total charges. Reparation awarded and revision of tariffs required. Frye & Co. v. G. N. Ry. Co., 88 I. C. C. 477.

PERSONAL INJURIES

See Employers' Liability Act; Safety Appliance Acts; Telephone and Telegraph Companies IV.

(a) Minor's right to disaffirm alleged contract composed of stipulations on back of railway pass issued to him, HELD limited to minor himself, his personal representatives or privies in blood, and not subject to be exercised by his widow seeking to recover for his death. Pinnell v. St. Louis-San Francisco Ry Co. (Mo. 1924) 263 S. W. 182.

(b) Plaintiff, seeking to recover for the death of her minor husband while using a free railroad pass, and alleging invalidity of stipulations contained in it relieving carrier from liability, HELD not entitled to assert first on appeal that conceding the validity of such stipulations defendant was nevertheless liable on ground of gross, wanton, or reckless negligence. Pinnell v. St. Louis-San Francisco Ry Co. (Mo. 1924) 263 S. W. 182.

(c) In action under federal Employers, Liability Act (U. S. Comp. St. §§8657-8665), it must be shown that defendant is common carrier by railroad engaged in interstate or foreign commerce. Southern Ry. Co. v. Dickson. (Ala 1924) 100 So. 665.

(d) Brakeman, injured when timber slid off ramp adjoining spur track where the brakeman was engaged in switching cars, HELD not entitled to go to jury on question of negligence of railroad under the federal Employers' Liability Act

(U. S. Comp. St. §§ 8657-8665), in view of failure to show that the timber was thrown down the ramp by an employee of the railroad or that railroad could have anticipated that employee would be injured by reason of proximity of tracks to ramps or manner of construction of ramps or use which had been made thereof by the lumber company, it being inferable that the timber was thrown by an employee of the lumber company or some intermeddler. New Orleans & N. E. R. Co. v. Penton (Miss. 1924) 100 So. 521.

(e) In an action against a railroad under the federal Employers' Liability Act (U. S. Comp. St. §§ 8567-8665), for injuries to railroad employee, the employee was required to prove negligence by railroad, since in such case there is neither a statutory nor a common-law presumption of negligence. New Orleans & N. E. R. Co. v. Penton (Miss. 1924) 100 So. 521.

(f) A railroad is not liable under the federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), for injuries to an employee unless negligent, since a railroad is not a guarantor of the safety of the place of work, but is required merely to exercise ordinary care and prudence to the end that the place in which the work is to be done may be reasonably safe. New Orleans & N. E. R. Co. v. Penton (Miss. 1924) 100 So. 521.

(g) Where brakeman and railroad by which he was employed were both engaged in interstate commerce at the time of the accident, the brakeman's action for injuries was governed by the federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). New Orleans & N. E. R. Co. v. Penton (Miss. 1924) 100 So. 521.

(h) Defendant railroad company brought into its yards a train of 16 cars, 2 of which contained interstate freight. Plaintiff, one of the switching crew distributing such cars, was injured when between 2 of the cars attempting to adjust an alleged defective coupling. HELD, that defendant was at the time engaged in interstate commerce; that the questions whether plaintiff was employed in such commerce and whether defendant was chargeable with violation of Safety Appliance Act §2, which contributed to the injury and brought the case within Employers Liability Act §3, 4, were properly submitted to the jury. Philadelphia & R. Ry. Co. v. Berman, 295 Fed. 658.

(i) As respects suits for personal injuries occurring in another state to employee of foreign railroad, who is not citizen of Minnesota, Gen. St. Minn. 1913, §7736, providing that any foreign railroad ticket or freight agent within state may be served with summons for corporation within county where action is brought, is unconstitutional, as unreasonably burdening interstate commerce, regardless of fact that railroad has trackage in Minnesota. Weinard v. Chicago, M. & St. P. Ry. Co. 298 Fed. 977.

(j) One employed in handling mail transported in interstate commerce, and injured while unloading it at its destination, is injured while engaged in interstate commerce within federal Employers' Liability Act (U. S. Comp. §§8657-8665). Missouri Pac. R. Co. v. Baldwin (Tex., 1924) 261 S. W. 418.

(k) A provision in a steamship ticket limiting the time for presenting a claim for personal injury to 10 days after landing is void as unreasonable, and is not authorized by anything in Shipping Board Act Sept. 7, 1916, §18 (Comp. St. §8146ii). Blackwell v. Alaska S. S. Co., 1 Fed. (2d) 334.

(l) Contract executed by person employed to inspect engine appliance on locomotives for manufacturer, which released railroad from all damages arising from his presence on locomotive, HELD to release railroad from liability for negligence, since, whatever his status, there would be no liability, except for negligence, and his agreement to observe railroad employes' rules did not affect validity of release. Allen v. Erie R. Co., 2 Fed. (2d) 712.

(m) Passenger suing agent appointed by president under Transportation Act 1920, §206 (U. S. Comp. St. Ann. Supp. 1923, §10071¼cc), for refusal of gatekeeper to permit him to pass through gate to train, accompanied by violence and insulting and threatening language, could recover compensatory damages for injuries to feelings, humiliating, and mental sufferings. Currie v. Davis, (S. C., 1923) 126 S. E. 119.

(n) The federal Employers' Liability Act (U. S. Comp. St. §§8657-8665) is exclusive, and a section hand engaged in interstate commerce must sue under it for personal injuries received. Louisville & N. R. Co. v. Brandenburg (Ky., 1924) 270 S. W. 1.

(o) Liabilities of interstate carriers for injuries to employees engaged in interstate commerce are regulated inclusively and exclusively by the federal Employers' Liability Act (U. S. Comp. St. §§8657-8665), and Illinois Workmen's Compensation Act (Smith-Hurd Rev. St. 1923, c. 48, §§138-172) is not applicable. Carter v. St. Louis, T. & E. R. Co., (Mo., 1925) 271 S. W. 358.

(p) Where cargo on train was being transferred from Tennessee through Kentucky to Ohio both the engineer and tower man, operating a semaphore when the train passed, were engaged in interstate commerce. Cincinnati, N. O. & T. P. Ry. Co. v. McWhorter (Ky., 1924) 262 S. W. 253.

(q) $1,800 damages for broken toe and prolonged suffering, sustained by Pullman car passenger from stumbling over suit case in aisle, HELD not excessive. Caldwell v. Pullman Co. (S. C. 1925) 128 S. E. 504.

(r) To be within federal Employers' Liability Act (U. S. Comp. St. §§8657-8665) employee must be engaged in work interstate in character or so nearly related thereto as to be practically part of it, as in repairing instrumentality then in use in interstate transportation. Brock v. Chicago, R. I. & P. Ry. Co. (Mo., 1924) 266 S. W. 691.

(s) While under Employers' Liability Act, §4 (U. S. Comp. St. §8660), contributory negligence is abolished as complete defense, if negligence of employee succeeds that of employer and is sole proximate cause of his injury or death, there can be no recovery. Sears v. Texas & N. O. Ry. Co. (Tex., 1924) 266 S. W. 400.

(t) Petition stating cause of action in favor of personal representative of flagman, employed in interstate commerce to protect trains engaged therein, HELD within federal Employers' Liability Act (U. S. Comp. St. §§8657-8665). Sears v. Texas & N. O. Ry. Co., (Tex., 1924) 266 S. W. 400.

PHYSICAL VALUATION

See Advanced Rates §10½; Evidence §43½a, §49, §50; Finance Dockets §8; Interstate Commerce Commission §8; Reasonableness of Rates §39½.

(a) Whatever may be the commission's action on underlying land, engineering, and accounting reports of its Bureau of Valuation, when making a determination of final value it is obvious that in dealing with the financial structure of a carrier the commission must consider and give proper effect to the existing financial structure with its attendant vested and contingent rights and obligations., D. & R. G. W. Reorganization, 90 I. C. C. 141, 148.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In General.

(a) Oil in tanks, located on pipe lines extending from fields of production to refineries in another state, some of which had remained in storage for several months in the tanks, which were of greater capacity than required for continuous operation of the pipe lines and at all times contined a large quantity of oil, HELD not in course of interstate transportation, but to have a local situs, and to be subject to local taxation. Gulf Refining Co. of Louisiana v. Phillips, 5 Fed (2d) 514; Same v. Sandlin, 5 Fed. (2d) 514.

II. AS COMMON CARRIER.

§3. In General.

See Common Carrier.

(a) An oil company, using a pipe line for the purpose of conducting oil purchased by it in Illinois to its plant in New Jersey, was not a "common carrier," engaged in interstate traffic, so as to come under the Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.) Tidewater Pipe Co. v. Board of Review of Crawford County (Ill. 1924) 143 N. E. 87.

(b) Oil purchased by an oil company in Illinois, for transportation by its own pipe line to its own plant in New Jersey, was not in transit in interstate commerce and was taxable locally where stored in tanks until needed, or until it could be conveniently taken care of in New Jersey; the mere fact of intention to ship being immaterial. Tidewater Pipe Co. v. Board of Review of Crawford County (Ill. 1924) 143 N. E. 87.

POOLING OF FREIGHT

See Divisions §1 (t).

PORT DIFFERENTIALS

See Differentials §8 (w); Percentage Rates (f).

(a) Export and coastwise rates on lumber from certain points in Texas and Louisiana on Kansas City Southern system lines and Gulf, Colorado & Santa Fe Ry. to Orange, Tex., also domestic rates from points in Louisiana on Kansas City Southern to Orange, found unduly prejudicial to Orange and unduly preferential of Beaumont, Tex., to extent they exceed, by more than a differential of 2 cents, contemporaneous rates on like traffic to Beaumont. Undue prejudice ordered removed and reasonable and nonprejudicial rates prescribed for future. Orange Chamber of Commerce v. A. & W. Ry. Co., 98 I. C. C. 101.

(b) Relationship of rates on certain commodities for export, import, or coastwise movements via Galveston, Tex., from or to points in Texas, Oklahoma, western Louisiana, Arkansas, and Kansas found unduly prejudicial to Galveston and unduly preferential of New Orleans, La. Such undue prejudice should be removed by establishing the same rates to or from New Orleans or Galveston, as the case may be, in instances where the differences in distance from and to the two ports are not greater than 100 miles, and by establishing rates to or from Galveston, as the case may be, certain prescribed differentials, under New Orleans, in instances where the differences in distance in favor of Galveston are greater than 100 miles. The record is not sufficiently complete to warrant the commission in prescribing relationships between the rates to or from Galveston and New Orleans on other commodities or from or to points other than those embraced in the foregoing findings. Relationships herein prescribed will serve as a guide to defendants in readjusting the rates on other export, import and coastwise traffic. Galveston Commercial Asso. v. G. H. & S. A. Ry. Co., 100 I. C. C. 110.

(c) The policy of the southwestern carriers serving New Orleans, La., has been, generally speaking, to apply the Galveston, Tex., rates to New Orleans on traffic moving from or to all points west of the Mississippi river except points in Texas south of a certain line. Such an adjustment necessarily disregards distance, and commercial instead of natural advantages control. The commission has consistently refused to condemn such an adjustment where it is shown to serve the best interests of the public, but where, as here, it builds up one port at the expense of another equally favored by natural advantages from the origin territory here considered, a line must be found beyond which distance may not be disregarded. Galveston Commercial Asso. v. G. H. & S. A. Ry. Co., 100 I. C. C. 110, 121, 122.

PORT HANDLING CHARGES

See Advanced Rates §14¾ (g).

PORT-TO-PORT RATES

See Barge Lines; Coastwise Traffic.

(a) As a part of the interstate transportation, the movement from the port is subject to the jurisdiction of this Commission. Schloss & Jahn Grocery Co. v. L. & N. R. R., 95 I. C. C. 618.

(b) Congress has not placed intercoastal-steamship lines under commission's jurisdiction to same extent as rail

carriers. Their port-to-port rates are exclusively under jurisdiction of United States Shipping Board, and water carriers are free to charge any rate so long as they do not exceed maximum schedules on file with that board. Wool Rates Investigation, 1923, 91 I. C. C. 235, 275.

(c) Local port-to-port service of a water line is not subject to commissions jurisdiction, nor is there anything in the the law which brings extension of such service to interior points by other than rail carriage under commissions jurisdiction. Commission has authority over transportation "wholly by railroad, or partly by railroad and partly by water when both are used under a common control, management, or arrangement or for a continuous carriage or shipment." Motor-Truck or Wagon Transfer Service, 91 I. C. C. 539, 548.

aration V, §23; Routing and Misrouting §10½; Switch Tracks and Switching IV; Tap Lines V; Through Routes and Joint Rates §23.

I. PRACTICE.

§1. In general.

See Reasonableness of Rates §1½.

(a) The Commission is not bound by the technical rules of pleading, although complainants must state their cases with sufficient particularity to put defendants on notice as to the issues which they are called upon to meet. Mason By Products Co. v. Director General, 92 I. C. C. 646, 649.

(b) Decision rendered by commission at complainant's request without regard to outcome of a proceeding pending in the courts wherein an order of the commission involving similar issues is being contested. Wayne Coal Co. v. Director General, 92 I. C. C. 3, 4.

(c) In deciding a case the commission can not forecast what its decision will be in another proceeding pending before it. Cases at issue should be decided on facts of record and in light of present rather than prospective considerations. Rates to Southwestern Destinations, 95 I. C. C. 188, 196.

(d) Cases presented in accordance with the modified procedure under which parties submitted in writing the facts and arguments upon which they rely, oral hearing being had only with respect to such matters as were not agreed to or which were agreed to in part, the parties arguing the case before the examiner at the conclusion of the taking of testimony which was not briefed. McCormick Warehouse Co. v. P. R. R., 95 I. C. C. 301; American Sumatra Tobacco Co. v A. C. L., 95 I. C. C. 463.

(e) Upon contention that theory of port differentials violates the provision of clause 6, section 9, Article I, of the Constitution, which reads, "No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another." HELD: Complaints are brought before the commission under the interstate commerce act and invoke exercise of powers thereby delegated by Congress under the commerce clause of the Constitution. Clause 3, section 8, Article I. As an agency of Congress the commission must assume that in laying statutory duties upon it the Congress has not transcended its power. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 95 I. C. C. 539, 542.

(f) The fact that all of the carriers over whose rails the shipments moved were not named in the original complaint can not act as a bar where the shipments moved during federal control wholly over federally controlled lines and only reparation is sought. Farrell v. C. M. & St. P. Ry. 102 I. C. C. 455, 456.

(g) The decision of the commission in each case necessarily is rendered on the facts of record in that case. Texas Co. v. K. C. S., 101 I. C. C. 345, 346.

§1a. Joint State Hearings.

(a) Similar complaint having been filed with State public utilities commission, but attacking intrastate rates, joint hearing was held, members of State commission sitting with this commission in oral argument and conferring on issues presented. Missouri Portland Cement Co. v. A., T. & S. F., 101 I. C. C. 454.

II. COMPLAINT.

See Blanket Rates §15; Claims §7: Discrimination §18; Long and Short Hauls §11; Reparation §21; Switch Tracks and Switching IV.

§2. Form and Issues Tendered.

(a) While the complaint is somewhat inartificially drawn and contains considerable unnecessary detail, the reasonableness of the through rates is clearly brought in issue therein. The Commission must look to the substance of a complaint rather than to its form. Kanawha Black Band Co. v. K. C. Ry., 98 I. C. C. 431, 432.

(bcd) Order reopening a case for further hearing governs scope of that hearing and not notice which sets forth date and place of further hearing. Livestock to, from, and between Points in the Southeast, 91 I. C. C. 292, 293.

(ef) Complaint alleged that rates charged were unjust and unreasonable, and also stated that a double increase was applied to each combination of separately established rates and that in each case tariff naming one factor contained a so-called combination rule providing for ap-

plication of a single increase to combination rates so constructed. HELD: Complaint contains sufficient matter to constitute an allegation that overcharges have been collected. National Supply Co. v. Director General, 92 I. C. C. 610.

(g) Complainant did not in terms allege a violation of section 1 of the act; but it set forth, among other things, that a through rate was applied; that contemporaneously defendant maintained a lower rate to a farther distant point, in violation of the long-and-short-haul clause of section 4 of the act; and that such lower rate also applied over an alternative route. HELD: Commission is not bound by technical rules of pleading, although complainants must state their cases with sufficient particularity to put defendants on notice as to issue which they are called upon to meet. Complaint found sufficient to put in issue reasonableness of the through rate which exceeded the aggregate of intermediate. Mason By-Products Co. v. Director General, 92 I. C. C. 646, 649.

(h) Counsel for defendants questioned right of opposing counsel to represent many shippers named as complainants, and also contended that many claims presented are barred by the statute of limitations. But as they admit that at least some shippers named are bona fide complainants and that some claims are not barred the commission may proceed to consider the issues without passing upon the jurisdictional question as to individual complainants and claims. Dickerson v. Director General, 93 I. C. C. 304, 305.

(i) Complaint, filed with commission within 90 days after institution of suit by carrier in courts for undercharges, found not barred by the statute of limitations. See Section 16 (3) of the act. Texas Co. v. A., T. & S. F., 93 I. C. C. 691.

(j) Original complaint requested establishment of corporate limits as the switching limits of Rochester, and reasonable and nondiscriminatory switching charges between industries located in State Street and connections of the New York Central with other railroads within corporate limits of Rochester. Amendment seeking inclusion of that portion of the State Street branch parallel with and close by but outside the Rochester city line and establishment of switching charges requested between main Rochester switching district and intermediate points, allowed. Amendment does not unduly broaden the issues since territory referred to therein is within corporate limits; and if charges originally sought were established, inclusion of territory requested in amendment and alignment of existing charges between various intermediate industrial sections would be necessary to obviate fourth-section departures. Rochester Switching Case, 95 I. C. C. 30, 36, 37.

(k) Original complaint made no definite division between origin and destination States but points of origin and destination were designated as those located in states named. Amended complaint setting forth detailed statement of shipments on which reparation is prayed included a number of shipments moving to specific points, some of which were located in States named in original complaint. FOUND: Specific destination covered by amended complaint which are located within States set forth in original complaint are within the issues but in order to present an issue with respect to points not located in those States, the unreasonableness of those rates must be expressly alleged. Western Newspaper Union v. A., T. & S. F., 96 I. C. C. 5, 6.

(l) Formal complaint returned for correction was received by commission after statutory period had run. Citing Rule III (g) of Rules of Practice carrier contended that complaint as originally received should be regarded as an informal complaint and that revised complaint does not bar the running of the statute since not received within six months after original complaint was returned. FOUND: Rule relied upon relates to complaints on the informal docket which can not be disposed of informally, are denied, or are withdrawn from further consideration by complainant. Quebracho Products Co. v. S. I. R. T. Ry., 96 I. C. C. 52, 53, 54.

(m) Upon contention of complainant that a prayer for future rates is included in a prayer for general relief, HELD: The commission does not so interpret the prayer. If relief for the future was sought it should have been specifically prayed for and evidence in support thereof should have been offered. Minnesota Steel Co. v. A., T. & S. F. Ry. Co., 96 I. C. C. 483.

(no) Motion that complaint be dismissed on ground that it can not be construed as an attack on the through rates, and that, even if it be so construed, it

cannot be entertained by commission under Rule III (s) of the Rules of Practice, denied. The reasonableness of the through rates is held to be clearly brought to issue in the complaint, and while the rule cited might have precluded complainants from seeking reparation in the instant case to basis of the joint rates prescribed in original proceeding, under the circumstances here presented it does not preclude them from seeking reparation to basis of the rates assessed at the time complaint in original proceeding was filed. Kanawha Black Band Coal Co., v. K. C. Ry. Co., 98 I. C. C. 431, 432, 433.

(p) Informal complaint alleged rates to be inapplicable; formal complaint referred to informal, but alleged rates to be unreasonable and in violation of the fourth section. Upon contention that claim of overcharges was thus abandoned, FOUND, that pleadings and record were sufficient to support a finding upon the issue of overcharge. Southern Products Co., v. Director General, 98 I. C. C. 462.

(q) Fact that the measure of the overcharge set forth in the formal complaint is different from that in the informal complaint is immaterial, for the commission is not bound by the rate which a complainant before it may seek. It is commission's duty to determine the applicable rate and the amount collected in excess of that rate. Pleadings and record found sufficient to support a finding upon the issue of applicability. Southern Products Co. v. Director General, 98 I. C. C. 462, 463, 464.

(r) Objection to consideration of claim based on the allegation of undue prejudice on ground that as it was not contained in informal complaint, and as formal complaint was not filed within one year after termination of Federal control, it was barred by statute of limitations, sustained. Conejos Cooperative Mills & Mfg. Co. v. Director General 98 I. C. C. 515.

(s) Informal complaint filed within statutory period alleging violation of the act in matter of tariff construction, and formal complaint filed more than two years after cause of action accrued further alleging that rates charged were unreasonable and unduly preferential. HELD, through filing of formal complaint the informal complaint was not broadened so as to include allegations of unreasonableness and undue preference, as contended by complainant, and formal complaint is barred by statute of limitations. St. Louis Fruit & Vegetable Asso. v. L. & N. R. R. Co., 98 I. C. C. 553, 554.

(t) Practice of the commission has been to look to the substance of a complaint rather than its form, and it has repeatedly found that complaints filed with it need not be technically pleaded. However, it is not at liberty to read into a complaint an issue which it plainly does not present. Informal complaint alleging overcharges found not to stay the statute of limitations as to issue of unreasonableness. Lasker & Bernstein v. Director General, 98 I. C. C. 624, 626.

(u) A mere reference to the shipments contained in the informal complaint does not incorporate them in the formal complaint under the rules of practice. Western Pine Mfrs. Asso. v. Director General, 102 I. C. C. 753, 755.

(v) It is not essential to specify by number or to use specific words of the section of the act which is alleged to have been violated if from the context of the complaint it becomes apparent that defendants are apprised of the nature of the violation they are called upon to answer. North Packing & Provision Co. v. Director General, 104 I. C. C. 607, 608.

(w) It is not essential to specify by number or to use the specific words of the section of the act which is alleged to have been violated if from the context of the complaint it becomes apparent that defendants are apprised of the nature of the violation they are called upon to answer. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 224, 225.

(x) Where complainants alleged both in the informal and the original formal complaints that they have been overcharged or damaged because of the assessment of excessive charges the commission considers these statements ufficient to raise an issue as to the reasonableness of the charges assessed, but it should not be understood as condoning undue laxity in pleadings before it. The extent to which these informal and original formal complaints specifically bring in issue alleged violations of sections 4 and 6 need not be determined inasmuch as the commission has often awarded reparation to the basis of the lower ag-

gregate of the intermediates or for direct overcharges under allegations of unreasonableness. The mere reference in the complaints to the alleged collection of charges in excess of the aggregate of intermediates, or collection of overcharges, does not confine the issue to alleged violations of sections 4 and 6, respectively, nor does such reference destroy the issue raised under section 1. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 225.

(y) Upon contention of defendants that as Midvale, Utah, was not specifically mentioned as a point of origin in either the informal or formal complaints no consideration should be given to the shipments from that point, FOUND: That Midvale takes the same rate as Murray, Utah, the other point of origin considered herein, and evidently no defense could be made to the rate from Midvale that is not now made respecting the rate to Murray. Defendant was the first to call attention to the Midvale shipments at the hearing and apparently prior thereto had known of their inclusion in the reparation statements. Upon the circumstances disclosed the defendant was "fairly informed" as to these shipments and they will be considered herein. Western Metals Co. v. Director General, 100 I. C. C. 314.

(z) Every shipper is entitled to a reasonable rate on his traffic, even on sporadic movements and where he attacks the reasonableness of a rate, whether class or commodity, that issue must be decided upon its merits. 88 I. C. C. 185, 187. Budding Co. v. P. R. R. Co., 100 I. C. C. 411, 413.

(aa) An issue of undue prejudice raised in an I. & S. proceeding need not be decided where it is admitted that the rates under suspension are unreasonable per se. Rates on Brick and Related Articles, 101 I. C. C. 297, 298.

(bb) Formal complaint alleging unreasonableness on shipments moving during Federal control, filed with commission within 90 days after institution of suit by carrier in the courts for collection of undercharges, but more than one year after termination of Federal control, found barred. The right of action under allegation of unreasonableness was not revived by court proceeding and is not properly before the commission under section 16 (3) of the interstate commerce act. The commission's jurisdiction to entertain complaints for reparation on account of the exaction of unreasonable rates on shipments moving during Federal control is derived solely from section 206 (c) of the transportation act 1920, under which such complaints must be filed within one year after termination of Federal control. See 264 U. S. 456. Cudahy Packing Co. v. Director General, 102 I. C. C. 598, 599, 600.

C. 395; McGrew Coal Co. v. Director General, as Agent, 85 I. C. C. 735; International Harvester Co. v. N. Y. C. R. R., 88 I. C. C. 370.

§4. Amendment.

See Claims §5.

(a) Complaint as originally filed alleged unreasonableness in the rates on shipments moving between specified dates. At the hearing, complainants filed motion to amend to include additional shipments moving subsequently to date specified, defendants objecting on ground that such amendment would broaden the issues. HELD: Amendment allowed since it only puts in issue the reasonableness of rates subsequent to date named in the complaint as originally filed. Houston Cotton Exchange v. A. & S. Ry., 92 I. C. C. 363.

(b) Amendment of complaint to include an additional point of origin not allowed, since such an amendment would set up a new issue. Clark Equipment Co. v. C. B. & Q. R. R. Co., 98 I. C. C. 465.

(c) Upon motion of defendant to strike out amended complaints on the ground that the allegations in those complaints are equivalent to new causes of action which either are barred by the statute of limitations or must be considered to have been abandoned under Rule III (g) of the Rules of Practice, FOUND: That the original complaints were filed within six months after complainants were advised that informal adjustment had been declined by defendant and it would be necessary to file formal complaints within six months if they desired to press the matter further. The amended complaints were filed subsequent to the expiration of those six months and of statutory period, and

there is merit to defendant's motion. The amendments to the complaints are barred, and further consideration of these cases will be confined to the issues presented in the original formal complaints. Nash Spokane Co. v. Director General, 100 I. C. C. 223.

(d) Contention of defendant that formal complaint was barred because filed after the statutory period and more than six months after notification that claim could not be adjusted informally, not sustained. Notification was not properly mailed to complainant in accordance with the wording of Rule III (g) of the Rules of Practice, although received by him. Corley v. Director General, 100 I. C. C. 293, 296.

§6. Briefs.

(a) Request of counsel for parties outside the proceeding to file a brief as friends of commission, discussing principle of misrouting under consideration, granted. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693.

§8. Rehearing.

(a) A petition for rehearing filed more than 60 days after service of commission's report, but within 45 days after service of a corrected reprint thereof, found to have been filed within period prescribed by Rules of Practice for the filing of petitions for rehearing in cases relating to reparation. Donner Steel Co. v. D., L. & W., 92 I. C. C. 595, 597.

(b) Upon further hearing, original report 80 I. C. C. 335, reversed, and rates on rig irons from Iola, Kans., to Tulsa Okla., found not unreasonable. Bradford Rig & Reel Co. v. Director General, 100 I. C. C. 261.

III. MOTIONS.

§10. Dismissing Complaint.
(1) In General.

(a) Section 13 of the act provides that no complaint shall be dismissed because of absence of direct damage to complainant. Charleston Traffic Bureau v. A. G. S. R. R., 89 I. C. C. 501, 502.

(b) Complainant did not present proof of payment and bearing of freight charges due to its witnesses not being available. FOUND: That unless further hearing is requested within 10 days after service of report its complaint will be dismissed for want of prosecution. Jones Laughlin Steel Co. v. P. & L. E. 93 I. C. C. 637, 639.

§10 (3). Interveners.

See Interveners.

(a) Petitions in intervention toll the statute from the date on which they are received by the commission irrespective of the date of the order permitting intervention. Cotton Manufacturers' Asso. of S. C., 57 I. C. C. 584. Hopeman Ma-

terial Co. v. N. P. Ry. Co, 98 I. C. C. 361, 369.

IV. ORDERS OF COMMISSION.

See Advanced Rates §21½; Interstate Commerce Commission §17.

§11. Modification, Validity, and Effect.

(a) Order reopening a case for further hearing governs scope of that hearing and not notice which sets forth date and place of further hearing. Livestock to, from, and between Points in the Southeast, 91 I. C. C. 292, 293.

(b) By Section 15 (2) of the act it is required that the orders of the commission, other than orders for the payment of money, shall take effect within such reasonable time, not less than 30 days, as may be prescribed in the order, and also authorizes the commission to modify its order whenever it deems it to be necessary. Northern Grain & Warehouse Co. v. O. S. L. R. R. Co., 100 I. C. C. 319, 321.

ALL OTHER CITATIONS

New England Divisions, 85 I. C. C. 328.

§12. Review.

See Courts §5.

(a) In 95 I. C. C. 430, the Commission found that the rates on animal manure, carloads, from Perth and Lovelock, Nev., to eastbound transcontinental groups B. to J inclusive and M since Jan. 2, 1921 had been unreasonable, but that the then existing rates to Groups B, C, D and E did not exceed maximum reasonable rates. Maximum reasonable rates to Groups F to J inclusive and M were prescribed for the future. HELD, no sufficient reasons for modifying the findings in that report. Pacific Manure & Fertilizer Co. v. A. & R. R. R. 109 I. C. C. 615.

V. PARTIES.

See Association; Crimes §24; Parties: Procedure Before Commission V.

§13. Necessary and Proper Parties.

See Loss and Damage §17.

(a) The rate attacked is a joint rate and, even if federal control had not intervened, it would not have been necessary to name all the carriers participating in the transportation as parties defendant. Consolidated Coal Co. v. Director General, 93 I. C. C. 53.

(bc) As the rates charged on the shipments delivered after the termination of federal control were joint rates, the nonjoinder of defendants of the other carriers participating in the transportation is not material. Stailey Lumber Co. v. P. R. R., 96 I. C. C. 175, 176.

(d) On shipments moving during Federal control objection to complaint was raised by director general because one participating carrier was not named as a party defendant; also that since another carrier named was not under Federal control, the commission's jurisdiction does not extend to that portion of the transportation over the latter's line. HELD: Rate attacked is a joint rate and, even if Federal control had not intervened, it would not have been necessary to name all carriers participating in the transportation as parties defendant. Moreover, under joint rates liability of defendants is joint and several. Consolidated Coal Co. v. Director General, 93 I. C. C. 53, 54.

(e) Where shipments move under joint rates, the nonjoinder of one of the participating carriers as a party defendant is immaterial. Gulf City Mfg. Co., 66 I. C. C. 763. Standard Mineral Co. v. N. S. R. R., 95 I. C. C. 704, 705.

(f) Upon complaint filed more than one year after the termination of Federal control assailing rates on shipments moving and delivered during the Federal control period, the director general was not named as a party defendant. FOUND: Such shipments are barred. Stailey Lbr. Co. v. P. R. R., 96 I. C. C. 175.

(g) Complaint failed to name preferred interests or localities, and did properly present the issue of undue prejudice Rule III, Rules of Practice. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 528.

(h) Contention that there was only one consignor and consignee on rebilled shipments because consignor, a creamery company was operated by consignee through ownership of a majority of the capital stock thereof not sustained, in law the two being separate entities.

Chapin-Sacks Corp. v. P. R. R. Co., 96 I. C. C. 706, 707.

(i) Defendant having sustained the burden of proof, it is unnecessary to decide whether there is a distinction between the director general and the corporate carriers in so far as the provision of the act which places the burden of proof on the carriers is concerned. International Harvester Co. v. N. Y. C. 101 I. C. C. 89.

ALL OTHER CITATIONS

Atlas Portland Cement Co. v. C. R. R. Co., of N. J., 85 I. C. C. 611; Pacific Mills, Ltd. v. Director General, as Agent, 85 I. C. C. 677; Missouri Portland Cement Co. v. Director General, 88 I. C. C. 496; Piowaty & Sons v. Director General, as Agent, 88 I. C. C. 597; Express Rates on Milk and Cream via C. & N. W., 88 I. C. C. 696.

VII. EFFECT OF EVIDENCE.

§14½. In General.

See Evidence.

(a) Upon objection, permission to make use of certain statistical matter taken from official reports covering a period subsequent to the making of the original record denied. Michigan Traffic League v. A. A. R. R. Co., 98 I. C. C. 660, 661.

§14½a. Evidence outside the record.

(a) A state commission cannot base a finding that existing rates of an interstate carrier are excessive, and an order reducing the same on intrastate shipments on schedules and other general information which it has in its files, unless they were introduced in evidence in the particular proceeding and opportunity was given the railroad company to be heard thereon. Illinois Cent. R. Co. v. Railroad Commission of Kentucky 1 Fed. (2d) 805.

(b) After the case was submitted defendant filed a motion to strike from complainant's exceptions or to disregard certain new evidence or statements of fact therein recited and the discussion thereon. Inasmuch as these statements of fact are not part of the record, they are not entitled to consideration. Hass & Co. v. Director General, 98 I. C. C. 619.

§15a. Moot Questions.

(a) Complainant attacking defendant's rule governing distribution of box cars for loading gypsum products, established during a period of acute car shortage, and which remained in effect only one month, dismissed as moot. Complainant does not seek damages or establishment of a rule for future, but merely asked that commission pass upon propriety of rule to determine whether it was in any way violative of the act so that in event of future car shortage defendants will not be in position to establish same or a similar rule. Empire Gypsum Co. v. B., R. & P. Ry. Co., 91 I. C. C. 719.

ALL OTHER CITATIONS

Alabama Passenger Fares and Charges, 88 I. C. C. 621.

§16. Judicial notice or other decision.

See Evidence III.

(a) Parties agreeing to abide by decision in another case involving similar issues such case followed in deciding instant case. Fairmont Creamery Co. v. Director General, as Agent, 89 I. C. C. 359.

§17. Res Adjudicata.

See Evidence V, §69.

(a) In deciding a case the commission cannot forecast what its decision will be in another proceeding pending before it. Cases at issue should be decided on facts of record and in the light of present rather than prospective considerations. Rates to Southwestern Destinations, 95 I. C. C. 188, 196.

(b) Fact that issues in a proceeding before the commission are the same as those involved in another case, already decided, does not prevent their consideration again upon a different record and possible changed conditions. Des Moines Board of Trade v. D. M. & C. I., 102 I. C. C. 186, 191.

§18½. Reparation Statements and Pleadings.

See Reparation.

(a) The date upon which the complaint was originally received by the Commission, although subsequently returned for correction and stamped as filed on a later date, is the date which tolls the statute. Hopeman Material Co. v. N. P. Ry., 98 I. C. C. 361, 369.

VIII. DEFENSES AND EVIDENCE.

See Evidence.

§20. In General.

ALL CITATIONS

Cotton Mfrs. Asso. of S. C. v. C. C. & O. Ry. Co., 85 I. C. C. 131.

§22. Witnesses.

(a) Before a witness can testify as an expert, it must be shown that he possesses the necessary qualifications; that on account of special knowledge, skill, or experience, possessed and enjoyed by him over others, his opinion on the subject of inquiry will aid the court or jury to a correct conclusion. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

See Advanced Rates §9½; Evidence §13 (5), §14 (5); Rail and Water Rates (nn); Through Routes and Joint Rates §13½.

I. APPLICATION.

See Through Routes and Joint Rates §18.

(a) Complainant attacked proportional commodity rates charged on three cars of gasoline shipped in November 1920 from Big Heart, Okla., to West Eldred, Pa., as illegal in violation of section 6. Shipments moved over Midland Valley and Frisco to East St. Louis, Pennsylvania and P. S. & N. beyond, charged 74c, a combination of proportional commodity rates of 30.5c and 43.5c to and from East St. Louis. The through combination in effect June 24, 1918 was 49.5c composed of commodity rate of 20 and 29.5c to and from East St. Louis. By adding 4.5c under the combination rule published in one of the tariffs a combination of 54c would have been applicable. HELD, rate of 54c applicable, reparation awarded. Sloan & Zook Co. v. M. V. R. R., 91 I. C. C. 693.

(b) Proportional rates restricted as to application from certain originating points are not applicable on shipments originating beyond. Pacific Adjustment Co. v. O. W. R. R. & N. Co., 95 I. C. C. 669, 670.

(c) Complainant attacked proportional rates charged on grain and grain products, carloads, from points west of Buffalo, N. Y., to destinations on the Maine Central in Washington and Somerset Counties, Me., during federal control as inapplicable. Shipments were originally consigned to points on the Maine Central, usually to Bangor, Me., taking the Rockland, Me., basis of rates. They were milled in transit at Portland and the products were shipped out to points on the Maine Central. Rates assessed to final destination were combinations of the Rockland rates and certain proportionals beyond. Proportionals only are attacked. The proportionals were beyond and then only when there were no joint rates in effect from the points of origin. The points of origin were not disclosed of record. C. I. & L., tariff I. C. C. 2876 names rates from Chicago and refers to certain billing books which name arbitraries lower than the proportionals assessed. The effect of the tariffs said to be typical is to name joint rates from the points of origin to the final destinations, thus excluding application of the proportionals published in the Maine Central tariffs, except in certain instances where they are used to make the through rates under the billing books and the tariffs naming rates from points of origin. HELD, rates attacked inapplicable in so far as the proportionals named in Maine Central tariffs were applied, that the applicable rates were those named in the joint tariffs, reparation awarded. Thaxter & Co. v. Director General, 95 I. C. C. 693.

(d) Complainant attacked proportional combination charged on petroleum and its products from El. Dorado, Kans., to Detroit, Mich., between February 29 and Nov. 26, 1920 as unreasonable and illegal. Some moved via M. P., and Wabash and others via Santa Fe and Wabash. Charged combination or proportional rates to and from East St. Louis. The

socalled combination rule was published in the tariff of the carrier from East St. Louis to Detroit. On June 24, 1918 rate to East St. Louis was 15c beyond 20c, combination 35c. The rate increased 4.5c as provided for in the combination rule, made a rate of 39.5c. HELD, rate attacked inapplicable, legal rate being 39.5c, reparation awarded. Timken Detroit Axle Co. v. M. P. R. R., 96 I. C. C. 680.

(e) Charges assessed on wheat from Kansas City, Mo., to Memphis, Tenn., Hot Springs, Ark., and Deport, Tex., with transit at Leavenworth, Kans., and Marshall, Mo., found applicable and not unreasonable or discriminatory. While grain moving into Kansas City moves out to destinations here considered under proportional rates which are protected when transit is accorded at points in direct line of shipment and at points where specifically authorized, Marshall is not in direct line of shipment and complainant's shipments were back-hauled through Kansas City. Moreover, at time complainant's shipment moved, defendants' tariffs did not authorize transit at Leavenworth and Marshall on basis of proportional rates from Kansas City. Victor Milling Co. v. M. P. R. R. Co., 91 I. C. C. 58.

(f) Proportional rates ordinarily are somewhat lower than local rates. Grain from Western Trunk Line Points, 91 I. C. C. 632, 636.

(g) Rates assessed on grain and products moving from points west of Buffalo to destinations on Main Central in Washington and Somerset Counties, Me., via Washington Junction and Oakland during Federal control, found inapplicable in so far as proportionals for movements beyond Washington Junction and Oakland were applied. These proportionals were applicable only when there were no joint rates in effect from points of origin. Applicable rates were those under tariffs naming rates from points of origin and billing books to which reference was made in those tariffs. Shipments found overcharged and reparation awarded. Thaxter & Co. v. Director General, 95 I. C. C. 693.

(h) Following Williams Co., 50 I. C. C. 531, proportional rate from Cumberland, Md., to Manitowoc or Kewanee, Wis., found not an intermediate rate within the meaning of section 4, but the joint rate charged, while thus not in violation of section 4, found prima facie unreasonable under section 1. Borden Co. v. A. R. R. Co., 100 I. C. C. 153, 154.

(i) Fifth-class rates on sugar from Philadelphia, Pa., and New York, N. Y., to St. Louis, Mo., found inapplicable in that a lower commodity rate was contemporaneously in effect. The item in tariff publishing commodity rate contained a note restricting rates to proportional application only in so far as east Mississippi River crossings are concerned. It may have been the intention of carriers to so restrict application of the rate to all points listed in the item but the tariff does not effectuate that intention in so far as St. Louis is concerned. The language of the tariff rather than intention of the framers is controlling. Defendants state that use of rates on local shipments to St. Louis will result in fourth-section violations, but this does not constitute a ground for holding that they apply other than in accordance with the terms of the tariff. Refund of overcharges directed. National Candy Co. v. P. R. R., 101 I. C. C. 43.

(ia) Proportional rates on grain generally apply without regard to the territory in which the grain is produced. Such an adjustment differs from a transit arrangement in that it furnishes a constant balance. Under ordinary transit arrangements the traffic must move outbound over the same line at the balance of the through rate from point of origin to final destination, and varying inbound local rates produce varying outbound balances. As grain must be accumulated in elevators when it is moving in abundance and held until there is a demand for it, the dealer who stores his grain at a rate-breaking market has an advantage over one who stores at a transit market. Des Moines Board of Trade v. D. M. & C. I., 102 I. C. C. 186, 192.

(j) The proportional rate was unrestricted, and therefore an intermediate rate within the meaning of section 4. The through rate was thus in violation of the aggregate of intermediates provision of that section and was prima facie unreasonable. Hulsey Bessent Co. v. S. A. L. Ry., 109 I. C. C. 389.

(k) The conditions surrounding proportional and local rates are dissimilar. Nooney & Co. v. P. R. R. 112 I. C. C. 35, 36.

(l) Where interstate, proportional, or reshipping rates are named on ship-

ments originating beyond reshipping or transit points, such rates are applicable only in case the inbound charges are based on the inbound interstate rates. Montgomery Cotton Exchange v. L. & N. R. R., 112 I. C. C. 325, 327.

II. DISCRIMINATION AND REASONABLENESS.

See Across Lake Rates (b); Advanced Rates §5 (2) (c) (k), §8½a (y), §17 (p) (mm) (3c), §19 (b); Discrimination; Equalization of Rates §3 (h); Evidence §1½ (c); Long and Short Hauls §4½ (n); Reasonableness of Rates; State Rates and Regulations (n).

(a) Complainant attacked commodity rate charged on crude clay, carloads, from Dedrick, McIntyre and Dry Branch, Ga., to Niagara Falls and New Brighton, Pa., as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. Clay shipping points in Georgia are within a radius of about 30 miles of Macon. New Brighton is on the Pennsylvania 28 miles north of Pittsburgh. Shipments moved over various routes through Cincinnati, except one over Southern through Potomac Yard and Pennsylvania beyond. This was misrouted and refund made to basis of rate applicable through Cincinnati. Charged $7.09. Complainants case is predicated primarily upon the lower proportional rate applying to the Ohio river which is restricted not to apply in constructing rates to Niagara Falls and New Brighton and upon the lower rate applying to Chicago. Defendants have explained the existence of the lower proportional rate and the existence of the lower rate to Chicago is insufficient to establish the unreasonableness of rates attacked. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Niagara Wallpaper Company v. M. D. & S. R. R. 92 I. C. C. 329.

(b) Proportional rates both from Missouri River and from St. Louis, Mo., to Memphis, Tenn., are among the lowest rates in the country on high grade traffic. Helena Traffic Bureau v. M. P. R. R. Co., 89 I. C. C. 405, 411.

(c) Burlington, respondent, proposed to restrict the application of proportional joint rates on grain and grain products, carloads, from the Missouri river cities to Cairo, Ill., for beyond, to shipments moving beyond Cairo via rail lines which would result in increased rates when the outbound movement is by water. Respondents maintain joint proportional rates of 20c to Cairo on traffic originat-Cairo proper and 16.5c on traffic originating beyond Omaha and destined to Cairo, for beyond, whether by rail or water. On wheat from Omaha to St. Louis the Burlington maintains a rate of 19.5c and, when the traffic originates beyond Omaha, a proportional rate of 13.5c. On wheat from St. Louis to Cairo the I. C., which is a party to the suspended schedules, maintains a proportional rate of 6.5c applicable to shipments originating beyond St. Louis, and a proportional rate of 3c applicable to shipments originating beyond St. Louis and destined beyond Cairo. The joint proportional rates of 20 and 16.5c are based upon these rates and are divided upon that basis. The Mississippi-Warrior service publishes a joint export rail and water rate of 25c on wheat from Omaha to New Orleans via Cairo applicable to traffic originating beyond. The record shows that the bulk of the move-leans for export and that about 95% of this movement is by water. Respondents have not established beyond doubt the necessity for differentiating between traffic moving beyond Cairo by water and that moving beyond via rail. The proportional 3c rate from St. Louis to Cairo is not restricted to traffic moving beyond via rail. If the suspended schedules were allowed to become effective the proportional joint rate of 20c would exceed the aggregate of these intermediate proportional rates and, in its application to shipments to Cairo for beyond by water, would thus violate the fourth section. HELD, proposed schedules not justified. Grain and grain products from Missouri river, 91 I. C. C. 865.

(d) Complainant attacked commodity local and proportional rates on petroleum and its products including refined, crude, fuel and lubricating oils from El Dorado, Ark., to Jackson, Miss., as unreasonable, unjustly discriminatory and unduly preferential of shippers at Memphis, Tenn., Natchez, Miss., and Baton Rouge and New Orleans, La. It is alleged that the failure of Rock Island to join in establishment of proportional rates to Vicksburg no higher than those maintained to Memphis, Natchez, Baton Rouge and New Orleans resulted in undue prejudice.

From El Dorado to Jackson over Rock Island to Ruston, Ia., or over M. P., to Monroe, La., and petitioners lines beyond, rates are 30.5c. From Shreveport to Jackson rate is 25c. All the carriers concede that the rates from El Dorado to Jackson should be no higher than the rates from Shreveport. Shall the Rock Island and M. P., be required to join in the publication of rates that would result in short hauling their lines? Present proportional rates from El Dorado to Natchez, Baton Rouge and New Orleans are 14c on refined oil and 12.5c on crude oil. From the same point to Vicksburg proportional rates of 17c apply on both refined and crude oils. Rates to points east of the Mississippi river are made by adding the rates from the crossing to destinations to the proportional rates from the point of origin to the crossings. To require the Rock Island and M. P., to join in proportional rates to Vicksburg the same as those in effect to the other crossings would subject these carriers to the possibility of having not only the traffic to Jackson and points on the A. & V., but traffic to all points to which the tariff applies, as far east as the coast, diverted from their lines at Ruston and Monroe. The distance from El Dorado to Vicksburg and points on the A. & V., over Rock Island to Ruston and petitioners lines beyond is 11 miles less than the distance from Shreveport to those points. The establishment of the Shreveport basis would remove any undue prejudice that may exist against the petitioners lines or against the receivers of oils at points on those lines. HELD, evidence does not justify the Commission in requiring either the Rock Island or M. P., to join in proportional rates to Vicksburg. Rates from El Dorado to Vicksburg proper and to Jackson unreasonable to extent they exceed rates from Shreveport. Jackson Traffic Bureau v. A. & V. Ry., 92 I. C. C. 89.

(e) Respondents proposed to cancel proportional commodity rate of 16c on strawboard, carloads, from Delphi and Lafayette, Ind., to East Burlington, East Clinton, East Dubuque and East Hannibal, Ill., leaving in effect a rate of 19.5c, 90% of the corresponding sixth class rate. Lafayette is served by the C. I. & L., Big Four, L. E. & W., and Wabash. The rate of the Wabash to East Hannibal was established on May 22, 1924 in order to meet the rate to the other crossings in connection with other lines, which in turn represents a rate of 8c established on June 25, 1907, to meet a like rate in connection with the Wabash from Delphi to East St. Louis. Respondents make no showing as to the resulting increases in the through rates. HELD, suspended schedules not justified. Strawboard from Delphi, 92 I. C. C. 113.

(f) Complainant attacked commodity rates charged between June 22, 1918 and Sept. 10, 1919 on grain in carloads from Illinois and Indiana to Chicago, for reshipment by vessel, as unjust, unreasonable and unduly preferential. Grain moving to Chicago is subject to the local rates from the country stations. Upon reshipment by rail to eastern destinations in accordance with certain provisions of the tariffs adjustment is made whereby the buyer at Chicago pays the difference between the joint all rail rate from point of origin to ultimate destination and the reshipping rate from Chicago. This difference, known as a "specific" is ordinarily less than the local rate to Chicago, resulting in a refund out of the original charges to that point. When shipments move out of Chicago over lake routes no provision is made for any balancing of the local rates to Chicago with the through rail and lake or rail lake and rail charges from points of origin to ultimate destinations. Consequently the movement of such grain to Chicago must be under either local or proportional rates from the country stations. Under the practice which has prevailed for a considerable time the grower of the grain pays only the amount of the "specific" in his settlement with the buyer in Chicago. As a result, if the amount ultimately paid for the movement to Chicago exceeds the amount of the "specific" the buyer at Chicago must bear that difference. Prior to June 22, 1918 the proportional rates applicable to Chicago on grain reshipped from that point over lake or lake and rail routes were the same as the specifics applicable on grain reshipped over all rail routes. On that date the C. & E. I., and one other carrier increased the proportional rates after the entry of supplemental order in 45 I. C. C. 303, decided a year earlier. The increased granted in that case applied only to the rail movement beyond Chicago and with the two exceptions referred to the lines reaching Chicago from the west made no increase in their proportional rates to Chicago. The parity between the proportional rates and the specifics was restored on Sept. 10, 1919. Shipments originated on the C. & E. I.,

and were reshipped from Chicago by lake on account of a car shortage during which shippers were urged to use the lake vessels when practicable in order to expedite the release of cars. HELD, rates attacked not unreasonable. No damage has been shown as the result of any undue prejudice or preference which may have existed. Complaint dismissed. Armour Grain Co. v. Director General, 92 I. C. C. 482.

(g) Complainant attacked local, proportional and reshipping rates on grain and grain products from Texas, Oklahoma, Kansas, Nebraska, Colorado, Iowa, Minnesota, Indiana, Illinois and Missouri to Mississippi as unreasonable, unjustly discriminatory, and unduly prejudicial. From certain territory of origin rates on all grain and grain products to Mississippi are the same. From other territory the rates on wheat and flour are somewhat higher than the rates on coarse grain. The factors of the through rates attacked are the same from Memphis south in either instance. The general basis for rates on grain from territory west of the Mississippi river to territory east of the Mississippi and south of the Ohio rivers is the combination of local and proportional rates on certain basing points, known as primary markets or reshipping points. Complainants attack is directed against the reshipping rates from Memphis to Mississippi points, considered as factors of through rates. The complaining jobbing points enjoy the privilege of disturbing grain and grain products from comparatively all fields of production to the consuming territory which they serve on a rate equality with Memphis and other rate breaking points, provided the consuming points are beyond in direct line of transit from the source of the grain. The circumstances and conditions under which reshipping rates are maintained at Memphis appear somewhat dissimilar from those which exist at jobbing points in Mississippi. HELD, rates attacked not unreasonable but rules at Memphis and Mississippi points create undue prejudice which should be removed, complaint dismissed. Mississippi Railroad Commission v. A. & V. Ry., 93 I. C. C. 435.

(h) Respondents proposed to revise by increases and reductions local and proportional rates on hay and straw, in carloads from Missouri river points and tributary territory to Cairo, Ill., Memphis, Tenn., Mississippi river crossings south of Memphis, and to Mobile, Ala., and also to establish joint through rates on these commodities to points in the interior Mississippi valley, to which the rates are now on combination basis. Burlington R. R., published increased proportional rates on hay, in carloads, from Omaha and Kansas City when originating beyond to Metropolis, and Cairo, Ill., and Evansville, Ind., when destined beyond, to bring its rates into alignment with those previously published by respondents. The origin territory includes Missouri river points, Omaha to Kansas City, eastern Kansas, southwestern Missouri and northeast Oklahoma. The destination territory includes the river crossings Cairo, Memphis, Greenville, Vicksburg and Natchez, Miss., and New Orleans and in addition thereto interior Mississippi and Mobile, Ala. The proportional rates apply on traffic originating beyond the Missouri river cities, most of which are important hay markets. Proposed rates from Omaha to Memphis would constitute a fourth section departure in that it would exceed the rate from Sioux City and it is disapproved for that reason. In at least some instances proposed increased rates are named separately for application to Memphis or Cairo proper and for application on traffic destined beyond. Whether or not expressly so published, the rates to these markets are intended to be used, and would be applicable, as components of combination rates to southeastern and Carolina territories. The increased components of through rates to points beyond Memphis and Cairo have not been justified. HELD, approval is given to proposed increased rates to Memphis and Cairo in so far as they would apply on shipments for local delivery. They have not been justified so far as they would apply on shipments destined to points beyond. Hay and Straw to Mississippi valley 95 I. C. C. 209.

(i) Respondents proposed to cancel proportional commodity rates of 45.5c applicable on cotton factory products from Natchez and Vicksburg, Miss., and Baton Rouge, La., to western Louisiana points, including Shreveport, which would result in making applicable the third class rate of 79.5c. These proportional rates apply on traffic from southeastern territory to points to which no

joint commodity rates are published. Respondents also proposed to cancel their present joint commodity rates from Carolina territory to Shreveport which would result in materially higher combinations becoming effective. Subsequently respondents canceled their proposed cancellation of joint commodity rates from Carolina territory to Shreveport so that the only remaining issue is the reasonableness of the proportional commodity rates from river crossings to western Louisiana. HELD, suspended schedules not justified. Cotton factory products between Shreveport and southern territory, 95 I. C. C. 289.

(j) Complainant attacked commodity rates charged as proportionals on bituminous coal, originating in Kentucky and West Virginia and barged to New Albany, Ind., as unreasonable. The coal is barged down the Ohio river from the mines to New Albany where complainant takes possession, elevates the coal, then ships it out to points in Indiana. The barge lines file no tariffs with the Commission. To destinations beyond Albany the coal is transferred directly from the barge through the elevator to the cars; to handle it otherwise is said to be too expensive. The rates attacked are on a group basis. There is no uniformity in the extent of the groups or the distances for which the rates apply, no two of the carriers conforming to the scale. Complainants traffic is entitled to reasonable rates. The fact must not be overlooked that the proposed rates are to apply on traffic which originates beyond New Albany. The Commission has found reasonable rates to be 45c for 10 miles and under, 60c for hauls over 10 miles and not over 30 and 70c for hauls over 30 miles in 66 I. C. C. 338, 68 I. C. C. 295, 73 I. C. C. 27 and 73 I. C. C. 601. HELD, rates charged unreasonable to extent they exceed rates ranging from 56.5c for 10 miles and under to $1.50 for 150 miles. Slider v. B. & O. R. R., 96 I. C. C. 65.

(k) Respondents proposed to increase the proportional or reshipping rates on grain and grain products, carloads, from Kansas City, Mo., to points on the C. & N. W. Ry. in Iowa. At present the proportional rates from Kansas City to the territory under consideration are 15.5c on wheat and 14c on corn. It is proposed to increase them both by 2c, from the Peoria to the Chicago basis. The destinations are on the Northwestern, which does not reach Kansas City but the Wabash does, and until Feb. 20, 1924 it had no joint rates with the Wabash to these destinations. Through some error in the tariff department present rates were established on that date. They are on the basis maintained to that territory by other lines for both single and joint line hauls. The present adjustment over respondents lines is in harmony with the equalization of Kansas City and Omaha and is on the same basis as that generally maintained from Kansas City to this territory. Respondents have not shown that the present adjustment is improper or that the present rates are too low, and have offered no justification for a different basis over their lines from Kansas City to the destination territory. HELD, suspended schedules not justified. Grain from Kansas City, 96 I. C. C. 154.

(l) Respondents proposed to increase from 89.5c to $1.55 the proportional commodity rate on chinaware and earthenware plumbers goods, carloads, to Oklahoma City, Okla., from upper Mississippi river crossings on traffic originating at Trenton, N. J. The proposed proportional rate would exceed the local rate on plumbers earthenware consisting of basins, hoppers, urinals, bowls and water closet tanks from St. Louis territory of $1.145. HELD, suspended schedules not justified. Plumbers goods from Mississippi river to Oklahoma City, 98 I. C. C. 403.

(m) Complainant attacked combination proportional rates charged on four cars of mussel shells from Hobbs Island, Ala., to Oswego, Kas., on Oct. 22, 1921 as unreasonable and unduly prejudicial. Mussell shells are generally loaded in bulk and either box or gondola cars may be used. Loss and damage claims are not heavy. Shipments moved over the N. C. & St. L., to Metropolis, Ill., Burlington to East St. Louis or Alton, Ill., and M. K. T., beyond charged $3.75 to Metropolis and $6.70 beyond, on fertilizer basis. Later the Burlington published from Metropolis a proportional commodity rate of $3.60 the fertilizer basis to destination. HELD, rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Pioneer Pearl Button Co. v. N. C. & St. L. Ry., 98 I. C. C. 578.

(n) Complainant attacked proportional rates on canned goods carloads from Hayward and San Leandro, Calif., to

Oakland, Calif., for reshipment by water to interstate destinations as unjust and unreasonable. The interstate rates on canned goods to Oakland from San Leandro, 9.2 miles, and from Hayward, 14.5 miles, are 55c per ton and 7c per 100 pounds, respectively. There are intrastate rates on canned goods of 2.5c to Santa Clara from San Jose and Luther, 2.6 and 7 miles, respectively, and of 3.5c from Los Gatos to San Jose and Luther, 11 and 14 miles, respectively. The fifth class rate from Hayward and San Leandro to Oakland is 11c, which is the minimum for that class in this territory. This rate applies on canned goods from Burbank to Los Angeles, 9.7 miles, Lakershim to Los Angeles, 13.7 miles, Gridley to Marysville, 18.3 miles, and Ontario to Calton, 18.2 miles. There are also intrastate rates on canned goods of 8c to San Jose from San Francisco, 46.6 miles, and from Sunyvale, 8.1 miles and on canned beans and tomatoes of 8.5c from Mantesa to Stockton 13.3 miles. The 7c rate from Hayward to Oakland on intrastate movements of canned goods other than pickles and on interstate movements of all canned goods is blanketed over considerable territory and is a commodity rate substantially less than fifth class. Whether defendant is justified in maintaining a lower rate from Hayward to Oakland on intrastate movements of pickles can not be determined on this record. HELD, rates attacked not unreasonable, complaint dismissed. Prince & Co. v. S. P. Co., 98 I. C. C. 615.

(o) Proposed increased proportional rates on canned goods and iron and steel articles from Gulf ports to points on and north of Ohio River, applicable on traffic from Pacific coast through Panama Canal, for purpose of equalizing such rates with local rates applicable from New York, N. Y., to Chicago, Ill., found not justified. No similar increases are proposed in rates from south Atlantic ports, and undue prejudice in favor of such ports would result. Canned Goods and Iron and Steel Articles, 91 I. C. C. 623.

(p) Proposed proportional rates on grain and products from primary markets, and proposed through rates from stations in Iowa, Illinois, Missouri, South Dakota, and Minnesota, designed for purpose of equalizing various markets, gateways, and routes by bringing up one-factor through rates to basis of lowest combinations, found not justified. Proposed rates will not accomplish purpose for which designed for in many instances through rates lower than combinations are proposed. Moreover, where points of origin and markets are situated as are those here involved, it is extremely difficult—well-nigh impossible—to bring about combination adjustment without so greatly disregarding distance and transportation conditions as to make the rates of extremely doubtful propriety. Grain from Western Trunk Line Points, 91 I. C. C. 632.

(q) Proposed cancellation of local and proportional commodity rates on petroleum and products, from Pueblo and Walsenburg, Colo., to destinations on Denver & Rio Grande Western R. R., leaving fifth-class rates in effect, thereby resulting in substantial increases and in certain fourth-section violations, found not justified. Petroleum between Colorado, New Mexico, and Utah, 91 I. C. C. 734.

(r) Complainant attacked combination commodity rates charged of 53c on 21 tank cars of fuel oil shipped in Dec. 1920 and Jan., 1921 from Pryse, Ky., to Newport News, Va., as unreasonable. Shipments moved as routed by the consignor, L. & N., Cincinnati, O., C. & O., a distance of 784 miles, rate charged 18c to Cincinnati and proportional of 35c beyond. The contemporaneous local rate maintained by the C. & O., from Cincinnati, Louisville, Lexington and Winchester, Ky., was 43c, reduced to 39.5c on Jan. 1, 1922 and to 38.5c on July 1, 1922. Lexington is 18 miles west of Winchester. Effective Nov. 21, 1923 the rate from Pryse was made differentially 1c over the rate from Lexington to Newport News, which gave a joint rate of 39.5c from Pryse. Effective Feb. 15, 1924, the differential basis was canceled and a specific joint rate of 39.5c established. Contemporaneously there was in effect a proportional rate of 16.5c from Pryse to Cincinnati for beyond, but the application of this rate was limited to destinations north of the Ohio or west of the Mississippi and destinations in Pennsylvania and West Virginia. Effective Nov. 19, 1921 the application was extended to destinations in Virginia and all states north thereof. This proportional plus the proportional rate beyond Cincinnati made a through rate of 50.5c to Newport News. HELD, rate attacked unreasonable to extent it exceeded 50.5c, reparation awarded. Newport News Shipbuilding & Dry Dock Co. v. L. & N. R. R., 100 I. C. C. 1.

(s) Respondents, S. A. L., and A. C. L., proposed to increase the basing rates on paving brick, carloads, from Jacksonville, Fla., to destinations in Florida on their lines, only on shipments originating at Robbins, Tenn. Rates on brick from points in the south to points in Florida, south of Jacksonville, are made up of proportional rates from southern producing points to Jacksonville 3c lower than the rates to Jacksonville, proper, plus proportional rates from Jacksonville 1c lower than rates based on 88 I. C. C. 543. Prior to Mar. 4, 1925 the rates on paving brick from Robbins were 19.5c to Jacksonville proper, and 16.5c to Jacksonville when for beyond. By schedules filed to become effective on that date the C. N. O. & T. P., Southern, G. S. & F., proposed to reduce the proportional rate and likewise the rate to Jacksonville, proper, 1.5c, to 15c and 18c. The A. C. L., and S. A. L., proposed to increase the proportional rates applicable beyond Jacksonville on traffic originating at Robbins. Only, by the same amount. Although the same proportional rate beyond Jacksonville applied on traffic originating at other southern producing points, no change was proposed in the rates from Jacksonville on traffic originating at such points. The increased proportional rates from Jacksonville were suspended; but, although protested by the respondents, the rates to Jacksonville were allowed to become effective. The increase in the proportional rates beyond Jacksonville was solely for the purpose of maintaining existing rates from Robbins to points in Florida and preserving the relationship of rates on paving brick from the several producing points to points in Florida. HELD, proposed rates not justified. Basing rates on paving brick, 100 I. C. C. 390.

(t) Failure and refusal of the Rock Island and Missouri Pacific to join in establishment and maintenance of proportional rates on petroleum and products from El Dorado, Ark., to Vicksburg, Miss., no higher than those maintained to Memphis, Natchez, Baton Rouge, and New Orleans, found not unjustly discriminatory or unduly prejudicial. To require establishment of rates on basis sought would result in those carriers short hauling themselves. Jackson Traffic Bureau v. A. & V. Ry., 92 I. C. C. 89.

(u) Proposed cancellation of proportional commodity rate on strawboard from Delphi and Lafayette, Ind., to upper Mississippi River crossings, leaving in effect rates 90 per cent of sixth class, found not justified. Resulting increased through rates to points west of Mississippi River would not conform to relationship with rates from Chicago group to same destinations prescribed by commission in Indiana Public Service Commission, 88 I. C. C. 728. Strawboard from Delphi and Lafayette, Ind., 92 I. C. C. 113.

(v) Proportional rates on grain from Illinois and Indiana points to Chicago, for reshipment by vessel beyond, found not unreasonable as compared with lower so-called "specifics" applicable when grain is reshipped by rail. Formerly the proportionals and specifics were the same but in applying increases under The Fifteen Per Cent Case, 45 I. C. C. 303, this parity was disrupted and subsequently restored. It was shown that lake-vessel rates fluctuate from time to time and in many instances total charges from country origin points to final destinations were less than those applicable all rail, notwithstanding the higher proportionals; and that the proportionals were lower than Illinois intrastate rates and local rates in western territory for similar distances. Armour Grain Co. v. Director General, 92 I. C. C. 482.

(w) Proposed cancellation of proportional commodity rates on cotton factory products from Natchez, Vicksburg, and Baton Rouge, to Western Louisiana points, leaving in effect third-class rates found not justified. These proportionals apply from southeastern territory to points to which no joint commodity rates are published. Carriers urge that third class was authorized in 77 I. C. C. 473, as reasonable upon cotton-factory products moving in this territory, but in that proceeding no findings were made with respect to proportional rates. It is further urged that present proportional continues rates to Texas from the Southeast based on Shreveport combinations which are lower than joint rates, but no rate thus affected is brought to the commission's attention, nor is it shown that combination thus made is unduly low or that present joint rates from the Southeast to Texas should be deemed reasonable as minimum rates. Cotton Factory Products between Shreveport and Southern Territory, 95 I. C. C. 289.

(x) Proposed increases and changes in method of assessing gathering charges,

or proportional rates, on citrus, fruits from interior Florida points to Florida basing points, to be used as factors of through rates to certain transcontinental and intermountain territory, found not justified. Carriers attempted to justify proposed increases merely by explaining the change in method of determining freight charges. However, instead of promoting uniformity the proposed method of stating charges up to the basing points would further confuse a situation already so complex and disordered that shippers and carriers have difficulty in applying and understanding, or even explaining, the adjustment. Citrus Fruits between Points in Florida, 95 I. C. C. 532.

(y) There are no transportation or traffic conditions which would warrant higher proportional rates from interior Florida points to Jacksonville when destined to transcontinental territory than when destined to eastern territory. Citrus Fruits between Points in Florida, 95 I. C. C. 532, 536.

(z) Rates from New Albany to other points in Indiana on bituminous coal originating in Kentucky and West Virginia and barged to New Albany down the Ohio River, found unreasonable as compared with rates from Cincinnati, a competing point shipping to the same destinations and to which traffic moves under similar transportation conditions. Moreover, rates for the short intrastate movement are on too high a level as compared with intrastate rates on bituminous coal prescribed by the commission in 66 I. C. C. 338, and numerous other cases. Reasonable distance scale of rates prescribed for the future. Slider v. B. &. O., 96 I. C. C. 65.

(aa) Combination rates on fuel oil, from El Dorado, Kans., to Detroit, Mich., found inapplicable. The sum of the proportional factors in effect on June 24, 1918, plus an increase of 4.5 cents found applicable. Reparation awarded against defendant which carried the unrestricted combination rule in its tariff, following 81 I. C. C. 193. Timken-Detroit Axle Co. v. M. P. R. R. Co., 96 I. C. C. 680.

(bb) Following the principle announced in 83 I. C. C. 93, and 85 I. C. C. 40, proposed cancellation of proportional class rates applicable from Rock Island, Ill., and Davenport, Iowa, on shipments from points east of the Indiana-Illinois State Line to interior Iowa destinations, which would effect increase in rates on class traffic moving over the Peoria route, found not justified. The existing proportional class rates for service west of the Mississippi River were established without any condition that the carrier applying them should first have a haul east of the river. Proportional Rates from Upper Mississippi Crossings, 96 I. C. C. 715.

(cc) Complainant attacked carload rates on grain, proportional and local, from Des Moines to Texas, and the combination rates made over Des Moines to those destinations from territory north, east and west of Des Moines as unreasonable, unjustly discriminatory and unduly prejudicial against Des Moines and unduly preferential of Kansas City, Mo., and other Missouri river cities, Minneapolis, Minn., St. Louis, Mo., Chicago, Ill., Davenport, Iowa and Peoria, Ill. At hearing complainant modified the complaint to extent of asking for the establishment of proportional rates to Texas not greater than those contemporaneously maintained from Council Bluffs, Iowa, and Omaha, Neb. Des Moines is 154 miles west of the Misissippi river, 141 miles east of the Missouri river, on the Rock Island, C. G. W., Wabash, Burlington, C. & N. W., C. M. & St. P., M. & St. L., D. M. & C. I., and Ft. D. D. M. & S. The area from which grain is shipped to Des Moines extends for about 125 miles north and for short distances east and west of Des Moines. Rates on grain from Des Moines to Texas except Texarkana and points on the Rock Island are made by combinations of the proportional rates from Des Moines to St. Joseph or Kansas City and the proportionals beyond. Average distance Des Moines to Kansas City over direct lines is 234 miles, from Omaha to Kansas City 199 miles. Proportional rates Des Moines to Kansas City are 12c on wheat and 11c on corn, and from Omaha to Kansas City, 8c and 7c. The through proportional rates on corn from Omaha to Texas exceed the proportional rates from Kansas City by from 5.5c to 6c. To Texarkana the proportional rates on corn from Des Moines points in Texas the combinations of proportional rates from Des Moines are from 5 to 5.5c higher than the proportional rates from Omaha. Carriers established proportional rates from market points

by using the rate from Kansas City to Texarkana plus the rates beyond. The rates from St. Louis were made on the same basis, as the distance from St. Louis to Texarkana was about the same as from Kansas City. Proportional rates on grain generally apply without regard to the territory in which the grain is produced. Such an adjustment differs from a transit arrangement in that it furnishes a constant balance. Under ordinary transit arrangements the traffic must move outbound over the same line at the balance of the through rate from the point of origin to the final destination, and varying inbound local rates produce varying outbound balances. As grain must be accumulated in elevators when it is moving in abundance and held until there is a demand for it, the dealer who stores his grain at a rate breaking market has an advantage over one who stores his grain at a transit market. HELD, rates attacked unduly prejudicial to extent they exceed proportional rates from Council Bluffs or Omaha. Des Moines Board of Trade v. D. M. & C. I. Ry. 102 I. C. C. 186.

(cca) Proportional rates on grain from Des Moines, Iowa when originating beyond, to destinations in Texas found unduly prejudicial to Des Moines shippers and unduly preferential of shippers at Council Bluffs and Omaha to extent such rates from Des Moines exceed contemporaneous rates from Council Bluffs or Omaha to same destinations on traffic originating beyond. Des Moines Board of Trade v. D. M. & C. I., 102 I. C. C 186.

(ccb) Proposed restriction of proportional rates on cottonseed cake, meal, and other cottonseed products from various groups of origin in Arkansas, Missouri, and Oklahoma to Memphis, Cairo, Thebes, and East St. Louis, and of proportional rates on cottonseed meal, hulls, and cake from Blytheville, Jonesboro, Osceola, and intermediate Arkansas points to Memphis, under provision that rates named will only apply on traffic destined to points beyond to which no through rates are published, which would result in increased rates from Arkansas points to a large number of destinations north of Ohio River to which no joint rates are published and to which present combination on Memphis makes the lowest rate, found not justified. Cottonseed Products from Southwest, 102 I. C. C. 219.

(ccc) Proportional rates from Kansas City and through rates from origins in Nebraska and Kansas on grain and products to destinations in Arkansas, Louisiana, Mississippi Valley, and the Southeast, found not unreasonable or unduly prejudicial as compared with Omaha and other points. Complainant's case appears to be primarily based upon the prices of grain and the commercial practices in the buying and selling thereof, and it is desired to equalize the market prices at Kansas City and Omaha by reducing the rates from Kansas City in the amount of the proportional rate from Omaha to that point. Kansas City Board of Trade v. A. & W. Ry., 102 I. C. C. 285.

(dd) Complainant attacked proportional rates on grain and grain products from Kansas City to the Mississippi Valley as unjust and unreasonable, and unduly prejudicial to that point and unduly preferential of Omaha, Neb., Sioux City, Iowa, Des Moines, Ia., St. Louis, Mo., and Cairo, Ill., to southern territory, and that the through charges from the country points in Nebraska south of the Platt river and in Kansas on and north of the main line of the U. P., to the above named territory as unreasonable and unduly prejudicial. Territory generally north of Omaha, that is, that portion of northwestern Iowa, southwestern Minnesota, and southeastern South Dakota lying north of a line drawn from Omaha to Des Moines, west of the Northwestern, Des Moines to Mankato, Minn., and south of the line of that carrier, Mankato to Pierre, S. D., including north eastern Nebraska, is one of the principal surplus producing sections for corn and oats. This will be known as the north Omaha area. At present Omaha draws corn and oats from this territory at flat inbound rates, and reships to southern territory on proportional rates. The latter equalizes to the southeast through the various Mississippi and Ohio river crossings, Memphis to St. Louis, and Cairo to Cincinnati, O., inclusive; that is to say, the proportional rates from Omaha to any southeastern point are the same in amount through whichever gateway the grain may move. To the Mississippi valley they equalize through the Mississippi river crossings, Memphis to St. Louis, inclusive. Proportional rates are also in effect from Kansas City, which are in each instance, except over St. Louis, 1c less than the rates from Omaha. Basing on St. Louis they are the same as from Omaha. The inbound

rates from the north Omaha area to Kansas City in the majority of cases exceed the rates to Omaha by a uniform amount 7c, equal to the proportional rate on coarse grain from Omaha to Kansas City. Consequently the sum of the inbound flat rate to Kansas City plus the outbound proportional rate from that point is generally 6c higher than the sum of the rates into and out of Omaha. It appears that transit privileges are in force at Kansas City on grain moving proportional rates from Omaha to Ohio and Mississippi river crossings, St. Louis and south, under which the traffic moves out of Kansas City on the balance of the Omaha proportional rate. Therefore, on all grain from the north Omaha area routed into Kansas City via Omaha the through charges to destinations in southern territory are the same as the combinations of flat rates into Omaha and proportional rates out, thus giving the dealers at Kansas City the opportunity of merchandising grain and its products on an equality with Omaha so far as the total freight charges are concerned. The south Platte area is a heavy producer of both wheat and corn. The situation as to this territory is somewhat different from that with respect to the north Omaha area. From the south Platte area, generally speaking, the inbound rates to Kansas City are the same as or lower than these to Omaha except from portions of Nebraska in comparatively close proximity to Omaha. Consequently the through combination rates built on Kansas City are generally the same as or lower than those built on Omaha except from the portion of Nebraska indicated. In many instances there are joint through rates from this territory lower than the lowest combination. Apparently practically all of these rates apply via Kansas City and many of them also via Omaha, but the precise extent to which they apply via the two gateways is not clear. Speaking generally, it appears that from most of this area the through rates are the same or lower via Kansas City than via Omaha, with the exception noted. The through rates from both Kansas City and Omaha to the southeast are generally the same in amount through the various gateways. They are the combinations of proportionals to and from the Mississippi and Ohio river markets. Transit privileges are allowed at the various markets under which the grain may be stopped for storing, milling, and other commercial operations, and later reshipped without penalty. To both the Mississippi valley and the southeast, proportional rates are published from Kansas City on both wheat and corn via all gateways, except St. Louis, which are 1c less than from Omaha and Des Moines and 5c less than from Sioux City. Based on St. Louis the rates are the same as from Ohama. To the Mississippi valley the short line distances from Omaha via the Memphis gateway are, with few exceptions, 196 miles greater than those from Kansas City, the direct route being through the latter point. From Omaha to St. Joseph, the most northern point grouped with Kansas City, the distance is 132 miles. To the south east the short line distances from Omaha average about 150 miles greater than from Kansas City. The distances from Omaha to the southeast via Kansas City exceed the short line distances by some 26 to 65 miles. To Little Rock as typical of Arkansas destinations the proportional rates from Kansas City are 4c less than from Omaha and Des Moines; Sioux City is on a combination basis over Omaha; St. Louis is 3c under Kansas City and Cairo is 2.5c under St. Louis. To eastern Louisiana the relationship in the proportional rates are substantially the same as to other points in the Mississippi valley, the spreads gradully changing as the distance from New Orleans increases until to Shreveport, Kansas City takes 6c under Omaha, Des Moines 1c over Omaha, St. Louis the same rates as Kansas City and Cairo 2.5c under St. Louis. The local inbound rates from the south Platte area to Kansas City and Omaha do not appear to bear any fixed relationship one to the other, but, speaking generally, the rates to Kansas City, distance considered, are lower than to Omaha. Having in mind the respective distances from Kansas City and Omaha to Memphis and other Mississippi river crossings and to many points in southern territory, it appears that a difference of 1c, Kansas City under Omaha, is sufficient and does not adequately reflect the difference in distance. The varying inbound rates to Omaha and Kansas City, and varying distances and conditions encountered clearly indicate that no matter what difference may be determined upon be-

tween Omaha and Kansas City as to the proportional rates, the through rates will not break from all points on both. An equalization from all of the origin territory involved through these two points would, it seems, be impossible except by the use of through rates with transit. On the issues as presented and the record as made the Commission is not convinced that Kansas City is under any undue disadvantage as compared with Omaha and the other points alleged to be preferred. Nor does it appear that the rates under attack have been shown to be unreasonable, and on this record they are not unreasonable or otherwise unlawful. Complaint dismissed. INVESTIGATION AND SUSPENSION PROCEEDING. The rates under suspension in this proceeding are those on grain and grain products, and seed and seed products, from Colorado, Kansas, Nebraska, Missouri and Oklahoma to the Ohio river proper, and when for beyond, and to the lower Mississippi river crossings and points in the Mississippi valley. From points in Nebraska on the Burlington and M. P., the rates to the Mississippi valley will be the Missouri river combination, which is the basis at present in effect from points on other roads. From northern Kansas, the rates proposed are slightly less than the combination on the Missouri river. From central and southwestern Kansas no change is made in the rates to Memphis, but to the interior Mississippi valley, the proposed rates will result in substantial reductions. From Colorado points, no change is made in the rates to Memphis. Increases are proposed in the rates to New Orleans but because of the application of the New Orleans rates to a large territory in southern Mississippi, reductions will be brought about to points in that section. HELD, proposed rates not justified. Kansas City Board of Trade v. A. & W. Ry. 102 I. C. C. 285.

(dda) Proportional rates from Kansas City and through rates from origins in Nebraska and Kansas on grain and products to destinations in Arkansas, Louisiana, Mississippi Valley, and the southeast, found not unreasonable or unduly prejudicial as compared with Omaha and other points. Complainant desired to equalize the market prices at Kansas City and Omaha by reducing the rates from Kansas City in the amount of the proportional rate from Omaha to that point, but this could not be done without serious disturbances in rates, and there is no reasonable assurance that after such disturbance a more equitable or satisfactory adjustment would be reached. Kansas City Board of Trade v. A. & W. Ry., 102 I. C. C. 285, 300.

(ddb) Proportional rates are but factors of through rates and in many cases commission has declined to deal separately with one factor of a through rate where the through rate itself is not in issue. Kansas City Board of Trade v. A. & W. Ry., 102 I. C. C. 285, 302.

(ddc) Combination of proportional rates basing on East St. Louis or Kankakee, Ill., on petroleum and products moving from Coffeyville, Kans., and Tulsa, and Boynton, Okla., to destinations in Indiana, Ohio, Michigan, and Pennsylvania, found unreasonable to extent that components from basing points exceeded lower proportionals subsequently established. In complying with commission's decision in Reduced Rates, 1922, 58 I. C. C. 676, 720, carriers reduced proportionals from points in mid-continent fields to basing points, but similar reductions beyond were not effected until subsequent to shipments. Reparation awarded. Nat'l Petroleum Asso. v. C. & A. R. R., 102 I. C. C. 459.

(eé) Complainant attacked combination proportional rates charged on petroleum products in carloads from July 1 to 12, 1922 from Coffeyville, Kas., and Tulsa and Boynton, Okla., to Indiana, Ohio, Michigan and Pennsylvania as unreasonable. Rates were made by combinations of proportional rates basing on East St. Louis or Kankakee, Ill., whichever makes lower. In 68 I. C. C. 676, the Commission found approximately a 10% reduction of rates in effect August 26, 1920, should be made effective July 1, 1922. In compliance therewith the proportional rates from midcontinent fields to East St. Louis and Kankakee were reduced, but similar reductions in the rates beyond these basing points were not effected, although this was made on July 13, 1922. HELD, rates attacked unreasonable to the extent that components east of East St. Louis and Kankakee exceeded the proportional rates effective July 13, 1922, reparation awarded. National Petroleum Asso. v. C. & A. R. R. 102 I. C. C. 459.

(ff) Complainant attacked rates charged for that portion of the movement beyond Kansas City, Mo., rates

which were unreasonable and unduly prejudicial on wheat, carloads, originating May 18, 1920 at Beatrice, Neb., accorded transit at various points, ultimately moving to Pine Bluff, Ark. Shipment was moved via U. P., from Beatrice to Kansas City. After sale to complainant in that market it was rebilled in the same car to Leavenworth, Kas., and after storage at that point, was forwarded to Sweet Springs, Mo., for milling. An equal tonnage of shorts shipped out of Sweet Springs was stored at Charleston, Mo., and latter reshipped to Pine Bluff. Rates charged 4c to Leavenworth, proportional rate of 22.5c from that point to final destination, plus an out of line charge of 1.5c. It appears that the present transit tariff permits three transit services, but the tariff attacked may not be condemned on this account. In fact, it is doubtful whether the proportional rate from Kansas City could have been applied to complainants shipments if three stops had been authorized. HELD, rates attacked not unreasonable or unduly prejudicial, complaint dismissed. Moore Lawless Grain Co. v. M. P. R. R. 102 I. C. C. 465.

(ffa) Rates assessed on wheat from Kansas City, Mo., to Pine Bluff, Ark., with transit at Leavenworth, Kans., and Sweet Springs and Charleston, Mo., found not unreasonable or unduly prejudicial. A lower proportional rate applied for factor from Kansas City to Pine Bluff but complainant was denied its use because applicable tariff permitted only two stops for transit. While present tariff permits three transit services, tariff assailed may not be condemned on this account. Moreover, in Victor Milling Co., 91 I. C. C. 58, commission considered a somewhat similar situation and found rates not unreasonable or discriminatory, and in view of conclusions reached therein it is doubtful whether lower proportional from Kansas City could have been applied to complainant's shipments if three stops had been authorized. Moore-Lawless Grain Co. v. M. P., 102 I. C. C. 465.

(ffb) Upon further hearing, proposal to correct error in schedules originally published on Peoria basis, by increasing to Chicago group basis proportional rates on grain and products from Kansas City to points in Iowa on Chicago & North Western, found justified. While present rates are more in harmony with general adjustment than rates proposed, present rates sought to be increased are on a highly competitive basis and are less than maximum reasonable rates. Finding in former report, 96 I. C. C. 154, reversed. Grain from Kansas City, 102 I. C. C. 475.

(gg) In 96 I. C. C. 154, the Commission found the proposed increased proportional rates on grain and grain products, carloads, from Kansas City, Mo, to C. & N. W., stations in Iowa not justified. The rates which are sought to be increased were published by the Wabash in connection with the Northwestern, and through a misunderstanding were made 15.5c on wheat and 14c on corn, which is the Peoria, Ill., basis instead of 17.5c on wheat and 16c on corn authorized by the Northwestern, the Chicago basis. The Peoria basis is maintained to the destination territory by other lines for both single line and joint line hauls. The Northwestern has for a long time maintained joint rates from Kansas City to Chicago in connection with the M. P., via Omaha and C. G. W., via Marshalltown, to the same territory. From Minneapolis to Chicago the proportional rates are 13c on wheat and 11.5c on coarse grains. These rates apply to intermediate stations in Iowa over the Rock Island through Cedar Rapids and to stations on the Northwestern through Mason City and Belle Plaine, Iowa. To points west of these lines only local rates from Minneapolis apply. Distance has been largely disregarded in establishing these group rates. The Northwestern is the only line serving points in the socalled Peoria group in Iowa which maintains from Kansas City rates higher than the Peoria basis. The Northwestern can not be said to have voluntarily joined with the other carriers in establishing the Peoria basis of rates to points in Iowa. All of the rates, except those under suspension, to points on its lines in Iowa from Kansas City are on the Chicago basis. The Wabash, on the other hand, joins with a number of other lines in publishing the Peoria basis of rates from Kansas City to points in Iowa and is willing to maintain the same basis in connection with the Northwestern. While the Commission believes that the present rates are more in harmony with the general adjustment than the rates proposed, HELD, present rates are on a highly competitive basis and are less than reasonable maximum rates, schedules justified. Grain from Kansas City 102 I. C. C. 475.

(hh) Complainant attacked proportional rates on rough rice, carloads, shipped from certain producing points to Baton Rouge for cleaning and forwarding to interstate and foreign destinations since August 1, 1922 as unjust, unreasonable, unjustly discriminatory and unduly prejudicial to extent they exceeded rates prescribed in 69 I. C. C. 508, to Lake Charles, La. All of the producing points are served by the T. & P., and rough rice moves into Baton Rouge over N. O. & T. M., a two line haul. The rice is unloaded at the mill and undergoes a cleaning process. The hulls are knocked off, and the bran is removed. The clean rice is shipped outbound in different cars, and a large percentage is destined to interstate and foreign points. Most of the shipments included in complaints claims for reparation moved outbound from Baton Rouge over the Y. & M. V. as the initial line, which had not participated in the inbound movements. No joint rates were or are applicable from the producing points to these ultimate destinations, and none are sought in this proceeding, but to certain other territory of ultimate destination, California for example, the transit tariffs did and do provide for the application of the joint or through rates from the producing points. The claims are identical in character and principle with those on which reparation was awarded on rough rice in the Lake Charles case. The transportation conditions over the route of movement are practically the same as those from and to the points between which the prescribed distance scale applies. HELD, rates attacked unreasonable and unduly prejudicial to extent they exceeded rates prescribed in the Lake Charles case, reparation awarded. Baton Rouge Rice Mill v. N. O. T. & M. Ry. 102 I. C. C. 507.

(ii) Proportional rates are but parts of through rates and are in the nature of divisions rather than of rates. The Commission has repeatedly found that where joint through rates are reasonable and free from undue prejudice shippers are not concerned with whether the divisions up to or beyond a given gateway are higher on their traffic than on traffic of their competitors. Morrell & Company v. N. Y. C. R. R. 104 I. C. C. 104, 128.

(jj) Complainant attacked carload rates on wool, in the grease, in sacks, from Iowa and Missouri to Boston, Mass. the factor east of the Mississippi river, a proportional commodity rate of 101.5c minimum 24,000 pounds attacked as unreasonable, unjustly discriminatory and unduly prejudicial. In 77 I. C. C. 431, the Commission found the rate attacked not unreasonable but as to traffic from Iowa it should be made to apply from west bank crossings. On Page 433 it was stated "from points in Missouri the proportional fourth class rates apply to the east bank, and may, therefore, be used in combination with the proportional commodity rate beyond. The record does not disclose any conditions pertaining to Missouri wool that would require different treatment from that accorded Iowa traffic. HELD, rates on wool, in the grease, in sacks, from stations in Missouri to Boston are unreasonable to extent they exceed fourth class rates to the Mississippi river and proportional rate beyond. Boston Wool Trade Asso. v. B. & A. R. R. 107 I. C. C. 496.

(kk) Proposal to increase import, coastwise, and proportional rates on fertilizer materials, c. l., from New Orleans, La., and subports to points in Louisiana, effecting an adjustment of both domestic and import rates to the basis of rates prescribed in Memphis-Southwestern Investigation, 77 I. C. C., 473, found justified. Proposed schedules will correct the present lack of uniformity in minimum-weight provisions and in tariff descriptions of commodities accorded fertilizer rates and provide rates applicable from shipside to cars, handling charges being absorbed by carriers. Suspended schedules vacated and proceeding discontinued. Fertilizer to Louisiana points, 100 I. C. C. 64.

(ll) Relationship of rates on certain commodities, for export, import, or coast-wise movement via Galveston, Tex. from or to points in Texas, Oklahoma, western Louisiana, Arkansas, and Kansas found unduly prejudicial to Galveston and unduly preferential of New Orleans, La. Such undue prejudice should be removed by establishing the same rates to or from New Orleans or Galveston, as the case may be, in instances where the differences in distance from and to the two ports are not greater than 100 miles, and by establishing rates to or from Galveston, as the case may be, certain prescribed differentials, under New Orleans in instances where the

differences in distance in favor of Galveston are greater than 100 miles. The record is not sufficiently complete to warrant the commission in prescribing relationships between the rates to or from Galveston and New Orleans on other commodities or from or to points other than those embraced in the foregoing findings. Relationships herein prescribed will serve as a guide to defendants in readjusting the rates on other export, import, and coastwise traffic. Galveston Commercial Asso. v. G. H. & S. A. Ry. Co., 100 I. C. C. 110.

(mm) Proposed increased proportional rates on paving brick from Jacksonville, Fla., to points in Florida, on traffic originating at Robbins, Tenn., resulting in rates higher than rates between same points on shipments originating at other southern producing points, higher than rates for corresponding distances from Jacksonville to points in Florida on Florida East Coast Ry., and higher than rates on other articles included in uniform brick list, in violation of the order in National Paving Brick Mfrs. Asso., 68 I. C. C. 213, found not justified. Basing Rates on Paving Brick, 100 I. C. C. 390.

(nn) Rate on peanuts from points in Alabama, Florida, Georgia, South Carolina, and Tennessee to Chicago, Ill., Milwaukee, Wis., Canton and Cleveland, Ohio, South Bend, Ind., and Dubuque, Iowa, found unjust and unreasonable to extent that factors thereof north of Ohio River, representing in most instances proportional commodity rates, exceed those specified herein, which are prescribed as reasonable for future. United Fig & Date Co. v. A. C. L., 101 I. C. C. 138.

(oo) Proposal to increase local, proportional and reshipping rates on grain, grain products, and grain by-products from west-bank Lake Michigan ports across lake, upper Mississippi River crossings, St. Louis, Chicago and other Illinois basing points, to northeastern Ohio, to be effected by changing the rate basis of the destination area from the Cleveland to Youngstown, Ohio, group, found not justified, in that such a change would result in an unlawful rate situation and departures from the long and short-haul provision of section 4 of the act. Grain and Products Between C. F. A. Points, 101 I. C. C. 662.

(pp) M. & O., respondent, proposed to increase the rates on hay, carloads, from St. Louis, Mo., and East St. Louis, Ill., to certain destinations on its line in Mississippi south of Tupelo, Miss. Respondents proposed to establish a proportional rate of 33c on hay, carloads, from St. Louis and East St. Louis, when originating beyond, to all destinations on its main line in Mississippi valley territory south of Tupelo to and including Meridian, Miss. Respondents main line extends south from St. Louis, its northern terminus, to Mobile, Ala., its southern terminus, a distance of 657 miles. The present rate on hay from St. Louis and East St. Louis to Jackson over the I. C., 526 miles, and to Vicksburg, 537 miles, is 29c, to Greenville, Miss., 467 miles, 26c, and to Natchez, 613 miles, 31c. It is noted that the present rate to Meridan is the same as to Vicksburg and Jackson and somewhat lower than the rate to Natchez, Mobile and New Orleans. Under the proposed revision the Meridian rate would be increased to the level of the rate to Mobile and New Orleans, points 657 and 707 miles, from St. Louis. Respondent here proposes a general adjustment of rates on hay in the Mississippi valley, without cooperation with other carriers in the same territory, and upon an inadequate record. HELD, proposal not justified. Hay to Mississippi points 109 I. C. C. 36.

(qq) Factors of through rates on traffic destined beyond should be lower than the local rates except where the latter are shown to be depressed by special conditions to an extent which makes them reasonable for application as proportional rates. Wichita Chamber of Commerce v. A. & V. Ry. 109 I. C. C. 368, 376.

Proportional Commodity Rates, 85 I. C. C. 40; Tuscaloosa Cotton Seed Co. v. A. G. S. Ry. Co., 88 I. C. C. 258.

IV. EVIDENCE AND PROCEDURE.

See Evidence.

(a) Proportional rates are but factors of through rates and the Commission in many cases has declined to deal separately with one factor of a through rate where the through rate itself is not in issue. Comparison of proportional rates with proportional rates is

to a certain extent unsatisfactory because it is no different than comparing two different divisions of through rates and the only satisfactory way of making a comparison is to consider the total service involved. Kansas City Board of Trade v. A. & W. Ry. 102 I. C. C. 285, 302.

(b) The Commission is continually dealing with proportional rates without reference to the other factors with which they are used in the construction of through rates. Proportional rates on livestock 109 I. C. C. 417, 419.

VI. TARIFFS AND PUBLICATION.

See Discrimination §10 (a); Tariffs.

(a) Contention that proportional rate was not available as a factor in a combination rate because tariff restricted its use to points "where no through rates are published," not sustained, as no through rates were published in such tariff, and item carrying attempted restriction made no reference to any tariff in which through rates could be located. Joseph Iron Co., 37 I. C. C. 591; 40 I. C. C. 525. Ash Grove Lime & Portland Cement Co. v. M. P. R. R., 92 I. C. C 51, 52.

VII. REPARATION.

See Reparation.

(a) By note 2 of Glenns I. C. C. A-534 respondents proposed to restrict the application of rates published in that tariff on lumber, in carloads, between points in Florida, including Pensacola, in extreme western Florida, so as to prevent the use of such rates in constructing through interstate rates from or to points in Florida. The movement of lumber is into, rather than from, Florida, and the evidence related almost exclusively to rates into the state. For many years the general basis for constructing through rates to interior Florida in the absence of specific rates has been by combining rates to Jacksonville, Fla., with basing or proportional rates beyond. As the tariff contained no provisions against the use of the rates as components of through rates, it afforded lower combination rates on Pensacola than on Jacksonville in constructing through rates from a somewhat extensive territory. The effect of the suspended schedules would restore the Jacksonville combination. Generally the rates from the origin territory to Jacksonville do not apply via Pensacola, the route being through Georgia. HELD, schedule not justified. Lumber from or to Florida points 112 I. C. C. 133.

VIII. RESTRICTED RATES.

See Restricted Rates.

(a) Proposed restriction of proportional rates on grain and products from Missouri River points to Cairo, Ill., for beyond, to traffic moving beyond Cairo "via rail lines," which would result in increased rates when outbound movement is by water, found not justified. Respondents failed to establish beyond doubt necessity for differentiating between traffic moving beyond Cairo by water and that moving beyond by rail. Morover, if suspended schedules were allowed to become effective, proportional joint rate would exceed aggregate of intermediate proportionals and, in its application to shipments to Cairo for beyond by water, would thus violate fourth section. Grain and Products from Missouri River, 91 I. C. C. 365.

(b) Proposed proportional rates on, grain and products from primary markets, and proposed through rates from stations in Iowa, Illinois, Missouri, South Dakota, and Minnesota, designed for purpose of equalizing various markets, gateways, and routes by bringing up one-factor through rates to basis of lowest combinations, found not justified. Proposed rates will not accomplish purpose for which designed, for in many instances through rates lower than combinations are proposed. Moreover, where points of origin and markets are situated as are those here involved, it is extremely difficult—well-nigh impossible—to bring about combination adjustment without so greatly disregarding distance and transportation conditions as to make the rates of extremely doubtful propriety. Grain from Western Trunk Line Points, 91 I. C. C. 632.

(c) Respondents proposed to restrict the application of proportional and reshipping rates on grain and grain products from Argo and Blue Island, Ill., and North Hammond and Roby, Ind., stations in the Chicago switching district, to Boston, Mass., and other destinations in eastern Canada, applicable over the Northwestern and Milwaukee to Milwaukee, Wis., thence C. A. T., line so as to apply only from industries named at those stations. Interior Kansas ship-

ments through Milwaukee in connection with the C. A. T., line move over M. & P., to St. Louis, Mo., thence to these stations and beyond via Northwestern or Milwaukee. Usually the movement beyond St. Louis is over the Alton to Argo. The effect of the proposed restriction would be to make applicable to the described rail and water traffic through Milwaukee the combination on St. Louis. This is 2c higher than the existing basis through Argo. The M. P., participates in rates of 17.5c on the traffic described to Chicago by way of St. Louis and to Milwaukee by way of South Omaha, Neb., but not to Milwaukee through the St. Louis gateway. This carrier restricts to its route through St. Louis the movement of grain, originating on its line and milled in transit by protestants, which is destined to points east of the Indiana-Illinois state line. It makes no such restriction when the transit is at Kansas City. Because of the restriction of protestants traffic to the St. Louis gateway and the failure of the M. P., to maintain or participate in rates from Kansas City to Milwaukee through St. Louis on as low a basis as it now does through South Omaha, protestants would be unable to use the Milwaukee gateway on M. P., tonnage milled by them in transit and destined east over the C. A. T., line on as low a rate basis as is available from the same or other points on competing lines, in the same territory of origin if it were not for the rates now available from Argo and the three other stations named. The enforcement maintenance of the existing schedules would serve to perpetuate an unintended situation, apparently inequitable to the Chicago-Milwaukee rail lines and the C. A. T., line and unduly advantageous to the carrier which apparently should make the concession necessary to enable protestants to do business on an equality with their competitors. If under the proposed basis protestants should be unduly prejudiced by inability to reach Milwaukee on the Chicago basis of rates, they have an appropriate remedy. HELD, schedules justified. Grain and grain products from Argo, 101 I. C. C. 303.

(d) Proportional rates restricted in their application from specific points of origin are not applicable on shipments originating beyond. Weir Smelting Co., 74 I. C. C. 260, 262. Pacific Adjustment Co. v. O. W. R. R. & Nav. Co., 95 I. C. C. 669, 670.

(e) Respondents proposed to restrict the application of proportional rates on cottonseed cake, meal and other cottonseed products from various groups of origin in Arkansas, Missouri and Oklahoma to Cairo, Thebes, and East St. Louis, Ill., and Memphis, Tenn., and proportional rates on cottonseed meal, hull and cake from Blytheville, Jonesboro, Osceola, and intermediate Arkansas points to Memphis. The proposal is to restrict the application by publication of the following provision: Rates named will only apply on traffic destined to points beyond to which no through rates are published. The proposed change would increase the rates from Arkansas points to a large number of destinations north of the Ohio river to which no joint rates are published and to which the present combination on Memphis makes the lowest rate. HELD, schedules not justified. Cottonseed products from southwest, 102 I. C. C. 219.

(f) Following Joseph Iron Co., 37 I. C. C. 591, 40 I. C. C. 555, proportional rate found not so properly restricted as to make its application definite, clear, or ascertainable, and that the restriction thus failing, the rate found an intermediate within the meaning of section 4. Defendant attempts to distinguish the cited cases from the present one on the ground that here the through rate is published in a commodity tariff, which is a natural place to look for it. But the test is whether the restriction itself gives a definite reference by which the presence or absence of the through rate may be ascertained, thus the rates here are in violation of the aggregate-of-intermediate clause of section 4 and are prima facie unreasonable. Borden Co. v. A. R. R. Co., 100 I. C. C. 153, 154, 155.

(g) Proposal to restrict application of proportional or reshipping rates on grain and products from Argo, Ill., and other stations in the Chicago switching district, to Boston and destinations taking that rate and to destinations in eastern Canada, via Milwaukee, and make applicable to the rail and lake traffic through Milwaukee the higher combination of rates on St. Louis, found justified. Present Argo rates are being used on traffic for which they were never intended, resulting in disadvantages to certain carriers and avoidance of terminal charges at Chicago by certain lines. Proposed schedules would remedy such

disadvantages. Grain and Products from Argo, 101 I. C. C. 303.

PROTECTIVE SERVICE

See Facilities and Privileges §10½; Perishable Freight; Precooling; Refrigeration.

(a) Protective tariff rule governing l. c. l. shipments provided that carriers would furnish, or allow use of, refrigerator cars when aggregate weight of shipments was not less than 15,000 pounds, with no charge for refrigeration service unless specifically provided for in separate tariffs. Upon contention that shipments of lettuce were l. c. l. shipments entitled to benefits of the rule, Found: As each box was not marked as required by the classification to obtain benefit of the l. c. l. rate, cars used were ordered for c. l. shipments, bills of lading and shipping orders signed by or for shippers showed minimum weights applicable to c. l. shipments, and bore notations and instructions having application only to c. l. traffic under the protective tariff, the c. l. rates, minimum, and stated refrigeration charges applicable thereto were legally assessed. Martin v. P. R. R. 92 I. C. C. 639.

(b) Deciduous fruits usually move under refrigeration, in refrigerator cars considerably heavier in proportion to their loading capacity than box cars. The shipments must be stopped at various points en route for reicing and expedited schedules are maintained which are faster than those for citrus fruits and other freight, except fresh vegetables and cantaloupes, and necessitate a reduction in the tonnage of 20 to 50 per cent below that of "drag trains." Calif. Growers' & Shippers' Protective League v. S. P. Co., 100 I. C. C. 79, 96, 98.

QUARANTINE REGULATIONS

See Cars and Car Supply §32¼.

(a) Rate charged on two carloads of grapefruit from Largo, Fla., to Seattle, Wash., during period of Federal control, found unreasonable to extent it exceeded lower rates previously and subsequently in effect, which lower rates were under cancellation at time of movement owing to an existing California quarantine order. Reparation awarded. Ryan Fruit Co. v. Director General, 100 I. C. C. 237.

RAIL-AND-WATER RATES

See Bills of Lading §3; Classification §20 (o), §22 (4a); Equalization of Rates §4 (3); Evidence §13 (7), §14 (4); Lighterage; Panama Canal Act; Port-to-Port Rates; Routing and Misrouting §6½; Through Routes and Joint Rates; Water Carriers.

(a) Lake-and-rail and rail-lake-and-rail rates from eastern points to La Crosse, Wis., and Winona and Red Wing, Minn., found not unreasonable or unduly prejudicial as compared with similar rates to St. Paul and Minneapolis, Minn. To apply rates sought would disturb adjustments previously prescribed by commission in various cases, and would result in departures from requirements of the fourth section. La Crosse Chamber of Commerce v. G. L. T. Corp., 89 I. C. C. 386.

(b) Complainant attacked lake and rail and rail lake and rail rates from eastern points to La Crosse, Wis., Winona and Red Wing, Minn., as unjust, unreasonable, and unduly prejudicial as compared with rates to Eau Claire, Wis., and Twin Cities, Minn. Effective May 31, 1923 joint rates were published and the case was tried on the understanding that these joint rates are in issue because higher than rates to the Twin Cities. Prior to 1916 rates on lake borne traffic to complaining cities had been the same as to the Twin Cities for 10 years and more. Complainant cities are on the Mississippi river, north of Dubuque, Iowa, the northernmost points which, for transportation purposes, is classed as a Mississippi river crossing, and south of the Twin Cities. So far as all rail transportation from eastern points is concerned they are intermediate to the Twin Cities by one western trunk line and their rates may not exceed those to the Twin Cities. La Crosse, Winona and Red Wing are entitled to the benefits of their geographical location between Dubuque and the Twin Cities. But the competition between carriers which influences rates at Mississippi river crossings, and the proximity to Duluth in addition to carrier competition which controls the level of rates at the Twin Cities, are conditions which do not obtain at the complainant cities. HELD, rates attacked not unjust, unreasonable or unduly prejudicial, complaint dismissed. La Crosse Chamber of Com-

merce v. G. L. T. Corpn., 89 I. C. C. 386.

(c) Southern Pacific system, proposed to reduce the existing carload commodity rates as published in about 115 tariff items covering a varied list of articles. All purport to name rates from the piers of the Southern Pacific Company-Atlantic Steamship Lines (Morgan Lines) at New York, N. Y., by water to Galveston, Tex., thence by rail to destinations on the lines of the S. P., west of El Paso, Tex., in New Mexico, in Arizona, and in California except Searles and points thereof on the Owenyo branch, and points east of Colfax. The rates would also apply via New Orleans but respondent moves shipments over that route only in cases of emergency. Complainant, attacked as unduly prejudicial to Chicago, Ill., and vicinity, and unduly preferential of New York, existing rates on various commodities from respondents New York piers over the Sunset-Gulf route to the destination territory involved. The issues are: Will the suspended rates result in undue prejudice and preference? Are they high enough to cover the cost of rendering the service plus some return on the investment? Since the return of the ships to the Panama Canal route subsequent to the War, traffic which is susceptible of water carriage has been moving from the Atlantic seaboard to the Pacific coast over this route in large volume, and the low rates offered have attracted traffic from points several hundred miles back in the interior. It is fair to conclude that the proposed rates may draw some traffic away from the all rail lines, although the record leads to the conclusion that the volume so taken must necessarily be quite small. The canal competition is still severe, and in all probility will continue so. Respondent can not hope to attract business from the canal lines on Group A rates. The rates here proposed will doubtless obtain for respondent some traffic which is now moving through the canal, particularly to interior destinations. The fact that in meeting in a measure the competition of the canal lines it may at the same time draw some traffic from the all rail lines does not deprive it of its right so to compete, provided, of course, that it does not thereby create undue prejudice and preference or make rates so low as unduly to burden other traffic. The equating of 3 miles of water for 1 mile of rail transportation is certainly a fair basis for the proponents of these rates to assume. The equated distance of the Sunset-Gulf route to California terminals does not greatly exceed the average all rail distance from Chicago, an important Group D point. The service actually performed on traffic handled by respondent from Group D, from the standpoint of distance, exceeded in each instance the equated mileage of the Sunset-Gulf. With respect to the request that the Commission prescribe a definite, fixed relationship between respondents rates from New York piers on the one hand, and the all rail rates from Group D on the other, to the territory here considered: As to many of the commodities there is no specific evidence of the amount of difference in the rates which may exist without injuriously affecting protestants; and as to those commodities with respect to which evidence concerning competition was adduced, it is evident that the extent to which the difference between the rates might reasonably vary differs with the different commodities, the different points of destination, and market and other conditions. There is no sufficient evidence upon which a definite, fixed relation can be prescribed, either as to the commodities as a whole or any of them. The present rate adjustments are such that the canal lines secure practically all of the traffic not requiring expedited service, in commodities susceptible of water transportation, now moving from New York and vicinity to California ports and to considerable interior territory. Any benefits conferred under Section 500 of the transportation act, 1920, accrue as well to the Morgan Line as to other water carriers, regardless of the fact that it is owned by a rail carrier; and a rate adjustment which will secure to the Morgan Line only an equitable proportion of the available traffic is in line with the intent of this provision of the law. The rate adjustment here proposed appears to be a step in the direction of securing, as between the water carriers, a more equitable distribution of the available traffic, and as such its tendency will be toward attaining the ends designed by the law. HELD, suspended schedules justified, except item 1530 B in Supt. 29 to Counties I. C. C. 1114, Supt. 29 to Curletts I. C. C. A 90, and Supt. 29 to Jones I. C. C. 1333, which was published in error. Rates attacked not unduly prejudicial, complaint dismissed. Reduced commodity rates to Pacific coast, 89 I. C. C. 512.

(d) The Commission has heretofore adverted to the equating of the water

and rail hauls upon the basis of 3 miles of the former to 1 mile of the latter. In a comparison of water transportation with rail transportation, where a ratio is used for the water haul, the ratio used can not be supposed to be the exact equivalent of the water haul expressed in terms of rail mileage. A comparison of dissimilar services can not be made with mathematical accuracy. Reduced rates to Pacific coast, 89 I. C. C. 512, 524.

(e) Ratio of 3 miles of water haul to 1 mile of rail haul approved as a measure of rail and water rates. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512, 524, 525.

(f) Fact that in meeting in a measure the competition of canal lines a carrier comprising a water-and-rail route may at the same time draw some traffic from the all-rail lines does not deprive it of its right to so compete, provided that it does not thereby create undue prejudice and preference or make rates so low as unduly to burden other traffic. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512, 521.

(g) In a comparison of water transportation with rail transportation, where a ratio is used for the water haul, the ratio used can not be supposed to be exact equivalent of the water haul expressed in terms of rail mileage. A comparison of such dissimilar services can not be made with mathematical accuracy. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512, 524, 525.

(h) The commission has no jurisdiction, in a proceeding involving proposed reduced rail-and-water rates, to initiate rates over all-rail routes, where such all-rail rates are not in issue. Nebraska Livestock Case, 89 I. C. C. 531, 537.

(i) The duty to furnish reasonable service while engaged in business as a common carrier is to be distinguished from the obligation to continue in business. The imposition of a duty upon a common carrier by water to furnish transportation upon reasonable request does not create an obligation to continue to operate boats on a particular route. The provision of subdivision 18 of the act is specifically limited to lines of railroad. This indicates legislative intention that carriers by water are not required to continue, and may cease to operate if they see fit. Routing between Texas and eastern territory, 91 I. C. C. 455, 456.

(j) International-Great Northern R. R., respondent, proposed to cancel its participation in rates on cotton and linters from the Southwest, via rail and water, to eastern points in so far as the same are applicable through the port of New Orleans, La. If permitted to become effective the proposed cancellation will result in substantial increases in rates on cotton and linters handled by respondent and moved by its rail connections to New Orleans for water and water and rail transportation beyond that port to eastern seaboard destinations. At present joint rail and water rates apply on cotton from the southwest to eastern mills under which concentration is provided at Houston, Galveston or New Orleans. Respondent serves Galveston and Houston and sought to increase its revenue from this traffic by preventing the movement to New Orleans, thereby increasing the volume of traffic through the Texas ports named. The record contains no justification for any increase in rates or total charges on cotton moving as described. Were the cancellations in issue permitted to become effective, all cotton handled by respondent, whether originating locally on its lines or handled by it as an intermediate carrier, would be subject to the combination of rates to and from New Orleans when moved through that port. HELD, schedules not justified. Cotton and cotton linters from southwest via rail and water to eastern points, 91 I. C. C. 717.

(k) Complainant attacked combination class rates charged on two less carload shipments of pulp paper on July 20, 1922 and March 30, 1923 from West Point, Va., to Saugerties, N. Y., as unreasonable and unduly preferential. West Point is 39 miles east of Richmond, Va., Saugerties is 42 miles south of Albany, N. Y. Shipments moved via Chesapeake Steamship Company, Baltimore, Md., and B. & O., and West Shore beyond through Jersey City, charged fifth class of 30.5c to Baltimore and third class rate of 47.5c beyond. A joint water and rail rate of 59c applied on pulp paper in less carloads from West Point to Ravena, N. Y., on the West Shore, 29 miles north of Saugerties, which was established over route of movement to Saugerties. No violation of the provisions of the fourth section existed because the rate to Ravena over route of movement was the same as that to Saugerties, and the 59c joint rate was restricted to the water and rail route of the Chesapeake Steamship

Company to Baltimore, the Pennsylvania to Newberry Junction, Pa., and N. Y. C., beyond. HELD, rate attacked not unreasonable or complainant damaged by the undue prejudice which may have existed, complaint dismissed. Smythe Company v. Chesapeake Steamship Co., 92 I. C. C. 95.

(l) Respondents proposed to withdraw from participation in through joint lake and rail and rail lake and rail rates from and via various Great Lakes ports to points on certain of respondents eastern connections. Respondents chiefly concerned in the changes are the D. L. & W., Erie, L. V., all of which have lines extending east from Buffalo. They each publish or concur in tariffs carrying rate bases for eastbound freight via lake ports and steamer lines to points in trunk line and New England territories. Lake lines affected are the Great Lakes Transit Corporation, C. & B. T. Co., and D. & C. Navigation Company. The western lake ports from which the traffic in question moves are Duluth, Minn., Milwaukee, Wis., Chicago, Ill., Detroit, Mich., and Cleveland, O., and ports of occasional call. Protestants are chiefly interested in the movement of grain and grain products. The chief arguments advanced in support of the suspended schedules are that the cost of handling at the docks reduces the revenue from this traffic to a dangerously low figure, and that the remaining routes are ample to handle the traffic without injuriously affecting the public. HELD, proposed cancellation of the routes has been justified. Lake and rail rates to eastern destinations, 92 I. C. C. 183.

(m) Complainant attacked water and rail rates charged on 10 cars of asphalt from San Francisco, Calif., to Great Falls and Billings, Mont., between August 12 and Oct. 17, 1916, as unjust and unreasonable. Shipments moved as routed over defendants. the rail movement being over the S. P. & S., and G. N. Tariffs of the Great Northern Steamship Company were on file with the Commission, charged at 49.5c to Great Falls and 67.5c to Billings based upon rate of 12.5c for water haul from San Francisco to Portland and 37c and 55c, respectively beyond. There was contemporaneously in effect a proportional rate of 10c from San Francisco to Portland on asphalt moving to these Montana points applicable over the Portland & San Francisco Steamship line to Portland and O. W. R. R. & N., and G. N., beyond. Rate of 12.5c admitted to be unreasonable by defendants. HELD, rates attacked unreasonable to extent the factor from San Francisco for haul by water exceeded 10c, reparation awarded. Warren Construction Co. v. G. N. P. S. S. Co., 92 I. C. C. 302.

(n) In 77 I. C. C. 317, the Commission laid down certain general principles to govern the division of joint rates between complainant, called the barge line, and the defendant rail carriers, and also to govern the establishment by the barge line and defendants of additional through routes and joint rates. In order that New Orleans sugar may reach the great consuming market of Chicago, in competition with the eastern supply, it has long been the policy of the I. C., to publish a rate from New Orleans to Chicago equal to the rail and lake rate from New York to Chicago. Inasmuch as the distance is somewhat longer and the movement through higher rated territory, this results in a relatively low or depressed rate from New Orleans. It is now 54c, all rail, and the barge line, in accordance with its policy of establishing a differential under the all rail basis to compensate for its slower and inferior service, has followed this with a barge and rail rate of 43.5c. Similar rates are published to other destinations in central and western trunk line territories. Formerly the all rail rates from interior refining points in Louisiana to northern destinations were made arbitraries higher than the rates from New Orleans, but since Jan. 1922, they have been the same. Apparently this parity was established to help the interior producers. A similar parity is maintained in the case of the differential joint rates in which the barge line participates. The barge line reaches none of the northern interior destinations and transfers its sugar at St. Louis or Cairo to the northern lines or to the I. C., or M. P. St. Louis is its preferred port of interchange because of the longer haul, but in the winter season it is often necessary to make the interchange at Cairo. On all rail sugar from New Orleans the northern lines receive percentages of the joint rates varying according to destination after deduction of 3c for the bridge crossing at Cairo. Apparently they receive the same divisions when the sugar moves by barge and rail. When the New Orleans rates were extended to Louisiana interior points, the northern

lines refused to shrink their divisions and insisted that any divisions accorded the Louisiana lines out of these new joint rates must be absorbed by the intermediate lines, such as the I. C., or M. P. HELD, just, reasonable, and equitable divisions to be received by the Louisiana lines out of the joint rail barge rail rates in question would be not to exceed 9c for 7) miles or less to 16c for 250 miles. Where the haul is over two or more lines not under common control or management the above amounts should each be increased by 2c. Where the rail haul includes a crossing of the Mississippi river, such constructive mileage as is contemporaneously used in making rates over the same route should be added to the actual distance in applying the foregoing scale. HELD, further where the Public Belt at New Orleans is used in interchange the burden of its charges should be divided evenly between the barge line and the Louisiana lines. HELD, the divisions accruing to the Louisiana lines should not exceed the mileage scale above set forth, with the understanding that if the parties prefer the divisions agreed upon at one stage of the negotiations, these may be substituted; the burden of charges levied by the Public Belt, where such charges are incurred in interchange at New Orleans, should be divided equally between the barge line and the Louisiana line; in determining the divisions accruing to the northern lines, there should be deduced from the corresponding all rail rate 3c for the bridge crossing at Cairo and also the division of the originating Louisiana line, but not to exceed 10c. To the remainder thus obtained should be applied the established percentages used in the case of all rail sugar traffic from New Orleans; the divisions of the Louisiana lines and of the northern lines having thus been determined, the division accruing to the barge line in each case should be the remainder of the joint rail barge rail rate. **Additional Routes and Rates.** The barge line desires the extension of through routes and joint rail barge rail rates to portions of Arkansas, Oklahoma, Missouri, Kentucky and Tennessee via Memphis, and to Kansas, Nebraska, a portion of Missouri, North Dakota, South Dakota, Montana, Wyoming and Colorado as well as central territory east of the Indiana Illinois state line via St. Louis and Cairo. **Central Territory.** From interior Louisiana to points in central territory east of the Indiana Illinois line rates on sugar are generally made by adding arbitraries to rates from New Orleans. From certain of the interior points New Orleans rates apply. HELD, establishment of through routes and joint rail barge rail rates on sugar from interior Louisiana points via New Orleans and St. Louis or Cairo from destinations in central territory east of the Indiana Illinois line to which there are now in effect joint all rail rates via New Orleans and St. Louis or Cairo from the same points of origin is desirable in the public interest; that nondiscriminatory joint rail barge rail rates will be the corresponding all rates maintained minus, in each case, 9.5c where the rail barge rail rate applies via either St. Louis or Cairo,, and 9c where it applies via Cairo alone; and that the joint rail barge rail rates thus established should be divided in general accordance with the plan outlined in the first part of this report, with the exception that where the all rail rate includes an arbitrary over the New Orleans rate, such arbitrary should be added to the 10c in determining the maximum amount to be deduced from the all rail rate on account of the division of the Louisiana line before computing the division to be accorded the northern line. **Kentucky and Tennessee.** From Gramercy and Reserve there are joint all rail rates to a large number of points in Kentucky and Tennessee on the L. & N., which are the same as the rates from New Orleans. From Albania, Jeanerette, and a few other interior points, joint rates all rail are in effect to Nashville, Tenn., and Lexington, Ky., but they are higher than the rates from New Orleans. With these exceptions, there are not any joint all rail rates on sugar now published from interior Louisiana to Kentucky and Tennessee. HELD, the establishment of through routes and of joint rail barge rail rates on sugar from interior Louisiana points via New Orleans and Memphis or Cairo, as indicated above, to destinations in Kentucky and Tennessee to which there are now in effect joint all rail rates via New Orleans and Memphis or Cairo from the same points of origin is desirable in the public interest; that nondiscriminatory joint rail barge rail rates will be the corresponding all rail rates maintained, minus, in each case, 7.5c via Memphis or 9c via Cairo, as the rate may apply; and that the joint rail barge rail rates thus established should be divided in proportion to the local first class rate applicable, respectively, over each of the rail

portions and over the barge line portion of the route, with the proviso that the division accruing for either of the rail hauls or for the barge line haul shall not be less than 25% of the entire rate. **Western Territory.** To northern Arkansas, northern Oklahoma, southern Missouri, and southeastern Kansas, the barge line proposes the establishment of joint rail barge rail rates via Memphis 7.5c lower than the all rail rates. To northern Kansas, northern Missouri, Nebraska, North Dakota, South Dakota, and Colorado east of and including Pueblo, Colorado Springs, and Denver it proposes rates via either St. Louis or Cairo 10.5c lower than the all rail rates. HELD, the establishment of through routes and joint rail barge rail rates on sugar from interior Louisiana points via New Orleans and Memphis to destinations in northern Arkansas and southern Missouri to which there are now in effect joint all rail rates via New Orleans and Memphis from the same points of origin is desirable in the public interest; that nondiscriminatory joint rail barge rail rates will be the all rates maintained minus, in each case, 7.5c; and that the joint rail barge rail rates thus established should be divided in proportion to the local first class rates; for the rail proportion and barge line portion of the haul, with the proviso that the divisions accruing for either of the rail hauls or for the barge line haul shall not be less than 25% of the entire rate. HELD, further, that the establishment of through routes and joint rail barge rail rates on sugar from interior Louisiana points via New Orleans and St. Louis or Cairo to destinations in northern Kansas, northern Missouri, Nebraska, South Dakota, and North Dakota, to which there are now joint all rail rates via New Orleans and St. Louis or Cairo from the same points of origin is desirable in the public interest; that nondiscriminatory joint rail barge rail rates will be the all rail rates maintained minus, in each case, 9.5c; and that the joint rail barge rail rates thus established should be divided in accordance with the plan outlined in the first part of this report. U. S. War Department v. A. & S. Ry., 92 I. C. C. 528.

(o) Where the connecting rail lines participate from and to the points in question in an all rail through route and joint rate in which an intermediate rail carrier operating between the barge lines ports also participates, the Commission has the power to require the establishment of a through route in connection with the barge line and to prescribe a joint railbarge rail rate which is differentially lower than the corresponding all rail rate, provided the differential fairly reflects the lower cost and value of the barge lines service. U. S. War Department v. A. & S. Ry., 92 I. C. C. 528, 547.

(p) In 87 I. C. C. 392 the Commission found it was desirable and in the public interest that the defendants should establish joint rail and water and rail water and rail rates on cotton from Oklahoma points to points in New England territory, and that the rates would be unreasonable to extent they exceeded rates constructed by the deduction of 4c from the all rail rates. HELD, original findings affirmed. Houston Cotton Exchange v. A. & A. R. R., 93 I. C. C. 268.

(q) The Commission construes paragraph 13 B of section 6 to confer upon the Commission power to establish through routes and maximum joint rates between and over the rail and water lines and with respect to the transportation referred to in the opening paragraph 13 of section 6. Houston Cotton Exchange v. A. & A. R. R. 93 I. C. C. 268, 270.

(r) Complainant attacked rail and water and rail water and rail rates charged on cotton from Oklahoma points to destinations in the northeastern part of the United States and in eastern Canada, based on New Orleans, La., combinations, as unreasonable. The movement of cotton from Oklahoma to northeastern states and Canadian points at present is chiefly over all rail routes through the gateways of Memphis, Tenn., St. Louis, Mo., or Chicago, Ill., in connection with which joint rates are in all instances applicable. Oklahoma cotton may also be moved to the Northeast via New Orleans thence Morgan Line to New York and by rail lines beyond. The purpose of this complaint is to obtain joint rates over these rail and water routes. The all rail rates from Oklahoma apply on any quantity; the combination rates over the rail and water routes apply any quantity to the Gulf port, and beyond subject to minimum of 20,000 pounds. Joint rates are not maintained from Texas common point territory to the east through Galveston and New Orleans. These joint

rates are generally 7c under all rail rates. Cotton fabrics are among the few commodities for which joint through commodity rates via rail and water route have been provided. These rates apply via both Galveston and New Orleans. HELD, it is desirable in the public interest that defendants should establish joint rail and water and rail water and rail rates on cotton from Oklahoma to the Northeast and existing rates unreasonable to extent they exceeded 4c less than the all rail rates. New Orleans Joint Traffic Bureau v. A. A. R. R. Corp., 95 I. C. C. 77.

(s) Respondents proposed a readjustment of ocean and rail and rail ocean and rail rates on classes and commodities from Atlantic seaboard territory to interior points west of the Mississippi river in Louisiana, Arkansas, Oklahoma, Texas, Kansas and Missouri, and all rail rates from Virginia cities, St. Louis, Mo., Memphis, Tenn., New Orleans, La., and related points to certain southwestern points. Some of the ocean and rail rates apply through the south Atlantic ports, Hampton Roads and south, and others through the Gulf ports. Consideration will first be given to class rates operating through the Gulf. The proposed class rates from interior points in seaboard territory range generally from 70 to 80% of the combinations of locals from points of origin to New York, from New York to Gulf ports, and from New Orleans, Baton Rouge, La., or Vicksburg, Miss., to destination, plus transfer charges at New York. However, there are published through rates from the interior points to the Gulf ports avoiding the rate break at New York, and combinations made of these rates, plus the rates from the Gulf ports. The proposed through rates apparently bear a considerably higher percentage relation to these rates than they do to the rates made on the two point combinations, and in some instances are only slightly less than the combinations on the Gulf ports. The Gulf lies also propose to cancel all their published through rates to points in the states north and northeast of Texas, except those points near the Texas border, and thus practically withdraw from the traffic, leaving it to the all rail and south Atlantic port lines. Via the south Atlantic port lines increased class rates are proposed to points in Arkansas, Louisiana, Oklahoma and points in southern Kansas. There are no rates at present via these routes to Texas. South Atlantic port lines also proposed to cancel their published through rates to points in Louisiana south of the V. S. & P., which extends west of Vicksburg, Miss., across the northern section of the state through Monroe and Shreveport. The reason assigned for desiring to withdraw from this territory is that the traffic via south Atlantic ports is light, most of the business moving via the Gulf ports. Cancellation of the rates in question would remove any fourth section departures in Louisiana. A somewhat different adjustment is proposed to Arkansas than applies to Mississippi river points. Rates via the south Atlantic port lines to the Mississippi river points are at present based differently over the rates from Baltimore, Md., and at present they are so made to Arkansas points but apply only from a strip of seaboard territory lying within 100 miles or so of the north Atlantic ports. The rates named in the suspended schedules apply from practically all points east of the Buffalo-Pittsburgh line and accord all points of origin a common rate. Respondents proposed to publish through rates to certain points in Arkansas which at present are charged the combination of locals. Due to these changes in the origin and destination adjustments, numerous departures from the fourth section would be cured. It is the view of the Commission that the southwest should be served by the Gulf port lines, that they should maintain through rates to that territory in general, and that the rates to a great part of the southwest via their lines, rather than those via the south Atlantic port lines, should set the standard. Considerable traffic from seaboard territory originates at inland points. That via south Atlantic ports moves by rail to the north Atlantic ports, thence by steamship and finally over southern and southwestern rail lines to destination. For these hauls the proposed rates as a rule are lower than the all rail rates. Apparently, it is only from points far inland, near the Buffalo-Pittsburgh line, that the proposed rates approximate the all rail rates, and in such instances the rail ocean and rail haul is, of course, more expensive than that from points nearer the ports. HELD, proposed rates based largely on present rates to Marshall and Jefferson, do not meet the tests of reasonableness.

HELD, proposed class rates via Gulf ports not justified, but rates not in excess of the following from seaboard territory, which shall include marine insurance, may be maintained pending determination of the consolidated southwestern cases: First class to Wichita $3.10 Fort Smith, $2.70, other points of destination related thereto. Classes lower than first to be made according to the percentages found reasonable in 45 I. C. C. 254. HELD, proposed class rates of the south Atlantic port lines not approved. The commodity rates proposed are much lower than proposed class rates, but are not on the proper basis. As the class rates hereinbefore prescribed on the carload classes are considerably lower than those proposed, the new class rates, in a number of instances, may well be applied to the moving traffic. In others the basis for reasonable rates may, for convenience, be designated by percentages of first class or by classes lower than those provided by the classification as set out. The establishment of rates on this basis insures a proper alignment as among the various points of destination. HELD, Gulf port lines have not justified the proposed commodity rates. The findings herein are without prejudice to future action in the consolidated southwestern cases. Rates to southwestern destinations, 95 I. C. C. 188.

(t) Carriers parties to joint rail lake and rail rates between eastern and western points in the United States by routes which are in part over Canadian rail lines in connection with the Northern Navigation Co., a Canadian owned and operated steamship line are respondents. The Commission instituted an investigation on its own motion for the purpose of inquiring into the facts and circumstances surrounding the establishment of these through rail lake and rail rates and routes, having under consideration the matter of their recognition. The Commission deems it unnecessary to set forth at length the contentions of the parties in respect of recognition of these routes. Nowhere is the acts which is administered by the Commission is it empowered to recognize one route and to deny recognition to another. The meaning and purpose of recognition is nowhere stated. If, as the Northern Company and the shippers contend, the receipt and placing in its files of tariffs constitutes recognition, it has recognized those routes. If, as the Transit Corporation and the shipping board contend, something more is necessary to constitute recognition, the Commission is nowhere advised what that something more is, or provided with a test or criterion by which to determine under what circumstances and in what cases recognition may be accorded, denied or revoked. HELD, under section 27 of the merchant marine act, 1920, recognition by the Commission merely operates to stay the application of the section to merchandise transported in such manner as otherwise to be subject to the penalty of forfeiture thereof. That section apparently provides that merchandise transported over the routes here considered would in the absence of recognition by the Commission of these routes, be subject to forfeiture. Whether such merchandise is exempt from the penalty because the Commission has recognized the routes is a question of fact to be determined by the court in which enforcement of that forfeiture may be sought. The duty of administering the merchant marine act, 1920, does not rest upon the Commission, and it is not within its providence to construe its provisions. Rail lake and rail rates via Canada, 96 I. C. C. 633.

(u) Complainant attacked combination rates charged on two cars of canned tomatoes shipped in Sept. and Nov., 1922 from Berlin and Conoqingo, Md., to Monroe, La., as unreasonable. Shipments moved as routed by shipper over Pennsylvania to New York, Morgan Line to New Orleans, La., S. P., to Alexandria, La., L. & A., to Sibley, La., and V. S. & P., to destination, applicable rate 68.5c to Sibley plus 30.5c beyond. A joint commodity rate of 68.5c was available over other rail water and rail lines. HELD, rate attacked unreasonable to extent it exceeded 68.5c undercharges waived. Sugar Bros Co. v. Pennsylvania R. R., 98 I. C. C. 613.

(v) It is policy of Congress as declared in section 8 of merchant marine act, 1920, and section 500 of transportation act, 1920, to promote, encourage, and develop transportation by water and to foster and preserve in full vigor both rail and water transportation. Wool Rates Investigation, 1923, 91 I. C. C. 235, 248.

(w) Proposed restriction of proportional rates on grain and products from

Missouri River points to Cairo, Ill., for beyond, to traffic moving beyond Cairo "via rail lines," which would result in increased rates when outbound movement is by water, found not justified. Respondents failed to establish beyond doubt necessity for differentiating between traffic moving beyond Cairo by water and that moving beyond by rail. Moreover, if suspended schedules were allowed to become effective proportional joint rate would exceed aggregate of intermediate proportionals and, in its application to shipments to Cairo for beyond by water, would thus violate fourth section. Grain and Products from Missouri River, 91 I. C. C. 365.

(x) Proposed change in routing of traffic between Texas and southwestern territory and eastern and New England territories, by cancellation of all class and commodity rates applicable as proportionals from or to Port Arthur, Tex., and as joint rates in connection with rail lines, Transmarine Corporation, a water carrier, and proposed institution of Beaumont, Tex., for Port Arthur as a port of call for its vessels, found justified. Routing on through traffic will only be changed from "via Port Arthur" to "via Beaumont," and only change in rates will be cancellation of rates to or from Port Arthur, and substitution of increased rates to or from that point applicable via Beaumont, when in connection with Transmarine Corporation. Routing to and from Eastern and New England Territories, 91 I. C. C. 455.

(y) Ocean-and-rail rates on cotton piece goods, l. c. l., from New York, N. Y., and Boston, Mass., rate points to Kansas City, Mo. via Memphis Tenn., found unreasonable to extent they exceeded aggregate of intermediates to and beyond Memphis, Tenn., contemporaneously in effect. Reparation awarded. Lee Mercantile Co. v. Director General, 91 I. C. C. 618.

(z) Proposed increased proportional rates on canned goods and iron and steel articles from Gulf ports to points on and north of Ohio River, applicable on traffic from Pacific coast through Panama Canal, for purpose of equalizing such rates with local rates applicable from New York, N. Y., to Chicago, Ill., found not justified. No similar increases are proposed from south Atlantic ports, and undue prejudice in favor of such ports would result. Canned Goods and Iron and Steel Articles, 91 I. C. C. 623.

(aa) Proposed cancellation by International-Great Northern R. R. Co. of its participation in rates on cotton and cotton linters from the Southwest, via rail and water, to eastern points, when moving through New Orleans, La., which would result in substantial increases, prevent movement to New Orleans, and thereby increase movement through Texas ports, found not justified. Only justification offered is that respondent serves Texas ports more directly than it serves New Orleans, that there is an additional haul beyond its lines to move cotton through New Orleans, and that it desires to retain all revenues accruing out of joint rates for rail haul from points of origin to ports. Cotton and Linters from Southwest, 91 I. C. C. 717.

(bb) In 91 I. C. C. 27, the Commission found rates on bedroom furniture, carloads and less carloads, from Nashville, Tenn., to destinations in New England territory not unreasonable but unduly prejudicial. In purported compliance with this order respondents proposed a general revision of the all rail and rail and water rates on all kinds of furniture, including chairs and mattresses, in carloads and less carloads, from practically all southern manufacturing points to trunk line and New England territories, including the Virginia cities, and from certain manufacturing points to Buffalo-Pittsburgh territory. The long continued policy of the southern carriers has been to maintain on articles manufactured in the south rates which would enable southern manufacturers to reach the large consuming markets in the north. Generally speaking, such articles have always moved within official territory on class rates. These carriers say that when the furniture industry in the south was in its infancy they established, in line with that policy, rates below normal to important consuming points in eastern territory. The southern manufacturers encountered the competition of manufacturers in official territory. The present rates are said to be the original subnormal rates subjected to the general increases and reduction. Originally these rates to the east were more nearly upon the basis maintained from central territory, but the latter rates have been subjected to increases greater in amount and percentage than have

those from southern territory and are now relatively much higher than from southern territory. Carload and less carload commodity rates are now maintained on furniture, including mattresses, from southern manufacturing points to the east. Generally the rates on mixed furniture are applicable also to mattresses, with somewhat lower rates on chairs except from Nashville. Because furniture rates from Nashville reflect the official classification basis its less than carload rates vary with the article, whereas the other southern manufacturing points a single rate applies to all articles of furniture in less carloads. Rail and water commodity rates, generally lower than the all rail rates, are also maintained. Respondents admit that many substantial increases would result under this revision. HELD, proposed schedules justified. They fail, however, to provide for the application to Buffalo-Pittsburgh territory of the proposed rates from Atlanta to Pittsburgh and Buffalo proper. The present rates from Atlanta apply to points generally in Buffalo-Pittsburgh territory, and this is also true of the present and proposed rates from the Virginia-Carolina group. No reason appears why the proposed rates from Atlanta should be restricted to apply only to Pittsburgh and Buffalo proper, and respondents will be expected to effect application of the proposed rates from Atlanta to Buffalo-Pittsburgh territory in season to take effect at the same time as the suspended schedules. Furniture from southern points, 100 I. C. C. 127.

(cc) Complainant attacked rail and water and rail water and rail rates on lard substitutes, green salted hides, and refuse grease carloads from Houston, Tex., via Galveston, Tex., to New York, as unreasonable. The three commodities are rated fifth class in the western classification, and the present rate therefrom from Houston to New York is made by adding the fifth class differential of 5c to the commodity rates from Galveston of 38.5c on green salted hides, 43.5c on lard substitutes, and 29.5c on refuse grease. The fifth class rates to New York are 63.5c from Galveston and 68.5c from Houston. Houston is 52 miles from Galveston. HELD, rate of 76.5c on refuse grease to Newark unreasonable to extent the factor from Houston to New York exceeded 45.5c but other rates attacked not unreasonable, reparation awarded. Houston Packing Co. v. B. & M. R. R., 100 I. C. C. 345.

(dd) Complainant attacked commodity rates charged on wood pulp moving from Camas, Wash., and West Linn and Lebanon, Ore., to Floriston and Los Angeles, Calif., between July 1, 1918 and Dec. 29, 1919 as unreasonable. Camas is on the Columbia river 24 miles east of Portland, Ore. West Linn is on the Willamette river about 12 miles south of Portland. Lebanon is on a branch of S. P., 85 miles south of Portland. Floriston is on the main line of that carrier 223 miles east of San Francisco. The shipments from West Linn moved to Portland by water. Those from Camas moved to Portland either by water or over the S. P. & S. From Portland the shipments to Los Angeles and some of the shipments to Floriston moved over the S. P., direct, and the other shipments to Floriston through Portland moved by water to San Francisco thence S. P., to destination. All of the shipments from Lebanon moved over S. B. Water rates not in issue. Combination rates charged. Subsequent to movement lower joint rail rates were established to Floriston. In connection with the water routes to San Francisco the rail factor from that point to Floriston has been reduced from the class C rate to the intrastate commodity rate previously in effect. In 78 I. C. C. 273 the rates on this commodity were found not unreasonable from these points of origin to Los Angeles but to Floriston they were found unreasonable on shipments moving prior to July 1, 1918 to extent the factor beyond San Francisco or Oakland exceeded rates on like traffic to Los Angeles. In 87 I. C. C. 51 the rate from Camas to Floriston was found unreasonable to the same extent on shipments moving during the period between Dec. 7, 1918 and Jan. 18, 1919. HELD, rates attacked to Los Angeles not unreasonable but to Floriston unreasonable to extent the components beyond San Francisco or Oakland exceeded contemporaneous rates on like traffic from San Francisco to Los Angeles, reparation awarded. Crown Williamette Paper Co. v. Director General, 100 I. C. C. 397.

(ee) In 77 I. C. C. 417, certain general principles were laid down to govern the division of joint rates between complainant, the barge

line, and the defendant rail carriers; also to govern the establishment of additional through routes and joint rates. The barge line and the L. & N., while agreeing upon many joint rates and the points from and to which such rates should apply, have not been able to compose their differences with respect, to the divisions thereof, and they now come before the Commission for a determination of this matter. The Warrior service of the barge line is operated between New Orleans, La., Mobile, Birmingham and Tuscaloosa, Ala. It has direct connections with the L. & N., at Mobile and at Tuscaloosa, but via Birmingport it reaches the L. & N., through the Ensley Southern to Ensley, Ala., and the Southern Ry. to Birmingham, 38 miles in all. At present joint class rates and certain joint commodity rates apply from and to New Orleans via Birmingport to and from destinations in that territory circumscribed, roughly speaking, by a line running through West Point and New Albany, Miss., to the Mississippi-Tennesse state line, thence eastward to the Alabama-Georgia state line, thence southeastwardly to Atlanta, Ga., and thence westward through Helene, Ala., to Birmingport. Similar joint rates from New Orleans are published via Tuscaloosa. although that route is not at present in operation, to all of the above territory, and to points south thereof as far as Montgomery, Ala. Via Mobile joint rates are now in effect to points in a territory beginning at Pensacola, Fla., and running north along the L. & N., to a point just south of Montgomery, thence northwesterly just south of Demopolis, Ala., and thence south just west of Meridian, Miss. to Mobile. The barge line seeks to add as territory served by its Warrior River division under joint rates from and to New Orleans all points on the L. & N., not now so served, except points on the Memphis division west of Guthrie, Ky., and including certain points north of the Ohio river and as west as St. Louis, Mo. From and to Mobile it seeks to serve additional territory south of the Ohio river. No serious objections are interposed by defendant to the establishment of such through routes and joint rates so long as they are governed by the rules laid down in the original decision. and with this understanding the Commission can see no reason why such through routes and joint rates should not be established. The record is too indefinite to warrant an order to this effect; but if it proves impossible to secure their voluntary establishment, the proceeding will be reopened. With the exceptions noted below, HELD, divisions of joint class and commodity rates between New Orleans and Mobile, on the one hand, and interior points on the L. & N., on the other hand, interchanged either at Mobile or Tuscaloosa will be just and reasonable both to the barge line and to the L. & N., if divided upon a rate pro rata basis, using as factors (1) 80 per cent of the first class rate under the proposed report scale in docket No. 13494 for the short line rail distance between the ports, and (2) the similar first class rate for the short line distance between the port of interchange and the inland point, these short line distances in all cases to be actual mileages over workable routes embracing not more than three carriers not under common control or management; the percentages which these respective factors bear to the whole to be used in arriving at divisions of the joint barge and rail rates which shall accrue to the barge line and to the L. & N., respectively. Exceptions: to and from points in the Birmingham district via Tuscaloosa 25 per cent of the joint barge and rail commodity rates between New Orleans and Mobile, on the one hand, and points in the Birmingham district, on the other hand, when the traffic is interchanged at Tuscaloosa, will result in just and reasonable divisions to the L. & N., and barge line. The joint barge and rail class rates should not be subject to this limitation. With respect to traffic through Birmingport interchanged with the L. & N., at Birmingham, the barge line proposes a division, arrived at by using as the factor on traffic to and from New Orleans 87.6 per cent of the first class rates under the proposed report scale for the short line distance between New Orleans and Birmingham, and as the factor on traffic to and from Mobile 89.7 per cent of the first class rate for the short line distance between Mobile and Birmingham. HELD, this special proposal is fair, and will result in just, reasonable and equitable divisions to the barge line and its intermediate connections, on the one hand, and to the L. & N., on the other, on traffic moved via Birmingport

and interchanged at Birmingham. Just what divisions are to be accorded the Ensley Southern and the Southern the record does not disclose. With respect to transit arrangements on cotton, there appears to be no dispute that the compress charge should first be deducted from the through rate and accorded to the L. N., before the balance of the rate is to be divided. HELD, the just and reasonable amount which the L. & N., should receive for its transit service should not exceed 3c per 100 pounds, minimum $3 per car. HELD, just and reasonable and equitable divisions will result to the barge line and to the L. & N., on cotton traffic if from the gross barge and rail rates there are first deducted 15c to cover the compress charge and 3c to cover the transit charge of the L. & N., and if the balance is then divided upon the general basis hereinbefore approved, subject, however, to a minimum division to the L. & N., of 50 per cent of the net rate after deduction of the compress charge. HELD, the minimum division to either the barge line or defendant should not be less than 25 per cent. Should joint rail and barge rates be established which reflect substantially greater differentials than 20 per cent under the all rail rates the division percentages resulting from the basis herein approved would require modification. It is reasonable that the originating or delivering carrier assume its own terminal disabilities, and where a charge is made for handling, wharfage, storage or other terminal service in addition to the line haul rate, such charge is to accrue to the carrier performing the service. U. S. War Dept. v. A. & S. Ry., 100 I. C. C. 491.

(ff) The law now authorizes the Commission to require the establishment of through rail and water routes and joint rates which short haul a rail carrier and the reasons are evident. If a water route were dependent upon feeders upon rail lines which can deliver traffic to it without shorthauling themselves, it would draw little traffic from the interior except at ports, like St. Louis, which happen to be a meeting point of rail lines serving different territories. Carrying this thought to its logical conclusion, if the rail lines of the country were owned by a great many independent companies, the water route would have a liberal supply of feeders; but if the rail lines were all one consolidated system, it would be wholly deprived of feeders. Yet its status as a useful and economical means of transportation would be the same in the one event as in the other. Clearly the usefulness of water routes to interior points ought not to be dependent upon the extent to which rail lines are consolidated and Congress has wisely recognized this in the law. It follows, whatever may be the case as between rail lines, that joint rates over rail and water routes ought to be divided without regard to the extent to which rail carriers may be shorthauled, and not upon a plan designed to discourage or render impracticable the use of such joint rates. Southern class rate investigation, 100 I. C. C. 513, 661.

(gg) The Commission has adopted the ratio of 3 miles of water haul to 1 mile of rail. Southern class rate investigation, 100 I. C. C. 513, 688.

(hh) Complainant attacked commodity rate of 66.5c charged on 334 less carloads of cotton fabrics or cotton piece goods in the original piece from New England points to Lynchburg, Va., between July 11, 1922 and May 9, 1923 as unreasonable, unjustly discriminatory and unduly prejudicial to extent it exceeded fourth class of 53.5c, subsequently made applicable from and to the same points. Shipments moved all water or rail and water. HELD, rate attacked unreasonable to extent it exceeded 53.5c, reparation awarded. Traffic Bureau Chamber of Commerce v. M. & M. T. R. R. 101 I. C. C. 424.

(ii) Joint fourth-class rates on matches moving from Oswego, N. Y., to New York City, by rail, thence by water to Charleston, S. C., Brunswick, Ga., and Jacksonville, Fla., found unreasonable to extent they exceeded the aggregate of the contemporaneous fourth-class rates from Oswego to New York and the commodity rates by water beyond. Reparation awarded. Diamond Match Co. v. Director General, 92 I. C. C. 68.

(jj) Rates on l. c. l. shipments of pulp paper moving from West Point, Va., to Baltimore by water, thence by rail to Saugerties, N. Y., found not unreasonable as compared with lower point water-and-rail rate to Ravena, N. Y., a farther distant point, which lower rate was subsequently established at Saugerties to meet rates maintained by competing lines. Such subsequent reduction

does not warrant a finding that the prior rate was unreasonable, and no damage was shown by reason of any undue prejudice which may have existed. Smythe Co. v. C. S. S. Co., 92 I. C. C. 95.

(kk) Proposal to comply with commission's order denying fourth-section relief with respect to rates from New York, by reducing class and commodity rates from points on the Central Vermont Ry. in New England, to points in c. f. a. and western trunk-line territories, applying via differential rail-and-lake route through Depot Harbor, Ontario, and boat line of the Canada Atlantic Transit Co., found not justified. Present rates from New York are reasonably compensatory and to permit removal of fourth-section departures by reducing the intermediate rates would necessitate reductions over other routes at competitive points, result in a chaotic condition of rates throughout New England, and further aggravate financial difficulties of New England lines. Rail-and-Lake Rates from New England, 92 I. C. C. 106.

(ll) Proposed withdrawal of D., L. & W., Erie, and Lehigh Valley from participation in through joint lake-and-rail and rail-lake-and-rail rates from and via various Great Lakes ports to points on certain of their eastern connections, which will result in increased rates via such routes, found justified except as to routes the continuance of which is necessary and desirable in the public interest. Purpose of proposed withdrawal is to throw burden of handling traffic upon carriers who are able to handle it most expeditiously and economically, and proposed restrictions will not leave any destination territory without a practicable route. Lake and Rail Rates to Eastern Destinations, 92 I. C. C. 183.

(mm) Rates on asphalt from San Francisco to Great Falls and Billings, Mont., found unreasonable to extent that water factor, San Francisco to Portland, exceeded a lower proportional rate contemporaneously in effect on same commodity between same points via line of another water carrier, which lower rate was subsequently made applicable over route of movement. Reparation awarded. Warren Construction Co. v. G. N. P. S. S. Co., 92 I. C. C. 302.

(nn) Proportional rates on grain from Illinois and Indiana points to Chicago, for reshipment by vessel beyond, found not unreasonable as compared with lower so-called "specific" applicable when grain is reshipped by rail. Formerly proportionals and specifics were the same but in applying increases under The Fifteen Per Cent Case, 45 I. C. C. 303, this parity was disrupted and subsequently restored. It was shown that lake-vessel rates fluctuate from time to time and in many instances total charges from country origin points to final destinations were less than those applicable all rail, notwithstanding the higher proportionals; and that proportionals were lower than Illinois intrastate rates and local rates in western territory for similar distances. Armour Grain Co. v. Director General, 92 I. C. C. 482.

(oo) The commission is directed "to foster and preserve in full vigor both rail and water transportation." But water transportation can not enjoy full vigor if it is confined to traffic which moves from port to port. If water lines are to thrive they must be able to draw traffic from interior points. U. S. War Dept. v. A. & S. Ry., 92 I. C. C. 528, 538.

(pp) Where rail carriers join with a water line in rates which are less than maximum reasonable rates, fair and equitable divisions must be determined with little regard to strategic advantages which any carriers might enjoy if divisions were to be fixed without the commission's intervention, and a dominant consideration must be relative amount and cost of services performed by various participating carriers. U. S. War Dept. v. A. & S. Ry., 92 I. C. C. 528, 538.

(qq) Rates on steel grinding balls moving water-and-rail from Chrome, N. J., to Ada, Okla., via Galveston, found not unreasonable or in violation of aggregate-of-intermediates clause of section 4 of the act. Tariffs in effect provided for alternative application of maximum rates whereby rates to Deming, N. Mex., and Clifton, Ariz., would apply if lower than rate to Ada. The Clifton and Deming rates, however, were restricted to routes other than route of movement, and application of the alternative rule was contingent upon specific reference being made to it in connection with rates to destinations in the tariff, and no such reference was made in connection with rate to Ada. Moreover, rate from point of origin to Deming was higher than rate to Ada. Oklahoma Portland Cement Co. v. A., T. & S. F., 93 I. C. C. 203.

(rr) The commission has power under

section 6 (13-b) of the act to establish through routes between rail and water carriers and prescribe maximum rail-and-water and rail-water-and-rail rates over rail and water lines even though water line is not used under a common control, management, or arrangement for continuous carriage or shipment. Houston Cotton Exchange v. A. & A. R. R. Corp., 93 I. C. C. 268.

(ss) Contention that section 15 (3), and section 6 (13), (13a) and (13b) of the act are qualified by section 1 (1a) so that they relate to transportation partly by rail and partly by water only when both are used under a common control, management, or arrangement for a continuous carriage or shipment, not sustained. This would lead to absurd conclusion that commission is enabled to establish a physical connection at a dock between a rail and water carrier only where water carrier already has an arrangement for continuous service with the rail line. Houston Cotton Exchange v. A. & A. R. R. Corp., 93 I. C. C. 268, 270.

(tt) Ordinarily expression "rail-lake-and-rail route" is used to describe a rail-and-water break-bulk route. Bergstrom Paper Co. v. Director General, 93 I. C. C. 591, 592.

(uu) Following Houston Cotton Exchange, 87 I. C. C. 392, the establishment of joint rail-and-water and rail-water-and-rail rates on cotton from Oklahoma points, via New Orleans, to points in New England, found desirable in the public interest and existing combination rates found unreasonable to extent they exceeded rates constructed by deducting 4 cents from present all-rail rates. Similar rates to other points in northeastern portion of the United States found not unreasonable. New Orleans Joint Traffic Bureau v. A. & A. R. R. Corp., 95 I. C. C. 77.

(vv) Upon complaint, the N. Y. C. ordered to furnish a transportation service between the Erie Basin barge-canal public terminals, Buffalo, N. Y., and points located on its line and lines of its connections, and perform upon terminal tracks the operating service necessary to an interchange of traffic with barge-canal lines at the terminal, all with motive power and other equipment of the N. Y. C., the services to embrace all traffic, interstate and intrastate, that may be transported to or from the terminal over that rail carrier's line. State of N. Y. v. N. Y. C., 95 I. C. C. 119.

(ww) Jurisdiction of the commission to order an interchange of traffic between rail and water carriers under various sections of the act, discussed. State of N. Y. v. N. Y. C., 95 I. C. C. 119, 126, 130.

(xx) Proposed readjustment of ocean-and-rail and rail-and-ocean rates on classes and certain commodities from points in Atlantic seaboard territory and all-rail class rates from Virginia cities to southwestern points, found not justified. Readjustment of all-rail rates from St. Louis, Memphis, New Orleans, and related points to certain southwestern points found justified, with certain modifications in the rates from New Orleans to Marshall and Jefferson, Tex. Rates to Southwestern Destinations, 95 I. C. C. 188.

(yy) It is the commission's view that the Southwest should be served by the Gulf port line, that they should maintain through rates to that territory in general, and that rates to a great part of the Southwest via their lines, rather than those via the south Atlantic port lines, should set the standard. Rates to Southwestern Destination, 95 I. C. C. 188, 199.

(zz) Rate on canned goods from Mobile to Montgomery, when used as a factor in constructing rates moving by water from interstate points of origin found unreasonable as compared with distance rates prescribed in Memphis Southwestern Investigation, 77 I. C. C. 473, and with Alabama intrastate rates contemporaneously in effect from Mobile to Montgomery. Reasonable rate prescribed and reparation awarded. Schloss & Kahn Grocery Co. v. L. & N., 95 I. C. C. 618.

(3a) Where shipments move interstate by water to a port of entry thence by rail to inferior intrastate destinations the commission has jurisdiction over the intrastate rail factor since it is part of the through interstate movement. Du Pont de Nemours & Co., 74 I. C. C. 191. Schloss & Kahn Grocery Co. v. L. & N., 95 I. C. C. 618.

(3b) Rates from New Albany to other points in Indiana on bituminous coal originating in Kentucky and West Virginia and barged to New Albany down the Ohio River, found unreasonable as compared with rates from Cincinnati, a

competing point shipping to the same destinations and to which traffic moves under similar transportation conditions. Moreover, rates for the short intrastate movement are on too high a level as compared with intrastate rates on bituminous coal prescribed by the commission in 66 I. C. C. 338, and numerous other cases. Reasonable distance scale of rates prescribed for the future. Slider v. B. &. O., 96 I. C. C. 65.

(3c) Shipment from Chester, Pa., to Tulsa, Okla., originally routed via rail to Philadelphia, and water and rail beyond was diverted at Philadelphia, upon shipper's request, to all-rail route, and upon arrival at Tulsa, was diverted to Wynona, Okla. Charges collected found inapplicable to extent they exceeded a lower combination, plus diversion charges, from Chester, Pa., via St. Louis, to Wynona although factor of rate found applicable was restricted to shipments "consigned through" from Chester to Wynona "via all-rail routes." Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(3d) Facts and circumstances surrounding the establishment of through routes between points in the United States partly over Canadian rail lines in connection with the Northern Navigation Co., Ltd., a Canadian owned and operated steamship line, covered by tariffs on file with the commission, and the matter of recognition of these routes under section 27 of the merchant marine act, 1920, considered. Proceeding discontinued. Rail-Lake-and-Rail Rates via Canada, 96 I. C. C. 633.

(3e) Sixth-class rate on potatoes, moving from Hightstown, Cranbury, Jamesburg, Plainsboro, Prospect Plains, and Windsor, N. J., to New York by rail, thence by Water to Jacksonville, Fla., found unreasonable to extent it exceeded the aggregate of contemporaneous fifth-class rate from points of origin to New York and a proportional rate beyond. Reparation awarded. Chamberlin & Barclay v. C. S. S. Co., 98 I. C. C. 7.

(3f) By the route shipments of secondhand refrigerators from Camp Dix (Wrightstown), N. J., to Sheffield, Ala., actually moved a car-ferry transfer from Cape Charles to Norfolk, Va., was necessary, which in complainant's opinion is equivalent to a rail-and-water movement. This contention not sustained, Conf. Ruling 316, and in absence of specific instructions for rail-and-water route defendants were only under the obligation to protect the rate applicable over route specified by shipper. Florence Chamber of Commerce v N. S. R. R. Co., 98 I. C. C. 594, 595.

(3fa) Proposed cancellation of exceptions to southern classification, under which certain commodities l. c. l. moving water and rail from north Atlantic ports to Lynchburg and other Virginia points take ratings one class lower than those provided in southern classification, and restoration of such ratings to the full southern classification basis applying all-rail, found not justified. Respondents offered little justification other than a statement that exceptions were erroneously published, no evidence concerning reasonableness of the rates proposed being adduced, or justification for fourth-section departures which would result thereunder offered. Moreover, a considerable volume of business has developed under the present rates which have been in effect approximately two years. Exceptions to Southern Classification, 102 I. C. C. 205.

(3fb) Shipments of bottle caps moving from New Orleans via Morgan Line to New York, thence rail via B. & O. to Highlandtown, Baltimore, found not misrouted. When delivered to the Morgan Line at New Orleans shipping ticket contained no routing instructions but bill of lading issued by that carrier showed routing as "B. & O." While a lower all-water rate applied to and from New York in connection with the Clyde Line, the latter's terminal at Baltimore is not at Highlandtown, and delivery at that terminal would not have been in accordance with bill of lading. Conf. Ruling 509. Also another lower water-and-rail rate cited by complainant was shown not to apply from the Clyde's Line at Baltimore. Moreover, notation on bill of lading "B. & O." indicated that a line haul by that carrier was desired, and bill of lading signed by complainant's representative on its behalf is binding on the parties. See Unrep. Op. 2224; 52 I. C. C. 671, 681; 82 Fed. 681. Crown Cork & Seal Co. v. S. P. Co., 102 I. C. C. 331.

(3fc) Complaint alleging unreasonableness of intrastate rates on fuel oil previously transported via tank steamers from interstate points of origin dismissed for want of jurisdiction, no common control, management, or arrangement for continuous carriage or shipment existing

between rail carrier and tank steamers, the latter being owned and operated exclusively for transportation of its own commodities. Washington Dehydrated Food Co. v. G. N. Ry., 102 I. C. C. 363.

(3fd) Establishment of through routes and joint rates on rail-and-water traffic from lower Michigan points via Detroit to Cleveland and Buffalo, by restoring differentials under all-rail rates previously in effect and which are now maintained in opposite direction, found not necessary or desirable in public interest. While interested shippers testified that if differential should be restored they would use boat lines because of savings in transportation charges, practically no evidence was offered tending to show that all-rail service was inadequate or unsatisfactory. Detroit & Cleveland Nav. Co. v. M. C. R. R., 102 I. C. C. 607.

(3fe) Refusal of defendant rail carriers to establish through routes and joint rates on rail-and-water traffic from lower Michigan points via Detroit to Cleveland and Buffalo found not unjustly discriminatory or unduly prejudicial. No showing has been made that rail carriers participate in through routes and joint rates with a water carrier in competition with complainant, thereby establishing the allegation of undue prejudice, nor do facts of record support allegation of unjust discrimination. Detroit and Cleveland Nav. Co. v. M. C. R. R., 102 I. C. C. 607.

(3g) Complainant attacked refusal of defendants to join in the establishment of lower rates than apply all rail on freight traffic from points on defendants lines in Lower Peninsula of Michigan to Cleveland and Buffalo via Detroit and complainants lines beyond as discriminatory and prejudicial to complainant. Complainants lines of steamers have been plying between Detroit and Cleveland and between Detroit and Buffalo for a number of years. The season of operation on the Cleveland line commences April 4 and continues throughout Nov. while the boats on the Buffalo line are operated from May 15 to Nov. 1. For about 25 years prior to federal control defendants maintained joint rail and water rates with complainant between points in the Lower Peninsula of Michigan and Cleveland based on differentials under the all rail rates between the same points of 2c per 100 pounds on the first, second and third classes, and 1c on the fourth, fifth and sixth classes. On traffic to and from Buffalo or beyond the differentials were 3c on first three classes, 2c fourth class, 1c on fifth and sixth. In the later part of 1917 these differentials were abolished and the rates placed on the all rail basis. In Oct. 1918 the differential rates on traffic from Buffalo and Cleveland to points in Lower Peninsula of Michigan were restored by the Director General but on east bound traffic the all rail basis of rates is still in effect. HELD, establishment of through routes and joint rail and water rates sought not necessary or desirable in the public interest under section 15 paragraph 3 of the act, complaint dismissed. Detroit, Cleveland Navigation Co. v M. C. R. R. 102 I. C. C. 607.

(3ga) The difference in quality of service and in nature and liabilities of participating carriers is not as great where a differential route is optional as in that where a rail-and-water route is the alternative. In latter situation marine insurance and transfer of freight from car to vessel, among other things, must be taken into consideration. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693, 696.

(3h) Complainant attacked combination rates charged on one carload of corn sirup jelly and of jelly and preserves, in glass containers, shipped Sept. 19, 1924 from St. Louis, Mo., to Miami, Fla., based on a combination rate of $1.43 composed of a commodity rate of 81c to Jacksonville, Fla., and fifth class rate of 62c beyond, as unreasonable, unjustly discriminatory, and unduly prejudicial to extent that the 62c rate factor exceeded 28c. Shipment moved over M. P., and Southern to Jacksonville thence Clyde Steamship Line to Miami. The rate of 28c from Jacksonville to Miami, on the basis of which complainant sought reparation, was maintained by the Clyde Steamship Company on various kinds of canned goods in tin cans, including fruits. On July 12, 1924 the Clyde Steamship Company announced that within the following week it would amend its canned goods item naming the rate from Jacksonville to Miami to embrace all items in the standard list of articles taking canned goods rates, as published by agent Speiden, from Ohio and Mississippi river crossings and other points to the south. Effective Feb. 16, 1925 the rate of 28c was made applicable on the commodities here considered, whether ship-

ped in metal or glass containers. HELD, rates attacked unreasonable and unduly prejudicial to extent the factor from Jacksonville to Miami exceeded 28c, reparation awarded. Zaring & Co. v. C. S. Co., 102 I. C. C. 724.

(3i) Complainant attacked commodity rates charged on soft coal, carloads, to Sterling, Conn., from Allyns Point, Conn., South Providence and Harbor Junction Wharf, R. I., as unreasonable. Reparation to basis of $1.14 is sought. This coal is mined in Virginia and moves by rail to Newport News, Va., thence by water to Allyns Point, South Providence or Harbor Junction Wharf and thence by rail over the N. Y. N. H. & H. to Sterling. HELD, rate attacked from Allyns Point not unreasonable but from the other two points unreasonable to extent it exceeds $1.26, reparation awarded. United States Finishing Co. v. N. Y. N. H. & H. R. R. 107 I. C. C. 412.

(3j) Complainant attacked commodity rates charged on newsprint paper, carloads, from Livermoore Falls, and Millinocket, Me., and Corinth, N. Y., and Ottawa, Ont. Can., to San Antonio, Tex., subsequent to Sept. 7, 1920, as unreasonable. Complainant attacked rates charges on carloads of newsprint paper from Augusta, Me., and Ottawa received at El Paso, Tex., subsequent to Sept. 30, 1920 as unreasonable. Complainant attacked as unreasonable rates on papers and wood pulp boards subsequent to Oct. 9, 1920 from eastern seaboard points to Dallas and Houston, Tex., and Oklahoma City, Okla., over rail water and rail routes. Previous decision, 96 I. C. C. 5. The shipments moved by rail to New York, Boston or Philadelphia and with the exception of the shipments to Oklahoma City thence by water to Galveston, Tex., and by rails beyond. The shipments to Oklahoma City moved by water from New York or Boston to Savannah, Ga., and by rail through Memphis, Tenn., to destination. For a number of years class rates from eastern seaboard territory and the Fox River territory of Wisconsin to Texas common points have been substantially on a parity. In 66 I. C. C. 571 a rate of 82c was prescribed on newsprint from Fox River territory to Texas common points. Existing rates on newsprint from eastern seaboard and Fox River territories to San Antonio and Dallas are equal. Prior to April 28, 1917 the rates on newsprint paper to El Paso from Fox River territory and the seaboard were equal. On that date, because of war conditions relating to ocean shipping the 80c rate from the seaboard was increased to 97.5c, while no increase was made in the rate from Fox River territory. The earlier parity of rates was not maintained during the period from August 26, 1920 to June 15, 1922 but since the latter date they have been identical. HELD, rates attacked to San Antonio, Dallas and Houston since June 1, 1922 not unreasonable; rate attacked on woodpulp board from Bellows Falls to Oklahoma City not unreasonable, but present rate unreasonable to extent it exceeds the lowest combination; from Aug. 26, 1920 to May 31, 1922 rates attacked unreasonable to extent they exceed 90c to San Antonio and Dallas on newsprint paper, and 79.5c to Houston and $1.08 to El Paso; on printing paper to Dallas unreasonable to extent they exceeded 99c; and on bristol board and printing paper from Holyoke to Oklahoma City unreasonable to extent they exceeded $1.185, reparation awarded. Express Publishing Co. v. A. S. R. R. 107 I. C. C. 528.

(3k) Complainant attacked rail and water rate charged on 400 cases of canned fruit in tins, shipped Nov. 16, 1922 from Red Creek, N. Y., to Jacksonville, Fla., as unreasonable and in violation of the fourth section. Shipment moved N. Y. C., to New York, thence Clyde Steamship to Jacksonville, charged 97c. Rate was 38c to New York, 9c transfer charge, plus 39.5c beyond. Effective Feb. 12, 1924 a joint rail and water rate of 83.5c was published from Red Creek to Jacksonville. HELD, rate attacked unreasonable to extent it exceeded 86.5c, reparation awarded. Smith Richardson & Conroy v. N. Y. C. R. R. 107 I. C. C. 553.

(3l) It is important that all ports be kept open and in as vigorous a condition as possible so that water lines may be attracted thereto and the public given the cheapest and most efficient service, both by water and by rail. Galveston Commercial Asso. v. G., H. & S. A. Ry. Co. 100 I. C. C. 110, 122.

(3m) Proposed general revision of all-rail-and-water rates on furniture, including chairs and mattresses, c. l. and l. c. l., from southern manufacturing points to eastern territory, which would result

in both increases and reductions, found justified. Proposed schedules purport to comply with findings in original report, 91 I. C. C. 27; are designed to restore rates from southern manufacturing points to the East to a basis comparable with central-territory basis; and to bring about a greater uniformity in rates and carload minima. Findings in original report affirmed and order of suspension vacated. Furniture from Southern Points, 100 I. C. C. 127.

(3n) Rail-water-and-rail rate applicable on refuse grease from Houston, Tex., to Newark, N. J., found to have been unreasonable to extent that factor from Houston to New York exceeded amount specified herein. Reparation awarded. Houston Packing Co. v. B. & M. R. R. 100 I. C. C. 345.

(3o) Rail-and-water and rail-water-and-rail rates on lard substitutes, green, salted hides, and refuse grease from Houston, Tex, to New York, N. Y., and other eastern points, found not unreasonable as compared with contemporaneous rates on like traffic from same origin point to other destinations and from and to other points for comparable distances. Houston Packing Co. v. B. & M. R. R., 100 I. C. C. 345.

(3p) Water transportation is not easily comparable with rail transportation, nor is it easy to prescribe maximum rates for the one which will be fairly in harmony with maximum rates for the other. Southern Class Rate Investigation, 100 I. C. C. 513, 678.

(3q) Upon general investigation, on commission's own motion, of interstate class rates and l. c. l. commodity rates within southern territory and between southern and official territories, Found: That joint rail-water-rail class rates between interior points in eastern territory and interior points in southern territory are necessary and desirable in public interest and should be established, in lieu of present nonconcurrence rates, in all cases where maximum reasonable rail-water-rail rates are herein prescribed. Southern Class Rate Investigation, 100 I. C. C. 513, 683.

(3r) Commission has no power to prescribe minimum water-rail rates, except where the water lines are controlled by rail carriers. Southern Class Rate Investigation, 100 I. C. C. 513, 686.

(3s) Proposal to restrict application of proportional or reshipping rates on grain and products from Argo, Ill., and other stations in the Chicago switching district to Boston and destinations taking that rate and to destinations in eastern Canada, via Milwaukee, and make applicable to the rail and lake traffic through Milwaukee the higher combination of rates on St. Louis, found justified. Present Argo rates are being used on traffic for which they were never intended, resulting in disadvantages to certain carriers and avoidances of terminal charges at Chicago by certain lines. Proposed schedules would remedy such disadvantages. Grain and Products from Argo, 101 I. C. C. 303.

(3t) In 100 I. C. C. 127 the Commission found that respondents had justified a proposed general revision of the all rail and rail and water rates on all kinds of furniture, including chairs and mattresses, in carloads and less carloads, from practically all southern manufacturing points to eastern territory and affirmed findings in original report, 91 I. C. C. 27. The origin grouping, with minor exceptions if the adjustment be viewed as a whole, was not only unchallenged by protestants but was retained by respondents at the request of manufacturers, many of whom are now before the Commission as protestants. Whether these groups are defensible is question which is neither proper nor possible to determine upon this record. No evidence tending to show undue prejudice in the grouping was offered. If shippers in the Virginia-Carolina group or in any other group are of the view that the group rates result in undue prejudice to some of them the affected shippers are at liberty to take up with respondents the matter of regrouping, with appropriate readjustment of the rates or to bring that situation to the attention of the Commission in a proper proceeding. HELD, increased rates justified. Furniture from southern points, 112 I. C. C. 302.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In general.

(a) The commission has denied requests for the establishment of rate breaking adjustments at grain handling points of far more importance than Helena, Ark. Helena Traffic Bureau v. M. P. R. R., 89 I. C. C. 405, 516.

(b) Commission has consistently found that it is not its function to equalize, by means of rates, natural or commercial advantages of location. Young v. C., I. & L. Ry. Co., 89 I. C. C. 428, 436.

II. ELEMENTS DETERMINING REASONABLENESS.

§2. In general.

(a) In determining the reasonableness of cotton rates the commission must consider not only the various common elements generally taken into account in arriving at a conclusion as to reasonableness of rates, such as value, loss-and-damage claim expense, volume of tonnage, effect on equipment, and other elements regarded as of a determinative character in the average case, but in addition the expensive and unusual service that cotton must be accorded which distinguishes it from all other traffic. Mississippi R. R. Commission v. A. & V. Co., 88 I. C. C. 47, 65.

(b) Commission instituted upon its own motion to determine to what extent, if any, the rates, charges regulations, and practices of carriers subject to the act, in respect of the transportation of grain and grain products in interstate or foreign commerce, are or for the future will be unjust, unreasonable, or otherwise unlawful, and, if so found, to prescribe just, reasonable and lawful rates, charges, regulations and practices thereafter to be observed. Complainant attacked and reasonableness and propriety of the present level of interstate rates for the transportation of grain, grain products and hay, in carloads, between the territory embraced in the western group. **Western Group.** The rates on wheat and its products, as well as hay, in this group are now 117.5%, the rates on coarse grains 105.75%, and the rates on all other commodities 121.5% of the rates in effect at the end of federal control. Compared with the pre-war period, the rates on wheat, its products, and coarse grains are now generally about 45% above the rates then in effect. In reaching this percentage the Commission has given consideration to the 6c maximum increase made under G. O. 28. The rates on hay are about 47% above the pre-war level. Rates on other commodities stand on a level 52% higher than pre-war. Grain products usually move on the remainder of through rates. Transit arrangements are of value to the farmer as well as to the miller and the market, in that the farmer is thus afforded wider marketing opportunities. **Duty of the Commission under the act and the General Principles that Govern.** Agriculture is a basic industry. It creates new wealth. If the farmer for an extended period fails to get a fair wage for his labors and a return upon his investment, his adversity must be reflected in other activities in agricultural regions, including the railroads, and, to some extent, in the country as a whole. The Commission recognizes the importance of agriculture and are in entire sympathy with any lawful measures that may be adopted for its permanent good, but it believes that the part of freight rates in the present economic condition of agriculture has been overemphasized by many. Complainants recognize that the freight rate from the farm to the primary market is no more than one of the elements considered by the country elevator in fixing grain prices to the farmer. Of prime import-

ance to the agricultural industry and to the country in general is an adequate and efficient transportation service. The extent to which a marked rate reduction would disable the carriers generally or particular carriers in the performance of this service is of great consequence. Upon the flourishing condition of these two industries, agriculture and transportation, depends largely the country's permanent prosperity. To assist one of them unduly at the expense of the other at a time when neither is in an ideally prosperous condition, merely because one may be in a worse condition economically than the other, would be of doubtful value to the assisted industry or to the country, assuming for the moment that it is within the power of the Commission arbitrarily to render this assistance. The carriers as a whole in the western group have yet to make a fair return on the value of their properties over any considerable consecutive period of time. There has been, nevertheless improvement in service, but, if further substantial revenue losses are to be sustained by respondents at the present time, the public interest would be directly affected through a further weakening of railroad credit and a lowering of the standard of railway service. **Summary and Conclusion.** It appears that rates on grain, grain products and hay, generally speaking, are now on a somewhat lower basis compared with pre-war freight rates than are the carload rates on other traffic. That the earnings per car, per car mile, and per ton mile on grain and grain products, compared with other classes of traffic and with all carload traffic, do not show that grain and its products are now contributing more than their fair share to the revenues of the carriers in this group, considering the value of the traffic, the average hauls, the relative services performed, and the ratio of revenue produced by grain and grain products to total carload revenue compared with former years. That there has been an increase in the average loading of grain and its products in recent years as well as in the average loading of all carload traffic, although not to the same extent in the case of all carload traffic. That there has been slow but progressive improvement in the economic condition of agriculture in the western group since 1921, though the improvement in grain raising areas is less than with respect to other classes of agriculture. That the present adjustment of rates on grain and its products from the element of value standpoint, compared with the other heavy loading commodities moving in volume, pointed to by complainants, as profiting by the disturbance in relative values, is not unfavorable to grain and grain products. That despite a peak year in 1923 from the standpoint of traffic handled, it does not appear that respondents made a fair return, after giving due consideration to the complainants contentions as to abnormal expenditures for maintenance of equipment, and to the aggregate valuation. That the Commission has no assurances on this record that there will be such further increases in tonnage or such reductions in operating expenses in the immediate future as to enable respondents to earn an excess over a fair return. Any further reduction in revenue would increase the shortage in the fair return of carriers in the western group. That large additions to capital must continually be made by carriers in this group for needed additions and betterments, which can not be done if the credit of the carriers is seriously affected by undue impairment of their net revenues from operation. That the benefit which would accrue to the average farmer in case of a reduction in rates is small compared with the aggregate disastrous effect on certain of respondents revenues and on their credit, and there is serious doubt whether farmers would not in many instances lose from impaired railroad service more than they would possibly gain from a reduction in rates, even if the farmers would get the entire benefit of any reduction made. The present rate structure is largely the result of commercial and transportation conditions, and under it the trade and commerce of the country have grown up. Any material disturbance therein will have a tendency to cause disruption of business conditions generally to the detriment of an orderly conduct of commerce and with possibly serious effects upon large sums of invested capital and upon the steady employment of labor. Any marked readjustment might mean the moving of industries from points now near the source of supply of raw materials to points farther distant. A revision involves an undertaking of magnitude and requires a large expenditure of funds not at present at disposition of the Commission. Many of the rates here attacked were prescribed by the Commission and, over a long period of time, the Commis-

sion has been constantly engaged in readjusting and prescribing rate schedules on these and many other commodities. Since the act was enacted, and probably during a much longer time, traffic conditions and commercial conditions have been adjusting themselves to the existing relation of rates. It is not enough that the present conditions may not be ideal; it must appear that something better is obtainable. HELD, the general basis of rates, charges, regulations and practices of carriers subject to the act for the transportation of grain, grain products and hay in interstate or foreign commerce, brought in issue in these proceedings, are not unreasonable or otherwise unlawful. Complaint dismissed. Rates and charges on grain and grain products, 91 I. C. C. 105.

(c) The Commission would not be warranted in announcing any rule of general application as a basis for determining the reasonableness of rates exacted on shipments moving before or after June 25, 1918, or any other date. The Commission is equally convinced that in proceedings against the director general, as in all others, it must adhere to the sound and salutory principle that whether and to what extent a rate was or is unjust or unreasonable in a particular case is a question of fact, to be determined by the exercise of good judgment, informed by experience, in the light of all the pertinent facts of record in that case. Diamond Match Company v. Director General, 92 I. C. C. 373, 374.

(d) The Commission has frequently found that the matters to be considered were rather the earnings and transportation conditions, regardless of the percentage formula. West Virginia Rail Co. v. P. R. R., 93 I. C. C. 216, 219.

(e) The Commission has repeatedly found that it can not accept the percentage formula as a measure of the reasonableness of rates or as a criterion of their lawfulness in other respects, the matters to be considered being rather the earnings and transportation conditions. Toledo Cooker Company v. N. & A. Ry., 93 I. C. C. 271, 273.

(fgh) The possible effect of the findings upon other rates should not deprive complainants of a reasonable basis for the transportation of their particular products. Carnation Milk Products Co. v. A. & W. Ry., 96 I. C. C. 208, 211.

(i) Shippers are entitled to reasonable rates upon whatever traffic they ship. Omaha Cold Storage Co. v. C. & N. W. Ry., 98 I. C. C. 437, 441.

(j) Upon consideration of usual tests of reasonableness, commercial and economic aspects of situation, earnings as compared with those on other traffic, and fact that carriers in western group have not made fair return on value, the general basis of rates, charges, regulations, and practices of carriers subject to the act, on grain, grain products, and hay, found not unreasonable or otherwise unlawful, and such commodities found not to be contributing more than their fair share of transportation burden. Rates and Charges on Grain and Products, 91 I. C. C. 105.

(k) Shippers' safeguard against exaction of exorbitant charges is found in section 1 of the act, and if persons advocating reductions on certain commodities meet usual tests of reasonableness approved by experience and valid in law, and rates on such commodities are unreasonable, it is commission's duty to prescribe just and reasonable rates thereon for future. Rates and Charges on Grain and Products, 91 I. C. C. 105, 153, 154.

(l) Commercial and economic conditions affecting a particular industry are matters which commission may take into consideration, but they are not controlling in making of reasonable rates. Wool Rates Investigation, 1923, 91 I. C. C. 235, 249, 252.

(m) Proper rate making secures to every shipper performance of transportation service for more than a reasonable charge and requires that all shippers pay a reasonable charge for every service rendered. Wool Rates Investigation, 1923, 91 I. C. C. 235, 280.

(n) The law places burden upon carriers to prove that a proposed adjustment of rates is just and reasonable, and mere fact that they are attempting to make readjustment because some participating carriers desire that they do so, or that it may help to remove a complaint of discrimination pending before commission, is not sufficient evidence or proof of reasonableness of rates proposed under adjustment, or that present rates are unremunerative or unreasonably low. Boots and Shoes from New York Points, 91 I. C. C. 591, 596.

(op) Contention by carriers that establishment of a specific rate on manganese-steel scrap would disrupt entire rate structure on other scrap iron or steel, HELD: A shipper is entitled to a reasonable rate on its traffic, even though maintenance of such a rate would lead to other readjustments. Arizona Corp. Comm., 87 I. C. C. 271, 274. Chicago Heights Mfrs. Asso. v. P. R. R., 92 I. C. C. 194, 195.

(q) Reasonableness of any rate can not be measured solely by comparing its earnings with average earnings on all traffic. If it could be, inevitable results would be to bring all rates to a common level. Indiahoma Refining Co., 74 I. C. C. 392. Chicago Heights Mfrs. Assn. v. P. R. R., 92 I. C. C. 194, 196.

(r) Rate level necessary to move a commodity is an element to be considered together with other elements in determining a reasonable rate on the commodity. Chicago Heights Mfrs. Asso. v. P. R. R., 92 I. C. C. 194, 198.

(s) Fact that rates prescribed by commission will result in reductions in other rates, and thus bring about a material loss of revenue to carriers, is not in itself proof that rates prescribed are unreasonably low. Utah State Automobile Asso. v. A., T. & S. F., 92 I. C. C. 376, 383.

(t) Fact that some movement can be shown under a rate is no proof that it is reasonable. It would be a singular doctrine to hold that no rates are unreasonably high except those which actually stifle the movement of freight. Utah State Automobile Asso. v. A. T. & S. F., 92 I. C. C. 376, 383.

(u) Rates on salt from and to various points of production and consumption found unreasonably low in some instances and reasonable minimum rates for future prescribed. Salt Cases of 1923, 92 I. C. C. 388.

(v) Present rates on salt from Louisiana mines to Chicago found unreasonably low. Their continuation would force reductions in rates on lines of other carriers and would probably result in rate wars, injurious to carriers as a whole and to public, and would thereby tend to cause increases in rates on other traffic. Reasonable minimum rates for future, which will protect the salt-rate structure, prescribed. Salt Cases of 1923, 92 I. C. C. 388, 408, 412.

(w) Present rates on salt from Louisiana mines to Chicago were designed for purpose of promoting financial success of the salt mines in disregard of measure of revenue which carriers are entitled to receive for services rendered. Retaliatory reductions have been established from other fields resulting in a salt-rate war and rates from all fields to highly competitive points have reached so low a level that many shippers are asking that it be raised in order that revenue may be sufficient to make the tonnage attractive to carriers, and in order that service may be improved. Salt Cases of 1923, 92 I. C. C. 388, 411.

(x) Measure of rates on a specific commodity such as salt from and to particular points or within narrowly defined areas can not fairly be determined by fluctuations in aggregate earnings of carriers as a whole. Salt Cases of 1923, 92 I. C. C. 388, 437.

(y) In absence of differentiating transportation conditions competitive articles should be accorded a parity in rates and ratings. Edlund Broom Corp. v. B. & M. R. R., 92 I. C. C. 749, 752.

(z) A rate just and reasonable when prescribed may become too low, unreasonable, and confiscatory. Barton, Dist. Atty. of County of N. Y. v. Belt Line Ry. Corporation, 45 Sup. Ct. 534.

(aa) An individual miller is a shipper and entitled to reasonable rates, rules, and regulations measured in light of business and transportation practices in the industry in which he is engaged. Flory Milling Co. v. C. N. E. Ry., 93 I. C. C. 129, 133.

(bb) Reasonableness of rates charged, and not strict conformity with prescribed method of making percentage increases or reductions in their predecessors, is the controlling consideration. Anaconda Copper Mining Co., 57 I. C. C. 723, and other cited cases. N. Y. Stable Manure Co. v. Director General, 93 I. C. C. 349, 351.

(cc) Rates on cabbage from Charleston, S. C., to New England eastern trunk line and central territories, in 1-bushel packages found unreasonable to extent they exceed the present rates per 100 pounds on cabbage in 1.5 and 3 bushel packages from and to the same points. South Carolina Produce Assn. v. A. & R. R. R., 96 I. C. C. 107, 110.

(dd) The commission has frequently said that each community is entitled to reasonable rates by whatever name they may be known and that carriers may not, through the medium of special adjust-

ments to particular territories, establish restricted rate areas. Indiana State Chamber of Commerce v. A., T. & S. F. Ry. Co., 96 I. C. C. 485, 495.

(ee) A contract between carrier and shipper contemplating the establishment of a certain rate for a particular service is not conclusive in determining the maximum reasonable rate for the service. Union Sulphur Co. v. T. & N. O. R. R. Co., 98 I. C. C. 76, 81.

(ff) Even where the movement is of a temporary character the shipper is entitled to a just and reasonable rate consistent with those charged others under similar conditions and one that will meet the usual tests of reasonableness. Utah-Idaho Sugar Co. v. Director General, 98 I. C. C. 541, 543.

(gg) Regardless of who complains about the rates or who would use them, shippers are entitled to reasonable rates. Oregon Cattle & Horse Raisers Asso. v. N. P. Ry. 104 I. C. C. 51, 60.

(hh) Rates proposed must be shown to be not only reasonable but otherwise lawful. South Dakota R. R. Commissioners v. C. & N. W. Ry. 107 I. C. C. 35, 47.

(ii) Natural disadvantages under which the growers in one district may operate in getting their products to markets are not such matters as the commission may consider in determining the propriety of rail rates from competitive producing territories. Potatoes and Onions, from Colorado, Utah, and Wyoming to California, 100 I. C. C. 49, 53.

(jj) Delay in the publication of reduced rates is not determinative of the unreasonableness of the rates in effect prior thereto. Crown Williamette Paper Co. v. Director General, 100 I. C. C. 397, 400.

(kk) Every shipper is entitled to a reasonable rate on his traffic, even on sporadic movements, and where he attacks the reasonableness of a rate, whether class or commodity, that issue must be decided upon its merits. 88 I. C. C. 185, 187. Budding Co. v. P. R. R. Co., 100 I. C. C. 411, 413.

(ll) Rates on pianos, c. l. and l. c. l., from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., found not unreasonable or unlawful. Complainant contends that some of the shipments were misrouted depending upon his interpretation of the tariffs contemporaneously in effect naming lower rates from the same points to Mobile, Ala., claiming that such rates were applicable to Birmingham under the so-called intermediate rule contained in those tariffs. It is found that complainant paid the higher rates charged without protest for a long period, did not present his complaint until more than six months after the charges on the last shipment were paid and one day after the intermediate rule was changed so as to preclude his contention, and presented no request to the commission for suspension of the new rule which, under the construction contended for, effected increased rates on his traffic. This tends to show that complainant was not misled to his damage by the intermediate rule under consideration and no evidence as to unreasonableness was presented. Forbes & Sons Piano Co. v. A. G. S. R. R., 101 I. C. C. 74.

(lla) Rate on coal from mines in western Kentucky on the L. & N. to Franklin, Tenn., found unreasonable to extent it exceeded lower specific rate under which the yield of ton-mile earnings compare favorably with those yielded under contemporaneous rate on like traffic from same mines to Nashville. Reasonable rate prescribed and reparation awarded. Lillie Mill Co. v. L. & N., 102 I. C. C. 67.

(llb) Rate assessed on wheat moving from Chappell, Nebr., to Wichita, Kans., there stored and later reshipped to San Diego, Calif., found not unreasonable. While tariff carrying rate claimed was applicable over circuitous route of movement because unrestricted in its application, on other hand, tariff of carrier moving the shipment into transit point did not authorize storage at that point where outbound movement is made over other lines, as was the case here. Moreover, shipment here moved out of direct route to such extent as to entail wasteful transportation of the nature objected to by commission in 73 I. C. C. 116. Wallingford Bros. v. C., R. I. & P., 102 I. C. C. 239.

(llc) In passing upon the reasonableness of any particular rates or charges, it is necessary always to consider the special circumstances and conditions surrounding the situation under review. Continental Oil Co. v. Director General, 102 I. C. C. 338, 342.

(lld) Fact that a carrier's net railway operating income is not as high as that which carriers as a group may earn under section 15a of the act does not prohibit commission from fixing a just and reasonable rate on a particular commodity between particular points on its line. Furthermore, in establishment of rates on a single commodity fact that carriers are operating at a loss or on a narrow margin of profit should not be given too much weight, unless it clearly appears that the particular commodity constitutes bulk of traffic transported. See 60 I. C. C. 687, 702. United Paperboard Co. v. G. & J. Ry., 102 I. C. C. 502, 506.

(mm) It is well established that the unfavorable financial condition of a defendant is not a justification for the continuance of unreasonable rates on a particular commodity. Richmond Radiator Co. v. N. Y. H. & H. R. R. 109 I. C. C. 497, 499.

(nn) The mere fact that application for a specific rate was not made in advance of movement is no justification for charging an unreasonable rate. Tamms Silica Co. v. C. & N. W. Ry. 109 I. C. C. 618, 620.

ALL OTHER CITATIONS

Cleveland Provisions Co. v. A. G. S. R. R. Co., 88 I. C. C. 161; Armacost & Co., v. M. & M. T. Co., 88 I. C. C. 185; Arizona Egyptian Cotton Co. v. Director General, as Agent, 88 I. C. C. 263; Southern Cotton Oil Co. v. Director General, as Agent, 88 I. C. C. 280; Valley Camp Coal Co. v. B. & O. R. R. Co., 88 I. C. C. 682.

§3. Actions of State Commissions.

See State Rates and Regulations.

(a) The Commission takes into consideration the level of intrastate rates in reaching a conclusion as to the reasonableness of interstate rates in the same general territory, but it is not bound to adopt the intrastate level of rates as proper for application on interstate traffic. Hopeman Material Co. v. N. P. Ry., 98 I. C. C. 361, 366.

§6. Car-Mile or Train-Mile Revenue.

See Evidence §6, §8.

(a) Probative force of car-mile earnings in considering rate level to be applied to a heavy-loading, low-grade commodity is well recognized. Chicago Heights Mfrs. Asso. v. P. R. R., 92 I. C. C. 194, 195.

(b) Earnings of 17.53 mills per ton-mile, 59.84 cents per car-mile, and $587.04 per car on caustic soda are comparatively high for such low-grade traffic. Refinite Co. v. C. & N. W., 92 I. C. C. 266, 269.

(c) The commission has frequently observed that car and car-mile earnings afford a more reliable guide than ton-mile earnings. Furniture from Southern Points, 100 I. C. C. 127, 136.

§7¼. Combination of rates.

See Evidence §10.

(a) Combination rate to and from Vicksburg, Miss., on staves and heading from Holly Ridge, La., to Savannah and Brunswick, Ga., and Jacksonville, Fla., found not unreasonable as compared with rate from Vicksburg to same destinations. Comparisons introduced by defendants show that both factors composing rate assailed are not out of line and are comparable with rates for similar distances in same general territory. Moreover, shipments from Holly Ridge require additional service of crossing the river by ferry at Vicksburg. Jackson Traffic Bureau v. A. & V. Ry. Co., 89 I. C. C. 399.

(b) Complainant attacked combination rate of 38.5c on rough staves and headings from Holly Ridge, La., to Savannah and Brunswick, Ga., and Jacksonville, Fla., as unjust and unreasonable. Holly Ridge is on the V. S. & P., 47 and 91 miles west of Vicksburg and Jackson, Miss. The rate from Holly Ridge to the ports named is 38.5c composed of 11c to Vicksburg and 29.5c beyond, subject to the combination rule. A joint rate of 27c applied from Jackson, and complainant contended that a 2.5c arbitrary over this rate would produce a reasonable rate from Holly Ridge. Average distance is 791 miles. HELD, rate attacked not unreasonable, complaint dismissed. Jackson Traffic Bureau v. A. & V. Ry., 89 I. C. C. 399.

§7½. Comparisons.

See Blanket Rates §18; Classification §20; Comparative Rates; Evidence §11, §12, §13; Through Routes and Joint Rates §15.

(a) Complainants sought to demonstrate intrinsic unreasonableness by comparing rates and revenues derived from cotton with rates and revenues derived from other commodities, but well-

settled rule is that most helpful evidence in determining reasonableness of rates is to compare them with rates on like traffic, moving under like circumstances, in same general territory. Mississippi Railroad Commission v. A. & V. Ry. Co., 89 I. C. C. 47, 61.

(b) In comparative rate adjustments consideration may and should be given to economic conditions surrounding the traffic, so that an adjustment may result which will reflect as high a degree of uniformity as is practicable and at the same time accord to all interested the fair opportunity to which the law entitles them. Southwestern Coal Operators' Asso. v. A. & W. Ry. Co., 89 I. C. C. 73, 82.

(c) Rate on copper bullion from Clarksdale, Ariz., to San Pedro and East San Pedro, Calif., found unreasonable as compared with rates from Montana, Nevada, and Utah copper producing points to Pacific Coast ports and with rates prescribed in Phelps Dodge Corp., 57 I. C. C. 714, from Douglas, Globe and Clarkdale, Ariz., to Galveston, Tex. Reasonable rate for future prescribed. United Verde Extension Mining Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 95.

(d) Rates on peanuts, in bulk, found unreasonable to extent they exceeded lower rate on "peanuts, unshelled, in bags or boxes." Reparation awarded. Southern Cotton Oil Co. v. Director General, as Agent, 89 I. C. C. 154.

(e) Maintenance of fertilizer basis of rates on nitrate of soda intrastate in Louisiana and Texas is not of itself a reason for requiring extension of that basis to movements of nitrate of soda from New Orleans, La., to Arkansas. New Orleans Joint Traffic Bureau v. A. & V. Ry. Co., 89 I. C. C. 223, 226.

(f) Fact that carriers in the Southeast have accorded to nitrate of soda the fertilizer basis of rates does not establish that in the Southwest rates on nitrate of soda higher than on fertilizer are unreasonable. New Orleans Joint Traffic Bureau v. A. & V. Ry. Co., 89 I. C. C. 223, 227.

(g) Rate on stoneware and tile, broken, found unreasonable as compared with rates on brick, other than common, and to extent it exceeded rate found reasonable in National Paving Brick Mfrs. Asso., 68 I. C. C. 312, modified to reflect the general rate level in effect when shipments moved. Present rates conforming to case cited found not unreasonable. Reparation awarded. Northwestern Terra Cotta Co. v. P., C., C. & St. L. Ry. Co., 89 I. C. C. 257.

(h) Mere statement of rate comparisons without a showing of conditions under which rates were established, volume of movement thereunder, or that transportation circumstances and conditions are substantially similar, are not very helpful in determining the reasonableness of rates. New York Commission of Highways, 55 I. C. C. 619, 623. Atlantic Refining Co. v. A., B. & A. Ry. Co., 89 I. C. C. 279, 280.

(i) Mere comparison of rates without a showing of conditions under which such rates were established or of the volume of movement thereunder; are of slight probative value in determining the reasonableness of rates. Buxton-Smith Co. v. A. T. & S. F. Ry. Co., 89 I. C. C. 373, 376.

(j) An average rate arrived at by use of rates for hauls of less than 100 miles has little, if any, probative force in determining the reasonableness of a rate for a haul of 450 miles. Atlantic Refining Co. v. Director General, as agent, 89 I. C. C. 391, 393.

(k) Rate on cabbage, found unreasonable to extent it exceeded rate on onions and potatoes. Reparation awarded. Meyer-Vasquez Produce Co. v. Director General, as Agent, 89 I. C. C. 437.

(l) Differences in transportation and traffic conditions must be taken into account in considering comparisons of intrastate rates in different states. Nebraska Livestock Case, 89 I. C. C. 444, 451.

(m) Rates on draintile found not unreasonable as compared with rates on brick, transportation characteristics of draintile justifying somewhat higher rates. Post Bros. Tile Co. v. Director General, as Agent, 89 I. C. C. 544.

(n) Rates on salt found unreasonable as compared with lower rate on soda ash, which is twice the value of salt and of lighter loading. Reparation awarded. Boston Wool Trade Asso. v. Director General, as Agent, 89 I. C. C. 589, 599.

(o) Upon an extensive investigation as to what rates, as applied to a particular class of traffic to be offered, will be likely to produce a fair return hereafter, past or present statistics of operation and earnings are serviceable only

as they illuminate the future. Rates and Charges on Grain and Products, 91 I. C. C. 105, 122.

(p) Rates on cotton seed from points in western Kentucky and Tennessee to Cairo, found not unreasonable or unduly prejudicial. Rates sought were compared with lower rates for like distances in Mississippi Valley and southeastern territory but such rates reflect low levels of intrastate rates required by State authorities. Carriers instanced many higher rates under which cotton seed moves between points in South and Southwest and also rates found reasonable by commission in various cases which compare favorably with those assailed. Considering differences in distance and relative levels of rates, adjustment can not be said to be unduly preferential of Tiptonville and Dyersburg, Tenn. Cairo Cotton Oil Mill v. I. C. R. R. Co., 91 I. C. C. 765.

(q) Rates on metallic and woven-wire mattresses found not unreasonable as compared with rates on metallic springs, metallic beds, davenports, metallic cribs, and similar articles. Madden, Son & Co. v. Director General, 92 I. C. C. 48.

(r) Rate on l. c. l. shipments of pulp paper moving from West Point, Va., to Baltimore, by water, thence by rail to Saugerties, found not unreasonable as compared with lower joint water-and-rail rate to Ravena, N. Y., a farther distant point, which lower rate was subsequently established to Saugerties to meet rates maintained by competing lines. Such subsequent reduction does not warrant a finding that prior rate was unreasonable, and no damage was shown by reason of any undue prejudice which may have existed. Smythe Co. v. C. S. S. Co., 92 I. C. C. 95.

(s) Rates assessed on sporadic shipments of broken plaster molds from Chicago to Hannibal found not unreasonable as compared with lower rate on brick, which lower rate was subsequently made applicable on broken plaster molds. While there was no rate or rating applicable on shipments here involved, earnings under rates charged compare favorably with earnings on same commodity and on brick from Chicago to other points in Michigan and Indiana. Atlas Portland Cement Co. v. Director General, 92 I. C. C. 171.

(tu) Reasonableness of any rate can not be measured solely by comparing its earnings with average earnings on all traffic. If it could be, inevitable result would be to bring all rates to a common level. Indiahama Refining Co., 74 I. C. C. 392. Chicago Heights Mfrs. Asso. v. P. R. R. 92 I. C. C. 194, 196.

(v) Rate on cullet (broken glass) found not unreasonable as compared with rates on junk and other low-grade commodities. Liberty Glass Co. v. St. L.-S. F., 92 I. C. C. 199.

(w) Rates on linters, munition, found unreasonable to extent they exceeded those contemporaneously in effect on cottonseed-hull fiber or shavings. Reparation awarded. Cotton By-Products Co. v. S. Ry., 92 I. C. C. 201.

(x) Rates on coke, reilly carbon, found unreasonable to extent they exceeded rate on coal-tar pitch, of which Reilly coke is a residuum or refuse, after more valuable products are drawn off. Reparation awarded. Acheson Graphite Co. v. Director General, 92 I. C. C. 215.

(y) Rate on boilers found unreasonable to extent it exceeded lower rate on machinery and machines. Reparation awarded. National Supply Co. of Texas v. C. C., C. & St. L. Ry. 92 I. C. C. 295.

(z) Rates on alkali salts, so-called potash, found not unreasonable as compared with rates on beet-sugar residuum, Hartsalz, or double manure salt, and kainit. These salts are competitive commodities in the manufacture of fertilizers and are sold on basis of number of units of potash they contain. Complainant's product contains more units of potash than most of the other potash salts named, and hence is considerably more valuable. Standard Potash Co. v. Director General, 92 I. C. C. 337.

(aa) Rate on creosote oil, in tank-car loads, from Ensley, Ala., to De Ridder, La., during Federal control, found unreasonable as compared with lower rates contemporaneously in effect from Ensley and from New Orleans, La., to various destinations. Reparation awarded. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519.

(bb) Rate on broom handles known to the trade as handles "in the rough" or "not further finished," found unreasonable to extent it exceeded lower rate on "handle timber, in the rough, sawed or turned to shape, not further finished." Reasonable rate for future prescribed and reparation awarded. Wichita Board of Commerce v. C., R. I. & P. 92 I. C. C. 574.

(cc) Rate on clay found unreasonable to extent it exceeded rate on brick and other products of higher value manufactured therefrom. Clay and products formerly were rated the same, but due to application of increases and reductions this parity was disrupted and subsequently restored following General Brick case, 68 I. C. C. 213. Reparation awarded. Midland Terra Cotta Co. v. P., C., C. & St. L. Ry., 92 I. C. C. 601.

(dd) Rates on bars, copper found not unreasonable as compared with rates on copper wire, the manufactured product of copper bars. Former report, 64 I. C. C. 691, affirmed. Raritan Copper Works v. Director General, 92 I. C. C. 671.

(ee) Rates on feldspar found unreasonable as compared with rates on poultry grit, lime, limestone, chrome ore, phosphate rock, and rough granite. Reasonable rates and minimum weights prescribed and reparation awarded. Ceramic Traffic Asso. v. M. C. R. R., 92 I. C. C. 675.

(ff) Rates on phosphate, acid found unreasonable as compared with lower rates on phosphate rock, agricultural limestone, coke, draintile, rock gypsum, shells, and wood pulp. Buhner Fertilizer Co. v. B. & O., 92 I. C. C. 756, 757.

(gg) Mere rate comparisons without a showing of conditions under which rates were established, volume of movement, or that transportation circumstances and conditions are subsequently similar, are not helpful in determining the reasonableness of rates on particular commodities. Salt Lake Potash Co., 87 I. C. C. 695. Chevrolet Motor Co. v. Director General, 93 I. C. C. 544, 546.

(hh) Comparisons based upon distance alone have little probative value in measuring the reasonableness of rates. This is particularly true where rates compared are group rates in establishment of which element of distance must be subordinated to other considerations. Louisville Cooperage Co. v. L. & N., 93 I. C. C. 593, 594.

(ii) Rates on hollow building tile from Alberhill, Calif., to Saticoy, Edfu, and Santa Paula, Calif., moving during Federal control, found unreasonable to extent they exceeded the rate contemporaneously in effect on fire and wire-cut face brick between the same points following National Paving Brick Mfrs. Asso. 68 I. C. C. 213, and the Memphis-Southwestern Investigation, 77 I. C. C. 474. Reparation awarded. Los Angeles Pressed Brick Co. v. Director General, 98 I. C. C. 45.

(jj) On artificial silk, in carloads, from Roanoke, Va., to Marcus Hood, Pa., complainant seeks a commodity rate which is the same as that applicable on artificial-silk waste, based on released value, in lieu of the first-class rate, any quantity, based on released value. FOUND, that the first-class rate assailed is not unreasonable and that there is no justification for requiring the same rate on artificial silk as on artificial-silk waste. Artificial silk is a high-grade article and the freight charges bear a small ratio to its value and the present rates are not shown to discourage the movement or to impose an undue burden on traffic, which is of a special character, between two of complainant's plants. The fact that the rate assailed is an any-quantity rate does not in itself prove that it is unreasonable as applied to carload shipments. U. S. Farm Sales Co., 92 I. C. C. 19. Viscose Co. v. P. R. R. Co., 98 I. C. C. 97.

(kk) Mere rate comparisons without showing a similarity of traffic or transportation conditions is not sufficient to warrant a finding of unreasonableness. Somerville Iron Works v. C. R. R. Co. of N. J., 101 I. C. C. 683, 684.

(ll) Rate on metal-cushion or seat-spring assemblies found not unreasonable, discriminatory, or unduly prejudicial in past but for future found unreasonable to extent it exceeds rate on davenport assemblies. Reasonable rate prescribed for future. Ft. Smith Couch & Bedding Co. v. B. & O., 102 I. C. C. 726.

(mm) In considering the reasonableness of group rates comparisons of distances and ton-mile earnings as between selected points can not be regarded as controlling. The reasonableness of such rates must be judged by average conditions. See 83 I. C. C. 591; 57 I. C. C. 714. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 734.

(nn) Mere showing of rates on other articles, without also showing that they are comparable in other respects, such as value, average loading, and risk of loss and damage, is not convincing in determining reasonableness of rates. Jackson Traffic Bureau v. St. L. S. F. Ry. Co., 88 I. C. C. 188, 190.

(oo) Neither rates on beverages nor on canned goods can be accepted as a

proper measure of the rates on grape juice. The value of grape juice greatly exceeds that of most of the beverages and it is not subject to same competitive conditions that have influenced the commodity rates on either beverages or canned goods. Armour & Co. v. Director General, as Agent, 88 I. C. C. 569, 577, 578.

ALL OTHER CITATIONS

Lehigh Lime Co. v. A. C. & Y. Ry. Co., 85 I. C. C. 341; Boldt Glass Co. v. C. B. & Q. R. R. Co., 85 I. C. C. 412; Germain Co. v. L. & N. R. R. Co., 85 I. C. C. 449; Indiana Public Service Commission v. A. A. R. R. Co., 85 I. C. C. 533; California Grain Co. v. Director General, as Agent, 85 I. C. C. 680; Manglesdorf Seed Co. v. A. T. & S. F. Ry. Co., 88 I. C. C. 120; Cohen v. A. T. & S. F. Ry. Co., 88 I. C. C. 143; American Maize-Products Co. v. Director General, as Agent, 88 I. C. C. 354; International Harvester Co. v. N. Y. C. R. R. Co., 88 I. C. C. 368; Lackawanna Steel Co. v. P. R. R. Co., 88 I. C. C. 759.

§8. Competition.

(1) In General.

See Competition; Long and Short Hauls §4¾.

(a) There may be a marked difference in the measure of rates voluntarily established by one carrier to meet competition, and rates prescribed by the commission as reasonable over the lines of other carriers for similar distances. United Verde Extension Mining Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 95, 100.

(b) The policy of competitive rate making, together with a purpose to develop the country, has resulted in lower rates than would otherwise exist. Nebraska Livestock Case, 89 I. C. C. 444, 447.

(c) The meeting of cross-country competition has been carried to unreasonable extremes in the past. Nebraska Livestock Case, 89 I. C. C. 444, 459.

(d) A locality has no inherent right to demand that rates break thereon. Nashville Lumbermen's Club, 40 I. C. C. 59, 61. Points on the banks of rivers or lakes in this country which are now accorded a rate-breaking arrangement have it because they play an important part in some industry as a whole, or because the force of competition has gradually brought about such an adjustment. Helena Traffic Bureau v. M. P. R. R. Co., 89 I. C. C. 405, 415.

(e) Carriers may for competitive or other reasons establish rates which the commission could not initiate for them; and equality of distance from competing markets is not an absolute test of whether an equality of rates results in undue prejudice and preference. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512, 524.

§8 (2). Railroad Competition.

See Railroad Competition.

(a) Rate charged on sugar from Brigham and Spanish Fork, Utah, to Breckenridge, Tex., found not unreasonable. While rate was subsequently reduced because of compelling carrier competition based on average length of haul, rate charged yielded ton-mile and car-mile earnings which do not appear excessive. Utah-Idaho Sugar Co. v. C. & N. E., 102 I. C. C. 388.

§8 (5). Wagon or motor competition.

See Motor Truck Service.

(a) Question of meeting motor-truck competition is more a matter for carriers than for commission to settle. Nebraska Livestock Case, 89 I. C. C. 444, 457.

§9. Cost of service and operation.

See Advanced Rates §7 (2); Evidence §6, §17, §18.

(a) Cost study covering only the more expensive part of through transportation can not be considered a fair test of the reasonableness of joint rates. Cost studies are at best only estimates, the accuracy of which could be tested only in practice, with possibility of harmful results. Adriatic Mining Co., 78 I. C. C. 611, 632. Limestone from Illinois Points, 89 I. C. C. 11, 14.

(b) Director general submitted evidence to show that, due primarily to retroactive application to January 1, 1918, of increase in wages of railway employees under General Order No. 27, operating costs were as great during first six months as during second six months of 1918, and contended that no lower basis of rates should be found reasonable on shipments made prior to June 25, 1918, than on shipments made on and after that date. HELD: While operating conditions prior to June 25, 1918, including retroactive application of wage

award, are important factors, they are not necessarily controlling in determining reasonableness of rates after January 1 of that year. Macbeth-Evans Glass Co. v. B. & O. R. R. Co., 91 I. C. C. 758, 760, 762.

(c) In passing upon reasonableness of rates or in determining whether or not undue prejudice and preference exist, cost of service is a factor which must be taken into consideration. There are other factors which have weight, but cost of service is one of the most important. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 95 I. C. C. 539, 565.

§10. Distance.

See Infra §36; Blanket Rates §9; Differentials; Distance Rates; Evidence §20, §58.

(a) An average rate arrived at by use of rates for hauls of less than 100 miles has little, if any, probative force in determining the reasonableness of a rate for a haul of 450 miles. Atlantic Refining Co. v. Director General, as Agent, B. & O. R. R. Co., 89 I. C. C. 391, 393.

(b) In complying with commission's order in 87 I. C. C. 207, wherein rates on mixed feeds from Beaumont and Orange, Tex., to destinations in Louisiana were found unreasonable to extent they exceeded or might exceed contemporaneous rates for similar distances between Natchez, Miss., and points in Louisiana, carriers published a distance scale under which rates were to be computed on actual distance plus 20 miles for service of crossing Mississippi River. FOUND: Since no corresponding crossing service is required on shipments from Beaumont and Orange, addition of this constructive mileage is contrary to spirit of the order. Original finding affirmed and clarified by excluding any constructive mileage in computing rates from Beaumont and Orange. Josey-Miller Co. v. B. R. R. & C. Co., 91 I. C. C. 213.

(c) The commission's conclusions in a particular case involving reasonableness of constructive mileage at particular points can not conclude a future decision made upon a record which may show in detail, and more comprehensively, the general practice of carriers as to making additional charges because of expensive bridges, trestles, tunnels, ferry operations, fills, and cuts, or other like devices against obstacles or barriers to transportation. Mileage for Mississippi Crossings, 93 I. C. C. 462, 464.

(d) Method of employing arbitraries is more reasonable, and less likely to result in undue or unreasonable prejudice or disadvantage to persons, localities, or descriptions of traffic, than method of adding 20 constructive miles to actual distance in computing charges for car ferry service at lower Mississippi River crossings. Mileage for Mississippi Crossings, 93 I. C. C. 462, 475.

(e) Rates on cement from Cape Girardeau (Gulf Junction), Mo., to points in Illinois found unreasonable and unduly prejudicial as compared with rates from competing Illinois mills to same destinations and to extent they exceeded those which would result under the distance scale of rates prescribed in Atlas Portland Cement Co., 81 I. C. C. 1. Reasonable and nonprejudicial rates prescribed for future. Cape Girardeau Portland Cement Co. v. B. & O., 95 I. C. C. 632.

(f) While origin points nearer to destination points must not be unduly deprived of the benefit of their locations and more distant origin points unduly favored, distance alone frequently is not controlling and must not be given undue weight, particularly where, as in this case, considerations which are largely determinative of the rates from the farther-distant point exist in a markedly less degree from the nearer point. Galloway Coal Co., 40 I. C. C. 311. Oakland Chamber of Commerce v. S. P. Co., 100 I. C. C. 55, 62.

(g) The policy of the southwestern carriers serving New Orleans, La., has been, generally speaking, to apply the Galveston, Tex., rates to New Orleans on traffic moving from or to all points west of the Mississippi River, except points in Texas south of a certain line. Such an adjustment necessarily disregards distance and commercial instead of natural advantages control. The commission has consistently refused to condemn such an adjustment where it is shown to serve the best interests of the public, but where, as here, it builds up one port at the expense of another equally favored by natural advantages from the origin territory here considered, a line must be found beyond which distance may not be disregarded. Galveston Commercial Asso. v. G., H. & S. A. Ry. Co., 100 I. C. C. 110, 121, 122.

ALL OTHER CITATIONS

International Harvester Co. v. N. Y. C. R. R. Co., 88 I. C. C. 368; Jeremy Fuel & Grain Co. v. Director General, as Agent, 88 I. C. C. 397.

§11. Earnings.

See Infra §36; Evidence §5, §51.

(a) Shippers are entitled to reasonable rates upon whatever traffic they ship. But in a situation of the kind here involved, where the packing specifications were not compiled with, resulting in a higher rate and rating than would otherwise have obtained, the earnings are not necessarily controlling. Omaha Cold Storage Co. v. C. & N. W. Ry. Co., 98 I. C. C. 437, 441.

(b) Fact that a carrier's net railway operating income is not as high as that which carriers as a group may earn under section 15a of the act does not prohibit commission from fixing a just and reasonable rate on a particular commodity between particular points on its line. Furthermore, in establishment of rates on a single commodity fact that carriers are operating at a loss or on a narrow margin of profit should not be given too much weight, unless it clearly appears that the particular commodity constitutes bulk of traffic transported. See 60 I. C. C. 687, 702. United Paperboard Co. v. G. & J. Ry., 102 I. C. C. 502, 506.

(c) Where a carrier is not earning a fair return on value of property used in service, it does not follow that any and every method advanced by it to increase its revenues must receive stamp of commission's approval merely because of its financial needs. Fort Smith, S. & R. I. R. R. v. A. & V. Ry., 102 I. C. C 708, 712.

ALL OTHER CITATIONS

Cotton and Linters to Louisiana and Texas Ports, 85 I. C. C. 5; Boldt Glass Co. v. C. B. & Q. R. R. Co., 85 I. C. C. 412; Boher & Hosfeld v. B. & M. R. R., 88 I. C. C. 449.

§13a. Erroneous Rate.

See Erroneous Rates.

(a) Proposed establishment by M. & O. R. R. of new rates and charges on uncompressed cotton from Meridian, Miss., to Carolina territory, for purpose of restoring the normal differential relationship between rates on uncompressed cotton with carrier's privilege of compressing, and cotton compressed at shipper's expense, found justified. The disrupted relationship was published in error only by the M. & O. and applied only on shipments delivered to it at Meridian, whereas from surrounding points the normal differential was maintained. Moreover, the commission's tariff rules require changes in rates to be specified in tariffs containing them, either as advances or reductions, but tariff here referred to published increases as though they had been mere continuations of rates previously in effect. Cotton to Carolina Territory, 92 I. C. C. 125.

(b) Rates on coal screenings, shipped from Contrall, Springfield, and Pana, Ill., to Lyons, Iowa, during Federal control found not unreasonable although lower rates on same commodity were contemporaneously applicable from same points to Clinton, Iowa, within the switching limits of which Lyons is located. Lower rates to Clinton were established through error. Complaint dismissed. Ford Roofing Products Co. v. Director General, 96 I. C. C. 471.

(c) Applicable rate on dried beans from Mills, N. Mex., to Rockdale, Tex., found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from and to same points over other available routes and to contiguous points, which lower rate was not made applicable to Rockdale over route of movement until subsequent to movement here involved through error on part of carriers. Reparation awarded. Waco Chamber of Commérce v. E. P. & S. W., 102 I. C. C. 105.

(d) Rate on fuel wood from Baca, Perea, and Thoreau, N. Mex., to El Paso, found applicable but unreasonable to extent it exceeded lower rate published in tariff supplement by special permission, but which was rejected and returned as being in transgression of General Order No. 28 of director general. The rejection may have been in error but the fact remains that the schedules were returned, and it must be concluded they never took effect. Kaseman v. A., T. & S. F., 102 I. C. C. 315.

ALL OTHER CITATIONS

Crown Willamette Paper Co. v. Director General, as Agent, 85 I. C. C. 657; Doniphan Brick Works v. Director General, as Agent, 88 I. C. C. 436; Keystone Roofing Mfg. Co. v. Director General, as Agent, 88 I. C. C. 707.

§16. Long Continued Adjustment.

See Evidence §29, §43, §66.

(a) Fact that a rate has been voluntarily maintained by a carrier for a period of years is evidence tending to show that it is reasonably high. See also 32 I. C. C. 361. Boots and Shoes from New York Points, 91 I. C. C. 591, 595, 596.

(b) One test of the reasonableness of a rate is its relation to whole rate structure of which it is a part. News Corp. v. M. P., 93 I. C. C. 381, 383.

(c) Proposed rates on paper boxes between points in the Southeast, found justified in part. Complaint against maintenance of commodity rates from Nashville to interior southern points, while class rates apply from Chattanoga, Atlanta, and Birmingham, and in order to satisfy insistent demands for an immediate adjustment on a more consistent and relative basis, and at the same time correct existing fourth-section departures, is given as reason for the revision. The proposed rates are intended only as a temporary measure to take care of the situation until such time as all rates on paper and paper articles between points in the Southeast may be revised on a more comprehensive scale. Paper Boxes between Southeastern Points, 93 I. C. C. 559.

(d) The fact that other rates were not voluntarily reduced by carriers and that such rates as were reduced caused a temporary disruption of a former rate relationship is not sufficient basis for a finding that the rates complained of were unreasonable. Risser v. A., T. & S. F. Ry. Co., 96 I. C. C. 513, 515.

§16½. Low prior rate.

See Supra §16.

(a) The reduction to meet the lower rate of other lines does not warrant a finding that the prior rate was unreasonable. Smythe Company v. Chesapeake Steamship Co., 92 I. C. C. 95, 96.

§17. Manufactured product.

See Evidence §31.

(a) Rule that manufactured articles ought generally to pay a higher transportation charge than the raw material is by no means inflexible, as facts and circumstances surrounding movement of the raw materials may be such as to warrant a higher rate. East St. Louis Cotton Oil Co., 20 I. C. C. 37, 40. Mississippi R. R. Commission v. A. & V. Ry. Co., 89 I. C. C. 47, 67.

(b) Ordinarily, manufactured products take a higher rate than raw material from which made. Young v. C., I. & L. Ry. Co., 89 I. C. C. 428, 436.

(c) The spread in rates between manufactured products and the raw materials from which made is not governed by the percentage of waste between the raw material and the finished product, but by comparative transportation characteristics of the two articles, such as average loading, value, liability to loss and damage in transit, terminal expenses, etc. Young v. C. I. & L. Ry. Co. 89 I. C. C. 428, 436.

(d) Upon complaint alleging that rate on Reilly carbon coke in unreasonable to extent it exceeds rate on coal-tar pitch, defendant asserts that there is no similarity between them, and refers to fact that bituminous coal takes lower rate than coke produced from it and that rates on flour, lime, pig iron, and glass are generally higher than materials from which they are produced. HELD: Commodities named are principal product of manufacturing processes, while Reilly coke is only a residuum or refuse left after more valuable products are drawn off. Acheson Graphite Co. v. Director General, 92 I. C. C. 215, 219.

(e) Reasonable rates on crude oil should be relatively lower than on refined oil. Barnett Oil & Gas Co. v. Director General, 93 I. C. C. 85, 87.

(f) Although commission has condemned rates on raw materials higher than on products manufactured therefrom, that fact, in and of itself, does not demonstrate that higher rates on raw materials are unreasonable. Crown Willamette Paper Co., 78 I. C. C. 273. Minnesota & Ontario Paper Co. v. Director General, 93 I. C. C. 105, 108.

(g) The fact that the rates on the products of livestock are higher, even materially higher, than the rates on livestock does not warrant a finding that the rates on the products are unreasonable. Ogden Packing & Provision Co. v. D. & R. G., 101 I. C. C. 258, 269.

ALL OTHER CITATIONS

Diamond Match Co. v. Director General, as Agent, 88 I. C. C. 435.

§23. Ownership or Use of Commodity.

See Classification §10; Discrimination §6; Evidence §41½.

(a) Various lines serving same points of origin and destination maintained different rates on coal. Complainant attempted to prove unreasonableness by showing that class rates of all lines on miscellaneous commodities from and to these points are identical. HELD: Competitive and transportation elements are vastly different as between coal and commodities moving on class rates, the former being made without regard to class-rate structure. Chapel v. P. R. R., 92 I. C. C. 662, 664.

§24. Paper Rate.

(a) While fact that shipment was isolated is to be considered, it is not controlling in determining the reasonableness of a rate; such issue must be decided upon it merits. Armacost & Co., 88 I. C. C. 187; Meigs Pulpwood Co., 78 I. C. C. 473. Chattanooga Bottle & Glass Mfg. Co v. S. Ry., 93 I. C. C. 71, 72.

ALL OTHER CITATIONS

Armacost & Co. v. M. & M. T. Co., 88 I. C. C. 185.

§25. Past Rates.

See Supra §16; Evidence §29, §43, §66; Passenger Fares and Facilities §7.

(a) The contention that a rate found reasonable as of June 25, 1918, must be considered reasonable prior thereto is without merit. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 551, 554.

ALL OTHER CITATIONS

Cleveland Provisions Co. v. A. G. S. R. R. Co., 88 I. C. C. 161.

§26½. Prior adjudication.

See Classification §17; Evidence §43½, V; Previous Decision of Commission; Reparation §8½.

(a) Complainant attacked commodity rate charged on sand, carloads from Guion, Ark., to Sapulpa, Okla., as unreasonable. Guion is on the M. P., 177 miles west of Aurora, Mo. Shipments moved via M. P., Aurora and Frisco, distance 344 miles, charged 15c prior to July 1, 1922 and 13.5c thereafter. The commodity is glass or silica sand and is considerably more valuable than common river sand. The rate attacked, subject to the horizontal increases and reductions since effective, was prescribed by the Commission in 60 I. C. C. 736. HELD, rate attacked not unreasonable, complaint dismissed. Liberty Glass Company v. M. P. R. R., 89 I. C. C. 362.

(b) Rates based upon a prior decision of the commission can not be found unreasonable in a subsequent proceeding, in absence of any showing of changed conditions or of facts not previously considered, unless it be clearly shown that the commission erred in its decision. Lake Dock Coal Cases, 89 I. C. C. 170, 178.

(c) Upon further consideration of the original report, 87 I. C. C. 740, adjustment of rates on naval stores from points in the Southeast and Mississippi Valley to various destination territories, modified to permit application of rates to Milwaukee, Wis., which do not exceed rates found reasonable to Chicago, Ill., by more than 2 cents on rosin from both New Orleans and Jacksonville groups and 4 cents on turpentine from New Orleans group and 3 cents from the Jacksonville group. Naval Stores from Southern Points, 89 I. C. C. 634.

(d) Rates on grain from Humboldt to St. Louis, Mo., found not unreasonable or unduly prejudicial as compared with rates from Salem and Verdon, Nebr., from which points defendant maintains lower rates in order to compete with Missouri Pacific. Rates assailed are considerably less than that prescribed by commission in South Dakota R. R. Comrs., 73 I. C. C. 347, from points in South Dakota to points in Iowa, and in Oklahoma Corporation Commission, 80 I. C. C. 607, between points in Oklahoma and points in Arkansas, for single-line hauls for the distance involved in this case. Cooper Co. v. C., B. & Q. R. R. Co., 91 I. C. C. 50.

(e) Rates on rosin from southeastern points to Kalamazoo and Grand Rapids, Michigan found not unreasonable or unjustly discriminatory as compared with rates from same points to Chicago, Ill., Milwaukee, Wis., and Detroit, Mich. At time this case was submitted defendants had in course of preparation a general readjustment of rates and in Naval Stores from Southern Points, 87 I. C. C. 740, commission fixed reasonable rates for future. New adjustment will result generally in removal of existing fourth-section departures and of any undue prejudice to complainants. Western Paper Makers Asso. v. Director General, 91 I. C. C. 223.

(f) Rates on slack barrels from St.

Joseph, to points in Oklahoma found not unreasonable, unduly prejudicial, or otherwise unlawful as compared with rates from Dallas and Fort Worth, Tex., which latter points take rates based on distance scale prescribed in Shreveport case, 48 I. C. C. 312. Complainant's position is that alleged discrimination should be ordered removed by reductions from St. Joseph rather than by increases from alleged preferred points, but there are no facts of record which would justify extension of so low a scale as Shreveport scale from St. Joseph and other points to Oklahoma. Hollingshead Co. v. M., K. & T. Ry. Co., 91 I. C. C. 654.

(g) Rate on hollow building tile from Kankakee, Ill., to Chicago, Ill., during Federal control found not unreasonable. Rate assailed compares favorably with rates prescribed by commission in National Paving Brick Mfrs. Asso., 68 I. C. C. 213, for interstate short hauls on articles in uniform brick list, including hollow building tile, for application within c. f. a. territory, including all points in Illinois. Illinois Fire-Proof Construction Co. v. Director General, 91 I. C. C. 753.

(h) Rate on roofing paper from Madison, Ill., to Oklahoma City, Okla., found unreasonable to extent it exceeded rate prescribed by commission in Minnesota & Ontario Paper Co., 66 I. C. C. 571, and related cases cited therein, which rate became effective subsequent to movement of shipments here involved. Reparation awarded. Turner Sheet Metal Co. v. C. R. I. & P. Ry. Co., 91 I. C. C. 763.

(i) Rates as increased to basis higher than that authorized in the Fifteen Per Cent case, 45 I. C. C. 303, and subsequent general advances, and subsequently reduced to basis reflecting proper authorized advances, found not unreasonable. Complainant offered no evidence to indicate that earnings under rates attacked were excessive, but merely urges that rate was unreasonable per se. Moreover, the subsequent reduction of a rate is insufficient to establish unreasonableness. General Chemical Co. v. Director General, 93 I. C. C. 193.

(j) Following Hale-Halsell Co. 83 I. C. C. 313, fifth-class rate charged on toilet paper from Green Bay, Wis., to Muskogee, Okla., found unreasonable to extent it exceeded lower rate subsequently established pursuant to Minnesota & Ontario Paper Co., 66 I. C. C. 571. Reparation awarded. Hale-Halsell Co. v. K., O. & G., 93 I. C. C. 205.

(k) Rates on newsprint paper, wrapping paper and paper napkins, from Little Falls, Minn., and Port Edwards, Nekoosa, Rhinelander, and Green Bay, Wis., to San Antonio, found unreasonable to extent they exceeded rates found reasonable in Minnesota & Ontario Paper Co., 66 I. C. C. 571. Reparation awarded. San Antonio Paper Co. v. S. A. & P. Ry., 93 I. C. C. 352.

(l) Fact that a rate somewhat lower than rate charged was prescribed by the commission for the future does not necessarily show that the former rate was unreasonable. Especially is this so where the new rate is a part of an extensive readjustment. News Corp. v. M. P. 93 I. C. C. 381, 383.

(m) Rates prescribed in the Mississippi Valley case, 64 I C. C. 306, were not prescribed as standards of reasonable maximum rates, but primarily to bring about an adjustment in harmony with requirements of section 4 of the act and at the same time conserve revenues of carriers. Nor may such rates be used as a measure of the rates between points in the Southeast. Paper Boxes between Southeastern Points, 93 I. C. C. 559, 563.

(n) Rates on cement from Cape Girardeau (Gulf Junction), Mo., to points in Illinois found unreasonable and unduly prejudicial as compared with rates from competing Illinois mills to same destinations and to extent they exceed those which would result under the distance scale of rate prescribed in Atlas Portland Cement Co., 81 I. C. C. 1. Reasonable and nonprejudicial rates prescribed for the future. Cape Girardeau Portland Cement Co. v. B. & O., 95 I. C. C. 632.

(o) Following Lakewood Engineering Co., 88 I. C. C. 588 commodity rate on portable railway track from Tullytown, a transcontinental Group A point, to Pheonix, found not unreasonable as compared with rates on rail and crosstie fastenings, and on various iron and steel articles. In the cited case the commission found not unreasonable the commodity rate applying from transcontinental Group B points to Pheonix and Pacific coast points and record herein fails to show that level of the Group A rate is im-

proper as compared with that from Group B. State of Arizona v. A. E. R. R., 95 I. C. C. 658.

(p) Rates on paper bags and wrapping paper from Marinette, Wis., to Fort Worth, Dallas, and San Antonio, Tex., found unreasonable to extent they exceed rate prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571. Reparation awarded. Victory Bag & Paper Co. v. A., T. & S. F., 95 I. C. C. 677.

(q) Rates on wrapping paper from Port Edwards and Nekoosa, Wis., and Otsego, Mich., on paper bags from Decatur, Ill., and on printing paper from Neenah, Wis., to Pueblo, Colo., found unreasonable to extent they exceeded rates prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571, from Wisconsin and related points to Colorado common points. Reparation awarded. Colorado Paper Co., v. A., T. & S. F., 96 I. C. C. 73.

(r) Rates on lumber, box shooks, and articles taking lumber rates from Williams, Flagstaff, and Holbrook, Ariz., to Naco, Ariz., destined to Cananea, Mexico, found unreasonable to extent they exceed or may exceed rates prescribed in 80 I. C. C. 487, on same commodities from same points of origin, via Nogales, when destined to Cananea. Arizona Lumber & Timber Co. v. A. E., 96 I. C. C. 203.

(s) Upon further hearing, modification of original order entered in this proceeding, 60 I. C. C. 337, as to rates on coal from points in Indiana to Crawfordsville, Sheridan, Logansport, Monticello, Anderson, and Fort Wayne, Ind., denied. The rates established were not relatively excessive, and it is apparent, because of competitive conditions, that the relation between the intrastate rates and the interstate rates between the same points and from Illinois and other States to these destinations was so close that the failure to increase the intrastate rates pursuant to Increased Rates, 1920, 58 I. C. C. 220, would have had a direct effect upon interstate rates and traffic. Indiana Rates, Fares, and Charges, 96 I. C. C. 644.

(t) Rates on clean rice and rice flour from points in Arkansas, interior Louisiana, and Texas to Salina, Kas., found unreasonable and unduly prejudicial, following 93 I. C. C. 517 and other cases cited. Reasonable and non-prejudicial rates prescribed for future and reparation awarded. Salina Chamber of Commerce v. A. & W. Ry. Co., 98 I. C. C. 290.

(u) Rates on certain iron and steel articles from various points in Ohio, Kentucky, Indiana, Alabama, Illinois, Pennsylvania, New York, and Missouri, to Dallas, Fort Worth, and Harrys, Tex., found unreasonable to extent that the factors from St. Louis, Mo., and points taking the same rates exceeded, prior to the effective date of the general reductions in rates, a certain amount, and from and including that date to extent they exceeded rates for similar distances as prescribed in Memphis-Southwestern Investigation, 77 I. C. C. 473. The rates from the other points of origin were and are unreasonable to extent they exceeded or may exceed the rates herein prescribed from St. Louis plus the established differentials. Bases for award of reparation and reasonable rates for the future prescribed. Atlas Metal Works v. A., C. & Y. Ry. Co., 100 I. C. C. 173.

(v) Rates on cottonseed from points in Oklahoma to Dallas and Fort Worth Tex,, found unreasonable to extent indicated in 80 I. C. C. 18, involving same territory; after effective date of order therein, to extent they exceed or may exceed distance rates prescribed in 98 I. C. C. 183, and applied in manner indicated therein. Reparation awarded. International Vegetable Oil Co. v. A. T. & S. F., 100 I. C. C. 240.

(w) Upon further hearing original report, 80 I. C. C. 335, reversed, and rates on rig irons from Iola, Kans., to Tulsa, Okla., found not unreasonable. The present record does not substantiate the original finding that "there is a regular and substantial movement." In Parkersburg Rig and Reel Co., 95 I. C. C. 181, the commission found that rates on this commodity were unreasonable to extent they exceeded 85 per cent of the rates contemporaneously in effect on oil-well outfits, thus fixing the relationship between oil-well supplies and rig irons provided that the rate applicable on oil-well supplies is a reasonable maximum rate; while the present rate on oil-well supplies is 92 per cent of the Class A rate prescribed in Memphis-Southwestern Investigation, 55 I. C. C. 515, it has not been proven a reasonable maximum rate. Bradford Rig & Reel Co. v. Director General, 100 I. C. C. 261.

(x) Claim of carriers that the use of a rule such as that in Western Cement Rate case, 52 I. C. C. 225, with respect to determination of mileages where a distance scale of rates, as herein prescribed, has been employed, is contrary to law, upon the ground that it is, in effect, an infringement of the provision which protects them against being short-hauled, not sustained. Southern Class Rate Investigation, 100 I. C. C. 513, 656.

(y) Upon further consideration, original report, 96 I. C. C. 195, wherein relationship between rates on wheat and flour from certain points in Oklahoma to Galveston, New Orleans, and other Gulf ports, for export, was found not unduly prejudicial or discriminatory as compared with relationship of rates on same commodities for export from other points in Oklahoma and other States, affirmed and complaint dismissed. No reason is seen why relationship between rates on wheat and flour for export should be different from that prescribed in respect of domestic traffic, and if carriers should fail to so realign their export rates on these commodities from affected territory complainant may bring that situation to commission's attention. Oklahoma Millers' Asso. v. A. & V., 102 I. C. C. 1.

(z) Proposed readjustment of rates on grain and grain products and seed and seed products from points in Colorado, Kansas, Nebraska, Missouri, and Oklahoma to the lower Mississippi River crossings, and to points in Mississippi Valley, resulting in both decreases and increases, the latter predominating, found not justified. Present rates compare more favorably than those proposed with rates on like traffic prescribed between points in Oklahoma and Arkansas in 80 I. C. C. 607, and between points in Oklahoma and Texas prescribed in 101 I. C. C. 116. Kansas City Board of Trade v. A. & W. Ry., 102 I. C. C. 285, 304.

(aa) Rate on liquefied petroleum gas from Burkburnett, Tex., to West Tulsa, Okla., found unreasonable to extent it exceeded lower rate found reasonable in Western Petroleum case, 66 I. C. C. 426, for application on refined oil from the Burkburnett group to points in Oklahoma Group 3, which includes West Tulsa. Reparation awarded. Tidal-Western Oil Corp. v. M., K. & T., 102 I. C. C. 322.

(bb) Rates on iron and steel pipe from points in Texas to points in Oklahoma, and from points in Oklahoma to points in Texas found unreasonable to extent they exceeded rates for like distances computed under the scale prescribed on iron and steel pipe in the Memphis Southwestern Investigation, 77 I. C. C. 473. Reparation awarded. Texas-Pacific Coal & Oil Co. v. C., R., I. & P., 102 I. C. C. 369.

(cc) Combination rates on furniture from certain points in Indiana, Michigan, New York, and West Virginia to Little Rock, Pine Bluff, and Fort Smith, Ark., found not unreasonable as compared with rates subsequently established pursuant to Memphis-Southwestern Investigation, 77 I. C. C. 473, and which resulted in removal of fourth-section departures protected by appropriate applications and in a reduction in general level of rates on this traffic. Combination basis was maintained on furniture and numerous other commodities from origins in question to all points in Arkansas, except to those located in the Arkansas-Louisiana group. Moreover, earnings under rate found justified in 25 I. C. C. 299 compare favorably with those here assailed. Eads Bros. Furniture Co. v. B. & O., 102 I. C. C. 381.

(dd) Rates on vegetable oils from points in Oklahoma to Houston found unreasonable to extent they exceed rates for like distances under the scale for like traffic prescribed in Oklahoma Corp. Comm., 98 I. C. C. 183. Reasonable rates prescribed for future and reparation awarded. Houston Packing Co. v. A. T. & S. F., 102 I. C. C. 385.

(ee) Following 87 I. C. C. 310, rates on corn and oats from points in Iowa and Nebraska to Ogden and other Utah points found unreasonable to extent they exceeded lower contemporaneous rate to farther distant points, which lower rate was subsequently established to Ogden and other intermediate points. Reparation awarded. Farrell v. C., M. & St. P., 102 I. C. C. 455.

(ff) Combinations of proportional rates basing on East St. Louis or Kankakee, Ill., on petroleum and products moving from Coffeyville, Kans., and Tulsa and Boynton, Okla., to destinations in Indiana, Ohio, Michigan, and Pennsylvania, found unreasonable to extent that components from basing points exceeded lower proportionals subsequently established. In complying with commission's

decision in Reduced Rates, 1922, 58 I. C. C. 676, 720, carriers reduced proportionals from points in mid-continent fields to basing points, but similar reductions beyond were not effected until subsequent to shipments. Reparation awarded. Nat'l. Petroleum Asso. v. C. & A. R. R., 102 I. C. C. 459.

(gg) Rates on rice from certain points in Louisiana to Baton Rouge, destined to interstate and foreign points after cleaning in transit, found unreasonable and unduly prejudicial to extent they exceeded, in addition to transit charge, rates under a distance scale prescribed in 69 I. C. C. 508. The claims are identical in character and principle with those on which reparation was awarded in cited case and transportation conditions over route of movement are practically same as those from and to points between which prescribed scale applies. Reasonable rates prescribed and reparation awarded. Baton Rouge Rice Mill v. N. O., T. & M., 102 I. C. C. 507.

(hh) Rates on salt from Anse La Butte, Avery, Salt Mine, Weeks Island, and Jefferson Island, La., to points in Mississippi and from Baldwin, La., to Jackson, Miss., found unreasonable and unduly prejudicial as compared with rates from Memphis and New Orleans, competing points. Distance scales were prescribed in 77 I. C. C. 473 and other cases where rates between points in southern territory were considered and a similar basis is appropriate here since it would be less likely to create difficulties in subsequent readjustments. Distance rates with a 45,000-pound minimum prescribed for future and reparation awarded. Miss. R. R. Comm. v. A. & V., 102 I. C. C. 540.

(ii) Upon contention that the rate relationship prescribed in the Paper case, 66 I. C. C. 571, between various origin groups and points in Fox River and related groups is improper, particularly on long-haul traffic to Texas, and that the 5-cent differential prescribed from International Falls and other points over Fox River group rate is excessive and should be reduced, FOUND: Relationships were established after careful consideration on a comprehensive record, and should not be changed. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 743.

(jj) Carload minima on lumber and rules in connection therewith from points in Oregon, Washington, Idaho, and Montana to transcontinental territory, prior to reductions ordered in Lumber Carload Minima, 56 I. C. C. 318, 68 I. C. C. 98, found not unreasonable or otherwise unlawful. Evidence offered by complainant found too meager to justify application of minima and rules prescribed, and proof of payment and bearing of charges found insufficient to support an award of reparation. Furthermore, cited cases embraced a widespread readjustment of rates under which no reparation is ordinarily awarded on shipments moving prior thereto. Western Pine Mfrs. Asso. v. Director General, 102 I. C. C. 753.

(kk) Rates on wrought-iron and steel pipe and fittings and on oil-well supplies from certain points in Texas to Haynesville, La., found unreasonable to the extent they exceeded specific commodity rates fixed on basis of distance scale prescribed in Memphis-Southwestern Investigation, 77 I. C. C. 473, with addition of a differential to compensate for an extra line haul. Reasonable rates prescribed and reparation awarded. Humble Oil & Refining Co. v. L. & N. W. R. R., 102 I. C. C. 761.

Interstate Rice Milling Co. v. L. W. Ry. Co., 85 I. C. C. 606; Wadhams Oil Co. v. C. & N. W. Ry. Co., 85 I. C. C. 705; Prairie Pipe Line Co. v. Director General, as Agent, 88 I. C. C. 167; Boher & Hosfeld v. B. & M. R. R., 88 I. C. C. 449; Barker Produce Co. v. S. P. Co., 88 I. C. C. 385; Great Western Paper Co. v. M. St. P. & S. S. M. Ry. Co., 88 I. C. C. 582.

§27½. Rate via competing line.

See Evidence §30, §47; Routing and Misrouting §5; Through Routes and Joint Rates §15½.

(a) Existence of lower rates over routes other than a particular route of movement and subsequent reduction of the rate over the particular route are not sufficient to establish that the previous rate was unreasonable. American Stores Co. v. P. R. R. Co., 89 I. C. C. 41, 43.

(b) The existence of a lower rate over other routes does not of itself warrant a condemnation of the rate charged. Goodrich Bros. Hay & Grain Co. v. C. C. C. & St. L. Ry., 95 I. C. C. 5, 6.

(ba) No evidence bearing upon unreasonableness of rate assailed was offered by complainant other than that lower combination applied over another route. HELD: Maintenance of a lower rate by

a route other than route of movement does not, in and of itself, warrant a finding of unreasonableness. Midland Coal Co. v. St. L. S. F. 92 I. C. C. 283, 284.

(c) Rates on anthracite coal from Shamokin district, Pa., to Elmira, N. Y., via the Pennsylvania direct, found not unreasonable as compared with lower single-line haul rates maintained by other carriers from and to same points. Such rates compare favorably with those approved in Anthracite case, 35 I. C. C. 220, from anthracite field to various New York destinations for comparable distances. Chapel v. P. R. R., 92 I. C. C. 662.

(d) Fifth-class rate on return movement of copper bars, rejected by vendee, from Rome, N. Y., to Perth Amboy, N. J., found not unreasonable as compared with lower commodity rate from Perth Amboy to Rome, which lower rate was made applicable in both directions subsequent to movement. Those here involved were only shipments ever made from Rome to Perth Amboy, the heavy movement being in opposite direction, and it was not shown that the higher rate was intrinsically unreasonable. Moreover, rates assessed are not out of line with copper-bar rates in general from New York Harbor points. Former report, 64 I. C. C. 691, affirmed. Raritan Copper Works v. Director General, 92 I. C. C. 671.

(e) Fifth-class rate on structural steel from Carnegie, Pa., to Richmond, Va., found unreasonable to extent it exceeded lower joint commodity rate contemporaneously in effect from Pittsburg proper and other competing points in same rate group to same destination, which lower rate carriers subsequently established from Carnegie. Reparation awarded. McClintic Marshall Steel Supply Co. v. P., C. & Y., 95 I. C. C. 459.

(f) Existence of lower rate over other routes and the subsequent reduction to that basis of the rate over a particular route of movement are not sufficient to establish unreasonableness of the previous rate. National Supply Co. v. N. Y. C., 95 I. C. C. 461.

(g) Rates from New Albany to other points in Indiana on bituminous coal originating in Kentucky and West Virginia and barged to New Albany down the Ohio River found unreasonable as compared with rates from Cincinnati, a competing point shipping to the same destination and to which moves under similar transportation conditions. Moreover, rates for the short intrastate movement are too high a level as compared with intrastate rates on bituminous coal prescribed by the commission in 66 I. C. C. 338 and numerous other cases. Reasonable distance scale of rates prescribed for the future. Slider v. B. & O., 96 I. C. C. 65.

(h) Rate on shipments of sisal from Indianapolis, Ind., to North Kansas City, Mo., during Federal control, found unreasonable as compared with rate contemporaneously in effect from Indianapolis to St. Paul, Minn., and with import commodity rate in effect from New Orleans, La., to both St. Paul and North Kansas City. Reparation awarded and reasonable rates prescribed for the future. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 301.

(i) Commission has uniformly found that the existence of a lower rate over a competing route does not of itself establish the unreasonableness of the rate actually charged. Rudolph & Co. v. P. R. R., 101 I. C. C. 111, 112.

ALL OTHER CITATIONS

Focke v. G. H. & S. A. Ry. Co., 85 I. C. C. 137; Midland Coal Co. v. F. S. & W. R. R. Co., 85 I. C. C. 146; Staley Mfg. Co. v. Director General, as Agent, 85 I. C. C. 418; Portland Flouring Mills Co. v. G. N. Ry. Co., 88 I. C. C. 94; Shafer Lumber Co. v. Director General, as Agent, 88 I. C. C. 472; Consolidated Coal Co. v. M. P. R. R. Co., 88 I. C. C. 523.

§27¾. Rate in Opposite Direction.

See Classification §17; Differentials; Evidence §30, §56, §66; Relative Rates; Through Routes and Joint Rates §8.

(a) Complainant attacked class rates charged on seed envelopes less carloads from San Francisco, Calif., to Sabetha, Kas., between Sept., 1921 and Nov. 1922 as unreasonable. Distance 1,589 miles, charged first class $4.665 prior to July 1, 1922 and $4.20 thereafter. Reparation is sought to basis of $3.335 on shipments prior to July 1, 1922 and to $3 thereafter, these rates being applicable in the opposite direction. On July 10, 1923 the latter rate was established from San Francisco to Sabetha. Present rate is $2.41 established after defendants attention was called to the fact that seed envelopes in less carloads were

shipped from Rochester, N. Y., to points as far west as Denver, Colo., 1,621 miles, at rate of $2.81. HELD, rate attacked unreasonable to extent it exceeded rate in opposite direction, reparation awarded. Galloway Lithographing Co. v. S. P. Co., 95 I. C. C. 11.

(b) Complainant attacked commodity rates charged on scrap brass and brass ingots or pigs, carloads, between New York, Pittsburgh and Meadville, Pa., and between New York, Philadelphia and Baltimore as unjust and unreasonable. Rates from New York to Pittsburgh exceeded those in the opposite direction. Meadville is intermediate to East Liberty on the route to New York over the Erie and application of fifth class was in violation of the fourth section. HELD, rates attacked from New York to Pittsburgh, East Liberty and Meadville, Pa., unreasonable to extent they exceeded rates in the opposite direction, reparation awarded. Union Smelting & Refining Co. v. C. R. R. of N. J., 95 I. C. C. 104.

(c) Complainant attacked commodity rates on fresh meats and packing house products, carloads, from Duluth to St. Paul, Minn., as unreasonable, unjustly discriminatory and unduly prejudicial in comparison with rates on the same commodities over the same routes in the reverse direction. Present rates are Duluth to St. Paul 42c on fresh meats, 25.5c on packing house products; St. Paul to Duluth 23c on fresh meats and 15.5c on packing house products. The treatment accorded Duluth on traffic to St. Paul is conspicuously out of harmony with the general adjustment in this territory. HELD, rates attacked from Duluth to St. Paul unreasonable to extent they exceed 28c on fresh meats and 23c on packing house products and unduly prejudicial to extent they exceed rates on like traffic from St. Paul to Duluth. Duluth Chamber of Commerce v. C. St. P. M. & O. Ry., 98 I. C. C. 352.

(d) Sixth-class rate on imported flaxseed from New York Harbor points to Buffalo found unreasonable as compared with rate on flaxseed between same points in opposite direction, and to extent it exceeded 60 per cent of New York-Chicago rate less 2 cents. Reasonable rate prescribed and reparation awarded. American Linseed Co. v. E. R. R. Co., 91 I. C. C. 663.

(e) Difference in transportation conditions in opposite directions may justify a difference in rates, provided the higher rate is not intrinsically unreasonable. Raritan Copper Works v. Director General, 92 I. C. C. 671, 672.

(f) Rates assessed on seed envelopes from San Francisco to Sabetha, Kans., found unreasonable to extent they exceeded lower rates contemporaneously applicable in the reverse direction. Class as well as commodity rates on various other articles are the same in both directions and eastbound rates here in issue should have been no higher than those westbound. Reparation awarded. Galloway Lithographing Co. v. S. P., 95 I. C. C. 11.

(g) Rates on scrap brass and brass ingots or pigs from New York rate points, including Bush Docks, Brooklyn and Newark to Pittsburg, East Liberty, and Meadville, Pa., found unreasonable to extent they exceeded lower rates contemporaneously applicable in opposite direction. Reasonable rates for future prescribed and reparation awarded. Union Smelting & Rfg. Co. v. C. R. R. Co. of N. J., 95 I. C. C. 104.

(h) Rate on wet brewers' grain from Philadelphia to Newark found unreasonable to extent it exceeded lower rate subsequently established, which lower rate was contemporaneously in effect over another route and in the reverse direction over defendants' own route. Reparation awarded. Penn Grains & Feed Co. v. R. Co., 102 I. C. C. 100.

ALL OTHER CITATIONS

International Paper Co. v. Director General, as Agent, 88 I. C. C. 211.

§28. Relativity of the rate.

See Advanced Rates §3 (r), §17 (y); Blanket Rates §10½ (t); Class Rates §2; Classification §17; Commodity Rates §5 (7d); Differentials; Discrimination; Evidence; Export Rates and Facilities §6 (bba) (cca); Relative Rates; Through Routes and Joint Rates §8.

(a) Where it is proposed radically to change within a limited area the system of rates which has been long in effect and generally recognized as essential, the evidence should be convincing of the justification for such a change. It is the commission's duty to consider, among

other things, not only such benefits as might be realized by those who urgently request the change, but also what the probable effect would be upon a large body of producers who would not be in a position to avail themselves of benefits of the change requested. Mississippi Railroad Commission v. A. & V. Ry. Co., 89 I. C. C. 47, 59.

(b) Rates on bituminous lump and slack coal from the Rich Hill and Appleton, Mo., Pittsburg, Kans., Arkansas-Oklahoma, and Spadra, Ark., groups to Atchison, Kans., found unreasonable for future to extent they exceed the contemporaneous rates to St. Joseph, Mo. Southwestern Interstate Coal Operators' Asso. v. A. W. Ry. Co., 89 I. C. C. 73.

(c) Rate on copper bullion from Clarkdale, Ariz. to San Pedro and East San Pedro, Calif., found unreasonable as compared with rates from Montana, Nevada, and Utah copper-producing points to Pacific coast ports and with rates prescribed in Phelps Dodge Corp., 57 I. C. C. 714, from Douglas, Globe, and Clarkdale, Ariz., to Galveston, Tex. Reasonable rate for future prescribed. United Verde Extension Mining Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 95.

(d) Rates assessed on green coffee from New Orleans, La., to Wichita, Kans., found not unreasonable or discriminatory as compared with lower rate contemporaneously in effect to Kansas City, Mo., or with lower rate subsequently established following the general readjustment of coffee rates in 58 I. C. C. 716 and 64 I. C. C. 26, when Wichita and Kansas City were placed upon a rate parity. Continental Coffee Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 159.

(e) Rate on dressed poultry from Springfield, Mo., to Key West, Fla., for export to Cuba, found unreasonable to extent it exceeded the rate on like traffic from Kansas City, Mo. Ordinarily traffic from Kansas City would move through Springfield, and class and commodity rates, generally, from Springfield to the Southeast are not higher than from Kansas City. Reparation awarded. Armour & Co. v. A. C. L. R. R. Co., 89 I. C. C. 162.

(f) Rates on apples from Chelan, Wash. to San Francisco, Calif., found unreasonable as compared with lower rates from many important apple-shipping points in same general territory to same destination. Reparation awarded. Jacobs, Malcom & Burtt v. G. N. Ry. Co., 89 I. C. C. 173.

(g) Rate on green-salted hides from Milwaukee, Wis., to Whitehall, Mich., found unreasonable to extent it exceeded lower rate contemporaneously applicable on like traffic to Grand Haven, Grand Rapids, Muskegon and Mill Creek, Mich., points in the general vicinity of Whitehall, and made applicable to Whitehall subsequent to movement. Reparation awarded. Eagle-Ottawa Leather Co. v. Director General, as Agent, 89 I. C. C. 233.

(h) Rates on cotton seed from Broseley, Mo. to Cairo, Ill., found unreasonable as compared with lower rates to Cairo from other Missouri and Arkansas points for greater distances and to extent it exceeded rates found reasonable from Broseley to Cairo in Memphis Southwestern Investigation, 77 I. C. C. 473. Reparation awarded. Roberts Cotton Oil Co. v. B. C. R. R. Co., 89 I. C. C. 255.

(i) Rates on crude sulphur from Sulphur Mine, La., to Jackson, Miss. found unreasonable to extent they exceed rate to Hattiesburg, Miss. The distance to Jackson and Hattiesburg is the same, and no valid reason is shown why rate to Jackson should be higher than to Hattiesburg. Maximum reasonable rate prescribed and reparation awarded. Jackson Traffic Bureau v. B. R. R. & C. Co., 89 I. C. C. 282.

(j) Rates on secondhand steel rails and angle bars, in mixed carloads, from Sault Ste. Marie, Mich., to Duluth, Minn., found unreasonable to extent they exceeded lower rates from Sault Ste. Marie, Ont., a farther distant point, which lower rates were published in accordance with Rule 77 of Tariff Circular 18-A and were subsequently established from Sault Ste. Marie, Mich. Reparation awarded. Duluth Iron & Metal Co. v. Director General, as Agent, 89 I. C. C. 343.

(k) Rate on silica sand from Guion, Ark., to Sapulpa, Okla., found not unreasonable as compared with rates from Guion to other manufacturing points in Oklahoma for similar distances. General level of rates in the southwest is higher than in c. f. a. territory, but measured by relative ton-mile earnings, the present level of rates prescribed by commission in 33 I. C. C. 8; 57 I. C. C. 259; and 85 I. C. C. 412, between certain points in

c. f. a. territory is higher than rate from Guion to Sapulpa. Moreover, rate complained of, subject to horizontal increases and reductions since effective, was prescribed in Odell-Daly Material Co., 60 I. C. C. 737. Liberty Glass Co. v. M. P. R. R. Co., 89 I. C. C. 362.

(l) Rates on fresh fruits and vegetables from Los Angeles and San Francisco, Calif., to Douglas and Bisbee, Ariz., found unreasonable to extent they exceeded the contemporaneous class C rates, which basis was found reasonable and prescribed by commission in Murray & Layne Co., 59 I. C. C. 552, and various other cases. Rates equivalent to class C were subsequently established by carriers. Reparation awarded. Buxton-Smith Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 373.

(m) Rate on gasoline from Porters Falls, W. Va., to Philadelphia, Pa., found unreasonable to extent it exceeded lower rate contemporaneously applicable on petroleum products, including gasoline, from points in all directions around Porters Falls. Reparation awarded. Atlantic Refining Co. v. Director General, as Agent, 89 I. C. C. 391.

(n) Combination rate to and from Vicksburg, Miss., on staves and heading from Holly Ridge to Savannah and Brunswick, Ga., and Jacksonville, Fla., found not unreasonable as compared with rate from Vicksburg to same destinations. Comparisons introduced by defendants show that both factors composing rates assailed are not out of line and are comparable with rates for similar distances in same general territory. Moreover, shipments from Holly Ridge require additional service of crossing the river, by ferry at Vicksburg. Jackson Traffic Bureau v. A. & V. Ry. Co., 89 I. C. C. 399.

(o) The rates on coal from eastern Kentucky have never borne a definite relationship to those from southern Illinois, and there is general recognition that geologically, and to a considerable extent commercially, the coals from the two districts are different. Cancellation of Coal Rates to Minnesota, 89 I. C. C. 573, 586.

(p) Rates on petroleum and products from Lawrenceville, Ill., found not unreasonable as compared with lower rates to the Virginia cities. Rates to Bristol do not appear to have been unreasonable when considered either upon basis of earnings thereunder or in comparison with rates to the Virginia cities which have been recognized as being low. They also compare favorably with rates for comparable and shorter distances to other points. Indian Refining Co. v. Director General, as Agent, 89 I. C. C. 657.

(q) Rate on apples from Chelan, Wash., to San Francisco, Calif., found unreasonable as compared with lower rates from many important apple-shipping points in same general territory to same destination. Reasonable rate for future prescribed and reparation awarded. Jacobs, Malcom & Burtt v. G. N. Ry. Co., 89 I. C. C. 723.

(r) Applicable combination rate assessed on coke from Cascade, W. Va. to Monessen, Pa., found unreasonable as compared with lower rate contemporaneously in effect from points in West Virginia and Pennsylvania to other Pennsylvania destinations for substantially similar distances, and to extent it exceeded lower rate established subsequent to movement and upon short notice under authority from the commission. A general strike of coal miners made it necessary for complainant to procure coke from whatever sources available in order that its plants might be kept in operation. Reparation awarded. Pittsburgh Steel Co. v. B. & O. R. R. Co., 89 I. C. C. 749.

(s) A shipper is entitled to a reasonable rate and one of the tests of a reasonable rate is its relationship to other rates on the same or analagous commodities between points in the same general territory for similar distances. Barrett Company v. St. J. & L. C. R. R., 91 I. C. C. 9, 11.

(t) It is true that in determining the reasonableness of rates, due consideration of their relation to other rates of the various carriers serving the same or competing localities should be given. In other words, section 1 of the act contemplates that rates to be just and reasonable must be relatively fair as between localities similarly situated, as well as reasonable per se. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 547, 549.

(u) It is true that in determining the reasonableness of rates, due consideration of their relation to other rates of the various carriers serving the same or competing localities should be given. In other words, section 1 of the act con-

templates that rates to be just and reasonable must be relatively fair as between localities similarly situated, as well as reasonable per se. Wyoming Coal Co. v. V. Ry., 96 I. C. C. 359, 367.

(v) A shipper is entitled to a reasonable rate and one of the tests of a reasonable rate is its relationship to other rates on the same or analogous commodities between points in the same general territory for similar distances. Wyoming Coal Co. v. V. Ry., 96 I. C. C. 359, 367.

(w) It is true that in determining the reasonableness of rates, due consideration of their relation to other rates of the various carriers serving the same or competing localities should be given. Section 1 of the act contemplates that rates to be just and reasonable must be relatively fair as between localities similarly situated as well as reasonable per se. Wyoming Coal Co. v. Virginian Ry., 98 I. C. C. 488, 497.

(x) A shipper is entitled to a reasonable rate and one of the tests of a reasonable rate is its relationship to other rates on the same or analogous commodities between points in the same general territory for similar distances. Wyoming Coal Co. v. Virginian Ry., 98 I. C. C. 488, 497.

(y) Charges collected on shipments of tanning extract from Andrews, N. C., to Mariner's Harbor, N. Y., found unreasonable to extent they exceeded those which would have accrued at rate applicable to New York City and points in vicinity thereof. Mariner's Harbor is within free-lighterage limits of New York Harbor; for many years practice has been to accord points within such lighterage limits same rates as apply to New York City; and, at time shipments moved, specific commodity rates were in effect on tanning extract from Carolina points to many eastern consuming points, but, as there had been no prior movement to Mariner's Harbor, that point was not named among New York City rate points accorded lower rate. Reparation awarded. Haley-Hammond Co. (Inc.) v. S. Ry. Co., 91 I. C. C. 1.

(z) A shipper is entitled to a reasonable rate and one test is its relationship to other rates on same or analogous commodities between points in same general territory for similar distances. Nagase & Co., 62 I. C. C. 422, 426, Barrett Co. v. St. J. & L. C. R. R. Co., 91 I. C. C. 9, 11.

(aa) Rate on lumber and products from Oakland, Calif., to Cactus, Ariz., found unreasonable to extent it exceeded rate to Tucson, Ariz., which point is generally maintained on a parity with Phoenix and Cactus. Reparation awarded. Pacific Tank & Pipe Co. v. S. P. Co., 91 I. C. C. 24.

(bb) Rates on bedroom furniture from Nashville, Tenn., to eastern and Virginia cities found not unreasonable, but unduly prejudicial to complainants and unduly preferential of competitors at Chattanooga, Tenn., to extent that percentage relationship of rates to first-class rates from Nashville exceeds percentage relationship of contemporaneous rates to first-class rates from Chattanooga. Standard Furniture Co. v. N., C. & St. L. Ry., 91 I. C. C. 27.

(cc) Rates on phosphate rock from Mount Pleasant, Columbia, and Siglo, Tenn., to New Albany, Ind., found unreasonable and unduly prejudicial to extent they exceed rates to Evansville, Ind., and Cincinnati, Ohio, competing points. Reparation awarded. Calumet Fertilizer Co. v. L. & N. R. R. Co., 91 I. C. C. 31.

(dd) Rates on phosphate rock from Mount Pleasant, Columbia and Siglo, Tenn., to New Albany, a north-bank Ohio River point, found unreasonable and unduly prejudicial in favor of Louisville, Ky., a south-bank Ohio River point, to extent that they exceeded or exceed rates to Louisville by more than differential subsequently established, and which resulted in removal of undue prejudice herein found to exist. Reparation awarded. Calumet Fertilizer Co. v. L. & N. R. R. Co., 91 I. C. C. 31.

(ee) Sixth-class rate on coal tar, in tank-car loads from Fairmont, to Everett (East Boston), Mass., found unreasonable as compared with lower commodity rates contemporaneously in effect from Dunbar, Pa., and other points to same destination, and to extent it exceeded lower commodity rate subsequently established. Complainant made application for establishment of commodity rates more than five months prior to movement of shipments but, due to inconsistencies in commodity rates on coal tar, carriers delayed their establishment. Re-

paration awarded. Barrett Co. v. B. & O. R. R. Co., 91 I. C. C. 53.

(ff) Rate on cotton seed from Memphis, Tenn., to Altheimer, Ark., found unreasonable as compared with lower rates contemporaneously in effect between Memphis, Tenn., and Little Rock, and from points in Oklahoma and Louisiana to points in Arkansas for similar distances, and to extent it exceeded rate from Memphis to Pine Bluff, Ark., which latter rate was published in accordance with rule 77 of Tariff Circular 18-A, application for publication thereof to Altheimer not having been made prior to shipments, and was not subsequently established thereto by carriers. Reparation denied for lack of proper parties complainant. Russell-Heckle Seed Co. v. Director General, 91 I. C. C. 63.

(gg) Interstate rates on fertilizer and fertilizer materials from Wilmington, N. Car. to points in North Carolina found unreasonable and unduly prejudicial to extent they exceeded rates, distance considered, from Norfolk, Va., and Charleston, S. C., to points in North Carolina. Reasonable and nonprejudicial distance rates prescribed and reparation awarded. Goldsboro Chamber of Commerce v. A. C. L. R. R. Co., 91 I. C. C. 315.

(hh) Carload minimum weight on coiled elm hoops from Mississippi River territory to San Francisco and other California terminals found not unduly prejudicial as compared with lower c. l. minimum maintained to Seattle, Wash., and other north Pacific coast terminals. Ozark Cooperage & Lumber Co. v. A. & R. R. R. Co., 91 I. C. C. 329.

(ii) Rates on bituminous coal from Kanawha district, Group 3, W. Va., to New Boston (Yorktown) Ohio, found unreasonable as compared with rates to Ironton, Ohio, and East Ashland and Ashland, Ky., competing points. Lack of uniformity in applying certain increases in rates to these destinations resulted in widening spread formerly existing between rates to these points, to disadvantage of New Boston, and to advantage of competing points. Reparation awarded. Whitaker-Glessner Co. v. C. & O. Ry. Co., 91 I. C. C. 339.

(jj) Rates on corrugated strawboard and fiber-board boxes, knocked down flat, and fillers, in straight or mixed carloads, from Carthage, Ind., to Sand Springs, Sapulpa, and Blackwell, Okla., found unreasonable as compared with rates from Chicago Ill., Chippewa Falls, Wis., St. Louis, Mo., Keokuk, Iowa, Kansas City, Mo., Lawrence, Kans., and Chattanooga, Tenn., competing points shipping to same Oklahoma destinations. Reparation awarded and reasonable rates prescribed. American Paper Products Co. v. A., T. & S. F. Ry. Co., 91 I. C. C. 383.

(kk) Rates on lumber and forest products from points on Puget Sound & Cascade Ry. in Washington to eastern destinations, higher than coast-group basis of rates contemporaneously maintained on like traffic from competing points in Washington and Oregon situated on defendants' own branch lines, proprietary branch lines, or independent short-line connections, found not unreasonable, but unduly preferential and prejudicial. Reparation awarded for undue prejudice found to have existed prior to subsequent establishment of coast-group basis from points on Cascade Ry. Puget Sound & Cascade Ry. Co. v. Director General, 91 I. C. C. 467.

(ll) Rates on printing paper from Hamilton, in Cincinnati, Ohio, rate group, and on strawboard from Peoria, in Chicago, Ill., rate group to San Antonio, Tex., found unduly prejudicial as compared with rates from Fox River, Wis., group. Rates from these groups to Texas common points have always been based upon differentials under Fox River rate. San Antonio Paper Co. v. C. & A. R. R. Co., 91 I. C. C. 589.

(mm) Rate on bird's eye anthracite coal from Winton, to North Adams, Mass., found unreasonable as compared with rates from Wilkes Barre, Pa., to various interstate destinations, and to extent it exceeded rate from mines in Wyoming district to North Adams. Reparation awarded. Weston Dodson & Co. v. N. Y., O. & W. Ry. Co., 91 I. C. C. 659.

(nn) Rates on pig iron from South Chicago, Ill., to Acme, (Peoria), Ill., during Federal control, found unreasonable as compared with lower rate from South Chicago to Keokuk, Iowa, a farther distant point, which lower rate was subsequently established from South Chicago to Acme, thereby re-

moving any fourth-section departures that may have existed. Reparation awarded. Keystone Steel & Wire Co., v. Director General, 91 I. C. C. 741.

(oo) Rate on acid phosphate from New Orleans and Gretna, La., to Camden, Ark., found unreasonable to extent it exceeded lower rate contemporaneously applicable to Little Rock and Pine Bluff, Ark., to which Camden is intermediate. Such lower rate, which previously also applied to Camden, was canceled under assumption that it was obsolete and there was no necessity for its continuance. Carrier, however, made provision in its tariff for its restoration should any movement take place within one year from date of cancellation and shipments here involved moved within "one year." Moreover, complainant made request for its republication but carrier failed to comply with such request. Reparation awarded. Ouachita Cotton Oil Co. v. M. P. R. R. Co., 91 I. C. C. 750.

(pp) Rates on glass sand from Berkeley Springs, W. Va., to Charleroi, Pa., found unreasonable and unduly prejudicial to extent they exceeded lower rates contemporaneously maintained to Glassport, Monaca, Pittsburgh, Caraopolis, and Rochester, Pa., and to Wheeling, W. Va. and Steubenville, Ohio, competing manufacturing points. Reparation awarded. Macbeth-Evans Glass Co. v. B. & O. R. R. Co., 91 I. C. C. 758.

(qq) Rates on cotton seed from points in western Kentucky and Tennessee to Cairo, Ill., found not unreasonable or unduly prejudicial. Rates sought were compared with lower rates for like distances in Mississippi Valley and southeastern territory but such rates reflect the low levels of intrastate rates required by State authorities. Carriers instanced many higher rates under which cotton seed moves between points in the South and Southwest and also rates found unreasonable by commission in various cases which compare favorably with those assailed. Considering differences in distance and relative levels of rates, adjustment can not be said to be unduly preferential of Tiptonville and Dyersburg, Tenn. Cairo Cotton Oil Mill v. I. C. R. R. Co., 91 I. C. C. 765.

(rr) Rate on slack coal from Spadra, Ark., to Chanute, Kans., found unreasonable as compared with lower rates to various other competing points for like or greater distances, including Iola and Independence, Kas., which lower rate was subsequently established to Chanute. Reparation awarded. Ash Grove Lime & Portland Cement Co. v. M. P. R. R., 92 I. C. C. 51.

(ss) Fifth-class rate on toilet paper from Northumberland to New Hartford and South Utica, N. Y., found not unreasonable as compared with lower commodity rate from Groveton, N. H., a farther distant point to which Northumberland is intermediate. Sauquoit Paper Co. v. Director General, 92 I. C. C. 61.

(tt) Class rates on matches from Oswego, N. Y., to Philadelphia, Pa. found not unreasonable as compared with lower commodity rate to a more distant point is lower than on same commodity to an intermediate point is not proof that rate to intermediate point is unreasonable. Diamond Match Co. v. Director General, 92 I. C. C. 68, 69.

(uu) Rates on petroleum and products from El Dorado, Ark., to Vicksburg and Jackson, Miss., found unreasonable to extent they exceed rates from Shreveport, La., to same points, which basis is prescribed for future. Jackson Traffic Bureau v. A. & V., 92 I. C. C. 89.

(vv) While carriers may succeed in justifying a proposed new level of rates, a proper rate relationship as between competing points on certain commodities often is of greater importance to shipping public than measure of rates themselves. Spelter from Arkansas, 92 I. C. C. 136, 140.

(ww) Rates assessed on sporadic shipments of broken plaster molds from Chicago to Hannibal, Mo., found not unreasonable as compared with lower rate on brick, which lower rate was subsequently made applicable on broken plaster molds. While there was no rate or rating applicable on shipments here involved, earnings under rates charged compare favorably with earnings on same commodity and on brick from Chicago to other points in Michigan and Indiana. Atlas Portland Cement Co. v. Director General, 92 I. C. C. 171.

(xx) Fifth-class rates assessed on raw sugar from Brooklyn, New York, Weehawken, and Philadelphia to Marine City found not unreasonable as compared with lower commodity rates to farther distant Canadian points to which there is a substantial movement. Circumstances governing application of commodity rates to the Canadian points sub-

stantially differ from those surrounding movement of raw sugar to Marine City; the former are not acceptable as a measure of reasonableness on the latter; nor is the subsequent publication of the lower commodity rates to Marine City sufficient ground for a finding of unreasonableness in absence of other proof. Garcia Sugars Corp. v. N. Y. C., 92 I. C. C. 239.

(yy) Fifth-class rates assessed on fresh apples from Fort Sumner, N. Mex., to Omaha, Nebr., found unreasonable to extent they exceeded lower commodity rate contemporaneously in effect from the Roswell group, which lower rate was subsequently extended to Fort Sumner. Reparation awarded. Gilinsky Fruit Co. v. Director General, 92 I. C. C. 242.

(zz) Rate on bituminous coal from Wayco, Ohio to Randolph, N. Y., found unreasonable to extent it exceeded lower rate from Avella, Pa., and other grouped points, which lower basis of rates the commission approved in 62 I. C. C. 759. Reparation awarded. Randolph Furniture Works v. E. R. R., 92 I. C. C. 245.

(3a) Rate on lumber from Ranger, Tex., to Drumright, Burbank, Capon, Deer Creek, and Temple, Okla., found unreasonable to extent it exceeded lower group rate contemporaneously in effect from various points in the vicinity of Ranger to same Oklahoma destinations, which lower rate was subsequently made applicable from Ranger. Reparation awarded. Prairie Oil & Gas Co. v. A., T. & S. F., 92 I. C. C. 248.

(3b) Rate on dressed yellow-pine lumber from Mobile, Ala., to College Park, Ga., found unreasonable to extent it exceeded lower rate from Pensacola, Fla., and other points in general vicinity of Mobile to same destinations, which lower rate carriers subsequently established from Mobile. Reparation awarded. Watters-Tonge Lbr. Co. v. A. & W. P. R. R. 92 I. C. C. 251.

(3c) Rates on wrought-iron pipe from Columbia to Howard, Kans., found unreasonable to extent it exceeded lower rate contemporaneously in effect from Lake Charles and Alexandria, La., and from Houston and Temple, Tex., to destinations in Oklahoma and Missouri for similar and greater distances. Reparation awarded. Transcontinental Oil Co. v. A., T. & S. F., 92 I. C. C. 285.

(3d) Fifth-class rate on fresh tomatoes from St. Louis, Mo., to Pueblo, Colo., found unreasonable to extent they exceeded lower commodity rate contemporaneously in effect from New Orleans. Distance from St. Louis is comparatively less than from New Orleans, and a greater tonnage moves from former named point. Moreover, carriers subsequently established a commodity rate from St. Louis 1 cent lower than the New Orleans rate. Reasonable rate for future prescribed and reparation awarded. Pressey Fruit Co. v. M. P. R. R., 92 I. C. C. 287.

(3e) Rates on cotton, uncompressed and compressed in transit, from certain points in Louisiana to Galveston, Tex., found unreasonable as compared with rates from same points of origin to New Orleans; from points in Arkansas to New Orleans, from points east of Mississippi River to New Orleans; and from Arkansas points to Memphis for similar distances. Reparation awarded. Harriss, Irby & Vose v. B., S. L. & W. R. R., 92 I. C. C. 304.

(3f) Rates on paper stock (waste paper and rags) from points in the harbor of New York to points in New York, New Jersey, and New England, and to Niagara Falls, Canada, found not unreasonable or otherwise unlawful as compared with rates from New York (Manhattan Island) stations. Chase & Norton v. A. A. R. R., 92 I. C. C. 322.

(3g) Rates on crude clay from Dedrick, McIntyre and Dry Branch, Ga., to Niagara Falls, N. Y., and New Brighton, Pa., found not unreasonable as compared with lower proportional rate applying to the Ohio River which is restricted so as not to apply in constructing rates to Niagara Falls and New Brighton, or as compared with lower rate to Chicago. Niagara Wallpaper Co. v. M., D. & S. R. R., 92 I. C. C. 329.

(3h) Upon further hearing, original report, 78 I. C. C. 413, affirmed and rate on muriate of potash from Wilmington to Bay City, Mich., and Niagara Falls, N. Y., found unreasonable as compared with rates from Searles, Calif., and certain points in Utah to eastern destinations. Diamond Match Co. v. Director General, 92 I. C. C. 373.

(3i) When the commission has been called upon to adjust maximum reasonable rates on a specific commodity from different points of origin to a common destination, it has always given special consideration to comparisons of going rates on the same commodity in the same or similar territories, in relation to dis-

tances, revenue per car, per car-mile, and per ton-mile, variations in traffic density, and peculiarities in transportation which affect transportation costs in general. No practical reasons appear why these same standards should not be applied in fixing minimum reasonable rates. Salt Cases of 1923, 92 I. C. C. 388, 410, 411.

(3j) Present rates on salt from Louisiana mines to Chicago found unreasonably low. Their continuation would force reductions on lines of other carriers and would probably result in rate wars, injurious to carriers as a whole and to the public, and would thereby tend to cause increases in rates on other traffic. Reasonable minimum rates for future, which will protect the salt-rate structure, prescribed. Salt Cases of 1923, 92 I. C. C. 388, 408, 412.

(3k) Upon reconsideration, rates assessed on sporadic shipments of pipe from Gahagan, South Mansfield, and Harmon, La., and on oil-well supplies from Gahagan and Mansfield, to El Dorado, Ark., found excessive as compared with numerous rates fixed by commission on these commodities for application in the Southwest, and unreasonable to extent those on the pipe exceeded rates prescribed in 77 I. C. C. 473, and on the oil-well supplies to extent they exceeded those prescribed in 58 I. C. C. 610, for similar distances. Reparation awarded and former report, 85 I. C. C. 753, reversed. Crawford & Sebastian v. C. R. I. & P., 92 I. C. C. 453.

(3l) Rates on hogshead staves and headings from Helena to points in Kentucky found not unreasonable as compared with numerous rates applying from points in southern States to points in c. f. a. territory, for comparable distances. Forbes Mfg. Co. v. Y. & M. V. R. R., 92 I. C. C. 465.

(3m) Rates on fertilizer and fertilizer compounds, l. c. l., from Little Rock to points in Oklahoma found not unreasonable or otherwise unlawful as compared with rates on like traffic from Shreveport. Arkansas Fertilizer Co. v. A. & S. Ry., 92 I. C. C. 504.

(3n) Following Swift Lumber Co., 61 I. C. C. 485, rates on lumber, timber, and other forest products from Frost, Ala., a local point on the Garyville Northern R. R., to destinations in official and western trunk-line territories, and in Oklahoma, Texas, Kentucky, and Tennessee, found unreasonable to extent they exceeded by more than certain differentials the corresponding blanket rates contemporaneously maintained from Livingston and Garyville, La. Reparation awarded. Fleming Bros. v. G. N. R. R. Co., 92 I. C. C. 582.

(3o) Interstate rates on sulphuric, nitrating, and muriatic acid from Kansas City (Argentine), Kans. to destinations in Kansas and Texas found not unreasonable or otherwise unlawful as compared with rates from St. Louis and Chicago to same destinations. Ton-mile earnings yielded by Kansas City rates do not appear unduly high in comparison with those yielded by rates from St. Louis and Chicago, when difference in distance is considered. National Zinc Co. v. A., T. & S. F., 92 I. C. C. 587.

(3p) Rates on anthracite coal from Shamokin district, Pa., to Elmira, via the Pennsylvania direct, found not unreasonable as compared with lower single-line haul rates maintained by other carriers from and to same points. Such rates compare favorably with those approved in Anthracite case, 35 I. C. C. 220, from anthracite field to various New York destinations for comparable distances. Chapel v. P. R. R., 92 I. C. C. 662.

(3q) Fifth-class rate on return movement of copper bars, rejected by vendee, from Rome, N. Y., to Perth Amboy, found not unreasonable as compared with lower rates from Rome to other points for greater distances, or as compared with rates between various other points in c. f. a. territory. Fifth-class rates are not out of line with rates in general from New York Harbor on copper bars. Former report, 64 I. C. C. 691, affirmed. Raritan Copper Works v. Director General, 92 I. C. C. 671.

(3r) Rates on lumber from Flinn, Va., a local point on the Warm Springs Valley branch of the C. & O., to destinations in c. f. a., trunk-line, and New England territories, found not unreasonable, but unduly prejudicial to extent they exceeded or exceed contemporaneous rates from Marlinton, W. Va., and other competing points on the Greenbrier division. Reparation denied. Freehold Lumber Co. v. C. & O. Ry. Co., 92 I. C. C. 699.

(3s) Rates on coal from Leesburg, Pa., to Conneaut Harbor proper, or for reshipment by lake beyond, found unreasonable as compared with rates contemporaneously in effect from other

Pennsylvania and Ohio points to other Ohio lake ports in same general territory, and to extent they exceeded lower rates subsequently established. Reparation awarded. Pittsburgh & Conneaut Dock Co. v. P. R. R., 92 I. C. C. 719.

(3t) Rates on manure spreaders from Coldwater, Ohio, to destinations in Wisconsin intermediate to Winona, Minn., found unreasonable to extent they exceeded rates to Winona, or points in Winona group, which lower basis was subsequently established to Wisconsin points here involved. The Winona basis was in effect on commodities generally from certain other points in Ohio and c. f. a. territory to Wisconsin points here in issue, and was also applicable on all classes from these destinations in reverse direction to Coldwater. Reparation awarded. New Idea Spreader Co. v. Director General, 92 I. C. C. 742.

(3u) Rates on bituminous coal from mines in Illinois and western Kentucky to Ladysmith found not unreasonable or unduly prejudicial as compared with lower rates to the Twin Cities and Eau Claire, Wis. Rates from origin groups to Ladysmith are lower than scale rates for like distances prescribed in Holmes & Hollowell Co., 69 I. C. C. 11; moreover, in Lake Dock Coal Cases, 89 I. C. C. 170, the commission expresses its opinion that rates from southern Illinois fields to Minnesota and Wisconsin points were depressed. Great Western Paper Co. v. C. & E. I., 93 I. C. C. 95.

(3v) Rates on wet wood pulp from International Falls to certain destinations in c. f. a. territory found not unreasonable as compared with lower rates established subsequent to movement, with rates from Fox River district, Berlin, N. H., and Three Rivers, Quebec, with rates on newsprint from International Falls, or with rates found reasonable by commission in United Paperboard Co., 62 I. C. C. 59 and various other cases. Minnesota & Ontario Paper Co. v. Director General, 93 I. C. C. 105.

(3w) Rates on fuel wood from certain Idaho points to Spokane, Wash., found not unreasonable because in excess of rates found reasonable for corresponding distances in Wood Rates between North Pacific Coast Points, 61 I. C. C. 151. Neither the voluntary nor compulsory reduction of a rate by a carrier necessarily entitles shippers under the unreduced rate to reparation; moreover, the commission has long adhered to policy that in the public interest reparation should be denied when rates reduced by its orders have been in effect for long periods and when those orders require readjustments throughout an extensive territory and effect shippers at many points. See also 40 I. C. C. 517; 77 I. C. C. 683. Hawkeye Fuel Co. v. S. & E. Ry. & P. Co., 93 I. C. C. 157.

(3x) Rates on grapefruit, in straight carloads or in mixed carloads with oranges, from Jacksonville to Montana points, found not unreasonable. Complainant contended for a rate on oranges established by Director General when a group rate applicable on commodities in general from north Atlantic coast was extended to include Florida. But no special thought was given to reasonableness of the rate on oranges from Florida when that basis was established, and since no oranges move from Florida to Montana such group rate is in effect a paper rate and can not be accepted as a reasonable basis on grapefruit and oranges from Jacksonville. Devine & Asselstine v. A. C. L., 93 I. C. C. 174.

(3y) Rates on concrete sewer pipe from Knoxville, Tenn., to South Carolina points found not unreasonable as compaper rate and can not be accepted as a Chattanooga. Rates assailed compare favorably with rates from c. f. a. territory to the South generally for similar distances; earnings on sewer pipe are less than on other lower-grade commodities; and a readjustment of rates on sewer pipe is now in progress throughout southern territory. Shearman Concrete Pipe Co. v. S. Ry., 93 I. C. C. 179,

(3z) Rates on concrete sewer pipe from Knoxville, Tenn., to Oakley, S. C., found unreasonable to extent they exceeded contemporaneous rate from Chattanooga, which rate was subsequently made applicable from Knoxville. Reparation awarded. Shearman Concrete Pipe Co. v. S. Ry. 93 I. C. C. 179.

(4a) Rates on wheat from various points in Kansas and Colorado, to Leavenworth, Fort Leavenworth, and Atchison, Kans., and St. Joseph, Mo., milled in transit at Kansas City, Mo.-Kans., found unreasonable and unduly prejudicial to extent they exceeded contemporaneous through rates from and to same points on which milling in transit is allowed at points west of Kansas City. Reasonable rates prescribed and reparation awarded.

Rodney Milling Co. v. M. P., 93 I. C. C. 200.

(4b) Rate on tanbark from Ross Spur (Wild Cat Spur), Wis., to Sheboygan, Wis., during Federal control, found not unreasonable as compared with lower rates contemporaneously applicable from Star Lake group points in same general vicinity. Shipments were sporadic, request for a through rate was not made until movement had ceased, and traffic moved during period when operating conditions on the branch were rendered difficult by heavy snowfall. Moreover, rate assailed compares favorably with those found unreasonable on similar traffic in 58 I. C. C. 217 and 87 I. C. C. 322. American Hide & Leather Co. v. Director General, 93 I. C. C. 265.

(4c) Rate on lumber from Big Fork, Minn., to Horicon, Wis., found not unreasonable as compared with rates to other points in Wisconsin, Iowa, South Dakota, and Nebraska for similar distances, or as compared with lower rates subsequently established to remove fourth-section departures. Cotton v. M. & R. R. Ry. Co., 93 I. C. C. 275.

(4d) Rates on rice bran from Wheatley, Ark., to Jackson and Meridian, Miss., found unreasonable to extent they exceeded lower rates contemporaneously in effect to New Orleans and other Louisiana points. Reasonable rate for future prescribed and reparation awarded. Jackson Traffic Bureau v. A. & V., 93 I. C. C. 322.

(4e) Combination fifth-class rates based on Ohio River crossings assessed on sporadic shipments of canned meats (surplus Army Stock) moving from Atlanta to Chicago, found unreasonable as compared with lower commodity rates on other canned goods, or with rate on the complete canned goods list, including meats, vegetables, fruits, etc., southbound from Ohio River crossings to Atlanta. The probability of any traffic northbound other than sporadic shipments is remote, and a northbound commodity rate south of the Ohio on these shipments as low as that applicable in the reverse direction, under which traffic moves regularly, does not seem justified. Armour & Co. v. L. & N., 93 I. C. C. 360.

(4f) Rate on newsprint paper from Saulte Ste. Marie, Ontario, Canada, to St. Joseph, Mo., found not unreasonable as compared with lower rate subsequently established in connection with an extensive readjustment of rates prescribed in the Paper case, 66 I. C. C. 571. News Corp. v. M. P., 93 I. C. C. 381.

(4g) Fact that a rate somewhat lower than the rate charged was prescribed by commission for the future does not necessarily show that former rate was unreasonable. Especially is this so where the new rate is part of an extensive readjustment. News Corp. v. M. P., 93 I. C. C. 381, 383.

(4h) Rates on oranges from Grand Bay, Irvington, Bay Minette, Loxley, Silver Hill, and Foley, Ala., to destinations in c. f. a. and western territories, found unreasonable to extent they exceeded lower rates contemporaneously in effect from Mobile and New Orleans to same destinations and subsequently established from Alabama points subsequent to movement. Reparation awarded. Gulf Coast Citrus Exchange v. L. & N., 93 I. C. C. 432.

(4i) Rates on broken stone or chatts from Joplin, Webb City, and Oronogo, Mo., to destinations in Crawford County, Kans., over the Missouri Pacific, found unreasonable to extent they exceeded rates prescribed in Memphis-Southwestern Investigation, 77 I. C. C. 473, for similar distances, involving single-line hauls. Reasonable rates prescribed for the future. Crawford County Commrs. v. St. L. S. F., 93 I. C. C. 502.

(4j) Rates on clean rice from milling points in Arkansas to certain destinations in c. f. a., southern, and western territories, to western termini of trunk-line territory, and to points in Oklahoma, found unreasonable and unduly prejudicial in some instances as compared with corresponding rates from New Orleans, Memphis, and interior Louisiana points. Carriers in making rates have largely ignored distances in an effort to somewhat equalize conditions. Right of complainants to natural advantages of their location can not be taken away by rate adjustments and wide differences in distance between the various fields to common destinations must be recognized. Reasonable and nonprejudicial rates and bases prescribed. Stuttgart Rice Mill Co. v. A. & V., 93 I. C. C. 517.

(4k) Rate on petroleum oil, in tank cars, for Bayonne, N. J. to complainant's plant in Brooklyn, found not unreasonable or otherwise unlawful as compared with lower rate from same point of origin to New York Harbor points and to

Boston, and from Philadelphia to Brooklyn and Portland. Buber v. C. R. R. Co. of N. J., 93 I. C. C. 539.

(4l) Applicable class rates assessed on electrical heating and cooking appliances from Marion, Ind., to San Francisco, found not unreasonable, discriminatory, or unduly prejudicial as compared with lower commodity rates subsequently established at complainant's request to assist it in competing with Pacific coast manufacturers. Rutenber Electric Co. v. C., C., C. & St. L., 93 I. C. 541.

(4m) Applicable rate on petroleum coke from Casper, Wyo., to Delta, Utah, found unreasonable to extent it exceeded lower rate to numerous competitive points in Idaho and Utah for distance approximately the same as that to Delta. Transportation conditions effecting movements to Delta were not shown to be less favorable than those encountered between Casper and the competitive points, several of which are located on branch lines farther distant from Casper than Delta. Reparation awarded. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 547.

(4n) Rate on coke from Segundo, Colo., to Delta, Washington, found unreasonable to extent it exceeded lower rate to numerous competitive points in same general territory for substantially similar distances. No substantial difference was shown between transportation conditions encountered from Segundo to Delta and to the other competitive points to which the lower rates applied. Reparation awarded. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 551.

(4o) Considering rates in connection with recognized principle that ton-mile earnings decrease as distance increases, and in further connection with rates to points in southeastern territory for longer distances instanced by carrier, rate on green coffee from New Orleans to Montgomery, Ala., found not unreasonable as compared with rates from same point of origin to Nashville, Louisville, St. Louis, and other farther distant points. Fletcher-Wilson Coffee Co. v. L. & N., 93 I. C. C. 555.

(4p) Rate on bituminous coal from Harrisburg, Ill., to Lafayette, Ind., found not unreasonable as compared with rates to Chicago, Indianapolis, and other points in Illinois and Indiana, or with rates found reasonable by commission in 63 I. C. C. 215, 68 I. C. C. 479, and 64 I. C. C. 555, for similar and greater distances in same general territory. Lafayette Box Board & Paper Co. v. C., C., C. & St. L., 93 I. C. C. 579.

(4q) Rate on rough oak and gum staves and headings from Bonita, La., a local station on the Missouri Pacific, to Louisville found not unreasonable or otherwise unlawful as compared with lower group rate appplicable on lumber, staves, and heading, from various points to Louisville for comparable distances, and later established from Bonita via route of movement, or with rate contemporaneously applicable on yellow-pine and cypress lumber from Missouri Pacific junction points. Louisville Cooperage Co. v. L. & N., 93 I. C. C. 593.

(4r) Class rates assessed on mussel shells from Marked Tree, Pocahontas, and Clarendon, Ark., to Oswego, Kans., found unreasonable as compared with rates applicable to same commodity from and to numerous points of origin and destination in same general territory which had been established prior to movement of shipments here involved, and to extent they exceeded commodity rates subsequently established, request therefor having been made by complainant approximately 60 days prior to movement of first shipment. Reparation awarded. Pioneer Pearl Button Co. v. St. L. S. F., 93 I. C. C. 599.

(4s) Rates on wooden agricultural-implement, sleigh and vehicle material from Fort Smith, Ark., to points in Idaho, Oregon and Montana found unreasonable and unduly prejudicial to extent they exceeded rates from St. Louis, a competing point, to same destinations. Reparation awarded and reasonable and nonprejudicial rates prescribed. Ft. Smith Rim & Bow Co. v. K. C. S., 95 I. C. C. 1.

(4t) Class rates on automobile wheels without hubs, tires, or ball or roller bearings, from Portland to Los Angeles, San Francisco, Tacoma, and Seattle, found not unreasonable, discriminatory, or unduly prejudicial as compared with lower commodity rates contemporaneously maintained and from other points in transcontinental Group C to Pacific coast destinations which lower rate was subsequently etablished from Portland. Complainant failed to show that any point accorded the lower rate was in direct competition with Portland, or that there was any movement under lower rates

from the alleged preferred points. Bimel Spoke & Auto Wheel Co. v. L. E. & W., 95 I. C. C. 9.

(4u) Combination rates on coal from points in the Meyersdale district of Pennsylvania and Fairmont district of West Virginia to New Castle, Del., a local point on the Pennsylvania, found not unreasonable or otherwise unlawful as compared with joint rates maintained by carriers other than Pennsylvania from these districts to numerous eastern and New England destinations. Shipments moved during abnormal periods of car shortage, and the Pennsylvania defends its policy of refusing to join with other coal-originating lines in publishing joint rates to local points on its line on ground that it is unable to find consumers on its own rails for all coal which it originates, and to maintain such joint rates would cause crosshauling or substitution of two-line for one-line hauls with resulting reduction of transportation efficiency. Moreover, in 62 I. C. C. 49, the commission refused to condemn similar combinations. Chicago Heights Mfrs. Asso. v. B. & O., 95 I. C. C. 83.

(4v) Rates on scrap brass and brass ingots or pigs from East Liberty and Meadville, Pa., to Bush Docks, Brooklyn, N. Y., and Newark, N. J., found unreasonable to extent they exceeded rates contemporaneously applicable from Pittsburgh to New York. Reasonable rates prescribed and reparation awarded. Union Smelting & Rfg. Co. v. C. R. R. Co. of N. J., 95 I. C. C. 104.

(4w) Rate on sweet potatoes from Dardanelle, Ark., to Spokane, Wash., found unreasonable to extent it exceeded the contemporaneous Group E commodity rate applicable over another route, and subsequently established via route of movement. Reparation awarded. Ft. Smith Commission Co. v. Director General, 95 I. C. C. 149.

(4x) Rate on sugar from California points to Pheonix, Ariz., found not unjustly discriminatory or unduly prejudicial, but such rate found unreasonable as compared with rates from California to points in the Middle West and from Sugarland, Tex., New Orleans, La., and Colorado points to El Paso and Pheonix. Reasonable rates prescribed and reparation awarded. Pheonix Chamber of Commerce v. A., T. & S. F., 95 I. C. C. 244.

(4y) Rates on fresh meat from Sioux Falls, S. D., to Lincoln, Nebr., found unreasonable and unduly prejudicial as compared with rates from Kansas City, Minneapolis, Duluth, and Chicago, competing points. Reasonable rates prescribed and reparation awarded. Morrell & Co. v. C., B. & Q., 95 I. C C. 255.

(4z) Rates on bituminous coal from southern Illinois fields to St. Genevieve and Mosher, Mo., found not unreasonable or otherwise unlawful as compared with rates to Crystal City and Cape Girardeau, Mo., except as to certain fourth-section violations which have been corrected. Peerless White Lime Co. v. C. & E. I., 95 I. C. C. 260.

(5a) Rates on prepared roofing, asphalt shingles, building and roofing paper, roofing cement, and related articles from East St. Louis and Kansas City to Oklahoma, Texas, and Eastern New Mexico, found unreasonable as compared with rates from New Orleans, La., and Port Neches, Tex. Reasonable rates prescribed for the future. Certain-Teed Products Corp. v. A. & L. M. Ry., 95 I. C. C. 273.

(5b) Fifth-class rates on wrought-iron pipe from Goose Creek and Docbrown, Tex., to Oliver, La., and from Goose Creek to Anse La Butte, La., found unreasonable as compared with lower commodity rates contemporaneously in effect in reverse direction, with lower commodity rates which have been in effect for many years in same general territory for similar distances, and to extent they exceeded the normal rate on this traffic, based differentially under St. Louis. Reasonable distance rates based upon the scale approved in Memphis-Southwestern Investigation, 77 I. C. C. 473, prescribed and reparation awarded. Humble Oil & Rfg. Co. v. D. G. C. Ry., 95 I. C. C. 435.

(5c) Rates on coal from Marshall, Colo., to Stanhope, Iowa, and from Frederick, Colo., to Fredericksburg, Iowa, found unreasonable as compared with lower rates between various other points in same general territory for comparable distances and to extent they exceeded lower rates subsequently established. Reparation awarded. National Supply Co. v. Director General, 95 I. C. C. 445.

(5d) Rate on casing-head gasoline from Burkburnett, Texas to Hutchinson, Kans., found unreasonable to extent it exceeded rate contemporaneously

in effect to Wichita and Eldorado, Kans. These points all formerly took the same rate but carriers reduced the rate to Wichita and Eldorado but not to Hutchinson. Moreover, in 66 I. C. C. 426, the commission prescribed the same rates for application on crude petroleum from the Burkburnett group to all points in Kansas Group 2 within which Hutchinson, Wichita, and Eldorado are located. Reasonable rate prescribed and reparation awarded. Frontier Refining Co. v. A., T. & S. F., 95 I. C. C. 454.

(5e) Rate on wrapping paper from Orange, Tex., to Hutchinson, Kan., found unreasonable as compared with rate to Kansas City. Reasonable rate prescribed and reparation awarded. Hutchinson Paper Co. v. T. & N. O., 95 I. C. C. 457.

(5f) Upon a stipulation of record between the parties, rate on tobacco from Savannah, Ga., to Havana, Fla., found unreasonable to the extent it exceeded a lower rate equal to the Georgia scale for a distance similar to that here involved. Reparation awarded. American Sumatra Tobacco Co. v. A. C. L., 95 I. C. C. 463.

(5g) Rates on manure salts from Savannah, Ga., to Laurel, Miss., found not unreasonable or otherwise unlawful as compared with rates on fertilizer and fertilizer materials from Savannah to Meridian and points in other States in same general territory as Laurel. Nor do such rates appear excessive when measured by the distance scale of rates prescribed on fertilizer in Blackshear Mfg. Co., 87 I. C. C. 654. Laurel Oil & Fertilizer Co. v. Director General, 95 I. C. C. 522.

(5h) Rate on wrought-iron and steel pipe from Ranger, Tex., to Taylor, Louann, and Smackover, Ark., found unreasonable to extent it exceeded relatively lower rate on iron or steel pipe between points in the Southwest. Reasonable rate prescribed and reparation awarded. Texas-Pacific Coal & Oil Co. v. T. & P., 95 I. C. C. 627.

(5i) Fifth-class rates on gasoline, in tank cars, from Hubball and Alkol, W. Va., to Point Breeze, Philadelphia, Pa., found unreasonable as compared with rates from Leach, Ky., and other near-by points to Philadelphia, and to extent they exceeded lower commodity rates subsequently established. Request for establishment of commodity rates was made prior to movement but such rates were not made effective until subsequent thereto due to congestion in carriers' general offices. Reparation awarded. Atlantic Rfg. Co. v. C. & O., 95 I. C. C. 629.

(5j) Rates on steel wire from Monnessen to Economy, Pa, during Federal control, found not unreasonable or unduly prejudicial as compared with other short-haul rates on iron and steel articles in the Pittsburgh district. Rates attacked are lower than fifth class, the basis found reasonable by the commission in a number of cases cited for application on iron and steel articles for hauls of similar and greater distances. Pittsburgh Steel Co. v. Director General, 95 I. C. C. 637.

(5k) Rates on pig iron from Youngstown, Leetonia, and Warren, Ohio, to Huff, Pa., found unreasonable to extent they exceeded rates contemporaneously maintained from the Youngstown group to points approximately the same distance in immediate vicinity of Huff. Reparation awarded. Kelly & Jones Co. v. P. R. R., 95 I. C. C. 640.

(5l) Rates on clean rice from points in Arkansas, Louisiana, and Texas to points in Oklahoma found unreasonable. The rice adjustment presents many incongruities, rates from producing territories to Oklahoma points being higher than to more distant points in practically all directions, in violation of the fourth section. Jobbers located at points in Arkansas and Texas near the Oklahoma border are able to purchase rice in carloads and distribute in less than carloads to Oklahoma points at transportation charges substantially lower than rice can be similarly handled by Oklahoma jobbers. Reasonable scale of distance rates, which will give to each distributing point the benefit of its location, prescribed. Alton Mercantile Co. v. A. & W. Ry., 95 I. C. C. 645.

(5m) Class C rates on prepared roofing from Port Neches, Tex., to Couchwood, Cotton Valley, and Haynesville, La., and state Line and Emmerson, Ark., found unreasonable as compared with rates from St. Louis and Kansas City to same destinations, from Port Neches to Shreveport, Monroe, New Orleans, Vicksburg, and Memphis, and to extent they exceeded lower commodity rates subsequently established equal to the basis prescribed in Memphis Southwestern Investigation, 77 I. C. C. 437, 562, for distances the same as those between

points here involved. Reparation awarded. Texas Pipe Line Co. v. L. &. A., 95 I. C. C. 674.

(5n) Rates on cotton piece goods between Philadelphia, Pa., and Bridgeton, N. J., found not unreasonable or otherwise unlawful as compared with lower rates between Philadelphia and Millville, and Mays Landing, N. J. Berkman v. P. R. R., 95 I. C. C. 685.

(5o) Rate on bituminous coal from Panhandle, Ohio, to Mingo Junction, Ohio, during Federal control, found unreasonable as compared with rates between other points in Ohio for like distances, and to extent it exceeded lower rate requested by complainant prior to movement and established subsequent thereto. Reparation awarded. Beacon Coal Co. v. Director General, 95 I. C. C. 687.

(5p) Rates on talc from Hemp, N. C., to Jacksonville, Fla., York and Philadelphia, Pa., Manville, N. J., and East St. Louis and Vandalia, Ill., found not unjustly discriminatory or unduly prejudicial, but unreasonable as compared with rate from Hemp to Chicago and other Illinois points for greater distances. Reparation awarded. Standard Mineral Co. v. N. S. R. R., 95 I. C. C. 704.

(5q) Rates on wrought-iron and steel pipe from points in Texas common-point territory to points in Little Rock-Fort Smith territory found unreasonable. Reasonable rate prescribed based upon Memphis Southwestern scale approved in 77 I. C. C. 473, 595, and reparation awarded. Humble Oil & Rfg. Co v. M. P., 95 I. C. C. 709.

(5r) Rates on sugar from New Orleans, to Kansas City, Omaha, and Atchison, found not unreasonable as compared with rates to Chicago, St. Louis, and the Twin Cities, but such rates to Omaha, in so far as they exceed those contemporaneously maintained to the Twin Cities, found to result in undue prejudice. Omaha Chamber of Commerce v. A., T. & S. F., 95 I. C. C. 713.

(5s) Rate on cement from Richard City, Tenn., to Normal, Tenn., moving via an interstate route, found unreasonable to extent it exceeded lower rate from cement-producing points in Alabama to the same destination for equal and greater distances. Reparation awarded. Dixie Portland Cement Co. v. N., C. & St. L., 96 I. C. C. 47.

(5t) Rate on liquid tanning extract from Mariners Harbor, N. Y., to Millville, Pa., found unreasonable to extent it exceeded rate from and to other points within limits of city of New York. Mariners Harbor is within New York City limits, has generally been accorded the New York basis of rates, and subsequent to movement on that basis was established from Mariners Harbor. Reparation awarded. Quebracho Products Co. v. S. I. R. T. Ry., 96 I. C. C. 52.

(5u) Rates from New Albany to other points in Indiana on bituminous coal originating in Kentucky and West Virginia and barged to New Albany down the Ohio River, found unreasonable as compared with rates from Cincinnati, a competing point shipping to the same destinations and to which traffic moves under similar transportation conditions. Moreover, rates for the short Intrastate movement are on too high a level as compared with intrastate rates on bituminous coal prescribed by the commission in 66 I. C. C. 338 and numerous other cases. Reasonable distance scale of rates prescribed for the future. Slider v. B. & O., 96 I. C. C. 65.

(5v) Rates on wrought-iron or steel pipe from Louisiana and Arkansas points and numerous points in Louisiana, except Shreveport, to and from certain points in Arkansas found unreasonable as compared with intrastate rates in Louisiana and from various points to Arkansas destinations. Rates on like traffic from Shreveport to certain Arkansas points found not unreasonable. Texas Co. v. K. C. S., 96 I. C. C. 81.

(5w) Rate on fuel oil from Kansas City to Kearney, Nebr., found unreasonable as compared with lower rates contemporaneously maintained to Grand Island, Nebr., a farther distant point, and to extent it exceeded a lower rate subsequently established. Reparation awarded. Tyner Construction Co. v. U. P., 96 I. C. C. 91.

(5x) Rates on cabbage from St. Francisville to Monroe, La., via an interstate route through Vicksburg, found unreasonable as compared with rates from and to same points via another route, with distance rates for equal hauls in Arkansas, Texas, and Louisiana, with rate subsequently established via route of movement, and to extent they exceeded rate prescribed for like distances in Natchez Chamber of Commerce, 52 I. C.

C. 105; 58 I. C. C. 610; and 63 I. C. C. 228. Reparation awarded. Sugar Bros. Co. v. Y. & M. V., 96 I. C. C. 97.

(5y) Rate on kerosene from Fort Worth, Tex., to Waterbury, Conn., found unreasonable to extent it exceeded rates contemporaneously applicable from Fort Worth to greater part of New England over route of movement, through Waterbury to more distant points. Due to error on part of tariff compiler the lower rate was not applicable on shipments to any-destinations in Connecticut, and this omission was subsequently corrected. Reparation awarded. Transcontinental Oil Co. v. D., L. & W., 96 I. C. C, 173.

(5z) Rates on lumber from points in Florida and Georgia to Waverley, N. J., found unreasonable to extent they exceeded rates contemporaneously in effect from same points of origin to Newark. Reparation awarded. Stailey Lbr. Co. v. P. R. R., 96 I. C. C. 175.

(6a) Rates on coal from mines in Inner and Outer Crescent districts and Cincinnati, Ohio, to Ben Davis, Ind., found not unreasonable, unjustly discriminatory, or unduly prejudicial as compared with lower rate to Indianapolis, Ind., from the same points and from points in Indiana. Bush & Co. v. B. & O., 96 I. C. C. 178, 183.

(6b) Combination rates on lumber, box shooks, and articles taking lumber rates, from Williams, Flagstaff, and Holbrook, Ariz., to Nogales, Ariz., destined to points in Mexico, found not unreasonable or otherwise unlawful as compared with joint rates from California points to same destinations. The excessive charges complained of accrued solely in the local rate component of the connecting line in Mexico, which is operated as a separate road, is not a party defendant, and not subject to the commission's jurisdiction. Arizona Lumber & Timber Co. v. A. E. R. R. Co., 96 I. C. C. 203.

(6c) Rates on pulp wood, for joint-line hauls, to Covington, Va., from certain points in southern territory, found unreasonable and unduly prejudicial to complainant and preferential of wood pulp and paper manufacturers at Coleman, Big Island, and Hopewell, Va., Canton, N. C., Kingsport, Tenn., and Bristol, Va.,-Tenn. Covington is situated close to the line dividing the two territories and in view of the nature of this traffic and the competitive situation is entitled to rates based as nearly as possible on a joint scale properly aligned with the lower level of rates in southern territory on the one hand, and the higher level in official territory on the other. Reasonable and nonpreferential and nonprejudicial rates prescribed for the future. West Virginia Pulp & Paper Co. v. S. Ry., 96 I. C. C. 244.

(6d) Rate applicable on shipments of wrought-iron pipe from Leeray, Tex., to Bristow, Okla., reconsigned to Okemah, Okla., via M-K-T, found unreasonable and unduly prejudicial to extent it exceeded rate contemporaneously maintained via other lines for comparable distances in same general territory. Reparation awarded. Sinclair Oil & Gas Co. v. C. & N. E. Ry., 96 I. C. C. 286.

(6e) Fourth-class rate assessed on shipments of sisal from New Orleans, La., to Mounds, Ill., during Federal control, found unreasonable as compared with import commodity rate contemporaneously in effect from New Orleans to Indianapolis, Ind., and to extent it exceeded lower import commodity rate subsequently established over route of movement. Reparation awarded. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 297, 298.

(6f) Rate on shipments of sisal from Indianapolis, Ind., to North Kansas City, Mo., during Federal control, found unreasonable as compared with rate contemporaneously in effect from Indianapolis to St. Paul, Minn., and with import commodity rate in effect from New Orleans, La., to both St. Paul and North Kansas City. Reparation awarded and reasonable rates prescribed for the future. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 301.

(6g) Rate assessed on shipments of sisal from Mounds, Ill., to Kansas City, Mo., during Federal control, found unreasonable as compared with lower rate contemporaneously in effect from Mounds to Xenia, Ohio, and with rates from Indianapolis, Ind., for substantially greater distances. Reparation awarded. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 301.

(6h) Rates on cottonseed from certain points on Missouri Pacific in northern Louisiana and southern Arkansas to Jackson, Miss., found unreasonable and unduly prejudicial to manufacturers of cottonseed products at Jackson and un-

duly preferential of their competitors at Vicksburg, Miss. to the extent they exceed rates contemporaneously maintained from same points to Vicksburg by more than 3.5 cents. Reparation awarded and reasonable rates prescribed for future. Southern Cotton Oil Co. v. A. & V. Ry. Co., 96 I. C. C. 333.

(6i) Fifth-class rates assessed on brass and copper ingots from East Liberty, Pa., to Follansbee and Wheeling, W. Va.; Toronto, Youngstown, Canton, Cleveland, Newburg, Harvard Avenue, Lorain, Toledo, Wagon Warks, Maryville, Springfield, and Bellaire, Ohio; Detroit, Mich.; East Chicago and Gary, Ind.; Chicago and South Chicago, Ill.; Louisville and South Louisville, Ky.; and St. Louis, Mo.; found unreasonable to extent they exceeded rates contemporaneously in effect from Williamsport, Pa., to same destinations, and to extent they exceeded rates on brass ingots from Falls Creek and Punxsutawney, Pa., to same destinations. Rate to Buffalo, Lackawanna, and Depew, N. Y., found unreasonable to extent they exceeded rates in effect on brass and copper ingots from 60 per cent group to Rochester, N. Y., and points taking same rate up to and including June 4, 1924, and subsequent thereto, to extent they exceed or may exceed rates in effect from East Liberty to Gasport, Medina, Batavia, and Rochester. Reparation awarded. Duquesne Reduction Co. v. P. R. R. Co., 96 I. C. C. 351.

(6j) Under the circumstances of this case, relative reasonableness, rather than intrinsic reasonableness becomes the important thing to be considered, and other criteria, such as ton-mile earnings, fall into the back ground. Wyoming Coal Co. v. Y. Ry. Co., 96 I. C. C, 359, 367.

(6k) Rates on sulphur from Gulf Hill, Tex., to interstate destinations and on imported fuel oil from Texas City, Tex., to Gulf ports found not unreasonable or unduly prejudicial. Although rates on sulphur to all points in the United States are assailed, no attempt was made to show that any rate in and out of itself was unreasonable or unduly prejudicial, complainant's claim being solely with respect to its failure to receive out of the rates an adequate allowance on all inbound shipments of oil and outbound shipments of sulphur. Complainant found not entitled to allowance granted solely to put it on parity with its competitors. Allowances or Divisions Received by Texas Gulf Sulphur Co., 96 I. C. C. 371.

(6l) Rates on apples in bulk, from the Yakima valley to various interstate destinations found unreasonable and unduly prejudicial to the extent that such rates exceed the contemporaneous rates from and to the same points on apples in boxes. Kloeber v. N. P. Ry. Co., 96 I. C. C. 437.

(6m) Rates on evaporated milk from Lodi and Reedsburg, Wis., to Chicago, and Clearing, Ill., found not unreasonable, unjustly discriminatory, or unduly preferential as compared with contemporaneously applicable rates on like traffic for comparable distances from competitive points in the same general territory to the same destinations. Nestle's Food Co. v. C. & N. W. Ry. Co., 96 I. C. C. 452.

(6n) Rates on prepared roofing and allied articles, in straight or mixed carloads, from Lockland and Carthage, Ohio, to destinations in Kentucky and Tennessee intermediate to Knoxville and Chattanooga, Tenn., found to have been and to be unreasonable to the extent they exceeded or exceed the rates contemporaneously maintained on like traffic from the same points to Knoxville and Chattanooga. Reasonable basis of rates prescribed for the future and reparation awarded. Carey Co. v. C., N. O. & T. P. Ry. Co., 96 I. C. C. 455.

(6o) Rates on cement from Ada, Okla., to destinations on the Texas & Pacific, directly intermediate to New Orleans, La., higher than to New Orleans not shown to be unreasonable as compared with rates from competing mills to destinations in Louisiana, Texas, and Arkansas, and with rates in southeastern territory. Complaint dismissed. Oklahoma Portland Cement Co. v. St. L.-S. F. Ry. Co., 96 I. C. C. 468.

(6p) Rates on coal screenings, shipped from Contrall, Springfield, and Pana, Ill., to Lyons, Iowa, during Federal control found not unreasonable, although lower rates on same commodity were contemporaneously applicable from same points to Clinton, Iowa, within the switching limits of which Lyons is located. Lower rates to Clinton were established through error. Complaint dismissed. Ford Roofing Products Co. v. Director General, 96 I. C. C. 471.

(6q) Rates on hogs, from Atlanta and other points in Georgia, to Ohio and Indiana points, found not unreasonable

or otherwise unlawful, comparing favorably with rates between points in the Southeast and various Ohio and Mississippi River crossings. Complaint dismissed. Patterson Commission Co. v. C. of G. Ry. Co., 96 I. C. C. 473.

(6r) Combination rates on petroleum and its products from points in Oklahoma to destinations in Indiana found unreasonable as compared with rates from same points of origin to other destinations in central territory, particularly in the state of Illinois. Reasonable joint rates prescribed for the future and changes suggested in the rates from other points or groups of origin. Indiana State Chamber of Commerce v. A., T. & S. F. Ry Co., 96 I. C. C. 485.

(6s) Rates on crude, fuel and gas oils from Clay Spur and Osage, Wyo., to points in South Dakota, Iowa, Minnesota, and Wisconsin, found not unreasonable or otherwise unlawful. Although equal to rates contemporaneously maintained on refined oils to and from same points, such rates compare favorably with the rate on crude oil from Lander, Wyo., to Ardmore, S. Dak., found not unreasonable in 91 I. C. C. 563. Complaint dismissed. Barber Co. v. C. & N. W. Ry. Co., 96 I. C. C. 516.

(6t) Carload rates on coal from Wheatcroft, Ky., via Evansville, Ind., to Mount Vernon, Ind., found unreasonable to extent they exceeded rates based on the contemporaneous local to Evansville, plus the intrastate rate beyond. Reparation awarded. Mount Vernon Strawboard Co. v. C. & E. I. Ry. Co., 96 I. C. C. 571.

(6u) Rate on locomotive cranes, with overhanging or detached parts, from Gilmerton, Va., to Greystone, N. C., found not unreasonable as compared with rates from Virginia cities to destinations in North Carolina to which Greystone is intermediate. Raleigh Granite Co. v. S. A. L. Ry. Co., 96 I. C. C. 573.

(6v) Rates on petroleum residuum, in tank-car loads, from Wichita U. S. Yards, Kans., Elbung and Peabody, Kans., during Federal control, found not unreasonable as compared with intrastate rates on like traffic in other neighboring States. Sterling Oil & Refining Co. v. Director General, 96 I. C. C. 586.

(6w) Rates on cement from points in the Kansas Gas belt, including Dewey, Okla., to St. Joseph and intermediate points in Scale II territory in Missouri, found unreasonable and unduly prejudicial to Kansas gas-belt points and Dewey over interstate routes and to shippers therefrom, and unduly preferential of Kansas City and Sugar Creek over intrastate routes to St. Joseph and of shippers therefrom and of intrastate traffic in Missouri between said points, to the extent that the rates from points in Kansas gas belt, including Dewey, exceeded or may exceed rates contemporaneously maintained for the like distances from Kansas City and Sugar Creek and upon intrastate traffic from Kansas City and Sugar Creek to St. Joseph and intermediate points in Missouri. Rates prescribed in Western Cement Rates, 48 I. C. C. 201, and 52 I. C. C. 225, as modified in 69 I. C. C. 644, found to be just and reasonable for application on both interstate and intrastate traffic between said points in the future. Cement from Kansas City to St. Joseph, 96 I. C. C. 718.

(6x) Class rates to Caspar, Wyo., from Omaha, Nebr., Sioux City, Iowa, Kansas City and St. Louis, Mo., St. Paul, Minn., Burlington, Iowa, and Chicago, Ill., and proportional class rates from upper Mississippi River crossings, found unreasonable and unduly prejudicial to Casper and unduly preferential of competing jobbing points, to the extent they exceed the rates specified, which are prescribed as reasonable and nonprejudicial rates for the future. Casper Chamber of Commerce v. C. & N. W. Ry. Co., 96 I. C. C. 736.

(6y) Rate assessed on shipments of uncompressed cotton linters, from Magnolia, Ark., to St. Louis, Mo., found unreasonable as compared with lower rates contemporaneously in effect to St. Louis from points contiguous to Magnolia, and to extent it exceeded rate subsequently established over route of movement. Reparation awarded. O'Donnell Mercantile Co. v. L. & N. W. R. R. Co., 98 I. C. C. 1.

(6z) Present commodity rates on iron and steel articles from St. Louis, Mo., to Mississippi Valley points, adjusted in harmony with commission's decision in 64 I. C. C. 306, found not unreasonable as compared with lower rates from Louisville, Ky. to same destinations. St. Louis Chamber of Commerce v. A. & V. Ry. Co., 98 I. C. C. 29.

(7a) Rates on crude oil from Mexia, Tex., and near-by loading stations, to

Shreveport, La., since November 6, 1921, found not unreasonable or unduly prejudicial as compared with lower rates contemporaneously in effect from Mexia to Beaumont and Port Arthur, Tex. Latter rates are depressed by pipe-line competition and absence of such competition to Shreveport presents a situation which distinguishes the transportation conditions under the rates to Beaumont and Port Arthur from those under rates assailed and removes it from the purview of section 3 of the act. Caddo Central Oil & Refg. Corp. v. K. C. S. Ry. Co., 98 I. C. C. 39.

(7b) Sixth-class rate on bituminous coal from Boston, Mass., to Hills Grove, R. I., found unreasonable as compared with rates from Boston to other points in the same general territory, distance considered, and with rate found reasonable in Arnold, Hoffman & Co., 87 I. C. C. 417. Reparation awarded. Rhode Island Malleable Iron Works v. N. Y., N. H. & H., 98 I. C. C. 43.

(7c) Rates on cottonseed from Oklahoma points to Sherman, Tex., found unreasonable during period up to August 15, 1923, to extent they exceeded rates contemporaneously applied for like distances between Shreveport, La., and points in Texas; and on the subsequent to August 15, 1923, found unreasonable to extent they exceeded or may exceed rates under the distance scale shown in Appendix 7, applied in the manner hereinbefore indicated. Reparation awarded, the similarity of transportation conditions throughout this territory justifying a retroactive rate adjustment to Sherman. Oklahoma Corp. Commission v. A. & S. Ry. Co., 98 I. C. C. 183, 253.

(7d) Rates on newsprint paper from points in New England. New York, and Canada, and from Philadelphia, Pa., to Baltimore, Md., substantially on the sixth-class basis applicable within trunk-line territory, found not unreasonable. While bases of rates in other territories are varying percentages of sixth class, the entire rate structure within and to trunk-line territory is in issue in a pending general investigation and no sufficient reason exists for selecting newsprint for advance consideration. The commission's decision in the Ontario Paper Co. case, 95 I. C. C. 66, upon which complainant relies, was made on consideration of newsprint rates and distances in evidence and not primarily on consideration of the relationship of newsprint rates to sixth class, although the basis found reasonable from Thorold, Ontario, to New York was approximately 80 per cent of sixth class. Washington Publishers' Asso. v. B. &. O. R. R. Co., 98 I. C. C. 339.

(7e) Rates on newsprint paper, from points in New England, New York, and Canada, and from Philadelphia, Pa., to Washington, D. C., found unreasonable and unduly prejudicial to extent they exceeded, exceed, or may exceed, corresponding rates to Baltimore, Md., by more than 3 cents per 100 pounds from Philadelphia, and 2 cents from all the other points of origin. While the entire class-rate structure within and to trunk-line territory is in issue in a pending general investigation, the rates to Washington are clearly indefensible and shippers should not suffer therefrom for the period necessary to complete the general investigation. Washington Publishers' Asso. v. B. & O. R. R. Co., 98 I. C. C. 339.

(7f) Evidence in support of rates to Washington as compared with those to Baltimore, is merely an explanation of how the differences grew up, without going into the merits of such differences, and a contention that Baltimore is at the farthest edge of a group. FOUND, evidence does not show that rate to Baltimore was ever determined on a group basis, on the contrary the only conclusion possible from the record is that rates to New York, Philadelphia, and Baltimore were established upon considerations bearing on those ports alone and not relating to inland points. Washington Publishers' Asso. v. B. & O. R. R. Co., 98 I. C. C. 339, 343.

(7g) Upon attempt to prove that the Buffalo-New York sixth-class rate on newsprint is unreasonable to the extent it exceeds 80 per cent of sixth class and that rates from the other points of origin involved should be derived from the new Buffalo-Baltimore rate by means of present relationships. HELD, no question as to relationships of rates from other points of origin to Buffalo is pressed in this proceeding and commission's decision is without prejudice to any conclusion on that question which may be reached in other proceedings. Washington Publishers' Asso. v. B. & O. R. R. Co., 98 I. C. C. 339,344.

(7h) Rates for interstate transportation of fresh meats and packing-house products from Duluth, Minn., to St. Paul, Minn., found unreasonable to extent they exceed lower contemporaneous rates on like traffic from Mason City, Iowa, to St. Paul, a movement of shorter distance, but having less favorable transportation conditions. Reasonable rates prescribed for future. Duluth Chamber of Commerce v. C. St. P., M. & O. Ry. Co., 98 I. C. C. 352.

(7i) Rates on lump coal from northern Colorado district to Missouri River territory found unreasonable to extent they exceed rates 75 cents less per net ton than the rates herein prescribed to Missouri River points, and to other points taking $5 rates from Walsenburg, Colo., which are prescribed as reasonable rates for future. Colo. & N. Mex. Coal Operators Asso. v. D. & R. G. W. R. R. Co., 98 I. C. C. 377, 390, 391.

(7j) Rates on lump coal from Canon City, Colo, district to various interstate destinations found unreasonable to extent they exceed rates herein prescribed from Walsenburg, Colo., district to same destinations. Colo. & N. Mex. Coal Operators Asso. v. D. & R. G. W. R. R. Co., 98 I. C. C. 377, 396.

(7k) Rates on lump coal from Trinidad, Raton-Dawson, Cameo-Palisade, Bowie-Somerset, Crested Butte, and Routt County (Oak Hills) districts, to various interstate destinations, found unreasonable to extent they exceed rates herein prescribed from Walsenburg, Colo. district by more than present differentials between existing rates, which are prescribed as reasonable rates for the future. Colo. & N. Mex. Coal Operators Asso. v. D. & R. G. W. R. R. Co., 98 I. C. C. 377, 396.

(7l) Rate on zinc concentrates from Minnequa, Colo., to Collinsville, Okla., found unreasonable to extent it exceeded commodity rate contemporaneously in effect from Colorado common points to Collinsville, which lower rate was subsequently made applicable from Minnequa. Reparation awarded. Tulsa Fuel & Mfg. Co. v. Director General, 98 I. C. C. 411.

(7m) Rates on coal from complainants' mines on the Virginia Railway in the New River district of West Virginia to interstate destinations found unreasonable and unduly prejudicial to extent they exceed the district rates on like traffic maintained by defendants to same destinations from mines in the New River districts of the C. & O. and Virginian and the Pocahontas and Tug River districts of the N. &. W., these districts forming part of what is generally referred to as the Outer Crescent. Reasonable and nonprejudicial rates prescribed for future. Wyoming Coal Co. v. V. Ry. Co., 98 I. C. C. 488.

(7n) In finding rates on coal from mines on the Virginian Railway in New River district of West Virginia to interstate destinations unreasonable and unduly prejudicial, the record did not warrant a conclusion that the difference in operating conditions from mines to its western terminus between the haul over the Virginian and that over the branch lines and independent short-line connections of C. & O. is in and of itself sufficient to warrant a higher level of rates from complainants' mines. The difficulty of operation as between the lines serving the west and those serving the east apparently is due in a greater measure to operating practices than to physical obstacles. Wyoming Coal Co. v. V. Ry. Co., 98 I. C. C. 488, 492, 493.

(7o) Rates on coal from mines on the Virginian Railway in the New River district of West Virginia to interstate destinations found unreasonable and unduly prejudicial. Under the circumstances of the case relative reasonableness, rather than intrinsic reasonableness, becomes the important thing to be considered, and other criteria, such as ton-mile earnings, fall into the background. Wyoming Coal Co. v. V. Ry. Co., 98 I. C. C. 488, 497.

(7p) Rates on moss in machine-pressed bales from Plaquemine, La., and from other producing points in Louisiana west of Mississippi River, to certain defined interstate destinations, found not unreasonable, unjustly discriminatory, or unduly prejudicial as compared with lower contemporaneous rates on like traffic from competing points in Louisiana east of the river, such as New Orleans and Baton Rouge. National Asso. of Furniture Mfrs. v. A. A. R. R. Co., 98 I. C. C. 501.

(7q) Rates on cyanamid from Niagara Falls, Ontario, to Alexandria, Vt., found unreasonable to extent they exceeded lower rate based on the commodity rate on like traffic to Baltimore, Md.,

plus the sixth-class differential to Alexandria. Reparation awarded. Bryant v. M. C. R. R. Co., 98 I. C. C. 526.

(7r) Rates on scrap iron from Rensselear, Ind., to St. Joseph, Benton Harbor, and Bridgman, Mich., found unreasonable and unduly prejudicial to extent they exceed the rate applicable from Monticello, Ind., and Chicago, Ill., to Benton Harbor, to which Bridgman and St. Joseph are intermediate. Reparation awarded and reasonable rate prescribed for future. Karnowsky v. C., I. & L. Ry. Co., 98 I. C. C. 533.

(7s) Rate on sugar beets shipped from Talent, Oreg., to Toppenish, Wash., during Federal control, found unreasonable to extent it exceeded lower rate voluntarily established by defendant carrier from Talent to points within a few miles of complainant's factory. Reparation awarded. Utah-Idaho Sugar Co. v. Director General, 98 I. C. C. 541.

(7t) Rate applicable to petroleum products, in tank-car loads, from Greybull, Wyo., to Belgrade, Mont., during Federal control, found unreasonable to extent it exceeded lower rate contemporaneously applicable to contiguous points and which through oversight was not established to Belgrade until subsequent to movements here involved. Reparation awarded. Continental Oil Co., v. Director General, 98 I. C. C. 544.

(7u) Rates on clam and mussel shells, valuable for button manufacture, from points in Illinois to points on Mississippi River in Illinois and Iowa, found not unreasonable or unduly prejudicial. However, the present rate structure on this and similar traffic is in a chaotic condition and prompt revision is suggested. Mississippi Pearl Button Co. v. A., T. & S. F. Ry. Co., 98 I. C. C. 560.

(7v) Interstate rates on iron and steel articles and cast-iron pipe from points in Alabama to Pensacola, Fla., found not unreasonable, and from points of origin other than Birmingham and points grouped therewith taking same rates not otherwise unlawful, as compared with rates on like traffic for similar distances from there as well as other points of origin in same territory. Interstate rates to Mobile, Ala., and Pensacola apparently compare favorably with rates on iron and steel articles from Birmingham to other destinations. Pensacola Chamber of Commerce v. L. & N. R. R. Co., 98 I. C. C. 567.

(7w) Rate charged on shipments of mussel shells from Hobbs Island, Ala., to Oswego, Kans., found not unreasonable or unduly prejudicial. Ton-mile earnings yielded are less than earnings at rates applicable on like traffic from Louisiana points to destinations in Kansas, including Oswego, for comparable distances. Pioneer Pearl Button Co. v. N., C. & St. L. Ry., 98 I. C. C. 578.

(7x) Upon further consideration, commission is of the opinion that finding of unreasonableness of rates on clean rice from points in Arkansas, Louisiana, and Texas to points in Oklahoma, in 95 I. C. C. 645, wherein a reasonable scale of distance rates is prescribed, does not necessitate a general readjustment as that term is used in cases where it has formed the basis for a denial of reparation, and even so, reparation still would be proper under principal announced in 52 I. C. C. 481. Alton Mercantile Co. v. A. & W. Ry Co., 98 I. C. C. 581, 582.

(7y) Rates on scrap steel from Penniman, Va., to Chester, Latrobe, and Vandergrift, Pa., and Massillon, Ohio, found unreasonable to extent they exceeded lower contemporaneous commodity rates on like traffic from Williamsburg, Va., to same destinations. Reparation awarded. Briggs & Turivas v. C. & O. Ry. Co., 98 I. C. C. 584.

(7z) Rates on uncompressed cotton to Galveston, Tex., from Fouke, Womble, Amity, and Gurdon, Ark., following 88 I. C. C. 492, found unreasonable to extent they exceeded lower commodity rate subsequently established in the case of shipments from Fouke and contemporaneous rates from the other points of origin to New Orleans, La. Reparation awarded. Moody Cotton Co. v. Director General, 98 I. C. C. 643.

(8a) Rates on newsprint ink from Bayonne, Hoboken, and Jersey City, N. J., Brooklyn and New York, N. Y., Boston and Morrills, Mass., and Philadelphia, Pa., to Washington, D. C., and Baltimore, Md., found not unreasonable, measured by numerous other fifth-class rates shown as applying for corresponding distances in this territory. This finding is without prejudice to the conclusions that may be reached in the general class-rate investigation now pending. Washington Publishers' Asso. v. B. & O. R. R., 98 I. C. C. 668.

(8b) Class rates from St. Paul, Minneapolis, and Duluth, Minn., and Super-

ior, Wis, and related points taking same rates, to Valley City and Jamestown, N. Dak., found unreasonable and unduly prejudicial as compared with lower contemporaneous rates from same points of origin to Fargo, N. Dak. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691.

(8c) Class rates from Chicago, Ill., to Fargo, N. Dak., found unreasonable as compared with lower contemporaneous rates from Chicago to St. Paul and Minneapolis, Minn. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 692, 724.

(8d) Class rates from Fargo, N. Dak. to Montana points found not unreasonable as compared with contemporaneous rates from St. Paul and Minneapolis, Minn., to same destinations and from and to other points for comparable distances. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 692, 727.

(8e) Class rates from Omaha, Nebr., and Kansas City, Mo., and points taking same rates to Fargo, N. Dak. found unreasonable as compared with lower contemporaneous rates from same origin points to Duluth, Minn. Reasonable rates prescribed for future. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 692, 730.

(8f) Class rates from all points in California, Nevada, and Utah to Fargo, N. Dak., found unreasonable and unduly prejudicial to extent they exceed corresponding contemporaneous rates from same points to Duluth, Minn. Reasonable and nonprejudicial basis of rates prescribed for future. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691, 731.

(8g) In making the readjustment in class rates from and to Fargo, N. Dak., herein required, it is suggested defendants revise the corresponding rates from and to Grand Forks, N. Dak., in harmony with the resulting rates from and to Fargo. Fargo Commercial Club v. A. & W. Ry., Co., 98 I. C. C. 691, 732.

(8h) Where the evidence tends to show relative unreasonableness as distinquished from intrinsic or per se unreasonableness, the findings of the Commission must be based to a great extent upon measuring the rate attacked with other rates; but the Commission must be convinced that the rates submitted by way of comparison are properly comparable. The mere fact that the rate under attack appears to be out of line with a few rates to which it is closely related does not necessarily afford a basis for a finding of unreasonableness. Such a showing may indicate that the comparative rates are too low rather than that the attacked rate is too high, and the correction of such a maladjustment might properly be made under section 3 instead of section 1 of the act. Tolman Dow & Co. v. T. C. R. R. 104 I. C. C. 37, 39.

(8i) Rates on cottonseed oil, cake, meal and hulls from Los Angeles, El Centro, and Calexico, Calif. and from Phoenix, Ariz., to El Paso, found unreasonable. Rates established upon the distance scales of rates on these commodities prescribed in Oklahoma Corporation Commission, 98 I. C. C. 183, plus differentials for hauls in this territory, would be reasonable. The differences between the levels of the rates under the prescribed standard scales for cottonseed oil on the one hand and cottonseed cake, meal, and hulls, on the other indicate that the differentials on cottonseed oil for hauls in this territory should be higher than on the cake, meal, and hulls. Reasonable rates prescribed for the future. Peyton Packing Co. v. A. E. R. R. Co., 100 I. C. C. 4, 23.

(8j) Interstate class rates between Oakland, Calif., and various destinations in California and Nevada found not unreasonable or unduly prejudicial as compared with class rates between San Francisco and said points. The rates applying between the metropolitan district and points here considered, where there is actual water competition, are depressed by such competition, although it is shown that this competition is not so keen as to result in anything in the nature of rate wars between the rail and water lines, and further that the rates between the metropolitan district and points here considered which are not on navigable waters reflect the result of water competition to related points and are likewise lower than normal rates. The water competition from Oakland has been nowhere near as great as that from San Francisco. Oakland Chamber of Commerce v. S. P. Ry. Co., 100 I. C. C. 55, 59, 62.

(8k) Rates on fresh deciduous fruits, other than apples, from California points, to eastern transcontinental

groups, found not unreasonable or unduly prejudicial as compared with rates from points in Washington, Oregon, Idaho, Utah, and Colorado, to same destinations. Rate from Utah and Colorado to destinations east of Chicago is identical with California rate, although distances are less, while rates from Washington, Oregon, and Idaho, or the bases thereof, have previously been found reasonable. See 58 I. C. C. 342 and other cited cases. This finding without prejudice to any conclusions that may be reached upon later or more comprehensive record which is expected to be developed in Docket No. 17000, now pending. Calif. Growers' & Shippers' Protective League v. S. P. Co., 100 I. C. C. 79, 86, 87.

(81) Relationship of rates on certain commodities for export, import, or coastwise movement via Galveston, Tex., from or to points in Texas, Oklahoma, western Louisiana, Arkansas, and Kansas found unduly prejudicial to Galveston and unduly preferential of New Orleans, La. Such undue prejudice should be removed by establishing the same rates to or from New Orleans or Galveston, as the case may be, in instances where the differences in distance from and to the two ports are not greater than 100 miles, and by establishing rates to or from Galveston, as the case may be, certain prescribed differentials under New Orleans in instances where the differences in distance in favor of Galveston are greater than 100 miles. The record is not sufficiently complete to warrant the commission in prescribing relationships between the rates to or from Galveston or New Orleans on other commodities or from or to points other than those embraced in the foregoing findings. Relationships herein prescribed will serve as a guide to defendants in readjusting the rates on other export, import, and coastwise traffic. Galveston Commercial Asso. v. G., H. & S. A. Ry. Co., 100 I. C. C. 110.

(8m) Proposed revision of rates from Atlanta to Buffalo and Pittsburgh proper makes no provision for its application to the Buffalo-Pittsburgh territory, though no reason appears for so restricting the rates. Respondents directed to effect the application of proposed rates to the Buffalo-Pittsburgh territory in season to take effect at same time as the suspended schedules. Furniture from Southern Points, 100 I. C. C. 127, 148.

(8n) Present relationship between the domestic and export rates on cotton from Oklahoma, Arkansas, Texas, and Louisiana to Gulf ports found unduly prejudicial to uptown and interior warehouses and compresses and unduly preferential of water-front warehouses and compresses. The record is not convincing that differences in transportation costs will justify the continuance of the present difference between the export and domestic rates, especially when it is considered that differences in transportation costs have been generally disregarded in keeping the Texas ports and industries at these ports on a rate parity. Application of Rates on Cotton to Gulf Ports, 100 I. C. C. 159, 165.

(8o) Upon further hearing, original report 64 I. C. C. 477, and upon original hearing of consolidated cases, FOUND: Failure of defendants to provide and maintain from Paxton and Spring Garden, Calif., to Wabuska, Nev., on ores and concentrates, rates similar in all respects as to conditions under which such rates are applicable to those contemporaneously maintained on like traffic from Spring Garden to Garfield and International, Utah, but not in excess of 60 per cent thereof will be for the future unduly prejudicial to Wabuska and unduly preferential of Garfield and International. Mason Valley Mines Co. v. W. P. R. R. Co., 100 I. C. C. 180, 204.

(8p) Rates on liquid and solid asphalt from Port Neches, Tex., and points taking same rates, to Tulsa, Okla., found not unreasonable as compared with lower contemporaneous rates on like traffic from points of origin here involved to Memphis, Tenn., Little Rock, and Fort Smith, Ark., following 81 I. C. C. 522. Standard Paving Co. v. A., T. & S. F., 100 I. C. C. 233.

(8q) Class rate on coal from Breed, Colo., to Colorado Springs, Colo., during Federal control, found unreasonable to extent it exceeded the rate contemporaneously in effect from Pikeview, Colo., to Colorado Springs. Reparation awarded. Corley v. Director General, 100 I. C. C. 293.

(8r) Rates assessed on shipments of wheat from St. Joseph, Mo., to Cannon Falls and Lake City, Minn., accorded transit at Leavenworth, Kans., found not to have been unreasonable, unjustly discriminatory, or unduly prejudicial,

as compared with lower contemporaneous rate on like traffic from Kansas City over various lines other than route of movement, with transit at Leavenworth. Moore Lawless Grain Co. v. M. P. R. R. Co., 100 I. C. C. 303.

(8s) Rates on peanuts, shelled or unshelled, from Suffolk, Franklin, Norfolk, and Petersburg, Va., and other points in Group A, to McAlester, Shawnee, and Oklahoma City, Okla., found unreasonable to extent they exceeded lower contemporaneous rates on like traffic from same points of origin to farther distant points in Texas and lower rate on shelled peanuts from the Virginia points to Oklahoma City subsequently established. Maximum reasonable rates prescribed for future and reparation awarded. Oklahoma Traffic Asso. v. C., R. I. & P., 100 I. C. C. 307.

(8t) Rail-and-water and rail-water-and-rail rates on lard, substitutes, green salted hides, and refuse grease from Houston, Tex., to New York, N. Y., and other eastern points, found not unreasonable as compared with contemporaneous rates on like traffic from same origin point to other destinations and from and to other points for comparable distances. Houston Packing Co. v. B. & M. R. R., 100 I. C. C. 345.

(8u) Rates on bituminous coal from mines in Kentucky, Virginia, and West Virginia to Clairton, Pa., found not to have been relatively unreasonable on ground, among other things, that the conditions surrounding the joint line haul from such mines differ from those in respect of the Ohio mines, where only a single-line haul was or is required. Carnegie Steel Co. v. P. R. R. Co., 100 I. C. C. 353.

(8v) Rates on bituminous coal from mines in Kentucky, Virginia and West Virginia to Clairton, Pa. found not unreasonable as compared with contemporaneous rates on like traffic from same origin points to other destinations for comparable distances. Carnegie Steel Co. v. P. R. R. Co., 100 I. C. C. 353.

(8w) Rates on pecans from Texas, Oklahoma and Louisiana points and from Natchez and Vicksburg, Miss., to St. Louis and Chicago, found not unreasonable or otherwise unlawful as compared with rates on like traffic from points in the Southeast to same destinations, distance considered, and from same points of origin to other destinations for comparable distances. Funsten Co. v. A. & V. Ry. Co., 100 I. C. C. 357.

(8x) Contention that carload rates on pecans from southeastern and southwestern sections are not comparable on account of the high grade of the southeastern product, not sustained of record when the farm prices of pecans in the entire southwest over a series of years are considered. Funsten Co. v. A. & V. Ry. Co., 100 I. C. C. 357, 362.

(8y) Rates applicable on shipments of blackstrap molasses from certain points in Louisiana to Fort Calhoun, Nebr., found not unreasonable or unduly prejudicial as compared with rates on like traffic from same points of origin to other destinations for similar distances and with rates between other points for comparable distances. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471.

(8z) Applicable rates on wheat bran from points in Western and Southwestern States to points in Louisiana, Texas, and New Mexico, found unreasonable in the past and complainants found not to have been damaged by reason of any undue prejudice which may have existed, but for future such rates found unreasonable and unduly prejudicial to extent they may exceed contemporaneous rates applicable on wheat middlings or shorts, coarse grain and coarse-grain products, from and to same points. Abilene Flour Mills Co. v. A. & S. Ry., 101 I. C. C. 14.

(9a) Commodity rate on pig iron from Toledo, Ohio, to Holland, Mich. found not unreasonable or otherwise unlawful as compared with contemporaneous rates on like traffic from Detroit, Mich., to Holland, from Toledo to other destinations for similar distances and from and to other points for comparable distances. Holland Furnace Co. v. P. M. Ry., 101 I. C. C. 19.

(9b) Rates on doors from Pacific coast points to Memphis, Tenn. found not unreasonable as compared with lower contemporaneous rates on like traffic from same points of origin to other destinations, which lower rates were subsequently established to Memphis, and proof is insufficient upon which to find that complainant was damaged by any unjust discrimination or undue prejudice which may have existed. Memphis

Freight Bureau v. C. & E. I., 101 I. C. C. 26.

(9c) Class rates as applied to plow irons, parts, and castings, from Macon, Ga., to points in Alabama, found not unreasonable but unduly prejudicial and in violation of long-and-short-haul clause of fourth section of act to extent they exceed or may exceed lower contemporaneous rates on plow irons, l. c. l., in effect from Atlanta, Ga., to same destinations. Undue prejudice ordered removed. Massey Gin & Machine Works v. C. of G., 101 I. C. C. 45.

(9d) Class rate on broken soapstone from Marriottsville, Md., to Stockertown Pa., found unreasonable to extent it exceeded or exceeds lower contemporaneous commodity rate on like traffic from Marriottsville to other destinations for comparable distances. Reasonable rate prescribed for future and reparation awarded. Kelly & Co. v. L. V. R. R., 101 I. C. C. 49.

(9e) Rate on cereal beverages from Duluth, Minn, to Greenland, Mich. found unreasonable as compared with lower contemporaneous rates on like traffic from other points of origin to destination here involved for comparable distances. Reparation awarded. Fitger Co. v. Copper Range, 101 I. C. C. 87.

(9f) Rates on interstate shipments of binder twine from complainant's plant on the Owasco River Railway, at Auburn, N. Y. including unabsorbed switching charges of the Owasco, to various destinations, found not unreasonable as compared with rates from North Plymouth, Mass., to same destinations. International Harvester Co. v. N. Y. C. R. R. Co., 101 I. C. C. 89, 91.

(9g) Joint rates on peanuts from points in Alabama, Florida, Georgia, South Carolina, and Tennessee to St. Louis, Mo. found not unjust, unreasonable, or otherwise unlawful, as compared with contemporaneous rates on like traffic from same points of origin to other destinations for comparable distances. United Fig & Date Co. v. A. C. L., 101 I. C. C. 138.

(9h) Rates on phosphate rock from Dunnellon, Prairie, Bartow, and other points in Florida taking same rates, to Knoxville, Tenn., found unreasonable and unduly prejudicial to Knoxville, as compared with rates to the Carolina group, to extent they exceeded and exceed lower contemporaneous rate on like traffic from points of origin involved to Carolina destinations. Reasonable and nonprejudicial rates prescribed for future, and reparation awarded. Knoxville Traffic Bureau v. A. C. L., 101 I. C. C. 165.

(9i) Main-line rates on beef cattle from points on defendants' lines in Arizona to points on their lines in California found not unreasonable or otherwise unlawful as compared with contemporaneous rates on like traffic to same points from producing districts in California and from points of origin in other States for comparable distances. Arizona Cattle Growers Asso. v. A. Ry. Co., 101 I. C. C. 181.

(9j) Rate charged on cement from Leeds, Ala., to Deerland, Ga., found not unreasonable as compared with contemporaneous rates on like traffic from and to other points in same general territory for comparable distances and with distance scales of rates approved in previous cases cited. MacDougald Construction Co. v. C. of G. Ry., 101 I. C. C. 226.

(9k) Rate assessed on slack coal moving from Rock Springs, Wyo., to Cornish, Utah, and diverted in transit to McMillan, Idaho, found unreasonable as compared with lower rates in effect from Wyoming and Utah groups to Idaho points for substantially equal distances, and to extent it exceeded a joint rate contemporaneously in effect from Rock Springs to McMillan, over another route, which lower rate was subsequently made applicable over route of movement. Reparation awarded. Colony Coal Co. v. O. S. L., 101 I. C. C. 330.

(9l) Upon further consideration finding in original report, 96 I. C. C. 81, that rates on wrought-iron or steel pipe from and to numerous points in Louisiana, except Shreveport, to and from certain points in Arkansas were unreasonable as compared with intrastate rates in Louisiana and from various points to Arkansas destinations, and rates on like traffic from Shreveport to certain Arkansas points were not unreasonable, affirmed. As a basis for reparation reasonable rates were those measured by the general level of comparable commodity rates shown of record as having been in effect during period of movement of the shipments, and such were the rates approved in the original report. Texas Co. v. K. C. S., 101 I. C. C. 345.

(9m) Rate on green salted hides from Savanah, Ga., to Manchester, N. H., found unreasonable as compared with lower rates from various other points in the Southeast in the same general territory as Savannah, to same destination, and to extent it exceeded lower rate from Jacksonville, a farther distant point. Subsequent to movement carriers accorded Savannah the same rate as applied from Jacksonville. Reparation awarded. McElwain Co. v. S. & A. Ry., 101 I. C. C. 359.

(9n) Rates on cereal beverages from Milwaukee to Emporia, Kans., found not unreasonable or unduly prejudicial as compared with contemporaneous rates on like traffic from same point of origin to other destinations and from and to other points for comparable distances, or with lower rates established subsequent to movement. Emporia Wholesale Coffee Co. v. A., T. & S. F., 101 I. C. C. 391.

(9o) Class rates from Duluth, and related points taking same rates, to Watertown, S. Dak., found unreasonable to extent they exceed specific rates enumerated herein, and unduly prejudicial to Watertown and unduly preferential of Sioux Falls and Aberdeen, S. Dak., to extent they exceed rates reflecting a certain relationship to the contemporaneous rates from Duluth to Sioux Falls and Aberdeen. Reasonable maximum and nonprejudicial basis of rates from Duluth and related points taking same rates and Sioux Falls and Aberdeen to Watertown prescribed. Watertown Chamber of Commerce v. A. & W., 101 I. C. C. 427, 432.

(9p) Fifth-class rates on condensed milk from Northfield, Minn. to eastern destinations found not unreasonable or unduly prejudicial as compared with lower commodity rates contemporaneously in effect from points in Wisconsin to same destinations. Canned Goods to Eastern Points, 101 I. C. C. 502, 511.

(9q) Rates on crude sulphur from Baltimore, to Detroit, Mich., found not unreasonable or unduly prejudicial as compared with contemporaneous rates on like traffic from same and other points of origin to same and other destinations for comparable distances. Detroit Chemical Works v. C. R. R. Co., 101 I. C. C. 671.

(9r) Commodity rates assessed on shipments of handle material, sawed square, rived, or split from the bolt, not further finished, from Marengo and Corydon, Ind., to Chicago Heights, Ill., found not unreasonable as compared with lower rates on same commodity, contemporaneously in effect from various points in same general territory to Chicago Heights. Chicago Heights Mfrs. Asso. v. B. & O. C. T. R. R., 101 I. C. C. 675, 679, 681.

(9s) Rates on carbon black from Monroe, La., gas district to Chattanooga Tenn., found unreasonable to extent they exceeded lower contemporaneous rates on like traffic from same point of origin to Louisville, Lexington, and Danville, Ky., farther distant points. Reasonable rates prescribed for future and reparation awarded. Lookout Paint Mfg. Co. v. M. P., 101 I. C. C. 691.

(9t) Rate on coal from complainant's mine at Mabie, W. Va., on the Coalton branch of the B. & O., to Port Covington (Baltimore), found unreasonable and unduly prejudicial to extent it exceeded the rate contemporaneously in effect from Mabie mine No. 6, a farther distant competing mine, to which complainant's mine was intermediate. Applicable tariff carried reference to rule 77 of Tariff Circular 18-A that upon reasonable request rates which would not exceed those in effect from or to more distant points would be established from or to intermediate points on one day's notice. Complainant made request for establishment of such rates but was refused. Reparation awarded. Brady v. B. & O., 102 I. C. C. 19, 25, 26.

(9u) Rates on paving and roofing materials from New Orleans to Texas common-point group and all other points in that portion of Texas lying between these points and the port group, and related points, found unduly prejudicial and unreasonable to extent they exceeded lower contemporaneous class E rates applicable on roofing slate, paving slate and hard asbestos shingles from and to same points; and on similar articles from New Orleans to points in Texas differential territory to extent they exceeded abovementioned rates, plus class E differentials. Reasonable rates prescribed for future and reparation awarded. Cameron & Co. v. A. & S., 102 I. C. C. 31.

(9v) Rate on coal from mines in western Kentucky on the L. & N. to Franklin, Tenn., found unreasonable to extent it exceeded lower specific rate under which the yield of ton-mile earn-

ings compare favorably with those yielded under contemporaneous rate on like traffic from same mines to Nashville. Reparation awarded. Lillie Mill Co. v. L. & N., 102 I. C. C. 67.

(9w) Rate on sand from, Roff, Okla., to Fort Smith, Ark., found unreasonable and unduly prejudicial to extent it exceeded and exceeds lower contemporaneous rates on like traffic from and to points in same general territory for comparable distances. Reasonable and nonprejudicial rate prescribed for future and reparation awarded. Harding Glass Co. v. St. L.-S. F., 102 I. C. C. 126.

(9x) Class and commodity rates from Jackson, Miss., to destinations in Louisiana west of Mississippi River and southern Arkansas, found unjust, unreasonable, and unduly prejudicial to Jackson and its shippers and unduly preferential of shippers at New Orleans, Memphis, and Natchez, to extent they exceeded rates for like distances between points west of Mississippi River herein prescribed, plus charges for Mississippi River crossings prescribed in 93 I. C. C. 463. Reasonable and nonprejudicial rates prescribed. Jackson Traffic Bureau v. A. & V., 102 I. C. C. 129.

(9y) Rate on printing paper from Lawrence, Mass., to Long Island City, N. Y., found unreasonable and inapplicable to extent it exceeded sixth-class rate contemporaneously in effect. Printing paper with few exceptions moves at sixth class throughout official classification territory, and that basis of rates was approved in 38 I. C. C. 120. Reparation awarded and maximum reasonable rate prescribed. Merrimac Paper Co. v. B. & M., 102 I. C. C. 133.

(9z) Rates on green coffee from New Orleans, La., and Galveston, Tex., to Oklahoma City and Enid, Okla., found unreasonable as compared with rates from the Gulf ports to other points in the Southwest, and with rates prescribed in 92 I. C. C. 14, for comparable distances. Reparation awarded. Alton Mercantile Co. v. A. G. S., 102 I. C. C. 146.

(10a) Combination rate to and from Perryville Junction, Mo., assessed on gasoline moving from Cushing, Okla., to Perryville, Mo., on the Cape Girardeau Northern Ry., found unreasonable as compared with lower rate contemporaneously in effect to the junction point and numerous other points in southeastern Missouri. Reasonable rates prescribed for the future and reparation awarded. Illinois Oil Co. v. C. G. N., 102 I. C. C. 154.

(10b) Rates on scrap iron or steel and secondhand rails from Colorado points to points in certain other States, found not unreasonable or otherwise unlawful. Taken as a whole, such rates are not out of line with rates on the same or similar commodities moving in same general territory. Denver Metal & Machinery Co. v. A., T. & S. F., 102 I. C. C. 255.

(10c) Rates on slack coal from Bevier, Mo., Pittsburgh, Kans., and Henryetta, Okla., to Superior, Nebr., found unreasonable to extent they exceeded specific rates named herein, which are fixed in their relationship to and in comparison with contemporaneous rates on like traffic from same points of origin to Omaha and Lincoln, Nebr., and from and to other points for comparable distances. Reasonable rates prescribed for future. Nebraska Cement Co. v. A., T. & S. F., 102 I. C. C. 265.

(10d) Rate on coal from certain mines in the Illinois group to Hoopeston, Ill., over an interstate route, found not unreasonable or unduly prejudicial in their relation to the rates from same origin points to Chicago, Ill., and Indianapolis and Vincennes, Ind. While complainants are entitled to reasonable rates, in considering the level, their relationship from other Illinois group points and rates from other groups in the same general territory of which they are a part, can not be ignored. Conditions affecting rates to Chicago are not comparable with those affecting rates to Hoopeston, and the record does not justify condemnation of the rate from the southern Illinois group to Hoopeston or application to that point of lower rates from points of origin named than those from the group. Hoopeston Grain & Coal Co. v. C. & E. I., 102 I. C. C. 269.

(10e) Proposed readjustment of rates on grain and grain products, and seed and seed products, from points in Colorado, Kansas, Nebraska, Missouri, and Oklahoma to the lower Mississippi River crossings, and to points in Mississippi Valley, resulting in both decreases and increases, the latter predominating, found not justified. Present rates compare more favorably than those proposed with rates on like traffic prescribed between points in Oklahoma and Arkansas in 80 I. C. C. 607, and between points in Oklahoma and Texas prescribed in 101

I. C. C. 116. Kansas City Board of Trade v. A. & W. Ry., 102 I. C. C. 285, 304.

(10f) Rate on sulphuric acid from, New Orleans, La., to Houston and Manchester, Tex., found not unreasonable as compared with contemporaneous rates on like traffic from and to other points in same general territory for comparable distances and with rates for corresponding distances from and to a number of points in southwestern territory. Armour Fertilizer Works v. M. L. & T. R. R. & S. S. Co., 102 I. C. C. 350.

(10g) Upon reargument, original report, 95 I. C. C. 66, finding rate on newsprint paper from Thorold, Ontario, Canada, to New York unreasonable, affirmed without modification, relying mainly upon comparison of such rate with contemporaneous rate on like traffic from Niagara Falls to same destination. Ontario Paper Co. v. C. N. Rys., 102 I. C. C. 365.

(10h) Rates on automobiles and automobile parts from eastern defined territories to all points on Northwestern Pacific R. R. north of Willits, Calif., found unjust, unreasonable, and unduly prejudicial to extent they exceed lower contemporaneous rates on like traffic from same territory to California coast-group points. Reasonable and nonprejudicial rates prescribed and reparation awarded. Eriksen v. A. A. R. R., 102 I. C. C. 374.

(10i) Rates on bituminous coal from Pittsburgh-Youghiogheny, West Virginia, Meyersdale, Cumberland-Piedmont, and Clearfield coal regions to, Union Bridge, Md., found not unreasonable as compared with lower contemporaneous rates on like traffic from same points of origin to Security, Md., and rates from same points of origin to other destinations for comparable distances. Tidewater Portland Cement Co. v. C. & P. R. R., 102 I. C. C. 391.

(10j) Rates on crushed gypsum rock found unreasonable and unduly prejudicial as compared with lower contemporaneous rates on crushed stone. Reparation awarded. Nebraska Cement Co. v. M. P. R. R., 102 I. C. C. 411.

(10k) Rates on metal beds from. New Orleans, La., to southern territory found not unduly prejudicial as compared with contemporaneous rates on like traffic from Atlanta, Chicago, and Kenosha, Wis., distance considered. Crescent Bed Co. v. A. & V. Ry., 102 I. C. C. 419.

(10l) Rate assessed on sand from LaFayette, Ind., to Manteno, Ill., found not unreasonable, discriminatory or unduly prejudicial as compared with lower contemporaneous rate on like traffic from LaFayette to Chicago, to which Manteno is intermediate over route of movement, but in violation of long-and-short-haul provision of section 4 of the act. Shanks & Gannon Co. v. C., C., C. & St. L., 102 I. C. C. 462.

(10m) Rates on clean rice from, Memphis, Tenn., to Canadian destinations found not unreasonable as compared with lower rates from New Orleans, and other farther-distant producing points. Such rates, however found to violate long-and-short haul provision of section 4 of the act. Memphis Frt. Bureau v. A. A. R. R., 102 I. C. C. 489.

(10n) Rates on anthracite bird's-eye coal from group mines in Pennsylvania to Ondawa, N. Y., found unreasonable to extent they exceed contemporaneous rates on like traffic from same points of origin to Thomson, N. Y. United Paperboard Co. v. G. & J. Ry., 102 I. C. C. 502.

(10o) Upon further argument finding in original report. 64 I. C. C. 507, that rate on limerock from Flint, Calif., to Tolenas, Calif., during Federal control, was not unreasonable as compared with lower rates between other intrastate points for similar and greater distances as circumstances and conditions attendant upon transportation from Flint to Tolenas is substantially dissimilar from those obtained from and to such other points, affirmed. Pacific Portland Cement Co. v. Director General, 102 I. C. C. 515.

(10p) Rates on gasoline and kerosene from Fort Worth and Hodge, Tex., to Gastonia, N. C., found not unreasonable as compared with contemporaneous rates on like traffic from same points of origin to other destinations in same general territory for comparable distances. While such rates are relatively higher, distance considered, than rates to other territories, it can not be said upon the record here that they are greatly out of line with the rates to Carolina territory as a whole. Piedmont Oil Co. v. A. & V. Ry., 102 I. C. C. 583.

(10q) Rates on lumber from Golden, Miss., group points to St. Louis and Buffalo-Pittsburgh territories found not unreasonable or unduly prejudicial as compared with lower contemporaneous rates

on like traffic from Corinth, Miss., and other points in same general territory to same destination territories and rates from and to a number of other points for comparable distances. Northeast Mississippi Traffic Bureau v. A. & V. Ry., 102 I. C. C. 611.

(10r) Rates on cabbage and strawberries, in straight carloads, and on cabbage and beans, in mixed carloads, from points in Kentucky, Tennessee, and Alabama to Logansport, found not unreasonable but unduly prejudicial to extent they exceeded rates contemporaneously in effect to Fort Wayne or South Bend, Ind. Reparation denied. Caruso & Co. v. C. & E. I., 102 I. C. C. 619.

(10s) Combination rate on crushed slate from Delta, Pa., via Buffalo, to Lockport, N. Y., a Buffalo rate point, found unreasonable to extent it exceeded lower contemporaneous rate from Delta to Buffalo, and reparation awarded. Present lower rate found not unreasonable or otherwise unlawful as compared with rates on like traffic from Delta to other destinations and from and to other points for comparable distances. Lockport Paper Co. v. M. & P. R. R., 102 I. C. C. 624.

(10t) Following 81 I. C. C. 227 and other cases cited, class rates on built-up wood, faced with veneer made from foreign woods, from Louisville, Ky., and New Albany and Evansville, Ind., to, Memphis, Tenn., found not unreasonable as compared with contemporaneous rates on like traffic from and to other points for comparable distances. King-Haase Furniture Co. v. B. & O., 102 I. C. C. 629.

(10u) Rates on lumber from Jonesville, La., to Loudon, Greeneville, and Cleveland, Tenn., and Thomasville and High point, N. C., found not unreasonable as compared with contemporaneous rates on like traffic from Jonesville to other destinations and from and to other points for comparable distances. Southern Lbr. Co. v. L. & A. Ry., 102 I. C. C. 633.

(10v) Rates on apples from Clearbrook, Va., to Jonesboro, Ark., found unreasonable to extent it exceeded lower rate contemporaneously in effect to Jonesboro from other Virginia points for average haul approximately same as from Clearbrook. Reparation awarded. Wimberly Grocer Co. v. P. R. R., 102 I. C. C. 637.

(10w) Class rates applied on potatoes from Naples and Lilly, S. Dak., to points in Iowa found unreasonable to extent they exceeded commodity rates contemporaneously in effect from other points in group in which Naples and Lilly are located and as compared with lower rates in effect from and to other points in same general territory. Reasonable rates prescribed and reparation awarded. Naples Potato Growers Asso. v. C., M. & St. P., 102 I. C. C. 649.

(10x) It can not be fairly assumed that rates on a particular commodity from competing points to a common destination should necessarily bear the same relationship to each other as the class rates from same points. Washington Publishers' Asso. v. B. & O., 102 I. C. C. 662, 663.

(10y) Rates on fiberboard and pulpboard from New Iberia, La., to, Lovefield, Tex., found unreasonable to extent they exceeded lower contemporaneous rate on like traffic from New Iberia to Dallas, of which Lovefield is a suburb, which lower rate was established to Lovefield subsequent to movements here involved. Reparation awarded. Boldt Paper Mills Co. v. N. I. & N. R. R., 102 I. C. C. 682.

(10z) Proposal to readjust rates on petroleum and products from St. Louis and Wood River district points to southern destinations over or in connection with B. & O. or C., C., C. & St. L., comprising some increases but more and greater reductions, found justified. Proposed schedules will result in rates same as those now in effect over routes other than B. & O. and C., C., C. & St. L. Petroleum to Southern Points, 102 I. C. C. 756.

§29. Reproduction Value of Road.

See Evidence §49.

ALL CITATIONS

Utah Gilsonite Co. v. A. T. & S. F. Ry. Co., 85 I. C. C. 557.

§30½. Risk.

See Evidence §52.

(a) In establishing reasonable rates value of commodity to be rated and its liability to damage incident to transportation must be considered. Jackson Traffic Bureau v. B. & O., 93 I. C. C. 342, 343.

(b) Claim hazard is but one of many elements to be considered in determining reasonableness of a rate. See 87 I. C. C. 711. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 743.

§32½. Subsequent Reduction.

See Commodity Rates §4; Evidence §64; Reparation §16.

(a) The subsequent publication of a commodity rate is not sufficient ground in the absence of other proof for finding that the rates charged were unreasonable. Garcia Sugar Corporation v. N. Y. C. R. R., 92 I. C. C. 239, 241.

(b) The fact that the rate attacked may have been published in error and the subsequent reduction thereof do not necessarily demonstrate unreasonableness. Denver Alfalfa Products Co. v. Director General, 92 I. C. C. 326, 327.

(c) Complainant attacked commodity rates charged on cars of concrete pipe or drain tile shipped from Knoxville, Tenn., to South Carolina between July 1920 and November 1921 as unreasonable, unjustly discriminatory and unduly preferential of Birmingham, Ala., and Chattanooga, Tenn. Charged at rates ranging from 16 to 31.5c which were the same as those concurrently in effect to the same destinations from Chattanooga and Birmingham, except to Oakley, S. C., to which a rate of 31.5c applied from Knoxville, and 27.5c from Chattanooga and Birmingham. The 27.5c rate was subsequently made applicable from Knoxville. Knoxville, Chattanooga and Birmingham, as well as Rome, Ga., are grouped as to rates on concrete sewer pipe to points in South Carolina on and north of a line drawn from Walhalla in western South Carolina, through Seneca, Anderson, Abbeyville, Columbia, Sumter and Florence, thence to Wilmington, N. C. The points of destination are all on or north of the line except Oakley, to which higher rates applied prior to July 10, 1920 than from Chattanooga, Birmingham and Rome. HELD, rates attacked except to Oakley not unreasonable, unjustly discriminatory or unduly prejudicial; rate attacked to Oakley unreasonable to extent it exceeded rates from Chattanooga, reparation awarded. Shearman Concrete Co. v. Southern Ry., 93 I. C. C. 179.

(defg) Complainant attacked commodity rate charged on one car of peaches shipped May 31, 1922 from Fort Valley Ga., to Watuppa, Mass., as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of fourth section. Shipment moved via C. of Ga., A. C. L., R. F. & P., Pennsylvania, N. Y. N. H. & H., 1,220 miles, charged commodity rate of $1.58. On June 3, 1922 three days after the shipment moved, a rate of $1.355 became effective. A rate of $1.47 was in effect at the time of movement from Eufaula, Ala., a point to which Fort Valley is directly intermediate over the route of movement. The reduction in the rate from Fort Valley to Watuppa on June 3, 1922 was part of a voluntary general reduction in the rates from Georgia to New England points. It can not be regarded as implying any admission on the part of defendants that the prior rate was unreasonable. HELD, rate attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Gentile Bros. v. C. of Ga. Ry., 93 I. C. C. 328.

(h) Complainant attacked commodity rates charged on oranges carloads from

Silver Hill, Foley, Loxley, Bay Minette, Irvington and Grand Bay, Ala., to destinations in central and western territories as unreasonable. Bay Minette is north and Irvington and Grand Bay are south of Mobile, Ala., on the L. & N., between New Orleans, La., and Dlomaton, Ala. Loxley, Silver Hill and Foley are on a branch line of that defendant which extends south from Bay Minette. Rates charged from Bay Minette, Irvington and Grand Bay to Lincoln, Omaha, Sioux City and Minneapolis were made by combinations on Mobile, and from Loxely, Silver Hill and Foley combinations on New Orleans. Other rates charged were joint commodity rates. Reduced rates were established Dec. 26, 1923. HELD, rates attacked exceeded those subsequently established, unreasonable, reparation awarded. Gulf Coast Citrus Exchange v. L. & N. R. R., 93 I. C. C. 432.

(i) The voluntary reduction of a rate does not establish the unreasonableness of the former rate. Vossler Company v. E. J. & E. Ry., 96 I. C. C. 75, 76.

(j) The mere reduction of a rate by the carriers voluntarily is insufficient to prove that the former higher rate was unreasonable. Northwest Potato Exchange v. G. N. Ry., 96 I. C. C. 187, 190.

(k) The mere fact of a voluntary reduction is not sufficient evidence to establish that the rate prior to the reduction was unreasonable, but it is evidence to be considered along with other proof. Bryant v. P. R. R., 96 I. C. C. 564, 566.

(l) Complainant attacked commodity rate charged on 18 cars of petroleum products shipped between July 24, 1918 and Sept. 18, 1919 from Greybull, Wyo., to Belgrade, Mont., as unjust, unreasonable and unduly prejudicial to extent it exceeded rates subsequently established. Shipments were routed Burlington, Laurel, Mont., N. P., Lombard, Mont., Milwaukee beyond 323.3 miles, rate applicable 75.5c made up of a commodity rate of 64.5c to Belgrade Junction plus the minimum fifth class distance rate of 11c beyond. At the time these shipments moved, a joint commodity rate of 64.5c was in effect from Greybull to practically every other destination in Montana and northern Idaho, on the Milwaukee, including destinations on the Gallatin Valley branch. The rate of 64.5c was finally published to Belgrade on Oct. 15, 1919 but was made to apply over the short route via Bozeman instead of the Lombard route, over which rates to other destinations on the Gallatin Valley applied. HELD, rate charged unreasonable to extent it exceeded 64.5c reparation awarded. Continental Oil Co. v. Director General, 98 I. C. C. 544.

(m) Combination rate on coke from Everett (East Boston), Mass., to Auburn, R. I., found not unreasonable as compared with lower joint rate subsequently established. Complainant introduced no evidence bearing upon unreasonableness, but relied solely upon subsequent reduction brought about through a readjustment of rates involving both increases and reductions. General Fire Extinguisher Co. v. Director General, 91 I. C. C. 13.

(n) Rate on monochlorobenzol from Kingsport, Tenn., to Carney's Point, N. J., found unreasonable to extent it exceeded rate contemporaneously in effect to New York, N. Y., which lower rate was subsequently established to Carney's Point. For many years Carney's Point has been treated as a New York rate point taking flat New York rate on all traffic moving to and from the South. Reparation awarded. DuPont De Nemours & Co. v. Director General, 91 I. C. C. 15.

(o) Upon further hearing, original report 73 I. C. C. 292, commodity rates on apples from Yakima and Zillah, Wash., and Nampa, Idaho, to Bisbee and Douglas, Ariz., found unreasonable to extent they exceeded rates equivalent to contemporaneous class C rates, to which basis commodity rates were subsequently reduced. Melczer Co., 78 I. C. C. 319 and other cases cited. Reparation awarded. Douglas Chamber of Commerce v. Director General, 91 I. C. C. 354.

(p) Voluntary reduction of a rate by carriers does not, of itself, prove that the rate previously in effect was unreasonable. Macbeth-Evans Glass Co. v. B. & O. R. R. Co., 91 I. C. C. 758, 760.

(q) Rates on manure from Keyton, Ala., to Quincy and Mount Pleasant, Fla., found unreasonable to extent they exceeded lower rates subsequently established. Reparation denied as complainant's right to reparation not shown. Wedeles Tobacco Co. v. Director General, 92 I. C. C. 80.

(r) Reduction of a rate by a carrier to meet lower rate of other lines does not warrant a finding that prior rate was unreasonable. Smythe Co. v. C. S. S. Co., 92 I. C. C. 95, 96.

(s) Rate on cullet (broken glass) from Memphis, Tenn., to Sapulpa, Okla., found not unreasonable as compared with lower rate subsequently established, result of which was to place Memphis on a parity with Fort Smith, Ark., and St. Louis, Mo., with rates on other low-grade commodities between other points in same general territory for similar distances, or with rate approved by commission on junk, including broken glass, in 77 I. C. C. 473, for distances identical with that here involved. Liberty Glass Co. v. St. L.-S. F., 92 I. C. C. 199.

(t) Rates on coal, dead and dead slack found unreasonable to extent they exceeded those contemporaneously in effect on slack coal, which lower rates were subsequently made applicable to dead coal and dead slack. Reparation awarded. Athletic Mining & Smelting Co. v. A. C. R. R., 92 I. C. C. 233.

(u) Rates on liquid asphalt, in tank-car loads, from Port Arthur and Port Neches, Tex., to West Monroe, La., found not unreasonable as compared with lower rate subsequently established for purpose of equalizing those rates with others applicable between points in same general territory. Moreover, rates charged were shown to reflect lower percentage relationships to class D rates than those prescribed by commission on a number of low-grade commodities in Natchez Chamber of Commerce, 58 I. C. C. 610. Deas Co. v. K. C. S., 92 I. C. C. 256.

(v) Subsequent reduction of a rate by carriers does not necessarily demonstrate unreasonableness in the rate formerly in effect. Denver Alfalfa Porducts Co. v. Director General, 92 I. C. C. 326, 327.

(wx) Rates charged on sand and gravel from Winona, Minn., to Viroqua, Wis., found not unreasonable, but applicable rates found unreasonable as compared with rates on same commodities from Winona to various other points for similar distances, and with rates produced by distance scales prescribed by state commissions of Iowa, Minnesota, and Wisconsin for intrastate application. Waiver of undercharges authorized. Campbell Construction Co. v. L. C. & S. E. Ry., 93 I. C. C. 99.

(y) Rate on wrapping paper from International Falls to Chicago, found unreasonable to extent that factor up to Duluth exceeded rate prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571, from Fox River group to Chicago. Reparation awarded. Seaman Paper Co. v. Director General, 93 I. C. C. 139.

(z) Subsequent reduction of a rate is insufficient to establish unreasonableness of preexisting rate. General Chemical Co. v. Director General, 93 I. C. C. 193, 194.

(aa) Rate on crude and fuel oils, in tank cars, from Gainesville, Tex., to Miami, Ariz., found not unreasonable as compared with lower rate subsequently established from south Texas points, which rate was later extended to Gainesville, and other north Texas points. Mere fact that a shipper at some other point may have obtained a reduction in his rate prior to date complainant obtained a like reduction does not prove that rate paid by complainant was unreasonable. Miami Copper Co. v. A. E. R. R., 93 I. C. C. 221.

(bb) Mere fact that shipper at some other point may have obtained a reduction in his rate prior to date complainant obtained a like reduction does not prove that rate paid by complainant was unreasonable. Wofford Oil Co. 66 I. C. C. 509. Miami Copper Co. v. A. E. R. R., 93 I. C. C. 221, 222.

(cc) Fact that a rate was subsequently reduced does not of itself support a finding that higher rate formerly in effect was unreasonable. Universal Oil Co. v. Director General, 93 I. C C. 237, 240.

(dd) Rates on cucumbers in brine, in bulk in barrels, and in tank cars, from Blytheville, Ark., to Omaha, found unreasonable to extent they exceeded lower rate subsequently established, which lower rate was the same as that applicable from Colorado common points to Missouri River points. Reasonable rates for the future prescribed and reparation awarded. Haarmann Vinegar & Pickle Co. v. C., B. & Q., 93 I. C. C. 251.

(ee) Rates on rice bran from Wheatley Ark., to Jackson and Meridian found unreasonable to extent they exceeded lower rates contemporaneously in effect to New Orleans and other Louisiana points. Reasonable rates for future prescribed and reparation awarded. Jackson Traffic Bureau v. A. & V., 93 I. C. C. 322.

(ff) Rates on sand from Turner, Kans., to Galloway and Cassidy, Mo. found not unreasonable as compared with lower rates from Kansas City, which lower rates subsequently applied from Turner. The subsequent reduction in rates assailed does not establish their unreasonableness. Kaw River Sand & Material Co. v. Director General, 93 I. C. C. 346.

(gg) Subsequent reduction of a rate does not establish unreasonableness of rate previously in effect. Kaw River Sand & Material Co. v. Director General, 93 I. C. C. 346, 347.

(hh) Rate on wheat from points in Nebraska to Great Falls, Mont., during Federal control, found not unreasonable as compared with lower rate subsequently established by director general to relieve drought conditions. Complainant enjoyed full use of the lower rate until it expired by limitation and record is not convincing that commission would have ordered its establishment, as reasonable, if formal complaint had been filed. Moreover, fact that lower rate was not established until after some of complainant's shipments had moved does not change the situation. Royal Milling Co. v. Director General, 93 I. C. C. 377.

(ii) Fact that rate somewhat lower than rate charged was prescribed by commission for future does not necessarily show that former rate was unreasonable. Especially is this so where the new rate is part of an extensive readjustment. News Corp. v. M. P., 93 I. C. C. 381, 383.

(jj) Rates assessed on oranges from points in California, to Virginia, Minn., found inapplicable and applicable rates, based upon combinations of blanket rate to Duluth and third-class rate beyond found unreasonable to extent they exceeded transcontinental Group F rates contemporaneously in effect to Duluth. Reparation awarded. Hansen-Peterson Co. v. A., T. & S. F., 93 I. C. C. 596.

(kk) Rate applicable on gasoline and kerosene, in tank-car loads, from Tulsa, Okla., to Clayton, N. Mex., via Pueblo, found unreasonable as compared with lower rates from other points to Clayton and Cheyenne, Wyo., for comparable distances, and to extent they exceeded lower rates contemporaneously in effect from Tulsa to Clayton via routes other than route of movement. Reparation awarded. Texas Co. v. A., T. & S. F., 93 I. C. C. 691.

(ll) Rate on strawberries from Castleberry, Ala., to Mansfield, Ohio, found unreasonable to extent it exceeded lower rate contemporaneously in effect to Buffalo, Detroit, Cleveland, and Sandusky, farther distant points to which Mansfield is intermediate, such lower rate having been established to Mansfield subsequent to movement here involved. Reparation awarded. Lee Farms Co. v. L. & N., 93 I. C. C. 699.

(mm) Rate on sporadic shipments of ferromanganese from Seattle, Wash., to Minnequa, Colo., found unreasonable as compared with lower rate established subsequent to movement, request therefor having been made prior thereto. Comparisons were submitted showing rates and earnings on this commodity from Pacific, Atlantic, and Gulf ports to consuming territories, also with rates on other raw materials used in the manufacture of steel. Defendant, however, pointed out that the ferromanganese rate was originally established to enable California producers to compete at the Atlantic seaboard with foreign producers, similar conditions not being shown to exist with respect to rates on the other raw materials. Defendant further referred to rates on various commodities which for similar distances yielded earnings in excess of those under the rate assailed. Bush v. Director General, 95 I. C. C. 661.

(nn) Neither assurance by a carrier that a rate will be reduced nor its actual reduction is proof that applicable unreduced rate is unreasonable. Bush v. Director General, 95 I. C. C. 661, 663.

(oo) Rates on apples from Charles Town, W. Va., to Williamson, W. Va., over an interstate route, on kale, in carloads and less than carloads, from Norfolk, Va., and on potatoes and cabbage from Norfolk and Suffolk, Va., to Williamson found to have been unreasonable to the extent they exceeded rates subsequently established. Reparation awarded. Amicon Fruit Co. v. N. & W. Ry. Co., 96 I. C. C. 477.

(pp) The mere fact of a voluntary reduction in rates is not sufficient evidence to establish that the rate prior to the reduction was unreasonable, but it is evidence to be considered along with other proof. Indiana State Chamber of Commerce v. A. T. & S. F. Ry. Co., 96 I. C. C. 485, 566.

(qq) Rate on gravel from Melvin, Minn., to Grand Forks, N. Dak., found

unreasonable to extent it exceeded the rate subsequently established between the same points. In another formal docket considered herewith the commission prescribed a distance scale and although a request for rates for the future is not made by complainant in this case, defendant should in the future apply the basis of rates found in that scale to be just and reasonable for this distance for application to movement in the territory in which these points are located and avoid the filing of a further formal complaint to obtain the same result. Reparation awarded. Hopeman Material Co. v. N. P. Ry. Co., 98 I. C. C. 361, 373.

(rr) Rate on sand from Portsmouth, Ohio, to Charleston, W. Va, found unreasonable to extent it exceeded lower rate subsequently established on same commodity from and to same points. Reparation awarded. Fuller Co. v. Director General, 98 I. C. C. 468.

(ss) Rates on cement plaster from Plasterco, Plasterco Junction, and Hamlin, Tex., to destinations in Alabama, Florida, Georgia, Kentucky, Mississippi, and Tennessee, from and after July 1, 1922, found unreasonable to extent they exceeded by more than 20 per cent rates in effect August 25, 1920. Reparation awarded. Texas Cement-Plaster Co. v. A. & M. R. R. Co., 98 I. C. C. 519.

(tt) The commission has repeatedly found that the existence of a lower rate over other routes and the subsequent reduction to that basis of the rate over a particular route of movement are not sufficient in themselves to establish the unreasonableness of the previous rate. Mauk Lumber Co. v. Director General, 98 I. C. C. 599, 600.

(uu) The fact that the rate charged was subsequently reduced does not of itself demonstrate unreasonableness. The reductions accompanied a general readjustment of commodity rates in certain portions of the Southwest, involving both increases and reductions. Under similar circumstances the Commission has repeatedly declined to give retroactive effect to such rates as a basis for an award of reparation. Cairo Cotton Oil Mill v. M. & O. R. R. 107 I. C. C. 299, 302.

(vv) An increase of 400% almost immediately followed by a material reduction and latter followed by a further reduction, creates a presumption of unreasonableness which the record fails to rebut. Mitsui & Company v. Director General, 107 I. C. C. 469, 471.

(ww) Rate charged on two carloads of grapefruit from Largo, Fla., to Seattle, Wash., during period of Federal control, found unreasonable to extent it exceeded lower rates previously and subsequently in effect. Reparation awarded. Ryan Fruit Co. v. Director General, 100 I. C. C. 237.

(xx) In numerous cases commission has found that a voluntary reduction of a rate does not of itself establish that the previous higher rate was unreasonable. Moore Lawless Grain Co. v. M. P. R. R. Co., 100 I. C. C. 303, 306.

(yy) The existence of a lower rate to near-by points and subsequent establishment of that rate to Cleveland, do not of themselves establish unreasonableness of rate charged. Rosenblum, 43 I. C. C. 67; Empire Cotton Oil Co., 64 I. C. C. 71. Glidden Co. v. E. R. R. Co., 100 I. C. C. 331, 332.

(zz) Rates on bituminous coal from mines in Kentucky, Virginia, and West Virginia to Clairton, Pa., found not to have been unreasonable as compared with lower rate established subsequent to movement. Carnegie Steel Co. v. P. R. R. Co., 100 I. C. C. 353.

(3a) Rates on bituminous coal from Folks and Narva, Ohio, to Munhall, Pa., found to have been unreasonable to extent they exceeded lower rates subsequently established based on a differential over the rates to Pittsburgh, Pa. Reasonable rates prescribed for future and reparation awarded. Carnegie Steel Co. v. P. R. R. Co., 100 I. C. C. 353.

(3b) Rates on doors from Pacific coast points to Memphis, Tenn., found not unreasonable as compared with lower rate subsequently established. Memphis Freight Bureau v. C. & E. I., 101 I. C. C. 26.

(3c) Subsequent reduction in the rate charged does not necessarily demonstrate unreasonableness. Sheffield Iron Corp. v. Director General, 101 I. C. C. 31, 32.

(3d) Rate on a mixed carload of beets, carrots, turnips, and cabbage from San Fernado, Calif., to St. Paul, Minn., applicable on fresh or green vegetables, found unreasonable to extent it exceeded

lower contemporaneous rate on beets, carrots, and turnips, in mixed carloads, and on cabbage, in straight carloads, which latter rate was subsequently reduced and made applicable on beets, carrots, turnips, in bags, and cabbage, in crates, in mixed carloads. Reparation awarded. August Ammon v. S. P. Co., 101 I. C. C. 37.

(3e) Applicable rate on cereal beverages from Duluth, Minn., to Greenland, Mich., found unreasonable to extent it exceeded lower commodity rate subsequently established. Reparation awarded. Fitger Co. v. Copper Range, 101 I. C. C. 87.

(3f) Rate on scrap iron from Barksdale, Wis., to Duluth, Minn., found unreasonable to extent it exceeded lower rate subsequently established. Reparation awarded. West End Scrap Iron & Metal Co. v. C., St. P., M. & O., 101 I. C. C. 108.

(3g) No evidence was introduced to establish complainant's contention that the rate charged on a carload of sugar from San Francisco, Calif., to Leadville, Colo., was unreasonable or otherwise unlawful, except the mere subsequent establishment of a lower rate over route of movement. Rates can not be condemned upon admissions of unreasonableness of the character made in this case, nor can reparation be authorized unless it is shown that the act has been violated. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113, 115.

(3h) Subsequent establishment of a lower rate at request of a shipper can not be taken as an admission that the former rate was unreasonable. Consolidated Lbr. Co. v. Director General, 101 I. C. C. 284.

(3i) Combination rates on mine-run coal from Coil and Sunset Mine, Ky., to Boone Terre, Rivermines, and Leadwood, Mo., found unreasonable to extent they exceeded a joint rate subsequently established. Due to a miners' strike, carriers, in order to move traffic and relieve or avoid congestion, assured complainant that they would establish a joint rate if he would allow shipments to go forward. Complainant would not have permitted shipments to move prior to publication of the joint rate but for representations of carriers that it would get the benefit of that rate inasmuch as it could have availed itself of a lower combination rate via another route. Reparation awarded. St. Joseph Lead Co. v. L. & N., 101 I. C. C. 352.

(3j) Class rate on scrap iron moving from Dunbar, W. Va., via an interstate route to Weirton, W. Va., found unreasonable to extent it exceeded a commodity rate subsequently established. As Weirton was not a scrap-iron consuming point until about a year prior to period of movement of shipments, commodity rates generally had not been published to that point, but before making these shipments complainant requested establishment of commodity rate which applied from Dunbar to Wheeling, W. Va., and Steubenville, Ohio. The request was acted upon but due to delay in establishment of rates shipments were made prior thereto in order to supply demands of customers. Reparation awarded. Hilb & Bauer v. N. Y. C., 101 I. C. C. 621.

(3k) Rate on cowpeas from Navojoa, Sonora, Mexico, to San Francisco, found unreasonable to extent it exceeded lower rate on peas, Mexican (garbanzo), which lower rate was established on cowpeas subsequent to movement. Reparation awarded. Lewis-Simas-Jones Co. v. S. P., 102 I. C. C. 245.

(3l) Rates on paper and products from Hamilton, West Carrollton, and Miamisburg, Ohio, and Chicago, Ill., to Dallas, Tex., found unreasonable to extent they exceeded rates subsequently established. Complaint based upon fact that rates charged were out of line with contemporaneous rates from Wisconsin territory, the latter rates having been revised in conformity with decision in Minnesota & Ontario Paper Co., 66 I. C. C. 571, while related rates in issue remained in effect and were not revised until a later date and subsequent to movement. Reparation awarded. Butler Paper Co. v. C., I. & W. R. R., 102 I. C. C. 311.

(3m) Rates on paper and paper articles in mixed carloads from New Orleans to Dallas found unreasonable to extent they exceeded lower rates subsequently established. An analysis of revenues per car-mile under rates assailed shows such rates to be excessive. Reparation awarded. Palmer & Co. v. H. & T. C. R. R., 102 I. C. C. 372.

(3n) The principal that a voluntary reduction in a rate is not proof of unreasonableness of former rate has no application where an analysis of revenues per car-mile shows that such former rate was excessive. Palmer & Co. v. H. & T.

C. R. R., 102 I. C. C. 372, 373.

(3o) Fact that rate assailed was voluntarily reduced does not of itself demonstrate unreasonableness. Armour Fertilizer Works v. M. L. & T. R. R. & S. S. Co., 102 I. C. C. 350.; Eads Bros. Furniture Co. v. B. & O., 102 I. C. C. 381, 383.

(3p) Rates on sulphuric and muriatic acids from Grasseli, Ind., to Sioux City, Iowa, found not unreasonable as compared with lower rates subsequently established. Kennedy & Parsons Co. v. C. & N. W., 102 I. C. C. 591.

(3q) Rate on coke dust or breeze coke from Pittsburgh and points taking same rate to Moundsville, W. Va., found unreasonable to extent it exceeded lower rate contemporaneously applicable on refined zinc and zinc-smelter products between same points, which lower rate was established on coke dust or breeze coke subsequent to movement here involved. Reparation awarded. United Zinc Smelting Corp. v. P. R. R., 102 I. C. C. 601.

(3r) Combination rate on crushed slate from Delta, Pa., via Buffalo, to Lockport, N. Y., a Buffalo rate point, found unreasonable to extent it exceeded lower contemporaneous rate from Delta to Buffalo, and reparation awarded. Present lower rate found not unreasonable or otherwise unlawful as compared with rates on like traffic from Delta to other destinations and from and to other points for comparable distances. Lockport Paper Co. v. M. & P. R. R., 102 I. C. C. 624.

(3s) Fifth-class rate on ground calcined magnesite from Joliet, Ill., to Omaha, Nebr., found unreasonable to extent it exceeded lower class D rate subsequently established, and reparation awarded. Present class D rate found not unreasonable since earnings thereunder compare favorably with those under other class D rates applying on this commodity from Joliet to various Mississippi and Missouri River cities and contiguous points. Mineralite Stucco Corp. v. C., R. I. & P., 102 I. C. C. 654.

(3t) Rates on fiberboard and pulpboard from New Iberia, La., to Lovefield, Tex., found unreasonable to extent they exceeded lower contemporaneous rate on like traffic from New Iberia to Dallas, of which Lovefield is a suburb, which lower rate was established to Lovefield subsequent to movements here involved. Reparation awarded. Boldt Paper Mills Co. v. N. I. & N. R. R., 102 I. C. C. 682.

(3u) Rates assessed on horseshoes, toe calks, and parts, from Duluth to Rochester found unreasonable to extent they exceeded lower contemporaneous rates on like traffic from Steelton, Minn., located within Duluth switching limits, to same destination, which lower rate was subsequently established from Duluth. Reparation awarded. Diamond Calk & Horseshoe Co. v. N. P. Ry., 102 I. C. C. 701.

(3v) Rate on corn-sirup jelly and jelly and preserves in glass containers found unreasonable and unduly prejudicial to extent it exceeded lower contemporaneous rate on various kinds of canned goods in tin cans, including fruits, which lower rate was established on jelly and preserves, in both metal and glass containers, subsequent to movement here involved. Reparation awarded. Zaring & Co. v. C. S. Co., 102 I. C. C. 724.

C. 298;Grasselli Chemical Co. v. B. & O. R. R. Co., 88 I. C. C. 337; Sunderland Bros. Co. v. Director General, as Agent, 88 I. C. C. 585;

Republic Iron & Steel Co. v. Director General, as Agent, 88 I. C. C. 691.

§33. Surplus.

See Advanced Rates §6 (4).

(a) Evidence that for a series of years an annual dividend was paid on capital stock of a carrier, and in addition a substantial surplus accumulated, can have no direct bearing upon the reasonableness of rates on a single commodity to a few destinations, even though volume of movement of that commodity is admittedly large. Cincinnati Asso. of Purchasing Agents v. L. & N. R. R. Co., 89 I. C. C. 285, 289, 290.

§36. Ton-mile revenue.

See Supra §11; Evidence §36, §58.

(a) While the commission has condemned application of the same rate on both refined and crude oils, it does not follow that because the same rate is carried on crude oil as on refined oil that the rate on crude oil is thereby unreasonable, for it may be that the rate as applied to refined oil is low. Lubrite Refining Co., 80 I. C. C. 515. Atlantic Refining Co. v. A. B. & A. Ry., 89 I. C. C. 279, 280.

(b) The ton-mile yield returned by rates between points in other territories is not persuasive as to what should be considered reasonable for a haul over a route between two points through an area of low productivity, largely swamp lands, where there are no settlements of any size at which traffic does or could originate. Atlantic Refining Co. v. A. B. & A. Ry. Co., 89 I. C. C. 279, 280.

(c) The ultimate test from the carriers standpoint of the reasonableness of a rate must be the return for the occupation and use of its facilities. Earnings per gross ton mile take into consideration the factor of net to gross weight hauled and the comparative remuneration for the physical haulage involved and to that extent are more comprehensive than the earnings per net ton mile and per car mile. American Strawboard Co. v. I. C. R. R., 96 I. C. C. 289, 290.

(d) Rates on ground limestone from Omaha and Ralston, Nebr., to Chicago, Ill., Minneapolis, Minn., St. Louis, Mo., Toledo, Ohio, and Detroit, Mich., during Federal control, found not unreasonable or otherwise unlawful, based, among other things, upon fact that neither the ton-mile nor the car-mile yields seem unreasonable for these shipments. Barker-Evans Paint Co. v. Director General, 98 I. C. C. 414.

(e) Ton-mile earnings should ordinarily decrease with increasing distance, but it must be borne in mind that the average number of miles hauled in the southern district is approximately one-third greater than in the eastern district. Furniture from Southern Points, 100 I. C. C. 127, 144.

(f) It is a generally recognized principle of rate making that the rate per ton per mile should continually decrease as distance increases, and this theory is herein confirmed. Southern Class Rate Investigation, 100 I. C. C. 513, 642, 644.

§37. Two Line Haul.

(a) Upon further hearing, finding of original report, 83 I. C. C. 712, that rate on anthracite bird's-eye coal from group mines in Pennsylvania to Thomson, N. Y., for joint-line haul, is unreasonable as compared with rate computed on basis of single-line haul, and further prescribing reasonable rate and awarding reparation, affirmed. United Paperboard Co. v. G. & J. Ry., 102 I. C. C. 502.

§38. Value of Commodity.

See Classification §11; Evidence §61.

(a) Rate on solder found not unreasonable, discriminatory, or unduly prejudicial as compared with rates on tin, copper, lead, and spelter, which are all virgin metals. Solder is one step removed by manufacture from tin and lead, and, with exception of tin, is much more valuable than metals compared. Earnings on shipments here involved are not unduly high as compared with earnings on same commodity between other points in same general territory for comparable distances. Union Smelting & Refining Co. v. C. R. R. Co., of N. J. 92 I. C. C. 319.

(b) Generally speaking, rates on raw materials are lower than those on the finished product manufactured therefrom. Oklahoma Traffic Asso. v. A., T. & S. F., 92 I. C. C. 695, 696.

(c) The inferior quality of a commodity can not be made the basis for prescribing rates that are lower than the rates on the same commodity for comparable hauls in the same general

territory. Dixie Portland Cement Co. v. N., C. & St. L. Ry., 88 I. C. C. 147, 149.

ALL OTHER CITATIONS

Arizona Corporation Commission v. A. E. R. R. Co., 85 I. C. C. 76; O-So-Ezy Products Co. v. Director General, as Agent, 85 I. C. C. 187.

§39. Value of service.

See Evidence §62.

(ab) In considering reasonableness of rates economic condition of an industry may be relevant as it bears on value of service to the industry and as it may permanently or for a long period of time affect ability of that industry to pay rates assessed, but taken by itself it can not be accepted as controlling. Rates and Charges on Grain and Products, 91 I. C. C. 105, 143.

(c) Rate level necessary to move a commodity is an element to be considered together with other elements in determining a reasonable rate on the commodity. Chicago Heights Mfrs. Asso. v. P. R. R. 92 I. C. C. 194, 198.

(d) Fact that some movement can be shown under a rate is no proof that it is reasonable. It would be a singular doctrine to hold that no rates are unreasonably high except those which actually stifle the movement of freight. Utah State Automobile Asso. v. A., T. & S. F., 92 I. C. C. 376, 383.

(e) It is not necessary to show that rates are prohibitive in order to prove unreasonableness. Cheese from Wisconsin, 100 I. C. C. 744, 749.

§40. Volume of traffic.

See Evidence §63.

(a) There is no good reason for maintaining commodity rates on articles which move in small volume and in l. c. l. quantities. Burlap Bags and Iron and Steel Articles, 89 I. C. C. 131, 134.

(b) Complainant is entitled to a reasonable rate, and the fact that there have thus far been relatively few shipments of the commodities in question from and to these points is not the sole determinative factor. Parkersburg Rig & Reel Co. v. M. P. R. R., 93 I. C. C. 667, 669.

(c) Regardless of the volume of movement, complainant was entitled to reasonable rates on its shipments. Cleveland Akron Bag Co. v. W. & L. Ry., 93 I. C. C. 694, 696.

(d) Even where the movement is of a temporary character the shipper is entitled to a just and reasonable rate consistent with those charged others under similar conditions and one that will meet the usual tests of reasonableness. Utah Idaho Sugar Co. v. Director General, 98 I. C. C. 541, 543.

(e) While volume of movement is an important element to be considered in arriving at a reasonable rate, an excessive rate can not be justified merely on account of the fact that movements thereunder are infrequent. Hilb & Bauer v. N. Y. C., 101 I. C. C. 621, 622.

(f) Notwithstanding the shipment was sporadic, complainant is entitled to have its traffic move at a rate that is not unreasonable. Lone Star Gas Co. v. C. R. I. & G. Ry., 109 I. C. C. 258, 260.

REBATES

See Allowances VII; Common Carrier; Crimes VI; Evidence §48.

RECEIVERSHIP

(a) The lien created by the provisions of section 2797 of the Civil Code, in favor of certain classes of creditors designated therein, does not unreasonably interfere with interstate commerce, and is not offensive to the commerce clause of the federal Constitution. Nor is that section violative of the due process clause of the Constitution; and it is not void for uncertainty, or because of a failure to provide proceedings by which it may be enforced. Standard Steel Works Co. v. Williams (Ga., 1924) 124 S. E. 21.

(b) In a proceeding to foreclose first mortgage placed on a railroad, intervention petitions were filed seeking to file liens upon the gross income of the receivership. The relief sought by the interveners, who are the plaintiffs in error here, is not of such a character as to have the effect, if granted, of annulling or impairing the order of the Interstate Commerce Commission, under the authority of which the receiver had issued the receiver's certificates in question here. And the court erred in holding that the superior court of Richmond county was without jurisdiction to hear and determine the questions made by the in-

tervention of plaintiffs in error, and to grant the relief sought if the allegations in the intervention were sustained. Standard Steel Works Co. v. Williams, (Ga., 1924) 124 S. E. 21.

(c) In proceedings by receiver of street railway company for permission to increase rates and to enjoin city from enforcing inadequate rates, receiver HELD not permitted to renounce ordinance, which required, as one of the considerations for its passage and acceptance, that the company pay to the city specified sum of money in monthly installments, which had theretofore been mutually performed, and had been construed as binding obligation on the railway to make all installment payments. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

(d) Salary allowed receiver or appointment of new receiver are matters properly to be brought before a court having jurisdiction in the premises and have no bearing upon an application for certificate of convenience and necessity for abandonment of line of railroad. Abandonment of M. B. & S. R. R. 90 I. C. C. 31, 34.

See Reasonableness of Rates.

§3. In General.

(a) Shippers are entitled to the benefit of reasonable rules in connection with reconsignment privileges and may recover damages for payment of excessive charges accruing due to default of carriers in providing such reasonable rules. Hull Co. v. Director General, as Agent, 89 I. C. C. 45.

(b) Complainant alleged it was damaged by reason of the sale of a carload of yellow pine lumber shipped Nov. 5, 1921 from Minter, Ala., to North Philadelphia, Pa., the proceeds of such sale being applied by the carriers to the satisfaction of charges which were unjust, unreasonable and in violation of section 1. Shipment tendered to L. & N., at Minter consigned to Ternan & White, North Philadelphia, for which the carrier issued a straight bill of lading. Shipment moved L. & N., Pan Handle and Pennsylvania, arriving Nov. 15, 1921 notice of arrival being sent to consignee on that date. Complainant and the consignee were unable to agree on terms of sale and complainant having ascertained that the Chickasaw Lumber Co. of Demopolis, Ala., desired delivery of a carload of lumber at Moore, Pa., arranged for the sale of the lumber to the latter company if reconsignment could be effected. On Nov. 19, 1921 Chickasaw Lumber Co. wired representative of the carriers to effect reconsignment to Moore. On Nov. 22 defendant replied that the original consignee, who held the original bill of lading, demanded delivery and inquired as to whether an indemnity bond would

be filed if reconsignment were made to Moore. On Nov. 23 Rox requested that the reconsignment be made and stated that an indemnity bond would be executed. In view of consignees attitude nothing was done with reference to an indemnity bond. Nov. 30 defendant notified Rox by letter that it had endeavored to make the reconsignment as requested but that the original consignee held the original bill of lading and refused to waive its claim to the shipment. Defendant notified Rox that when a certified check for transportation charges was forthcoming the car would be reconsigned, but as this was not done contents of car were unloaded. Shipment was sold at public auction and apparently in accordance with the requirements of the law in such cases. There is no claim that the demurrage, storage and freight charges were not assessed in accordance with the applicable tariffs, and there is no evidence of record that the rules or regulations under which they were assessed were unreasonable or otherwise unlawful. The bill of lading was not surrendered until Dec. 9, 1921, and the request for reconsignment was made by some one not a party to the transportation record and not the owner of the lumber. No violation of the act can be predicated upon the facts here shown. HELD, complaint dismissed. Leslie Lumber Co. v. Pennsylvania R. R., 92 I. C. C. 55.

(c) Upon arrival of shipments at originally billed destination they "were placed in public delivery yard ready for delivery." Complainant's customers refused shipments and carrier's agents were notified by telegrams confirmed by letters to "reship" to new destination. HELD: Since definition of reconsignment clearly indicates that shipments must still be in custody of carrier, and shipments here involved never left carrier's custody until they were delivered at ultimate destination, they were reconsignments and not reshipments and penalty charges accruing thereunder were not illegal. Stetson, Cutler & Co. v. N. Y., N. H. & H. R. R. Co., 91 I. C. C. 3.

(d) Definition of reconsignment provides that the term means "Any other instructions * * * necessary to effect delivery which requires a change in billing or an additional movement of the car, or both * * *;" a change in billing and an additional movement also being contemplated by definition of reshipment. However, definition of reconsignment clearly indicates that shipments must still be in custody of carrier, and, if reshipment is to have any meaning differentiating it from reconsignment, line of demarcation must be drawn there. Stetson, Cutler & Co. v. N. Y. N. H. & H. R. R. Co. 91 I. C. C. 3, 5.

(e) Charges of line-haul carrier for placing on its team track and holding for inspection at St. Louis, Mo., and East St. Louis, Ill., carload shipments of hay and straw originating at country stations, and subsequently sold for delivery in other parts of city, found not unreasonable or otherwise unlawful. Rules governing inspection and charges therefor were prescribed by commission in Reconsignment Case No. 3, 53 I. C. C. 455, and are uniformly in effect, and charges assailed were assessed accordingly. Toberman, Mackey & Co. v. C., B. & Q. R. R. Co., 91 I. C. C. 40.

(f) General reconsignment rules provide that, if a car is placed on private tracks or sidings at first-billed destination and subsequently reforwarded, local rates to and from reconsignment point, plus a reconsignment charge, shall be assessed. Such provision applies to all traffic except fruits and vegetables. Upon complaint alleging that application of rule to hay and straw results in unreasonableness and in undue prejudice in favor of fruit and vegetable traffic; FOUND: No competition exists between hay or straw and fresh fruits and vegetables, transportation of latter must be facilitated in every way, and different characteristics of commodities justify different treatment. Undue prejudice not found, but collection of a reconsignment charge in addition to rates to and from point of reconsignment found unreasonable. National Hay Asso. v. A. & R. R. R. Co., 91 I. C. C. 615.

(g) Following Chestnutt Lumber Co., 89 I. C. C. 236, applicable reconsignment charges assessed on cars placed for unloading at original billed destination, and reshipped therefrom without being unloaded to a point outside of switching limits, found unreasonable. Waiver of undercharges authorized. Hollingshead Co. v. N. Y. C. R. R. Co., 91 I. C. C. 657.

(h) Shipment of lumber from Lonoke,

Ark., was originally consigned to Deer Creek, Okla. Diversion requested to Nowata, Okla., could not be effected until after shipment passed point through which the short-line route made. Combination rates based on Winfield, Kans., assessed found not unreasonable as compared with rates contemporaneously in effect via the direct route; nor were individual factors comprising the combination unreasonable as compared with rates between other points instanced by complainant. Shipment here involved was unusual and moved over the circuitous route at instance and for convenience of complainant. While ton-mile earnings thereunder are somewhat higher than those instanced, they can not be said to have been excessive for service performed. Nebraska Bridge Supply Co. v. A., T. & S. F., 93 I. C. C. 301.

(i) Negligence of carrier in failing to transmit promptly to its connection complainant's telephonic request for diversion, resulting in shipment moving through to originally billed destinations and thence back-hauled through point at which diversion could have been effected, found to have resulted in misrouting and collection of overcharges. Under wording of defendant's tariff which provided that diversion requests must be made or confirmed in writing there was a holding out to shippers that such requests in form other than in writing would be accepted, and complainant complied literally therewith by confirming in writing its telephonic request and surrendering bills of lading. The telephonic instructions were accepted by defendant's agent, and record does not show that delay on part of complainant in confirming request in writing in any way contributed to carrier's failure to either divert shipment or transmit request to its connection. Reparation awarded. Humble Oil & Mfg. Co.v. N. Y. C., 93 I. C. C. 331.

(j) There is a clear distinction between the service performed by the carriers in the ordinary diversion or reconsignment and that which is performed in connection with grain and hay held for inspection. Toberman, Mackey & Co. v. C., N. O. & T. P., 96 I. C. C. 237.

(k) Stop-in-transit and reconsignment charges assessed under applicable tariff on hay stopped and held for reconsignment at Cincinnati and Chattanooga, found not unreasonable or otherwise unlawful. Shipper contended that charges were illegal and unlawful to extent they exceeded the stop-in-transit charges applicable on grain and hay "held for inspection and disposition incident thereto." However, there is a clear distinction between ordinary diversion or reconsignment service and that performed in connection with grain and hay held for inspection. Furthermore, in 47 I. C. C. 590, commission approved charges for reconsignment in addition to charges for service of stopping in transit. Toberman, Mackey & Co. v. C., N. O. & T. P., 96 I. C. C. 237.

(l) Shipments of wrought-iron pipe from Leeray, Tex., to Bristow, Okla., reconsigned to Okemah, Okla., with specific instructions that routing beyond Fort Worth be in connection with the M-K-T through Crowder, Okla. Diversion requested could not be effected on one shipment, which had passed point of interception before reconsignment orders, received, and that shipment moved via Frisco through Weleetke, Okla. Applicable rate on shipments routed via M-K-T found unreasonable and unduly prejudicial to extent it exceeded lower rate contemporaneously maintained via other lines for comparable distances in same general territory and rate in effect between origin and destination in opposite direction and subsequently established in both directions. Combination rate assessed on shipment routed via Frisco found unreasonable or unduly prejudicial. Reparation awarded and collection of undercharges ordered waived. Sinclair Oil & Gas Co. v. C. & N. E. Ry., 96 I. C. C. 286.

(m) Reconsignment charges alleged unreasonable, on ground that if car had moved as routed it would have reached reconsignment point before orders of reconsignment were given. Complainant not found entitled to recover anything from reconsignment charges. American Lumber & Export Co. v. A., T. & N. R. R. Corp., 96 I. C. C. 576.

(n) Error on part of complainant in consigning shipment of crushed stone from Port Deposit, Md., to Linden Hall, Pa., necessitated reconsignment to Mendenhall, Pa., is insufficient justification for the assessment of an unreasonable charge. Budding Co. v. P. R. R. Co., 100 I. C. C. 411.

(o) Following 89 I. C. C. 236, and 91 I. C. C. 657, assessment and collection of a reconsignment charge in connection

with combination rates on a tank car of gasoline shipped form Point Breeze, Pa., to New Haven, Conn., where it was placed for unloading, but was reforwarded or reconsigned to Auburn, R. I., under a new billing, found unreasonable. Reparation awarded. Atlantic Refining Co. v. P. R. R., 101 I. C. C. 85, 86.

(oa) Upon reconsideration, finding in original report, 91 I. C. C. 3, that application of penalty charges for detention at originally billed destinations of shipments of lumber which were subsequently reforwarded to new destination were not illegal, affirmed. Cars were placed for delivery on defendants' team tracks, but they had not been unloaded or accepted by consignee or owner, and, under the terms of the governing tariff rule, must be considered reconsignments and not reshipments as contended by complainants. Stetson, Cutler & Co. v. N. Y., N. H. & H., 102 I. C. C. 471.

(p) Complainant attacked reconsignment charge of $6.30 per car at Richmond, Va., on eight cars of leaf tobacco shipped between Nov. 10 and Nov. 15, 1923 from Virginia and North Carolina to Richmond, Va., and thence to Norfolk, Va., for export, as unreasonable. Shipments moved into Richmond over the Southern consigned to complainant for team track delivery. After their arrival at Richmond, and after some, but not all, had been placed for unloading, complainant sold the tobacco. Under the terms of the sale complainant was to deliver it f. o. b. at Norfolk. Complainant and defendant agree that the shipments were delivered to and accepted by complainant at Richmond, and that complainant paid the freight charges to that point. Complainant presented the Southern with switch bills of lading for the movement of the cars which had not been unloaded to the A. C. L., Southern assessed, and complainant paid the reconsignment charges here in issue. Upon delivery of the cars to the A. C. L., complainant presented that carrier with bills of lading covering the movement to Norfolk for export, and prepaid in full at the local rate. The facts of record establish that the movements beyond Richmond were reshipments. Delivery was made to and accepted by complainant who took charge thereof, paid the incoming charges thereon, and arranged, without the carrier or agent of the carrier acting for it, for the further transportation of the tobacco. The inbound movements were wholly unrelated to those outbound. Apparently there was no intention to move the tobacco beyond Richmond until after its arrival at that point. HELD, reconsignment charges unreasonable, reparation awarded. Taylor Co. v. S. Ry., 109 I. C. C. 431.

(q) Wabash and G. T., proposed cancellation of free diversion or reconsignment of anthracite coal at Detroit, Milwaukee Junction, West Detroit and Port Huron, Mich. This will result in application of a charge of $6.30 for reconsignment or diversion to points outside of the switching limits, and of $2.70 for diversion or reconsignment within the switching limits if the orders to divert or reconsign are received in time to permit instructions to be given to yard employees within 24 hours after arrival of the car at destination, or a charge of $6.30 if such orders are received more than 24 hours after arrival of the car at destination. Free diversion or reconsignment of anthracite coal is permitted by different railroads in central territory. Respondents have failed in their proof. HELD proposed schedules not justified. Diversion and reconsignment of anthracite coal, 112 I. C. C. 374.

§3½. Duty of carrier to afford.

(a) Stop-over practice embodies some elements of reconsignment. In both cases aggregate charges from point of origin to destination are computed on basis of c. l. rate from point of origin to final destination plus whatever charge is made for service. Stopping of Cars in Transit to Complete Loading, 36 I. C. C. 130. Wool Rates Investigation, 1923, 91 I. C. C. 235, 281.

(b Negligence of carrier in failing to transmit promptly to its connection complainant's telephonic request for diversion, resulting in shipment moving through to originally billed destination and thence back-hauled through point at which diversion could have been effected, found to have resulted in misrouting and collection of overcharges. Under wording of defendant's tariff which provided that diversion requests must be made or confirmed in writing there was a holding out to shippers that such requests in form other than in writing would be accepted, and complainant complied literally therewith by confirming in writing its telephonic request and surrendering bills of lading. Telephonic

instructions were accepted by defendant's agent, and record does not show that delay on part of complainant in confirming request in writing in any way contributed to carrier's failure to either divert shipment or transmit request to its connection. Reparation awarded. Humble Oil & Refining Co. v. N. Y. C., 93 I. C. C. 331.

(c) Complainant attacked charges assessed on one car of lumber shipped from Jasper, Tex., to St. Louis, Mo., on Dec. 15, 1917 and reconsigned to New York, N. Y., as illegal, and that defendants refusal to reconsign the car from St. Louis when requested to do so, while contemporaneously reconsigning shipments from East St. Louis, Ill., as unduly prejudicial. On Dec. 15, 1917 the car was shipped from Jasper by complainant consigned to itself at St. Louis. It arrived at St. Louis on Dec. 28, and notice of arrival was received by complainant on Dec. 31. On that date it ordered the car reconsigned to Harlem Transfer, N. Y., or if that point was embargoed, to Long Island City, N. Y. Complainant was notified on Dec. 31 that the reconsignment could not be made because of an eastern embargo. For several weeks complainant requested defendants to make the reconsignment and advised them that there was no embargo at Long Island City. The lumber was placed in storage by defendants on March 3, 1918. On April 4, 1918 complainant obtained a permit for the transportation of the car to New York from the freight traffic committee of the car to New York from the freight traffic committee of the north Atlantic ports and on May 14, 1918 the shipment was forwarded to New York. Rate charged was combination on St. Louis made up of factors of 19c south of St. Louis and 28.3c east thereof. The applicable rate east of St. Louis prior to May 18, 1918 was 27.3c. Shipment overcharged to extent rate charged exceeded through rate of 46.3c. Complainant asserted and defendants admitted that the embargo which is said to have prevented reconsignment of the shipment was not an embargo of the eastern lines but was an embargo of the Mo. Pac. That embargo was effective from Dec. 8, 1917 until Mar. 28, 1918, and directed that carload freight, with exceptions not here material, destined to certain territory embracing Long Island City and Harlem Transfer, would not be accepted when routed via certain gateways including St. Louis; that carload freight reconsigned or to be reconsigned would be subject to the same rules as govern direct carload consignments; and that freight would not be accepted when billed to Little Rock, Illmo, Thebes Cairo, Dupo or other intermediate points when intended for reconsignment to embargoed territory, particular reference being made to shipments of lumber and other forest products. HELD, charges collected illegal to extent they exceeded $180.57, reparation awarded. Milne Lumber Co. v. Director General, 102 I. C. C. 520.

(d) The Commission has repeatedly held that reconsignment and diversion on basis of the through rate from point of origin to new destination, with a fair charge for the extra service performed, are reasonable practices. In each instance, however, it has made the nonexistence of an out of line haul and request for reconsignment or diversion within a reasonable time conditions precedent to the right of a shipper to demand such reconsignment. Fess v. C. H. & G. L. Ry. 104 I. C. C. 262, 264.

IV. TARIFFS AND PUBLICATION

See Tariffs.

§4. Necessity of publishing.

(a) Reconsignment charges on grain held in cars for official inspection and disposition orders incident thereto at billed destination found inapplicable. Exceptions to reconsignment tariff provided that rules therein will not apply to "Grain * * * held in cars on track for inspection and disposition orders incident thereto" and words "disposition orders" as used therein clearly contemplated forwarding of cars to points beyond billed destination. Reparation awarded. Flanley Grain Co. v. Director General, as Agent, 89 I. C. C. 33.

(b) Rule in reconsignment tariff of C. & N. W. Ry. Co., to effect that freight which has been handled by the Illinois Central prior to delivery to the North Western would be reconsigned only on basis of combination of locals to and from reconsignment point found unreasonable, and shipper found damaged to extent applicable charges thereunder exceeded charges which would have accrued, based upon joint through rate plus reconsignment charge, which sub-

sequently became applicable when the unreasonable rule was eliminated from the tariff. Reparation awarded. Hull Co. v. Director General, as Agent, 89 I. C. C. 44.

(c) Upon arrival at Nashville, Tenn., cars were placed for unloading. Some were reforwarded with seals unbroken, and others were moved after seals were broken without ladings having been disturbed. Separate bills covering inbound and outbound movements were rendered and paid. HELD: As to such shipments placed for unloading and subsequently reshipped in same cars without change of lading to points beyond switching limits, reconsignment charges were applicable under governing tariffs, but unreasonable. Chestnutt Lumber Co. v. Director General, as Agent, 89 I. C. C. 236.

(d) Complainant attacked charges on carloads of hay and straw placed on track and held for inspection at St. Louis and East St. Louis during 1920, 1921, 1922 and 1923 as unreasonable, unjustly discriminatory, unduly prejudicial and illegal. Hay and straw are shipped to St. Louis and East St. Louis where the cars are placed at a point satisfactory to complainant for inspection before delivery is taken. The cars are switched to another terminal delivery on another railroad, whose switching charges are absorbed, but a reconsignment charge of $2.70 is assessed. Inspection of some commodities is a necessary and valuable commercial incident in the process of marketing them and stoppage and detention of them for this purpose is reasonable and proper, but the carriers can not be required to perform the service without adequate compensation therefor. HELD, charges attacked not unreasonable or otherwise unlawful, complaint dismissed. Toberman Mackey & Company v. C. B. & Q. R. R., 91 I. C. C. 40.

§4½. Embargoed destination.

See Embargoes.

(a) Complainant attacked charges assessed on two cars of yellow pine lumber shipped from Poley and Ruthven, Ala., on Feb. 23 and 25, 1918, to complainant at Evansville, Ind., and reshipped to Zanesville and Dayton, O., as unreasonable and inapplicable. Cars arrived at Evansville on March 9, 1918. On March 12, complainant instructed defendants agent at Evansville to reconsign No. 16626 to Upland and March 13 to reconsign 5849 to Detroit. Both requests to reconsign were refused and complainant was notified that it would be necessary for him to dispose of the lumber at Evansville. This he could not do. The cars were held awaiting disposition orders until March 22. Defendant then ordered them to an independent warehouse for unloading and storage of the lumber. The lumber was placed in storage March 29, and complainant notified. In 1918 complainant requested defendant to reconsign the lumber then in storage to Zanesville and Dayton. This request was refused. Finally, complainant had the lumber reloaded and reshipped to the destinations last named, paying the combination of local rates to and beyond Evansville and a charge of $15 per car for reloading. Joint rates were in effect from points of origin to Upland and Detroit, applicable through Evansville at the time of original shipment and when the cars were first ordered reconsigned. Likewise joint rates were in effect from points of origin to the Ohio river destinations, via Evansville, when the shipments left point of origin and when reconsignment to the latter points was requested. The embargo against reconsignment of shipments stopped at points in official classification territory, which was instituted at the direction of the assistant director general was canceled on March 21, nine days before the lumber was put in storage. The embargo declared by defendant, ostensibly to cover that in official classification territory, was not canceled until March 28, eight days after the embargo in official classification territory had been canceled. At the time reconsignment was requested no embargo existed against either Upland or Detroit, and the only limitations in defendants reconsignment tariff were in regard to points which were embargoed. HELD, charges on car 16626 inapplicable to extent they exceeded those on basis of joint rate of 30.8 c plus demurrage charged of $6 and reconsignment charge of $5; and charges collected on car 5849 inapplicable to extent they exceeded joint rate of 26.2c, plus demurrage charge of $9 and reconsignment charge of $5 reparation awarded. Thomas v. Director General, 92 I. C. C. 469.

(b) Desired route being embargoed, complainant notified consignor to forward shipments via unembargoed route. Subsequently, permit obtained authorizing movement over embargoed route

which complainant forwarded to carrier together with letter setting forth name of consignor and requesting carrier to "be governed accordingly." Complainant, however, failed to change instructions previously given consignor and shipments were billed and moved via higher-rated route. HELD: Applicable tariff provided that "request for diversion or reconsignment must be made or confirmed in writing * * *," but no proper request in conformity therewith was made. Moreover, tender of permit or direction in letter to "be governed accordingly" laid no obligation on carrier to forward shipments via embargoed route in view of specific instructions designated in bills of lading. Weston Dodson & Co. v. N. Y., O. & W. Ry. Co., 91 I. C. C. 659.

(c) Shipments were refused by consignee at originally billed destination, whereupon they were reconsigned without routing instructions. Carrier moved shipments from reconsignment point, retaining to itself entire haul, instead of forwarding via shorter two-line route over which a lower rate applied. HELD: had complainants directed routings over lower-rated route carrier could not lawfully have ignored such instructions, and having failed to indicate any routing it was carrier's duty to forward over the cheaper route. Shipments found misrouted and reparation awarded. Original report, 87 I. C. C. 31, affirmed. Everist v. C., M. & St. P., 90 I. C. C. 473.

(d) Reconsignment was refused at original destination due to embargo and complainant notified. Disposition orders requested but not furnished and shipments were stored. While in storage reconsignment again requested and refused, so complainant subsequently had shipments reloaded and reshipped, paying local rates plus other charges. No embargo existed when reconsignment requested and, while tariffs did not provide for reconsignment on shipments unloaded at first-billed destination, here the unloading was done at defendant's direction, and complainant was not consulted in the matter. HELD: Charges collected found inapplicable to extent they exceeded joint rates from origin to ultimate destination in effect at time of original shipment, plus proper demurrage and reconsignment charges. Reparation awarded. Thames v. Director General, 92 I. C. C. 469.

(e) Due to strike of defendant's employees, certain destinations were embargoed, resulting in complainant being unable to make outbound, or unload inbound shipments. Necessity for embargo was unquestioned and record failed to establish that defendant refused to furnish cars for shipments to unembargoed points. Complainant might have stopped cars from arriving at its plant before storage capacity became exhausted by diverting cars to other points. HELD: Under above circumstances demurrage charges assessed were not unreasonable or otherwise unlawful. Big Diamond Mills Co. v. C. G. W. R. R., 92 I. C. C. 709.

(f) When tariffs contain no restriction against reconsignment to embargoed points, demurrage charges may not be assessed for the car detention resulting therefrom. The right to reconsign depends entirely upon the construction of rules, which are required to be filed in the same manner as rates, and if the carriers do not restrict such rules to the extent of their capacity to perform the service, the shipper can not be held liable for the detention of cars when it is not directly responsible for such detention and can not abate the cause thereof, as in the case of an embargo, which is a disability of the carrier. Milne Lumber Co. v. Director General 102 I. C. C. 520, 522.

(g) The director general is liable for any damage incurred as a proximate result of errors in accepting instructions to reconsign shipments to embargoed points. Empire Lumber Co. v. Director General, 88 I. C. C. 425.

ALL OTHER CITATIONS

Gerhard & Hey (Inc.) v. Director General, as Agent, 88 I. C. C. 293.

§5. Construction in general.

(a) Exceptions to reconsignment tariff provided that rules therein will not apply to "Grain * * * held in cars on track for inspection and disposition orders incident thereto at billed destination or at point intermediate thereto." Contention that term "disposition orders" has a special meaning in traffic parlance and implies delivery only to points within switching limits of billed destination, not sustained. Words of a tariff must be construed in their ordinary sense, and where meaning, so construed, is clear it must govern. In ordinary sense the words "disposition orders" as used in

tariffs clearly contemplated forwarding of cars to points beyond billed destinations. Flanley Grain Co. v. Director General, as Agent, 89 I. C. C. 33, 36.

(b) Rules providing for application of combination rates plus reconsignment charge, on petroleum and products, placed on private siding at original billed destination and reforwarded without being unloaded to points outside switching limits, found unreasonable to extent they provide a higher basis than the through rate plus reconsignment charge. Assailed rules tend to force shippers to inspect shipments on public delivery tracks under conditions and with facilities which fail to measure up to the high degree of safety desirable in the public interest. It is desirable that inspection and sampling of petroleum be performed with all caution and under conditions insuring maximum safety and this can be better accomplished on private sidings than on public delivery tracks. Western Petroleum Refiners Asso. v. C., R. I. & P. Ry. Co., 89 I. C. C. 241, 243.

(c) It would seem that the correct principle has been applied in framing rule 7, uniform reconsignment rules, for a car which has been placed for unloading at its original billed destination has in fact been delivered. A subsequent movement might therefore be properly regarded as a reshipment. Stetson Cutler & Company v. N. Y. N. H. & H. R. R., 91 I. C. C. 3, 5.

(d) The court holds with reference to car of hay and straw held in the yards at Cincinnati in 1922 and 1923 that the carrier can not charge the rate for reconsignment to points beyond the switching limits and also collect a so called inspection charge and that the latter charge allowed is applicable. Where there is no inspection and the shipment is afterwards diverted the reconsignment charge will apply. Where the cars are placed in the Cincinnati yards upon the so called "plug track" and there inspected and unloaded no reconsignment charges can be collected. Baltimore & O. R. Co. v. Cincinnati Grain & Hay Co., 300 Fed. 674, 676.

(e) Under traffic provisions relative to inspection and reconsignment charges, and note making them applicable to particular track, subject to conditions as to switching charge, HELD that, on cars of hay unloaded on such track, no inspection or reconsignment charges could be made, and on reconsigned cars only the charges specified in the note could be collected. Baltimore & O. R. Co. v. Cincinnati Grain & Hay Co., 300 Fed. 674.

(f) Under tariff provision applicable to division and reconsignment of property and to inspection of grain and seed, local charge on hay and straw, which did not require compulsory inspection, HELD a diversion or reconsignment charge so that no further reconsignment charge could be made, and absence of inspection did not prevent such charge. Baltimore & O. R. Co., v. Cincinnati Grain & Hay Co., 300 Fed. 674.

(fa) Shipment of lumber moved from Jasper, Tex., to St. Louis, and was ordered reconsigned to Harlem Transfer, N. Y., or if that point was embargoed, Long Island City, N. Y. Complainant was notified reconsignment could not be made due to an eastern embargo. Shipment was placed in storage and subsequently moved under permit to New York. While applicable tariff prohibited reconsignment to embargoed points, not only was there no embargo on eastern lines against Long Island City but one of such lines reaching St. Louis was willing to accept shipment for transportation. Carriers disability preventing immediate movement was theoretical disability based upon supposed embargo, and it follows that charges assessed as result of refusal to reconsign were illegal. Reparation awarded. Milne Lbr. Co. v. Director General, 102 I. C. C. 520.

(fb) Tariff provided (1) that where one change in destination has already been effected and shipper requests subsequent change necessitating movement of the car shipment will be treated as a reshipment from point of reforwarding and assessed at rates to and from reforwarding point, and (2) if car is stopped short of billed destination after having one reconsignment charges will be made at rates to and from first reconsignment point. Here service of stopping short of billed destination was neither requested nor performed within provision (2) above quoted, which does not contemplate a further movement beyond point of stoppage short of billed destination. Instructions were given and executed involving subsequent changes in destination which necessitated movement of the car. The service performed was clearly governed by provision (1) above quoted and charges based thereon were applicable. Shipments found overcharged and reparation

awarded. Cudahy Packing Co. v. Director General, 102 I. C. C. 598.

(fc) Shipments of anthracite coal moving from Providence, Pa., to Matawan, N. J., thence reconsigned to Asbury Park, N. J., were assessed joint rates and reconsignment charges, plus additional charges because of the movement through Matawan. Contention that additional charges were properly assessed under reconsignment tariffs, which provide for their application where return or additional hauls are involved and where rate from original point of shipment to final destination is not applicable through reconsignment point, it being shown that the customary route between origin and final destination is via South Amboy and Sea Girt, not sustained. Tariff naming through rate having contained no routing restriction, such rate was applicable via route of movement, and charges assessed were illegal to extent of additional charges collected. See 47 I. C. C. 59 and other cases cited. Reparation awarded. Hartwell & Lester v. D. & H. Co., 102 I. C. C. 703.

(g) Complainant attacked interstate rate and reconsignment charge from Tulsa, Okla., to Okmulgee, Okla., during July 1923 on one car of fabricated iron and steel tank material, knocked down, originating at Parkersburg, Va., as inapplicable. On July 6, 1923 complainant shipped a car from Parkersburg to itself at Tulsa, charges prepaid, routed B. & O., to St. Louis, Mo., and Katy beyond. It arrived at Tulsa and notice thereof was given complainant on July 12, but it was not placed for unloading at complainants warehouse, which is served by the Kay. Shipment moved over Frisco from Tulsa on July 13, and arrived at Okmulgee on July 17, 1923 where it was accepted and unloaded and the charges paid. The tariffs in force when the shipment moved authorized reconsignment at St. Louis or Kansas City over the Frisco to Okmulgee at a lower through rate than when reconsigned at Tulsa. When it is considered that on the day the shipment arrived at Tulsa from an interstate point, and before placed for unloading, complainant surrendered the original billing, which was unnecessary except to effect reconsignment, and directed its movement to another point to which reconsignment was authorized, the presumption is strong that defendants properly considered the character of the shipment to be interstate. HELD, charges attacked applicable, complaint dismissed. Parkersburg Rig & Reel Co. v. St. L. S. F. Ry., 109 I. C. C. 235.

ALL OTHER CITATIONS

Litman & Ossep v. Director General, as Agent, 88 I. C. C. 199.

§6. Retroactive Application.

See Facilities and Privileges §19.

(a) Shipment of gasoline moved from point of origin to first billed destination, and after placement on private siding was reforwarded or reconsigned to second billed destination, charges at the applicable combination rates, as well as a reconsignment charge, having been collected. HELD: Since the shipment moved some time prior to the rule prescribed in 89 I. C. C. 241, to effect that the through rate, plus a reconsignment charge, should be applied on shipments of this character, the retroactive application of the rule is not warranted. Atlantic Refining Co. v. P. R. R., 101 I. C. C. 85.

§6½. Rules and regulations.

(a) Complainant attacked rates, rules and regulations applicable to the reconsignment of carload shipments after arrival at the first billed destination and placement on private tracks or sidings, as unjust, unreasonable and unduly prejudicial as applied on hay and straw, and unduly preferential of fresh fruits and vegetables. Throughout the country generally shipments of fresh fruits and vegetables delivered on private tracks have been excepted from the application of that portion of rule 12 which provides for the assessment of local rates to and from the point from which cars are reforwarded. On such shipments the through rates from point of origin to final destination plus the $6.30 charge, are applicable. Although rule 12 does confer a preference on fruit and vegetables such preference is not undue or unlawful. The different characteristics of the commodities justify different treatment. In 89 I. C. C. 236 the Commission found that the assessment, in addition to the rates to and from the point of reshipment, of the reconsignment charge provided by rule 12 was unreasonable, reversing to that extent former decisions in which the provisions of rule 12 have been approved. HELD, present rules not unduly prejudicial or

unreasonable except in providing for the collection of a reconsignment charge in addition to such rates. National Hay Association v. A. & R. Ry. 91 I. C. C. 615.

(b) Complainant alleged defendants negligence in failing to intercept at Norfolk, Va., and to return to Whitehall, Mich., two cars of leather shipped from Whitehall to Haverhill, Mass., resulted in assessment of unreasonable charges. Feb. 12 and 21, 1923 complainant shipped two cars of leather from Whitehall to Haverhill, routed P. M., to Chicago, Ill., C. & O., to Cincinnati, O., N. & W., to Norfolk, M. & M. Transportation Co. to Boston, Mass., and Carter Russell Co. beyond. April 10, complainant instructed the P. M., at Whitehall by telephone, confirmed by letter which reached the agent April 11 to have both cars returned to Whitehall. The cars were not intercepted by defendants, but were shipped to Boston and stored and later reshipped to Whitehall. Both cars reached Norfolk April 3, 1923; they were delivered to the steamship Co. on April 16, 1923 and their contents transferred by that company to its boat on April 17. The instructions were forwarded by the P. M., to the C. & O., but the latter carrier did not comply with the tariff and transmit the instructions to its immediate connections. Had the request for diversion been transmitted to its connection at Cincinnati, it would have reached Boston in time to have prevented the shipments from being placed in storage. HELD, the failure of the C. & O., to comply with its tariff rule resulted in damage to complainant, and this damage is measured by the charges collected for storage at Boston, reparation awarded. Eagle Ottawa Leather Co. v. B. & O. R. R., 98 I. C. C. 400.

(c) Negligence of carrier in failing to transmit promptly to its connection complainant's telephonic request for diversion, resulting in shipment moving through to originally billed destination and thence back-hauled through point at which diversion could have been effected, found to have resulted in misrouting and collection of overcharges. Under wording of defendant's tariff which provided that diversion requests must be made or confirmed in writing there was a holding out to shippers that such requests in form other that in writing would be accepted, and complainant complied literally therewith by confirming in writing its telephonic request and surrendering bills of lading. Telephonic instructions were accepted by defendant's agent, and record does not show that delay on part of complainant in confirming request in writing in any way contributed to carrier's failure to either divert shipment or transmit request to its connection. Reparation awarded. Humble Oil & Rfg. Co. v. N. Y. C., 93 I. C. C. 331.

§6½a. Road Haul Rates Applicable.

See Tariffs §18.

(a) Complainant attacked charges on two cars of steel plates shipped Jan. 29, 1921, from Alliance, O., originally consigned to Ranger, Tex., and reconsigned to Baytown, Tex., as unreasonable as a result of the failure of the M. P., to act promptly upon complainants request to divert the cars while in transit and by reason of the tariff rule of the T. & P., respecting charges to apply on shipments diverted or reconsigned. Shipments consigned on Jan. 29, 1921 to complainant at Ranger over N. Y. C., to Cleveland, Big Four to St. Louis, M. P., to Texarkana and T. & P., beyond. On Feb. 7 complainant telephoned the general agent of M. P., at Houston and requested diversion to Bayton via Shreveport, La., care S. P. Confirmation in writing of complainants request, dated Feb. 6, was received by the general agent at Houston on morning of Feb. 9, together with the bills of lading covering the shipment. Defendant failed to effect the diversion or to transmit the request to its connection, and the cars moved to Ranger as originally routed, charged $1.51 plus a reconsignment charge of $2.50 per car, made up of $1.245 to Ranger, 13c back haul to Fort Worth, and $13.5c from Dayton to Fort Worth. The rate of $1.245 to Ranger was also applicable to Baytown and under the tariff provision charges on the shipments should have been based on the latter rate, plus the back haul charge of 13c, plus the reconsignment charge of $2.50 per car, shipment overcharged. A period of 5 hours and 45 minutes elapsed between the receipt by the general agent at Houston of complainants request for diversior of the cars and their delivery to the T. & P., at Texarkana, and 2 days, 9 hours, 15 minutes between such receipt and the departure of the shipments from Fort Worth. Car should have been diverted at Fort Worth. HELD, shipment overcharged, reparation awarded. Humble

Oil & Refining Co. v. N. Y. C. R. R., 93 I. C. C. 331.

(b) Complainant alleged failure of defendants to follow diversion instructions, caused charges assessed on two shipments of steel rails, with angles, carloads, from Boulder, Colo., to Wilmington, Calif., May 4, 1920 as unreasonable. Shipments routed U. P., to Ogden, O. S. L., to Salt Lake City, and L. A. & S. L., beyond. Shipments consigned to steamer Kaseeka, for export to Phillipine Islands. Export rate applicable over this route was 50c which included transfer of the freight from the car to shipside. No diversion in transit was permitted under this rate. On May 10 because the sailing of the Kaseeka had been canceled, complainant instructed the carrier to divert the six cars to Westwood Junction, Calif., over the S. P., which, under those instructions, would have received the shipments at Ogden or Salt Lake City. Four of the cars have already passed those points, and were permitted to proceed to Wilmington over the Salt Lake. Other two cars were diverted, one at Ogden and other at Salt Lake City, to Westwood Junction, over S. P. On May 13, the complainant learned that the other four cars had passed Ogden and Salt Lake City, and could not be diverted to Westwood Junction, and directed the defendant to cancel the diversion of the two cars to Westwood Junction, and allow them to proceed to destination as originally billed. Before this request could be complied with, the two cars had reached Imlay, Nev., on the S. P., 398 miles west of Ogden. The S. P., on receipt of advice to cancel the diversion of these cars at Westwood Junction, did so, and rediverted the cars to Wilmington. Proper basis $16.30 per ton on the rails and $16.30 per ton on fastenings, from Boulder to Fernley, Neb., 54c to Roseville, and 34.5c beyond. The record can not be accepted as affirmatively establishing the complainants original instructions were to divert all six or none of these cars to Westwood Junction. The record fails to establish any dereliction on the part of defendants prior to the time that the two cars were intercepted at Imlay, on the S. P. It was impracticable to apply the export rate of 50c, in connection with which not even a first diversion was permitted. The tariffs permitted no diversion under export rates, and only one diversion under domestic rates, and imposed the combination of locals to and from the diversion point, plus $5, in case of a second diversion. There is no showing that the diversion rules were unreasonable, or that they were not applied according to their terms. HELD, complaint dismissed. United Commercial Company v. S. P. Co., 93 I. C. C. 417.

(c) Complainant attacked commodity rates charged on two cars of wrought iron pipe, shipped in 1919 from Chester, Pa., and Pittsburgh, Pa., to Tulsa, Okla., diverted to Wynona, Okla., as unreasonable and in applicable. Car from Chester was originally routed Pennsylvania to Philadelphia, Southern Steamship Co. to Houston, Tex., and G. C. & S. F., beyond. On Nov. 7, 1919 after the shipment had arrived at Philadelphia, complainant requested an agent of defendant to divert the car to the all rail route, specifying the Pennsylvania to St. Louis, Mo., but no particular line beyond. On Nov. 13, prior to the departure of the car from St. Louis, complainant requested an agent of defendant at Tulsa to divert the car to Wynona, but due to negligence of defendant this diversion was not accomplished. The car moved from St. Louis over the M. K. & T., to Tulsa, the original destination, and from that point over the same line to Wynona, where it arrived Dec. 11, 1919. The car was not placed for unloading or otherwise delivered to complainant at Tulsa. Charged 6.5c Chester to Philadelphia, 87c beyond, plus $7 for diversion. There were no joint rates from Chester to Tulsa or Wynona. A fifth class rate of 50.5c was applicable to St. Louis, proportional rate of 36.5c East St. Louis to Wynona, or a combination through rate of 87c. The car from Pittsburgh was forwarded to Tulsa Dec. 16, 1919 routed over the Pennsylvania. Prior to arrival at Tulsa complainant requested an agent of defendant to divert it to Wynona. Due to an error the car was diverted to Waynoka, Okla., instead of Wynona. Route of movement was over Pennsylvania to St. Louis, Frisco to Fort Scott, Kas., M. K. & T. to Chanute, Kas., A. T. & S. F., Frisco and M. K. & T., to Wynona. Charged 74c to Waynoka and 17c beyond. The commodity rate of 74c applied to Wynona. All of the lines comprising the route of movement were shown as participating carriers. The tariff contained no limitation or restrictions that would

tend to render the 74c rate inapplicable over the route of movement, although that route included a back haul over a portion of the line from Waynoka to Wynona. HELD, charges Chester to Tulsa, directed to Wynona inapplicable to extent it exceeded 87c plus $4 for diversion; and charges on the car from Pittsburgh diverted to Wynona inapplicable to extent it exceeded 74c plus $3 for diversion, reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 113.

(d) Complainant attacked fifth class rates charged on 12 cars of fruits and vegetables reconsigned from Croxton, N. J., Philadelphia, Pa., and Washington, D. C., originally shipped from California, Oregon, Washington and Colorado to New York, as illegal. The cars were originally billed to New York. Croxton is a hold point on the Erie, where it has been customary to hold shipments consigned to complainant pending notification as to the New York delivery desired. The shipments were reconsigned to Philadelphia and Washington. In addition to the joint commodity rates from the points of origin to New York, fifth class rates of 19.5c and 29c to Philadelphia and Washington, plus a reconsignment charge of $6.30 were collected. At the time the shipments moved the same joint commodity rates applied to Philadelphia and Washington as to New York. HELD, rate attacked illegal to extent it exceeded the joint commodity rate from points of origin to ultimate destinations, reparation awarded. Steinhardt & Kelly v. E. R. R., 96 I. C. C. 229.

(e) Complainant attacked combination commodity rates charged on three cars of wrought iron pipe, carload from Leeray, Tex., to Okemah, Okla., in July and August 1922 as unreasonable unduly prejudicial and in violation of fourth section. Leeray is 100 miles west of Fort Worth, on the C. & N. E. Okemah is local on the F. S. & W. Shipments originally consigned to Bristow, Okla., and reconsigned to Okemah. The reconsignment request specified routing beyond Fort Worth in connection with M. K. & T., through Crowder, Okla., ad F. S. & W., beyond. Two of the shipments were so routed beyond Fort Worth but the third shipment had passed through Fort Worth and had been turned over to the St. L. S. F. & T., and Frisco before reconsignment order was received. It was necessary therefore to route this car in connection with the Frisco through Weleetka, Okla. In connection with M. K. T. applicable rate was 60c reconsignment charge $2.25. Via Frisco combination rate was 70.5c. At the time these shipments moved certain southwestern carriers maintained a rate of 53.5c on wrought iron pipe from Texas to Oklahoma. HELD, rate of 60c applicable via M. K. T. unreasonable to extent it exceeded 53.5c and rate of 70.5c applicable via Frisco not unreasonable or unduly prejudicial, reparation awarded. Sinclair Oil & Gas Co. v. C. & N. E. Ry., 96 I. C. C. 286.

(f) Complainant attacked combination rate charged on one car of rough lumber, shipped Sept. 5, 1923 from Delphi, Ind., to Bay City, Mich., and reconsigned to Corry, Pa., as unreasonable and inapplicable. Shipment moved over C. I. & L., to Michigan City, Ind., M. C., to Bay City and delivered Sept. 20. After the car had been placed for unloading on the private track of the original consignee and had been refused by him complainant notified the M. C., by wire to forward it to Corry for Erie delivery, at joint rate of 26.5c from Delphi, if possible. HELD, combination rate charged applicable and not unreasonable, complaint dismissed. Liberty Cooperage & Lumber Co. v. C. I. & L. Ry., 98 I. C. C. 461.

(g) Complainant attacked charges assessed on one tank car of gasoline Sept. 9, 1922, from Point Breeze, Pa., to New Haven, Conn., and after placement at destination, was reforwarded to Auburn, R. I., as unjust and unreasonable. Rate paid to New Haven 27c and after placement, complainant took out a new bill of lading and reforwarded the car to itself at Auburn. A reconsignment charge of $6.30 and transportation charges at rate of 21.5c were paid. Effective July 24, 1924, defendants established a rule applicable to the transportation of oil in tank cars placed for unloading on private siding at original billed destination, but not unloaded, whereby such cars may be reconsigned to points outside the switching limits on the basis of the thru rate from point of origin to the second billed destination, plus the reconsignment charge. HELD, rates charged unreasonable to extent it exceeded through rate plus reconsignment charge, repara-

tion awarded. Atlantic Refining Co. v. Penn., 101 I. C. C. 85.

(h) Complainant attacked combination rate of 56c charged on a car of cereal beverages shipped March 25, 1922, from Duluth, Minn., to Greenland, Mich., as unreasonable, unjustly discriminatory and unduly prejudicial to extent it exceeded 42.5c. Shipment made March 16, 1922. Moved over D. S. & A. to Houghton, Mich., and Copper Range thence, 308.4 miles, charged fifth class of 37c to Houghton and 19c beyond. Defendants state they would have established that rate had complainant requested a commodity rate prior to making the shipment. HELD: Rate attacked unreasonable to extent it exceeded 42.5c, reparation awarded. Fitger Co. v. C. R. R. R., 101 I. C. C. 87.

(i) Negligence of carrier in failing to transmit promptly to its connection complainant's telephonic request for diversion, resulting in shipment moving through to originally billed destination and thence back-hauled through point at which diversion could have been effected, found to have resulted in misrouting and collection of overcharges. Under wording of defendant's tariff which provided that diversion requests must be made or confirmed in writing there was a holding out to shippers that such requests in form other than in writing would be accepted, and complainant complied literally therewith by confirming in writing its telephonic request and surrendering bills of lading. The telephonic instructions were accepted by defendant's agent, and record does not show that delay on part of complainant in confirming the request in writing in any way contributed to carrier's failure to either divert shipment or transmit the request to its connection. Reparation awarded. Humble Oil & Rfg. Co. v. N. Y. C., 93 I. C. C. 331.

(j) Shipment from Pittsburgh, Duquesne Station, Pa., to Tulsa, Okla., was diverted, through carrier's error to Waynoka, instead of Wynona, Okla., necessitating a back haul to Wynona. Tariffs of participating carrier's named, without applicable restrictions, same rate from origin to both Waynoka and Wynona, and this rate, plus diversion charge, found applicable. Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(k) Carload of lumber moved from Delphi, Ind., to Bay City, Mich., where it was placed for unloading but refused by consignee, and upon instructions of shipper was reconsigned to Corry, Pa. The rate applied was the combination rate, and not the joint rate which complainant contends was applicable. HELD, Under the diversion or reconsignment rule governing, the combination rate charged was applicable and not unreasonable. Complaint dismissed. Liberty Cooperage & Lbr. Co. v. C., I. & L. Ry. Co., 98 I. C. C. 461.

(l) Complainant attacked rate charged on one car of apples from Brewster, Wash, to Fort Smith, Ark., as illegal. Shipment was billed from Brewster on Oct. 24, 1922 to Wenatchee, Wash., reconsigned at the latter point on Oct. 25, to Chicago, Ill., for I. C., delivery and on Nov. 4 reconsigned to Fort Smith. The second reconsigning order was given to the I. C., with instructions to route the car over that line to East St. Louis and M. P., beyond. The car was duly delivered to the I. C., at Albert Lea, Minn., on Nov. 6. It moved on to Chicago, but defendants concede that the second reconsigning order was received in time to have permitted the diversion to have been made at Freeport, Ill., by a route 98 miles shorter than through Chicago. Charged $1.50 through rate plus 33c for out of line haul. The applicable rate was $1.50 and there was no provision in the tariff restricting movement through Freeport or Chicago, although a considerably shorter route over the Burlington from Billings, Mont., to Kansas City, Mo., thence M. P., or K. C. S., was available. HELD, rate applicable was $1.50, reparation awarded. Browne Hinton Wholesale Grocery Co., v. G. N. Ry. 102 I. C. C. 237.

(la) Shipments of lumber moved from point of origin to originally billed destinations and subsequently reconsigned to new destination. Charges were collected on basis of combination rates from and to reconsignment points plus reconsignment charge, rate from point of origin to reconsignment points having also been contemporaneously applicable from origin point to ultimate destination over routes of movement. FOUND: Shipments overcharged to extent of rates charged from reconsignment points to ultimate destination. Stetson, Cutler Co. v. N. Y., N. H. & H., 102 I. C. C. 471, 472.

(m) Complainant attacked combination rate charged on a tank car of coconut oil shipped Oct. 28, 1918 from San

Francisco, Calif., to South Omaha, Neb., reconsigned to Calumet station, East Chicago, Ind., and again reconsigned to South Omaha as unreasonable. Shipment moved Santa Fe to Kansas City, Mo., and Burlington beyond. This shipment was part of a total of five cars of coconut oil originally billed to South Omaha which moved from San Francisco in tank cars of the Santa Fe under an arrangement whereby, at the request of the latter, the contents of the cars were to be transferred at Kansas City into tank cars furnished by complainant in order that the Santa Fe cars should not leave the line of that carrier. On Oct. 31, 1918 complaint telegraphed its San Francisco office for the numbers of the cars which were not equipped with steam coils and was advised that three of the cars, including that here considered, were not so equipped. On Nov. 1, 1918 complainants representative at Kansas City instructed the Santa Fe at Topeka, Kas., to telephone to divert this and the other two of these three shipments to complainants at East Chicago, Ind. These instructions were confirmed in writing on the same date. Diversion was affected at Winslow, Ariz., Nov. 5, 1918. Thereafter one of the cars which complainants San Francisco representative had advised was equipped with steam coils was upon arrival at Kansas City found not to be so equipped, and complainant thereupon instructed the Santa Fe to stop for inspection at Kansas City the other four cars, including that here considered. When this car reached that point it was found to be equipped with steam coils, and complainant accordingly instructed that its contents be transferred to another tank car and the latter reconsigned to South Omaha. These instructions were complied with and shipment moved to South Omaha, charged $1.715, made up of $1.125 to Wellington, Kas., and 59c beyond, plus reconsigning charges of $2 at Winslow, $5 at Wellington and $2 at Kansas City. HELD, applicable rate was $1.40 composed of commodity rate of $1.125 to Kansas City and 27.5c beyond, reparation awarded. Cudahy Packing Co. v. Director General, 102 I. C. C. 598.

(n) Complainant attacked combination rate charged on 14 cars of saw logs shipped during April 1923 from Tobins Siding and Ramsay, Mich., to Sheboygan, Wis., and reconsigned to Wausau, Wis., as unreasonable and inapplicable. Points of origin are on the Northwestern, 43 and 49 miles west of Watersmeet, Mich., and distance to Sheboygan are 270.8 and 276.8 miles, respectively. Distance from Sheboygan to Wausau is 154.7 miles. Charged 9c and 5c to and from Sheboygan. A rate of 7c was applicable to Sheboygan for these distances on saw logs and bolts for manufacture—products to be reshipped. These logs were manufactured at Wausau and the products reshipped. By virtue of the reconsigning tariff the haul from Sheboygan to Wausau became part of a through movement, and it follows logically that all of the conditions attaching to the factor from Sheboygan to Wausau attached likewise to the rate for the through movement. HELD, rate attacked to Sheboygan unreasonable to extent it exceeded 7c, reparation awarded. Oelhafen Mondeau Co. v. C. & N. W. Ry., 104 I. C. C. 295.

(o) Complainant attacked charges collected on seven cars of bituminous coal shipped March 12, 1923 from Clinton, Ind., to South Bend, Ind., and reconsigned to Chicago, Ill., as excessive and otherwise unlawful. Shipments were consigned from Clinton to South Bend over C. & E. I., to Momence and N. Y. C. C. & E. I., delivered them to the N. Y. C., at Momence at 2:30 p. m. March 14, 1923. On March 15, 1923 complainant telephoned the C. & E. I., at Momence for information relative to the whereabouts of the shipments with a view to diverting them to Chicago if they had not gone forward to South Bend. On the same date the latter was informed by an agent of the N. Y. C., at Momence that the cars had been hauled the previous evening to Kankakee, Ill., a point 11.3 miles west of Momence, where they would be made up in a train for South Bend, and transmitted this information to complainant by telephone. Upon being advised by the C. & I., that the charges for back hauling from Kankakee to Momence would be the only transportation charges in addition to those based on the through rate from point of origin to final destination which would be incurred in effecting diversion from Kankakee to Chicago, complainant instructs the former to have the shipments so diverted. In transmitting these instructions to the N. Y. C., the C. & E. I., stated specifically that complainant did not desire the shipments diverted if additional transportation

charges other than those applicable for the out of line haul from Momence to Kankakee and return would be incurred. The advice given the C. & E. I., by the N. Y. C., agent at Momence on March 15 1923, that the shipments had been hauled to Kankakee the previous evening and would be placed in a train for movement to South Bend was in error. The cars had left Momence at 7:15 a. m. on the date named before the inquiry as to their whereabouts had been made and moved directly east to South Bend, arriving at 7:50 a. m. The latter point is 90 miles east of Momence. On March 17, 1923 the N. Y. C., returned the shipments to the C. &. E. I., at Momence and they moved thence to Chicago over the last named line and the I. H. B. The rate of $1.70 maintained from Clinton to South Bend is not applicable over the route the shipments moved. On bituminous coal, carloads, moving from and to these points over the C. & E. I., to Momence and N. Y. S., beyond a combination of $3.24 applies, based on a commodity rates of $1.60 to the interchange point and $1.64 beyond. The applicable charges were less than those which would have accrued had the diversion not been effected. HELD, charges applicable not unreasonable or otherwise unlawful, complaint dismissed. Eagle Coal & Mining Co. v. C. &. E. I. Ry., 107 I. C. C. 607.

(p) Rate assessed on shipment of crushed stone from Port Deposit, Md., consigned through error to Linden Hall, Pa., and reconsigned at Marysville, Pa., to Mendenhall, Pa., found unreasonable. Error on part of complainants in consigning the shipment originally to Linden Hall, instead of Mendenhall, requiring reconsignment to latter point, stressed by defendant, is insufficient justification for the assessment of an unreasonable charge. Budding Co. v. P. R. R. Co., 100 I. C. C. 411.

(q) Shipment of gasoline moved from point of origin to first-billed destination; and after placement on private siding was reforwarded or reconsigned to second billed destination, charges at the applicable combination rates, as well as to reconsignment charge, having been collected. HELD, Since the shipment moved some time prior to the rule prescribed in 89 I. C. C. 241, to effect that the through rate, plus a reconsignment charge, should be applied on shipments of this character, the retroactive application of the rule is not warranted. Atlantic Refining Co. v. P. R. R., 101 I. C. C. 85.

(r) Inbound and outbound rates charged on sand moving from Montezuma, Ind., to Illiopolis, Ill., there placed for unloading and subsequently reconsigned to Buffalo, Ill., found legally assessed, notwithstanding fact that shipments could have moved via a less circuitous route taking a lower rate. Applicable reconsignment tariff provided that if shipment has been placed for unloading at original billed destination and reforwarded therefrom without being unloaded, to a point outside the switching limits, it will be subject to published rates to and from reconsignment point. Here the cars were so placed and reforwarded, and combination assessed was therefore applicable. Reconsignment charges, however, assessed in addition to rates to and from reforwarding point found unreasonable, following 89 I. C. C. 236, 91 I. C. C. 615, and reparation awarded. Meneely Co. v. C., I. & W., 101 I. C. C. 389.

(s) Shipments of chestnut lumber moved from Camden-on-Gauley, W. Va., to Montreal, Canada, and at latter point reconsigned to Ste. Therese, Canada, on which charges were collected based on a joint commodity rate to point of reconsignment and a local rate of Canadian carrier beyond: FOUND: Rate from point of origin to reconsignment point not unreasonable or in violation of long-and-short-haul clause of fourth section of the act, and question whether action taken by Canadian carrier upon and in connection with reconsignment of the shipments from Montreal to Ste. Therese resulted in overcharges which entitle complainant to an award of reparation, does not come within the jurisdiction of the commission. Natl. Amer. Wholesale Lbr. Asso. v. B. & O., 101 I. C. C. 741.

V. PROCEDURE AND REPARATION

See Procedure Before Commission; Reparation.

§7. In General.

(a) Prayer for rates from nonproducing points in Maryland and Pennsylvania to points on lines of Pennsylvania R. R. Co., applicable on shipments of crushed stone reconsigned out of route or return hauled, denied, in view of fact that the record is inadequate to afford a basis for the prescription of such rates. Budding Co. v. P. R. R. Co., 100 I. C. C. 411, 413, 414.

§10. Damages and reparation.

See Loss and Damage; Reparation.

(a) Shippers are entitled to benefit of reasonable rules in connection with reconsignment privileges, and may recover damages for payment of excessive charges accruing due to default of carriers in providing such reasonable rules. Hull Co. v. Director General, as Agent, 89 I. C. C. 44, 45.

(b) Failure of carrier to transmit diversion orders in connection with two carload shipments of leather moving from Whitehall, Mich., via Norfolk, Va., to Haverhill, Mass., in accordance with tariff rule governing, found to have resulted in damage to complainant to extent of charges collected for storage at Boston, Mass. Reparation awarded. Eagle-Ottawa Leather Co. v. B. & O., 98 I. C. C. 400.

(c) Complainant attacked failure of defendant Norfolk & Western to exercise reasonable diligence toward its diversion instructions subjected it to the payment of unreasonable charges on a carload of ground peanut hulls shipped August 31, 1923 from Suffolk, Va., to Granite City, Ill., and reconsigned to Steubenville, O. Shipment moved N. & W., to Ivorydale, Cincinnati O. Big Four to Granite City, Big Four to Wellington, O., and W. & L. E., beyond. That portion of the haul from Granite City to Indianapolis, Ind., constituted a back haul. Charged 35 and 23.5c to and from Granite City, $8 demurrage at Granite City, $6.30 switching at Granite City and $6.30 reconsigning charge. Applicable rate from Granite City to Steubenville was 30.5c and shipment was undercharged. Car left Suffolk Aug. 31, arrived at Roanoke Sat. Sept. 1. At about 1.45; complainant directed defendants agent at Suffolk to divert the car to Steubenville. The telegram from the agent at Suffolk to defendants general offices in Roanoke was not filed at the telegraph office in Suffolk until 7 p. m. on Saturday, Sept. 1. Apparently the agent was remiss in permitting this delay, Sunday and Monday were holidays. At 9:30 a.m. Tuesday, Sept. 4, defendant requested its transportation department to effect the diversion at Circleville, O, for movement over Pennsylvania beyond. Circleville is about 69 miles north of Portsmouth, O. Routing via Circleville was not directed by complainant but constituted the Suffolk's agent understanding of the proper route to Steubenville. Defendant did not transmit the diversion request to the Big Four. The record is persuasive that if defendant had fulfilled its obligation to accord the diversion request attention the car could have been intercepted in ample time to protest the joint rate. HELD, reparation awarded to rate of 22.5c plus $2.70 diversion charge. Newsome Grain & Feed Co. v. C. C. C. & St. L. Ry. 104 I. C. C. 269.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Commission does not consider that when rates assailed are shown to be unreasonable its hands are bound so tightly by provisions of section 15a of the Act that it can not grant a general reduction unless and until interested carriers as a whole in their respective groups make a fair return. Rates and Charges on Grain and Products, 91 I. C. C. 105, 164.

ALL OTHER CITATIONS

North Carolina Pine Asso v. A. C. L. R. R. Co., 85 I. C. C. 270.

II. LEGALITY OF REDUCED RATES.

See Legality of Rates.

§2½. In general.

(a) C. G. W., C. M. & St. P., Rock Island, M. & St. L., and Northwestern, respondents, proposed to reduce rates on brick and related articles taking same rates, carloads, from Mason City, Sheffield and other adjacent points in Iowa to the Twin Cities and Duluth, Minn., Omaha, Neb., and certain nearby destinations. In view of the withdrawal of all protests against the proposed rates to Minnesota and Wisconsin points, the Commission sees no reason for not permitting them to become effective. HELD, proposed rates not unlawful. Brick and clay products between western points, 93 I. C. C. 81.

(b) Shippers safeguard against exaction of exorbitant charges is found in §1 of the Act, and if persons advocating reductions on certain commodities meet usual tests of reasonableness approved by experience and valid in law, and rates on such commodities are unreasonable, it is Commission's duty to prescribe just and reasonable rates thereon for future. Rates and Charges on Grain and Products, 91 I. C. C. 153, 154.

(c) Commission instituted an investigation as to reasonableness of all of the rates on anthracite coal, and certain questions in respect of shortage of household fuel in the New England states and the Middle Atlantic states are before it. Can the high retail selling prices of anthracite coal, used as fuel for heating of dwellings and buildings and in kitchen ranges, be reduced through reduction of freight rates thereon which may be unreasonable or otherwise unlawful? Should new rates be established for the purpose of facilitating the shipping and distribution of fuels to be used as substitutes for or to supplement domestic sizes of anthracite? The domestic sizes of anthracite include lump, grate, egg, stove and chestnut sizes, called prepared sizes, and pea size. Although $16 per ton, a standard retail selling price, was the price of domestic sizes of anthracite obtained by several dealers in Boston in Nov. 1923, such sizes were sold at retail for $18 per ton in New Britain, Conn., in Jan., 1924, and higher prices were exacted from consumers at various points by speculators during several periods of acute shortage of those sizes. It is apparent that the rates applicable for transportation of domestic sizes of anthracite, the household fuel, over the shorter routes to numerous points of consumption are more renumerative than the rates on many other commodities transported similar distances by the respondent carriers. That present condition, which is of long standing, does not differ materially from a similar condition disclosed in the former investigation, 35 I. C. C. 220, 282. The transportation of anthracite coal produces the principal revenue of several respondent carriers. HELD: The Commission is unable to find that all of the rates on anthracite coal now in force are excessive, unreasonable or otherwise unlawful, and a horizontal reduction of all those rates, to an extent which could be reflected in an appreciable reduction of the retail selling price, would reduce the income of several of the carriers to an extent which would impair their credit, and consequently, their ability to perform sufficient and satisfactory transportation service to the public. The rates on anthracite transported over the shortest route to each of points in New England are lower than the rates on anthracite transported over one or more of the longer routes to each of those points. It is within the power of the respondent carriers to reduce materially the difference in mileage between the short routes on the one hand and several of the longer routes on the other by the formation of new through routes. The present structure of rates on anthra-

cite reflect grouping of mines and grouping of numerous points of destination. This grouping principal is inconsistent with the differences in rates which are now maintained between the shorter and the longer routes.. And it may be noted that if equalization of rates over all these routes should be brought about the carriers would suffer deductions on the longer routes are all carriers that have the advantage of numerous relatively high rates for the shorter hauls. The Clearfield, Pa., district schedule of rates is one of the higher schedules of rates on bituminous coal, considering length of haul, to points in New England states. Nevertheless, the rate to Boston under that schedule is only 6c per ton higher than rates in prepared sizes of anthracite to Boston and the haul of such bituminous averages 138 to 191 miles longer than the haul of prepared sizes of anthracite under the rates as stated. Commission shall not authorize any increases in the rates on anthracite, and it expects the carriers to reduce the higher rates on domestic sizes and pea size of anthracite applicable over the longer routes to the level of the rates applicable over the shorter routes between the same points. The joint rate on prepared sizes of anthracite from mines on D. L. & W. to Watertown, N. Y., a point in the N. Y. C., and not on the lines of any other respondent carrier is $3.91. A joint rate of $3.28 is applicable from those mines via carriers named to Buffalo and the haul to that point via Syracuse is 75 miles longer than the haul to Watertown. HELD: Rate to Watertown should be reduced to that in effect to Buffalo. Rates on anthracite coal of the Reading from mines in Pennsylvania to Philadelphia are under attack, and the rates to Port Richmond to be transhipped therefrom beyond the capes are also under attack. HELD: The rates to Port Richmond are applicable to the rail portion of the transportation of coal partly by railroad and partly by water to Boston and other ports. The rates in question are excessive in that they yield an excessive measure of revenue from the transportation of a low grade, long haul traffic of large volume. Rates attacked unreasonable to extent they exceeded on prepared sizes $1.90 and on pea size and smaller sizes $1.76. Rates on anthracite from mines on the Pennsylvania and Reading to Wilmington, Del., are attacked, prepared sizes $3.02, pea size $2.52, smaller sizes $2.39. Claimed average haul of 170 miles. HELD: Rates attacked unreasonable to extent they exceed on prepared sizes $2.59, pea size and smaller sizes $2.34. Present rates on anthracite coal to North Carolina are combination rates to and beyond Virginia cities. HELD: Rates attacked unreasonable to extent they exceeded $5.75 per ton on prepared sizes. Is the distribution of supplementary fuels restrained or restricted by excessive or unreasonable freight rates? There is an abundant supply of low volatile bituminous coal in certain coal bearing lands of Pennsylvania, Maryland and West Virginia. The rates have not been challenged in this case. Freight rates affect total restraint of the shipping of coal produced from mines in West Virginia to points in the 11 Northeastern states north of Hagerstown, Md., and Washington, D C. That is the only restraint of distribution of household fuel, effected through freight rates which has come to the attention of the Commission in this investigation. Joint rates on low volatile bituminous coal from mines in West Virginia to points in the Middle Atlantic states and the New England states have not been established and there has been no transportation of that coal to those points over all rail routes. The mines are in the New River district on the C. & O. and Virginian and in the Pocahontas district and Tug River district on the N. & W. The applicable rates are the local rates or mileage rates of each carrier forming the through routes, and the aggregate, or combination, of those several local rates produces the rates applicable for the through transportation. The combination rates were intended to have application to exceptional transportation of coal and not to a stable coal traffic. HELD: Reasonable joint rates to points in New England except B. & M., shall be rates that will not exceed by more than $1.10 per gross ton the rates on bituminous coal from the Clearfield to those points and to points on the B. & M., $1.35 more than rates from Cumberland-Piedmont district. If any of the respondent carriers prefer to establish proportional rates to and beyond Hagerstown and Potomac Yard, respectively, instead of establishing the joint rates as prescribed, they may apply to the Commission for modification of the order. And if any of the respondent carriers prefer to make the prescribed joint rates applicable via all rail routes other than the routes prescribed and not over the routes prescribed, they may apply to the Commission for modification of the order. Anthracite Coal Investigation, 101 I. C. C. 363.

Ratings on Army Tractor Tanks, 85 I. C. C. 383.

§4. Government or Municipal Shipments.

(a) United States was not liable for additional charges for transportation of coal over land-aided railroads, under tariff providing for such charges where road haul revenue was less than $1 per ton, though after land grant deduction the balance to be paid in money was less than $1 per ton, since the land received from the government was a part of the compensation for the transportation. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(b) Obligation of land-aided railroads to haul property of the United States at reduced rates was a part of the consideration for which land grant was made, under Land Grant Acts of May 17, 1856, June 3, 1856, March 3, 1857, April 10, 1869, March 3, 1871, and March 3, 1875. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(c) Under Land Grant Acts of May 17, 1856, June 3, 1856, March 3, 1857, April 10, 1869, March 3, 1871, and March 3, 1875, the United States was entitled to transportation of its property over land-aided railroads at reduced rates. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(d) Mere use of government forms of bills of lading on transportation of goods over land-aided railroads is not conclusive that government owned goods at time of transportation requiring railroads to transport goods at land grant rates. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(e) Where contract by which the United States purchased coal, and specifications made part thereof, gave the United States the right to select between delivery at mine and delivery at Gulf ports, provided that, if mine delivery should be selected, the coal should be ordered in carload lots and shipped on government bills of lading, to be furnished by government and that government, in such event should pay freight, and that contractor should provide transportation from cars to government barges, tow barges and furnish and deliver water for steam and drinking purposes at various places, and gave government right to inspect coal after transportation, and to reject it if not in accordance with specifications, and where the United States furnished the government bills of lading under which the coal was transported over land-aided railroads, the title, at time of transportation, was in the United States, entitling government to transportation at reduced rates, under Land Grant Acts of May 17, 1856, June 3, 1856, March 3, 1857, April 10, 1869, March 3, 1871, and March 3, 1875. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(f) Land-aided railroads, having accepted freight at reduced rates for transportation of goods under government bills of lading, with full knowledge of all the facts, without protest against land grant deductions, could not subsequently recover from government the amounts deducted, on theory that ownership of goods at time of transportation was not in the United States. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(g) The use of government bills of lading and the payment of reduced charges by the United States are not sufficient to sustain finding that coal, at time of transportation over land-aided railroads, was the property of the United States entitled to transportation at reduced rates. Louisville & N. R. Co. v. United States, 45 Sup. Ct. 233.

(h) The city of Grafton, N. Dak., desiring to take advantage of the reduction in freight rates on sand, gravel, and crushed rock when used for public purposes, persuaded John O'Connor Co., to permit the shipments to be billed to the city and to pay the city the full tariff rates, thus giving the city the benefit of the 10-cent per net ton reduction which was in accord with the intention of carriers in providing for such reductions. FOUND, that the arrangement was not entered into with any intent to defraud the railroad company nor to take undue advantage of the provisions for this reduction provided in the tariff circulars, and the company did not benefit by the reduction but permitted the city to obtain such lawful benefit. Reparation awarded. Hopeman Material Co. v. N. P. Ry. Co., 98 I. C. C. 361, 369, 370.

§4½. Reasonableness and discrimination.

See Blanket Rates §10½ (h), §13 (k); Branch Lines §1 (bb); Commodity Rates §2½ (a), §5

(g); Discrimination; Evidence §12 (1) (3v); Long and Short Hauls §12 (2) (a); Rail and Water Rates (c); Reasonableness of Rates; State Rates and Regulations (vv).

(a) The commission is impressed with the view that a carrier should not so publish its rates that further reductions might take place automatically; but they should be so published that any contemplated reductions would be made only after they had received the carrier's careful consideration with a view to determining whether or not they would have the effect of so reducing the revenue as unduly to burden other traffic. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 530, 531.

(b) The commission is impressed with the view that a carrier should not so publish its rates that further reductions might take place automatically; but they should be so published that any contemplated reductions would be made only after they had received the carrier's careful consideration with a view to determining whether or not they would have the effect of so reducing the revenue as unduly to burden other traffic. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 530, 531.

(c) Proposed to reduce rates on crushed stone from Gladhill, Advance, and Maria Furnace, Pa., and Flint, Deerfield, and Baltimore, Md., to Niagara frontier points, but to restrict such rates to movements in open-top cars, found justified. Crushed Stone from Maryland and Pennsylvania, 89 I. C. C. 681.

(d) Western Maryland Ry. proposed changes in rates and commodity descriptions in its tariff naming rates on stone from stations on its line and the Hagerstown & Frederick to trunk line, New England and Niagara frontier points. Reduced rates proposed were on crushed stone from Gladhill, Advance and Maria Furnace, Pa., and Flint, Deerfield and Baltimore, Md., to Buffalo, N. Y., Lockport, N. Y., and other Niagara frontier points from $3.28 to $3.05 but to restrict these rates to movement in open top cars. They further proposed to add a new commodity description namely, stone chips or granules, and to apply a rate of $3.40 on that commodity from and to the points named. In addition, they proposed to make no change in the figures of the rates but to change the description from crushed stone to stone chips or granules, in certain items naming rates from Gladhill, Advance, Maria Furnace, Flint and Deerfield to Jersey City, N. J., and other trunk line and New England points. Gladhill and Advance are on the W. M., 19 miles west of Gettysburg Pa., Baltimore rate territory. Lockport is northeast of Buffalo in the Buffalo rate group and Niagara frontier point, served by the N. Y. C., and Erie. The general basis of rates, both class and commodity, from the Baltimore group to the Buffalo group is the same as the basis of rates from the Philadelphia rate group to 60% points in central territory, of which Erie is representative. The rates on stone chips or granules to central territory are substantially less than the rates on crushed stone and are about 48% of the sixth class rates, while the rate to Erie and the proposed rate to Lockport on stone chips or granules are higher than the rates on crushed stone and are more than 60% of the sixth class rates. The restriction of crushed stone to open top cars would appear to impose no handicap on shippers of greenstone or ordinary crushed stone as the requirement is but the observance of the present general practice. To points in trunk line and New England the change of description from crushed stone to stone chips or granules would appear to impose class rates on ordinary crushed stone to these points in the event that any should move, although the record is silent on that point. No explanation is offered why rates on crushed stone in open top cars were not published to these points as well as to Buffalo rate territory. HELD, respondents have justified the inclusion of the description "stone chips or granules (roofing granules)" in addition to the modified description of crushed stone in open top cars and reduced rates proposed for the latter justified. Respondents have not justified proposed increase in the rates on the commodity which it is proposed to designate as stone ships or granules. Crushed stone from Maryland and Pennsylvania, 89 I. C. C. 681.

(e) Respondents proposed reductions in class and commodity rates from points on the Central Vermont Ry., New London, Conn. to Fonda Junction, Vt., to points generally in central and western trunk line territories. The proposed rates were published to comply with fourth section order 8833. By that order the Commission denied application to con-

tinue rates from New York to Chicago, Ill., Milwaukee, Wis., lower than from intermediate points in New England. The fourth section applications are based upon applicants desire to compete with routes which are shorter and which afford more expeditious and efficient service, namely, standard all rail, differential all rail, standard rail and lake, differential rail and lake, ocean and rail canal and lake. Rates from New York not lower than the sixth class rates are reasonably compensatory. HELD proposed rates not justified, applicants authorized to maintain not less than the present sixth class rates but not lower than present rates from New York. Rail and lake rates from New England, 92 I. C. C. 106.

(f) Respondents proposed to establish reduced rates on cement, carloads, from Dixon, Ill., La Salle, Ill., and Hannibal, Mo., to points in Kentucky, served by the L. H. & St. L. Maine line of the L. H. & St. L. extends along the south bank of the Ohio river from Henderson, Ky., its western terminus to Strawberry, Ky., 6 miles south of Louisville, Ky., and, through trackage arrangements with the L. & N., it serves Evansville, Ind., and Louisville, Ky. on through business. The only river crossings touched by it are Evansville and Henderson on the west and Louisville and New Albany, Ind., on the east. It is to points served by this main line that the proposed rates apply. Buffington and Hannibal now have reduced rate on cement to the destinations on this line, whereas the other points of production named have had the proposed reduced rates deferred. HELD, suspended schedules justified. Cement from Illinois and Missouri, 92 I. C. C. 133.

(g) Respondents proposed to reduce the rates on spelter, carload from Fort Smith, South Fort Smith and Van Buren, Ark., to Chicago, and East St. Louis, Ill., St. Louis, Mo., and Milwaukee, Wis. Spelter is zinc. Rates to Chicago and Milwaukee are based differently over rates to St. Louis. As smelters came to be established in southeastern Kansas they were accorded the Joplin rates, now known as group 1 rates. Later Bartlesville prevailed in getting the Joplin rates extended to it. Rates from the Fort Smith territory were established in 1916 on a basis higher than group 1 rates, and by August 5, 1916, these same rates applied generally from points beyond group 1, including Quinton and Henryetta. Fourth sections violations would exist under the rates as proposed on shipments moving to Chicago and Milwaukee over the Ft. S. & W. No violations would occur on shipments moving to or through St. Louis. It would be possible to move shipments from South Fort Smith or Van Buren by way of Kansas City to Chicago at the rate of 24c, such shipments moving through Quinton from which the rate is 25.5c. The proposed schedules would destroy a rate parity of long standing as between the points here considered and certain competing points on a commodity which is highly competitive and would injuriously affect smelters at such competing points. HELD, proposed schedules would unduly prefer South Fort Smith and Van Buren to the undue prejudice of Quinton and they have not been justified. It is unreasonable to apply group 1 rates from Quinton and when this is done the group 1 rates may be published from South Fort Smith and Van Buren. Spelter from Arkansas, 92 I. C. C. 136.

(h) Respondents proposed to reduce the rates on tin, terne, and black plate, carloads, from defined territories as provided in Lelands I. C. C. 1641 to Houston, Tex., and Texas gulf ports taking the same rates. They are carload rates from Pittsburgh. Present rates are 88c on tin plate and 90c on the others. The 90c rate represents the New Orleans combination. Proposed rates are on tin and terne plate 76c and on black plate 74.5c. Present rates to Texas common points except black plate, represents the Deming, N. M. maximum of 90c. Present rate on black plate to Texas common points is 102 c. In July 1924 respondents published other schedules which were not protested, naming the same rates to Louisiana and Arkansas destinations as those proposed to the Houston group. Houston interests at hearing stated they desired the all rail rates be maintained on a normal all rail basis. HELD, proposed schedules not justified. Tin, terne and black plate, 92 I. C. C. 356.

(i) Complainant attacked commodity rates on common stoneware, carloads, from Monmouth, Macomb and Whitehall, Ill., to N. Dakota and eastern Montana as unreasonable, unjustly discriminatory and unduly prejudicial as compared with rates from Red Wing, Minn. Routes from points of origin are via St. Paul, Minn. Distances to St. Paul over Burlington are 394 miles from

Monmouth, 425 from Macomb and 501 from Whitehall, distance from Monmouth via M. & St. L., 392 miles. Red Wing is 40 miles southeast of St. Paul on the C. G. W., and C. M. & St. P. In 81 I. C. C. 64, the Commission prescribed a reduction on earthenware and stoneware from Red Wing to north Pacific coast and intermediate transcontinental territory from the Group E to the Group F basis or from $1.35 to $1.28. Red Wing, Monmouth and Whitehall are in Group E and there had been a substantial parity between them since 1987 to the north Pacific coast territory and since 1906 to points in intermediate territory affected by the reduction. From Red Wing to the west the general basis of rates is class B joint or combination, with the coast rate as a maximum. Defendants express a willingness to remove the hump in the difference between Red Wing and the Illinois points by reductions from the latter which will result in maximum difference in eastern Montana of 9c. The proposed maximum difference in eastern Montana of 9c would remove the irregularities in the relationship and would give complainants all the relief to which they are entitled. HELD, reductions proposed by defendants would result in fair, nondiscriminatory and nonprejudicial rates, complaint dismissed. Western Stoneware Co. v. C. B, & Q. Ry., 93 I. C. C. 143.

(ia) Fact that saving per individual farmer in event of a rate reduction is small, presents no reason why his freight rates should not be reduced if unreasonable. Rates and Charges on Grain and Products, 91 I. C. C. 105.

(j) Proposed changes in rates on petroleum and products from points in Missouri, Kansas, and Oklahoma to stations on M. & O. R. R. between East St. Louis and Cairo, Ill., for purpose of placing all destinations on Chicago, Ill., basis, but which would represent increases at East Carondelet and Cairo and reductions at intermediate points, found not justified as to increases, but justified as to reductions. Under respondent's revised proposal fourth-section departures at Murphysboro, and other intermediate points while lessened in degree, would be continued. Petroleum from Southwestern States, 91 I. C. C. 464.

(k) Reduction of a rate by a carrier to meet lower rates of other lines does not warrant a finding that prior rate was unreasonable. Smythe Co. v. C. S. S. Co., 92 I. C. C. 95, 96.

(l) Proposal to comply with commission's order denying fourth-section relief with respect to rates from New York City, by reducing class and commodity rates from points on Central Vermont Ry. in New England, to points in c. f. a. and western trunk-line territories applying via differential rail-and-lake route through Depot Harbor, Ontario, and boat line of Canada Atlantic Transit Co., found not justified. Present rates from New York are reasonably compensatory and to permit removal of fourth-section departures by reducing the intermediate rates would necessitate reductions over other routes at competitive points, result in a chaotic condition of rates throughout New England, and further aggravate financial difficulties of New England lines. Rail-and-lake Rates from New England, 92 I. C. C. 106.

(m) Proposed reductions in rates on cement from Dixon and La Salle, Ill., and Hannibal, Mo., to points in Kentucky served by L. H. & St. L. Ry., established in compliance with findings in Atlas Portland Cement Co., 81 I. C. C. 1, and for purpose of meeting reduced rates from Buffington to Kentucky destinations established in connection with construction of certain large dams and engineering works by United States Government along Ohio River, found justified. Rates on cement to Kentucky stations from Buffington, Dixon, La Salle, Oglesby, Hannibal, and St. Louis have heretofore borne some relationship which carriers desire to maintain. Cement from Illinois and Missouri, 92 I. C. C. 133.

(n) Proposed reduced rates on spelter from Fort Smith, South Fort Smith, and Van Buren, Ark., to Chicago, East St. Louis, St. Louis, and Milwaukee found not justified. Fourth-section violations would result; rate parity of long standing as between points here considered and certain competing points would be destroyed; and Quinton, Okla., would be subjected to undue prejudice in favor of South Fort Smith and Van Buren. While level of proposed rates has been justified, a proper rate relationship as between competing points is in many respects of greater importance to shipping public than measure of rates themselves. Spelter from Arkansas, 92 I. C. C. 136.

(o) Proposed reduced all-rail rates on tin, terne, and black plate from certain defined territories to Houston, Tex., and points taking same rates, designed for

purpose of meeting lower rail-water-and-rail rates from and to the same points, found not justified. Proposed schedules would result in new and unauthorized fourth-section departures and increase those already existing. Tin, Terne and Black Plate, 92 I. C. C. 356.

(p) Proposed reduced all-rail rates on tin, terne, and black plate from certain defined territories to Houston, Tex., and points taking same rates, designed for purpose of meeting lower rail-water-and-rail rates from and to same points, found not justified. Proposed schedules are to alternate with those now published, thereby adding to tariff complexity already existing; they would result in new and unauthorized fourth-section departures and increase those already existing; and would subject Dallas and Fort Worth, competing points, to undue prejudice and disadvantage. Tin, Terne, and Black Plate, 92 I. C. C. 356.

(q) Proposed reduced rates on brick and related articles taking same rates from Mason City, Sheffield, and other adjacent points in Iowa to Twin Cities and Duluth, Omaha, and certain near-by destinations, found not unlawful. Brick and Clay products between Western Points, 93 I. C. C. 81.

(r) Proposed establishment of commodity rate lower than prevailing class basis on insulators from Emeryville, Calif., and other western points to transcontinental Groups F to J, inclusive, found justified. Considering extensive areas of the respective groups, proposed rate is not materially out of line with rates from Macomb, Ill., and other eastern producing points. Eastbound Transcontinental Rates on Insulators, 93 I. C. C. 282.

(s) Proposed reduced charges for handling fertilizer, fertilizer materials, cement, and salt at south Atlantic and certain Gulf ports, found justified. Present charges are so high that they have resulted in practices by shippers which obviate the necessity for railroad handling of these commodities and a consequent heavy loss of revenue. Proposed charge is not unreasonably high nor is there warrant for holding that it is unduly prejudicial. Moreover, cost figures submitted by carriers while tending to show that reduced charges will probably not cover all costs if cost is to be ascertained by distributing all burdens over all traffic, indicate that they will produce considerable return in excess of direct out-of-pocket costs of the services. Handling Charges on Cement, Fertilizer, and Salt, 93 I. C. C. 640.

(t) In Reduced rates, 1922, 68 I. C. C. 676, the commission found rates on coal unreasonable and ordered a 10-per cent reduction. Carrier requested that it be excluded from findings in that case, which request was denied upon supplemental report in 73 I. C. C. 189. Rate charged on shipment moving just prior to date when carrier published the reduced rates in compliance with commission's order in the supplemental proceeding found unreasonable and reparation awarded. St. Anthony & Dakota Elevator Co. v. D. & S. L. R. R., 96 I. C. C. 49.

(u) Schedules proposing reduced rates on seed potatoes from Minnesota to Washington were suspended upon a prima facie showing that they would result in undue prejudice to Montana shippers unless latter were accorded contemporaneous reduction in their rates and protestant so advised. Both voluntary reductions were subsequently authorized by commission, and prior order of suspension vacated. Relying on these facts, complainant, brought by former protestant, sought reparation on shipments moving prior to date reductions became effective. HELD: Question of reasonableness was not before commission and no final finding was made with respect to undue prejudice. Complaint dismissed. Northwest Potato Exchange v. G. N., 96 I. C. C. 187.

(v) Commission's approval of suspended schedules, provided reductions were made on seed potatoes from Montana points to Yakima district sufficient to put them on a nonprejudicial basis with respect to proposed temporary reductions from Minnesota origins to same district, "the commission to be final judge of measures of rates to Montana," was transmitted to complainant by telegram on March 31, 1923. Construing this as a finding of previous unreasonableness, complainant contends that, transportation conditions being identical, rates on shipments made in April, May, and June, 1922, were unreasonable to extent they exceeded temporary rates. HELD: Schedules were suspended upon a prima facie showing that undue prejudice would result unless Montana shippers received contemporaneous reductions and question of reasonableness was not before commission, nor was a final finding made with respect to undue prejudice. Moreover, mere reduction of rate by carrier voluntarily is insufficient to prove former

rate unreasonable. Northwest Potato Exchange v. G. N., 96 I. C. C. 187.

(w) Further contention that undue prejudice is shown because complainant was not appraised of contemplated reduction in rates from Minnesota origins to Yakima district, made subsequent to expiration of temporary-reduction period, until too late to file a protest, not sustained. Undue prejudice is not alleged in complaint nor are rates established subsequent to temporary reduction period attacked as unreasonable. North west Potato Exchange v. G. N., 96 I. C. C. 187, 190.

(x) Proposed reduction in rates on cement from Kansas City and Sugar Creek, Mo., and Bonner Springs, Kans., to St. Joseph, Mo., and related points in Kansas and Missouri found unduly prejudicial to the Kansas gas-belt mills, including Dewey, Okla., and unduly preferential of Sugar Creek, Kansas City, and Bonner Springs, and not justified, in that it would tend to destroy the existing cement-rate structure prescribed in Western Cement Rates, 48 I. C. C. 201, 52 I. C. C. 225, and 69 I. C. C. 644. Cement from Kansas City to St. Joseph, 96 I. C. C. 718, 725.

(y) Rates assessed on l. c. l. shipments of returned empty steel drums from Sartell, Minn., and Groos and Menominee, Mich., to North Milwaukee, Wis., found applicable but found to have been unreasonable to extent they exceeded l. c. l. rates, based on a rating of one-half of fourth class, contemporaneously in effect on returned empty iron drums in same general territory, which rates and rating were subsequently made applicable on steel drums, returned empty. Reparation awarded. Vera Chemical Co. v. C., M. & St. P., 98 I. C. C. 3.

(z) Upon contention that rates, during the period defendants were not permitted to establish reduced rates, were unreasonable to the extent they exceeded the subsequently established reduced rates, HELD, Reversal in 69 I. C. C. 345 of finding in 63 I. C. C. 74 as to propriety of proposed reduction was not tantamount to a finding that previous rate was unreasonable. What the commission may permit carriers to do and what it may require them to do are entirely different matters. Union Sulphur Co. v. T. & N. O. R. R. Co., 98 I. C. C. 76, 81.

(aa) Respondents proposed reduced rates on iron and steel articles, carloads, from the Birmingham district to the Houston group. Respondents proposed like rates to intermediate points in Louisiana to which the present rates are higher than those proposed to the Houston group in order to avoid violations of the fourth section. Included in the suspended schedules is a proposed reduction from 48c to 33c in the rate on cotton ties and bucklers. None of the protestants is interested in this rate. The proposed reduced rates apply only on district on the L. & N., Southern, I. C., or Frisco, when routed via Baton Rouge or New Orleans and S. P., or G. C. L., beyond. The reductions are 3c and 3.5c except on plate the reduction is 16c. By the suspended schedules, published upon the specific instructions of the south western respondents to the tariff publishing agent given after the other southwestern lines had voted against such action, it is proposed to restore the rates from the Birmingham district maintained prior to Sept. 1, 1924 thus disrupting the long existing parity of rates with St. Louis and the relationships with iron and steel producing points in defined territories. The distance between Birmingham and Houston proper is 708 miles and from St. Louis to Houston 823 miles. Fourth section departures would be created under the proposed revision. There is no evidence of unlawfulness in the proposed rate on cotton ties and buckles. HELD, suspended schedules not justified, except on cotton ties and buckles. Iron and steel from Birmingham, 102 I. C. C. 7.

(aab) Proposed reduced rates on iron and steel articles from Birmingham, Ala., district to Houston, Tex., group, and to Louisiana points intermediate to Houston group, designed, among other things, to assist the industries served in meeting the competition from iron and steel mills in seaboard territory, which have lower rail-and-water rates via Atlantic ports, found not justified, except on cotton ties and buckles, the rate on which was not protested and no evidence of unlawfulness was offered. Iron and Steel from Birmingham, 102 I. C. C. 7.

(aac) Proposed reduced rates on iron and steel articles from Birmingham, Ala., district to Houston Tex., group and to Louisiana points intermediate to Houston group, designed to restore the rates previously maintained, thus disrupting the long-existing parity of rates with

St. Louis and the relationships with iron and steel producing points in defined territories, found not justified, except on cotton ties and buckles. Iron and Steel from Birmingham, 102 I. C. C. 7.

(aad) Proposed reduced rates on iron and steel articles from Birmingham, Ala., district to Houston, Tex., group, and to Louisiana points intermediate to Houston group, designed to meet competition of the water route and to assist industries served in meeting competition from iron and steel mills in seaboard territory having lower rail-and-water rates, found not justified except on cotton ties and buckles, the rate on which was not protested and no evidence of unlawfulness was offered. Proposed schedules would disrupt the long-existing parity of rates with St. Louis and the relationships with iron and steel producing points in defined territories, and create departures from long-and-short-haul clause of section 4 of the act. Iron and Steel from Birmingham, 102 I. C. C. 7.

(aae) Proposed reduced rates on iron and steel articles from Birmingham, Ala., district, to Houston, Tex., group and to Louisiana points intermediate to Houston group, designed, among other things, to meet the competition of the water route, found not justified, except on cotton ties and buckles, the rate on which was not protested and no evidence of unlawfulness was offered. It may fairly be assumed that rates resulting from findings in 98 I. C. C. 567 will enable respondents to meet the water route competition from Birmingham under a more favorable rate adjustment than that which would have resulted under rate they proposed with a continuance of the present total rate over that route. Iron and Steel from Birmingham, 102 I. C. C. 7.

(aaf) Rate on common brick from Blue Island, Ill., in Chicago switching district, to Illinois and Indiana points within that district, during Federal control, to which a flat increase of 2 cents per 100 pounds was added under General Order No. 28 of director general, found not unreasonable as compared with rate subsequently established when the rate basis was changed by addition of 25 per cent in lieu of the flat increase. In 64 I. C. C. 273 a rate similar to that here charged was found not unreasonable, and if that decision is correct the rate in effect within the switching district prior to the increase must have been less than a reasonable maximum rate. Moreover, in a similar case, 73 I. C. C. 215, it was found that considering the congested conditions in and around Chicago a rate equal to that charged can scarcely be denominated high even on a low grade commodity and for comparatively short distances. Illinois Brick Co. v. Director General, 102 I. C. C. 64.

(aag) Rate on wet brewers' grain from Philadelphia to Newark found unreasonable to extent it exceeded lower rate subsequently established, which lower rate was contemporaneously in effect over another route and in the reverse direction over defendants' own route. Reparation awarded. Penn. Grains & Feed Co. v. R. Co., 102 I. C. C. 100.

(aah) Applicable rate on dried beans from Mills, N. Mex., to Rockdale, Tex., found unreasonable to extent it exceeded lower contemporaneous rate on like traffic from and to same points over other available routes and to contiguous points, which lower rate was not made applicable to Rockdale over route of movement until subsequent to movement here involved through error on part of carriers. Reparation awarded. Waco Chamber of Commerce v. E. P. & S. W., 102 I. C. C. 105.

(aai) Proposed reduced rates on iron and steel articles from Birmingham and other southern producing points to Memphis and intermediate points found not unreasonable but unduly prejudicial. Respondent's position is that while present rate is not unreasonable high, if Birmingham is to continue to sell its products in Memphis it must meet the barge competition which exists by way of the Ohio and Mississippi Rivers. However, establishment of the proposed rates while maintaining a higher rate from St. Louis and Louisville to Memphis would be unduly prejudicial to the latter points and unduly preferential of the points from which the proposed rates are published. Iron and Steel Articles from Southern Points, 102 I. C. C. 175.

(bb) Respondents proposed to reduce the rates on certain manufactured iron and steel articles, carloads, from Birmingham, Ala., and other southern producing points to Memphis, Tenn., and intermediate points. The proposed reductions to points intermediate to Memphis are only such as would be necessary to avoid violations of the fourth section. Principal respondents are the Frisco and Southern. The short line distance from Birmingham to Memphis, 252 miles, is over the former. Over the lat-

ter the distance is 284 miles. HELD, proposed rates not unreasonable but the establishment of such rates, while maintaining a rate in excess of 31.5c from St. Louis, Mo., and Louisville, Ky., to Memphis would be unduly prejudicial to the latter points and unduly preferential of the points from which the proposed rates were published. Iron and steel articles from southern points, 102 I. C. C. 175.

(cc) Respondents proposed certain increases and reductions in rates on petroleum and its products, carloads, from Ohio and Mississippi river crossings to southern destinations. The adjustment of rates as proposed became effective June 10, 1925 from all points named in in the Wood river district, except from St. Louis and Wood River points, over or in connection with the B. & O., or Big Four. On traffic from these points of origin moving over the B. & O., or Big Four to Ohio river crossings Lawrenceville is an intermediate point; and respondents at that time had failed to readjust the rates from Lawrenceville to correspond with the changes in rates from St. Louis. No rates from Lawrenceville were suspended and, effective August 1, 1925 the B. & O., and Big Four established proportional rates of 7c from that point to Cairo, Ill., and Evansville, Ind., thereby complying with the requirements of the fourth section and readjusting rate relationships as between St. Louis and Lawrenceville, so that the latter, to the destinations here considered, now has an advantage in rates generally of 2c. From all these points the rates in issue are in practically every instance 9c higher than from Cairo and Evansville and are the same as have been in effect over other routes on and since June 10, 1925. The rates in issue in connection with the B. & O., and Big Four are joint rates and are the result of a general adjustment. HELD, proposed schedules justified. FOURTH SECTION APPLICATIONS. Authority is sought to continue rates on petroleum and its products, carloads, from Ohio and Mississippi river crossings to destinations in North Carolina, South Carolina, and Virginia without observing the long and short haul provision of section four. There are now no departures from the fourth section at points of origin when traffic from St. Louis over or in connection with the B. & O., or Big Four. Practically no evidence was introduced by applicants in support of their request in connection with the maintenance of the present differential adjustment of rates to Carolina territory and relief will be denied. HELD, applicants may maintain lower rates from Ohio and Mississippi river crossings to competitive points in North Carolina, South Carolina, Virginia than maintained to intermediate points in which their lines are 15% or more longer, but not more than 70% longer, than the short line routes between the same points, provided the present rates to said intermediate points shall not be increased except as authorized, and that they shall not exceed the lowest combination, and that relief granted herein shall not extend to intermediate points as to which the haul of the petitioning line is not longer than that of the direct line or route to the competitive points, and that the relief granted shall not extend to routes that are less than 15% or more than 70% longer than the direct line or route to the said competitive points. Petroleum to southern points, 102 I. C. C. 756.

(cca) Proposal to readjust rates on petroleum and products from St. Louis and Wood River district points to southern destinations over or in connection with B. & O. or C., C., C. & St. L., comprising some increased but more and greater reductions, found justified. Proposed schedules will result in rates same as those now in effect over routes other than B. & O. and C., C., C. & St. L. Petroleum to Southern Points, 102 I. C. C. 756.

(dd) Respondents proposed reductions in the rates on pig iron, carloads from producing points in Alabama, Tennessee, Kentucky and Virginia to Kansas City and St. Louis, Mo., Ohio river crossings and related and intermediate points. The proposed rates are not constructed with a view to maintaining any specific rate relationship nor is it contended that they are reasonable maximum rates. They are merely the result of an arbitrary reduction which, according to the shippers, is the least that will do them any good and, according to the Frisco, is the greatest that it can afford to make. The Frisco which does not reach Ohio river crossings, only proposed to establish these rates to Kansas City and St. Louis. Other southern lines such as the Southern, L. &. N., I. C., agreed that the rates proposed to St. Louis and Kansas City were justi-

fied and met them via their lines. There is nothing upon this record to indicate that any of the proposed rates are less than reasonable maxima, and the Commission does not regard them as much. Not one of the carriers serving the Birmingham district and having a controlling voice in the rates from that district serves or has a controlling voice in the rates from the Southern Ohio district, Cleveland or Chicago. Some of them may have in the rates from Granite City, but the movement of pig iron from that point to Louisville to Cincinnati is not material, and the Commission does not believe that under this adjustment the difference in its favor of $3.412 would hurt that protestants opportunities in competing with Birmingham in the St. Louis market. HELD, suspended schedules justified. Pig iron from southern points, 104 I. C. C. 27.

(ee) Respondents proposed generally to reduce their carload rates on grain and grain products, and upon seed and seed products from Colorado, Wyoming, Nebraska, Kansas, Arkansas, Oklahoma and Missouri to points in Louisiana west of the Mississippi river, except to New Orleans and certain contiguous points in the southern portion of the state. Also to restrict the routing in connection with the proposed reduced rates from points on the Rock Island, MKT, K. C. C. & S. Ry., Frisco or when in connection with the S. P., so that they will not apply over routes through Texas. Neither the present nor proposed rates from points on the M. P., apply through Texas. From points on the other lines, the present rates apply over routes through Texas as well as over routes through Arkansas. Transit is permitted in connection with these rates, so that wheat may be shipped to milling points in Arkansas, Kansas, Missouri, Oklahoma and Texas and there may be milled into flour and the flour forwarded to destinations in Louisiana at rates protecting the through rates from point of origin of the wheat. This permits free competition among the millers in buying wheat in the affected origin territory. The suspended schedules propose to reduce the rates over the routes generally through Arkansas only, and thereby will disrupt the present parity in rates to the disadvantage of Texas millers, who claim that this will shut them completely out of the Louisiana markets. The proposed rates will restore the general basis of rates in effect from the origin territory prior to April 1, 1922, will remove many fourth section departures in Louisiana, and harmonize a maladjustment of rates to the destination territory. The proposed reductions in the local rates from Kansas City, and in the rates from the country points beyond, will remove many violations of the fourth section. Except from points in Colorado and southern and southwestern Oklahoma the routes through Texas are generally longer than those through Arkansas that carry the traffic. The M. P., Burlington, U. P., and lines similarly situated do not operate routes through Texas. The record does not warrant the Commission in condemning the proposed rates from points on those lines, particularly since such rates will remove numerous fourth section departures in the present rate structure and in addition will effect a more consistent adjustment than that now in force in the destination territory. This record does not show that the suspended rates are unreasonably low. HELD, proposed schedules, except those publishing rates from points on the MKT Rock Island Frisco justified, rates from points on those lines not justified. Grain and grain products from western points 104 I. C. C. 272.

(ff) Respondents proposed both increased and reduced rates on clean rice and rice products, carloads, from Arkansas, Louisiana and Texas and from Memphis, Tenn., to points in central and western trunk line territories. The origin territory is divided into several groups, namely, the Arkansas group, of which Stuttgart, Ark., may be taken as representative; the Lake Charles, or interior Louisiana-Texas group, of which Lake Charles, La., is representative; and the Memphis and New Orleans, La., groups. The readjustment proposed is in purported compliance with the direct result of 93 I. C. C. 517. The rates proposed to points in central territory are those prescribed therein or are made with close relation to such rates; they represent largely, if not almost entirely, reductions, and no reason appears why they should not be approved. The case may, therefore, be confined to a consideration of the proposed rates to western trunk line points, including Chicago and points on the Mississippi river. The rates proposed by the socalled east side lines and the K. C. S., and connections to the Missouri river cities

and related points are in some instances lower than those proposed by the other lines. This is particularly true of the rates from New Orleans. With respect to the rates to Omaha and Sioux City, it may be said that the I. C., with its own line from New Orleans, apparently controls the situation and the K. C. S., desires to meet the rates of that line. The I. C., and other east side lines maintain lower rates on traffic in general to the territory they directly serve than do the west side lines for similar distances, except that between Mississippi river points, St. Louis and south, the west side lines are permitted to meet the rates of the east side lines and charge higher rates at intermediate points. The adjustment proposed by the K. C. S., to the Missouri river cities is in part violative of the order in 93 I. C. C. 517. If rates are not promptly published in conformity with the order in the case mentioned, proceedings under the penal provisions of the act will be considered. HELD, the rates proposed by the lines east of the Mississippi river and by the K. C. S., and connections, which are lower than the rates proposed from and to the same points by the west side lines other than the K. C. S., and connections, have not been justified. The rates proposed to points in central territory, and by the west side lines other than the K. C. S., and connections to points west thereof, have in general been justified, subject to correction of admitted errors, in the proposed rates to Thebes, Ill., and Grand Island, Neb., and except that the rates to the Missouri river groups should not exceed, from Arkansas and Memphis to Omaha 59c; from Lake Charles to Ommaha, 69c; from New Orleans to Omaha, 72c; from New Orleans to Kansas City 66.5c. Rice from Arkansas, Louisiana and Texas, 104 I. C. C. 681.

(gg) Respondents proposed to reduce their rates on coal, in carloads, from southern Illinois, Murphysboro, Centralia and DuQuoin districts to St. Louis, Mo., and a few nearby points in Missouri. The present rates over all routes from the southern Illinois group to St. Louis is $1.385 and the proposed rate, limited to certain routes is $1.35 representing a reduction of 3.5c. The reductions to St. Louis proposed from the DuQuoin, Centralia, the Murphysboro groups, which are intermediate to the southern Illinois group, are 0.5, 1 and 3c, respectively. The rates proposed from all of the points of origin to the destinations near St. Louis are in harmony with those proposed to St. Louis. The present rate over all routes from the southern Illinois group to St. Louis is the outgrowth of 62 I. C. C. 741, 64 I. C. C. 751. On traffic to St. Louis the differential prescribed in the cases mentioned as between the southern Illinois and Belleville groups was 22.5c or the same as had applied prior to May 1, 1925. The present rate of $1.385 from the southern Illinois group to St. Louis which became effective as a part of the general revision of July 19, 1925, and which represents an increase of 3.5c over the rate previously in effect, reflects this differential, the rate from the Belleville group being $1.16. The reduced rates are for application only from mines on the M. P., Burlington, I. C. C. & E. I., M. & O. and certain short lines, and if permitted to have become effective as published would have left the rates to St. Louis established as a part of the general revision of July 19, 1925, in effect only one month. The proposal is made under the leadership of the M. P., with the support of the Burlington. To approve the $1.35 rate to St. Louis merely because it would bear a proper relationship to the intrastate rate to East St. Louis would be to hold that intrastate rates may control interstate rates HELD, reduced rates not justified. Coal from Southern Illinois, 107 I. C. C. 415.

(hh) Complainant attacked rate charged on one car of empty beverage packages returned from Little Rock, Ark., to St. Paul, Minn., on Feb. 4, 1919, as unreasonable to extent it exceeded aggregate of intermediates. Shipment moved over M. P., to East St. Louis, Burlington beyond, charged 43c which was one-half of joint fourth class rate. Intermediates were 14.5c from Little Rock to East St. Louis and 16.5c beyond, total 31c. There was also in effect via Kansas City, Mo., a combination rate of 29.5c made up of 14.5c to Kansas City and 15c beyond. Subsequent to movement joint commodity rates of 31c and 29.5c were established over both routes. The shipment was tendered to the carriers without routing instructions but inasmuch as the joint rate on the basis of one-half fourth class, 43c, was also applicable via Kansas City, the shipment was not misrouted. HELD,

rate attacked not unreasonable, complaint dismissed. Hamm Brewing Co. v. Director General, 107 I. C. C. 600.

(ii) This is an application under the fourth section of the act, filed by western transcontinental carriers for authority to establish reduced rates on certain commodities, from points in eastern defined territories, Groups D to G inclusive to Pacific coast terminals lower than are observed at intermediate destinations. The origin territory extends from Chicago, Ill., on the east, to Denver, Colo., on the west. The destinations are ports served by steamship lines operating between the Atlantic and Pacific coasts through the Panama canal. It is proposed to reduce the rates to the Pacific coast ports in order to place the manufacturers of the Middle West more nearly upon a rate equality with their eastern competitors who by reason of their location on or near the Atlantic seaboard enjoy the advantage of cheaper water transportation. The applicants hope that by stimulating traffic through the proposed reductions they may be able to increase their net revenues, but they do not propose to apply the reduced rates to intermediate destinations, since to do so would more than offset the gain from increased traffic to the ports. It is claimed that the reductions proposed are necessary if the western rail carriers are to transport to the Pacific coast in any volume articles produced or manufactured in the Middle West which are also produced on or near the Atlantic seaboard and more therefrom through the Panama canal at rates substantially lower than the present all rail rates from the origin territory covered by this application. Previous cases 74 I. C. C. 48, 40 I. C. C. 35 and 46 I. C. C. 236. At the time of the hearing in the present case the intercoastal movement was greater than at any previous time in the history of the canal. That many of the commodities embraced in the application move in considerable volume through the canal is evident from the record. This is particularly true of iron and steel. The incidental charges for the transportation by water consists in the main of wharfage, handling and marine insurance. Considered as a whole, it can not be said that the proposed terminal rates, with the exception of the rate on ammunition, are lower than would be necessary to permit the Middle West manufacturers to compete on relatively equal terms with manufacturers located at same distance from the seaboard who ship their products through the Atlantic ports. But before the relief from the operation of the fourth section which is here sought may be granted the Commission must be satisfied that there would not thereby be created infractions of other provisions of the act, particularly those of section 3 prohibiting undue or unreasonable preference or advantage to persons or localities. It should likewise be convinced that the adjustment proposed will result in the substantial benefits which its proponents anticipate. The relief sought is based primarily on market competition. The natural advantage of location near the Atlantic seaboard which Pittsburgh enjoys is to be neutralized by extending it to points from 500 to 1,500 miles farther away. Manufacturers of other commodities in the Middle West would also be accorded a basis of rates to which they are not legitimately entitled by any natural advantage which they possess, whereas the manufacturers of the same commodities on the seaboard would have their advantage taken from them or diminished. While the manufacturers in the Middle West in effect would thus have accorded to them the advantage of proximity to water transportation and would be placed more nearly on an equality with the eastern manufacturers with respect to shipments of the latter moving to the Pacific coast ports through the canal, they would not only continue to enjoy the advantage of their more westerly location on traffic moving all rail from the east, but this advantage would be increased. It is important to note also the effect the proposed reductions would have on the dealers and consumers on the Pacific coast and in the intermountain states. At the present time they are on an equality in purchasing in the central west. If the reductions sought in the terminal rates are granted, this equality will no longer obtain. The Pacific coast dealers will retain their present ability to purchase more cheaply in the eastern markets and in addition will have the advantage of being able to purchase in the markets of the middle west upon more favorable terms. Dealers in the intermountain territory and on the Pacific coast purchase in the same markets and compete for sales in the same territory. With the eastern markets now closed to the intermountain dealers except on payment of higher freight rates, and the Middle

West available on equal terms with the Pacific coast dealers, to accord to the latter the markets of the Middle West also on more favorable terms than can be obtained by the intermountain country, must necessarily be prejudicial in effect. The record is far from convincing that the establishment of the proposed rates will result in the benefits which the applicants anticipate. The proposed rates on iron and steel articles, from which the applicants hope to obtain their greatest increase in net revenue, might be expected to divert some of the traffic which now originates in the Pittsburgh district if the rail and water rates from Pittsburgh remain the same. There is no assurance, however, that the eastern rail carriers and particularly the water lines would permit any substantial diversion of their traffic without making an effort to retain it. They would be urged to take this action by eastern manufacturers whose business would suffer through loss of their Pacific coast trade. A slight reduction in the water rate would suffice to retain the advantage to the rail and water route, and this would call for further reductions in the rates of the western carriers to bring about the near equalization of the Middle West and eastern markets. On the other hand, if the western carriers were not inclined to meet reductions in the water or rail and water rates the competitive situation would remain as it is at present, the revenues of the applicants and the water lines would be unnecessarily reduced, the Pacific coast shippers would receive the only advantage. The opportunity for shrinkage in the rail and water rates from interior eastern points will be clear when it is borne in mind that the eastern carriers now charge full local rates to the seaboard, and that it is more profitable for the water lines to accept westbound traffic at very low rates rather than that their ships shall sail under ballast. If the hopes of the applicants should be realized the benefits which they as a whole might obtain from the granting of the application would be greatly disproportionate to the loss which the water lines would suffer. The record shows that the total tonnage, both eastbound and westbound, of all the water lines is but a very small fraction of that of the transcontinental carriers operating west of Chicago. It is evident, therefore, that the diversion of any substantial tonnage from the water lines would have but an unappreciable effect on the net revenues of the rail carriers. On the other hand, it might very seriously impair the ability of the water lines to maintain their present standard of service. HELD, application for authority to depart from the long and short haul provision of the act should be denied. Commodity rates to Pacific coast terminals, 107 I. C. C. 421.

(jj) Proposed readjustments, involving increases and reductions, in rates on livestock in single-deck and double-deck cars between points in Arizona and New Mexico on the one hand and Deming, N. Mex., and El Paso, Tex., on the other, to conform with the scale of rates prescribed in American National Livestock Asso., 26 I. C. C. 37, found not justified as to the increases, the proposed reductions not being protested. Suspended schedules ordered cancelled without prejudice to the filing of new schedules publishing the proposed reduced rates. Peyton Packing Co. v. A. E. R. R. Co., 100 I. C. C. 4, 8, 15.

(kk) Proposed reduced rates on potatoes and onions from certain points in Colorado, Utah, and Wyoming to destinations in California found justified. Proposed rates are in conformity with respondent's practice of grouping main and branch-line points in western Colorado in making rates on agricultural products, will remove alleged undue prejudice suffered by producers in western Colorado, and are compensatory. Present rates are admitted to be prohibitive, although not unreasonably high. Potatoes and Onions from Colorado, Utah, and Wyoming to California, 100 I. C. C. 49, 51.

(ll) Application for authority to further reduce rate on sulphur from points in Texas and Louisiana to California terminals without observing the long-and-short-haul provision of fourth section of the act, denied, on ground that proposed rate has not been shown to be reasonably compensatory as required by the act. Sulphur to California Terminals, 100 I. C. C. 369.

(mm) Proposed readjustment of rates on live and dressed poultry, butter and eggs from points in Kentucky, Tennessee, Alabama, and Mississippi to eastern cities and Buffalo-Pittsburgh zone, resulting, among other things, in reduction in rates generally, found justified. Dairy Products from Southern Points, 100 I. C. C. 756.

(nn) Correspondence leading up to the reduction of a rate can not be taken as an admission that the previous rate was unlawful. Memphis Freight Bureau v. S. & E. I., 101 I. C. C. 26, 27.

(oo) Proposed waiver of out-of-line charges at Kansas City on grain and products from points in Kansas and Colorado through Kansas City for reshipment under domestic and export rates to interior destinations in Texas and Louisiana and to Texas Gulf ports for export, designed to meet carrier competition, and which will result in an excessive amount of extra transportation without additional charge, found not justified, even temporarily. Transit at Kansas City, 101 I. C. C. 696.

(pp) Wabash R. R., proposed to reduce rates on bituminous coal, carloads, from mines on the Wabash at Springfield and Riverton, Ill., to Keokuk and other destinations in Iowa. A similar proposal to reduce the intrastate rates from Springfield and Riverton to Quincy and other destinations in Illinois was filed with the Illinois Commission, and became effective. C. & A., tariff contains reductions similar to those proposed by the Wabash to Keokuk and to Hannibal and Oakwood, Mo. Big Four published reduced rates on bituminous coal from southern Illinois district to destinations in Iowa including Keokuk, to meet rates which had been published by the Burlington from southern Illinois to Iowa, including Keokuk. No objection to reduced rates published by the Big Four from southern Illinois, suspension as to them being vacated. The proposed reductions would have the effect of destroying the differential relationship prescribed in 62 I. C. C. 741. No attempt was made by respondents to justify the proposed rates to Hannibal and Quincy except on the basis of the competitive relationship and the long existing grouping of the three cities in the publication of coal rates from the Illinois mines. The failure to make the reductions apply uniformly from all mines in the Springfield district would result in a splitting of that district into two groups for which there has been no justification. HELD, rates proposed by Wabash and Alton not justified. Bituminous coal from Illinois 112 I. C. C. 369.

§5. **Returned or old shipments.**

See Advanced Rates §17 (kk); Classification §5 (i) (bb), §7 (j), §12⅞, §15 (h), §16 (e) (f), §17 (yy), §22 (i); Demurrage §5 (a); Overcharges (t); Reasonableness of Rates §28 (j); Routing and Misrouting §5½ (e); State Rates and Regulations (yy).

(a) Rates on secondhand steel rails and angle bars, in mixed carloads, from Sault Ste. Marie, Mich., to Duluth, Minn., found unreasonable to extent they exceeded lower rates from Sault Ste. Marie, Ontario, a farther distant point, which lower rates were published in accordance with Rule 77 of Tariff Circular 18-A and were subsequently established from Sault Ste. Marie, Mich. Reparation awarded. Duluth Iron & Metal Co. v. Director General, as Agent 89 I. C. C. 343.

(b) The Commission has repeatedly declined to sanction the principle that old and secondhand articles are necessarily entitled to lower ratings than the same articles when new. Levenes Sons v. D. L. & W. Ry., 93 I. C. C. 103.

(c) Complainant attacked ratings on files in the three classification territories as unreasonable, unjustly discriminatory and unduly prejudicial as applied to socalled worn out files from various points to Anderson, Ind. Under the general heading of "tools", files or rasps, iron or steel, are rated third class in official and second class in southern and western classifications, as are mechanics tools and an iron or steel hardware. Used files are subject to the ratings on "files" without distinction in the classification of tariffs between the new and used articles. Complainant does not generally buy scrap iron as such, the old files being purchased for the purpose of reworking them and with the expectation that they will be found in fit condition to be reworked. The second class of shipments, which comprises the larger part of the traffic, consists of used files which are returned for reconditioning, under contract, by concerns to which new files are sold by complainant. The classification, as well

as practically all tariffs naming rates on scrap iron, provides that such rates will apply on scraps or pieces of iron or steel having value for remelting purposes only. HELD, ratings not unreasonable or unlawful, complaint dismissed. Continental File Co. v. P. C. C. & St. L. Ry., 93 I. C. C. 373.

(d) The Commission is not prepared to lay down the principle that old or second hand articles must be treated differently from new or that value is the controlling element in making rates. Such of these articles or parts as are in fact scrap are entitled to the scrap rate, but if they have any value as the articles which they originally purported to be, the Commission does not feel that it can require the carriers to transport them at other than the regular tariff rates applicable to the new or originally transported article. Continental File Co. v. P. C. C. & St. L. Ry., 93 I. C. C. 373, 376.

(e) Complainant attacked class rates charged on empty returned beverage bottles carloads from Atlanta, Ga., to Evansville, Ind., and Milwaukee, Wis., since August 26, 1920, as unreasonable and unduly prejudicial. Shipments to Evansville moved over N. C. & St. L. to Nashville, Tenn., and L. & N., beyond. To Milwaukee 12 moved through Cairo, Ill., and two through Evansville. For many years bottles returned in carloads were rated in southern classification on basis of one half of the inbound carloads rate on the beer or beverage. On Oct. 10, 1921 by exception to the classification, the rating was reduced to 66 2-3% of inbound beverage rate. In official classification rating was and is fifth class, but effective Jan. 1, 1922 the lines north of the Ohio river reduced the rating to 80% of the sixth class. With respect to the cereal beverage trade it is self evident that the return of the empty bottles is contemplated by both consignor and consignee. For that reason and on account of the nonadaptability of these containers to other uses the practice of according rates lower than those on new containers should not be discouraged. The measure of such lower rates can not be made the subject of any hard and first rules, but must depend, as do all rates, upon the facts and circumstances of record, taking into consideration the low value of the commodity, the volume of the movement, and other material elements. HELD, between August 26, 1920 and Oct. 6, 1921 rates attacked unreasonable to extent they exceeded 66 2-3% of sixth class to Cairo and Evansville and sixth class beyond, reparation awarded. Bradley & Woertz v. N. C. & St. L. Ry., 93 I. C. C. 512.

(f) Rates on returned shipments should not, on principle, be made lower than the rates on the original movement, and that the return element should be disregarded. Bradley & Woertz v. N. C. & St. L. Ry., 93 I. C. C. 512, 515.

(g) Complainant attacked class rates charged on empty returned cement bags from Texas points to Ada, Okla., as unjust and unreasonable in that it exceeds rates applicable locally in Texas. Western classification provides a fourth class rating, and by exceptions to classification defendants accord a rating of one half of fourth class on same articles moving wholly in Texas. Bags or sacks in which cement is shipped are seldom lost or damaged in transit and the insurance risk is low. They require little care in transportation. No reason has been suggested for rating them higher for interstate than for intrastate transportation in the same general territory. HELD, rates charged unreasonable and unduly prejudicial to extent they exceed one half of fourth class. Oklahoma Portland Cement Co. v. A. & S. Ry., 93 I. C. C. 605.

(h) Complainant attacked class rates charged on 23 cars of paper winding cores from Kansas City, Mo., to Wisconsin Rapids, Wis., between April 27, 1921 and Feb. 1, 1922 as unreasonable, unjustly discriminatory and unduly prejudicial. Paper winding cores are metal centers on which newsprint paper is wound. Shipments moved via the C. M. & St. P., 624 miles charged fifth class rate of 46c. The rate on newsprint paper between Kansas City and Wisconsin Rapids was 34c. Effective Feb. 1, defendant provided in its tariff that the rate on cores returned to the mill point from which originally shipped wound with paper would not exceed the rate on newsprint paper in the reverse direction. Defendant admits rate charged unreasonable to extent it exceeded 34c. HELD, rate attacked unreasonable to extent it exceeded 34c, reparation awarded. Nelson Estate v. C. M. & St. P. Ry., 93 I. C. C. 607.

(i) Complainant attacked class and commodity rates charged on 28 cars of old steel rails from Nitro, W. Va., to Detroit, Mich., Akron, O., and McKees Rocks, Pa., as unreasonable, unjustly discriminatory and unduly prejudicial in relation to rates on like shipments from West Virginia, Pennsylvania, Ohio, Illinois and Maryland to same destinations. Rated sixth class, charged sixth class to Akron 24.5c, Detroit 27c, and to McKees Rocks 25.5c. The contract of sale described the rails as unused steel rails, in good condition except for surface rust caused by exposure to weather during storage. The rails did not come within the varying commodity descriptions covering old rails or rails for scrap or relaying. There are no rate comparisons and there is no other evidence to indicate that the rates charged were unreasonable or otherwise unlawful as applied to rails of that description. Nor is there anything in the record to suggest that there will be shipments from Nitro of rails different in character from those covered by this complaint. HELD, rates attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Hyman Michaels Co. v. K. & M. Ry., 95 I. C. C 623.

(j) Complainant attacked class rates charged on carloads of carbon black buildings and parts, knocked down, from Wilsonburg, W. Va., to Guthrie and Swartz, La., as unreasonable. They moved as routed over B. & O., to St. Louis, Mo., beyond M. P., to Swartz 1,106 miles, and M. P., and connections to Guthrie 1,111 miles, charged class A rates of $1.31 to Guthrie and $1.28 to Swartz. The rates on iron and steel articles and machinery from Wilsonburg to the destinations here considered are the same as those from Pittsburgh. Generally speaking, it is not the policy of the carriers to maintain lower rates on secondhand iron, steel or machinery than on new articles of like character. The record does not show that there has been or is likely to be a substantial movement of any of the articles included in those shipments from Wilsonburg to Guthrie or Swartz. HELD, rates attacked not unreasonable, complaint dismissed. Peerless Carbon Black Co. v. A. & L. M. Ry., 95 I. C. C. 696.

(k) Complainant attacked class rates charged on steel drums or barrels returned empty from Sartell, Minn., and Groos and Menominee, Mich., to North Milwaukee, Wis., between August 2 and Sept. 20, 1922 as unreasonable, unjustly discriminatory, unduly prejudicial and unlawful to the extent they exceeded the rates on returned empty iron drums. The western classification provided a rating of fourth class on iron and steel drums, old, in less carloads, and class C carloads, which ratings would apply on returned shipments in the absence of other provisions. Paid fourth class, less carloads. Under exceptions to western classification then in effect a rating of one half fourth class for less carloads was applicable upon iron drums or barrels, and iron and steel cylinders, second hand, returned empty. Effective Dec. 15, 1922 after these shipments moved, this item of the classification was amended to read drums or barrels, iron or steel, and iron or steel cylinders, secondhand, returned empty, less carloads. An article, when made of iron, may take a different rate from the same article made of steel. HELD, rating charged applicable, but unreasonable to extent they exceeded one half fourth class, reparation awarded. Vera Chemical Co. v. C. M. & St. P. Ry., 98 I. C. C. 3.

(l) Return of empty milk cans by consignee of full cans and carrier after contents have been used is proper subject for custom. American Ry. Express Co. v. Mohawk Dairy Co. (Mass., 1924) 144 N. E. 721.

(m) Charges assessed for return movement of privately owned tank cars after Federal control, which moved loaded during Federal control, found inapplicable. Equalization rule governing mileage on tank cars was suspended during Federal control and at termination thereof was restored. Applicable tariffs, however, continuously carried a rule under which private tank cars would "be moved empty, without charge, at time movement is made," and transition from Federal to corporate control did not annul their effect. Moreover, applicable tariff applied to complete transaction and it could not be nullified by restoration of equalization rule. It follows, therefore, that such equalization rule was applicable only on shipment initiated on and after its effective date. General Petroleum Corp. v. C. B. & Q. R. R. Co., 91 I. C. C. 388.

(n) Tariff in effect when shipments were made carried a provision for return

of empty cars without additional charge. Subsequently such provision was nullified by restoration of so-called equalization rule governing mileage on tank cars. HELD: Since tariff in effect when shipments were made applied to the complete transaction, provision for return of empty cars without additional charge could not be nullified by restoring rule. Conf. Rulings 172 and 471. General Petroleum Corp. v. C. B. & Q. R. R. Co., 91 I. C. C. 388, 393.

(o) Shipments of used army knapsacks, in cases, were billed as old rags, in cases, and charges were collected at rate applicable on old rags. When shipments moved knapsacks or haversacks, in boxes, any quantity, were rated first class. FOUND: Commission having repeatedly declined to sanction principle that old and secondhand articles are necessarily entitled to lower ratings than same articles when new, first-class rates were legally applicable and shipments were undercharged. Levene's Sons v. D., L. & W., 93 I. C. C. 103.

(p) Application of existing classification ratings on steel files, l. c. l. to shipments of used or worn files, returned for reconditioning, found not unreasonable or otherwise unlawful. Practice of applying same rating on used as on new files extends to all other kinds of tools and machinery, such as agricultural implements, etc., and many of such articles are shipped secondhand or are returned to manufacturers for repairs or reconstruction. Moreover, in Minneapolis Traffic Asso., 23 I. C. C. 432, 437, the commission pointed out the difficulties which would be encountered in practicable application of different rates on old and on new articles of same kind. Continental File Co. v. P., C., C. & St. L., 93 I. C. C. 373.

(q) Rates on empty returned beverage containers from Atlanta to Evansville and Milwaukee, found unreasonable to extent they exceeded rates based upon 66⅔ per cent of sixth class to Cairo and Evansville and sixth class beyond, minimum 20,000 pounds. Reparation awarded. Bradley & Woertz v. N., C. & St. L., 93 I. C. C. 512.

(r) Measure of rates on returned empty cereal-beverage containers lower than on new containers cannot be made the subject of any hard and fast rule, but must depend, as do all rates, upon facts and circumstances of record, taking into consideration low value of the commodity, volume of movement, and other material elements. Bradley & Woertz v. N., C. & St. L., 93 I. C. C. 512, 515.

(s) With respect to cereal-beverage trade it is self-evident that return of empty bottles is contemplated by both consignor and consignee, and for that reason and on account of nonadaptability of these containers to other uses practice of according rates lower than those on new containers should not be discouraged. Bradley & Woertz v. N., C. & St. L., 93 I. C. C. 512, 515.

(t) The return of empty beverage containers to manufacturer for refilling benefits carrier because it encourages use of substantial containers and furnishes additional revenue for empty-return movement, benefits manufacturer because it permits repeated use of same container, and benefits public because it makes for a lower cost of the product. Bradley & Woertz v. N. C. & St. L., 93 I. C. C. 512, 515.

(u) Rates on empty returned beer packages, c. l. and l. c. l, from eastern points to La Crosse, Wis., found unreasonable to extent they exceeded the aggregate of intermediates to and from Chicago. Joint rates which exceeded the aggregate of intermediates are prima facie unreasonable and evidence in instant case affords an unsatisfactory rebuttal of that presumption. Reparation awarded. La Crosse Chamber of Commerce v. Director General, 93 I. C. C. 602.

(v) Fourth-class rates on empty returned cement bags and sacks from Texas points to Ada, Okla., found unreasonable and unduly prejudicial as compared with rates of one-half of fourth class contemporaneously in effect on same commodities wholly within Texas and other states; also with similar lower rates on both state and interstate movements of various other empty returned containers in same genera' territory. Measure of reasonable rates prescribed. Oklahoma Portland Cement Co. v. A. & S., 93 I. C. C. 605.

(w) Rates on empty returned bags and sacks, found unreasonable and unduly prejudicial as compared with lower rates on various other empty returned containers. Oklahoma Portland Cement Co. v. A. & S. Ry., 93 I. C. C. 605.

(x) Acid carboys are not desirable freight and can not be handled as expedi-

tiously or cheaply as other empty returned containers which can be tiered. There is considerable danger involved in their handling, and many restrictions not operative with respect to other empty returned containers increase cost of their transportation. Carboys, Returned Empty, in Western Territory, 93 I. C. C. 672, 673.

(y) Fourth-class rates assessed on l. c. l. shipments of cases and casks, containing empty bottles, returned from Saxon, Wis., and Herman and Hancock, Mich., to Duluth, Minn., found unreasonable to extent they exceeded one-half of the fourth-class rates, subject to the fourth-class minimum charge. Prior to movement applicable tariffs authorized use of the lower rates between these points, and after movement such basis was restored. Moreover, one-half of fourth-class has been applicable in western trunk-line territory for many years, and competitors of complainant at St. Paul and Minneapolis, Chicago, and Milwaukee, enjoyed that basis at time of movement of shipments here under consideration. Reparation awarded. Fitger Brewing Co. v. D., S., S. & A., 95 I. C. C. 3.

(z) Rates on old unused steel rails found not unreasonable or otherwise unlawful as compared with rates on scrap rails and old rails for re-laying. Rails shipped were new in sense that they had never been used, but they did not come within varying commodity descriptions covering old rails or rails for scrap or re-laying. No comparisons or other evidence were submitted to indicate that rates applied were unreasonable or otherwise unlawful as applied to rails of the kind shipped; nor is there anything in the record to suggest that there will be shipments from origin point here under consideration of rails different in character from those involved. Hyman-Michaels Co. v. K. & M., 95 I. C. C. 623.

(aa) Charges on secondhand carbon-black houses, iron or steel, k. d., secondhand iron and steel articles and secondhand machinery in mixed carloads, from Wilsonburg, W. Va., to Guthrie and Swartz, La., based upon the highest c. l. class rate applicable on the various articles, found not unreasonable as compared with rates on iron and steel articles from and to same points. Ton-mile earnings under rates assailed yield less than those under rates found reasonable on similar shipments in 73 I. C. C. 123; moreover, record does not show that there has been or will be a substantial movement of any articles included in shipment between points here involved. Peerless Carbon Black Co. v. A. & L. M. Ry., 95 I. C. C. 696.

(bb) Generally speaking, it is not the policy of carriers to maintain lower rates on secondhand iron, steel or machinery than on new articles of like character. Peerless Carbon Black Co. v. A. & L. M. Ry., 95 I. C. C. 696, 698.

(cc) Where through error or oversight on the part of some agent or employee, a shipment is billed to an erroneous destination carriers may return such astray shipments to their proper destinations without assessment of additional charges. Conference ruling 217. Tidal Osage Oil Co. v. Director General. 96 I. C. C. 112, 114.

(dd) Rates assessed on l. c. l. shipments of returned empty steel drums from Sartell, Minn., and Groos and Menominee, Mich., to North Milwaukee, Wis., found applicable but found to have been unreasonable to extent they exceeded l. c. l. rates, based on a rating of one-half of fourth class, contemporaneously in effect on returned empty iron drums in same general territory, which rates and rating were subsequently made applicable on steel drums, returned empty. Reparation awarded. Vera Chemical Co. v. C., M. & St. P., 98 I. C. C. 3.

(ee) Shipments of returned empty fruit boxes, in carloads, from Los Angeles, Calif., to various intrastate destinations, during Federal control, found overcharged to extent that charges assessed exceeded the lowest charges under tariff rules providing that the charge for a car fully loaded must not exceed the charge for same lot of freight if taken as a l. c. l. shipment, subject to a minimum charge on each car. Reparation awarded. Klein-Simpson Fruit Co. v. Director General, 98 I. C. C. 547.

(ff) Complainant attacked commodity rates charged on worn out and discarded locomotive boiler flues or tubes from Harvey, Chicago and East St. Louis, Ill., St. Paul, Minn. and Omaha, Neb., to Cedar Falls, Ia., as unreasonable to extent they exceeded rates on scrap iron. The gate manufactured by complainant consists of a wire fabric held in place by a frame made of iron and steel pipe. Most of the shipments on

which reparation is asked were purchased of scrap iron dealers, though it was testified that the flues used by complainant are generally shipped direct from the carriers yards; that when removed from the boilers they are piled separately from other scrap; and that complainant takes them as they come from the pile. Rates on scrap iron are generally restricted to apply on scraps or pieces of iron or steel, having value for remelting purposes only, the tariffs as a police measure also often imposing the requirement that the iron be broken in pieces at point of origin so that it can not be put to any other use. But locomotive boiler tubes shipped by complainant do not meet any of these requirements. They are not only broken into scraps before shipment but would be of no value to complainant in the manufacturing of gates if broken into pieces at that time or during the reconditioning process. In fact from 5 to 10 per cent of the flues shipped by complainant are unfit for its use and including that material and the ends cut from others it appears that complainant throws out "as scrap" from 20 to 25 per cent, which unserviceable material is subsequently cut into small pieces and sold to local foundries for remelting. HELD, rates attacked not unreasonable or unlawful, complaint dismissed. Iowa Gate Company v. B. & O. R. R., 104 I. C. C. 169.

(gg) A shipment having been accepted by the consignee at destination and removed to his place of business was subsequently returned to the delivering carrier, the outbound charges were refunded and included in the return way bill as advanced charges. Upon delivery of the returned shipment to the original consignor the return charges, as well as such advance charges, were demanded and collected: HELD, that the published rate for the return movement was the only charge that carrier could lawfully exact from the original consignor. Heimeman Lumber Co. v. C. St. P. M. & O. Ry., 107 I. C. C. 62, 63.

(hh) Complainant attacked charges collected on five cars of obsolete lathe parts shipped during April, 1924 from Providence R. I., to Jersey City, N. J., as in violation of sections 1 and 6 of the act. Two of the shipments were billed as machine parts, one as machinery and one as castings, and one as a mixed shipment of steel rolls, machine bases and steel bars. Charged at rates applicable to articles of the character of the billing, but complainant contended that the articles shipped fall within the description "scraps and pieces of iron or steel having value for remelting purposes only." The articles shipped were originally manufactured as parts of a type of lathe, but the use of that type had been discontinued about a year prior to the movement of the shipments. They had been stored in the open prior to movement, were similarly stored at destination, and are being used for remelting purposes only. The lathe parts were in no case broken up, and did not therefore, come within the term "scraps or pieces" as those words are used in the tariff description. From a transportation standpoint they were not different from new articles of the same description. They were loaded by shippers in cars of the type ordinarily used for new articles of the same class, and some of the larger pieces were cleated or braced on the cars. HELD, rates sought not applicable, not unreasonable, complaint dismissed. McCabe Lathe & Machinery Co. v. N. Y. N. H. & H. R. R., 107 I. C. C. 311.

(ii) Complainant attacked commodity rates charged on 18 cars of returned empty beverage packages shipped from Little Rock and Fort Smith, Ark., to St. Paul, Minn., between March 6, 1918 and Nov. 6 1918 as unjust, unreasonable, unduly prejudicial and in violation of the fourth section. Charged 34.5c from Little Rock prior to June 25, 1918 and 43c thereafter, from Fort Smith 39.5c prior to June 25, 1918 and 49.5c thereafter. On April 24, 1919 the 31c combination rate on St. Louis was made applicable and on July 1, 1919 the rates were further reduced to the Kansas City combination of 29.5c. The evidence submitted by the director general is sufficient to rebut the presumption of unreasonableness which attaches to a through rate which exceeds the aggregate of intermediates. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Hamm Brewing Co. v. Director General, 109 I. C. C. 444.

(jj) Complainant attacked ratings and rates on new and on junked old worn out automobile armatures, less carloads, between Oklahoma and Indianapolis, Ind., as unjust and unreasonable. Armatures, electric, loose or on skids, or in boxes or crates, are rated less carloads,

first class in official and western classifications and second class in southern, and, in carloads, in packages, loose or on skids, minimum 30,000 pounds, fifth class in official, sixth class in southern and class A in western. Electric armatures are not rated as automobile parts. The record before the Commission is indefinite in that it refers almost entirely to one type of automobile electric armature and contains little or no information as to automobile electric armatures generally and how such armatures compared with other small armatures in value, loading weight per cubic foot, volume of movement, etc. Complainant asks that automobile electric armatures be segregated from other kinds, although there is no basis in the record for assuming that they are entitled to more favorable ratings. Complainants prayer for a lower rating on worn out or burned out electric automobile armature than on new ones is in practical effect a request for the junk rating on the former. The general rule in classifying is that used or second hand articles will be given lower ratings than new articles of the same kind only when the old articles have no value except as junk. The most frequent departures from this rule are in cases of return shipments of various articles, such as bags, or other containers, used in connection with shipments. Old automobile electric armatures clearly are more than junk and there appears to be no justification for giving them the junk rating. HELD, rates and ratings attacked not unreasonable, complaint dismissed. Oklahoma Traffic Asso. v. A. R. R. R., 109 I. C. C. 457.

§6½. To encourage markets or meet Competition.

See Market Competition.

(a) A reduction in the rates on cotton would have a very serious effect on the ability of many short lines serving Mississippi to earn sufficient revenue to serve the public efficiently as many of the short roads serving that State are unable to stand any appreciable losses in revenue. The traffic density of these short roads is low and while they are seeking to stimulate greater production of farm produce the tonnage has not yet reached a heavy state. Some short lines are unable to pay operating costs; the rates from many points on such roads are held down by the force of cross-country competition with points situated on stronger trunk lines; and to compel them to bear any greater strain would undoubtedly cause an impairment of service inimical to the general welfare of Mississippi. Mississippi R. R. Commission v. A. & V. Ry. Co., 89 I. C. C. 47, 69.

(b) Proposed reduced rates on numerous commodities from New York, N. Y., piers of Southern Pacific Co.-Atlantic S. S. Lines (Morgan Lines), applying by water to Galveston, Tex., and New Orleans, La. thence by rail to points on lines of Southern Pacific system in New Mexico, Arizona and California, designed for purposes of meeting rates of competing water carriers operating through the Panama Canal, found justified. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512.

(c) There is ordinarily no point in voluntarily reducing a freight rate except for purpose of attracting traffic. Utah State Automobile Asso. v. A., T. & S. F., 92 I. C. C. 376, 385.

(d) Proposed reduced rates on iron and steel articles from Birmingham, Ala., district to Houston, Tex., group and to Louisiana Points intermediate to Houston group, designed to meet the competition of the water route and to assist the industries served in meeting the competition from iron and steel mills in seaboard territory having lower rail-and-water rates, found not justified, except on cotton ties and buckles, the rate on which was not protested, and no evidence of unlawfulness was offered. Proposed schedules would, among other things, create departures from long-and-short-haul clause of fourth section of the act. Iron and Steel from Birmingham, 102 I. C. C. 7.

II. DUTY TO FURNISH.

§2. In General.

(a) Deciduous fruits usually move under refrigeration, in refrigerator cars which are considerably heavier in proportion to their loading capacity than box cars. The shipments must be stopped at various points en route for reicing and expedited schedules are maintained which are faster than those for citrus fruits and other freight, except fresh vegetables and cantaloupes, and necessitate a reduction in the tonnage of 20 to 50 per cent below that of "drag trains." Calif. Growers' & Shippers' Protective League v. S. P. Co., 100 I. C. C. 79, 96, 98.

(b) Pork-hide trimmings are always shipped in iced refrigerator cars and receive expedited service, whereas calfskin trimmings, sinews, and horn piths move in ordinary box cars without protective service, are not accorded expedited movement, load more heavily, and are of much less value. Glue Stock in Official Classification Territory, 101 I. C. C. 601, 603.

§3. Incidental Services and Charges.

See Additional Charges and Services; Special Rates and Services; Switch Tracks and Switching §5; Transportation.

(a) Instead of contributing in proportion pro rata to total cost of transportation, ice transportation service perhaps should contribute on basis of out-of-pocket costs incident to additional gross car weight due to ice. Out-of-pocket costs possibly do not exceed 50 per cent of total costs. Refrigeration Charges from Florida, 85 I. C. C. 247, 252.

§3½. Icing and Re-icing.

See Infra §3½a; Top Icing.

(a) Complainant attacked rates charged on dressed poultry, butter eggs and other dairy products, in straight and mixed carloads, from certain points in United States and Canada between August 1919 and December 1919, as illegal and in excess of the published tariff rates in that defendant refused to pay com-

plainant the published allowance for the cost of initial icing of the shipments, which icing was performed by complainant at its cost. In 77 I. C. C. 678, the Commission found that charges for ice and salt furnished by the carrier were illegal. Between August and December 1919 defendant published rules providing compensation for ice or for ice and salt used in the initial icing in central territory of shipments of butter, cheese, eggs, dressed poultry, fish, game, and other perishable freight rated third class or higher, carload minimum 15 000 pounds. During the period covered by these complaints the tariffs carried provision for an allowance to shippers for ice furnished by the shipper for initial icing and after Sept. 5, 1919 for an allowance for ice and salt. HELD, failure of defendants to pay complainant for ice and salt furnished in accordance with tariff illegal, reparation awarded. Swift & Company v. Director General, 92 I. C. C. 263.

(b) Complainant alleged that by reason of the failure and refusal of defendants to perform the service of icing interstate less carload shipments of milk, skim milk, cream plain condensed milk, butter-milk, and pot cheese from New York and Connecticut to destinations in those states, it was charged rates that were unreasonable unjustly discriminatory and unduly prejudicial. Defendants are New Haven and Central New England Ry. Shipments are made in less carloads. In 45 I. C. C. 412, the Commission prescribed a scale of rates on milk and other dairy products from territory of origin, including icing when necessary. Defendants have never performed the initial icing service required by the rule. Beginning Nov. 1, 1922, defendants agreed to the payment not exceeding $3 per ton, pending final determination as to whether defendant should perform the service or reimburse complainant for doing it. After that date defendants, upon advice of counsel, declined to carry out the agreement and discontinued allowances to other milk shippers in March 1922. HELD, defendants failure to ice when necessary less carloads of milk unreasonable, reparation denied, as the record fails to establish the reasonable cost of icing such shipments. Bordens Farm Products Co. v. N. Y. N. H. & H. R. R., 92 I. C. C. 270.

(ba) Upon further argument, former report, 92 I. C. C. 270, affirmed and failure or refusal of defendants to perform service of icing interstate l. c. l. shipments of milk and other dairy products, as provided by tariff, from points in New York and Connecticut to destinations in those States, while exacting rates including such service, found to constitute an unreasonable and unlawful practice. Reparation denied for lack of proof of amount of damages sustained. Borden's Farm Products Co. v. N. Y., N. H. & H., 102 I. C. C. 497.

(bb) Reicing charge named in tariff as applying at Evansville, Ind., found applicable to shipments reiced at Howell. Howell was not indexed in tariff as a station; it is a corporate part of the city of Evansville, and the icing plant was and is located within the municipal as well as the switching limits of that city. Under these circumstances a lower reicing charge named in tariff as applying at "all other points" was not applicable at Howell. Swift & Co. v. A. & R. R. R., 102 I. C. C. 499.

(c) Complainant attacked charges paid for icing and reicing in transit of dressed poultry, and butter and eggs, carloads, shipped between August 1, 1919 and Jan. 23, 1920 from Chicago, Ill., Moulton, Ia., Quincy, Ill., to New York and from Oklahoma City, Okla., Keokuk, Ia., and Fort Wayne, Ind., to destinations in official territory as unreasonable and in violation of section 6. The individual tariffs of the carriers which performed the icing service in question provided for separate charges for icing in transit and there is a general provision in the exception to the official classification for the application of the tariffs of the individual carriers in respect to miscellaneous charges, including icing charges. HELD, icing charges applicable except via the Wabash, reparation awarded. Schweitzer Co. v. Director General, 109 I. C. C. 663.

(d) Proposed change in perishable protective tariff rule to effect that ice and salt will be supplied by carrier in body refrigerator cars equipped with ice bunkers or tanks only when cars are moving under full standard refrigeration, found not justified. Such rule with the proposed change would necessitate the payment of full stated refrigeration charges as a condition precedent to performance of this service and result in increased charges which respondents made no attempt to justify. Furnishing Ice and Salt, 88 I. C. C. 361.

(e) Imposition of charges provided in rule 240 (A) of perishable protective

tariff No. 1, in addition to applicable freight rates, on fresh meats and packing-house products initially iced by consignor and delivered to carrier with instructions not to re-ice in transit, from points in Washington, Oregon, California, and Nevada to interstate destinations, found to result in unreasonable total charges. Reparation awarded and revision of tariffs required. Frye & Co. v. G. N. Ry. Co., 88 I. C. C. 477.

§3½a. Top Icing.

See Supra §3½; Top Icing.

(a) Respondents proposed certain changes in the rules, regulations and practices affecting the charges for refrigeration and handling of perishable freight at points in the United States. In the past few years there has grown up a practice of loading ice on the top of perishable freight in the body of the refrigerator cars. This practice, at first confined to a comparatively small originating territory and to certain vegetables, particularly the socalled iceburg lettuce, is growing rapidly, not only as to the originating territory but also as to the number and variety of vegetables. Respondents do not receive any additional compensation for the haulage of ice placed upon top of the load which weighs from 1,500 to 12,000 pounds. It is with a view to securing compensatory charges for the transportation of this ice and the alleged resultant damage to the car that the proposed changes in refrigeration rules are designed. The only method provided by the carriers for preserving perishable vegetables and fruits while in transit is by ice placed in bunkers located at each end of the standard refrigerator car. This is accomplished usually under standard refrigeration, which consists of filling the bunkers with about 9,000 pounds of ice at point of origin and reicing the car at regular icing stations enroute to destination. For this service a stated refrigerator charge is made. If the shipper does not desire standard refrigeration he fills the bunkers with ice or requests the carrier to perform this service, noting on the bill of lading "do not reice". In that event a charge to cover the damage to the bunkers and for transporting the ice is made, which is provided for under current tariffs. In shipments of lettuce, especially from California and other western states, the shippers have for many years placed about 25 pounds of crushed ice in each crate of lettuce shipped. Under the system of averaging the weight of the crates provided in the tariffs, a shipper pays on 15 pounds of ice per crate the freight rates applicable to the commodity shipped, upon the theory that 10 pounds of ice placed in each crate melts before the car moves. None of the latter charges are here involved. Paragraph G of rule 2001, here under suspension, provides that carriers will not place ice or salt in packages with freight or in the body of refrigerator cars equipped with ice bunkers or tanks when such cars are loaded with perishable freight. The object of this amendment was to provide definitely that carriers would not place ice or salt in packages with the freight, and would perform no body icing either at origin or in transit providing the shipments moved in refrigerator cars equipped with ice bunkers or tanks. Rule 241 provides that shippers will be permitted to place ice in the body of the car at point of origin when loaded with fruit, vegetables, berries or other perishable freight, as covered by section 2 of the tariff; that not to exceed 5,000 pounds of ice (not including ice in the packages with the freight) will be transported under provisions of the rule, any amount in excess of 5,000 pounds to be charged for on the basis of the freight rate applicable to the lowest rated commodity contained in the car; and that when carload shipments of perishable freight, to which the rule is applicable, are tendered for transportation with ice in the body of the car (not including ice in packages with the freight) an additional charge will be made, viz $5 per car, if the journey from point of origin is confined within the limits of a single origin group, $7.50 if it is confined within the limits of two contiguous origin groups, and in all other cases 20 per cent of the stated refrigeration charge would otherwise be applicable. During the six months period from October to March, no ice need ordinarily be placed in the bunkers of cars containing lettuce, as crate icing and top icing will usually afford ample refrigeration. Respondents insist they are entitled to additional compensation to cover the cost of hauling ice placed on top of the load and the damage to the floors and walls of the car caused by the water. In this proceeding it seems clear that the freight rates generally throughout the country on green vegetables when established did not take into consideration the damage to the cars from top icing or the

additional expense to which the respondents were placed in transporting the top ice. It may be that some change in the construction of refrigerator cars will be necessary to meet present day requirements for shipments of such commodities as lettuce which, in addition to refrigeration, require moisture while in transit. When ice is placed on the load for the carriers to transport, they are performing a service for which they receive no compensation and which is not covered by tariff. However, if a shipper is given an additional service which is peculiarly necessary for his particular shipments it would seem that he should pay a reasonable charge for that service. Aside from the admission of counsel for the western carriers in argument that "top icing has come to stay" the evidence seems to warrant a finding that ice on top of the lading or some other equally efficient method must be adopted to safely transport and preserve lettuce, cauliflower, and certain other vegetables over great distances during the warm season of the year. Water dripping on the floors of refrigerator cars as at present constructed will dampen the felt and other substances now used in insulating the car and render it less effective to service the purposes of refrigeration. This damage can not be altogether attributed to the water from the ice on top of the ladings. The meltage from the ice in the crate must necessarily pass to the floor of the car, with the resultant damage to the car. If top icing should be entirely eliminated there would still remain the damage from the ice in the crates. The damage to the equipment is incapable of measurement. It does not follow that the carrier should not be compensated in some way for which ever damage may be attributable to the top icing and for the cost of transporting the ice. The evidence seems to warrant the finding that the limit of 5,000 pounds proposed is too low and that 7,500 pounds would be a reasonable maximum. Protective service rules on perishable freight, 104 I. C. C. 79.

III. REASONABLENESS OF CHARGES.

See Class Rates §2 (3q); Classification §5 (z); Express Companies §10 (d); Reasonableness of Rates.

§4. In general.

(a) Western Maryland respondent, proposed to increase the so-called refrigeration charges on fruits and vegetables from points on its line in Maryland, Pennsylvania and West Virginia to destinations in other states throughout the country, and in Canada. In 1922 respondent contracted with the Fruit Growers Express Company to furnish refrigerator cars upon payment of the entire revenue derived from refrigeration; guaranteeing an amount equal to the total expense of furnishing the service on all cars handled, plus $20 per car per trip for each loaded cars shipped under refrigeration, and 2c per car mile, empty and loaded. Respondent states that in 1923 the F. G. E. Co. would not make a contract without a guaranty similar to that embodied in the 1922 contract unless the stated refrigeration charges were increased to cover the actual cost of the service. The increases were therefore proposed. The charges now in effect were first established on Feb. 28, 1920, in perishable protective tariff No. 1 pursuant to 56 I. C. C. 449. The charges proposed represent increases ranging from 27 to 70%. No changes are proposed by other lines serving the same general territory. The factors considered as properly chargeable to refrigeration in establishing the present charges were cost of ice in bunkers of cars, cost of haulage of ice in car bunkers, cost of switching to and from icing stations, cost of wear and tear on refrigerating devices and cost of supervision. While the costs shown no doubt represent costs to respondent, it is by no means certain that they represent costs properly chargeable to the service rendered by the F. G. E. Co. If may be that the amounts which the respondent is called upon to pay for the use of equipment under its contract are excessive. In fact respondent refers to its inability to arrange a suitable contract and states that other car companies were approached with a view to obtaining a more favorable contract. Certainly shippers should not be called upon to pay unreasonable charges because of that situation. HELD, proposed schedules not justified. Refrigeration charges to interstate destinations, 91 I. C. C. 707.

(b) Complainant attacked defendants rates and refrigeration charges on melons and cantaloupes in straight and mixed carloads and on melons cantaloupes and vegetables, in mixed carloads, from several points in the Imperial Valley of California to Douglas, Ariz., as

unjust and unreasonable. Points of origin are served by the S. P., Indio, Brawley, Imperial, El Centro and Calexico, and Westmorland the movement beyond Tuscon is over the E. P. & S. W. Apparently there is no definitely established relationship between the class C rates and the rates on fresh fruit and vegetables in straight or mixed carloads, but rates on such traffic in mixed carloads, the equivalent of class C rates were prescribed in 59 I. C. C. 552 and other cases. The record establishes that a reasonable refrigeration charge on melons from these Imperial Valley points to Douglas would not exceed $85 per car. Possibly it should be lower, although complainants showing does not support a reduction to a lower basis. HELD, rates attacked not unreasonable but refrigeration charges unreasonable to extent they exceeded $85 per car, reparation awarded. Buxton Smith Company v. E. P. & S. W. Ry., 92 I. C. C. 227.

(c) Complainant attacked rates and refrigeration charges on fresh and green vegetables other than potatoes, carloads, from Charleston, S. C., and on asparagus from Ridge Spring, Trenton and Williston, S. C., to New England, trunk line and central territories. Carriers serving the territory of origin are the A. C. L., C. & W. C., S. A. L., and Southern. From South Carolina producing sections and from Florida and other southeastern cities served by these originating lines tariffs provide rates, stated in amounts per 100 pounds, on potatoes and cabbage, in packages named therein or in bulk, and on turnips, in sacks, but on asparagus and vegetables not otherwise specified, rates are stated in amounts per package according to specified standard containers. These commodities may be shipped in standard packages of 1, 1.5 or 3 bushel capacity. The rates from a large part of the Charleston district to New York are 92c per 3 bushel package, 63c per 1.5 bushel package, and 51c per 1 bushel package. A large volume of the present movement is in the 3 bushel package although there is a substantial movement of certain of the vegetables in the smaller packages. If the rates on the 1 and 1.5 bushel packages were made one third and one half, respectively, of the present rates on the 3 bushel package, with a carload minimum of 600 bushels, the revenue could be the same on a minimum carload regardless of the size of the package used, or $184 per car. HELD, rates attacked unreasonable to extent they exceed one third and one half, respectively, of the present rates on similar traffic in 3 bushel packages, in connection with a minimum of 600 bushels in each case. In the absence of evidence of record which would enable the Commission properly to determine what would be reasonable refrigeration charges from South Carolina by considering all the elements which go to make up the refrigeration charges, and faced with a situation which obviously is in need of correction, the only solution seems to be to prescribe charges from South Carolina with relation to the rates from Florida, HELD, refrigeration charges attacked unreasonable to extent they exceed 85% of the charges from Florida. South Carolina Produce Assn. v. A. & R. R. R., 96 I. C. C. 107.

(d) Complainant attacked transportation and refrigeration charges on fruit and vegetables, carloads, and rules governing the mixture of these commodities in carloads from producing points in Mississippi to interstate destinations as unreasonable. They also allege that defendants failed to maintain point rates on this traffic from Mississippi producing points to many interstate destinations. Principal vegetables shipped are, in order of volume of movement in straight carloads, tomatoes, cabbages, carrots, string beans, and white and sweet potatoes. **Transportation Rates.** The rates on vegetables from Mississippi to the principal markets are made on a group basis. The rates from each of the groups are with some exceptions also adjusted with a view to reflecting to a certain extent dissimilarities in the transportation characteristics of the different varieties of vegetables. Tomatoes are shipped in refrigerator cars but not always under refrigeration. All the other vegetables move under refrigeration. Crystal Springs, a local station on the I. C., about 24 miles south of Jackson, is used as a representative shipping point. Generally speaking, the rates attacked to the principal markets are either lower than or not in excess of the rates on the same commodities for similar distances from Texas and Louisiana, and southern states such as Alabama and Florida. With the possible exception of livestock traffic, and of such commodities as move in refrigerator cars, the record indicates that the vegetable

traffic requires special services, equipment, and facilities that are not required by the other commodities referred to, thereby increasing the difficulties and costs of transportation. HELD, while the record is not sufficiently developed to enable the Commission to prescribe commodity rates to points to which complainants seek such rates, the carriers will be expected to provide commodity rates from Mississippi points to Little Rock and other important consuming points in Arkansas, Richmond, Va., Atlanta, Ga., New Orleans, La., and Springfield, Joplin and Carthage, Mo., which will be properly aligned with commodity rates now maintained on some or all of the vegetables here considered from the points of origin and contiguous producing territories in Alabama and Louisiana to the same destinations, and in line with the rates from these producing points to other destinations in the same general territories. On the record made no opinion can be expressed respecting the establishment of commodity rates to other destinations. **Mixed Carload Rule.** The rule in effect is essentially that prescribed in 19 I. C. C. 513. HELD, rule not condemned. **Refrigeration Charges.** The present charges for the refrigeration of vegetables from Mississippi to interstate destinations are those established Feb. 28, 1920, on which date the former charges were increased following 56 I. C. C. 449.. The charges attacked are uniformly $10 per car higher on tomatoes and cabbage, the two vegetables shipped in greatest volume from Mississippi, than on other vegetables, in straight carloads. The higher charges also apply on mixed carloads of vegetables containing tomatoes and cabbage when the actual weight of either is in excess of 25% of the other vegetables in the mixture. HELD, considering their relative level and other facts of record, it can not be said that the line haul rates include compensation for any of the expense attached to refrigeration. HELD, refrigeration charges on tomatoes and cabbages are unreasonable to extent they exceed present refrigeration charges on other vegetables from and to the same points, and that the refrigeration charges on other vegetables and the transportation rates from Mississippi not unreasonable. Mississippi Railroad Commission v. A. & R. Ry., 98 I. C. C. 55.

(e) Proposed increased refrigeration charges on fruits and vegetables from points on Western Maryland Ry. in Maryland, Pennsylvania and West Virginia to destinations in other states and in Canada found not justified. In justification of proposed advances respondent submitted studies of cost of ice in bunkers, cost of hauling ice in bunkers, cost of switching to and from icing stations, and wear and tear on refrigerating devices and cost of supervision. However, character of evidence and methods of ascertaining such costs were decidedly unsatisfactory and were previously followed by carriers and disapproved by commission in 56 I. C. C. 449, and 85 I. C. C. 247. Refrigeration Charges to Interstate Destinations, 91 I. C. C. 707.

(f) Complainant attacked refrigeration charges on vegetable and citrus fruits from Imperial Valley of California to Fort Worth, Tex., as unreasonable and in violation of section four. Shipments moved between March 11, 1920, and April 17, 1922, from Imperial, Heber, Brawley, Westmoreland, El Centro, and Calexio, Calif., points named are on the branch line of the S. P. between Niland, Calif., and Yuma, Ariz., and are from 62 to 93 miles from Yuma. Points named are in group B. Reparation is asked to basis of rates from group A. Complainant made no reference in its memorandum to the fourth section departure alleged in its complaint. Neither did it make comparison of the charges and distances from Group B. as compared with Group A. HELD: Complaint dismissed. Home Star Produce Co. v. S. P. Co., 101 I. C. C. 69.

(g) Rate on ice, in refrigerator cars owned and furnished by complainant, from Tobyhanna, Pa., to Trenton, N. J., found not unreasonable. No evidence of the usual character was offered to show that rate charged was unreasonable; compensation paid for use of complainant's cars by defendants in the usual mileage rate paid under tariffs to all private owners of similar equipment, and it appears that carriers' gross earnings were lower than on ice shipped to complainant in either carrier-owned box or refrigerator cars. Holcombe & Sons v. C. R. R. Co. of N. J., 92 I. C. C. 27.

(h) Refrigeration charges on melons and cantaloupes, in straight and mixed carloads, and on melons, cantaloupes, and vegetables, in mixed carloads, from Imperial Valley points in California to

Douglas, Ariz., found unreasonable as compared with refrigeration charges between points in same general territory for similar distances, and to extent they exceeded charges herein prescribed for future. Reparation awarded. Buxton-Smith Co. v. E. P. & S. W. R. R., 92 I. C. C. 227.

(i) Protective-tariff rule governing l. c. l. shipments provided that carriers would furnish, or allow use of, refrigerator cars when aggregate weight of shipments was not less than 15,000 pounds, with no charge for refrigeration service unless specifically provided for in separate tariffs. Upon contention that shipments of lettuce were l. c. l. shipments entitled to benefits of the rule, FOUND. As each box was not marked as required by the classification to obtain benefit of the l. c. l. rate, and as cars used were ordered for c. l. shipments and bills of lading and shipping orders signed by or for shippers showed minimum weights applicable to c. l. shipments and bore notations and instructions having application only to c. l. traffic under the protective tariff, the c. l. rates, minimum, and stated refrigeration charges applicable thereto were legally assessed. Martin v. P. R. R., 92 I. C. C. 639.

(j) Refrigeration charges on fresh vegetables, including asparagus, from Charleston and other South Carolina points to New England, eastern trunkline and central territories, found unreasonable to extent they exceeded 85 per cent of the same present charges on like traffic from Florida producing points to same destinations. In view of the shorter distance to the northern markets the amount of refrigeration service which the South Carolina shippers receive is in all elements materially less than that from Florida and therefore the charges should be less. Nothwithstanding findings of the commission in 61 I. C. C. 438; 74 I. C. C. 157; 85 I. C. C. 247, defendants undertook to show the present charges not to be unreasonable by resort to substantially the same methods as were used in the cited cases and which were found to be unacceptable. Reasonable charges prescribed for the future. South Carolina Produce Asso. v. A. & R. R. R., 96 I. C. C. 107.

(k) Refrigeration charges on vegetables, except tomatoes and cabbages, from producing points in Mississippi to interstate destinations found not unreasonable as compared with rates on vegetables from other producing points in the Southern States. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55.

(l) Rates and refrigeration charges on vegetables from producing points in Mississippi to interstate destinations, with certain exceptions, found not unreasonable as compared with rates for similar distances from other producing points in the Southern States. Rates assailed are, in the main those approved by commission in Fruits and Vegetables, 43 I. C. C. 291, as modified by subsequent general percentage changes, and grouping of Mississippi producing points was a part of the general grouping of production points found justified therein. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55.

(m) Rates and refrigeration charges on vegetables from producing points in Mississippi to interstate destinations found not unreasonable as compared with rates for similar distances from other producing points in the Southern States, except that rates to Little Rock and other Arkansas consuming points, Richmond, Va., Atlanta, Ga., New Orleans, La., and Springfield, Joplin, and Carthage, Mo., need alignment. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55.

(n) Considering their relative level and other facts of record it can not be said that line-haul rates include compensation for the following items of refrigeration expense: (1) Hauling of ice placed in bunkers of refrigerator cars, (2) switching cars to and from stations for the purpose of placing ice in the bunkers, (3) repairs to refrigerating devices of refrigerator cars, and (4) supervision. These items and also cost of ice furnished are either in whole or in part necessarily incident to the transportation of the traffic under refrigeration. They have received recognition by commission in previous cases dealing with refrigeration charges and, unless included in the line-haul rates, are items of expense that properly may be considered in determining the reasonableness of refrigeration charges. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55, 69, 70.

(o) Refrigeration charges on tomatoes and cabbages from Mississippi producing points to interstate destinations found unreasonable to extent they ex-

ceed or may exceed present refrigeration rates on other vegetables to and from same points. Exhibit of cost data does not show that the amount of ice required for refrigeration of commodities in issue is greater than that required for other vegetables. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55, 73, 74.

(p) Complainant attacked charge of $50 per car exacted for the icing at White River Jct., Vt., of 14 cars of grapes from St. Catherines, Beemsville, Winona and Jordan, Ont., Can., to Boston in Sept. and Oct. 1922 as unreasonable. No evidence was introduced which in any way tended to show that the charge was unreasonable for icing from and to stations in New Hampshire and Vermont or that the charge was unreasonable as a proportional charge on shipments from Canada. HELD, refrigeration charge attacked not unreasonable, complaint dismissed. Kingman Co. v. O. V. Ry., 104 I. C. C. 445.

(q) Complainant attacked rates and refrigeration charges assessed on strawberries, shipped during May and June 1921 from Virginia, Maryland and Delaware, to various interstate destinations as unreasonable and unduly prejudicial. Reparation claimed is in each instance the amount of the refrigeration charge assessed. The freight rates as such are not in issue. The strawberries were packed in standard crates, each containing 32 one quart baskets, and were handled by defendants as carload shipments, charged at rates applicable on carload shipments based on a minimum of 15,000 pounds. State refrigeration charges were also collected. The record does not show that complainant in any way indicated to defendants that less carload shipments were desired. In fact the evidence shows that separate cars were ordered for each shipment and there appears to have been no protest at the time the shipments were made concerning the assessment of refrigeration charges. Photostatic copies of shipping orders typical of the orders given by complainants were submitted in evidence. They show that the shipper received the exclusive use of the car and each order bears such significant notations as "loaded by shipper," "under refrigeration," "standard refrigeration," etc., all of which indicate that the cars were intended to move carload quantities. The weight in several instances is shown as 15,000 pounds. HELD, refrigeration charges applicable, complaint dismissed. Allen & Company v. Pennsylvania R. R. Co., 107 I. C. C. 18.

(r) Complainant attacked rates, rules, regulations and charges on fresh fruits, melons, and vegetables, carloads, from Maricopa County, Ariz., to interstate destinations as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. The evidence relates principally to the refrigeration of cantaloupes from Salt River Valley, in which Phoenix is located. Chicago, Ill., is taken as typical of eastern markets. Distances to Chicago are 1,898 miles from Phoenix, 1,842 miles from Casa Grande, 2,029 miles from Yuma, 2,099 miles from El Centro, Calif., in the Imperial Valley, and 2,261 miles from Los Angeles, Calif. The stated refrigeration charge on melons from Maricopa County and the Imperial Valley is $125 per car, as compared with $95 from the other points referred. The same difference of $30 per car is maintained to Denver, Colo., Texas common points and all points east thereof. On fresh fruits and vegetables this difference is $5. The cars are iced before loading and again as soon as practicable after loading, usually before starting on their eastbound journey. They are inspected en route and reiced at regular and sometimes emergency stations. The Commission has no reason to believe that the charges attacked are excessive for the service performed. HELD, stated refrigeration charges on melons, carloads, from Maricopa County to Texas common points, Denver and all points east thereof not unreasonable but unduly prejudicial to extent they exceed the charges from Bakersfield district in California by more than $10 per car. Maricopa County Farm Bureau v. A. & S. Ry., 109 I. C. C. 472..

(s) Complainant attacked refrigeration charges on a car of plums from Sanborn, N. Y., to Lockport, N. Y., Sept. 19, 1923 thence reconsigned to Philadelphia, Pa., as unreasonable. Shipment moved to Lockport via N. Y. C., 10.7 miles. Instructions were given defendant at Sanborn to initially ice the car and a notation was placed on the bill of lading reading "do not reice". The car was iced at Sanborn by defendant at charge of $22.80. An additional charge of $9 was also made. The movement from Sanborn to Lockport was

within the limits of a single origin group and the charge of $5 in addition to the cost of ice was applicable. On arrival of car at original destination the car was reconsigned to Philadelphia with instructions to defendant to furnish full standard refrigeration. The charge of $55 per car for full standard refrigeration applicable from either Sanborn or Lockport to Philadelphia was paid by complainant in addition to the charges applicable from Sanborn to Lockport. The tariff rules did not provide for a cancellation of the refrigeration charges that accrued under rule 240 (a) from Sanborn to Lockport and the application of charges for standard refrigeration from the point of origin to ultimate destination. HELD, refrigeration charges not unreasonable or otherwise unlawful, complaint dismissed. Rinelle v. N. Y. C. R. R., 112 I. C. C. 111.

Refrigeration Charges from Florida, 85 I. C. C. 247; St. Louis Fruit & Vegetable Dealers v. W. Ry. Co., 85 I. C. C. 496.

IV. TARIFFS AND PUBLICATION.

See Tariffs.

§4¾. In general.

(a) Proposed rule in perishable protective tariff providing that fruits and vegetables in refrigerator cars with ice on top of load will be considered as moving under refrigeration, and charges assessed accordingly, found not justified. Practice of moving shipments under standard refrigeration with top icing, and with ice in bunkers negatives theory that proposed rule would result in discontinuance of top icing. The burden of hauling such ice without compensation therefor in refrigeration charges would still be upon carriers, and shippers would be compelled to pay for a service not ordered and regarded as unnecessary in many cases. Moreover, damage to cars is not so serious as to require a prohibition of the top-icing practice. Carriers however, are entitled to compensation for haulage of top ice and for damage caused thereby to equipment, and reasonable rule and charges therefor suggested. Rules for Protective Service on Perishable Freight, 89 I. C. C. 87.

§6½. Rules.

(a) Complainant attacked charges on lettuce, in refrigerator cars, shipped from points in New York to New York, N. Y., over interstate routes, and to Philadelphia, Pa., during June, July and August, 1921 as illegal, in violation of section 6. Charged fourth class rates, stated refrigeration charges were also collected. Perishable Freight Tariff 1 provided that upon reasonable notice carriers would furnish, or allow the use of, refrigerator cars to be loaded by shippers at their own expense, with freight, including lettuce, from one consignor at one point of origin to one consignee at one destination, when the aggregate weight was not less than 15,000 pounds per car or when charges were assessed on the basis of 15,000 pounds per car, and that no charge would be made for refrigerator service unless specifically provided in separate tariffs of the carriers. Defendants published a charge for refrigeration service on shipments subject to the rule. Defendants show that each box was not marked as required by the classification in order to obtain the benefit of the less carload rate and that the cars used were in each instance ordered for carload shipments. HELD charges attacked were applicable, complaint dismissed. Martin v. Pennsylvania R. R., 92 I. C. C. 639.

V. WEIGHTS.

See Weights and Weighing.

§7. Minimums.

See Minimums.

(a) Complainant attacked refrigeration rates on preserved fruits and berries, carloads, during the period May 15, 1917 to February 27, 1920 from Oregon and California to destinations in central and eastern states as unreasonable. In 74 I. C. C. 179 the Commission found charges attacked unreasonable to extent they exceeded the basic deciduous fruit refrigeration rates between the same points, except that the minimum car loading should be 50,000 pounds, excess in proportion. HELD, reparation awarded. National Preservers & Fruit Products Asso. v. Director General, 91 I. C. C. 221.

(b) Carload minimum of 350 crates on celery under refrigeration from Florida to interstate and foreign destinations found unreasonable to extent it exceeded 315 crates for refrigerator cars ranging in length from 28 feet 9 inches to 31 feet 6 inches, inside measurement, when furnished for carrier's convenience. Reasonable minimum for such cars prescribed

and reparation awarded. Florida R. R. Commrs. v. A. & R., 102 I. C. C. 677.

I. CONTROL AND REGULATION.

See Control and Regulation.

§½. In general.

(a) Since the enactment of second Cummins amendment, forming part of paragraph 11 of section 20 of the act, no carrier may lawfully publish rates based on the declared or agreed value of the commodity shipped, or limit the amount of its liability to the value so declared or agreed upon, without specific authority from the Commission. Released rates on stone in the southeast, 93 I. C. C. 90, 91.

§1. Jurisdiction of Commission.

See Interstate Commission I; Jurisdiction of Commission .

(a) The Director General, as agent of the President, contended that he was authorized by the Federal Control Act to initiate rates by filing them with the Commission, and no prior authorization by the Commission was necessary in order for him to make effective released or declared value rates. But the Cummins Amendment provides that all attempted limitations of liability shall be void unless approved by the Commission, and the Federal Control Act conferred no authority upon the Director General to establish limitations of liability without approval of the Commission. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 481.

(b) Under section 20 of interstate commerce act, as amended, any attempted limitation of the shipper's right of recovery for full actual loss, damage, or injury to property received for transportation is "declared to be unlawful and void" except when the limitation is published under an order from the commission; and it follows that any attempt on part of a carrier to set up a defense of limited liability as to goods shipped under actual value rates not published under such an order would fall. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 477.

(c) The Federal control act conferred no authority upon the director general to establish limitations of liability without commission's approval. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 482.

II. CONSTRUCTION AND APPLICATION.

§1½. In General.

(a) If a commodity is fairly uniform in value, so that carrier knows with reasonable degree of certainty the liability it assumes when it accepts a shipment for transportation, it should establish packing and loading, with a view to minimizing loss and damage claims; and, having done so, should then publish a single rate based on known transportation characteristics of the commodity. Released Rates on Stone in Southeast, 93 I. C. C. 90, 93.

(b) Rates graded according to actual

value do not operate as a limitation upon the shippers right to recover for actual loss, damage or injury to the property transported, and actual value rates may be fairly distinguished from released rates. San Antonio Paper Co. v. Director General, 102 I. C. C. 243, 244.

(c) Actual value rates and released rates may be fairly and effectively differentiated, and valuation restrictions in connection with actual value rates are to be given effect in applying the rates. Heller Bros. v. Director General, 102 I. C. C. 749, 751.

(d) Upon consideration of the matter of rates graded according to actual value of commodities shipped, which do not operate as a limitation upon the shipper's right to recover for the full actual loss, damage, or injury to the property transported, HELD: That actual value rates and released rates may be fairly and effectively differentiated. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471.

(e) It is not all rates in connection with which a declaration of value in writing by the shipper may be required that are within the purview of the second Cummins amendment, but only those where the valuation is thus declared or agreed upon as the released value of the property. 63 I. C. C. 234. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 474.

(f) Actual-value rates are rates the application of which is dependent upon the actual value of the commodity not exceeding a specified amount, and the principle underlying these rates is that the articles covered by the different groups of valuations are in fact so different as to constitute in effect different commodities. There is no holding forth by carrier of an offer to transport goods of the higher values at lower rates in consideration of release by shipper of carrier's liability. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 475.

(g) Upon consideration of the matter of rates graded according to actual value of commodities shipped, which do not operate as a limitation upon the shipper's right to recover for the full actual loss, damage, or inquiry to the property transported, HELD: That actual value rates and released rates may be fairly and effectively differentiated. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 477.

(h) It is the commission's view, first expressed in The Cummins amendment, 33 I. C. C. 682, and since quite consistently followed, that the rate and its qualifying limitation are severable, and that the limitation should be ignored or regarded as not present in the tariff, but the rate should be applied. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 482.

(i) Shipments of blackstrap molasses from Mobile, Ala., to Fort Calhoun, Nebr., found overcharged to extent that charges collected exceeded those which would have accrued at lower declared value rate. Reparation awarded. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 482.

(ia) Tariff carried rates on newsprint and wrapping paper based on value, together with higher rates on same commodities without reference to value. Shipper made no reference to value in billing. FOUND: Higher rates charged found legally assessed, and, following 100 I. C. C. 471, the rates graded according to value were not released rates but actual-value rates, and the restrictions in connection therewith were not void. San Antonio Paper Co. v. Director General, 102 I. C. C. 243.

(ib) Tariff carried rates on household goods based on declared value, but shipper was misled through misinformation furnished by carrier's agent into declaring a valuation higher than that at which he actually valued the goods, resulting in the application of a rate higher than that which would otherwise have applied. FOUND: Misquotation of a rate by carrier's agent affords no ground for an award of reparation, and applicable rate, herein determined, was not unreasonable or otherwise unlawful. Arizona Corp. Comm. v. A. E. R. R., 102 I. C. C. 578.

(ic) Following 100 I. C. C. 471, wherein it was found that actual-value rates and released rates may be fairly and effectively differentiated and that actual-value rates should be applied as published, shipments of newsprint, printing, and wrapping paper moving under actual-value rates found not to have been overcharged. Texas Farm & Ranch Publishing Co. v. Director General, 102 I. C. C. 581.

(id) Shipments of whiskey, alcohol, brandy, and gin, moving under actual-

value rates, found not to have been overcharged. While carrier published lower declared-value rates, tariff in which they were carried contained no specific requirement that shipper declare value in writing, and here no value was declared nor is the true value disclosed. Moreover, in 100 I. C. C. 471, commission found that rates graded according to actual value do not operate as a limitation upon shipper's right to recover for full actual loss, damage, or injury to property transported, and that actual-value rates and released rates may be fairly and effectively differentiated. Woolner Distilling Co. v. Director General, 102 I. C. C. 605.

(ie) Tariff carried released rates on dressed granite and granite monuments based on value certified to by shipper, together with higher actual-value rates where value is not so certified. Shipments here involved were of a value in excess of released rates and were properly assessed rates based on actual value, commission having held in 100 I. C. C. 471 that actual-value rates and released rates may be fairly and effectively differentiated, and that valuation restrictions in connection with actual-value rates are to be given effect in applying the rates. FOUND: Shipments not overcharged. Heller Bros. v. Director General, 102 I. C. C. 749.

(j) Complainant attacked rates charged, class, on four cars of granite from New Hampshire and Vermont to Delphos, O., Macomb, Ill., Wauseon, O., and Ligonier, Ind. There was no restriction as to the value of the commodity attached to any of the rates charged. The rates which complainants claim should have been applied are commodity rates, subject to the condition that the value of the commodity shall not exceed $2.25 per 100 pounds, to be so certified by the consignor in the bill of lading.. Complainants not having shown that the value of these shipments was less than $2.25, it follows that the complaints should be dismissed. HELD, complaint dismissed. Sherger & Sons v. B. & M. R. R., 109 I. C. C. 555.

III. LEGALITY AND CREATION.

§4. In General.

See Legality of Rates.

(a) L. & N., and other rail carriers in the southeast sought authority under paragraph 11 section 20 of the act on behalf of themselves and certain of their northern and western connections to established released rates for the transportation of marble, granite, and other kinds of stone, in different stages of manufacture and finish from, to, and within the southeastern portion of the United States. Generally speaking the relief sought by these carriers is authority to incorporate in their tariffs in connection with their published rates a limitation of liability, in case of loss or damage to 20c on rough stone and 40c on finished stone. The range of value of rough quarried sawed, sand rubbed, and polished granite or marble is not so great that the carriers can not estimate with a reasonable degree of accuracy what their liability will be in the event of loss or damage in transit. HELD schedules not justified. Released rates on stone in the southeast, 93 I. C. C. 90.

(b) The fact that claims for loss and damage are frequent in the transportation of a given commodity is not in itself a valid reason for the establishment of released rates. If the commodity is fairly uniform in value, so that the carrier knows with a reasonable degree of certainty the liability it assumes when it accepts a shipment for transportation, it may and should establish reasonable tariff regulations relative to packing and loading, with a view to minimizing such claims, and, having done so should then publish a single rate based on the known transportation characteristics of the commodity. Nor is the fact that an article has a wide range of value alone sufficient to warrant the establishment of released rates, because claims for loss and damage on that article may be negligible in any event. But where those conditions occur, where the susceptibility to loss or damage is comparatively high and the wide range in the value of the commodity makes the amount of any claim that may arise difficult to estimate, the carrier is at a disadvantage unless it is permitted to base its liability and its charges on a declaration of value obtained in advance from the shipper. In such a case a basic rate should be established conditioned upon the declaration by the shipper of a fair average value of the commoner forms of the commodity, together with one or more higher rates to apply when a greater value is declared, such higher rates to be no more than reasonably commensurate with the additional risk assumed by the carrier. Released rates on stone in the southeast, 93 I. C. C. 90, 93.

(c) Application for authority under section 20 (11) of the act to establish released rates on marble, granite, and other stone from, to, and within the Southeast, denied. Range of value of rough-quarried sawed, sand-rubbed, and polished granite or marble is not so great that carriers can not estimate with reasonable degree of accuracy what their liability will be in event of loss or damage in transit. It is only where marble or granite has been carved that variation in value becomes extreme, and it is only then that claims for loss or damages are at all substantial, in proportion to freight charges collected. Released rates on carved variety may be proper or even desirable, but record is not sufficient to enable commission to prescribe reasonable basic value, nor relationship which should exist between released and unreleased rates. Released Rates on Stone in Southeast, 93 I. C. C. 90.

(d) Fact that an article has a wide range of value, in and of itself, is insufficient to warrant establishment of released rates, because loss and damage claims on that article may be negligible in any event. Released Rates on Stone in Southeast, 93 I. C. C. 90, 93.

(e) Fact that claims for loss and damage are frequent in the transportation of a given commodity is not in itself a valid reason for establishment of released rates. Released Rates on Stone in Southeast, 93 I. C. C. 90, 93.

(f) Where rates based on declared or agreed value have been authorized by commission, the statute accords shippers the right to understate value for purpose of securing the lower rate, and if excess of unreleased over released rates is more than cost of insurance, shippers will ordinarily release carrier and obtain transit insurance elsewhere. But frequently transit insurance can not be obtained, in which event, those shippers who are financially able to do so will assume risk of loss themselves. On other hand, small shippers are less apt to be able to risk loss of their less frequent shipments, and will thus in greater measure feel compelled to resort to higher unreleased rates for adequate protection. Released Rates on Stone in Southeast, 93 I. C. C. 90, 94.

(g) Where rates dependent upon value are published without the commission's authority the limitations attached thereto are void but the rates remain applicable. Waco Chamber of Commerce, 73 I. C. C. 708. Victory Bag & Paper Co. v. A., T. & S. F., 95 I. C. C. 677, 678.

(h) It is not all rates in connection with which a declaration of value in writing by the shipper may be required that are within the purview of the second Cummins amendment, but only those where the valuation is thus declared or agreed upon as the released value of the property. 63 I. C. C. 234. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 476.

(i) Rates based on actual value are not prohibited by the Cummins amendment, neither such rates nor their qualifying conditions as to actual value are unlawful. Rates may be differentiated based on actual value and rates dependent upon the value declared in writing by the shipper or agreed upon in writing as the released value of the property. Sherger & Sons v. B. & M. R. R., 109 I. C. C. 555, 556.

IV. REASONABLENESS.

See Reasonableness of Rates.

§5. In General.

(a) Complainant attacked commodity rate charged on zinc ore, carloads, between Nov. 1, 1918, and March 1, 1920, from Murray, Utah to Canon City, Colo., as unjust and unreasonable. Murray is 578 miles from Canon City, on the D. & R. G. Charged 34.5c applicable on ore of a value not exceeding $60 per ton. There was contemporaneously in effect a commodity rate of 30c on zinc ore with no limitation as to value from Murray and Midvale to Denver and Pueblo, Colo., more distant points on that line, this rate subsequently being established to Canon City. HELD: Rate attacked unreasonable to extent it exceeded 30c, reparation awarded. Western Metals Co. v. Director General, 100 I. C. C. 314.

(b) Where susceptibility of a commodity to loss or damage is comparatively high and wide range in value makes amount of any claim that may arise difficult to estimate, carriers are at a disadvantage unless permitted to base liability and charges on a declaration of value obtained in advance from shipper. In such cases a basic rate should be established conditioned upon declaration by shipper of fair average value of commoner forms of commodity,

together with one or more higher rates to apply when, greater value is declared such higher rates to be no more than reasonably commensurate with additional risk assumed. Released Rates on Stone in Southeast, 93 I. C. C. 90, 93.

(c) Complainant attacked class rates charged on household goods, less carload, from Mississippi to Phoenix, Ariz., as unreasonable, unjustly discriminatory and unduly prejudicial. There was no commodity rate and the joint class rate was governed by the western classification. In that classification household goods less carloads, were and are rated first class when valued at not over 10c per pound and one and one quarter times first class when valued at more than 10c but not more than 20c per pound. The rates were made dependent upon the value declared in writing by the shipper, or agreed upon in writing as the released value of the property and had been authorized by the Commission under Cummins amendment. When the shipment was made by complainant Perkins he first told the agent of the initial carrier to value it at $10 per 100 pounds. But the agent informed him that the rate would be the same whether the value were placed at $10 or $20 per 100 pounds, and he therefore allowed the agent to insert a value of $20 per 100 pounds. Complainant Perkins was misled into declaring a valuation of $20 per 100 pounds through misinformation given him by the agent regarding the application of the rate. HELD, rate charged not unreasonable or otherwise unlawful, complaint dismissed. Arizona Corporation Commission v. A. E. R. R., 102 I. C. C. 578.

(d) Complainant attacked as illegal rates on newsprint, printing and wrapping paper during federal control from Michigan, Mississippi, New York, Ohio, Pennsylvania and Wisconsin to Dallas, Tex. Two rates were provided, the higher applicable on paper without reference to value, or in some cases, of a value exceeding a stated amount per pound or of a value not declared, and the lower applicable only upon paper having an invoice or actual value not exceeding a specified amount per pound. Complainants concede that all of their shipments were of values exceeding the amounts specified in connection with the lower rates, but their contention is that under former findings by the Commission the tariff provisions with reference to value were null and void and should be treated as not present in the tariffs, in which case the lower rates were applicable upon their shipments. In 100 I. C. C. 471 the Commission found that actual value rates and released rates may be fairly and effectively differentiated and that actual value rates should be applied as published. HELD, complainants shipments were not of a value entitling them to the application of the lower rates sought, complaint dismissed. Texas Farm & Ranch Publishing Co. v. Director General 102 I. C. C. 581.

(e) Complainant attacked class rates charged on whiskey, alcohol, brandy, gin shipped between March 8, 1918 and June 12, 1919 from Peoria, Ill., to Minneapolis and St. Paul, Minn., as unjust and unreasonable, unjustly and unduly discriminatory and inapplicable. Western classification provided second class rating on these liquors and effective second class any quantity rates of 50c to June 24, 1918 and 62.5c thereafter were charged. Contemporaneously, defendants published specific commodity rates between these points of 30c to June 24, 1918 and 37.5c thereafter on these liquors when in carloads, minimum 24,000 pounds, actual value not exceeding $2.50 per gallon. There was no specific requirement that the shipper declare the value in writing. The shipper declared no value on these shipments and the record does not disclose the true value thereof. In 100 I. C. C. 471 the Commission held that actual value rates and released rates may be fairly and effectively differentiated, and it applied the actual value rates as published. HELD, shipments not overcharged, complaint dismissed. Woolner Distilling Co. v. Director General, 102 I. C. C. 605.

(f) Complainant attacked commodity rates charged on cars of monumental granite during 1918 and 1919 from Barre, Montpelier, Northfield and Waterbury, Vt., to Chicago, Champaign, and Joliet, Ill., and Indianapolis, Frankfort, Shelbyville, Lafayette, and Kokomo, Ind., as unreasonable and inapplicable. No one testified who had any knowledge as to the actual shipments. There is no evidence of record bearing upon the allegations of unreasonableness, and the sole issue is as to what rates were applicable. Apparently the actual value of the granite comprising the shipments exceeded the restricted value of $2.25 per 100 pounds, and some of the bills of lading bear certificates to that effect. None

of the shipments here considered was shown to be of a value entitling it to the commodity rates provided by item 230. HELD, no overcharge, complaint dismissed. Heller Bros. v. Director General, 102 I. C. C. 749.

(g) Rate on zinc ore, limited as to value, from Murray and Midvale, Utah, to Canon City, Colo., during Federal control, found unreasonable to extent it exceeded a rate contemporaneously in effect from these points to Denver and Pueblo, Colo., more distant points. The tariffs publishing the lower rate, which was not limited as to value, contained a notation that in accordance with rule 77 of Tariff Circular 18—A, rates to intermediate points not in excess of those to the more distant points would be established on one day's notice, upon reasonable request, but, because of the specific rate in effect at Canon City, rule 77 was not applicable, Standard Asphalt & Refining Co., 66 I. C. C. 611. Reparation awarded. Western Metals Co. v. Director General, 100 I. C. C. 314.

(h) Rates on clothing, n. o. s., applied on l. c. l. shipments of overalls from Cincinnati, Ohio, to Pacific coast terminals and certain other western territory, found applicable on ground that overalls were not of a value entitling them to the application of the commodity rates on overalls. Applicable rates found unreasonable to extent they exceed lower contemporaneous rates on clothing restricted as to value. Reparation awarded. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471.

(i) Complainant made shipments Sept. 27 and 28, 1922 and Jan. 20, 1923 of crated dining room furniture from Allegan, Mich., to Los Angeles, Calif., that it instructed the agent of the P. M., the originating carrier, to enter on the bill of lading a released value of not to exceed $18 for each article, so as to make applicable a rate of $2.63; that agent failed to make said entry; that defendants collected a rate of $3.58, applicable on shipments not made with a declared or released value of not to exceed $18 each; that rate collected was in violation of the act. The local agent of the P. M., admitted in writing that the shipper instructed him to bill the shipments so that the released rate would apply, but that he did not then know that it was necessary to enter a released value of not to exceed $18 each for the articles on the bill of lading. Defendants do not deny that such instructions were given, and expressed willingness to refund as an overcharge the amount of reparation claimed. HELD, rate attacked unreasonable to extent it exceeded $2.63, reparation awarded. Baker & Company v. C. M. & St. P. Ry., 109 I. C. C. 399.

(j) When the carrier knows that the shipper wishes to ship at the released rate it is its duty to make necessary entry in the bill of lading, and if it does not do so any higher rate collected on the shipment is unreasonable. Baker & Company v. C. M. & St. P. Ry., 109 I. C. C. 339, 400.

§5a. Reparation.

See Reparation.

ALL CITATIONS

Wasmuth-Endicott Co. v. W. Ry. Co., 85 I. C. C. 370.

V. LIMITATION OF LIABILITY.

See Loss and Damage §9.

§6. Effect in general.

(a) Basing of rates by common carriers and similar public service corporations in part on liability involved in a given service is determination in advance of the maximum amount thereof, a liquidation of the damages contingent upon nonperformance of the service and is not a limitation of liability for negligence. State v. Public Service Commission (Mo. 1924) 264 S. W. 669.

(b) The value of the commodity transported is an element in rate making aside from the risk of loss or damage, because it serves to measure the value of the service rendered the shipper. But where rates based on declared or agreed value have been authorized by the Commission, the statute accords shippers the right to understate the value for the purpose of securing the lower rate, and it is clear that if the excess of the unreleased over the released rates is more than the cost of insurance, shippers will ordinarily release the carrier and obtain transit insurance elsewhere. But frequently transit insurance can not be obtained. When it is not available, those shippers who are financially able to do so will assume the risk of loss themselves. The small shipper is less apt to be able to risk the loss of his less frequent shipments, and will thus in greater measure feel compelled to resort to the higher unreleased rates for adequate protection. Released rates on stone in southwest, 93 I. C. C. 90, 94.

(c) Rates on articles of stated value, which were not authorized by the Commission, were legal, but that the declarations of value, which indirectly limited the carriers liability, were unlawful and void under the second Cummins amendment. Carpenter v. C. V. Ry., 93 I. C. C. 309, 310.

(de) Complainant attacked less carload rates on overalls from Cincinnati, O., to Arizona, California, Idaho, Montana, Nevada, Oregon and Washington, between Jan. 1, 1918, and Dec. 29, 1920, as illegal in violation of sections 6 and 20 of the Act; and that thereafter to May 1, 1922, from the same point of origin to points in the aforementioned states and points in Colorado, Kansas, Nebraska, New Mexico, North Dakota, South Dakota, Utah and Wyoming as unreasonable, unduly prejudicial and illegal. Complainant in 14444 attacked commodity rate of 39c charged on 13 tank cars of blackstrap molasses from Mobile, Ala., and Abbieville and other points in Louisiana to Fort Calhoun, Nebr., 16 north of Omaha, between August 28, 1918, and Feb. 18, 1919, as unreasonable to extent it exceeded 36.5c. No. 14102 and sub. 1. To Montana destinations the rate originally established was $2.30 on Jan. 1, 1916. On Feb. 24, 1917, this rate was restricted to garments of an actual value not exceeding $12 per dozen. On March 15, 1918, the terminal rate was made the same as the Montana rate, and both were increased to $2.875 effective June 25, 1918, and to $3.835 on August 26, 1920. These rates were canceled effective March 15, 1921, to California terminals and effective April 13, 1921, to north Pacific coast line terminals and Montana destinations. Thereafter no specific rates were in effect until April 15, 1922, when the rates of $3.835 were reestablished without restriction as to value. On overalls of a value greater than $12 per dozen during the period when a restriction as to value was in effect, and on overalls unrestricted as to value during the period when no specific rates were in force, defendants applied the commodity rate on clothing, n. o. s. The clothing rate to the Pacific coast was $3 prior to March 15, 1918, when it became $3.45. On June 25, 1918, it was increased to $4.315 and on August 26, 1920, to $5.755. To Montana destinations the clothing rate was $3.45 prior to June 25, 1918, and since that date it has been the same as the rate to the Pacific coast. The intermediate territory was charged at combination of locals with the Pacific coast terminal rates as maxima. On and after Dec. 30, 1919, neither the rate tariffs nor the classification required a declaration of value by the shipper. The Supreme Court sustained the validity of released rates holding that in view of his representations to the carrier at the time of shipment the shipper is bound by his declaration or agreement and estopped from claiming or recovering more than that value in case of loss or damage to the property. Actual value rates are rates the application of which is dependant upon the actual value of the commodity not exceeding a specified amount; and as a rule the tariffs publishing such rates require a declaration in writing by the shipper that the actual value of the commodity shipped does not exceed the amount specified by the tariff. The principle underlying these rates is entirely different from that underlying released rates, in that the articles covered by the different groups of valuations are in fact so different as to constitute in effect different commodities. There is no holding forth by the carrier of an offer to transport goods of the higher values at the lower rates in consideration of release by the shipper of the carriers liability, and any wilful misstatement by the shipper of the value of his goods forwarded under such rates is a misbilling which may subject the shipper to prosecution under the criminal provisions of the statutes. These rates were made to cover commodities of wide range in values, such as furniture, alcoholic liquors, and ores; and they operate to the ultimate advantage of shippers in affording rates made with more particular reference to the actual value of the articles shipped. Actual value rates were permitted, under the law, before the enactment of the second Cummins amendment, and it follows that they are still permitted unless the amendment clearly discloses a contrary intention on the part of Congress. But there is no disclosure of any intention to prohibit, or in any way to deal with, rates the object or effect of which is not to limit the shippers right of recovery. Actual value rates have no such object. There are numerous statements to be found in the digests and reports to the same general effect as that in 10 R. C. L. 774, that "acceptance of a lower rate based on an agreed valua-

tion raises an estoppel to assert a greater value after loss or damage." But the cases relied upon, so far as examined, are all cases involving released rates. The distinction should be clear between an "agreed valuation" which is the one on which the minds of the parties met, however it came to be fixed, and the rate of freight was based on that valuation, and was fixed on condition that such was the valuation, and that the liability should go to that extent and no further; and a value given not as a measure of the extent to which the liability of the carrier shall go, but as a description for determination of what the particular commodity is that is being shipped. The estoppel in the former case is based upon the fact that the shipment was received for transportation with the understanding that the carriers liability should extend only to the amount indicated. In the latter there is no such understanding or representation, but the representation as to value is made solely as establishing the identity of the commodity. Furthermore, under section 20 as amended any attempted limitation of the shippers right of recovery for the full actual loss, damage or injury to property received for transportation is declared to be unlawful and void except when the limitation is published under an order from the Commission; and it follows that any attempt on the part of a carrier to set up a defense of limited liability as to goods shipped under actual value rates not published under order from the Commission would fail. And there can no longer be any doubt that shipment under actual value rates, even upon a declaration of value which is less than the actual value and at the reduced rate, does not operate as a limitation upon the shippers right to recover for the full actual loss, damage or injury. Released rates and actual value rates may be fairly and effectively differentiated. HELD, Complainants shipments were not of a value entitling them to the application of the commodity rates on overalls, and that the applicable rates were those applying on clothing n. o. s. For many years prior to the publication of the actual value rates on overalls that commodity was covered by a general clothing rate which also included gingham and denim blouses, lined duck clothing, jean and drill drawers, cardigan jackets, check, calico, and hickory jumpers and Canton flannel, merino, and cotton knit underwear. HELD: Rates of $4.315 prior to August 26, 1920, and $5.755 thereafter, unreasonable to extent they exceeded $2.875 and $3.835, reparation awarded. No. 14444. The Louisiana points of origin in 14444 are Abbieville, Erath, Knapp, Maringouin, Raceland and Rosedale. During the period here considered two rates, viz., 36.5 and 39c were provided on blackstrap molasses, in tank cars, from all points of origin to Fort Calhoun. From Abbieville, Erath and Raceland the 36.5c rate was subject to the description "declared value 8c or less per gallon," the 39c rate was subject to the description "declared in excess of 8c per gallon." From Mobile the respective rates were subject to the following descriptions: "When declared value (as stated in the shipping order) is 8c less per gallon" and "when declared value (as stated in the shipping order) is in excess of 8c per gallon, or when value is not declared in shipping order". From Knapp, Maringouin and Rosedale the respective descriptions were "When actual value of each gallon does not exceed 8c, actual value to be stated by shipper in writing in shipping order," and "When actual value of each gallon exceeds 8c, and is so stated by shipper in writing in shipping order; or when the value is not stated by shipper in writing in shipping order." Released rates order No. 23 authorized the maintenance of released rates, otherwise denominated as declared value rates, from the Louisiana origins here considered. Such rates having been specifically approved by the Commission, failure of the tariff to make reference to such authorization was not vital, and as to shipments from Abbieville, Erath, and Raceland, the shipper might lawfully have declared less than the actual value, thus limiting the carriers liability and entitling the shipments to the benefit of the lower rate. There was a holding out to transport at a reduced rate in consideration of a contract of limited liability which defendant was bound to protect. But there is no evidence that a value not exceeding 8c per gallon was declared on shipments from these points, and the record therefore will not sustain a finding that these shipments were overcharged. The rates as published from Knapp, Maringouin and Rosedale required a declaration of the actual value. The distinction between actual value rates and released or declared value rates has already been discussed. There is no

evidence that the shipments from these points were of a value entitling them to the lower rate, and the Commission can not find that they were overcharged. The rate from Mobile presents a different question. This in form was a declared value rate, the intended effect of which was to limit the carriers liability to the value declared by the shipper. This record does not establish that its maintenance has been authorized by the Commission. The rate and its qualifying limitation is severable, and the limitation should be ignored or regarded as not present in the tariff, but the rate should be applied. HELD: Void limitation should be treated as not present in the tariff; lower rate applicable from Mobile, shipments overcharged. HELD: Rates attacked not unreasonable or unduly prejudicial. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471.

(f) Where susceptibility of a commodity to loss or damage is comparatively high and wide range in value makes amount of any claim that may arise difficult to estimate, carriers are at a disadvantage unless permitted to base liability and charges on a declaration of value obtained in advance from shipper. In such cases a basic rate should be established conditioned upon declaration by shipper of fair average value of commoner forms of the commodity, together with one or more higher rates to apply when greater value is declared, such higher rates to be no more than reasonably commensurate with additional risk assumed. Released Rates On Stone In Southeast, 93 I. C. C. 90, 93.

(g) Where rates based on declared or agreed value have been authorized by commission, the statute accords shippers the right to understate value for purpose of securing the lower rate, and if excess of unreleased over released rates is more than cost of insurance, shippers will ordinarily release carrier and obtain transit insurance elsewhere. But frequently transit insurance can not be obtained, in which event, those shippers who are financially able to do so will assume risk of loss themselves. On the other hand, small shippers are less apt to be able to risk loss of their less frequent shipments, and will thus in greater measure feel compelled to resort to higher unreleased rates for adequate protection. Released Rates On Stone In Southeast, 93 I. C. C. 90, 94.

(h) Tariff provided commodity rate on granite blocks, slabs, or pieces, when "rough quarried, * * *" subject to declaration by shipper that actual value was not in excees of a certain amount, and for application of class rate when of greater value. Actual value exceeded limited value specified under commodity rate and class rate was assessed. Limitations as to value in connection with the commodity rate were unlawful and void since they were published without commission's authorization as provided in section 20 (11) of the act. Shipment here involved consisted of rough granite and fell within description of material on which commodity rate applied. Reparation awarded. Carpenter v. C. V. Ry., 93 I. C. C. 309.

(i) Where rates dependent upon value are published without the commission's authority, limitations attached thereto are void but rates remain applicable. Waco Chamber of Commerce, 73 I. C. C. 708. Victory Bag & Paper Co. v. A., T. & S. F., 95 I. C. C. 677, 678.

(j) Shipments of blackstrap molasses from certain points in Louisiana to Fort Calhoun, Nebr., found not to have been overcharged. On some of the shipments involved no value was declared, as required, while on those on which this requirement was met they were not of a value entitling them to a lower rate. Failure of the tariff to make reference to fact that the released rates applicable were approved by the commission, as required by law, was not vital. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 481.

(k) It is the commission's view, first expressed in The Cummins Amendment, 33 I. C. C. 682, and since quite consistently followed, that the rate and its qualifying limitation are severable, and that the limitation should be ignored or regarded as not present in the tariff, but the rate should be applied. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471, 482.

(l) Following 100 I. C. C. 471, wherein it was found that actual-value rates and released rates may be fairly and effiectively differentiated and that actual-value rates should be applied as published, shipments of newsprint, printing, and wrapping paper moving under actual-value rates found not to have been overcharged. Texas Farm & Ranch Publishing Co. v. Director General, 102 I. C. C. 581.

(m) Shipments of whiskey, alcohol, brandy, and gin, moving under actual-value rates, found not to have been overcharged. While carrier published lower-declared-value rates, tariff in which they were carried contained no specific requirement that shipper declare value in writing, and here no value was declared nor is the true value disclosed. Moreover, in 100 I. C. C. 471, commission found that rates graded according to actual value do not operate as a limitation upon shipper's right to recover for full actual loss, damage, or injury to property transported, and that actual-value rates and released rates may be fairly and effectively differentiated. Woolner Distilling Co. v. Director General, 102 I. C. C. 605.

(n) Tariff carried released rates on dressed granite and granite monuments based on value certified to by shipper, together with higher actual-value rates where value is not so certified. Shipments here involved were of a value in excess of released rates and were properly assessed rates based on actual value, commission having held in 100 I. C. C. 471 that actual-value rates and released rates may be fairly and effectively differentiated, and that valuation restrictions in connection with actual-value rates are to be given effect in applying the rates. FOUND: Shipments not overcharged. Heller Bros. v. Director General, 102 I. C. C. 749.

VI. REPARATION.

See Reparation.

§7. In General.

(a) Tariff carried rates on household goods based on declared value, but shipper was misled through misinformation furnished by carrier's agent into declaring a valuation higher than that at which he actually valued the goods, resulting in the application of a rate higher than that which would otherwise have applied. FOUND: Misquotation of a rate by carrier's agent affords no ground for an award of reparation, and applicable rates, herein determined, were not unreasonable or otherwise unlawful. Arizona Corp. Comm. v. A. E. R. R., 102 I. C. C. 578.

See Interstate Commerce Commission I; Jurisdiction of Commission.

§½. In General.

(a) Under section 9 of the act the commission is empowered to award reparation for damages sustained as a direct consequence of a violation of any of its provisions. Miles Lumber Co. v. C., B. & Q. R. R. Co., 89 I. C. C. 761, 764.

(bcd) The Commission is without authority to award reparation on unfulfilled promises alleged to have been made by representatives of carriers that the reduced rates would be made effective in accordance with the order. The powers of the Commission are not those of a court of equity. Northern Grain & Warehouse Co. v. O. S. L. R. R., 100 I. C. 319, 322.

(e) The commission is empowered to award reparation only for violations of the act. Leslie Bros. Lbr. Co. v. P. R. R., 92 I. C. C. 55, 58.

(f) Complainant formerly shipped intrastate shipments via joint-line interstate routes to obtain benefit of rates lower than those applying intrastate. Carriers subsequently limited application of the interstate tariff to interstate traffic. Upon complaint assailing rates charged on shipments moving intrastate via intrastate routes, HELD: Limitation in interstate tariff precluded its application to complainant's shipments. Moreover, the commission's jurisdiction over intrastate rates is prescribed by sections 3 and 13 of the act, and it has no authority under the law to pass upon the measure of such rates except as provided in those sections. Nebraska Cement Co. v. C. & N. W., 92 I. C. C. 457.

(g) A common carrier, prior to an award of reparation by the commission, can not make refund to a shipper of charges collected for transportation in interstate or foreign commerce over and above what that carrier might concede to be a reasonable rate. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 523.

(h) Collection of an unreasonable rate is a tort arising from unlawful exaction of money belonging to shipper or consignee in violation of carrier's obligation to transport for a reasonable price and should be distinguished from personal injury torts. Shipper or consignee has suffered damage when he pays the unreasonable rate and his claim accrues at once in theory of law. Darnell-Taenzer case, 245 U. S. 531. In reimbursing shipper for loss thus suffered interest is awarded as an element of compensatory damages due him, and not for any default or delay in payment of damages. "Such damages may reasonably include interest and costs." Ault case 256 U. S. 554. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 526.

(i) It is not within commission's province to pass upon question of whether a court erred in its determination. American Hominy Co. v. Director General, 93 I. C. C. 256, 259.

(j) Upon contention that with respect to both reparation on past shipments and the prescribing of a rate for the future on, shipments moving from points in Canada to points in United States the commission's jurisdiction is limited to the determination of the lawfulness of the amount received or to be received for the transportation from the Canadian border to the United States points, HELD: As to reparation, decisions in International Nickel Co., 66 I. C. C. 627, and a number of later cases, adverse to this contention, are controlling. Ontario Paper Co. v. C. N. Rys., 95 I. C. C. 66, 72.

(k) The commission is without jurisdiction to award reparation on intrastate shipments made during the guaranty period. Pittsburgh Steel Co. v. Director General, 95 I. C. C. 637.

(ka) Contention that because complainant did not allege a violation of section 6 but only violations of sections 1, 2, and 3 of the act, the commission is without jurisdiction to find that the rate collected was inapplicable and to award reparation, not sustained in view of fact that the record shows a thorough effort by each side to prove facts which determine the rate applicable. See 88 I. C. C.

407, 408. Clark Bros. Bolt Co. v. N. Y. C., 102 I. C. C. 355, 357.

(kb) In view of frequent recurrence of the question of commission's jurisdiction to award reparation on shipments from a foreign country to United States, it seems advisable to repeat commission's observation in International Nickel Co., 66 I. C. C. 627, that a review of its ruling in the courts would be desirable for future guidance. Ontario Paper Co. v. C. N. Rys., 102 I. C. C. 365, 367.

(l) The jurisdiction of the Commission to entertain complaints for reparation on account of the exaction of unreasonable rates on shipments which moved during the period of federal control is derived solely from section 206c of the transportation act, 1920 under which such complaints must be filed within one year after federal control terminated on Feb. 29, 1920. Cudahy Packing Co. v. Director General, 102 I. C. C. 598, 600.

(m) The Commission is without authority to award reparation, or to consent to an award of reparation by a state commission, on intrastate shipments which moved during the guaranty period. Armour & Co. v. G. N. Ry., 104 I. C. C. 34, 36.

(n) Upon contention of complainant that no reversal of opinion by the commission or modification of a former opinion could wipe out or extinguish the vested rights of a complainant secured by contracts made in reliance upon the former opinion, FOUND: That the commission is without authority to make an award of reparation based upon such a contention, and this applies with equal force to unfulfilled promises alleged to have been made by representatives of carriers that the reduced rates would be made effective in accordance with the exception expressed in the report. The powers of the commission are not those of a court of equity. Northern Grain & Warehouse Co. v. O. S. L. R. R. Co., 100 I. C. C. 319, 322.

ALL OTHER CITATIONS

Cotton Mfgrs. Asso. of S. C. v. C. C. & O. S. L. R. R. Co., 85 I. C. C. 131; Lilly Co. v. O. S. L. R. R. Co., 85 I. C. C. 644; Japan Cotton Trading Co. v. Director General, as Agent, 88 I. C. C. 407.

§1. Necessity of and primary action by Commission.

(a) Under section 9 of the act the Commission is empowered to award reparation for damages sustained as a direct consequence of a violation of any of its provisions. Miles Lumber Co. v. C. B. & Q. R. R., 89 I. C. C. 761, 764.

(b) Until the Interstate Commerce Commission has, as an official body of technical experts, declared the existence of a right to reparation because of shipments of grain made after its finding that the existing rate was excessive and before the effective date of a subsequent order establishing a lower rate, by some order fixing a right to such reparation, an action to recover the difference between the published tariff rate and the reasonable rate may not be maintained in view of Interstate Commerce Act, §§ 9, 15 (Comp. St. §§ 8573, 8583). Chicago, B. & O. R. Co. v. Merriman & Millard Co., 297 Fed. 1.

(c) No action for reparation for exaction of unreasonable or discriminatory demurrage charges can be maintained in any court in the absence of an appropriate finding by the Interstate Commerce Commission. Turner, Dennis & Lowry Lumber Co. v. Chicago, M. & St. P. Ry. Co., 2 Fed. (2d) 291.

§3. Power to Award Tort Damages.

(a) Loss sustained by complainant in connection with a shipment of lumber sold by carriers and proceeds applied in satisfaction of accrued demurrage, storage, and freight charges after such shipment had been refused by consignee at billed destination, found not to have resulted from any violation of the act. Such charges were assessed in accordance with applicable tariffs, and no evidence was adduced to show that rules or regulations under which they were assessed were unreasonable or otherwise unlawful. The commission is empowered to award reparation only for violations of the act, and complainant's remedy, if any, lies in the courts. Leslie Bros. Lbr. Co. v. P. R. R., 92 I. C. C. 55.

(b) Complainant did not operate its plant during a specified period and claimed "general damages" based upon loss on shipments they claim would have been made if their mill had been in operation, and included depreciation of mill, plant, and equipment, and overhead expenses. Evidence shows that other mills also were shut down at the time because of the then existing economic situation. FOUND: That even if freight rates were the controlling reason for closing complainants' mill, "general damages" claim-

ed are speculative and can not be allowed. Fleming Bros. v. G. N. R. R., 92 I. C. C. 582, 585.

(c) Upon complaint that attempt of N. Y., N. H. & H. R. R. Co. to eject complainant from its produce house at Harlem River Station, New York, N. Y., previously leased to him, and threat to refuse to place cars consigned to him, subjected complainant to unjust discrimination and undue prejudice; HELD, That complainant's evidence is insufficient to warrant a finding that consignees receiving shipments on team tracks are unduly prejudiced or lessees of the produce house unduly preferred, and that he has not proven damage by reason of any undue prejudice which may have existed during the time when the question of the lease was in process of litigation in the courts. Complaint dismissed. Gallup v. N. Y., N. H. & H. R. R. Co. 98 I. C. C. 453.

II. RIGHT TO RECOVER.

§3½. Extent of Recovery.

(a) Complaint alleged unreasonableness, discrimination, and preference and prejudice and sought reparation due to increased rates which resulted in a widening of a spread of rates in favor of competing points. Upon contention of defendant that this raised an issue of prejudice only; HELD: Prayer is for such sums as Commission may determine complainants entitled to and allegations are sufficient. Whitaker-Glessner Co. v. C. & O. Ry. Co., 91 I. C. C. 339, 340.

(b) At common law, shipper had right to recover difference between reasonable charge and exorbitant charges coercively exacted by carrier. Cocke v. Morgan's Louisiana & Tex., R. & S. S. Co. 4 Fed. (2d) 961.

(c) Complainant, in its informal and formal complaints, sought reparation down to a certain basis, but in the presentation of the case it asks that damages be awarded to a still lower basis. Defendants argue that the only issue which may properly be presented to the commission under section 206 (c) of the transportation act, 1920, is a claim for reparation on the basis of the rate sought in the informal and formal complaints. In Shreveport Creosoting Co., 92 I. C. C. 519, and Omaha Steel Works, 87 I. C. C. 403, similar contentions were rejected. Los Angeles Pressed Brick Co. v. Director General, 98 I. C. C. 45, 46.

(d) The measure of damages is the difference between the charges paid and those which would have accrued at certain rates in issue; and a finding of damage in a specific amount measured in this manner must rest upon evidence which shows with certainty and definiteness that this amount does not exceed, at least, the difference between such charges. The finding can not be based upon conjecture. Southern Veneer Asso. v. A. C. L. R. R. Co., 98 I. C. C. 112, 117.

§6. Parties entitled to recover.

See Infra §19; Association; Claims §1 (n); Parties; Procedure Before Commission V.

(a) Evidence of a contract between complainant and its vendors as to freight allowances to be made in case of increases or reductions in freight rates is immaterial where complainant, as owner of shipments, paid freight charges, was party directly damaged by collection of unreasonable rates, and is entitled to recover the unreasonable charges. Missouri Portland Cement Co., 88 I. C. C. 492. As stated in Sanford-Day Iron Works, 41 I. C. C. 10 12, "To go into matter of allowances between parties would lead the commission away from the direct results of act of carrier in exaction of an unreasonable rate into domain of indirect and remote consequences and perhaps into questions of equity between vendor and vendee." Standard Oil Co. v. Director General, 89 I. C. C. 7, 9, 10.

(b) Director general denies right of complainant to award of reparation on ground that predecessor company, which made the shipment, was not a party to informal proceedings, and was not joined as a complainant until formal complaint was filed and after statute of limitations as to that company had run. It was shown, however, that complainant assumed all assets and liabilities and handles all affairs of its predecessors, and that informal complaint filed by complainant stated that shipment was made by its predecessor company. HELD: Predecessor company found to have been party damaged, but reparation awarded successor in interest. Midland Coal Co. v. M. P. R. R. Co. 89 I. C. C. 101, 102.

(c) Shipments were sold at delivered price and settlement made by buyer paying freight charges and remitting to seller difference between delivered price of the commodity and freight charges. Contract of sale provided that if freight

charges were less than a certain amount, buyer would receive benefit of such reduction. If freight charges were higher than figure named, seller agreed to allow buyer the difference between higher rate and rate named in contract. Under terms of the contract any reduction in freight rates belonged to seller. Upon separate complaints filed by both buyer and seller seeking reparation on certain shipments purchased at a delivered price under contract above set forth, HELD: Reparation awarded to seller and not buyer. Dolese Bros. Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 110, 122.

(d) In view of possession by complainant of paid freight bills showing it consignee of shipments, coupled with fact that defendant had previously investigated the charges on shipments here involved, and had satisfied itself that complainant was entitled to overcharges thereon, and further fact that defendant offered no evidence casting doubt upon complainant's right to any reparation found to be due for unreasonable charges collected HELD: Preponderance of evidence supports view that complainant paid freight charges and was damaged thereby, and is entitled to recover unreasonable charges collected. Southern Cotton Oil Co. v. Director General 89 I. C. C. 154, 155, 156.

(e) Complainant purchased the capital stock and acquired by general assignment "all accounts and bills receivable, debts, demands, actions, causes of action, and claims of whatsoever nature" of party who made shipments and paid freight charges thereon, the latter continuing its existence only as a manufacturing branch of complainant who furnished funds for its continued operation. Contention by director general that complainant is barred from making claim for reparation with respect to such shipments by virtue of section 3477 of Revised Statutes, which forbids assignments of unliquidated claims against United States, not sustained since that statute has no application when the assignment is incidental to corporate succession. Nestles Food Co. v. Director General, as Agent, 89 I. C. C. 340, 341. 342.

(f) Contention that assignment of a claim for overcharges being of unliquidated claims against the United States is void under section 3477 of Revised Statutes of United States, not sustained. Statute relied upon does not apply to claims against director general for overcharges under provisions of the Federal control act authorizing suits to be brought against carriers, which latter act also provides that no defense shall be made thereto upon ground that carrier is an instrumentality of the Federal Government. Parrington v. Davis, 285 Fed. 741, citing Missouri Pacific R. R. Co. v. Ault, 256 U. S., 554, 559. McCloud River Lumber Co. v. Director General, 89 I. C. C. 645, 649, 650.

(g) Complainant has borne freight charges, and he is the only person to whom reparation could legally be awarded. Givens v. Director General, 92 I. C. C. 63, 66.

(h) Complainants paid the freight charges and were not reimbursed for those charges as such. They were entitled to award of reparation under a finding of unreasonableness. Wadhams Oil Co. v. C. & N. W. Ry., 92 I. C. C. 361, 362.

(ij) The Commission has consistently found that the fact that a complainant included the freight charges in arriving at the selling price of its product does not preclude it from recovering from the carrier the damages it sustained in consequence of the exaction from it of an unreasonable freight rate. Shreveport Creosoting Company v. L. & P. Ry., 92 I. C. C. 519, 522.

(k) The only one who can recover is the one that alone was in relation with the carrier and from whom the carrier took the sum. California Cotton & Factorage Co. v. Director General, 93 I. C. C. 260, 262.

(l) If the Commission finds that complainant has been the party injured by a violation of the act it is to complainant that the award of reparation should be made under that act, and the Commission may not deny it reparation because of an assignment pendent lite under which no adverse rights are asserted, even if it has jurisdiction under that act to pass upon such conflicts. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 547, 550.

(m) If the Commission finds that complainant has been the party injured by a violation of the act it is to complainant that the award of reparation should be made under that act, and the Commission may not deny it reparation because of an assignment pendente lite under which no adverse rights are as-

serted, even if it had jurisdiction under that act to pass upon such conflicts. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 551, 554.

(n) The Commission has found that where one filed informal complaint in season and another filed formal complaint after the statute had run the claim of the latter was barred. It is also true that the bureau failed to comply with Rule 111 of the Rules of Practice which provides that the informal complaint should contain—if any recovery is sought on behalf of others than complainant, a statement of the capacity and authority in or by which complaint is made in their behalf. But that failure is not fatal to complainants claim if it appears that the filing by the bureau was, in fact, on complainants behalf. Thaxter & Co. v. Director General, 95 I. C. C. 693, 695.

(op) Complainant attacked commodity rates charged on rags, waste paper, cottonseed hull shavings, and cotton linters from Latrobe, Pa., to interstate destinations, as unreasonable. In 88 I. C. C. 535, the Commission found the rates from Latrobe to Kingston, Pa., as components of through rates between Kingston and interstate points as unreasonable, reparation awarded. HELD, that on all inbound shipments on which complainant paid the freight charges to the carrier complainant was damaged in the amount of the difference between the charges paid and those which would have accrued at the rates found reasonable, reparation awarded. On the remaining class of shipments the consignor prepaid the freight charges and included them in the invoice price, not as freight charges, but as a part of the price of the goods. The record contains no copy of the contract of sale but the testimony of complainant is that these shipments were purchased f. o. b. point of destination and that the contract price of the goods plus the freight charges. In the cases of the class of complainants shipments now being considered the contract of sale called for a delivered price, which was arrived at by adding the freight charges to the market price f. o. b. destination the consignor was obliged to pay the freight charges, not for the consignee but for himself. HELD, reparation denied. Barrett Co. v. Director General, 96 I. C. C. 226.

(q) Complainants claim fails to meet any one of the principles of law under which a claim for damages may be maintained against a carrier: 1, that of privity of contract, the consignor having entered into the contract of shipment with the carrier as principal and not as agent for the consignee complainant; 2, that of principal and agent, because, the contract calling for a price f. o. b. destination, the consignee was not obliged to pay the freight charges and the consignor paid them not as agent but as principal; and that the tendency of the law with regard to damage does not go beyond the first step, the first step here having been taken by the consignor, reparation denied. Barrett Company v. Director General, 96 I. C. C. 226, 227.

(r) It is a well established rule of law that where the consignor contracts with the railroad for the movement of goods, but sells the goods f. o. b. point of origin and collects the freight charges from the consignee, the consignor is acting as agent, and the consignee is the undisclosed principal in the transaction. In such a case either the principal or his agent may sue in his own name. Barrett Co. v. Director General, 96 I. C. C. 226, 227.

(s) The Commission has in numerous cases awarded reparation where the complainant paid and bore all or part of the difference between the rates charged and the rates found reasonable. Kanawha Black Band Coal Co. v. K. C. Ry., 98 I. C. C. 431, 433.

(t) A consignor is entitled to reparation on account of unreasonable switching charges paid by it, although admittedly it subsequently collected from the consignees the amounts so paid. Fuller Co. v. Director General, 98 I. C. C. 468, 470.

(u) Complainant was the consignor of the shipments and paid the freight charges in the first instance and subsequently collected them from the consignees. In awarding reparation to complainant the Commission found that it had a right to bring the action. Barse Livestock Commission Co. v. Director General, 98 I. C. C. 539, 540.

(v) Complainant which, as consignor, had prepaid charge on certain shipments of cement on the basis of unreasonable rates, has been damaged thereby and is entitled to reparation notwithstanding the fact that it had subsequently collected from the consignees the freight charges which it paid. Moody Cotton Co. v.

Director General, 98 I. C. C. 643, 645.

(w) Freight charges were paid and borne by consignee, T. H. Collier Estate. Attached to informal complaint filed by consignor were expense bills covering shipments and a letter inquiring as to whether consignor thought they could secure a refund for estate. Request was also made that expense bills be returned if such refund could not be secured. Defendants declined to submit claim on special docket and formal complaint was then filed by consignor in his own name. HELD: Inference to be drawn from letter and other papers of informal complaint is that complainants were seeking reparation on behalf of Collier Estate but, since formal complaint made no reference to estate and does not allege that complainants are acting as its agents, no reparation can be awarded complainant. Russell-Heckle Seed Co. v. Director General, 91 I. C. C. 63, 64.

(x) Pending a decision on merits of case, members of complainant association did not offer detailed evidence as to particular shipments and payment and bearing of freight charges thereon. Upon further hearing, such details and proof having been submitted by claimant members of association on whose behalf complaint was filed, reparation awarded to basis found reasonable in original report. National Preservers & Fruit Products Asso. v. Director General, 91 I. C. C. 221.

(y) Reparation awarded to successors in interest on shipments made by predecessor companies. Jones & Laughlin Steel Co. v. P. & L. E. R. R. Co., 91 I. C. C. 300, 307.

(z) Where complainant, who is neither consignor nor consignee but merely acted as selling agent for consignor and did not pay or bear freight charges, seeks reparation for its own account and not as agent for consignor, who is not a party to proceeding reparation will be denied. Ozark Cooperage & Lumber Co. v. A. & R. R. R. Co., 91 I. C. C. 329, 333.

(aa) Where both consignor and consignee are named as parties complainant, and freight charges are paid by consignee and charged back to consignor, reparation will be awarded to consignor. Gust Johnson Lumber Co. v. C., M. & St. P. Ry. Co., 91 I. C. C. 561, 562.

(bb) Complaint was filed by a corporation which assumed all assets and liabilities of party who paid and bore inapplicable charges HELD: Predecessor company found party damaged but reparation awarded successor in interest. Sloan & Zook Co. v. M. V. R. R., 91 I. C. C. 693, 694.

(cc) 1. Consignor prepaid the freight charges and invoiced the consignee for the Pittsburgh plus price, but not for the freight charges so prepaid. 2. The consignor prepaid the freight charges and invoiced the consignee for the freight charges so prepaid and for the Pittsburgh plus price less the amount so prepaid, both stated separately in the invoice. 3. The consignor did not prepay the freight charges but invoiced the consignee for the Pittsburgh plus price less the amount of the freight charges payable, and the consignee paid those freight charges to the carrier. 4. The consignor did not prepay the freight charges but invoiced the consignee for the Pittsburgh plus price and the consignee paid to the carrier the freight charges and deducted them from the invoiced price in remitting to the consignor. Reparation denied under first class, reparation awarded under second, third and fourth classes. Atlas Metal Works v. A. C. & Y. Ry., 100 I. C. C. 173, 178.

(dd) In 58 I. C. C. 164 the Commission found that shippers who bore the charges and who are parties of record herein are entitled to reparation, following a finding that the collection, between May 21, 1917, and April 1, 1920, of separate charges from shippers for loading and unloading ordinary livestock at, in addition to the rates to and from, Chicago stockyards was an unlawful and unreasonable practice. As the record then before the Commission did not indicate the amount of reparation due each shipper, the parties were requested to comply with Rule V of the Rules of Practice. HELD: Reparation awarded. Chicago Livestock Exchange v. A. T. & S. F. Ry., 100 I. C. C. 266.

(ee) The right of factors in their representative capacity to recover reparation in their own names for unlawful and unreasonable charges is settled. Chicago Livestock Exchage v. A. T. & S. F. Ry., 100 I. C. C. 266, 270.

(ff) Following Missouri Portland Cement Co., 88 I. C. C. 492, wherein it was held that a shipper is damaged when he pays unreasonable transportation charges, and that it is not necessary for commission to go beyond the first step re-

paration awarded to complainant who paid, but who failed to prove that it bore, the unreasonable transportation charges. Cutler-Hammer Mfg. Co. v. Director General, 92 I. C. C. 9.

(gg) Informal complaint was filed by Southern Traffic & Accounting Bureau on behalf of "consignees." Shipments here involved were consigned to subsidiary companies which complainant owns and operates. Complainant's evidence merely reiterated that it "in the final stood and bore the freight charges" and is the party entitled to reparation but left it to be assumed that the subsidiary companies are corporations and not merely trade names under which it conducts portions of its business. Contentions by defendant that claim is barred since informal complaint was not on behalf of complainant itself, and that the fact that complainant finally bore charges paid by its subsidiaries does not entitle it to reparation, sustained. See Gillican-Chipley Co., 85 I. C. C. 702, and cases there cited. Wedeles Tobacco Co. v. Director General, 92 I. C. C. 80, 81, 82.

(hh) Complaint was filed by associations on behalf of their members, but no evidence was introduced with respect to any shipments made for or in their behalf. Such members, in event shipments were made by them, authorized to file reparation statements under Rule V of Rules of Practice, accompanied by proof in form of affidavits that shipments were made and unreasonable charges were paid and borne by them, with understanding that if defendants object to proof in affidavit form such shippers must request further hearing with respect to subject of reparation. Houston Cotton Exchange v. A. & R. R. R., 92 I. C. C. 220, 222, 223.

(ii) Shipments were made by a corporation, such corporation subsequently becoming a partnership. Complaint filed by successor in interest, involving shipments made by its predecessor, found proper and reparation awarded accordingly. See Midland Coal Co., 89 I. C. C. 101. Midland Coal Co. v. St. L.-S. F., 92 I. C. C. 283.

(jj) Informal complaint filed by employee acting in behalf of, and as agent for, and undisclosed principal. Formal complaint filed by latter. Reparation awarded to undisclosed principal, the real party in interest who in fact paid the unreasonable freight charges. Warren Construction Co. v. G. N. P. S. S. Co., 92 I. C. C. 302, 303.

(kk) In original report, 78 I. C. C. 387, reparation was denied complainant because record did "not disclose who paid and bore freight charges." Only witness testifying on the point admitted that all he knew of his own personal knowledge was that invoice showed that charges were prepaid, and while not showing who paid them, he presumed that they were paid by a party other than complainant. No additional evidence was offered by complainant at the hearing. HELD: This evidence is inadequate to sustain a finding that complainant paid and bore freight charges and original finding is affirmed. American Trading Co. v. Director General, 92 I. C. C. 461.

(ll) Following Missouri Portland Cement Co., 88 I. C. C. 492, the party who pays the freight charges is the party directly damaged by the collection of unreasonable rates, and is entitled to recover the unreasonable charges. Southern Wire & Iron Co. v. A., C. & Y. Ry., 92 I. C. C. 463.

(mm) Complainant named in informal proceeding, which failed of adjustment, differed from that set forth in subsequently filed formal complaint. The former owns all capital stock and controls and operates plants, facilities, and business of the latter. HELD: Following Gillican-Chipley Co., 85 I. C. C. 702, the two complainants being in law separate entities, the formal complaint can not be considered a continuation of the informal proceeding. Moreover, party named in formal proceeding not having brought its complaint in its own name within statutory period, is barred. Badger Bag & Paper Co. v. M. D. & W. Ry., 92 I. C. C. 485.

(nn) Complainant succeeded to all obligations, liabilities, assets, and claims of its predecessor who paid and bore unreasonableness charges. FOUND:Predecessor company found party damaged, but reparation awarded successor in interest. California Sales Co. v. Director General, 92 I. C. C. 619, 620.

(oo) Complainant was both consignor and consignee. Shipment was sold f. o. b. destination, purchaser paying freight at destination, as agent for complainant, and deducting it from the latter's invoice. HELD: Complainant is party entitled to recover unreasonable freight charges since he contracted with defendants for carriage and was only party that had privity with them. The only one who

can recover is the one that alone was in relation with carrier and from whom carrier took the sum. Darnell-Taenzer case, 245 U. S. 531; Missouri Portland Cement Co., 88 I. C. C. 492. California Cotton & Factorage Co. v. Director General, 93 I. C. C. 260.

(pp) Shipments were billed in name of consignor who was selling agent of complainant. Complainant's name did not appear on any of the transportation papers, but shipments were made for and on its behalf and freight charges were borne by it. Complainant found party entitled to reparation. Kaw River Sand & Material Co. v. Director General, 93 I. C. C. 346, 347, 349.

(qq) Home Accident & Insurance Co. assumed direction of complainant's business and selected a general manager who paid freight charges in complainants' name on shipments consigned to him individually and to a road commissioner from funds advanced by the insurance company. Identity of complainant's company was maintained and all items of expense and merchandise charged to it. Defendants contended that complainants were not real parties in interest, so complainants' counsel moved to amend complaint by making insurance company a party complainant. This was permitted subject to defendants' objections. HELD: Under facts stated complainant is entitled to reparation and since insurance company presented no adverse claim, it is unnecessary to pass upon motion to amend. Edwards Construction Co. v. J., L. C. & E., 93 I. C. C. 370, 371, 372.

(rr) Contract between consignor and consignee provided that consignee should have benefit of any decrease in freight rates. Consignor, who is not party to the proceedings, paid all freight charges, no part thereof being paid by consignee, the complainant herein. FOUND: Complainant (consignee) is not entitled to reparation. Whatever may be rights or equities of parties arising out of their contract as to variations in their agreed price for the commodity, dependent upon changes in the transportation rates, they present no question cognizable by this commission, dealing, as it does, with the legal public obligations of the carrier, which is a stranger to the private contract. See also 40 I. C. C. 738, 741, and 81 I. C. C. 435, 439. Crawford County Commrs. v. St. L. S. F., 93 I. C. C. 502, 595.

(ss) Prior to filing of complaint, assets and liabilities of complainant were assumed by a successor company whose interest was not disclosed until after statute of limitations had run. Upon contention that motion to join successor in interest as co-complainant comes too late, and that lack of interest precludes a recovery of reparation by complainant, HELD: Following Plymouth Coal Co., 56 I. C. C. 699, if complainant is party injured by a violation of the act the award of reparation should be made in its favor, and it may not be denied reparation because of an assignment pendente lite under which no adverse rights are asserted. Fact that assignment took place prior to filing of complaint warrants no different conclusion. See 68 I. C. C. 138; 83 I. C. C. 557. Delta Beet Sugar Corp. v. Director General, 93 I. C. C. 547, 549, 550. Same v. Same, 93 I. C. C. 551, 553, 554.

(tt) Following Jones & Laughlin Steel Co., 91 I. C. C. 300, reparation awarded complainants and interveners in respect of interstate shipments on which they paid charges of the Monongahela connecting, South Buffalo, and Union railroads, in addition to district rates of trunk-line connections, defendants having failed to justify increased rates during nonabsorption period in so far as they resulted in transportation charges exceeding those contemporaneously in effect to and from trunk-line points in same rate districts, aggregate charges applicable during period of nonabsorption having been found unreasonable to that extent in the cited case. Jones & Laughlin Steel Co. v. P. & L. E., 93 I. C. C. 637.

(uu) Complainant did not present proof of payment and bearing of freight charges due to its witness not being available. FOUND: That unless further hearing is requested within 10 days after service of report its complaint will be dismissed for want of prosecution. Jones & Laughlin Steel Co. v. P. &. L. E., 93 I. C. C. 637, 639.

(vv) Formal complaint filed by same company filing informal proceeding bore signatures of complainant's attorney and of the general traffic manager of another company which bought complainants entire stock. Upon contention that formal complaint is barred because filed by successor company, and does not represent a formal complaint filed by same company named in the informal proceeding, HELD: While formal complaint carries signature of general traffic manager of the successor company without show-

ing agency, it is also signed by complainant's attorney, and as presented is properly signed and not barred. Forrester-Nace Box Co. v. Director General, 93 I. C. C. 665.

(ww) Upon further hearing, complainant having submitted satisfactory proof of having borne unreasonable freight charges on shipments of box shooks from Raymond, Wash., to San Francisco and other California points, reparation awarded. Original report, 77 I. C. C. 669. West Coast Lumberman's Asso. v. Director General, 95 I. C. C. 287.

(xx) Upon further hearing, complainant members of association filing the complaint, having submitted satisfactory proof of having paid and borne unreasonable freight charges at rates found unreasonable in original report, 88 I. C. C. 178, reparation awarded. Phoenix Chamber of Commerce v. A., T. & S. F., 95 I. C. C. 665 .

(yy) Where freight charges are paid by consignee but are charged back to consignor, the consignor, if he makes the claim, is entitled to reparation found to be due. Sloss-Sheffield Steel & Iron Co., 40 I. C. C. 738; Missouri Portland Cement Co., 88 I. C. C. 492. M'Fadden & Bros. Agency v. Director General, 95 I. C. C. 734, 737.

(zz) Shipments were purchased f. o. b. destination. Consignor prepaid freight charges and included them in invoice price. FOUND: Where consignor contracts with railroad for movement of goods, but sells the goods f. o. b. point of origin and collects freight charges from consignee, the consignor is agent and consignee is undisclosed principal in the transaction; either may sue in own name in such case. However, where contract of sale calls for a delivered price, arrived at by adding freight charges to market price f. o. b. shipping point and consignor is obligated to pay freight charges, not for consignee, but for himself, question of principal and agent is not involved, as no privity of contract exists between consignee and carrier. Moreover, general tendency of the law with regard to damages is not to go beyond the first step. Barrett Co. v. Director General, 96 I. C. C. 226.

(3a) Shipments were purchased f. o. b. point of origin at a price which included an amount sufficient to cover freight charges, which were paid direct to carrier by consignee and deducted from invoice price. FOUND: Following Missouri Portland Cement Co., 88 I. C. C. 492, the law does not require the commission to go beyond first step in the payment of freight charges and since they were paid by consignee he is the party entitled to reparation. Barrett Co. v. Director General, 96 I. C. C. 226.

(3b) Shipments were purchased f. o. b. destination. Consignor prepaid freight charges and included them in invoice price. FOUND: Where consignor contracts with railroad for movement of goods, but sells the goods f. o. b. point of origin and collects freight charges from consignee, the consignor is agent and consignee is undisclosed principal in the transaction; either may sue in own name in such case. However, where contract of sale calls for a delivered price, arrived at by adding freight charges to market price f. o. b. shipping point and consignor is obligated to pay freight charges, not for consignee, but for himself, question of principal and agent is not involved, as no privity of contract exists between consignee and carrier. Moreover, general tendency of the law with regard to damages is not to go beyond the first step. Barrett Co. v. Director General, 96 I. C. C. 226, 227.

(3c) Shipments were purchased f. o. b. points of origin and sold f. o. b. destination, complainant being consignee, or both, on majority of shipments. Where a consignee other than complainant paid freight charges, such charges were deducted from invoice price and where complainant appeared neither as consignee nor consignor, shipments were made by a nominal consignor under the direction and for benefit of complainant. HELD: Complainant paid and bore freight charges on shipments under consideration and is entitled to reparation thereon. Cohn v. C., M. & St. P. Ry. Co., 96 I. C. C. 257, 258, 259.

(3d) Reparation awarded successor in interest on shipments made by predecessor company. Mistletoe Creameries v. A., T. & S. F., 96 I. C. C. 303, 310.

(3e) Upon further consideration statement in original report, 92 I. C. C. 32, that defendants not made parties to the complaint within the statutory period may join in payment of reparation, eliminated. In Phillips v. Grand Trunk Ry., 236 U. S. 662, it was held that with respect to claims not filed within the statutory period the remedy is barred

and liability destroyed. Larrowe Milling Co. v. A. A. R. R., 96 I. C. C. 329.

(3f) Upon contention that where the identity of business houses, in whose behalf claims for reparation are presented on further hearing, has changed since shipments in issue moved, all claims on which interest accrued subsequently to such change are barred under section 3477 of Revised Statutes of the United States. HELD: Commission has uniformly overruled such contention. See Fairmont Creamery Co. v. Director General, 68 I. C. C. 507; McCloud River Lumber Co. v. Director General, 89 I. C. C. 645. Boston Wool Trade Asso. v. Director General, 98 I. C. C. 48, 51.

(3g) Upon contention of defendant that complainants failed to prove that they paid and bore the charges in connection with the shipments made by them for contracts executed on a cost-plus basis and therefore were not damaged and are not entitled to reparation. FOUND: Complaints clearly showed that they paid the freight charges and the commission held in Missouri Portland Cement Co., 88 I. C. C. 492, that proof of payment of freight charges found unreasonable is sufficient to warrant an award of reparation. Reparation awarded. Hopeman Material Co. v. N. P. Ry. Co., 98 I. C. C. 361, 370.

(3h) Contention that as paragraph 3 of Rules of Practice requires that where recovery is sought on behalf of other than complainant a statement of the capacity or authority in and by which complaint is made must be set forth, the complaint in invalidated so far as it concerns the rightful claimants, namely, the consignors, who actually bore freight charges, not sustained, following 88 I. C. C. 492. Barse Live Stock Commission Co. v. Director General, 98 I. C. C. 539.

(3i) Following 88 I. C. C. 492, a cotton factor, filing complaint in its own name, found entitled to damages on shipments on which it paid charges. Moody Cotton Co. v. Director General, 98 I. C. C. 643.

(3j) So-called assignments did not purport to transfer title to the claims. The words used fairly indicated an intention to retain the ownership, did not constitute an assignment, and were nothing more than an authorization to complainant to receive payment. Under the findings of the commission herein, their legal effect is not controlling. Moody Cotton Co. v. Director General, 98 I. C. C. 643, 645.

(3k) While it is true that the minimum here involved appears to be excessive, it must not be overlooked that it is a part of the rate, and in order to entitle complainants to an award of reparation it must be found that they paid unreasonable charges on their shipments. Swift & Co. v. G. T. Ry. Co. of Canada, 98 I. C. C. 649, 652.

(3ka) Freight charges were paid by consignee, who had no connection with party filing complaint, except as a customer. Complainant was an utter stranger to the transportation, shipment having been made merely in its behalf. Letter of consignee filed with complaint and addressed to consignor not as a representative of complainant, and which only acquiesced in an anticipated effort to procure a "refund on the freight charges" found not to be an assignment. Even under the commission's liberal rules of practice such letter can not be construed as an appointment of complainant as agent for consignee, who paid the charges. Butler Paper Co. v. C., I. & W. R. R., 102 I. C. C. 311, 313.

(3kb) Freight charges were paid by consignee, a branch firm of party filing complaint. Consignee filed a letter informing the commission that complainant had been given permission and instructed to file claim in its behalf, that it is a subsidiary of complainant, and that any settlement made with complainant would be satisfactory to it, FOUND: Letter can not be considered an assignment, but is a sufficient appointment of complainant as agent for consignee for purpose of prosecuting the claim. Butler Paper Co. v. C., I. & W. R. R., 102 I. C. C. 311, 313.

(3kc) Reparation denied where complainant was not present at the hearing and his witnesses had no knowledge as to who paid and bore charges aside from allegation in the complaint. Kaseman v. A., T. & S. F., 102 I. C. C. 315, 316.

(3kd) One of the complainants herein, the consignor, sold shipments to consignees f. o. b. destination, all sales orders, invoices, and other documents relating to the sales being made in its own name. Consignees actually paid freight charges at destination, but deducted them from purchase price in making settle-

ment with consignor. In the final accounting between themselves the freight charges were borne in equal proportion by joint complainants. Contention that reparation may only be awarded to consignees by reason of their having paid freight charges, not sustained, and reparation awarded in equal proportion to joint complainants. Tidal-Western Oil Corp. v. M., K. & T., 102 I. C. C. 322, 323, 324.

(3ke) Complainant purchased shipments under a contract providing for delivery f. o. b. seller's works at point of origin, selling price including a freight allowance to be deducted by complainant from face of invoice before payment. FOUND: Seller has no right to reparation because it merely deducted exact amount set forth in contract as allowance. Complainant who paid charges to carrier is party entitled to reparation, and whatever may have been purpose of circumlocution in contract does not affect its rights thereto. Clark Bros. Bolt Co. v. N. Y. C., 102 I. C. C. 355, 357.

(3kf) Where consignees, commission firms, pay freight charges to carriers and deduct amounts thereof from their remittances to shippers, the commission firms are thus acting as agents for shippers in payment of charges and are entitled, as such, to awards of reparation for exaction of illegal rates. Chicago Live Stock Exchange v. Director General, 102 I. C. C. 452, 454.

(3kg) Purported assignments and letters of authorization to complainant from consignors of all rights to reparation respecting shipments on which consignors bore charges, bearing dates after that on which the statutory period within which complaints for the recovery of damages could have been filed, found to come too late to accomplish the purpose intended. See 80 I. C. C. 55. Farrel v. C., M. & St. P., 102 I. C. C. 455, 457.

(3kh) Following Missouri Portland Cement Co., 88 I. C. C. 492, wherein commission interpreted the law as not requiring it to go beyond the first step in payment of freight charges, reparation awarded to complainant on shipments on which it paid, or paid and bore, freight charges, but denied as to shipments on which part of charges were paid by complainant, part by consignor, and all finally borne by consignor. Farrel v. C., M. & St. P., 102 I. C. C. 455, 458.

(3ki) Claimant organization made no shipments in its own name, failed to name as cocomplainants any of its members, and complaint filed by it does not state definitely on whose behalf reparation is sought. None of its members intervened at the hearing, although several manufacturers and dealers offered testimony, general in character, with respect to sources of their competition and their business methods in payment of freight charges. Their evidence, however, in view of defects in pleadings, can not be regarded as constituting valid claims for damages or reparation. Northeast Mississippi Traffic Bureau v. A. & V., 102 I. C. C. 611, 616.

(3kj) Freight allowance was received by complainant from consignor on certain shipments in order to equalize freight rate from some other point of production. Upon contention of carriers that if reparation is awarded on these shipments there should be deducted from amount thereof this allowance, HELD: Complainant paid to carriers full amount of freight charges and is entitled to full amount of reparation. To go into matter of allowances between parties would lead away from direct results of act of carriers in exaction of unreasonable rates, into domain of indirect or remote consequences, and perhaps into questions of equity as between vendor and vendee. See also 40 I. C. C. 747. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 744.

(3l) The record is clear that these complainants paid to defendants the entire amount of the freight charges. To go into the matter of allowances between the parties would lead away from the direct results of the act of the carriers in the exaction of unreasonable rates, into the domain of indirect or remote consequences and perhaps into questions of equity as between vendor and vendee. Wortham Carter Publishing Co. v. Director General, 102 I. C. C. 729, 744.

(3la) By agreements, consignors obtained from consignees assignments purporting to transfer to assignees (the consignors) "all rights to * * * any refund of freight charges" on specified shipments, with understanding that any reparation obtained would be refunded to respective assignors (the consignees who paid and bore the freight charges), less proper allowances for expenses. Upon contention that instruments were in effect powers of attorney and not assignments, and that since informal complaints were filed in name of consignors

and not of real parties in interest, no recovery can be made because barred by the statute of limitation, HELD: Documents are not powers of attorney. They transferred to consignors legal title to claims, and fact that beneficial interest may have been in assignors is immaterial. Consignors received assignments prior to filing of informal complaints and therefore had right to file complaints in their own behalf. Wichita Chamber of Commerce v. Director General, 102 I. C. C. 745, 746.

(3lb) Informal complaint showed "The Team Company" a copartnership composed of three partners as claimant. Formal complaint brought in the Wichita Company as additional complainant. Upon contention that the Wichita Company is a department of the copartnership; that informal complaint tolled the statute with respect to all shipments on its behalf; that partners were operating under two names; and that trade names, as such, have no standing under the law, copartners being real parties in interest, HELD: Failure to name the Wichita Company in informal complaints is not fatal. The parties in interest are named and the statute tolled in respect of the shipments here involved. Wichita Chamber of Commerce v. Director General, 102 I. C. C. 745, 746.

(3lc) Assignments were made under seal and purported to transfer to assignees "all rights to * * * any refund of freight charges" on specified shipments. Upon contention that since no consideration is expressed in the documents they are invalid, FOUND: Such assignments are valid since made under seal. Wichita Chamber of Commerce v. Director General, 102 I. C. C. 745, 746.

(3ld) Upon contention that under section 3477 of the Revised Statutes of the United States assignments were void because they transfer unliquidated claims against the Government, HELD: Section 3477 does not apply to claims brought under the transportation act against the Director General. See 89 I. C. C. 645, 649. Wichita Chamber of Commerce v. Director General, 102 I. C. C. 745, 746, 747.

(3le) The Team Company, a copartnership of three partners, entered into contract with a private individual, the individual to receive in consideration of his services a specified percentage of net profits, without participating in losses. HELD: Such contract did not create a new copartnership but continued the old copartnership in effect. See 116 U. S. 461, 472. To have created a new copartnership composed of the four men, a joint agreement would have been necessary to the effect that each copartner was to participate in both profits and losses. See 132 U. S. 539; 20 R. C. L. 825. Wichita Chamber of Commerce v. Director General, 102 I. C. C. 745, 747.

(3lf) Reparation will not ordinarily be awarded to basis of finding made in a general investigation resulting in a widespread readjustment of rates on shipments which moved prior to effective date of commission's order. See 69 I. C. C. 11 and other cases cited. Western Pine Mfrs. Asso. v. Director General, 102 I. C. C. 753, 755.

(3m) In 81 I. C. C. 169 the Commission found that reparation on certain shipments of imported tin from San Francisco, Calif., to Chicago, Ill., Newark, N. J., and New York, N. Y., could not be awarded because consignee was not a party complainant. HELD, upon reconsideration, complainant awarded reparation, based upon rate found unreasonable of $1.25. Mitsui & Company v. Director General, 107 I. C. C. 469.

(3n) Complainant's affidavit avers that the fuel oil "was purchased on basis of f. o. b. refinery with freight and tax allowed to Newport News," FOUND: That this statement is ambiguous and no conclusion can be drawn from it on the bearing of charges. Complainant paid the charges. Missouri Portland Cement Co., 88 I. C. C. 492. Reparation awarded. Newport News Shipbuilding & Dry Dock Co. v. L. & N. R. R. Co., 100 I. C. C. 1, 3.

(3o) Joint rates on tin plate from McKeesport, Pa., Yorkville, Ohio, and Cumberland, Md., to New London, Wis., found not unduly prejudicial but found unreasonable. Complainant did not pay or bear freight charges based on the rates herein found unreasonable on shipments from Cumberland and is not entitled to reparation, but on the shipments from McKeesport and Yorkville, while it might be said that the consignee paid an invoice price which reflected freight charges based on the Pittsburgh rate, the fact that these points took the same rate as Pittsburgh is but a coincidence, and the evidence falls short of proving that complainant under these contracts paid or bore as such the

freight charges assessed under the particular rates herein found unreasonable. It is clear upon this record that if the joint rates herein found unreasonable had not been in effect, complainant's invoices would still have reflected the rate from Pittsburgh, as was actually the case, and not the rates from these points of origin. Reparation denied. Borden Co. v. A. A. R. R. Co., 100 I. C. C. 153, 156, 157.

(3p) Shipments of iron and steel articles from various points in Ohio, Kentucky, Indiana, Alabama, Illinois, Pennsylvania, New York, and Missouri to Dallas, Fort Worth, and Harrys, Tex., were purchased by complainants on the so-called Pittsburgh-plus basis. It appears that on some of the shipments the freight charges were prepaid by the shipper and on others they were paid by these complainants, the consignees, but before the commission can award reparation to any of these complainants it must have sufficient proof with respect to their shipments that they are entitled to it. Atlas Metal Works v. A., C. & Y. Ry. Co., 100 I. C. C., 173, 177, 178.

(3q) Complainants and their shipments were identified by reason of the fact that none but members of the Chicago Live Stock Exchange were permitted to do business through the stockyards, participant in the transportatoin where all such members were known and where their shipments were matters of record. Chicago Live Stock Exchange v. A. T. & S. F., 100 I. C. C. 266, 267.

(3r) The right of factors in their representative capacity to recover reparation in their own names for unlawful and unreasonable charges is settled. Memphis Freight Bureau v. St. L. & S. F. R. R. Co., 57 I. C. C. 212. Chicago Live Stock Exchange v. A. T. & S. F., 100 I. C. C. 266, 270.

(3s) The reasonableness of the freight rate paid by the shipper is not controlled by the agreement the shipper may have with another. The Commission is only concerned with who paid and/or bore the freight charges as such. Columbia Steel Co. v. B. & O. R. R., 109 I. C. C. 46, 49.

(3t) Where one corporation takes over the assets of another by merger, the absorbing corporation may enforce the claims of the merged corporation against the United States. Schweitzer Co. v. Director General, 109 I. C. C. 663, 664.

Director General, as Agent, 88 I. C. C. 447; Missouri Portland Cement Co. v. Director General, as Agent, 88 I. C. C. 492; Cutler-Hammer Mfg. Co. v. Director General, as Agent, 88 I. C. C. 600.

§7. Statute of limitations.

See Claims I.

(a) Shipments moving prior to Federal control, freight charges on which were paid during that period found barred by the statute of limitations, the period on such shipments being computed from date of delivery or tender of delivery. Du Pont de Nemours & Co., 87 I. C. C. 189. Lindeteves-Stokis v. Director General, as Agent, 89 I. C. C. 3.

(b) Director general denies right of complainant to award of reparation on ground that predecessor company, which made the shipment, was not a party to the informal proceedings, and was not joined as a complainant until formal complaint was filed and after the statute of limitations as to that company had run. It was shown, however, that complainant assumed all assets and liabilities and handles all affairs of its predecessor, and that informal complaint filed by complainant stated that shipment was made by its predecessor company. HELD: Predecessor company found to have been party damaged but

reparation awarded successor in interest. Midland Coal Co. v. M. P. R. R. Co. 89 I. C. C. 101, 102.

(c) Complainant attacked commodity rates charged on nine cars of wrapping paper in November 1918, from International Falls, Minn., to Wausau, Wis., as unreasonable and unduly prejudicial. The Union Paper & Bag Corporation owns all the capital stock of the Badge Bag & Paper Company and controls and operates all the plants, facilities, and business of the latter, but the two companies are in law separate entities. The complaint was filed Oct. 18, 1922, within the six months period; but since the complainants are not the same the formal complaint can not be considered as a continuation of the informal proceeding. The true complainant was not disclosed until the date last mentioned and its complaint was not filed within the statutory period after the termination of federal control. HELD complaint dismissed. Badger Bag & Paper Co. v. M. D. & W. Ry. 92 I. C. C. 465.

(d) Section 16 of the act provides that, except under circumstances not here present, all complaints for the recovery of damages shall be filed with the commission within two years from the time the cause of action accrues and not after, and for the purposes of this section the cause of action shall be deemed to accrue upon delivery or tender of delivery of shipments. With respect to claims not filed within the statutory period the remedy is barred and liability destroyed. Larrowe Milling Co. v. A. A. Ry., 96 I. C. C. 329.

(e) Complainant attacked charges on grain between March 1, 1920 and April 1, 1922, as unreasonable, original report 92 I. C. C. 32. On shipments delivered or tendered for delivery prior to May 17, 1920, no reparation against the carriers not made parties to the complaint until May 16, 1922 could be awarded. HELD, reparation denied. Larrowe Milling Co. v. A. A. R. R., 96 I. C. C. 329.

(f) Petition in intervention seeking reparation on shipments moving during Federal control period found barred by Statute of limitations because not filed within one year after termination of Federal control. Hudson Mule Co. v. Director General, 91 I. C. C. 459.

(g) Excluding period of Federal control as provided in section 206 (f) of Transportation Act, 1920, claims for reparation based on causes of action arising prior to Federal control found to have been filed within two years and not barred. Macbeth-Evans Glass Co. v. B. & O. R. R. Co., 91 I. C. C. 758.

(h) Claims for reparation based upon causes for action which arose during period of Federal control, filed with Commission within one year after termination thereof, as provided in section 206 (c) of Transportation Act, 1920, found not barred. Macbeth-Evans Glass Co. v. B. & O. R. R. Co., 91 I. C. C. 758.

(i) Original formal complaint attacking one factor of a combination rate was filed against originating carrier within statutory period. By amended complaint filed more than six months after notice that claim could not be disposed of informally and more than two years after cause of action accrued, carrier publishing other factor was brought in as an additional party defendant. HELD: Claim against originating line, whose factor only is assailed, found not barred but claim against carrier named in amended complaint found abandoned under Rule III (g) of Rules of Practice. Inland Empire Paper Co. v. C., M. & St. P., 92 I. C. C. 29, 30.

(j) Contention that filing of an informal complaint did not stop running of the statute in favor of complainant named in formal proceeding because it did not specifically state that it was filed in his behalf, not sustained. Party filing informal complaint made no claim in its own behalf or in behalf of complainant but bills of lading and paid expense and demurrage bills accompanying the claim clearly indicated that complainant named in formal proceedings was the real party in interest. Givens v. Director General, 92 I. C. C. 63, 66.

(k) Informal complaint against director general, as agent, involving shipments moving during Federal control, in so far as question of reasonableness is concerned, found barred by the statute of limitations because filed more than one year after Federal control terminated. Chevrolet Motor Co. of Calif. v. Director General, 92 I. C. C. 73.

(l) Informal complaint named Buffalo, Black Rock, and Niagara Falls, N. Y., as destination points. Formal complaint, specifically intended to cover same shipments, named Harriet, N. Y., as point of destination. Upon contention of director

general that claims covered by formal complaint are barred because Harriet was not named as destination point therein until subsequent to time allowed by law for filing complaints for damages against him. FOUND Freight bills on some shipments show Harriet as destination, and correspondence and final letter of rejection of informal claim from director general refer to that claim as covering shipments from that point. There is, therefore, no room for reasonable doubt that he was put on notice by the informal complaint as to subject matter of the formal proceeding. Acheson Graphite Co. v. Director General, 92 I. C. C. 215, 216, 217.

(m) Formal complaint filed with commission within 90-day period after institution of suit by carriers in the courts for undercharges. Carrier, not named as a party to such suit or as a defendant in formal proceeding before the commission, requested that it be made a party defendant in latter proceeding. HELD: Since such request was filed more than 90 days after institution of the court proceeding, and more than two years from date of delivery of shipments, the statute has barred the claim against such carrier. Randolphs Furniture Works v. E. R. R. 92 I. C. C. 245, 246.

(n) Formal complaint filed with commission within 90-day period after institution of suit by carriers in the courts for undercharges. Complainant was amended by bringing in an additional party defendant after expiration of such 90-day period. Such additional defendant was not a party to, nor did it bring an action for recovery of, undercharges within three-year period prescribed by the statute. FOUND: Such additional defendant is protected by the statute of limitations, complainant having failed to bring an action against it before the commission within two years from date of delivery of shipments. Randolph Furniture Works v. E. R. R., 92 I. C. C. 245.

(o) Where an informal complaint filed within statutory period specifies certain shipments, and formal complaint based upon informal proceedings brings in additional shipments, such additional shipments are barred unless brought in issue within the statutory period. Whiting Plover Paper Co. v. S. Ry. Co., 92 I. C. 292.

(p) Complaint as originally filed alleged unreasonableness in rates on shipments moving between specified dates. At the hearing complainants filed motion to amend to include additional shipments moving subsequent to date specified, defendants objecting thereto on ground that such amendment would broaden the issues. HELD: Amendment allowed since it only puts in issue the reasonableness of rates subsequent to date named in complaint as originally filed. Houston Cotton Exchange v. A. & S. Ry., 92 I. C. C. 363.

(q) Complainant only sought reparation on past shipments therein specified, but at original hearing complainants filed an amendment to cover all shipments moving since filing of the complaint to which defendants interposed no objection. Subsequently a further hearing was held and defendants there contended that shipments delivered more than two years prior thereto are barred by the statute. HELD: Complainants clearly seek reparation on shipments made during pendency of the proceeding. Wichita Board of Commerce v. Director General, 92 I. C. C. 370, 371.

(r) Carriers question complainants' right to reparation on shipments which moved subsequent to filing of complaint, on ground that said complaint only sought reparation on past shipments therein specified. HELD: While prayer of complaint was so restricted, at original hearing complainants asked to have shipments moving subsequent to filing of complaint included and no objection thereto was interposed by carriers. This was tantamount to an amendment of the complaint and the commission so considers it. Wichita Board of Commerce v. Director General, 92 I. C. C. 370, 371.

(s) Complainant in its petition sought reparation down to a certain basis but at hearing asked that damages be awarded to still lower basis. Objection by defendant that reparation can not be awarded to lower basis sought because request therefor was made after expiration of limitation period prescribed in the act, found not well taken. Request for increased damages is found upon facts stated in original complaint, does not constitute a new cause of action, and therefore relates back to time of filing of the complaint. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 520.

(t) Where shipper's claim for damages for misrouting of shipment was barred by two-year limitation prescribed by Interstate Commerce Act, §16 (2), being Comp. St. §8584, before passage of

Transportation Act 1920, §206 (f), being (Comp. St. Ann Supp. 1923, §10071¼ cc.) declaring that period of federal control should not be computed as part of period of limitation, in actions against carriers or in claims for reparation, HELD, lapse of period of limitation prescribed not only barred shipper's remedy, but destroyed liability of carrier, which was not revived by subsequent enactment of Transportation Act, nor would such act be construed as retroactive to create liability, since to do so would render it violative of Const. U. S. Amend. 5, as denial of due process. William Danzer and Co. Inc., v. Gulf & S. I. R. Co., 45 Sup. Ct. 612.

(u) Cause of action did not arise before period of federal control within Transportation Act Feb. 28, 1920, §206f (Comp. St. Ann. Supp. 1923, §10071¼cc), excluding such period in computing limitations, if it did not accrue so as to be enforceable until after federal control began. Cocke v. Morgan's Louisiana & Tex. R. & S. S. Co., 4 Fed. (2d) 961.

(v) Counsel for defendants question right of opposing counsel to represent many shippers named as complainants, and also contended that many claims presented are barred by the statute of limitations. But as they admit that some shippers named are bona fide complainants and that some claims are not barred by the statute the commission may proceed to consider the issues without passing upon jurisdictional question as to individual complainants and claims. Dickerson v. Director General, 93 I. C. C. 304, 305.

(w) Complaint, filed with commission within 90 days after institution of suit by carrier in the courts for undercharges, found not barred by the statute of limitations. See Section 16 (3) of the act. Texas Co. v. A., T. & S. F., 93 I. C. C. 691.

(x) Complainants seek reparation on shipments that moved during two year period prior to filing of amended complaint and thereafter during the pendency of the proceeding and defendant resists such an award referring to provisions of Rule 3 (s) of Rules of Practice. FOUND: This rule has no application where prayer for reparation is not a new complaint, but an amendment of one already filed. Nelson Fuel Co. v Director General, 96 I. C. C. 124, 130.

(y) Upon further consideration statement in original report, 92 I. C. C. 32, that defendants not made parties to the complaint within the statutory period may join in payment of reparation, eliminated. In Phillips v. Grand Trunk Ry., 236 U. S. 662, it was held that with respect to claims not filed within the statutory period the remedy is barred and liability destroyed. Larrow Milling Co. v. A. A. R. R., 96 I. C. C. 329.

(z) Upon contention of defendant that complainants failed to prove that they paid and bore the charges in connection with the shipments made by them for contracts executed on a cost-plus basis and therefore were not damaged and are not entitled to reparation. FOUND: Complainants clearly showed that they paid the freight charges, and the commission held in Missouri Portland Cement Co., 88 I. C. C. 492, that proof of payment of freight charges found unreasonable is sufficient to warrant an award of reparation. Reparation awarded. Hopeman Material Co. v. N. P. Ry. Co., 98 I. C. C. 361, 370.

(aa) Upon contention that formal complaint was barred by statute because informal complaint on which it rested was filed by New Jersey Zinc Co., as principal and not as agent for complainant, FOUND: Informal filing was, in fact, on complainant's behalf and formal complaint not barred. Tulsa Fuel & Mfg. Co. v. Director General, 98 I. C. C. 411.

(bb) Contention that informal filing of complaint by Fuller Co. was not sufficient to stop running of the statute as to the Libbey-Owens Co., which in formal complaint is alleged to have suffered damage, found immaterial following 88 I. C. C. 492. Under the contract between the two parties, Libbey-Owens Co. was not a party to the transportation record and no order could be entered in respect of it. Fuller Co. v. Director General, 98 I. C. C. 468, 469.

(cc) Contention that as paragraph 3 of Rules of Practice requires that where recovery is sought on behalf of other than complainant a statement of the capacity or authority in and by which complaint is made must be set forth, the complaint is invalidated so far as it concerns the rightful claimants, namely, the consignors, who actually bore freight charges, not sustained, following 88 I. C. C. 492. Barse Live Stock Commission Co. v. Director General, 98 I. C. C. 539.

(dd) Following 88 I. C. C. 492, a cot-

ton factor, filing complaint in its own name, found entitled to damages on shipments on which it paid charges. Moody Cotton Co. v. Director General, 98 I. C. C. 643.

(ee) Claims on all shipments prior to Jan. 1, 1918 the beginning of federal control, are barred by the statute of limitations, unless charges in respect of such shipments were collected at such times as to save complainants rights under the statute of limitations in effect prior to the passage of the amendment of March 1, 1920. Wortham Carter Publishing Co. v. Director General, 102 I. C. C. 729, 730.

(ff) Reparation statement indicates that two shipments were delivered subsequent to the period of Federal Control and the right of recovery upon these shipments lay against the Denver & Rio Grande Western, successor to the Denver & Rio Grande, and not against the director general, who was made the sole defendant herein, these shipments, therefore, are barred. Western Metals Co. v. Director General, 100 I. C. C. 314, 315.

(gg) Contention by carriers that no reparation may be awarded covering a period of more than two years prior to filing of a sub-complaint; that original complaint did not put in issue the through rates; that a finding of unreasonableness and award of reparation can not be made because carrier participating in one factor is not a party defendant; and that as to the other factor, reparation to full amount can not be made against delivering carrier named in original complaint because other participating carrier is not a party, not sustained. Allegations in original complaint specify through rate and are in substantially same form as in previous cases where commission found rate charged unreasonable to extent a specified factor exceeded a certain amount. See 92 I. C. C. 29; 88 I. C. C. 535; and 87 I. C. C. 668, 672. Delivering carrier named in original complaint participated in joint rate factor and is jointly and severally liable irrespective of whether other participant in that joint rate is a party to the proceeding. Barrett Co. v. N., C. & St. L., 101 I. C. C. 279, 280, 281.

(gga) Fact that all of carriers over whose rails shipments moved were not named in formal complaint can not act as a bar to running of statute of limitations where shipments moved during Federal control wholly over federally-controlled lines and only reparation is sought. See 80 I. C. C. 485. Farrell v. C., M. & St. P., 102 I. C. C. 455, 456.

(ggb) Formal complaint alleging unreasonableness on shipments moving during Federal control, filed with commission within 90 days after institution of suit by carrier in the courts for collection of undercharges, but more than one year after termination of Federal control, found barred. The right of action under allegation of unreasonableness was not revived by court proceeding and is not properly before the commission under section 16 (3) of the interstate commerce act. The commission's jurisdiction to entertain complaints for reparation on account of the exaction of unreasonable rates on shipments moving during Federal control is derived solely from section 206 (c) of the transportation act, 1920, under which such complaints must be filed within one year after termination of Federal control. See 264 U. S. 456. Cudahy Packing Co. v. Director General, 102 I. C. C. 598, 599, 600.

(ggc) Claims for reparation on shipments moving prior to Federal control are barred by the statute of limitations, unless charges in respect of shipments are collected at such times as to save a shipper's rights under the statute of limitations in effect prior to the transportation act, 1920, such statute having been construed by the Supreme Court in 246 U. S. 638 as accruing and beginning to run from date of payment of freight charges. See Danzer & Co. 268 U. S. 633; 87 I. C. C. 189. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 731.

(hh) Section 16 of the act provides that substantially all complaints for the recovery of damages not based on overcharges shall be filed with the commission within two years from the time the cause of action accrued and not after; also that the cause of action accrues upon delivery or tender of delivery of the property by the carrier. Gentile Co. v. Amer. Ry. Exp. Co., 109 I. C. C. 171.

(ii) Complainant attacked class rate charged on three cars of less carload shipments from Chicago on August 25, 1920 to Kansas, Louisiana, Missouri, New Mexico, Oklahoma and Texas, as unreasonable, unjustly discriminatory, unduly prejudicial and preferential and in violation of section 6 in that the rates charged were those in effect August 26, 1920 instead of Aug. 25, 1920. Ship-

ments were all delivered on or before Dec. 9, 1920, informal complaint received on Dec. 11, 1922 or more than two years after delivery of shipments. HELD, shipments barred by the statute prior to the enactment of the amendment of June 7, 1924, complaint dismissed. Calumet Baking Powder Co. v. A. & N. R. R. R. Co., 109 I. C. C. 249.

(jj) On Oct. 8, 1924 the Commission served a report in which it found the claim for reparation barred by the statute of limitations and dismissed the complaint. Case was reopened. HELD, claim barred by the statute of limitations, complaint dismissed. Moore Lawless Grain Co. v. M. P. R. R., 109 I. C. C. 588.

ALL OTHER CITATIONS

Greater Des Moines Committee v. Director General, as Agent, 85 I. C. C. 478; Eishelman & Sons v. Director General, as Agent, 85 I. C. C. 578; Lilly Co. v. O. S. L. R. R. Co., 85 I. C. C. 644; Gillican-Chipley Co. v. Director General, as Agent, 85 I. C. C. 702; Gerhard & Hey (Inc.) v. Director General, as Agent, 88 I. C. C. 293.

III. CIRCUMSTANCES DETERMINING RIGHT.

§7½. In General.

(a) Before complainant is entitled to reparation the Commission must find that the rate is unreasonable, and the fact that no evidence was offered on behalf of defendants does not preclude the Commission from determining whether or not the rate was in fact unreasonable. Nebraska Bridge Supply & Lumber Co. v. A. T. & S. F. Ry., 93 I. C. C. 301, 303.

(b) If complainants paid unreasonable rates it follows that they are entitled to reparation. Gulf Coast Citrus Exchange v. L. & N. R. R., 93 I. C. C. 432, 434.

(c) Complainant attacked commodity rate charged on pig iron carloads, in 1922 and 1923 from Youngstown, Leetonia and Warren, O., to Huff, Pa., as unreasonable. Defendants agree to publish the rate sought so reparation is all that is to be considered. Huff is on the Pennsylvania, 2 miles south of Greensburg which is 32 miles east of Pittsburg. Youngstown is 66 miles northwest of Pittsburgh, movement to Huff being through Pittsburgh. The average distance from the Youngstown group points to Pittsburgh is 63.5 miles, and to Huff 97.5 miles. Pig iron and steel are rated sixth class in official classification. No reason is disclosed to justify higher rates to Huff than from Youngstown group to points about the same distance in the immediate vicinity thereof. HELD, rates attacked unreasonable to extent they exceeded $1.96 prior to July 1, 1922 and $1.76 thereafter, reparation awarded. Kelly & Jones Co. v. Pennsylvania, 95 I. C. C. 640.

(d) The fact that shipments were isolated or sporadic is a circumstance to be given weight in determining whether lower rates should be established for the future or reparation awarded but it is not the sole determinative factor. Carter Oil Co. v. C. B. & Q. R. R., 96 I. C. C. 215, 216.

(e) Proof of payment of freight charges found unreasonable is sufficient to warrant an award of reparation. Hopeman Material Co. v. N. P. Ry., 98 I. C. C. 361, 370.

(f) Where only witness appearing on behalf of a complainant had no personal knowledge as to paying and bearing of freight charges on shipment upon which reparation is claimed no award can be made to such complainant. National Preservers & Fruit Products Asso. v. Director General, 91 I. C. C. 221, 222.

(g) In order to do substantial justice under the special circumstances of instant case under which combination rates were found unreasonable, Commission determined reasonableness of each factor composing combination and awarded reparation upon a mileage-prorate basis. Midland Coal Co. v. M. V. R. R. Co., 91 I. C. C. 571.

(h) A finding of unreasonableness for the future does not necessarily constitute a basis for an award of reparation. Northern Grain & Warehouse Co. v. O. S. L. R. R., 100 I. C. C. 319, 321.

(i) Reparation was not considered and could not have been awarded in a case of investigation of rates instituted by the Commission and not one upon complaint. Northern Grain & Warehouse Co. v. O. S. L. R. R., 100 I. C. C. 319, 322.

(j) An isolated movement during a comparatively short period is not a proper basis for requiring the establishment of rates for the future or for an award of reparation, but have nevertheless found that inasmuch as complainants are en-

titled to reasonable rates, the fact of the shipments having been isolated is not the sole determinative factor. Municipal Elec. & Water Depts. v. C. C. C. & St. L. Ry., 101 I. C. C. 618, 619.

(k) In determining whether or not a complainant has been damaged by the exaction of unreasonable or unduly preferential reshipping rates the total thru charges paid from points of origin must be considered. Municipal Elec. Water Depts. v. C. C. C. & St. L. Ry., 101 I. C. C. 618, 620.

(l) Rates which might properly have been made under an adjustment in compliance with a decision of the commission can not be used as a basis for awarding reparation under section 1. National Coffee Co. v. G., C. & S. F. Ry., 92 I. C. C. 14, 16.

(m) Carriers in complying with an alternative order of the commission advanced lower instead of reducing higher rates. Such advances were suspended and subsequently found not justified. HELD: Fact that order was in the alternative did not relieve carriers from responsibility of publishing rates which would not contravene the act; and whether carriers' literal compliance with such order by proposing increases, or the commission's action in suspending them, led to exaction of unreasonable rates during suspension period is immaterial and not controlling in so far as an award of reparation is concerned. If rates in effect during suspension period were unreasonable, carriers are not entitled to retain excessive portion even though it be said that rates were in effect despite their efforts. Wadhams Oil Co. v. C. & N. W., 92 I. C. C. 361.

(n) Fact that a complainant included freight charges in arriving at selling price of its product does not preclude it from recovering from carriers damages sustained in consequence of exaction of an unreasonable freight rate. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 520, 522.

(o) Collection of an unreasonable rate constitutes a tort giving rise to a claim for damages whether that rate be collected by common carriers or by an agent of director general. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 520, 523.

(p) The Ault case, 256 U. S. 554, establishes the principle that the director general is liable for compensatory damages, as distinguished from punitive damages or penalties, in same manner and to same extent as if he were a corporate common carrier, and that such damages may reasonably include interest. Shreveport Creosoting Co. v. L. & P. Ry. 92 I. C. C. 519, 520, 524, 525.

(q) Complainant alleged that rates charged were unjust and unreasonable, and also stated that a double increase was applied to each combination of separately established rates and that in each case the tariff naming one of the factors contained a so-called combination rule providing for application of a single increase to combination rates so constructed. HELD: Complaint contains sufficient matter to constitute an allegation that overcharges have been collected. National Supply Co. v. Director General, 92 I. C. C. 610.

(r) Rates on canned vegetables and condensed milk from Wisconsin points to Cincinnati, found not unreasonable as compared with rates to Ashland, Ky., and Huntington and Kenova, W. Va., to which Cincinnati is intermediate. Cincinnati formerly took rates lower than to the more distant points but increases authorized in the Fifteen Per Cent Case, 45 I. C. C. 303, disrupted this adjustment and created the fourth section violation which carriers subsequently removed by reducing rates at the intermediate point. Fact that rates to intermediate point were in excess of those to more distant points does not prove unreasonableness, nor, in absence of evidence of specific damages to shipper, afford a sufficient basis for an award of reparation. Vessler Co. v. E. J. & E. Ry., 96 I. C. C. 75.

(s) Fact that carriers have charged or received rates which violate the long-and-short-haul rule of section 4 of the act is not of itself sufficient basis for an award of reparation in absence of proof of damage to shipper. See also 88 I. C. C. 619. Lissberger & Co. v. N. Y., N. H. & H., 96 I. C. C. 231, 233.

(t) Except under unusual conditions, the commission has uniformly awarded reparation on shipments moving to intermediate points under rates which are higher than to more distant points where the rates to the latter points were established subject to rule 77 of Tariff Circular 18-A. Carey Co. v. C., N. O. & T. P. Ry. Co., 96 I. C. C. 455, 457.

(u) Proof consisting only of affidavits was objected to by defendants and not received in evidence. Upon repre-

sentation of complainants that defendant, since the hearing, has undertaken to handle similar claims on special docket, and accepted affidavit proof, complainant authorized to file Rule V statements, accompanied by affidavits, further hearing to be sought if defendant still objects to form of proof. Jockusch v. G., C. & S. F. Ry., 96 I. C. C. 500.

(v) In numerous instances where class rates were charged on unusual movements the commission has declined to award reparation in absence of proof that the commodity was improperly classified or that the class rates as such were unreasonable. The special facts of particular cases have, however, warranted some departures from this principle. Omaha Cold Storage Co. v. C. & N. W. Ry. Co., 98 I. C. C. 437, 440.

(w) Position taken by defendant carriers that because complainant knew the rate he is not entitled to reparation would mean that in no case could a shipper be entitled to reparation, inasmuch as under the law he is presumed to know the applicable rate. Karnowsky v. C., I. & L. Ry. Co., 98 I. C. C. 533, 534.

(x) There was no evidence of any change in conditions during the period covered by the complaint which would justify a conclusion that the rates which were found unreasonable for the future were not also unreasonable in the past. Denial of reparation in former report reversed. Alton Mercantile Co. v. A. & W. Ry. Co., 98 I. C. C. 581.

(y) The law does not require the Commission to go beyond the first step in the payment of freight charges. Farrell v. C. M. & St. P. Ry., 102 I. C. C. 454, 457.

(z) Complainant's affidavit avers that the fuel oil "was purchased on basis of f. o. b. refinery with freight and tax allowed to Newport News," FOUND: That this statement is ambiguous and no conclusion can be drawn from it on the bearing of charges. Complainant paid the charges. Missouri Portland Cement Co., 88 I. C. C. 492. Reparation awarded. Newport News Shipbuilding & Dry Dock Co. v. L. & N. R. R. Co., 100 I. C. C. 1, 3.

(aa) Upon contention of defendants that as Midvale, Utah, was not specifically mentioned as a point of origin in either the informal or formal complaints, no consideration should be given to the shipments from that point FOUND: That Midvale takes the same rate as Murray, Utah, the other point of origin considered herein, and evidently no defense could be made of the rate from Midvale that is not now made respecting the rate to Murray. Defendant was the first to call attention to the Midvale shipments at the hearing and apparently prior thereto had known of their inclusion in the reparation statements. Upon the circumstances disclosed the defendant was "fairly informed" as to these shipments and they will be considered herein. Western Metals Co. v. Director General, 100 I. C. C. 314.

(bb) Upon contention of complainant that no reversal of opinion by the commission or modification of a former opinion could wipe out or extinguish the vested rights of a complainant secured by contracts made in reliance upon the former opinion, FOUND: That the commission is without authority to make an award of reparation based upon such a contention, and this applies with equal force to unfulfilled promises alleged to have been made by representatives of carriers that the reduced rates would be made effective in accordance with the exception expressed in the report. The powers of the commission are not those of a court of equity. Northern Grain & Warehouse Co. v. O. S. L. R. R. Co., 100 I. C. C. 319, 322

(cc) First-class rating on barrack bags in official classification found unreasonable to extent it exceeded or exceeds second-class, any quantity, which is prescribed as a reasonable rating for future. Charges collected on such shipments from Jeffersonville, Ind., to New York, N. Y., at first class rate found unreasonable to extent they exceeded those which would have accrued at second-class rate. Opportunity afforded complainant to prove its right to reparation. Triad Corp. v. E. R. R. Co., 100 I. C. C. 402.

(dd) Reparation awarded on shipments of lard substitutes from Houston to destinations in Louisiana, Arkansas, and Oklahoma, which will merely be in the nature of a retroactive extension to the Houston and Sherman complainants of a rate basis which as a result of commission's decisions has long been enjoyed by their competitors in same territory. Proctor & Gamble Distributing Co. v. St. L. S. F., 101 I. C. C. 563, 590.

(ee) An isolated movement during a comparatively short period is not a prop-

er basis for requiring the establishment of rates for the future or for an award of reparation, and inasmuch as shippers are entitled to reasonable rates, the fact of shipments having been isolated is not the sole determinative factor. See 78 I. C. C. 473; 92 I. C. C. 453. Municipal Elec. & Water Depts. v. C., C., C. & St. L., 101 I. C. C. 618, 619.

(eea) Contention that because complainant did not allege a violation of section 6 but only violations of sections 1, 2, and 3 of the act, the commission is without jurisdiction to find that the rate collected was inapplicable and to award reparation, not sustained in view of fact that the record shows a thorough effort by each side to prove facts which determine the rate applicable. See 88 I. C. C. 407, 408. Clark Bros. Bolt Co. v. N. Y. C., 102 I. C. C. 355, 357.

(ff) A carriers failure to comply with certain tariff rules may make it liable to the penalty provisions of the act, but such failure is not a sufficient basis for an award of reparation where the evidence does not show that the shipper was damaged thereby. Curtis v. Director General, 109 I. C. C. 378, 379.

(gg) In 81 I. C. C. 200, the Commission found that the carload rates on packing house products from Ottumwa, Iowa, to Memphis, Tenn., unreasonable to extent they exceeded contemporaneous fifth class rates between the same points and awarded reparation. HELD, reparation awarded on reconsideration. Morrell & Co. v. C. B. & Q. R. R., 109 I. C. C. 613.

(hh) It seems clear that the jurisdiction of the Commission is limited to an award of damages capable of definite ascertainment, and not to punitive damages. Crosby v. St. L. S. F. Ry. 112 I. C. C. 239, 243.

ALL OTHER CITATIONS

Midland Linseed Products Co. v. Director General, as Agent, 88 I. C. C. 247.

§8. Erroneous Publication or Quotation.

See Erroneous Rates.

(a) A misquotation of rate by the carriers agent is insufficient as a basis upon which to award reparation. Philadelphia Quartz Co. v. Director General, 95 I. C. C. 593, 594.

(bc) The erroneous information alleged to have been given by the carriers agent upon which complainant relied in support of its claim against that carrier affords no basis for relief from the Commission. Krauss Bros. Lumber Co. v. I. C. R. R., 96 I. C. C. 760, 761.

(de) Relying on joint rate and route quoted by originating carrier's agent. complainant specified such rate and route in bill of lading, and prepaid charges However, there was no joint rate in connection with originating line, and higher combination was applicable. Undercharges collected at destination. Route of movement was shortest route in connection with originating line, and applicable rate was lowest available rate via any route over which originating line could have received a haul. Notwithstanding fact that originating carrier misquoted rate to complainant, it was not obligated to turn shipment over to competing carriers at point of origin and forego a haul thereon. Newsom v. M. & O. R. R. Co., 91 I. C. C. 68.

(f) Notwithstanding fact that an originating carrier misquoted a rate to a shipper, it is not obliged to turn shipment over to competing carriers at point of origin and forego a haul thereon. McLean Lumber Co., 22 I. C. C. 349. Newsom v. M. & O. R. R. Co., 91 I. C. C. 68, 70.

(g) Shippers and carriers alike are charged with knowledge of lawfully published rates and tariff provisions, and the misquotation thereof by an agent of the carrier, except in cases within the purview of section 6 (11) of the interstate commerce act, affords no basis for an award of reparation. Chapin-Sacks Corp. v. P. R. R. Co., 96 I. C. C. 706, 708.

(h) Misquotation of rates by carrier's agent does not afford, in itself, a basis for an award of reparation. Conejos Cooperative Mills & Mfg. Co. v. Director General, 98 I. C. C. 515, 516.

(ha) Tariff carried rates on household goods based on declared value, but shipper was misled through misinformation furnished by carrier's agent into declaring a valuation higher than that at which he actually valued the goods, resulting in the application of a rate higher than that which would otherwise have applied. FOUND: Misquotation of a rate by carrier's agent affords no ground for an award of reparation, and applicable rate, herein determined, was not unreasonable or otherwise unlawful. Arizona Corp.

Comm. v. A. E. R. R., 102 I. C. C. 578.

(i) Misquotation of a rate by carrier's agent affords no ground for an award of reparation. See 12 I. C. C. 469. Arizona Corporation Commission v. A. E. Ry., 102 I. C. C. 578, 579, 580.

(j) A misquotation of a rate affords no basis for an award of reparation. Fess v. C. H. & G. L. Ry., 104 I. C. C. 262, 264.

ALL OTHER CITATIONS

Armacost Co. v. M. & M. T. Co., 88 I. C. C. 185.

§8½. Previous action of commission.

See Previous Decisions of Commission; Reasonableness of Rates §26½.

(a) Complainant attacked commodity rates charged on apples, carloads, from Yakima, Wash., and Hood River, Oreg., to Mesa, Ariz., as unreasonable. In 88 I. C. C. 385, the Commission found rates attacked as unreasonable to extent they exceeded $1.405. In 78 I. C. C. 319 the Commission found the rate attacked unreasonable to extent it exceeded $1.41. HELD, upon further consideration rates attacked unreasonable to extent they exceeded $1.41, reparation awarded. Johnson Pearce Produce Co. v. O. W. R. & N. Co. 89 I. C. C. 361.

(b) Complainant attacked commodity rates charged on canned tomatoes from Livermore, Ky., to Evansville, Ind., as unreasonable. In 88 I. C. C. 405, the Commission found rates attacked unreasonable to extent they exceeded 20c, and for future to extent they exceeded 18c, reparation awarded. HELD, reparation awarded. Gilbert Company v. L. & N. R. R., 91 I. C. C. 377.

(c) Complainant attacked commodity rates charged on newsprint paper from Wisconsin to Wichita, Kas., Oklahoma City and Okmulgee Okla., as unreasonable and in 66 I. C. C. 571, the Commission prescribed reasonable maximum rates, using rates from the Fox River group in Wisconsin as the basis of the structure, and awarded reparation. Upon rehearing, reparation awarded. Wichita Board of Commerce v. Director General, 92 I. C. C. 370.

(d) Complainant attacked commodity rate of $1 charged on muriate of potash, carloads, shipped during federal control from Wilmington, Calif., to Bay City, Mich., and Niagara Falls N. Y., as unreasonable to extent it exceeded 75c. In 78 I. C. C. 413, the Commission found the rates unreasonable and awarded reparation. HELD, findings in original report affirmed. Diamond Match Company v. Director General, 92 I. C. C. 373.

(e) Complainant attacked commodity rates on box board chip board, wood pulp board, and newsboard, carloads, from Thomson, N. Y., to points on the B. & M., and New Haven as unreasonable to extent they exceed by more than 6c the rate from Johnsonville N. Y. Original report found in 81 I. C. C. 591. HELD, reparation awarded. United Paperboard Company v. G. & J. Ry., 92 I. C. C. 651.

(f) In 63 I. C. C. 6, the Commission found rates attacked on horses and mules, carloads, from numerous points various states to Atlanta, Ga., as unreasonable to extent they exceeded the aggregate of intermediate rates subject to the act. HELD, reparation awarded. Hudson Mule Co. v. L. & N. R. R., 93 I. C. C. 325.

(g) Complainant attacked commodity rates charged on crude petroleum from Cement, Okla., to North Fort Worth, Tex., as unreasonable. Original report found in 78 I. C. C. 572. The question at issue is whether the Commission was justified in awarding reparation upon the basis of relatively higher rates than was found reasonable for the future. The rates upon which its award was based are the rates which were specifically named in complainants prayer, but the complaint sought such other and further relief as it might find due. In the opinion of the Commission, the actual damage sustained is a matter for determination by the Commission upon the facts before it, and such determination is not limited by the sum specifically named in the complaint. HELD, rate attacked unreasonable to extent it exceeded 15.5c prior to August 26, 1920, and 21c thereafter, reparation awarded. Montrose Oil Refining Co. v. St. L. S. F. Ry., 95 I. C. C. 96.

(h) Complainant attacked commodity rates charged on box shooks, crate material and shingles, carloads, from Portland, Ore., and Washington to San Francisco as unreasonable. Original report found in 77 I. C. C. 669. HELD, reparation awarded on basis of rates found reasonable in original report. West Coast Lumbermens Asso. v. Director General, 95 I. C. C. 287.

(i) Complainant attacked commodity rates charged on canned salmon, carloads, from Seattle, Wash., Portland, Ore., and Los Angeles, Calif., to Phoenix, Ariz., as unreasonable. In 88 I. C. C. 178 the Commission found rates unreasonable to extent they exceeded rates to Tuscon, reparation held open. HELD, reparation awarded. Phoenix Chamber of Commerce v. A. T. & S. F. Ry., 95 I. C. C. 665.

(j) Complainant attacked commodity rate charged on one car of nut coal Sept. 14, 1922 from Mount Harris, Colo., to Dixon, Neb., as unreasonable. Mount Harris is in the Oak Hills district in Colorado on the D. & S. L. Shipment moved via that line and Burlington 876 miles, charged $6.36. On Sept. 17, 1922 rate was reduced to $6.36 following 73 I. C. C. 189 and 68 I. C. C. 676. HELD, rate attacked unreasonable to extent they exceeded $6.36, reparation awarded. St. Anthony & Dakota Elevator Co. v. D. & S. L. Ry., 96 I. C. C. 49.

(k) In 81 I. C. C. 131 the Commission made findings with respect to shipments of wool and mohair, in the grease, in sacks and bales, from points west of the Missouri river to Boston, Mass., during federal control, and determined the basis for an award of reparation. Case was reopened for further hearing to determine the amount of reparation due to individual shippers. HELD, reparation awarded. Boston Wool Trade Asso. v. Director General, 98 I. C. C. 48.

(ka) Complainant attacked commodity rates charged on grain and grain products, carloads, from Idaho, Montana, Oregon and Washington to California, Ore., Washington, Utah, Minn. Mo. and Tennessee between Nov. 20, 1921, and Jan. 6, 1922, as unreasonable. The order in 64 I. C. C. 85 was originally effective Nov. 20, 1921, subsequently postponed by the Commission until Jan. 6, 1922, and reparation is sought during this period. Complainants offer no evidence bearing upon the reasonableness of the rates in effect when these shipments moved. HELD rates attacked not unreasonable, complaints dismissed. Northern Grain & Warehouse Co. v. O. S. L. R. R., 100 I. C. C. 319.

(kb) Upon further hearing, rates on crude petroleum, in tank-car loads, from Irvine and Beattyville, Ky., to Blue Island, Ill., found unreasonable to extent they exceeded rates from mid-continent field. Taking into consideration the greater distance from mid-continent than from eastern Kentucky field, a parity of rates as between the two fields would sufficiently allow for mountainous character of originating territory in eastern Kentucky, for lesser volume of movement, and for lighter weight of the oil. Reasonable rates prescribed and reparation awarded. Original report, 59 I. C. C. 689, reversed. Barnett Oil & Gas Co. v. Director General, 93 I. C. C. 85.

(kc) Following Jones & Laughlin Steel Co., 91 I. C. C. 300, reparation awarded complainants and interveners in respect of interstate shipments on which they paid charges of the Monongahela Connecting, South Buffalo, and Union railroads, in addition to district rates of trunk-line connections, defendants having failed to justify increased rates during nonabsorption period in so far as they resulted in transportation charges exceeding those contemporaneously in effect to and from trunk-line points in the same rate districts, aggregate charges applicable during the period of nonabsorption having been found unreasonable to that extent in the cited cases. Jones & Laughlin Steel Co. v. P. & L. E., 93 I. C. C. 637.

(kd) In original report 78 I. C. C. 572, the commission awarded reparation for unreasonableness down to the basis specifically named in complainant's prayer for damages. Complaint, however, sought such other and further relief as the commission might find due. Upon further consideration, rate prescribed for future in such former report, taking into account the general reductions and advances, found reasonable for application on past shipments and reparation awarded accordingly. Montrose Oil Rfg. Co. v. St. L.-S. F., 95 I. C. C. 96.

(ke) Rates on news-print paper and certain paper articles from points in Wisconsin, Michigan, Minnesota, and Missouri to Oklahoma City and Guthrie found unreasonable to extent they exceeded rates found reasonable in Minnesota & Ontario Paper case, 66 I. C. C. 571. Reparation awarded. Oklahoma Publishing Co. v. A., T. & S. F., 95 I. C. C. 448.

(kf) Upon contention by carriers that commission's findings in Minnesota & Ontario Paper case, 66 I. C. C. 571, required a widespread and comprehensive readjustment in rates and that it would be

inequitable to require them to pay reparation; furthermore, that shippers can better afford to bear higher rates charged than carriers can afford further reductions in their earnings, FOUND: Latter contention is obviously untenable, and as to former, the circumstances here are substantially the same as in a number of cases where reparation has been awarded to basis found reasonable in the cited case. Oklahoma Publishing Co. v. A. T. & S. F., 95 I. C. C. 448, 449.

(kg) Rates on paper bags and wrapping paper from Marinette, Wis., to Ft. Worth, Dallas and San Antonio, Tex., found unreasonable to extent they exceed rate prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571. Reparation awarded. Victory Bag & Paper Co. v. A., T. & S. F., 95 I. C. C. 677.

(l) Contention that no reparation should be awarded to basis of rates prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571, because such rates were in the nature of a general readjustment, not sustained. Similar contention was raised in 87 I. C. C. 539, in which reparation was awarded. Victory Bag & Paper Co. v. A. T. & S. F., 95 I. C. C. 677, 678.

(m) Rate on newsprint from Alexandria, Ind., to Omaha, Nebr., and Kansas City, Mo., found unreasonable for the future. Rates on newsprint, printing paper, and certain other kinds of paper from manufacturing points in Minnesota, Wisconsin, upper Michigan, and in c. f. a. and eastern territories to Omaha and Kansas City found not unreasonable. Reparation based upon rates prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571, denied as to certain points and allowed as to others. Western Newspaper Union v. A., T. & S. F., 96 I. C. C. 5.

(n) Upon further consideration, statement in original report, 92 I. C. C. 32, that defendants not made parties to the complaint within the statutory period may join in payment of reparation, eliminated. In Phillips v. Grand Trunk Ry., 236 U. S. 662, it was held that with respect to claims not filed within the statutory period the remedy is barred and liability destroyed. Larrowe Milling Co. v. A. A. R. R., 96 I. C. C. 329.

(o) Reparation awarded on shipments of cereal beverages, in carloads, from St. Louis, Mo., to Dallas and Fort Worth, Tex., made subsequent to the hearing under rates found unreasonable in the original report, 88 I. C. C. 143. Cohen v. A., T. & S. F., 96 I. C. C. 459.

(p) Upon further hearing, FOUND: That, except in certain instances, evidence of record does not afford a reliable basis for determining the amount of reparation to which complainants may be entitled on shipments of poplar and gum logs covered by findings in original report, 62 I. C. C. 669, and unless further hearing is requested within 60 days after service of report to supplement present record, complaint will stand subject to dismissal for failure of proof. Southern Veneer Asso. v. A. C. L. R. R. Co., 98 I. C. C. 112, 118.

(q) Rates on cottonseed from Oklahoma points to Sherman, Tex., found unreasonable during period up to August 15, 1923, to extent they exceeded rates contemporaneously applied for like distances between Shreveport, La., and points in Texas; and on and subsequent to August 15, 1923, found unreasonable to extent they exceeded or may exceed rates under the distance scale shown in Appendix 7, applied in the manner hereinbefore indicated. Reparation awarded, the similarity of transportation conditions throughout this territory justifying a retroactive rate adjustment to Sherman. Oklahoma Corp. Commission v. A. & S. Ry. Co., 98 I. C. C. 183, 253.

(r) Upon further consideration commission is of the opinion that finding of unreasonableness of rates on clean rice from points in Arkansas, Louisiana, and Texas to points in Oklahoma, in 95 I. C. C. 645, wherein a reasonable scale of distance rates is prescribed, does not necessitate a general readjustment as that term is used in cases where it has formed the basis for a denial of reparation, and, even so, reparation still would be proper under principle announced in 52 I. C. C. 481. Alton Mercantile Co. v. A. & W. Ry. Co., 98 I. C. C. 581, 582.

(ra) Cases cited in which reparation has been awarded down to basis of rates subsequently established in conformity with general readjustment of rates on paper and paper articles made effective following decision in Minnesota & Ontario Paper Co., 66 I. C. C. 571. Butler Paper Co. v. C., I. & W. R. R., 102 I. C. C. 311, 312.

(s) In 89 I. C. C. 437 the Commission found that the rates on cabbage, carloads, from Washington to St. Louis,

Mo., were unreasonable to the extent they exceeded 94c, reparation awarded. Upon petition of defendant rehearing was had as to the payment and bearing of freight charges. HELD, reparation awarded. Meyer Vasquez Produce Co. v. Director General, 102 I. C. C. 491.

(t) In 83 I. C. C. 712 the Commission found that the rates of $2.60 prior to August 26, 1920, $3.64 between that date and June 30, 1922, and $3.28 thereafter on anthracite birdseye coal from Groups A B and C on the D. & H., in Pennsylvania to Thomson, N. Y., as unreasonable to extent they exceeded $2.30 prior to August 26, 1920 $3.22 from August 26, 1920 to June 30, 1922 and $2.90 thereafter. Reparation awarded, and rate prescribed was made effective Feb. 14, 1924. A petition of intervention was filed alleging that the rates to Ondawa were and are unreasonable. When the original report was issued Ondawa took the same rates as Thomson. Ondawa is located between Thomson and Greenwich, N. Y., 4.06 miles from the former and 2.42 miles from the latter. All traffic over the G. & J., to Thomson must pass through Ondawa and it is therefore apparent that with respect to traffic to Ondawa the same transportation conditions prevails as with respect to traffic to Thomson. The intervening petition does not unduly broaden the issues. The traffic here considered moves over the D. & H., to Mechanicville, N. Y., thence D. & H., over tracks of the B. & M., to Johnsonville, N. Y., where it is delivered to the G. & J., for hauling to destination. HELD, reparation awarded based on rates found reasonable in the original case. United Paperboard Company v. G. & J. Ry., 102 I. C. C. 502.

(ta) Upon contention that reparation should not be awarded to basis of rates established pursuant to decision in Minnesota & Ontario Paper Case, 66 I. C. C. 571, because that case involved a general readjustment of such nature as to come within category of cases where reparation is usually denied, FOUND: Since decision in the Paper case reparation has been awarded in a number of proceedings to bases established pursuant to that decision. Reparation awarded here. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 737, 743, 744.

(u) Complainant attacked commodity rate charged on 527 cars of iron ore shipped from Ironwood, Mich., and Baraboo, Wis., to Carondelet, Mo., between August 26, 1920 and July 6, 1921 as unreasonable and unjustly discriminatory and reparation is sought on basis of rate prescribed in 62 I. C. C. 194, original report in 74 I. C. C. 369, complaint dismissed. The shipments moved from East St. Louis over the Terminal, either via the Merchants Bridge to Lesperance St., St. Louis, a distance of about 12 miles, or to Dupo, Ill., 7 miles, and from those points over the M. P., to complainants plant, distances of 4.5 and 6.5 miles, respectively. Of the total of 527 shipments 198 moved over the former route and the remainder over the latter. The joint rates were the same over both routes. In 62 I. C. C. 194 the Commission had before it a terminal situation which involved delivery in the northern East St. Louis switching district, whereas in the instant proceeding there is involved a somewhat greater haul, the crossing of the Mississippi river, and transportation through the congested St. Louis district. HELD, rates attacked not unreasonable or otherwise unlawful, complaints dismissed. Mississippi Valley Iron Company v. C. & N. W. Ry., 104 I. C. C. 243.

(v) Complainant attacked commodity rate charged on two cars of paper boxes, knocked down flat, from Chicago, Ill., to Dallas, Tex., on April 22 and May 24, 1922 as unreasonable, unjustly discriminatory and unduly prejudicial. Charged $1.135, rate of 86.5c desired. In 66 I. C. C. 571 the Commission prescribed rates from and to the points involved, and effective Dec. 15, 1922 the carriers published a rate of 78c, which would have been 86.5c prior to the 10 per cent reduction. HELD, rate attacked unreasonable to extent it exceeded 86.5c, reparation awarded. Chicago Carton Co. v. C. B. & Q. R. R., 107 I. C. C. 586.

(w) Findings in 64 I. C. C. 85, that the "present rates on coarse grain will be for the future unjust and unreasonable" did not become binding until finally ordered into effect on January 7, 1922, although November 20, 1921, was originally suggested to carriers as date when reductions should be made effective. Reparation on shipments moving between those dates denied. Northern Grain & Warehouse Co. v. O. S. L. R. R. Co., 100 I. C. C. 319, 321.

(x) Shipments of hay from points in northeastern Oklahoma to points in northern Texas, which moved during the

period covered by the complaint here involved, appear to have been assessed charges at group rates substantially in accord with prior decision in 69 I. C. C. 207, and the further changes that are now being made are part of a general readjustment of rates in this territory. Reparation denied. Oklahoma Corp. Comm. v. A. & S. Ry., 101 I. C. C. 116, 132.

(y) Following Waco Chamber of Commerce, 73 I. C. C. 708, and other cited cases, reparation awarded on shipments of newsprint paper moving from International Falls, Minn., to Arkansas City, Kans., to basis of rates subsequently established by carriers in compliance with decision in Minnesota & Ontario Paper Case, 66 I. C. C. 571. News Publishing Co. v. A., T. & S. F., 101 I. C. C. 419.

(z) In 92 I. C. C. 675 the Commission found rates charged since July 17, 1922 on crude feldspar, carloads, from Maine, New Hampshire and Connecticut to Trenton, N. J., as unreasonable and unduly prejudicial. HELD, reparation awarded. Ceramic Traffic Asso. v. Me. Central R. R. 109 I. C. C. 51.

(aa) Complainant attacked commodity rates charged on lumber carloads from Whiteville, Lake Waccamaw and Boardman, N. C., to Norfolk and Pinners Point, Va., and points north thereof prior to May 15, 1915 as unreasonable. HELD, in 48 I. C. C. 475, reparation awarded. Complainant attacked rates charged on lumber, carloads, from Bolton, N. C., to Norfolk, and Pinners Point as unreasonable prior to May 22, 1915, HELD, in 55 I. C. C. 595, rates found unreasonable to extent they exceeded aggregate of intermediates, reparation awarded. HELD, complainants entitled to reparation based on previous orders, and so found. Butter Lumber Co. v. A. C. L. R. R. 109 I. C. C. 224.

ALL OTHER CITATIONS

Midland Linseed Products Co. v. N. Y. S. & W. R. R. Co., 88 I. C. C. 329.

§10½. Showing of Damage.

See Act to Regulate Commerce §2 (c); Allowances VI; Discrimination §15, §17; Interstate Commerce Commission VI; Long and Short Hauls §13.

(a) A shipper is damaged when he pays the unreasonable transportation charges, and it is not necessary to go beyond the first step. Cutler Hammer Mfg. Co. v. Director General, 92 I. C. C. 9, 10.

(b) It is equally true that the collection of an unreasonable rate constitutes a tort giving rise to a claim for damages whether that rate be collected by a common carrier or by an agent of the Director General. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 523.

(c) The shipper or consignee has suffered damage when he pays the unreasonable rate and his claim accrues at once in theory of law. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 526.

(d) Even if it were found that the freight rates were the controlling reason for the closing of complainants mill, the "general damages" claimed are speculative. Fleming Bros. v. G. N. Ry., 92 I. C. C. 582, 585.

(e) The measure of damages recoverable upon a finding of unjust discrimination or of undue prejudice is the pecuniary loss inflicted upon complainant as the result of the unjust discrimination or of the undue prejudice alleged. Donner Steel Co. v. D. L. & W. Ry., 92 I. C. C. 595, 598.

(f) Proof of specific damage is required before the Commission may award reparation under the sections of the act alleged to have been violated. Fowler Commission Co. v. St. L. S. F. Ry., 92 I. C. C. 641, 642.

(g) Complainant attacked as overcharges made during federal control filed August 29, 1922. They are based upon the theory that any departure from the requirements of the fourth section of the act is unlawful, that the published tariff charge reflecting such a departure does not show the legal tariff charge, that the latter is to be found in the lower rate to a more distant point or in the lower aggregate of intermediate rates, and that the collection of the published tariff charge which exceeds lower rates so found is a straight overcharge. No. 14285 relates to charges collected on vegetables and melons from California to Tacoma and Seattle; Wash., rates collected in excess of the combination of locals. No. 14286 has reference to diferent commodities from California to Oregon higher than from points beyond. No. 14287 relates to vegetables and melons from California to Oregon in violation of the long and short haul clause. HELD, no proof of damages was shown,

complaints dismissed. Pacific Adjustment Co. v. Director General, 93 I. C. C. 50.

(h) In the absence of proof of damage to the shipper, the fact that the carriers have charged or received rates which violate the long and short haul rule of the fourth section is not of itself sufficient basis for an award of reparation. Lissberger & Co. v. N. Y. N. H. & H. R. R., 96 I. C. C. 231, 233.

(i) Claims for damage under undue prejudice must be established by evidence and proof of such evidentiary value as would warrant a judgment in a court of law. In such cases the claimant must not only show that the discrimination alleged or found to exist has operated to his injury but must also show that he has been damaged and the amount thereof. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 536.

(jk) Following Missouri Portland Cement Co., 88 I. C. C. 492, wherein it was held that a shipper is damaged when he pays unreasonable transportation charges, and that it is not necessary for the commission to go beyond the first step, reparation awarded to complainant who paid, but who failed to prove that it bore, the unreasonable transportation charges. Cutler-Hammer Mfg. Co. v. Director General, 92 I. C. C. 9.

(l) Fact that word "damage" appears in section 206 (c) of the transportation act, in contradistinction to words "full amount of damages" appearing in section 8 of interstate commerce act, has no special significance. The commission concludes and finds that the director general is liable for "the full amount of damages" suffered by a shipper through the collection of an unreasonable rate by the Director General of Railroads, or his agents, during Federal control; and that the measure of that liability is the same as that of a common carrier subject to the interstate commerce act, the sovereign right of the Government having been waived to this extent by act of Congress. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 526.

(m) Collection of an unreasonable rate is a tort arising from the unlawful exaction of money belonging to shipper or consignee in violation of the carrier's obligation to transport for a reasonable price and should be distinguished from personal-injury torts. The shipper or consignee has suffered damage when he pays the unreasonable rate and his claim accrues at once in theory of law. Darnell-Taenzer case, 245 U. S. 531. In reimbursing shipper for loss thus suffered interest is awarded as an element of compensatory damages due him, and not for any default or delay in payment of the damages. "Such damages may reasonably include interest and costs." Ault case, 256 U. S. 554. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 520, 526.

(n) The interstate commerce act directs that "full amount of damages" suffered by a shipper shall be paid to him. In the commission's opinion, as an element of compensatory damages, interest runs from time the unreasonable charge is collected; otherwise shipper would not be reimbursed for "full amount of damages" suffered through detention by carrier of money belonging to him, and of the use of which he has been unlawfully deprived. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 527.

(o) Complainant sought reparation under sections 2 and 3 and long-and-short-haul clause of section 4 of the act, due to application of charges on grain and products switched between its elevator and connections of defendant in Kansas City, Mo.-Kans., switching district, which were higher than those to and from a competing elevator to which complainant's plant is intermediate. Cause of complaint was subsequently removed by reducing complainant's charges to basis of those from the competitor. HELD: Since proof of specific damage is required before reparation may be awarded under sections of the act alleged to have been violated, and no such evidence was introduced by complainant, reparation denied and petition dismissed. Fowler Commission Co. v. St. L.-S. F., 92 I. C. C. 641.

(p) Proof of specific damage is required before reparation may be awarded under section 3 of the act. International Coal Co. case, 230 U. S. 184; Fowler Commission Co. v. St. L.-S. F., 92 I. C. C. 641, 642.

(q) Proof of specific damage is required before reparation may be awarded under sections 2 and 3 and the long-and-short-haul clause of section 4 of the act. International Coal Co. case, 230 U. S. 184; Iten Biscuit Co., 50 I. C. C. 724; 53 I. C. C. 729; Portland Seed Co. case, 265 U. S. 403. Fowler Commission Co. v. St. L.-S. F., 92 I. C. C. 641, 642.

(r) Complaint seeking reparation, as overcharges, based upon violations of long-and-short-haul provision of section 4 of the act, dismissed following Portland Seed Co. case, 264 U. S. 403. Pacific Adjustment Co. v. Director General, 93 I. C. C. 50.

(s) Following Nollenberger case, 15 I. C. C. 595, 598, the actual damage sustained in any case is a matter for determination by the commission upon facts before it and such determination is not limited by the sum specifically named in the complaint. Montrose Oil Rfg. Co. v. St. L.-S. F., 95 I. C. C. 96, 97.

(t) Fact that rates to an intermediate point were in excess of those to more distant points is not proof of unreasonableness, nor, in absence of evidence of specific damages to shipper, is it a sufficient basis for an award of reparation. Vessler Co. v. E. J. & E. Ry., 96 I. C. C. 75, 76.

(u) Possible shrinkage of profits, as result of prejudice, being only basis laid for an award of reparation held not sufficient to warrant an award. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 536.

(v) The measure of damages is the difference between the charges paid and those which would have accrued at certain rates in issue; and a finding of damage in a specific amount measured in this manner must rest upon evidence which shows with certainty and definiteness that this amount does not exceed, at least, the difference between such charges. The finding can not be based upon conjecture. Southern Veneer Asso. v. A. C. L. R. R. Co., 98 I. C. C. 112, 117.

(w) The only question before the Commission is that at which it has hinted; whether the fact that the plaintiffs were able to pass on the damage that they sustained in the first instance by paying the unreasonable charge, and to collect that amount from the purchasers, prevents their recovering the overpayment from the carriers The answer is not difficult. The general tendency of the law, in regard to damages at least, is not to go beyond the first step. As it does not attribute remote consequences to a defendant so it holds him liable if proximately the plaintiff has suffered a loss. The plaintiffs suffered losses to the amount of the verdict when they paid. Their claim accrued at once in the theory of the law and it does not inquire into later events. Eriksen v. A. R. R., 102 I. C. C. 374, 380.

(wa) Contention that complainants are not damaged where they reimburse to themselves freight paid by making the selling price of their goods sufficiently high to cover freight paid and a profit in addition, not sustained. Complainants paid charges assessed and took chances on making advantageous sales and neither courts nor commission have departed from principle announced in the Darnell-Taenzer case, 245 U. S. 533, wherein it was held that general tendency of the law, in regard to damages at least, is not to go beyond the first step, i.e., damage is suffered in the payment of an unreasonable charge at time such charge is paid, and it is not necessary to inquire into later events. Eriksen v. A. A. R. R., 102 I. C. C. 374, 379, 380.

(wb) Objection to evidence as to paying and bearing of freight charges on ground that there is no allegation of damage in the complaint, not sustained. Formal complaint specifically alleges complainant has been subjected to payment of rates which were unreasonable and violative of certain other provisions of law specifically named, and prays for reparation in a specific sum or in such other sum as may be found due. Meyer-Vasquez Produce Co. v. Director General, 102 I. C. C. 491.

(wc) Upon further hearing, complainant submitting satisfactory proof of paying and bearing of freight charges, reparation awarded on shipments of cabbage from certain points in State of Washington to St. Louis in amount of difference between charges paid and those which would have accrued at rates found reasonable in original report, 89 I. C. C. 437. Meyer-Vasquez Produce Co. v. Director General, 102 I. C. C. 491.

(wd) Freight allowance was received by complainant from consignor on certain shipments in order to equalize freight rate from some other point of production. Upon contention of carriers that if reparation is awarded on these shipments there should be deducted from amount thereof this allowance. HELD: Complainant paid to carriers full amount of freight charges and is entitled to full amount of reparation. To go into the matter of allowances between parties would lead away from direct results of act of carriers in exaction of unreasonable rates, into domain of indirect or remote consequences, and perhaps into

questions of equity as between vendor and vendee. See also 40 I. C. C. 747. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 744.

(x) A shipper is damaged when he pays the unreasonable transportation charges, and it is not necessary to go beyond the first step. Albers Bros. Milling Co. v. Director General, 104 I. C. C. 330, 332.

(y) Fact that complainant's competitors were placed in a position more favorable than that of complainant does not of itself establish that complainant was damaged. Complainant here is not shown to have been damaged by any undue prejudice which may have existed. H-O Cereal Co. v. A., T. & S. F. 100 I. C. C. 297, 299.

(z) If the rate was unreasonable, complainant suffered damage when it paid such rates. No further proof of damage is necessary. Raleigh Chamber of Commerce v. N. S. R. R. 109 I. C. C. 52, 54.

(aa) Before any party can recover damages under the act he must allege and show not merely the wrong of the carrier but that the wrong has in fact operated to his injury. Crosby v. St. L. S. F. Ry., 112 I. C. C. 239, 243.

(bb) Both the Commission and the courts have held that proof of damage in undue prejudice cases must be by such evidentiary facts as would be required to sustain such a recovery in a court of law. Complainant must show how the discrimination found to exist affected him to his damage. He must establish the fact of his damage, as well as the amount of the damage he claims. Wright Lumber Co. v. A. A. R. R. 112 I. C. C. 337, 339.

ALL OTHER CITATIONS

Chicago Bridge & Iron Works v. Director General, as Agent, 85 I. C. C. 99; Halliday Milling Co. v. Director General, as Agent, 85 I. C. C. 687; Cutler-Hammer Mfg. Co. v. Director General, as Agent, 88 I. C. C. 600.

§11. Rate via Competing Route.

See Evidence §47; Routing and Misrouting §5.

(a) The existence of a lower rate over other routes and the subsequent reduction to that basis of the rate over a particular route of movement are not sufficient to establish the unreasonableness of the previous rate. National Supply Co. v. N. Y. C. R. R., 95 I. C. C. 462, 463.

(b) The existence of a lower rate over other routes and the subsequent reduction to that basis of the rate over a particular route of movement are not sufficient in themselves to establish the unreasonableness of the previous rate. Mauk Lumber Co. v. Director General, 98 I. C. C. 599, 600.

§12. Readjustment of rates.

See Evidence §66; Relative Rates.

(a) Where rates found unreasonable constitute part of a general readjustment of rates in an extensive territory, reparation will be denied. Knoxville Traffic Bureau v. S. Ry. Co., 89 I. C. C. 708, 719.

(b) The law affords no remedy to defendants with respect to shipments of printing and other classes of paper which moved at rates which are less than those found reasonable. It would be manifestly unfair, therefore, to require defendants to make reparation on the classes of paper on which the rates were reduced. The Commission has frequently declined to award reparation where increases as well as reductions in rates result from a general readjustment such as the one in question. Western Newspaper Union v. A. T. & S. F. Ry., 96 I. C. C. 5, 13.

(c) The Commission has consistently denied reparation in cases where general readjustments have been made in extensive territories, involving increases and reductions. Butter, eggs, dairy products and poultry, 96 I. C. C. 19, 42.

(d) Reparation will not be awarded under general rate adjustments. Walsh Fire Clay Products Co. v. C. & A. R. R., 98 I. C. C. 458, 459.

(e) While as a general rule awards of reparation will not be made where the rates affected have been the subject of a general readjustment, this does not apply where the rates charged exceeded those found reasonable by such substantial amounts as to be intrinsically unreasonable under any adjustment. Alton Mercantile Co. v. A. & W. Ry., 98 I. C. C. 581, 582.

(f) Reparation frequently has been denied on shipments moving prior to the effective date of rates reduced by the Commission where the previous rates had long been in force and readjustment through an extensive territory was required. United Fig & Date Co. v. A. C. L. R. R., 101 I. C. C. 138, 145.

(g) Rates which might properly have been made under an adjustment in compliance with decision of commission can not be used as a basis for awarding reparation under section 1 of the act. National Coffee Co. v. G., C. & S. F., 92 I. C. C. 14, 16.

(h) Upon contention by carriers that reparation should not be awarded because rates involved were revised in connection with a comprehensive readjustment which included increases as well as reductions, HELD: Principal annunciated has no application where complaints were filed with commission before the comprehensive readjustment was contemplated and involve rates to specific destinations. Wichita Board of Commerce v. Director General, 92 I. C. C. 370, 371.

(i) Commission has long adhered to policy that in the public interest reparation should be denied when rates reduced by its orders have been in effect for long periods and when those orders required readjustment of rates throughout an extensive territory and effected shippers at many points. See also 40 I. C. C. 517; 77 I. C. C. 683. Hawkeye Fuel Co. v. S. & E. Ry. & P. Co., 93 I. C. C. 157, 159, 160.

(j) In cases involving a general readjustment of rates substantial justice would not be advanced by awarding reparation to those making such demands. Parkersburg Rig & Reel Co. v. M. P., 93 I. C. C. 667, 669.

(k) Where increases as well as reductions in rates result from a general readjustment of rates reparation will be denied. See Sunderland Bros. Co., 48 I. C. C. 377; Delaware, Lackawanna & Western Coal Co., 46 I. C. C. 506. Western Newspaper Union v. A., T. & S. F., 95 I. C. C. 5, 13.

(l) Where a general readjustment of rates, involving increases as well as reductions, is required to be established by the commission, retroactive effect to such rates as a basis for an award of reparation will be declined. Texas Co. v. K. C. S., 95 I. C. C. 81, 85.

(m) The commission has consistently denied reparation in cases where general rate readjustments have been made in extensive territories, involving increases and reductions. Alton Mercantile Co. v. A. & W. Ry., 95 I. C. C. 645, 656.

(n) Where increases as well as reductions in rates result from a general readjustment of rates reparation will be denied. See Sunderland Bros. Co., 48 I. C. C. 377; Delaware, Lackawanna and Western Coal Co., 46 I. C. C. 506. Western Newspaper Union v. A. T. & S. F., 96 I. C. C. 5, 13.

(op) Where a general readjustment of rates, involving increases as well as reductions, is required to be established by the commission, retroactive effect to such rates as a basis for an award of reparation will be declined. Texas Co. v. K. C. S., 96 I. C. C. 81, 85.

(q) Reparation will not ordinarily be awarded to the basis of a finding made in a general investigation resulting in a widespread readjustment of rates on shipments which moved prior to the effective date of the order. Western Pine Mfrs. Asso. v. Director General, 102 I. C. C. 753, 755.

(r) In cases where a readjustment of rates is required throughout an extensive territory involving both increases and reductions and affecting shippers at many points substantial justice would not be advanced by awarding reparation. West Coast Lumbermens Asso. v. A. & S. Ry., 104 I. C. C. 695, 702.

(s) Rates on peanuts from points in Alabama, Florida, Georgia, South Carolina and Tennessee to Chicago, Ill., Milwaukee, Wis., Canton and Cleveland, O., South Bend, Ind., and Dubuque, Iowa, found unjust and unreasonable for future to extent indicated herein. Reparation denied because of change in long-continued basis in effect north of Ohio River, and because of extensive territory involved, following 53 I. C. C. 59, 65. United Fig & Date Co. v A. C. L. 101 I. C. C. 138.

(t) Reparation denied due to fact that rate factors in issue are included in an extensive readjustment. Procter & Gamble Distributing Co. v. St. L.-S. F. 101 I. C. C. 563, 581.

(ta) Upon contention that reparation should not be awarded to basis of rates established pursuant to decision in Min-

nesota & Ontario Paper Case, 66 I. C. C. 571, because that case involved a general readjustment of such nature as to come within category of cases where reparation is usually denied. FOUND: Since decision in the Paper case reparation has been awarded in a number of proceedings to basis established pursuant to that decision. Reparation awarded here. Wortham-Carter Publishing Co. v. Director General, 102 I. C. C. 729, 737, 743, 744.

(tb) Reparation will not ordinarily be awarded to basis of finding made in a general investigation resulting in a widespread readjustment of rates on shipments which moved prior to effective date of commission's order. See 69 I. C. C. 11 and other cases cited. Western Pine Mfrs. Asso. v. Director General, 102 I. C. C. 753, 755.

(u) In many decisions the Commission has adhered to the principle that in a comprehensive and systematic readjustment of rates prescribed by it within a large section of territory claims for reparation will not ordinarily be allowed. Cook v. A. T. & S. F. Ry. 109 I. C. C. 493, 496.

(v) Where readjustments of rates have been initiated by carriers, the exercise of their judgment in good faith and within reasonable limits should not be at peril of liability of reparation; and that the awarding of reparation by no means necessarily follows the reduction of a rate by their voluntary action. Western Paper Makers Chemical Co. v. G. & S. I. Ry., 112 I. C. C. 221, 222.

ALL OTHER CITATIONS

Co-Operative Oil & Paint Co. v. Director General, as Agent, 88 I. C. C. 747.

§13a. State Shipments.

See State Rates and Regulations.

(a) Some of the reparation statements submitted embraced intrastate shipments which moved both prior and subsequent to Federal control. As to such shipments the commission is without authority to award reparation. Before these statements were finally submitted to the carriers for checking, prior to the entry of any reparation order which might be issued, such shipments should have been eliminated. Chicago Live Stock Exchange v. A., T. & S. F., 100 I. C. C. 266, 273.

§16. Voluntary or subsequent reduction.

See Evidence §64; Reasonableness of Rates §32½.

(a) The Commission has repeatedly held that a subsequent reduction of a rate is not of itself ground for reparation. Lynchburg Chamber of Commerce v. N. C. & St. L. Ry., 91 I. C. C. 586, 587.

(b) While the reduction of a rate is not by itself a basis for an award of reparation, the higher rate was applicable solely because of the use to which the commodity was put. Durant Motors v. A. Ry. Express, 91 I. C. C. 695, 696.

(c) Complainant attacked commodity rate charged of $3.91 on three cars of coal shipped in September, 1920 from Wayco, O., to Randolph, N. Y., as unreasonable, unjustly discriminatory and in violation of the fourth section. Wayco is on the P. & W. V., Randolph is on the Erie about 16 miles east of Jamestown, N. Y., and 13 miles east of Falconer, N. Y. One car moved over P. & W. V., West Side Belt, B. & L. E., and Erie. Other two moved W. & L. E., in connection with the same originating and delivering lines. Shipments were originally billed to Jamestown, which took a rate of $2.51. Shipments were reconsigned to Randolph charged at combination on Falconer or Jamestown. The rate to Jamestown subsequently became effective to Randolph. HELD, rate attacked unreasonable to extent it exceeded $2.61 reparation awarded. Randolph Furniture Works v. E. R. R., 92 I. C. C. 245.

(d) Neither the voluntary nor compulsory reduction of a rate by a carrier necessarily entitles shippers under the unreduced rate to reparation. The Commission has long adhered to the policy that in the public interest reparation should be denied when rates reduced by orders of the Commission have been in effect for long periods and when those orders required readjustment of rates throughout an extensive territory and affected shippers at many points. Hawkeye Fuel Co. v. S. & E. Ry. P. & Co., 93 I. C. C. 157, 159.

(e) Complainant attacked combination class and commodity rates charged on a car of sweet potatoes shipped Jan. 1, 1920 from Dardanelle, Ark., to Spokane, Wash., as unjust and unreason-

able. Shipment moved to Russelville, Ark., 5 miles thence to Spokane, 2,009 miles charged 16.5c class C to Russellville and commodity rate of 94c beyond. The 94c rate also applied from Dardanelle to Spokane with the Rock Island as the originating carrier. This rate became applicable via route shipment moved Sept. 20, 1921. HELD, rate attacked unreasonable to extent it exceeded 94c, reparation awarded. Fort Smith Commission Co. v. Director General, 95 I. C. C. 149.

(f) The fact that the rates prayed were subsequently established affords no adequate basis for an award of reparation. Barker Evans Paint Co. v. Director General, 98 I. C. C. 414, 418.

(gh) Reparation not awarded to basis of a subsequently established joint thru rate based upon the aggregate of intermediates over the short lines which was lower than the joint rate paid over the more indirect route of movement. Kirschbraun & Sons v. G. N. Ry., 100 I. C. C. 28, 33.

(ij) Rates on asphalt from San Francisco to Great Falls and Billings, Mont., found unreasonable to extent water factor, San Francisco to Portland, exceeded lower proportional rate contemporaneously in effect on same commodity between same points via another water carrier, which lower rate was subsequently made applicable over route of movement. Reparation awarded. Warren Construction Co. v. G. N. P. S. S. Co., 92 I. C. C. 302.

(k) Rate on returned paper winding cores found unreasonable to extent it exceeded rate contemporaneously in effect on newsprint paper. Subsequent to movement carrier provided in its tariff that rate on cores returned to mill point from which originally shipped wound with paper would not exceed the rate on newsprint paper in reverse direction. Reparation awarded. Nelson Estate v. C., M. & St. P., 93 I. C. C. 607.

(lm) Complainant attacked commodity rates charged on cars of paper and paper articles from New Orleans to Dallas, Tex., between Dec. 21, 1921 and Sept. 1, 1922 as unjust and unreasonable. Charged $1.08 prior to July 1, 1922 and 97c thereafter until Sept. 14, 1922 when the rate was reduced to 68c. This latter rate was established to maintain a rate relationship of long standing between New Orleans and St. Louis, Mo., on traffic to Texas common points. HELD, rate attacked unreasonable to extent it exceeded 75.5c prior to July 1, 1922 and 68c thereafter, reparation awarded. Palmer & Company v. H. & T. C. Ry., 102 I. C. C. 372.

(n) The mere reduction of a rate is insufficient to prove that the former higher rate was unreasonable, and in the absence of proof of damage to the shipper the fact that the carriers have charged or received rates which violate the long and short haul rule of the fourth section is not of itself a sufficient basis for an award of reparation. Eads Bros. Furniture Co. v. B. & O. R. R., 102 I. C. C. 381, 383.

(o) The subsequent reduction of a rate over the route of movement, or the contemporaneous maintenance of lower rates over other routes, does not of itself warrant an award of reparation. Utah Idaho Sugar Co. v. C. & N. E. Ry., 102 I. C. C. 388, 389.

(p) The reduction was voluntarily accorded by the carriers and in itself affords no basis for condemning the class basis formerly applicable. Kennedy & Parsons Co. v. C. & N. W. Ry., 102 I. C. C. 591, 594.

(q) It would appear unwise for this Commission to adopt a policy by which, upon the voluntary reduction of a rate, a shipper who had previously paid the higher rate should recover as damages whatever difference there might be between the rate which he was compelled to pay and the rate newly established by the railroad, where application had not been made either to the railroad or to the Commission for a reduction of the rate prior to the time at which the railroad itself made such reduction and where it does not clearly appear that the rate was at the time unreasonable. Texas Co. v. T. & P. Ry., 107 I. C. C. 147, 150.

(r) While the subsequent reduction of a rate does not show the prior rate to be unreasonable, neither does it act as a bar to reparation when the former rate was clearly unreasonable. Knoxville Iron Co. v. L. & N. R. R., 107 I. C. C. 627, 634.

(s) Defendants are right in their contention that the subsequent reduction of a rate does not show the prior rate to be unreasonable and that a violation of

the long and short haul clause of the fourth section without a showing of injury is insufficient to support an award of reparation. Murphy v. A. C. L. R. R., 107 I. C. C. 651, 652.

(t) The mere subsequent reduction in rates affords no basis for an award of reparation. Marion Machine, Foundry & Supply Co. v. C. & N. E., 101 I. C. C. 71, 73.

(u) Combination rates on mine-run coal from Coil and Sunset Mine, Ky., to Bonne Terre, River mines, and Leadwood, Mo., found unreasonable to extent they exceeded a joint rate subsequently established. Due to a miners' strike, carriers, in order to move traffic and relieve or avoid congestion, assured complainant that they would establish a joint rate if he would allow shipments to go forward. Complainant would not have permitted shipments to move prior to publication of the joint rates but for representations of carrier that it would get the benefit of that rate inasmuch as it could have availed itself of lower combination rate via another route. Reparation awarded. St. Joseph Lead Co. v. L. & N., 101 I. C. C. 352.

(v) Complainant attacked class D rate of 62.5c per 100 pounds charged on four cars of manganese ore from Philipsburg, Mont., to Portland, Ore., in Nov. 1918, as unreasonable and unduly prejudicial, the rates charged having been reduced to a basis satisfactory to the complainant. Shipments moved N. P., to Spokane, Wash. and S. P. & S. beyond, 708 miles. Rate claimed as reasonable $5 per ton, established Feb. 5, 1919. Defendant viewed the situation as promising enough to establish the commodity rate, and would have made it available for these shipments had it not been for delays incident to the formality of tariff publication. HELD, rate charged unreasonable to extent it exceeded $5.60, the rate to Tacoma. Reparation awarded. Humphreys v. Director General, 109 I. C. C. 157.

(w) Complainant attacked commodity rates charged on gypsum rock, carloads, from Plasterco and Saltville, Va., to Spocari, Ala., as unreasonable and unduly prejudicial as compared with the rates to Chattanooga Tenn., and Leeds and Birmingham, Ala. Saltville and Plasterco are local points on a branch of the N. & W. in southern Virginia, 37 and 35 miles northeast of Bristol, Va.-Tenn. Spocari is a local point on the Southern between Selma and York, Ala., 48 miles west of Selma and 29 miles east of York. Leeds is on the Southern between Birmingham and Atlanta, Ga., 18 miles east of Birmingham. Applicable rates prior to July 1, 1922, 24.5c; July 1, 1922 to June 1, 1924, 22c; June 1, 1924 to date 18.5c. Shipments moved initially over the N. & W., to Bristol, thence either over Southern direct to Spocari or over Southern to Chattanooga, A. G. S., to Birmingham and Southern beyond. Distance over former route from Saltville is 562 miles and over latter route 576 miles. Gypsum rock is a low grade commodity and its rate should be lower than the average on all freight. Undue prejudice has been removed by the publication of the 18.5c rate to Spocari. HELD, rates attacked unreasonable to extent they exceeded 20.5 c prior to July 1, 1922 and 18.5 c after that date to June 1, 1924, present rate not unreasonable, reparation awarded. Gulf States Portland Cement Co. v. N. & W. Ry., 109 I. C. C. 231.

(x) The subsequent voluntary reduction of a rate does not of itself warrant an award of reparation. Baker & Holmes Co. v. Pennsylvania R. R. 109 I. C. C. 396, 398.

§17. Willingness of Carrier to Pay.

(a) Rates can not be condemned upon admissions of unreasonableness of the character made in this case, nor can reparation be authorized unless it is shown that the act has been violated. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113, 115.

(b) Unfulfilled promises of representatives of carriers that reduced rates would be made effective is not justification for an award of reparation. Florence Chamber of Commerce v. A. & V. Ry., 107 I. C. C. 84, 96.

(c) Application was made informally by defendants to make refund of the charges collected in excess of those that would have accrued under the subsequently established rate. Conference Ruling No. 396 outlines the Commission's position with respect to authorizing reparation in instances where the carriers subsequently establish and maintain a rate upon a basis to which reparation is sought. Western Sugar Refinery v. S. P. Co. 101 I. C. C. 113, 115.

IV. LIABILITY FOR REPARATION.

See Express Companies XII.

§17½. Interest or Court Costs.

(a) It is true that a common carrier, prior to an award of reparation by the Commission can not make refund to a shipper of charges collected for transportation in interstate or foreign commerce over and above what that carrier might concede to be a reasonable rate, but it has never been seriously contended that the Commission has no authority to award interest against such a carrier as an element of damage. Numerous cases may be cited wherein the courts have approved the findings and orders of the Commission awarding damages against common carriers with interest from the dates of payment of the unreasonable charges. Shreveport Creosoting Company v. L. & P. Ry., 92 I. C. C. 519, 523.

(b) The Supreme Court held in 238 U. S. 473, that awards of reparation, including interest, under section 8 of the Act are compensatory damages and not penalties or forfeitures. Under the doctrine of 356 U. S. 554 interest may be included in awards of reparation against defendant. That case it is true, deals with liability under the federal control act and not the transportation act, but the latter can not be deemed to have made a change in this respect. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 525.

(c) In reimbursing the shipper for the loss suffered through exaction of an unreasonable rate interest is awarded as an element of the compensatory damages due him, and not for any default or delay in payment of the damages. Such damages may reasonably include interest and costs. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 526.

(d) The Act directs that the full amount of damages suffered by a shipper shall be paid to him. In the opinion of the Commission, as an element of compensatory damages, interest runs from the time the unreasonable charge is collected; otherwise the shipper would not be reimbursed for the full amount of damages he suffered through the detention by the carrier of money belonging to him, and of the use of which he has been unlawfully deprived. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 527.

(e) By a stipulation entered of record certain complainants waived payment of interest if reparation is awarded, and others waived interest in excess of 3 per cent. HELD: Reparation awarded in accordance with such stipulation as to interest. Jones & Laughlin Steel Co. v. P. & L. E. R. R. Co., 91 I. C. C. 300, 306.

(f) The Commission has power to allow interest as part of damages sustained in consequence of exaction of unreasonable rates by director general during Federal control. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519.

(g) In the Meeker case 236 U. S. 434, and Mills case, 238 U. S. 473, the Supreme Court held that awards of reparation, including interest, under section 8 of the interstate commerce act are compensatory damages and not penalties or forfeitures, and under doctrine of the Ault case, 256 U. S. 554, interest may be included in awards of reparation against director general. While the Ault case deals with liability under the Federal control act and not the transportation act, the latter can not be deemed to have made a change in this respect. See Davis v. Slocomb, 263 U. S. 158. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 520, 525.

(h) Director General contended that commission can not include interest in an award of reparation against him for damages sustained in consequence of collection of an unreasonable rate during Federal control, basing such conclusion upon further contention that the transportation act superseded the Federal control act except as to those provisions incorporated by reference into the transportation act. HELD: With this contention, which amounts to a repeal by inference, the commission does not agree. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 525.

(i) Under fourth paragraph of Section 10 of Federal control act the director general is prevented from interposing defense that he is not liable for interest on reparation claims. That paragraph specifically provides that "the commission may make such findings and orders as are authorized by the Act to regulate commerce as amended." Congress must be presumed to have known of the commission's long-established practice of awarding interest in findings and orders against carriers for damages arising from collection of unreasonable rates, and, by above-quoted provision, must be considered to have authorized

awards of interest in cases dealing with unreasonable charges collected during Federal control. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 525.

(j) Upon contention of Director General that interest can not be awarded in an action against the Government in consequence of collection of an unreasonable rate during Federal control unless specifically provided by act of Congress, HELD: Contention seems to have been decided to the contrary in Seaboard Air Line Ry. v. U. S., 261 U. S. 299. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 526, 527.

(k) In accordance with terms of an agreement entered into between complainant and director general, reparation awarded without interest. California Sales Co. v. Director General, 92 I. C. C. 619.

(l) Upon contention of Director General that complainant is not entitled to interest, on ground that complaint does not specifically pray for interest and that commission does not have legal power to award interest upon reparation claims made against him, HELD: Prayer of complainant that defendant be required to pay it a certain sum, "or such other sum as * * * the commission shall determine that complainant is entitled to as an award of damages," is sufficiently broad to include interest; and contention of director general as to commission's authority to award interest is disposed of in 92 I. C. C. 519. Crown Willamette Paper Co. v. Director General, 100 I. C. C. 397, 400, 401.

§19. Parties to Make Refund.

See Routing and Misrouting §19.

(a) Awards or reparation are not dependent upon the solvency or insolvency of carriers concerned. If a through rate, joint or combination, is found unreasonable and reparation is awarded the order entered runs against the carriers, collectively, that participate in the transportation. Riverside Mills, 40 I. C. C. 501; United Paperboard Co., 62 I. C. C. 60. Pinson Brokerage Co. v. C. & G. R. R. Co., 89 I. C. C. 125, 126.

(b) Complainant attacked combination rates charged on three cars of coal shipped in December 1916 and November 1917, from Williams, Okla., to Kansas City, Mo., via midland Valley to Muskogee, Okla., M. O. & G., to Baxter, Kas., or Joplin, Mo., Frisco as unreasonable. In 66 I. C. C. 588 the Commission found rates unreasonable and awarded reparation against defendants other than the K. O. & G. The order was reopened for reconsideration of the question of whether the K. O. & G., should be included in the order. The record now shows that on July 8, 1919 the K. O. & G., purchased the property of the M. O. & G., at a sale under receivership and foreclosure proceedings in the District Court, free of all encumbrances save only such claims as were filed in those proceedings within a period which expired Nov. 12, 1919; and complainants filed no claim therein covering the shipments here under consideration. It follows that the K. O. & G. is not liable for any part of the reparation. HELD, reparation awarded against the M. V., and Frisco. Midland Coal Co. v. M. V. R. R., 91 I. C. C. 571.

(c) In certain cases where combination rates have been found unreasonable, a reasonable rate for the future prescribed, and reparation awarded, the Commission has approved apportionment of the damages among the carriers upon the basis of agreed divisions of the joint rate subsequently established in compliance with the order. Midland Coal Co. v. M. V. R. R., 91 I. C. C. 571, 573.

(d) None of the carriers had control over any factor making up the combination rate except that maintained by it, nor did either contribute in any way to the injury except to the extent of whatever unreasonableness may have existed in its particular rates. To find in such a case that carriers are jointly and severally liable, if there are some unreasonableness in the individual rates of each carrier, would be to require two carriers to bear the injury done by the third where the former had no control over the actions or rates of the latter, and under circumstances which render it impossible for the carriers thus injured to obtain contribution from the other carrier. Midland Coal Co. v. M. V. R. R., 91 I. C. C. 571, 573.

(e) The charging of an unreasonable rate is a tort and parties to such a rate are jointly and severally liable for damages resulting from its collection and recovery may be had. Omaha Refining Co. v. Director General, 91 I. C. C. 575, 576.

(f) The Director General is liable for compensatory damages, as distin-

guished from punitive damages or penalties, in the same manner and to the same extent as if he were a corporate common carrier, and that such damages may reasonably include interest. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 524.

(g) Combination rates were assessed under circumstances of which participating carriers were only liable for such unreasonableness as existed in their individual factors. Complainant named as a party defendant successor in interest of one carrier participating in transportation but did not name predecessor company. HELD: No order for reparation can be issued against predecessor company because not named as a party defendant and under circumstances of this case no other participating carriers are liable for damages of that company. Midland Coal Co. v. M. V. R. R. Co., 91 I. C. C. 571.

(h) Shipments moved over Missouri, Oklahoma and Gulf Ry., whose property was subsequently acquired by Kansas, Oklahoma and Gulf Ry Co., under receivership and foreclosure proceedings, free of all encumbrances save only such claims as were filed within a specified period. Upon complaint before Commission naming successor but not predecessor company as a party defendant: FOUND: Since complainant filed no claim against successor company covering shipments here involved within period specified under receivership and foreclosure proceedings, such company can not be held liable for reparation due to unreasonableness in rates of its predecessor company. Midland Coal Co. v. M. V. R. R. Co., 91 I. C. C. 571.

(i) Where an unreasonable joint rate has been collected liability of parties to such action is joint and several, and Commission may award reparation against one defendant road which participated in traffic, even though other roads which made parties defendant. See 6 I. C. C. 378 and 21 I. C. C. 20. Midland Coal Co. v. M. V. R. R. Co., 91 I. C. C. 571, 572, 573.

(j) Upon contention that reparation many not be awarded against Director General in connection with shipments originating during Federal control and delivered after termination thereof, as there is no direct evidence that he received any portion of unreasonable charges collected. HELD: Director General established unreasonable rate, participated in carriage at that rate, and is not released of his liability for violating the Act by any arrangement he may have made as to disposition of amount collected. Omaha Refining Co. v. Director General, 91 I. C. C. 575, 576.

(k) Shipments originated during Federal control but were delivered after that period had terminated. Upon contention of Director General that Commission may not award reparation on such shipments because corporate carriers are not made defendants. HELD: Applying well-established principle that charging of an unreasonable rate is tort, and that parties to such a rate are jointly and severally liable for damages resulting from its collection, recovery may be had from Director General in connection with such shipments. Darnell Taenzer case, 245 U. S. 531; International Nickel Co., 66 I. C. C. 627. Omaha Refining Co. v. Director General, 91 I. C. C. 575, 576.

(l) Director general contended that, because he was not named defendant in informal complaint and was not so named until formal complaint was filed, in so far as he was concerned the claim was barred under section 206 (c) of the transportation act, 1920. However, the informal complaint was presented to him for consideration but adjustment thereon was declined. Moreover, during pendency of the informal proceeding with his consent the commission ordered that in proceedings praying for reparation under said section, wherein director general was not named, he be made a defendant for all intents and purposes of the section. Under this state of facts failure to name director general in informal complaint was immaterial. Midland Coal Co. v. St. L. S. F., 92 I. C. C. 283, 284.

(m) The Ault case, 256 U. S. 554, establishes the principle that the director general is liable for compensatory damages, as distinguished from punitive damages or penalties, in same manner and to same extent as if he were a corporate common carrier, and that such damages may reasonably include interest. Shreveport Creosoting Co. v. L. & P. Ry., 92 I. C. C. 519, 524, 525.

(n) Reparation statement indicates that two shipments were delivered subse-

quent to the period of Federal control and the right of recovery upon these shipments lay against the Denver & Rio Grande Western, successor to the Denver & Rio Grande, and not against the director general, who was made the sole defendant herein, these shipments, therefore, are barred. Western Metals Co. v. Director General. 100 I. C. C. 314, 315.

§20. Release of Liability.

(a) Defendant is not relieved of his liability for violation of the act by any arrangement he may have made as to disposition of the amount collected. Omaha Refining Co. v. Director General, 91 I. C. C. 575, 576.

V. PROCEDURE.

§20¾. In General.

See Procedure Before Commission.

(a) Testimony by complainant's witness with reference to payment of freight charges will not be reviewed by the commission where such evidence is hearsay and is objected to by defendant on that ground. Southern Cotton Oil Co. v. Director General, as Agent, 89 I. C. C. 154, 155.

(b) Affidavits submitted by interveners at hearing purporting to establish fact that they "actually paid and bore charges" on shipments including in their claims, defendant objecting thereto on ground that no opportunity to cross examine affiants afforded. HELD. Affidavits, when objected to by defendants, can not be received as evidence of damage. Fairmont Creamery Co. v. Director General, as Agent, 89 I. C. C. 359, 360.

ALL OTHER CITATIONS

Beaumont Chamber of Commerce v. Director General, as Agent, 85 I. C. C. 139; Murray v. Director General, as Agent, 85 I. C. C. 422; Cohen v. A. T. & S. F. Ry. Co., 88 I. C. C. 143; Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R. Co., 88 I. C. C. 640.

§21. Formal Proceedings.

See Cars and Car Supply VI; Claims.

(a) Defendants argue that complaints filed by traffic bureaus, should be dismissed because of lack of interest on part of complainants, since freight charges are not paid by them or their members. HELD: Such complainants found to have a legitimate interest in securing an adjustment of rates that will not prefer other ports over their own Moreover, section 13 of the act provides that no complaint shall be dismissed because of absence of direct damage to complainant. Charleston Traffic Bureau v. A. G. S. R. R. Co., 89 I. C. C. 501, 502.

ALL OTHER CITATIONS

Doniphan Brick Works v. Director General, as Agent, 88 I. C. C. 438; Armour & Co. v. Director General, as Agent, 88 I. C. C. 569.

§23. Court Pleadings and Procedure.

See Allowances §14½; Actions at Law; Courts.

(a) If by reason of commercial contracts, entered into under prior misrepresentation on the part of the carrier, complainant found itself in such a position that it could not abate the demurrage assessed, question of damage arising from such a situation is for the courts to consider. Krauss Bros. Lumber Co. v. I. C. R. R. Co., 96 I. C. C. 760, 761.

§25. Statements for Reparation.

See Evidence.

(a) Upon further hearing, complainant having submitted evidence in substantial compliance with Rule V of the Rules of Practice, reparation awarded on shipments moving subsequent to original hearing to basis of rates found reasonable in original report, 73 I. C. C. 567. Lancaster Steel Products Corp. v. Director General, 92 I. C. C. 1.

(b) In original report, 66 I. C. C. 571, reparation was awarded and complainants and intervener were directed to submit statements covering their shipments in accordance with Rule V of Rules of Practice, but defendants objected to proof in affidavit form as to shipments made subsequent to date of original hearing. Upon further hearing, reparation awarded on shipments as to which proof of paying and bearing of freight charges had not theretofore been made. Wichita Board of Commerce v. Director General, 92 I. C. C. 370.

(c) Complainants, to whom reparation awarded, authorized to submit reparation statement under Rule V of the Rules of Practice setting forth details of shipments made subsequent to the hearing, accompanied by proof in affidavit form that shipments were made and freight charges thereon were paid by them, with understanding that if defendants object to proof in affidavit form complainants will be accorded further hearing on question of reparation. Ontario Paper Co. v. C. N. Rys., 95 I. C. C. 66, 75; Best Foods v. C. R. R. Co. of N. J., 95 I. C. C. 738, 740.

(d) Proof consisting only of affidavits was objected to by defendants and not received in evidence. Upon representation of complainants that defendant, since the hearing, has undertaken to handle similar claims on special docket, and accepted affidavit proof, complainant authorized to file Rule V statements, accompanied by affidavits further hearing to be sought if defendant still objects to form of proof. Jockusch v. G., C. & S. F. Ry., 96 I. C. C. 500.

(e) Upon further hearing, original report 81 I. C. C. 131, reparation awarded seven members of complainant association on account of collection of unlawful charges on shipments of wool and mohair, in the grease, from points west of the Missouri river to Boston, Mass. Carriers notified to unite in the preparation of reparation statements in accordance with Rule V of Rules of Practice. If documentary evidence necessary to preparation of such statement can not be adduced within a reasonable time, further hearing may be had upon request. Boston Wool Trade Asso. v. Director General, 98 I. C. C. 48.

(f) Shipments made subsequent to hearing authorized to be included in reparation statement under Rule V of Rules of Practice if accompanied by proof in form of an affidavit that shipments were made and freight charges were paid and borne by complainant, with understanding that if carriers object to proof in affidavit form such shipper may request further hearing with respect to subject of reparation. Lillie Mill Co. v. L. & N., 102 I. C. C. 67, 71; Houston Packing Co. v. A., T. & S. F., 102 I. C. C. 385, 387; Baton Rouge Rice Mill v. N. O., T. & M., 102 I. C. C. 507, 510; Miss. R. R. Comm. v. A. & V., 102 I. C. C. 540, 552.

ALL OTHER CITATIONS

Beaumont Chamber of Commerce v. Director General, as Agent, 85 I. C. C. 139; Utah Gilsonite Co. v. A. T. & S. F. Ry. Co., 85 I. C. C. 557; Schaefer v. L. V. R. R. Co., 85 I. C. C. 605.

RESTRICTED RATES

See Absorption of Charges §3; Advanced Rates §17 (h); Class Rates §1 (k) (o); Classification §7 (c), §12⅞ (a); Commodity Rates §5 (3w); Concentrating Rates and Privileges; Facilities and Privileges §10 (a), §15 (f); Live Stock Shipments (r); Passenger Fares and Facilities §3a (a); Proportional Rates I (b), II (ccb), VI (a), VII (a); Rail and Water Rates (w) (3s); Routing and Misrouting §6; Switch Tracks and Switching §3 (s) (t) (u); Through Routes and Joint Rates §20a, §24, §25.

(a) Class rates charged on matches from Oswego, N. Y., to certain team-track delivery points in Philadelphia, found inapplicable. Lower commodity rate to Baltimore, published in tariff which provided that "rate to any station not provided with a specific rate, and which is directly intermediate to a station having a specific rate, will be the rate shown to next more distant station," found applicable. Although shipments for Baltimore would not ordinarily pass through Philadelphia delivery points here involved, it would have been physically possible to have so moved them, and there was no restriction against such routing. Shipments found overcharged and reparation awarded. Diamond Match Co. v. Director General, 92 I. C. C. 68.

(b) Shipments of apples and pears moving on through rates may be stopped in transit at points in c. f. a. territory for privilege of storage, regardless of point of origin, provided storage point is on a direct line and directly intermediate between point of origin and final destination. Proposal of the B. & O. to restrict application of joint rates on such commodities stored in transit at c. f. a. points to shipments moving into and out of transit points over its own rails, found not justified. Numerous increases and an abnormal rate situation would result, which carriers made no attempt to justify. Storage in Transit of Apples and Pears, 95 I. C. C. 101.

(ba) Proposed changes in rules covering transit on forest products at Minneapolis, St. Paul, Minnesota Transfer, St. Louis Park, and other points in Minnesota and Wisconsin, and proposed changes in intermediate rule restricting application thereof, found not justified. Under existing tariff forest products moving under through rates may be stopped in transit for creosoting or treating. Under proposed rules transit will not apply when both transit point and final destination are within same switching district, such shipments being treated as switching movements subject to switching charges. Proposed modification of intermediate rule to restrict its application to stations "on the same line of railway" would result in elimination of intermediate application of joint rates in many instances. Moreover, both changes would create departures from the fourth section. Transit Privileges on Lumber, 95 I. C. C. 154.

(c) Irrespective of intentions of framers, tariffs will be construed according to their language. If it is carriers' intention to limit rates so as to exclude specific commodities they should do so in clear and unequivocal language. Any ambiguity or uncertainty in a tariff will be resolved against its makers. Louisiana Red Cypress Co. v. M. L. & T. R. R. & S. S. Co., 95 I. C. C. 159, 160.

(d) Shipments of lumber from Falco, Ala., to Manitou Beach and Northville, Mich., found overcharged. While shipments moved via direct routes a lower rate applicable under Rule 5 (b) of Tariff Circular 18-A and unrestricted in its application, was contemporaneously in effect via a circuitous route. If carriers participating in tariff carrying the lower rate desired to restrict its use over certain routes they should have done so by the use of proper tariff notations. A failure to do so left all routes open should shippers desire to use them. Reparation awarded. M'Gowin-Foshee Lbr. Co. v. A., F. & G., 95 I. C. C. 451.

(e) The view has been long followed in tariff construction that if carriers participating in a tariff do not intend rates to apply over certain routes they must restrict their use by proper notation in the tariff. Failure to restrict routing leaves all routes open should shippers desire to use them. M'Gowin-Foshee Lbr. Co. v. A., F. & G., 95 I. C. C. 451, 452.

(f) Rates assessed on grain and products moving from points west of Buffalo to destinations on Maine Central in Washington and Somerset Counties, Me., via Washington Junction and Oakland, during Federal control found inapplicable in so far as proportionals for movements beyond Washington Junction and Oakland were applied. These proportionals were applicable only when there were no joint rates in effect from points of origin. Applicable rates were those under tariffs naming rates from points of origin and billing books to which reference was made in those tariffs. Shipments found overcharged and reparation awarded. Thaxter & Co. v. Director General, 95 I. C. C. 693.

(g) No specific joint rates were published from Petersburg, Pa., to Pueblo, Colo. Tariff naming joint rates from Petersburg to Columbus, N. Mex., in which Pueblo was not specified, carried an intermediate-point rule. The joint rates were not restricted to any particular route, nor did the tariff in any way limit movements up to the Pueblo gateway. The route via that gateway was not unreasonable or unduly circuitous, all defendants herein were parties to the Columbus rates, and in connection with other participating carriers made up the latter point "a line or route" on which Pueblo was directly intermediate. FOUND: Under the circumstances, rates to Columbus were applicable to Pueblo and shipments here involved were overcharged. Reparation awarded. Frazier Saddlery v. M. P. R. R. Co., 96 I. C. C. 1.

(h) Where tariffs are silent as to routing the rates named herein apply over all reasonably available routes of participating carriers. Frazier Saddlery v. M. P. R. R. Co., 96 I. C. C. 1, 2.

(i) Proposed restriction of the application of distance class rates between points in Nebraska, except Omaha, and points in Wyoming, so as to make them inapplicable from and to points on the line of the C. B. & Q. lying generally east of Lincoln, Crete, Beatrice, and Wymore, Nebr., resulting in higher specific class rates becoming applicable, found not justified. Casper Chamber of Commerce v. C. & N. W. Ry. Co., 96 I. C. C. 736.

(j) Proposed restriction of absorption of switching charges on coal from L. & N. stations and mines in Tennessee and Kentucky to points within the switching limits, suburbs, and industrial

limits of Atlanta, Ga., which would result in increased rates to Atlanta, found not justified. The present level of rates from L. & N. mines in Tennessee and Kentucky to Atlanta industrial district is not unreasonably low, particularly as the L. & N. transports the traffic over its own line under operating conditions which are favorable, and as it restricts the rate to the route over its own line, although there are other routes in connection with the Southern Ry., which are feasible and which can be used to advantage without an increase in the rate. Coal and Coke from Kentucky and Tennessee Mines to Atlanta, 98 I. C. C. 11.

(k) Combination rates on fuel oil from Pryse, Ky., to Newport News, Va.. found unreasonable to the extent it exceeded a lower combination contemporaneously in effect via the route of movement, one factor of which was so limited as to exclude its application to destinations in Virginia. Subsequent to the movement. the application of this factor was extended to include these destinations. Newport News Shipbuilding & Dry Dock Co. v. L. & N. R. R. Co., 100 I. C. C. 1.

(l) Proposed revision of rates from Atlanta to Buffalo and Pittsburgh proper, makes no provision for its application to the Buffalo-Pittsburgh territory. though no reason appears for so restricting the rates. Respondents directed to effect the application of proposed rates to the Buffalo-Pittsburg territory in season to take effect at same time as the suspended schedules. Furniture from Southern Points, 100 I. C. C. 127, 148.

(m) Joint rates on tin plate from McKeesport, Pa., Yorkville, O., and Cumberland, Md., to New London, Wis., moving via Ludington, Mich. thence by car ferry to Manitowoc or Kewaunee, Wis. thence by rail to destination, found not unduly prejudicial but unreasonable to extent that they exceeded the combination of proportional and local factors which would have applied in the absence of joint rates proportional factors which would have been applicable were so restricted as to result in violations of section 4 from McKeesport and Yorkville, but not from Cumberland. Reasonable rates prescribed for the future, and reparation denied. Borden Co. v. A. A. R. R. Co. 100 I. C. C 153.

(n) Following Joseph Iron Co., 37 I. C. C., 591; 40 I. C. C. 525, proportional rates found not so properly restricted as to make its application definite or ascertainable, and that the restriction thus failing, the rates found an intermediate within the meaning of section 4. Defendant attempts to distinguish the cited cases from the present one on the ground that here the through rate is published in a commodity tariff, which is a natural place to look for it. But the test is whether the restriction itself gives a definite reference by which the presence or absence of the through rate may be ascertained, thus the rates here are in violation of the aggregate-of-intermediates clause of section 4 and are prima facie unreasonable. Borden Co. v. A. A. R. R. Co., 100 I. C. C. 153, 154, 155.

(o) Proposed increased class rates from Virginia cities and points taking same rates, or rates made differentially higher, to destinations on the Charleston division of the Baltimore & Ohio found not justified. First-class rate from Lynchburg to Grafton on the main line of the B. & O. is lower than the present first class and the proposed rate to points on the Charleston division, and. since no restrictions upon the routing are made in the tariff, this rate is applicable over the Charleston division. Following Zelnicker Supply Co., 80 I. C. C. 651, and Dixie Portland Cement Co., 96 I. C. C. 47, respondents contention that no increase in discrimination against intermediate points under the fourth section results because no arrangements for divisions are in effect over these routes to Grafton, and routing over this line would not be observed, can not be sustained. Class Rates from Eastern Points to Points in West Va., 100 I. C. C. 215.

(p) Combination rate assessed on a shipment of lumber from Rose Lake, Idaho, to Danvers, Ill., found inapplicable and illegal to extent it exceeded the rate applicable to both Chicago Heights and Peoria, Ill. Danvers is intermediate between Peoria and Chicago Heights, and while the tariff carrying the rate to these points did not prescribe a specific rate to Danvers, it carried an intermediate clause. The commission has frequently found that if carriers desire to restrict the application of a joint rate to any particular route they should do so by clear and unequivocal language. With no routing restrictions shown in the tariff naming the joint rate sought, the

shipment is properly entitled to such rate. Reparation awarded. Rose Lake Lumber Co., Ltd., v. O. S. L. R. R. Co., 100 I. C. C. 221.

(q) Combination rate assessed on cork sheets or slabs without binder, from Camden, N. J., to El Centro and Brawley, Calif., found inapplicable. Joint rate alleged applicable was restricted by exception to exclude shipments passing enroute through points taking group K., L. or M. rates and complainant's shipments were therefore not entitled to the joint rate. They were, however, entitled to a lower combination based on St. Louis, applicable under rule 5 (b) of Tariff Circular 18-A. Refund of overcharges directed. Armstrong Cork & Insulation Co. v. Reading Co., 100 I. C. C. 468.

(r) Following 81 I. C. C. 338 and 91 I. C. C. 632, proposed restricted application of joint rates on grain and grain products from certain primary markets such as St. Paul and Minneapolis, Minn., Chicago and Peoria, Ill., and St. Louis, Mo. and intermediate territory between those points and Missouri River cities, to destinations in Colorado, Kansas, Missouri, Nebraska, Oklahoma, and Wyoming, to shipments originating beyond primary markets named, effecting increased rates to basis of combination rates on Missouri River and on local traffic from Chicago and other primary markets in same amount as such latter rates are increased, and resulting in many instances of violations of aggregate-of-intermediates clause of fourth section of the act, found not justified. Grain from Western Trunk Lines, 100 I. C. C. 745.

(s) Proposal of Union Pacific system to restrict routing in connection with joint rates on livestock originating on its lines in Utah, Wyoming, Idaho, and Montana destined to Missouri River and east thereof, designed for purpose of retaining to itself the long haul on this traffic, found not justified. Proposed restriction would result in shipments from some points on respondent's lines being permitted feeding-in-transit privileges at certain feeding lots located on lines other than those of respondent, while shippers of livestock originating in northern Utah and Idaho would be deprived of this privilege and compelled to pay higher rates unless shipments were routed over the Union Pacific. Undue preference of certain shippers and localities and undue prejudice against others would result. Routing of Livestock, 100 I. C. C. 751.

(t) Fifth-class rates on sugar from Philadelphia, Pa., and New York., to St. Louis, Mo., found inapplicable in that a lower commodity rate was contemporaneously in effect. The item in tariff publishing commodity rate contained a note restricting rates to proportional application only in so far as east Mississippi River crossings are concerned. It may have been the intention of carriers to so restrict application of the rates to all points listed in the item but the tariff does not effectuate that intention in so far as St. Louis is concerned. The language of the tariff rather than intention of the framers is controlling. Defendants state that the use of rates on local shipments to St. Louis will result in fourth-section violations, but this does not constitute a ground for holding that they apply other than in accordance with the terms of the tariff. Refund of overcharges directed. National Candy Co. v. P. R. R., 101 I. C. C. 43.

(u) Proposal to restrict application of proportional or reshipping rates on grain and products from Argo, Ill., and other stations in the Chicago switching district, to Boston and destinations taking that rate and to destinations in eastern Canada, via Milwaukee, and make applicable to the rail-and-lake traffic through Milwaukee, the higher combination of rates on St. Louis, found justified. Present Argo rates are being used on traffic for which they were never intended, resulting in disadvantages to certain carriers and avoidance of terminal charges at Chicago by certain lines. Proposed schedules would remedy such disadvantages. Grain and Products from Argo, 101 I. C. C. 303.

(v) Shipment of molasses moving from Morton, Miss., to New Orleans, thence reconsigned to Blytheville, Ark., found overcharged. A rate lower than that assessed, and unrestricted in its application, applied via another more direct route. There was nothing contained in tariff naming such lower rate which would have precluded complainant from routing its shipment through New Orleans had it been billed direct from Morton to Blytheville. Moreover, if it was defendant's purpose to restrict ap-

plication of the lower rate to any particular route and the reconsigning privileges in connection therewith to any particular point, it should have been done by clear and unequivocal language. See 47 I. C. C. 59. Reparation awarded. Scott County Farm Bureau v. A. & V 101 I. C. C. 357.

(w) Proposal to restrict application of rule covering rates on cement to intermediate points in western trunk-line territory, so as to apply only where no specific through rate on the same commodity from same point of origin to same point of destination is published in some other tariff, found not justified. Present rule applies rates to Thebes and Ullin, Ill., as maxima to points in southeast Missouri on the Frisco, while proposed rule would not do so, for reason that specific rates are published in other tariffs. Protestants have for some time been endeavoring to have rates to southeast Missouri adjusted and respondents have wholly failed to justify rates to points in that territory which would be higher than to points in southern Illinois. Intermediate Points Rule on Cement, 102 I. C. C. 76.

(x) Shipment of pig iron from Thomas, Ala., to Iola, Kans., reconsigned to Okmulgee, Okla., found overcharged. While route over which shipment moved is circuitous, the transporting carriers are shown as parties to tariff carrying the lower rate without restriction as to routing. Refund of overcharge directed. United Iron Works v. M. P., 102 I. C. C. 107.

(y) Combination rate charged on shipments moving into transit point via one carrier, the outbound movement being performed by a different line, found not unreasonable or unduly prejudicial. Governing tariff at time of movement restricted transit privilege to shipments moving outbound from transit point over rails of carrier performing the inbound haul, and fact that such tariff has since been amended so as to allow transit at joint rates when outbound movement is performed by a connecting line is not sufficient to warrant a finding that higher combination formerly in effect was unreasonable. Wichita Terminal Elevator Co. v. C., R. I & P., 102 I. C. C. 115.

(z) Proposed restriction of proportional rates on cottonseed cake, meal, and other cottonseed products from various groups of origin in Arkansas, Missouri, and Oklahoma to Memphis, Cairo, Thebes, and East St. Louis, and of proportional rates on cottonseed meal, hulls, and cake from Blytheville, Jonesboro, Osceola, and intermediate Arkansas points to Memphis, under provision that rates named will only apply on traffic destined to points beyond to which no through rates are published, which would result in increased rates from Arkansas points to a large number of destinations north of Ohio River to which no joint rates are published and to which present combination on Memphis makes the lowest rate, found not justified. Cottonseed Products from Southwest, 102 I. C. C. 219.

(aa) Proposed increased rates on poles (electric light, telephone, and telegraph), piling, and box and crate shooks, from Sand Point, Kootenai, and Culver, Idaho, to certain group points in California on the Western Pacific and Sacramento Northern Railroads, found not justified. The proposed tariff carries no requirement of specific or complete routing, but contains an unequivocal routing provision to which carriers attempt to apply a restricted construction, to which the commission can not lend its approval. Forest Products to California and Nevada, 102 I. C. C. 224.

(bb) Rate charged on a shipment of apples moving from Brewster, Wash., to Fort Smith, Ark., found inapplicable. A lower rate contemporaneously applied via a route considerably shorter than the route of movement but tariff in which it was published carried no restrictions as to routing. Such lower rate was, therefore, applicable via route of movement. See 47 I. C. C. 59. Reparation awarded. Browne-Hinton Wholesale Grocery Co. v. G. N. 102 I. C. C. 237.

(cc) Shipments of anthracite coal moving from Providence, Pa., to Matawan, N. J., thence reconsigned to Asbury Park, N. J., were assessed joint rates and reconsignment charges plus additional charges because of the movement through Matawan. Contention that additional charges were properly assessed under reconsignment tariffs, which provide for their application where return or additional hauls are involved and where rate from original point of shipment to final destination is not applicable through reconsignment point, it

being shown that the customary route between origin and final destination is via South Amboy and Sea Girt, not sustained. Tariff naming through rate having contained no routing restriction, such rate was applicable via route of movement, and charges assessed were illegal to extent of additional charges collected. See 47 I. C. C. 59 and other cases cited. Reparation awarded. Hartwell & Lester v. D. & H. Co., 102 I. C. C. 703.

RIVER CROSSINGS

See Bridges and Tolls; Class Rates §2 (tt); Evidence §52½; Proportional Rates.

(a) It is clear from the evidence in this case that the west side carriers as a whole can not be operated successfully on the lower basis of rates maintained by the east side lines and would be placed at a serious disadvantage if they were to attempt to compete with those carriers for river point traffic at equal rates, observing such rates as maxima at intermediate points on their lines and other stations necessarily affected. National Asso. of Furniture Mfrs. v. A. A. R. R., 98 I. C. C. 501, 507.

(b) Rates on phosphate rock from Mount Pleasant, Columbia, and Siglo, Tenn., to New Albany, Ind., a north-bank Ohio River point, found unreasonable and unduly prejudicial in favor of Louisville, Ky., a south-bank Ohio River point, to extent that they exceeded or exceed rates to Louisville by more than differential subsequently established by carriers, and which resulted in removal of undue prejudice herein found to exist. Reparation awarded. Calumet Fertilizer Co. v. L. & N. R. R. Co., 91 I. C. C. 31.

(c) For many years it has been tendency of carriers to equalize rates to the several Ohio river crossings on long hauls, but to charge differentials or local rates to north-bank points on short-haul traffic. Calumet Fertilizer Co. v. L. & N. R. R. Co., 91 I. C. C. 31, 34.

(d) Whether, as a matter of rate making, in the construction of through rates on the distance-scale basis, an allowance of a given number of miles should be made for river transfer service, or arbitraries in cents per 100 pounds be added to the rate computed on basis of strict mileage, is incapable of mathematical demonstration. Mileage for Mississippi Crossings, 93 I. C. 462, 475.

(e) Defendants authorized, in making rates under distance scale prescribed for application between points west of the Mississippi river, on the one hand, and Memphis and east-bank Mississippi River crossings south thereof, on the other, to add bridge or ferry tolls not exceeding 2 cents per 100 pounds to rate based upon the distances to or from west-bank points. No allowance should be made for crossings north of Memphis unless and until upon a more complete record the propriety of these allowances is definitely determined. The commission has never approved allowances for crossings at East St. Louis, Cairo, and Thebes, Ill. Oklahoma Corp. Commission v. A. & S. Ry. Co., 98 I. C. C. 183, 250.

(f) The river combination method of making rates to Southeast is general and of long standing. See 81 I. C. C. 96 and 77 I. C. C. 73. Piedmont Oil Co. v. A. & V. Ry., 102 I. C. C. 583, 584.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Shipper, who made no request, as authorized by Interstate Commerce Act, §1, par. 4, as amended by Act Feb. 28, 1920, §400 (Comp. St. Ann. Supp. 1923, §8563), for rates between points as to which there was no published tariff, cannot recover freight charges paid over a longer route which was the most direct of any route on which rates were published, nor had the Interstate Commerce Commission authority to allow shipper a refund representing the excess over reasonable rates on the shorter route. Swift & Co. v. New York Cent. R. Co., 3 Fed (2d) 826.

(b) Nowhere in the acts which the commission administers is it empowered to recognize one route and to deny recognition to another. The meaning and purport of recognition is nowhere stated. Rail Lake-and-Rail Rates via Canada, 96 I. C. C. 633.

II. CARRIERS' DUTY TO TRANSPORT.

§1½. In General.

(a) Complainant attacked commodity rates charged on a car of sorghum seed shipped on Jan. 11, 1922, from Kansas City, Mo., to Montgomery, Ala., as unjust, unreasonable and inapplicable. Shipment moved via Frisco, to Birmingham thence Central of Georgia, charged 77c, composed of proportional commodity rate of 19c to Memphis and sixth class rate of 58c beyond. Rate of 29.5c was in effect to Mobile and sixth class 31.5c beyond. Shipper routed shipment C. of G., at Birmingham. The 29.5c factor applied over the Frisco to Birmingham thence Southern to Mobile. The 31.5c applied from Mobile to Montgomery over Southern to Birmingham thence C. of Ga., to Montgomery. The Frisco was a party to the Mobile rate as far as Birmingham; the Central a party to the Mobile-Montgomery rate from Birmingham to Montgomery. The lower combination would have applied had the shipment actually moved to Mobile and back again to Birmingham and thence to Montgomery. It is obvious, therefore, that it was the duty of the carrier under the rule to apply the Mobile rate, notwithstanding that that route was not designated by the shipper, and shipment was overcharged. HELD: Rate attacked not unreasonable but rate applicable was 61c, reparation awarded. Schloss & Kahn Groc. Co. v. St. L. S. F. Ry., 93 I C. C. 67.

(b) Complainant attacked combination rates charged on silicate of soda, carloads, from Grasselli, N. J., to Thomson, N. Y., since Dec. 1, 1921, as unreasonable, unjustly discriminatory and unduly prejudicial. Grasselli is on the Jersey Central, 436 miles from Thomson, a local point on the G. & J. Shipments moved over Jersey Central to Wilkesbarre, Pa., D. & H., to Johnsonville, and G. & J. beyond. Charged fifth class 35.5c to Johnsonville plus fifth class proportional beyond of 10.5c. There was a rate of 42c from Grasselli to Thomson over Jersey Central, D. & H., B. & M., and G. & J. No routing was specified in the bill of lading. Shipments were misrouted. The commodity rates from Grasselli to points in central territory are about 73% of the fifth class rates except to the so-called 60% points, to which the rates are 80% of fifth class. The present rate of 31c is about 81% of fifth class. Points located on the G. & J., are entitled to the same rates as points on the D. & H., in the same territory. HELD: Shipments misrouted, and reparation awarded on basis of rates subsequently established. United Paperboard Co. v. C. R. R. Co. of N. J., 95 I. C. C. 680.

(c) Complainant attacked combination rate of 70c charged on three cars of cull apples shipped Dec. 4 and 5, 1919, from Lewiston, Ida., to San Francisco, Calif., as unreasonable. Ship-

ments were tendered at Lewiston on N. P., bills of lading routed N. P., and S. P. They moved over Camas Prairie to Riparia, Wash., N. P., to Pasco, Wash., S. P. & S., to Portland, Ore., S. P. beyond, charged 50c to Portland and proportional 20c beyond. Contemporaneously a combination rate of 50c, composed of 30c to Portland and 20c beyond applied over C. P., to Riparia, O. W. R. R. & N. to Portland and S. P. beyond. The same rate applied whether the movement beyond Pasco was over the S. P. & S. or N. P., via Tacoma. HELD: Shipment not misrouted, rate attacked not unreasonable, complaint dismissed. California Packing Corp. v. Director General, 96 I. C. C. 239.

(d) Where tariffs are silent as to routing the rates named therein apply over all reasonably available routes of participating carriers. Frazier Saddlery v. M. P. R. R. Co., 96 I. C. C. 1, 2.

(e) Shipment from Pittsburg, Duquesne station, Pa., to Tulsa, Okla., was diverted, through carrier's error to Waynoka, instead of Wynona, Okla., necessitating a back haul to Wynona. Tariffs of participating carriers named, without applicable restrictions, same rate from origin to both Waynoka and Wynona, and this rate, plus diversion charge found applicable. Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(f) By the route shipments of secondhand refrigerators from Camp Dix (Wrightstown), N. J., to Sheffield, Ala., actually moved a car-ferry transfer from Cape Charles to Norfolk, Va., was necessary, which in complainant's opinion is equivalent to a rail-and-water movement. This contention not sustained, Conf. Ruling 316, and in the absence of specific instructions for rail-and-water route defendants were only under the obligation to protect the rate applicable over route specified by shipper. Florence Chamber of Commerce v. N. S. R. R. Co., 98 I. C. C. 594, 595.

(fa) Shipments of lumber moving from La Grange, Ga., to Philadelphia, Pa., found misrouted. Originating carrier's agent gave erroneous and conflicting instructions to route shipments "Philadelphia, Pa., Chester Station," and "Chester Station, Philadelphia, Pa," under impression that shipments for Philadelphia should be so routed. Such instructions were inserted in bills of lading by shipper, resulting in shipments moving to Chester and necessitating their reconsignment to Philadelphia. Reparation awarded. Clark Lbr. Co. v. A., B. & A., 102 I. C. C. 252.

(g) The bill of lading was accepted and signed by the representative of complainant on the latters behalf and is binding on the parties. Crown Cork & Seal Co., v S. P. Co., 102 I. C. C. 331, 332.

(ga) The difference in quality of service and in nature and liabilities of participating carriers is not as great where a differential route is optional as in that where a rail-and-water route is the alternative. In latter situation marine insurance and transfer of freight from car to vessel, among other things, must be taken into consideration. Petertyl v. N. Y. & H., 102 I. C. C. 693, 696.

(gb) Shipments of anthracite coal moving from Providence, Pa., to Matawan, N. J., thence reconsigned to Asbury Park, N. J., were assessed joint rates and reconsignment charges, plus additional charges because of the movement through Matawan. Contention that additional charges were properly assessed under reconsignment tariffs, which provide for their application where return or additional hauls are involved and where rate from original point of shipment to final destination is not applicable through reconsignment point, it being shown that the customary route between origin and final destination is via South Amboy and Sea Girt, not sustained. Tariff naming through rate having contained no routing restriction, such rate was applicable via route of movement, and charges assessed were illegal to extent of additional charges collected. See 47 I. C. C. 59 and other cases cited. Reparation awarded. Hartwell & Lester v. D. & H. Co., 102 I. C. C. 703.

(h) Complainant attacked carload commodity rates on wheat and coarse grains from Minnesota points to Chicago, Ill., Milwaukee, Wisconsin, and other Wisconsin destinations subsequent to Dec. 31, 1921 as unreasonable. Some moved via Northwestern, Milwaukee or jointly C. G. W., and Milwaukee charged 22.5c on wheat and 20.5c on coarse grains. All of the shipments moved through Winona, Minn., point of interchange between the C. G. W., and Milwaukee. There were in effect from Winona to all of the destinations proportional rates of 13c on wheat and 11.5c on coarse grains applicable, however, only

on shipments on which there were surrendered, on date of reshipment duplicate inbound freight bills representative of the outbound movement. These proportional rates, in connection with the local rates under the minimum intrastate scale inbound, made combinations on Winona ranging from 0.5c to 3c lower than the published through rates. The contention with respect to misrouting is that, inasmuch as the shipments were not specifically routed by complainants, it was the duty of the initial carrier to send the shipments over the joint routes, over which, complainants contend, the lower combinations would have applied. There is no claim for misrouting in connection with shipments over the joint route of the C. G. W., and Milwaukee. The lower combinations did not apply over any route except upon surrender of the inbound billing at Winona. It is no answer to say, as do complainants that surrender of freight bills in the possession of carriers was unnecessary and impossible and that the tariff restriction was, therefore, a nullity. Complainants shipments were billed through to destination and there was no inbound billing to Winona to surrender. HELD, rates attacked not unreasonable and shipments not misrouted, complaint dismissed. Lewiston Elevator Co. v. C. G. W. R. R. 104 I. C. C. 473.

ALL OTHER CITATIONS

Mifflin-Hood Brick Co. v. Director General, as Agent, 88 I. C. C. 205.

§2. Accustomed or Natural Route.

(a) Complaint alleged that two cars of tankage shipped from Chemical, Ill., to Montgomery, Ala., on Sept. 2 and 8, 1922, were misrouted. Chemical is a local station on the Illinois Traction north of Granite City, Ill. The only routing instructions given by the shipper were Western of Alabama delivery. The shipments moved over the I. T. to East St. Louis, L. & N. beyond via Evansville, Ind. No joint rates were in effect, charged $1.89 to Evansville and $5.07 beyond. Contemporaneously a combination rate of 29.5c was in effect from Chemical to Montgomery via East St. Louis, Ill., and M. & O. or via East St. Louis, I. C., Cairo, Ill., and M. & O. made up of 13.5c to Wicklieff, Ky., and 16c beyond. The agent was justified in routing the shipments via one of the recognized gateways through which the rates were made the same. HELD: Shipments not misrouted, complaint dismissed. Alabama Chemical Co. v. Illinois Traction, 98 I. C. C. 451.

(b) Direct connection between two carriers. Under these circumstances there was no duty upon the initial carrier to route the shipments over a route embracing the line of a intervening carrier, even though such a route would make a lower combination. Clark Equipment Co. v. C. B. & Q. R. R., 98 I. C. C. 465, 466.

(c) Complainant attacked combination rate charged on 16 cars of scrap iron between March 14 and May 28, 1923, from Thirty Seventh St. station, New York, to Bethlehem, Pa., as unreasonable, discriminatory and prejudicial. Routed Pennsylvania-Lehigh Valley no junction being designated. Delivered to L. V. at Metuchen, N. J., distance 101 miles, charged $2.65 to Metuchen and $1.89 beyond. When the shipments moved there was in effect over the Pennsylvania to Phillipsburg, N. J., and L. V., beyond a combination of $4.16. No similar shipments have ever moved from 37th St. to Bethlehem. There is no indication of any future movement. HELD: Shipments misrouted, reparation awarded. Rudolph & Co. v. P. R. R., 101 I. C. C. 111.

(d) Further contention that routing in bill of lading was impossible of execution because incomplete, initial carrier not being named; that it was therefore the duty of carrier to forward shipments over the cheapest available route; and that as he did not do so he must now protect lower rate, not sustained, following Stebbins, 42 I. C. C. 150, and Unit Stove & Furnace Co., I. C. C. 543. Moreover, movement over cheaper route would have required the service of an intermediate carrier not specified in routing instructions and would have excluded one of the carriers so named from participating in the movement. California Packing Corp. v. Director General, 96 I. C. C. 239, 240, 242.

(e) Upon contention by defendants that they are not liable for misrouting because their agents either did not know, or could not by exercise of reasonable care and diligence learn, of existence of cheaper rates and routes sought, and that

routes and rates assailed were established several years prior to movement, pursuant to commission's findings in 39 I. C. C. 94, and were those customarily applied on this traffic, HELD: Defendants' agents were by law charged with knowledge of the rates sought on the dates of shipment as well as subsequent to commission's decisions, for the combination rule was lawfully published and, until canceled, was binding. Moreover, Conf. Ruling 214 (g), to effect that there is a limit beyond which agent of carrier can not be reasonably expected to know as to terminal delivery and local rates at distant points and on lines of distant roads to or with which he has no specific joint through rates, was not intended to relieve carriers' agent of duty of exercising reasonable care and diligence in securing information that will insure correct routing of shipments. Crowell Lumber & Gr. Co. v. Director General, 96 I. C. C. 259, 261, 262.

(f) Exercising its administrative function, and applying conversely the Solum case, 247 U. S. 477, 488, and Conf. Ruling 91, wherein it is stated that a carrier is not guilty of misrouting where it sends an unrouted shipment by a more expensive route although a lower rate could have been secured over an unreasonably longer and more indirect route, a lower-rated Canadian differential route over which shipments could have moved in absence of intermediate routing instructions found not to have been an unreasonable one, and shipments found misrouted. Petertyl v. N. Y. N. H. & H., 102 I. C. C. 693, 695, 696.

§2a. Commission Service Orders.

(a) Commission's decision in 69 I. C. C. 90, to effect that where shippers failed to exercise their right of routing shipments same should be forwarded over the more expeditious route, even though in many instances longer routes are more expeditious because of passenger-train schedules, dealt with traffic moving wholly by express, but same principle is applicable on traffic moving in baggage or baggage and express service. Kirschbraun & Sons, Inc., v. G. N. Ry. Co., 100 I. C. C. 28, 38.

(b) Because of emergency existing at the time shipment moved, growing out of unfavorable labor conditions and shortage of fuel, the commission required by service order No. 22 that traffic should be forwarded to destination over routes most favorable without regard to routing made by shippers or carriers. Under the routing instructions given by complainant the shipment could not have been sent over the route traversed inasmuch as the Jersey Central does not connect with the Southern Railway and complainant did not specify routing between those carriers. In addition, the route traversed was in consonance with the requirements of the commission's order under authority of section 15 (4) of the act to meet emergencies such as existed at the time of this movement. Complainant concedes that the commission has no jurisdiction over damages resulting from delay, but contends that the damages here resulted from misrouting. There was no misrouting in this case. Lambertson Co. v. C. R. R. Co. of N. J., 100 I. C. C. 259, 260.

(c) Shipment of lumber from Picayune, Miss., to the Thirty-seventh Street Station of the Pennsylvania at New York, N. Y., was diverted under authority of commission's service order No. 1 to the Twenty-seventh Street Station of the Lehigh Valley. Delivering carrier endeavored unsuccessfully to notify consignor and finally shipment was sold for a sum insufficient to pay accrued charges. Contention of complainant that service order authorized only a change in route of movement to destination, resulting in misrouting, not sustained. At time of shipment there was an embargo on lumber destined to stations on the Pennsylvania east of Newark, N. J., and initial carrier erred in its acceptance. Under all circumstances the Twenty-seventh Street Station of the Lehigh Valley was the practical point of delivery and changes made must be regarded as of routing rather than of destination, the real difficulty arising from failure of complainant to receive notice of change. Shipment found not to have been misrouted. National Lumber Co. v. N. O. & N. E. R. R. Co. 100 I. C. C. 334.

§3. Conflict in Billing Between Rate and Route.

See Bills of Lading §9, §9 (3); Export Rates and Facilities II; Through Routes and Joint Rates III.

(a) Where a bill of lading contains an impossible of impracticable routing

it is the carrier's duty to call this fact to the attention of the shipper, or failing in this, to disregard the routing specified and forward the shipment over the cheapest available route. California Packing Corp. v. Director General, 96 I. C. C. 239, 240.

(b) Bills of lading specified both rate and route, but rate specified was not applicable over any route. Carriers named in routing instructions formed a complete route from origin to destination. Shipments were moved via a higher-rated route consistent with instructions but involving use of an additional carrier not named in routing. HELD: Shipments misrouted since carrier failed to forward via point of direct connection, without use of additional carrier, over which lowest rate applied consistent with routing instructions. Rand & Co. v. L. & N. W. R. R. Co., 91 I. C. C. 723.

(c) The obligation lawfully rests upon the carriers agent to refrain from executing a bill of lading which contains provisions that can not lawfully be complied with or provisions which are contradictory and therefore impossible of execution. Clark Lumber Co. v. A. B. & A. R. R. 102 I. C. C. 252, 254.

§4. Direct and Cheapest Available Route.

See Agency (d).

(a) Complainant attacked as misrouting lumber from Wilson Point, Conn., to Traverse City, Mich., between February and July 1921. The 20 cars were consigned to the same party notify complainant, routing specified in the bill of lading named the New Haven as originating and P. M., as delivering line. No intermediate routing was set out and shipment moved entire distance through the United States over standard routes, charged 58c sixth class until July 1, 1921 subsequently 58.5c. Under the routing specified in the bill of lading the shipments could have moved over a differential route, a large part of which passes through Canada and over which the sixth class rate of 56.5c and 57.5c. While the differential lines may be assumed to be 322 miles longer than the short line route, this circuity is only 33% greater than the standard line distance. The agent was not justified without additional authorization in routing all of the shipments by the route over which the higher rate applied simply because of the explicit directions to route the initial shipment in that manner. HELD, first car not misrouted, balance misrouted, reparation awarded. Petertyl v. N. Y. N. H. & H. R. R., 91 I. C. C. 699.

(bc) Complainant attacked combination commodity rates charged on three cars of compressed cotton from Magnolia, Ark., to Louisville, Ky., in May 1921 as illegal. Shipments were delivered to the L. & N. W., at Magnolia, with routing instructions via St. L. S. W., L. & N., delivered. Each bill of lading contained notations to the effect that the rate included cost of compression and was $1.155, which rate was not applicable over any route. Shipments moved to McNeil, Ark., over L. & N. W., St. L. & S. W. to East St. Louis, L. H. & St. L., to Louisville, and L. & N., beyond, charged $1.095 to East St. Louis and 44c beyond. Rate was $1.20 from Magnolia to Louisville over L. & N. W., and St. L. S. W., to Memphis, and L. & N., beyond. HELD, charges legally applicable but shipments misrouted in that they were not forwarded via Memphis, reparation awarded to basis of $1.20. Rand & Company v. L. & N. W. R. R., 91 I. C. C. 723.

(d) Complainant attacked combination commodity rates charged on one car of lubricating oil shipped in January 1920 from Okmulgee, Okla., to Cleveland, O., as inapplicable and unreasonable. Shipment originally routed by complainant via Frisco to East St. Louis, Big Four beyond, but routing was subsequently amended to show W. & L. E., as delivering line. Agent billed car in error to Pittsburg, Pa., from which point it was rebilled to Cleveland, movement via Frisco to Kansas City, C. G. W., to Chicago, B. & O., to Pittsburg thence B. & O., P. & L. E., or W. & L. E., to destination, charged 62c, rate to Cleveland plus rate from Pittsburgh to Cleveland. There were not any joint rates on lubricating oil to Cleveland. There was a rate of 22.5c applicable over route movement to East Dubuque, 22.5c proportional rate being. HELD, rate attacked inapplicable to extent it exceeded 45c, reparation awarded. Empire Refineries, Inc. v. Director General 92 I. C. C. 59.

(ef) Complainant attacked combination rate of $1.28 charged on a car of

oil well supplies shipped on June 1, 1921, from Jakehamon, Tex., to El Dorado, Ark., as unreasonable and unduly prejudicial to extent it exceeded 98c. Jakehamon is on the W. F. R. & Ft. W., 108.5 miles southwest of Fort Worth, Tex. El Dorado is on the M. P. and Rock Island, 114.7 miles southeast of Texarkana, Tex. The shipment was delivered to the initial railroad without routing instructions. It moved over that road to Dublin, Tex., thence Ft. W. & R. G. to Fort Worth, Tex., thence Rock Island 821.4 miles, charged $1.36. There was available a combination via Texarkana, of $1.28 made up of 74.5c to Texarkana and 53.5c beyond. Effective March 4, 1922, a joint commodity rate of 98c was published but not applicable via the first named road. There is no evidence to show that the rate applicable over route of movement was unreasonable. HELD: Shipment was misrouted, rate applicable via route shipment should have moved unreasonable to extent it exceeded $1.15, reparation awarded. Transcontinental Oil Co. v. C. R. I. & P. Ry., 95 I. C. C. 168.

(g) In the absence of routing by the shipper it is the duty of the agent of the carrier to forward shipments over the cheapest reasonable available route, and this duty attaches in turn to the agent of each succeeding carrier through to destination. But the duty is not an absolute one. In Conference rule 214 G the Commission admonished shippers to bear in mind that there is a limit beyond which an agent of a carrier would not reasonably be expected to know as to terminal delivery or local rates at distant points and on lines of distant roads to or with which he has no specific joint through rate. The Commission has said this ruling was not intended to relieve carrier's agents of the duty of exercising reasonable care and diligence in securing information that will insure the correct routing of shipments. Crowell Lumber & Grain Co. v. Director General, 96 I. C. C. 259, 261.

(h) Complainant attacked combination class rates applicable on a car of mining machinery shipped in August, 1919, from Yerington, Nev., to Salt Lake City as unreasonable. Shipments tendered unrouted and moved via Nevada Copper Belt to Wabuska, Nev., S. P. to Weso, Nev., and W. P. , applicable rate $1.725 composed of class A rates of 12.5c from Yerington to Wabuska, 83.5c to Weso, and 77.5c beyond. The lines of the S. P. from Wabuska to Ogden, Utah and O. S. L. beyond, formed a reasonable route. A commodity rate of 69c was applicable via this route from Hazen and this factor added to 12.5c and 26.5c to Hazen made a thru rate of $1.08 over this route. HELD: Shipment misrouted, reparation awarded to basis of $1.08. Bogue Supply Co. v. N. C. B. Ry, 96 I. C. C. 434.

(i) Complainant attacked combination commodity rate charged on canned corn shipped Sept. 29, 1922, from Sac City, Iowa, to Clarksville, Ark., as unjust and unreasonable. Shipment moved via C. & N. W. to Omaha, Nebr., and M. P. beyond, 728 miles. No routing was specified on bill of lading. Rate charged 20.5c to Omaha and 57.5c beyond. Rate of 67.5c was applicable via Carroll, Ia., C. G. W. to Omaha and M. P. to Clarksville, 10c to Carroll and 57.5c beyond. The distances over the two routes do not differ greatly, altho one includes two carriers and the other three. The route via Carroll while involving some circuity, can not be deemed an unreasonable one. HELD: Shipment misrouted, reparation awarded. Foster & Co. v. C. & N. W. Ry., 96 I. C. C. 589.

(j) In the absence of specific routing, it is the duty of the agent to send the shipment over the cheapest reasonable route. Foster & Co. v. C. & N. W. Ry., 96 I. C. C. 589, 590.

(k) Shipments were tendered unrouted and carrier forwarded via a route taking a combination rate higher than via another available route. HELD: Shipments misrouted. Grasselli Chemical Co. v. Director General, 91 I. C. C. 61.

(l) Misrouting found to result and reparation awarded where shipment was tendered to carrier unrouted and such carrier failed to forward it via cheapest available route. Refinite Co. v. Director General, 91 I. C. C. 563.

(m) A differential route through Canada, 322 miles, or 33 per cent greater than so-called standard route, found not unreasonable route. Petertyl v. N. Y., N. H. & H. R. R. Co., 91 I. C. C. 699, 700.

(n) Where various shipments destined

to same point are delivered to a carrier without routing instructions for one shipment only, carrier is guilty of misrouting if it fails to send unrouted shipments over another route over which a lower rate is applicable. Goodkind Bros., 21 I. C. C. 17, 18. Petertyl v. N. Y., N. H. & H. R. R. Co., 91 I. C. C. 699, 701.

(o) It is well settled that a shipper is entitled to have his shipments move over the cheapest route consistent with his routing instructions and the Commission has said it is the duty of the carrier to exercise reasonable care and diligence in securing information that will insure correct routing even though the shipments are destined to points on lines of distant roads with which it has no specific through rates. It does not appear that the agent made any effort to ascertain which was the cheapest route consistent with the routing instructions. Weldon Williams & Lick v. P. R. R., 101 I. C. C. 174, 175.

(p) Where bills of lading contain no routing instructions it is initial carrier's duty to forward shipment over cheapest reasonable available route. Conf. Ruling 214 C. Prairie Oil & Gas Co. v. A., T. & S. F., 92 I. C. C. 248, 249.

(q) Following principles annunciated in commission's order of April 26, 1918, In the Matter of Routing Shipments, where a carrier for its own convenience forwards shipments via an unnatural route, shipper is entitled to benefit of rates applicable over route by which shipment would ordinarily have been sent. Mason By-Products Co. v. Director General, 92 I. C. C. 646, 650.

(r) Shipment of sorghum seed from Kansas City to Montgomery, specifically routed by shipper "C. of G. at Birmingham, Ala." and shipment so moved. Combination rate based on Memphis assessed. Had shipment moved to Birmingham, thence over Southern Ry. to Mobile and back through Birmingham to destination lower combination would have applied. HELD: Notwithstanding that route through Mobile was not designated by shipper, it was duty of carrier under rule 5(b) of Tariff Circular 18-A to apply the Mobile rate which was applicable to and from Birmingham, the interchange point directly intermediate to base point upon which lowest combination made. Shipment found overcharged and reparation awarded. Schloss & Kahn Grocery Co. v. St. L.-S. F., 93 I. C. C. 67.

(s) Shipment delivered to carrier unrouted. Tariff provided two routes carrying proportionals, the higher applying "all-rail," the lower, "rail-lake-and-rail." Carriers forwarded shipment all-rail and assessed higher proportional. HELD: Misrouting resulted as carriers operated car-ferry routes over which lower "rail-lake-and-rail" proportional applied. A car-ferry route is an "all-rail" route, and expression "rail-lake-and-rail route" describes a rail-and-water break-bulk route. Such terms, however, were not so used in the tariff, no steamship line being named as a participating carrier, thus rendering the rail-lake-and-rail rate inapplicable over a break-bulk route. Expression "rail-lake-and-rail" merely distinguished car-ferry routes from those literally all-rail, and it was carriers' duty, in absence of instructions, to have forwarded over the lower-rated car-ferry route. Reparation awarded. Bergstrom Paper Co. v. Director General, 93 I. C. C. 591.

(t) Shipments of lumber from Falco, Ala., to Manitou Beach and Northville, Mich., found overcharged. While shipments moved via direct routes a lower rate, applicable under Rule 5(b) of Tariff Circular 18-A and unrestricted in its application, was contemporaneously in effect via a circuitous route. If carriers participating in tariff carrying lower rate desired to restrict its use over certain routes they should have done so by the use of proper tariff notations. A failure to do so left all routes open should shippers desire to use them. Reparation awarded. M'Gowin-Foshee Lbr. Co. v. A., F. & G., 95 I. C. C. 451.

(u) Shipments were specifically routed at solicitation of carrier's agent upon his assurance that lower rate applicable via another available route also applied via route of movement. However, a higher rate applied over route of movement. Upon allegation that complainant was coerced into prescribing the routing specified, and was deprived of its freedom of choice of routes, FOUND: Situation presented is essentially a misquotation of a rate by carrier's agent, which is an insufficient basis upon which to award reparation. See 202 U. S. 242 and other cited cases. Nor can it be held that shipments were misrouted, for had routing been left open or tariff routing and re-

strictions observed complainant would have been protected in the lowest applicable rate between the two termini. Philadelphia Quartz Co. v. Director General, 95 I. C. C. 593.

(v) Bills of lading did not specify routing. Shipments found misrouted due to failure of initial carrier to forward via cheapest available route. Rates applicable over both route of movement and route over which shipments should have moved found unreasonable. Reparation awarded against all participating carriers to basis of rate subsequently established over route shipments should have moved and additional reparation awarded against originating carrier for misrouting. Transcontinental Oil Co. v. C., R. I. & P., 95 I. C. C. 168; United Paperboard Co. v. C. R. R. Co. of N. J., 95 I. C. C. 680.

(w) Formal complaint as originally filed alleged unreasonableness on shipments of cull apples moving during Federal control. At the hearing complaint was amended to include an allegation of misrouting. Contention that because routing specified by shipper was disregarded in the interest of speed and efficiency, under the terms of General Order No. 1. of the director general, misrouting resulted and a lower rate applicable between point of origin and destination should be protected, not sustained. Rate assessed was the same as that applicable over route prescribed in routing instructions and complainant has not shown that it was damaged by the alleged misrouting. California Packing Corp. v. Director General, 96 I. C. C. 239.

(x) Further contention that routing in bill of lading was impossible of execution because incomplete, initial carrier not being named; that it was therefore the duty of carrier to forward shipments over the cheapest available route; and that as he did not do so he must now protect lower rate, not sustained, following Stebbins, 42 I. C. C. 150, and Unit Stove & Furnace Co., 87 I. C. C. 543. Moreover, movement over cheaper route would have required the service of an intermediate carrier not specified in routing instructions and would have excluded one of the carriers so named from participating in the movement. California Packing Corp. v. Director General, 96 I. C. C. 239, 240, 242.

(yz) In the absence of routing by shipper it is the duty of agent of the carrier to forward shipments over the cheapest available route, and this duty attaches in turn to the agent of each succeeding carrier through to destination. Intermediate carriers, moreover, have right to decline shipments until complete routing instructions are furnished by originating carrier, thus placing the responsibilty of routing upon that line. Crowell Lumber & Grain Co. v. Director General. 96 I. C. C. 259, 261.

(aa) Shipment of mining machinery from Yerington, Nev., to Salt Lake City, Utah, moving during Federal control, was tendered unrouted. Intermediate carrier, which forwarded shipment over higher of two available routes, held liable for misrouting. Reparation awarded. Bogue Supply Co. v. N. C. B. R. R. Co., 96 I. C. C. 434.

(bb) During Federal control, the director general customarily handled eastbound traffic in Nevada, via Western Pacific, but where lower rated reasonable routes existed unrouted shipments should have been handled by the lower rated routes. In the absence of specific routing, a shipper is entitled to protection of the lowest rate over a reasonable route. Bogue Supply Co. v. N. C. R. R. Co., 96 I. C. C. 434, 435.

(cc) Unrouted shipment of sweet potatoes from Quitman, Ga., to Tampa, Fla., was assessed distance rates applicable over defendant's line. Shipment found misrouted, complainant being entitled to lower combination basing on Jacksonville, and restricted to apply in absence of specific rates. Suddath v. A. C. L. R. R. Co., 96 I. C. C. 569.

(dd) Shipment of canned corn from Sac City, Iowa, to Clarksville, Ark., tendered unrouted and carrier forwarded via route taking a combination rate higher than via another available route. Under circumstances similar to those disclosed, the commission has uniformly found that, in the absence of specific routing, it is the duty of the carrier's agent to forward shipment over cheapest reasonable route. Conf. Ruling 214 (c) and cases there cited. HELD: Shipment misrouted and reparation awarded. Foster & Co. v. C. & N. W. Ry., 96 I. C. C. 589.

(ee) Complainant shipped 16 cars of stock cattle from Limon, Colo., to Atkinson, Neb., charged 58.5c, being combina-

tion on Lincoln, Neb., that combination on Omaha was 53c, and rate collected inapplicable and unreasonable to extent it exceeded 53c. Shipments originated on Rock Island and delivered to Northwestern at Lincoln. The cattle were unloaded for rest, feed and water at Fremont, Neb., and forwarded over the Northwestern to destination. Unless complainants designated the routing it was the duty of the Rock Island to route the shipment over the lowest rated route, that is, via Omaha. The Rock Island has no feed yards at Lincoln, and to avoid the absorption of the switching charge to the stockyards on the Burlington for feeding, the Rock Island immediately delivered the shipment to the Northwestern at that point, there still being time for the latter to reach its feed yards at Fremont within the statutory limit. HELD, shipment misrouted by Rock Island, reparation awarded. Omaha Chamber of Commerce v. C. R. I. & P. Ry. 102 I. C. C.103.

(eea) Shipment of stock cattle from Limon, Colo., to Atkinson, Nebr., stopped in transit for rest, feed, and water, moved over a route at a rate in excess of that which applied over another available route. FOUND: Shipment misrouted in that it was the duty of originating carrier to forward it over the lowest-rated route, in absence of specific proof or evidence that the higher-rated route was designated by shipper. Reparation awarded. Omaha Chamber of Commerce v. C., R. I. & P., 102 I. C. C. 103.

(eeb) Various shipments were tendered without intermediate routing, originating and delivering lines only being specified. When first shipment was received initial carrier requested instructions as to intermediate routing and consignor directed movement over standard route. Initial carrier, however, moved all shipments in accordance with instructions governing first car. HELD: Carrier was not justified in routing all shipments via higher-rated standard route simply because of explicit directions governing initial shipment. Those subsequent to first should have moved via cheapest route consistent with bill of lading instructions, which was a Canadian differential route and not an unreasonable one. Shipments, exclusive of first, found misrouted and reparation awarded. Former report, 91 I. C. C. 699, affirmed. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693.

(ff) In 91 I. C. C. 699, Commission found one car of locust lumber, shipped Dec. 4, 1921 from Wilson Point, Conn., to Traverse City, Mich., not misrouted but that 19 subsequent shipments to the same destination were misrouted. The 20 cars were delivered to the New Haven without complete routing instructions, in most instances only that road as the initial line and the P. M., as delivering line being specified. No intermediate routing was set out, and the agent of the New Haven sent them over the standard routes through the United States. The applicable rate over the routes traversed were 58c prior to July 1, 1921 and 58.5c thereafter. Under the routing specified in the bills of lading the shipments could have moved over a socalled differential route passing through Canada over which the applicable rate was 56.5c prior to that date and 57.5c thereafter. The differential route was about 322 miles, or 33% longer than the standard route. Under normal conditions this would mean a difference in time of a day, or possibly a little more. At the time of shipment traffic over the standard routes was congested. Complainant stated that service by the differential routes is quite satisfactory. Obviously the difference in the quality of service and in the nature and liabilities of the participating carriers is not as great where a differential route is optional as in that where a rail and water route is the alternative. In the latter situation marine insurance and the transfer of freight from car to vessel, among other things, must be taken into consideration. HELD, in the absence of tariff provision defendant was not justified in shifting the burden of specifying the routing upon the shipper in order to secure the benefit of the lowest available rate. HELD, original decision affirmed. Petertyl v. N. Y. N. H. & H. R. R. 102 I. C. C. 693.

(gg) In the absence of specific through routing by shipper, which carrier is willing to observe, it is the duty of the agent of the carrier to route shipment via the cheapest route known to him of the class designated by the shipper—that is, all rail, or rail and water—and via which he has rates which he can lawfully use. Petertyl v. N. Y. N. H. & H. R. R. 102 I. C. C. 693, 694.

(hh) In the absence of shipping in-

structions it is ordinarily the duty of the carrier to ship by the cheaper route. But the duty is not an absolute one. The obligation of the carrier is to deal justly with the shipper, not to consider only his interests and to disregard wholly its own and those of the general jublic. If, all things considered, it would be unreasonable to ship by the cheaper route, the carrier is not compelled to do so. The duty is upon the carrier to select the cheaper route only if other considerations are reasonably equal. Resort to the more expensive route may be justified. Petertyl v. N. Y. N. H. & H. R. R. 102 I. C. C. 693, 695.

(hha) Conference Ruling 214 (c) provides that in absence of specific through routing by shipper it is duty of carrier's agent to route shipments via cheapest route, that is, all-rail, or rail-and-water. Contention that words "that is, all-rail, or rail-and-water" were intended to be illustrative and not to define only two possible classes of route, not sustained. Natural meaning attached to wording of ruling indicates that it was intended to state explicitly the kinds of classes embraced therein. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693, 694, 695.

(hhb) Exercising its administrative function, and applying conversely the Solum case, 247 U. S. 477, 488, and Conf. Ruling 91, wherein it is stated that a carrier is not guilty of misrouting where it sends an unrouted shipment by a more expensive route although a lower rate could have been secured over an unreasonably longer and more indirect route, a lower-rated Canadian differential route over which shipments could have moved in absence of intermediate routing instructions found not to have been an unreasonable one, and shipments found misrouted. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693, 695, 696.

(ii) When the direct route is not available shippers should not be debarred from reasonable rates over the accessible route. Orford Soap Co. v. B. & M. R. R. 107 I. C. C. 338.

(jj) Complainant attacked combination rate charged on a car of lumber Oct. 31, 1918 from Westwood, Calif., to Pensacola, Fla., as illegal. Shipment moved S. P., U. P., and Wabash to East St. Louis, thence L. &. N., to Atmore, Ala., and was delivered to the G. F. & A. charged 97.5c. At the time of movement there was in effect a rate of 57c from Westwood to New Orleans, 17.5c from New Orleans to Atmore, and 6.5c beyond. Although the shipment did not move to New Orleans, under rule 5b of tariff circular 18A the lowest combination based on New Orleans was applicable. The tariff publishing the rate to St. Louis provided that the through rate would be determined by adding 5c to the combination of rates in effect on June 24, 1918. The applicable rate over the route of movement was therefore, 76c, 52c to New Orleans 14c from New Orleans to Atmore 5c beyond, plus 5c under the combination rule. HELD, applicable rate was 76c, reparation awarded. Red River Lumber Co. v. Director General 107 I. C. C. 671.

(kk) Commission's decision in 69 I. C. C. 90, to effect that where shippers failed to exercise their right of routing shipments same should be forwarded over the most expeditious route, even though in many instances longer routes are more expeditious because of passenger-train schedules, dealt with traffic moving wholly by express, but same principle is applicable on traffic moving in baggage or baggage and express service. Kirschbraun & Sons, Inc., v. G. N. Ry. Co., 100 I. C. C. 28, 38.

(ll) Charges assessed on milk and cream in 10 gallon cans, for single-line haul in baggage service from points in Iowa, to Omaha, Nebr., via circuitous routes and reasonable maximum rates, constructed upon basis of specific joint-line distance scales, with the addition of drayage charges where drayage is necessary in order to transfer shipments between separate passenger depots of connecting rail carriers, prescribed for future. Kirschbraun & Sons, Inc., v. G. N. Ry. Co., 100 I. C. C. 28, 40.

(mmnn) Complainant alleged that a car of potatoes shipped Oct. 3, 1921 from Almora, Minn., to Tinley Park, Ill., was misrouted and rate sought to be collected unreasonable. Shipment was tendered to agent of the Soo Line at Almora Oct. 3, 1921 and was consigned to complainants order at Tinley Park. Instructions to hold the car at Burr Oak yard, Blue Island, Ill., were written on the bill of lading. The agent of the Soo line routed the car "Soo Chicago and C. R. I. P. Ry." and inserted that routing in the bill of lading. The car moved over that route and charged 44c, applicable Soo Line to Minneapolis,

Minn., Rock Island beyond, and subsequently bill for undercharges was sent complainant on basis of 54c. Burr Oak Yard is 7.8 miles east of Tinley Park on the Rock Island and had the shipment been routed over the Soo Line to Minneapolis thence Rock Island it would have been necessary to transport the car 7.8 miles beyond Tinley Park to Burr Oak yard for inspection and back haul car 7.8 miles to Tinley Park or to disregard the shippers instructions for inspection at Burr Oak yard. The rate of 44c was not applicable in connection with such a back haul movement. Burr Oak yard is directly intermediate between Almora and Tinley Park over the route of movement. Shipment not misrouted. Applicable rate over route of movement was 50c, made up of 21c to Minneapolis and 29c beyond. HELD, shipment not misrouted, carrier should collect undercharges, rate of 50c not unreasonable, complaint dismissed. Thoeming & Co. v. M. St. P. & S. S. Ry. 107 I. C. C. 658.

(oo) Complainant attacked combination rate charged on a car of bulk corn Jan. 23, 1923 from Spirit Lake, Ia. to Bloomington, Ill., reconsigned to Buffalo, N. Y. Complainant gave no routing instructions to Bloomington, the original destination. Defendant routed the car over its line to LaSalle, Ill., and I. C., beyond, no joint rate being applicable, charged 21c to LaSalle, and 11c beyond. The rate finally charged to Black Rock was 21c to LaSalle and 29.5c beyond. The rate from Spirit Lake to Bloomington through Peoria was 30.5c constructed 21c to Peoria and 9.5c L. E. & W., beyond. The through rate from Spirit Lake to Black Rock through Peoria was 40c, constructed 20.5c to Peoria and 19.5c beyond. If defendant had routed this shipment through Peoria, complainant would have been entitled not only to the lower rate effective over that route to Peoria but to the lower rate to Black Rock as well. The fact that it could not foresee the further transportation from Bloomington to Black Rock can not deprive complainant of all the incidents of transportation and charge effective over the route the shipment should have moved. HELD, shipment misrouted, reparation awarded. Bloomington Asso. of Commerce v. C. R. I. & P. Ry., 109 I. C. C. 191.

(pp) Complainant attacked as illegal rate charged on a car of berries from Sumner, Wash., to Kansas City. Mo Shipment made July 18, 1923 consigned to complainant at Wichita, Kas., bill of lading being issued by the N. P., and bore routing instructions "stop at Hutchinson, Kas., for partial unloading. via Billings and Denver, Passenger train service." N. P., has no rails to Denver, Hutchinson or Wichita; and beyond Billings, Mont., the car was handled by express, the tariff containing no restrictions pertaining to routes from Denver to Hutchinson, Wichita or Kansas City and no route beyond Denver was indicated in the billing. From Denver the car was moved by express company over the main line of the Santa Fe to Hutchinson where, in accordance with billing instructions it was set out for partial unloading July 23, 1923 and was inspected and reiced, but no portion of the contents removed. On the same day the car was forwarded from Hutchinson and arrived at Wichita same day. The inspection of the contents of this car, early in the morning of July 23 at Hutchinson disclosed that berries were soft and moldy and unfit for sale in the Hutchinson and Wichita markets. Thereupon, instructions were telephoned to N. P., agent at Sumner July 23 to divert this car from Wichita to the same consignee, complainant, at Kansas City. These instructions were confirmed by the written order delivered to the Sumner agent at 2 P. M. Owing to the difference between Pacific time at Sumner and central time at Wichita 1:45 P. M. at Sumner corresponds with 3:45 P. M. at Wichita. These instructions, therefore, were given 1 hour, 50 miles after the car had arrived at Wichita. Later, on the same day at 6:30 P. M. the local express agent at Wichita was notified in writing to divert this car to Kansas City and, in accordance with these instructions, the car moved out of Wichita at 10:35 P. M. the same day, presumably arriving at Kansas City the next morning July 24 before 8 o'clock HELD, applicable rate was combination of $2.90 to Wichita and $1.56 beyond, overcharge should be refunded, complaint dismissed. Gwin White & Pierce v. N. P. Ry., 109 I. C. C. 756.

(qq) Complainant attacked combination rates on ties, carloads from Bealeton, brandy, Culpepper, Remington and Warrentown Va., to Canton, O., between October 5 and December 31, 1923 unreasonable, unduly prejudicial and in violation of section four. Ship-

ments moved Southern via Potomac yard Va., and connecting lines to Canton. The points of origin are from 17 to 47 miles from Orange, which is about 619 miles from Canton over C. & O., and Pennsylvania, HELD, shipment overcharged and misrouted, reparation awarded. Lafayette Lumber Co. v. S Ry., 112 I. C. C. 341.

ALL OTHER CITATIONS

Cotton & Cotton Linters to Louisiana and Texas Ports, 85 I C. C. 5; Mifflin-Hood Brick Co. v. Director General, as Agent, 88 I. C. C. 205; Cummings v. Director General, as Agent, 88 I. C. C. 429.

§4¼. Existence of Embargo.

See Embargoes.

(a) Complainant attacked rate of $3, commodity, charged on 65 cars of anthracite coal from Winton, Pa., to North Adams, Mass., in April 1920 as unreasonable. A rate of $2.40 was in effect from Winton to North Adams over the N. Y. O. & W., to Cornwall, N. Y., West Shore to Albany, N. Y., and B. & A., to North Adams. Complainant ascertained prior to the movement that this route was embargoed by the B. & A., and accordingly advised the shipper to tender the shipments with instructions to move them over another route, described on the bills of lading as "O. & W. B. & M". On April 13, 1920 complainant secured a permit from the N. Y. C., authorizing movement over the embargoed route. Shipments were tendered with routing as shown. Contemporaneously rates on anthracite of $2.70 with the D. & H., as originating carrier and $2.80 with the D. L. & W., as originating carrier, were in effect from Winton to Adams. The present rate is $3.28 via all routes. HELD, rates attacked unreasonable to extent they exceeded $2.60 per ton, reparation awarded. Weston Dodson & Co. v. N. Y. O. & W. Ry., 91 I. C. C. 659.

(b) Complainant attacked charges assessed on two cars of lumber shipped on August 30 and Sept. 1, 1920 from La Grange, Ga., to Philadelphia, Pa., as unjust and unreasonable. Shipments were delivered to A. B. & A. Bill of lading of August 30, shows destination as Philadelphia, Pa., Chester station, and that of Sept. 1, as Chester station, Philadelphia. The bill of lading for the former car designated routing via A. B. & A., Southern Pennsylvania delivery, which routing was inserted upon advice of the agent of the initial line. The latter car was routed A. B. & A., Southern by complainant. Chester is not a station within Philadelphia but is about 13 miles south of that city. The destinations as shown on the bills of lading were named upon the advice of the agent of the initial line, he being under the impression that due to certain embargoes, which are not definitely explained of record, shipments for Philadelphia should be so routed. The shipments were forwarded to Chester and subsequently reforwarded to Port Richmond, Philadelphia on the P. & R. Charged 63.5c rates to and from Chester. In the instant case it is obvious that the express intention of complainant was to have its traffic move to Philadelphia. It was due entirely to the advice furnished by the agent of the A. B. & A., that the erroneous and conflicting instructions were inserted in the bills of lading. HELD, shipments misrouted, reparation awarded. Clark Lumber Co. v. A. B. & A. R. R. 102 I. C. C. 252.

§4½. Interstate or Intrastate Route.

See Evidence §13 (6).

(ab) Complainant attacked commodity rates charged on a car of rye shipped on July 28, 1922, from Wegdahl, Minn., to Duluth, Minn., reconsigned to Superior, Wis., as misrouted. Shipment was tendered for transportation without routing instructions and should have been forwarded over the cheapest available route to Duluth. There were two routes available, one interstate over which the rate was 17.5c and the other intrastate over which rates of 14.5c applied in intrastate and 17.5c on interstate. HELD: Shipment misrouted and shipment should have been sent over the intrastate route to Duluth, the destination shown in the bill of lading at that time. This did not result in damage to complainant for had the shipment moved over the intrastate route to Duluth, upon being forwarded to Superior it would have become interstate in character and a rate equal to the one applicable over the route of movement would have applied. Complaint dismissed. Wegdahl Elevator Co. v. C. M. & St. P. Ry., 96 I. C. C. 87.

(c) Complainant formerly shipped intrastate shipments via joint-line interstate routes to obtain benefit of rates

lower than those applying intrastate. Carriers subsequently limited application of interstate tariff to interstate traffic. Upon complainant assailing rates charged on shipments moving intrastate via intrastate routes, HELD: Limitation is interstate tariff precluded its application to complainant's shipments. Moreover, the commission's jurisdiction over intrastate rates is prescribed by sections 3 and 13 of the act, and it has no authority under the law to pass upon the measure of such rates except as provided in those sections. Nebraska Cement Co. v. C. & N. W., 92 I. C. C. 457.

(d) Rates on bituminous coal over interstate routes from mines in the Linton and Clinton groups in Indiana to Marion, Kokomo, Elwood, Michigantown, and Warren, Ind., found not unreasonable as compared with lower rates over intrastate routes, which rates were subsequently increased to basis of the interstate rates, or as compared with rates from Illinois mines to Indiana destinations. Wright & Wimmer v. C., T. H. & S. E., 93 I. C. C. 183.

(e) Shipment from Wegdahl, Minn., to Duluth, Minn., reconsigned to Superior, Wis., tendered without routing instructions. Initial carrier forwarded shipment between intrastate points over an interstate route. FOUND: Inasmuch as at time of initial movement destination shown was an intrastate point, misrouting resulted due to failure of carrier to forward over a lower rated intrastate route. However, no damage to complainant resulted for had shipment so moved to Duluth, upon being forwarded to Superior it became interstate in character and rate equal to that charged applied. Wegdahl Elevator Co. v. C., M. & St. P., 96 I. C. C. 87.

(f) Combination rates assessed on crude clay from Langley, S. C., to Cartersville, Ga., found not unreasonable as compared with lower intrastate rates applicable on clay for substantially similar distances. Thompson, Weiman & Co. v. S. Ry., 102 I. C. C. 247.

§5. Lower Rate Via Competing Line or Route.

See Evidence §47; Reasonableness of Rates §27½.

(a) Complainant attacked combination commodity rates charged on 7 cars of soda ash shipped from Saltville, Va., to Rensselaer, N. Y., between Nov. 1919 and Jan. 17, 1920, as unjust and unreasonable to extent it exceeded 29c. Shipments were unrouted and moved via N. & W., via Kenova, W. Va., to Columbus, O., Pennsylvania lines to Cleveland, O., and N. Y. C., beyond, distance 1,119 miles, charged 23c to Buffalo and sixth class 17c beyond. Contemporaneously there was combination rates of 36c via N. & W., to Hagerstown and connecting lines beyond, shipments misrouted. The 29c rate on soda ash from Saltville to Albany was applicable on caustic soda, and also to Rensselaer, subsequently made effective on soda ash. HELD, rates attacked unreasonable via Hagerstown to extent it exceeded 29c, reparation awarded. Grasselli Chemical Co. v. Director General, 91 I. C. C. 61.

(b) Complainant attacked combination rate charged on one car of crude oil shipped from Lander, Wyo., to Ardmore, S. D., on July 12, 1918, as unjust and unreasonable. No routing specified by shipper, and shipment moved via C. & N. W., to Rin, Wyo., Burlington beyond, 468 miles, charged 26.5c to Orin and 27.5c beyond. There was a commodity rate of 6.5c via Northwestern to Casper, Wyo., 27.5c beyond via the Burlington, 469 miles. The shipment could have moved over this route, and it was defendants duty to forward it by the cheapest available route. HELD, shipment misrouted, reparation awarded to basis of 34c. Refinite Co. v. Director General 91 I. C. C. 563.

(c) At time of movement the carriers were operated under a unified and co-ordinated national control and not in competition. In view of this fact, the Commission has held in cases where different rates were in effect over two routes between the same points that if the routes are practically the same in length and subject to the same transportation conditions, it was unreasonable for the Director General to maintain a higher rate over one route than contemporaneously applied over the other. Philadelphia Quartz Co. v. Director General, 95 I. C. C. 593, 596.

(d) Even though there may have been during federal control two rates between the same points in the same direction applying over different routes, each comprising carriers under federal

control, that fact does not establish the unreasonableness of the higher of the two rates, and if, the shipment is routed by the shipper so as to be subject to the application of the higher rate, defendant can not be called upon to protect the lower rate. California Packing Corp. v. Director General, 96 I. C. C. 239, 243.

(e) Complainant attacked commodity rates charged on nine cars of soft coal from Pinnacle and Mount Harris, Colo., to Bradish, Dodge, Ewing, Newmans Grove, Raeville and Scribner, Neb., between Jan. 7 and Nov. 26, 1920, as in excess of those applicable and in violation of the fourth section. Pinnacle and Mount Harris are on the D. & S. L. in the Oak Hills district. Destinations are local to the C. & N. W. U. P. connects with the C. & N. W. at Albion and Norfolk, Nebr., and at Fremont. Shipments moved Salt Lake to Denver, U. P., to Fremont or Norfolk and Northwestern beyond. Joint commodity rates, applicable over the routes of movement were assessed. The tariff naming these rates also named joint commodity rates on the same traffic applicable over the Salt Lake to Denver and thence U. P. to Albion, Norfolk and Fremont and the application of the combination rule to the rates to and from Albion or Fremont named in the tariffs produces lower through rates than those charged. The Salt Lake received shipments without routing instructions from the shipper. It issued the bills of lading which specified CNW delivery or UP-CNW but no rates or junction points. The Salt Lake delivered all of the shipments to U. P. at Denver. The lowest rates on those to Dodge and Scribner applied in connection with the Burlington and not with the U. P. The shipments to Bradish, Ewing and Newmans Grove and Raeville were properly delivered to the U. P., because the route beyond in connection with that line afforded the lowest rates thereon, but it failed to forward them through the junction point via which such rates applied. It had a right to decline to accept these shipments until complete routing instructions were furnished by the Salt Lake and thus place the responsibility of routing upon that line. HELD: Shipments misrouted; Director General liable for the misrouting of the shipments to Dodge, Ewing and Scribner prior to Mar. 1, 1920: Salt Lake liable for misrouting to Scribner; U. P. liable for misrouting to Bradish, Ewing, Newmans Grove and Raeville, reparation awarded. Crowell Lumber & Grain Co. v. Director General, 96 I. C. C. 259.

(f) Complainant attacked sixth class rate of 83.5c charged on a car of sweet potatoes, in sacks, August 9, 1922, from Quitman, Ga., to Tampa, Fla., as unjust, unreasonable, unjustly discriminatory and in excess of aggregate of intermediates. Shipment moved via A. C. L. Rate charged applicable 311 miles via Live Oak, Fla. Distance via Jacksonville, 397 miles. Rate applicable via Jacksonville 18.5c to that point and 21.5c beyond, HELD: Shipment misrouted, reparation awarded. Suddah v. A. C. L. R. R., 96 I. C. C. 569.

(g) Shipment of lubricating oil from Okmulgee, Okla., to Cleveland, Ohio, was specifically routed by shipper. Carrier's agent at point of origin erroneously billed car to Pittsburgh, from which point it was subsequently rebilled to Cleveland. Rate from Okmulgee to Cleveland plus rate from Pittsburgh to same destination assessed found inapplicable to extent it exceeded lower rate applicable via route of movement to East Dubuque, Ill., and a proportional beyond, since tariff naming proportional factor contained no restriction against movement via Pittsburgh. Reparation awarded. Empire Refineries v. Director General, 92 I. C. C. 59.

(h) Rate on shipment moving via route specified by shipper found not unreasonable or otherwise unlawful as compared with lower rate applicable over another and shorter route. Shipper could have had benefit of lower rate by routing over cheaper route, and no necessity is shown for establishment of the lower rate over the circuitous route of movement. Crabbs, Reynolds, Taylor Co. v. B. & O., 92 I. C. C. 621.

(i) Lumber from Demopolis, Ala., to Louisville, recognized to Bluefield, W. Va., moved under combination rates. Over another practicable route beyond Louisville a lower combination applied to Roanoke, Va., and under rule 5 (b) of Tariff Circular 18-A such lower rate was available to Bluefield. HELD: Shipment misrouted in that it was not forwarded from Louisville over lower-rated route. Reparation awarded. Standard Lbr. Co. v. Director General, 93 I. C. C. 58.

(j) A lower rate over a route other

than route of movement does not constitute a violation of the long-and-short-haul provision of section 4 of the act. Wagner Motor Co. v. M. C. R. R., 93 I. C. C. 195, 196.

(k) Shipment delivered to carrier unrouted. Tariff provided two routes carrying proportionals, the higher applying "all-rail," the lower "rail-lake-and-rail." Carriers forwarded shipment all-rail and assessed higher proportional. HELD: Misrouting resulted as carriers operated car-ferry routes over which lower "rail-lake-and-rail" proportional applied. A car-ferry route is an "all-rail" route, and expression "rail-lake-and-rail route" describes a rail-and-water break-bulk route. Such terms, however, were not so used in tariff, no steamship line being named as a participating carrier, thus rendering rail-lake-and-rail rate inapplicable over a break-bulk route. Expression "rail-lake-and rail" merely distinguished car-ferry routes from those literally all-rail, and it was carrier's duty, in absence of instructions, to have forwarded over lower-rated car-ferry route. Reparation awarded. Bergstrom Paper Co. v. Director General, 93 I. C. C. 591.

(l) Rate applicable on gasoline and kerosene, in tank-car loads, from Tulsa, Okla., to Clayton, N. Mex., via Pueblo, found unreasonable to extent they exceeded lower rates contemporaneously in effect via routes other than route of movement. Reparation awarded. Texas Co. v. A., T. & S. F., 93 I. C. C. 691.

(m) Applicable rate on shipments forwarded via route designated by shipper found not unreasonable as compared with lower rate contemporaneously in effect via other routes. The existence of a lower rate over other routes does not of itself warrant a condemnation of the rate charged. Carriers forwarded shipments over route specified by consignor as it was their duty to do, and had consignor not routed shipments, or designated one of the routes over which the lower rate applied, damage alleged would have been avoided. Goodrich Bros. Hay & Grain Co. v. C., C., C. & St. L., 95 I. C. C. 5.

(n) Rate on sweet potatoes from Dardanelle, Ark., to Spokane, Wash., found unreasonable to extent it exceeded the contemporaneous Group E commodity rate applicable over another route, and subsequently established via route of movement. Reparation awarded. Ft. Smith Commission Co. v. Director General, 95 I. C. C. 149.

(o) Shipments moved as routed by shipper. Contemporaneously lower rate applied via another route, which lower rate carriers subsequently established via route of movement. HELD: Existence of lower rate over other routes and the subsequent reduction to that basis of the rate over a particular route of movement are not sufficient to establish unreasonableness of the previous rate. National Supply Co. v. N. Y. C., 95 I. C. C. 461.

(p) Combination rate on silicate of soda during Federal control, from Livny, Calif., to Los Angeles, Calif., via Fresno, found unreasonable to extent it exceeded lower rate contemporaneously in effect via a longer distant route through Stockton. Following American Agricultural Chemical Co., 66 I. C. C. 650, shipments moved at time when carriers were operated under a unified and coordinated national control and not in competition and it was unreasonable for the director general to maintain a higher rate over one route than contemporaneously applied over another where such routes were practically same in length and subject to same transportation conditions. Reparation awarded. Philadelphia Quartz Co. v. Director General, 95 I. C. C. 593.

(q) Shipments of cement moved from Richard City, Tenn., to Normal, Tenn., via an interstate route through Memphis. Shipments should have moved via another available route through Stevenson, Ala., over which latter route Normal is intermediate to Memphis. FOUND: While the normal route is through Memphis the route through Stevenson was actually open and its use in the tariff unrestricted. The maintenance, therefore, of a higher rate thereover to Normal than to Memphis was in violation of the long-and-short-haul provision of section 4 of the act. Dixie Portland Cement Co. v. N., C. & St. L., 96 I. C. C. 47.

(r) Shipment from Chester, Pa., to Tulsa, Okla., originally routed via rail to Philadelphia, and water and rail beyond was diverted at Philadelphia, upon shipper's request, to all-rail route, and upon arrival at Tulsa, was diverted to Wynona, Okla. Charges collected found inapplicable to extent they exceeded a lower combination, plus diversion charges, from Chester, Pa., via St. Louis, to Wynona, although factor of rate found applicable was restricted to shipments "consigned

through" from Chester to Wynona "via all-rail routes." Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(s) Rate on coal from Ohio mines to Huntington, Ind., moving over the Erie, found not to have been unreasonable, unjustly discriminatory, or unduly prejudicial as compared with lower rate contemporaneously in effect over the Wabash. Complainant received coal from Ohio over either road but when it arrived over the Wabash and was delivered to team track of Erie, a switching charge was assessed, therefore complainant could not profitably take advantage of the lower rate. During the period of movement the Wabash rate was increased to equal the Erie rate. Bash & Co. v. B. & O., 96 I. C. C. 178, 182.

(t) Rate on coal from mines in Kentucky to Wabash, Ind., via route of movement, found not to have been unreasonable, unjustly discriminatory, or unduly prejudicial as compared with lower rate via another route, which was longer. The rates over the two routes have always been the same, except that during the period for which reparation is sought a lower rate over the longer route was erroneously published. This error was subsequently corrected, raising the rate over the longer route to the level of the rate over the route of movement. Bash & Co. v. B. &. O., 96 I. C. C. 178, 184.

(u) Shipment of canned corn from Sac City, Iowa, to Clarksville, Ark., tendered unrouted and carrier forwarded via route taking combination rate higher than via another available route. Under circumstances similar to those disclosed, the commission has uniformly found that, in the absence of specific routing, it is the duty of the carrier's agent to forward shipment over cheapest reasonable route. Conf. Ruling 214 (c) and cases there cited. HELD: Shipment misrouted and reparation awarded. Foster & Co. v. C. & N. W. Ry., 96 I. C. C. 589.

(v) Two carloads of tankage shipped from Chemical, Ill., to Montgomery, Ala., moved over a route at a rate in excess of that which applied over another route. Consignor did not designate any specific route and agent of carrier had no knowledge of existing lower rate owing to fact that his files did not contain tariff carrying the second factor making up the lower combination. HELD, shipments were not misrouted, as agent was justified under circumstances in routing them via one of the recognized gateways through which the rates were made the same. See 19 I. C. C. 448. Alabama Chemical Co. v. Illinois Traction, Inc., 98 I. C. C. 451.

(w) Contention that as there are no routing restrictions in the tariff, the joint rate from point of origin to final destination was applicable on a shipment reconsigned en route, even though it moved over a circuitous route, not sustained. Liberty Cooperage & Lbr. Co. v. C., I. & L. Ry. Co., 98 I. C. C. 461.

(x) Contention that where shipments were routed by the shippers without specifying the junction point, the routing was sufficient designation of a route over which the aggregates of the intermediate rates were lower than the joint rate not sustained Under the circumstances shown to have existed, there was no duty upon initial carrier to route the shipments over a route embracing the line of an intervening carrier, even though such a route would make a lower combination. See 73 I. C. C. 471. Clark Equipment Co. v. C., B. & Q. R. R. Co., 98 I. C. C. 465, 466.

(y) Complainants knowledge of the existence of lower rates over other routes can not deprive them of the right to reasonable rates over the routes of movement. Canton Bridge Co. v. B. & O. R. R. 107 I. C. C. 141, 144.

(z) Scrap iron from Thirty-seventh Street Station, New York, N. Y., to Bethlehem, Pa., routed by shipper "Pennsylvania-Lehigh Valley" without designating a junction point, moved over a route under combination rates higher than those which applied over another practicable route. FOUND: Shipments misrouted in that they were not forwarded over lower-rated route. Reparation awarded. Rudolph & Co. v. P. R. R., 101 I. C. C. 111.

(aa) Shipment of printing press from Paterson, N. J., to Fort Smith Ark., tendered as a carload shipment with routing directions, was forwarded via a route over which a rate applied higher than that over another available route identical with route of movement west of St. Louis, Mo. FOUND: Shipment misrouted in that agent at point of origin apparently made no effort to ascertain which was the cheapest route consistent with routing instructions, and in a haul such as here involved the

route over which lower rate applied may not be considered an unnatural route on account of distance or because including the lines of three additional carriers. Reparation awarded. Weldon, Williams & Lick v. E. R. R. Co., 101 I. C. C. 174.

(bb) Rate assessed on slack coal from Rock Springs, Wyo., to Cornish, Utah, and diverted in transit to McMillan, Idaho, found unreasonable as compared with lower rates in effect from Wyoming and Utah groups to Idaho points for substantially equal distances and to extent it exceeded a joint rate contemporaneously in effect from Rock Springs to McMillan, over another route which lower rate was subsequently made applicable over route of movement. Reparation awarded. Colony Coal Co. v. O. S. L., 101 I. C. C. 330.

(cc) Combination rates on mine-run coal from Coil and Sunset mine, Ky., to Bonne Terre, Rivermines, and Leadwood Mo., found unreasonable to extent they exceeded a joint rate subsequently established. Due to a miners' strike, carriers, in order to move traffic and relieve or avoid congestion, assured complainant that they would establish a joint rate if he would allow shipments to go forward. Complainant would not have permitted shipments to move prior to publication of the joint rate but for representations of carriers that it would get the benefit of that rate inasmuch as it could have availed itself of a lower combination rate via another route. Reparation awarded. St. Joseph Lead Co. v. L. & N., 101 I. C. C. 352.

(dd) Shipment of molasses moving from Morton, Miss., to New Orleans, thence reconsigned to Blytheville, Ark., found overcharged. A rate lower than that assessed, and unrestricted in its application, applied via another more direct route. There was nothing contained in tariff naming such lower rate which would have precluded complainant from routing its shipment through New Orleans had it been billed direct from Morton to Blytheville. Moreover, if it was defendants' purpose to restrict application of the lower rates to any particular route and the reconsigning privileges in connection therewith to any particular point, it should have been done by clear and unequivocal language. See 47 I. C. C. 59. Reparation awarded. Scott County Farm Bureau v. A. & V., 101 I. C. C. 357.

(ee) Rates on wet brewers' grain from Philadelphia to Newark found unreasonable to extent it exceeded lower rate subsequently established, which lower rate was contemporaneously in effect over another route and in the reverse direction over defendants' own route. Reparation awarded. Penn Grains & Feed Co. v. R. Co., 102 I. C. C. 100.

(ff) Shipment of pig iron from Thomas, Ala., to Iola Kans., reconsigned to Okmulgee, Okla., found overcharged. While route over which shipment moved is circuitous, the transporting carriers are shown as parties to tariff carrying the lower rate without restrictions as to routing. Refund of overcharge directed. United Iron Works v. M. P., 102 I. C. C. 107.

(gg) Rate charged on a shipment of apples moving from Brewster, Wash., to Fort Smith, Ark., found inapplicable. A lower rate contemporaneously applied via route considerably shorter than the route of movement but tariff in which it was published carried no restrictions as to routing. Such lower rate was, therefore, applicable via route of movement. See 47 I. C. C. 59. Reparation awarded. Browne-Hinton Wholesale Grocery Co. v. G. N., 102 I. C. C. 237.

(hh) Joint rate charged on lubricating oil moving from points in Texas to Dayton, Ohio, found not unreasonable or otherwise unlawful. Unreasonableness alleged is based on ground that it exceeded the aggregate of intermediates via a route other than route of movement, but shipments were neither routed via the lower-rated route nor is there any showing that they so moved. Complainant offered no evidence to show unreasonableness of the joint rate except to cite 18 I. C. C. 162, wherein the principle was laid down as to what constitutes a fair measure of reasonableness of a joint rate that exceeds the combination between the same points via the same route. Here, however, the principle that no presumption of unreasonableness attaches to a joint through rate applicable over a particular route because a lower combination applies over another route, governs. Refiners Oil Co. v. P. R. R., 102 I. C. C. 249.

(ii) Exercising its administrative function, and applying conversely the

Solum case, 247 U. S. 477, 488, and Conf. Ruling 91, wherein it is stated that a carrier is not guilty of misrouting where it sends an unrouted shipment by a more expensive route although a lower rate could have been secured over an unreasonably longer and more indirect route, a lower-rated Canadian differential route over which shipments could have been moved in absence of intermediate routing instructions found not to have been an unreasonable one, and shipments found misrouted. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693, 695, 696.

C. 94; Iroquois Pulp & Paper Co. v. G. & J. Ry. Co., 88 I. C. C. 255; Steuart, Son & Co. v. Director General. as Agent, 88 I. C. C. 469; Shafer Lbr. Co. v. Director General, as Agent, 88 I. C. C. 472; Bender Striebig & Co. v. I. C. R. R. Co., 88 I. C. C. 474; Early-Foster Co. v. A. T. & S. F. Ry. Co., 88 I. C. C. 507.

§5½. Particular Junction or Terminal.

See Junction Point Rates.

(a) Cars were specifically routed by shipper but no junction point specified. Failure of carrier to forward shipments in conformity with such instructions via junction point through which lowest rate applicable found to result in misrouting. Reparation awarded. Nestle's Food Co. v. Director General, as Agent, 89 I. C. C. 340, 341.

(b) Complainant alleged misrouting of car of coal shipped in January 1922 from Jewell, Va., to Minneapolis, Minn. Shipment was consigned to the Gust Johnson Lumber Co., destination on the bill of lading was Minneapolis and routing Minnesota Transfer. Instead of delivering it to the Minnesota Transfer Ry. at Minnesota Transfer defendant took it to its hold yard in south Minneapolis. The waybill did not show Minnesota Transfer. Notice of arrival was given by telephone to complainant, who directed delivery at Minnesota Transfer, and defendant billed the car back at distance rate of 10 miles of $1.08, plus a reconsignment charge of 7 dollars. The routing Minnesota Transfer indicated with sufficient clearness that delivery on the rails of the Minnesota Transfer Ry. was desired. HELD, shipment misrouted reparation awarded. Gust Johnson v. C. M. & St. P. Ry., 91 I. C. C. 561.

(c) Shippers must bear in mind that there is a limit beyond which an agent of a carrier could not reasonably be expected to know as to terminal delivery or local rates at distant points and on lines of distant roads to or with which he has no specific joint through rates. Consignors and consignees should co-operate with agents of carriers in avoiding misunderstandings and errors in routing and must expect to bear some responsibility in connection therewith. Alabama Chemical Co. v. Illinois Traction, 98 I. C. C. 451, 452.

(d) It would be an extension of defendants duty beyond reasonable limits to require it to be responsible for the failure of its agent to make inquiry as to whether a lower combination could be figured on some relatively obscure point beyond the gateways. Alabama Chemical Co. v. Illinois Traction, 98 I. C. C. 451, 452.

(e) Complainant attacked combination class rates of $1.36 charged on five cars of second-hand Army refrigerators shipped during June and July, 1923, from Wrightstown, N. J., to Sheffield, Ala., as unjust, unreasonable and in violation of the fourth section to extent it exceeded $1.22. Shipper routed them P. & A., Pemberton, P. S., Norfolk, N. S., Charlotte, Sou. Ry., 1,231 miles; but owing to admitted misrouting by the initial carrier the shipments were delivered by it to the Pennsylvania at Hightstown, N. J., instead of Pemberton, N. J. Charged combination fourth class of 14c to Pemberton plus $1.22 applicable over route of movement. Over the other route a combination rate of $1.315 applied, composed of fourth class rate of 9.5c to Lewistown, N. J., and fourth class of $1.22 beyond. HELD: Shipments misrouted, reparation awarded. Florence Chamber of Commerce v. N. S. R. R., 98 I. C. C. 594.

(f) Bill of lading showed "Minneapolis, Minn.," as destination and routing "Minnesota Transfer." Defendant, instead of delivering shipment to Minnesota Transfer Ry. at Minnesota Transfer, delivered it to its own hold yard in south Minneapolis. Complainant directed delivery at Minnesota Transfer upon tracks of Minnesota Tranfer Ry., which serves his place of business, and defendant billed

car back at applicable distance rate, plus reconsignment charge. HELD: As routing "Minnesota Transfer" indicated with sufficient clearness that delivery on rails of the Minnesota Tranfer Ry was desired, shipment found misrouted. Reparation awarded. Gust Johnson Lumber Co. v. C. M. & St. P. Ry. Co., 91 I. C. C. 561.

(g) Bills of lading specified originating and delivering lines but no intermediate routing. Shipments moved through United States over standard route, but could have moved over a lower-rated Canadian differential route. Upon receipt of first car initial carrier requested instructions as to intermediate routing and consignor directed movement over standard route. All shipments were moved in accordance with instructions governing first shipment. HELD: Carrier was not justified in routing all shipments via higher-rated route simply because of explicit directions as to initial shipment. Shipments subsequent to first should have been forwarded via cheapest reasonable route consistent with bill of lading instructions and differential route was not an unreasonable one. Shipments, exclusive of first, found misrouted and reparation awarded. Petertyl v. N. Y., N. H. & H. R. R. Co., 91 I. C. C. 699.

(h) Shipment of sorghum seed from Kansas City to Montgomery, specifically routed by shipper "C. of G. at Birmingham, Ala.," and shipment so moved. Combination rate based on Memphis assessed. Had shipment moved to Birmingham, thence over Southern Ry. to Mobile, and back through Birmingham to destination a lower combination would have applied. HELD; Notwithstanding that route through Mobile was not designated by shipper, it was duty of carrier under rule 5(b) of Tariff Circular 18-A to apply the Mobile rate, which was applicable to and from Birmingham, the interchange point directly intermediate to the base point upon which lowest combination made. Shipment found overcharged and reparation awarded. Schloss & Kahn Grocery Co. v. St. L.-S. F., 93 I. C. C. 67.

(i) Rates on shipments of coal from West Virginia mines to Gary and Michigan City, Ind., which were not specifically routed as to intermediate carriers but specified Michigan Central delivery, found not to have been unreasonable, unjustly discriminatory, or unduly prejudicial. During the period of movement no specific routing on shipments consigned for Michigan Central delivery was in force, but tariffs publishing lower rates on basis of which reparation is sought did not provide for Michigan Central delivery. Subsequent to period of movement the lower-rated route was made available for Michigan Central delivery. Bash & Co. v. B. & O., 96 I. C. C. 178, 182.

(j) Shipments of coal from Pinnacle and Mount Harris, Colo., destined to various points in Nebraska, were tendered unrouted. Bills of lading which specified "C-N-W delivery" or "UP-CNW" but specified neither rates nor junction points were issued by initial carrier who delivered all shipments to Union Pacific. Governing tariff provided two routes and published combination rule providing for construction of through rates to and from junction points. Shipments to Dodge and Scribner, Nebr., found misrouted by originating carrier and reparation awarded to basis of lower rates contemporaneously applicable over another available route. Shipments to Bradish, Ewing, Newman's Grove, and Raeville, found misrouted by intermediate carrier and reparation awarded because not forwarded through the junction point via which lowest rate applied. Crowell Lumber & Grain Co. v. Director General, 96 I. C. C. 259.

(k) Conf. Ruling 214 (g), to effect that there is a limit beyond which agent of carrier can not be reasonable expected to know as to terminal delivery and local rates at distant points and on lines of distant roads to or with which he has no specific joint through rates, was not intended to relieve carriers' agents of duty of exercising reasonable care and diligence in securing information that will insure correct routing of shipments. Crowell Lumber & Grain Co. v. Director General, 96 I. C. C. 259, 261.

(l) It would be an extension of carrier's duty beyond reasonable limits to require it to be responsible for failure of its agent to make inquiry as to whether a lower combination rate could be figured on some relatively obscure point beyond the recognized gateways in the absence of specific routing instructions from shipper and where the files of its agent do not contain tariff showing a lower rate than that existing over route of movement. See 19 I. C. C. 448 and Conf. Ruling 214 (g). Alabama Chemical Co. v. Illinois Traction, Inc., 98 I. C. C. 451, 452.

(m) Commission has repeatedly said that it is the duty of the carrier to exercise reasonable care and diligence in securing information that will insure correct routing even though the shipments are destined to points on lines of distant roads with which no specific through rates are maintained. Weldon Williams & Lich v. E. R. R. Co., 101 I. C. C. 174, 175.

(n) Shipments of lumber moving from La Grange, Ga., to Philadelphia, Pa., found misrouted. Originating carrier's agent gave erroneous and conflicting instructions to route shipments "Philadelphia, Pa., Chester Station," and "Chester Station, Philadelphia, Pa.," under impression that shipments for Philadelphia should be so routed. Such instructions were inserted in bills of lading by shipper, resulting in shipments moving to Chester and necessitating their reconsignment to Philadelphia. Reparation awarded. Clark Lbr. Co. v. A. B. & A., 102 I. C. C. 252.

(o) Shipment of bottle caps moving from New Orleans via Morgan Line to New York, thence rail via B. & O. to Highlandtown, Baltimore, found not misrouted. When delivered to the Morgan Line at New Orleans, shipping ticket contained no routing instructions but bill of lading issued by that carrier showed routing as "B&O." While the lower all water rate applied to and from New York in connection with the Clyde Line, the latter's terminal at Baltimore is not at Highlandtown, and delivery at that terminal would not have been in accordance with the bill of lading. Conf. Ruling 509. Crown Cork and Seal Co. v. S. P., 102 I. C. C. 331.

ALL OTHER CITATIONS

Early-Foster Co. v. A. T. & S. F. Ry. Co., 88 I. C. C. 507.

§6. Right of Carrier to Route or Restrict Routes.

See Long and Short Hauls §4 (3h); Restricted Rates.

(a) Rate on lemons from New York, N. Y., to Philadelphia, Pa., found not unreasonable as compared with lower rates contemporaneously in effect via routes other than route of movement. American Stores Co. v. P. R. R. Co., 89 I. C. C. 41.

(b) Existence of lower rates over routes other than a particular route of movement and subsequent reduction of the rate over the particular route are not sufficient to establish that the previous rate was unreasonable. American Stores Co. v. P. R. R. Co., 89 I. C. C. 41, 43.

(c) Desire of a carrier to get the long hauls on traffic does not warrant it in maintaining rates that are unreasonable or otherwise unlawful to particular consuming territories. A shipper is entitled to forward its products to any market over any route it selects at reasonable rates. United Verde Extension Mining Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 95, 100.

(d) Proposal to restrict joint rates on lumber from Pacific coast points to stations on Copper Range R. R. to shipments handled via C., M. & St. P. Ry. via McKeever, Mich., or delivered to that carrier at Missouri River gateways, found not justified. In justification respondents urge that Copper Ranger has divisional arrangements with the Milwaukee but none with the Duluth, South Shore & Atlantic, with which it connects at Houghton, Mich., and that the Copper Range receives a shorter haul frequently involving the participation of an additional carrier when traffic moves through Houghton. However, under proposed restriction, traffic to the Twin Cities could not be forwarded under joint rates to points on Copper Range because the Milwaukee would not receive shipments at Missouri gateways. Routing on Lumber 89 I. C. C. 351.

(e) Respondents proposed to restrict the routing in connection with commodity rates maintained on printing or book paper, carloads, from Kalamazoo, Mich., Plainwell, Otsego, and White Pigeon, Mich., to Freeport and other points in northern Illinois and Wisconsin. The proposed schedules would have the effect of increasing rates to Mount Morris, Ill., and other intermediate points. The short line distance from Kalamazoo to Rockford over the N. Y. C., to Chicago, thence I. C., is 241 miles. As the application of the 21.5c rate is unrestricted it also applies over the N. Y. C., to Chicago, C. & A., to Peoria and C. & N. W., beyond, 485 miles. Mount Morris is a local point on the Burlington 25 miles southeast of Freeport, intermediate between Kalamazoo and Freeport over the N. Y. C., to Chicago, Burlington to Forreston, Ill.,

thence I. C. The direct lines from Chicago to Freeport are the I. C., C. M. & St. P., and C. & N. W. In restricting to these lines the application of the commodity rate from Kalamazoo to Freeport the proposed routing restriction would eliminate the Burlington routing and thus result in the application of the sixth class rate 24.5c to Mount Morris. Upon the application of a commodity rate of 21.5c to Mount Morris over the Burlington the order of suspension will be vacated. Routing on paper from Michigan, 91 I. C. C. 452.

(f) Carriers are entitled to the protection of their long haul only when it is over a reasonably direct route. Hariss Irby & Vose v. B. S. L. & W. R. R., 92 I. C. C. 304, 305.

(g) In 81 I. C. C. 272, a proposed restriction by the G. N. of the routing of corn, in carloads, from defined territory in South Dakota, to Montana, Idaho, Washington and Oregon destinations was approved by the Commission. G. N. proposed to restrict to its corn lines beyond Aberdeen, S. D. the application of a 59c rate on corn from stations in South Dakota on C. M. & St. P. and C. & N. W. between Yankton and Aberdeen and west from Huron to the Missouri river and beyond as far as Belvidere on the former to the destination territory. These stations are in group F territory from which a 64c rate applies westbound with back haul via Minneapolis or St. Paul, Minn., and milling in transit thereat. The 59c rate from this limited territory was intended for direct movement through western gateways, and not via the Twin Cities. HELD: The publication for the G. N. of note 6 in the tariff not justified. Routing via North Dakota Junctions, 93 I. C. C. 411.

(h) If it had been the intention to restrict the routing provisions of the tariff so as to exclude the Midland Continental or other intermediate carriers, provision should have been made therefor in clear and unequivocal language. Routing via North Dakota Junctions, 93 I. C. C. 411, 414.

(i) Respondents proposed to cancel the route in connection with the Southern Ry. under the joint commodity rates on peaches, carloads, from Georgia and Alabama and Chattanooga, Tenn., on the C. of Ga., G. F. & A., and W. & T., to interstate destinations. Under the present tariffs like joint commodity rates to the respective eastern destinations are available over three routes beyond the Central's rails to Potomac yard, where eastern traffic is delivered to a connecting carrier. If the suspended schedules were allowed to become effective the joint commodity rates would no longer be applicable via Atlanta and Southern, leaving in effect the lowest combination rates, except from common points from which joint class rates would apply. The Southern desires to withdraw from the business unless the traffic is delivered to it in steady volume. HELD: Proposed schedules not justified. Peaches from Alabama, Georgia and Tennessee, 93 I. C. C. 534.

(j) A carrier is entitled to handle traffic originated by it over the route which will give it the long haul, provided that such route is reasonable and practicable. Goodrich Bros. Hay & Grain Co. v. C. C. C. & St. L. Ry., 95 I. C. C. 5, 6.

(k) The view has been long followed in tariff construction that if carriers participating in a tariff do not intend rates to apply over certain routes they must restrict their use by proper notation in the tariff. Failure to restrict routing leaves all routes open should shippers desire to use them. McGowin Foshee Lumber Co. v. A. F. & G. Ry., 95 I. C. C. 451, 452.

(l) Respondents proposed restrictions in the routing of cement from Kansas City and Sugar Creek, Mo., Superior, Neb., Bonner Springs and Sunflower, Kas., Ada Dewey, and Hartshorne, Okla., to destinations in Kansas and Oklahoma, causing increased rates. The rates on cement are based on 87 I. C. C. 451. There are specific rates, substantially higher than those under this scale, from the Kansas gas belt to destinations in Arkansas on the Frisco, between Rogers and Fort Smith. Since these Arkansas destinations are intermediate to Oklahoma destinations over existing routes from the Kansas gas belt, the adjustment reflects fourth section departures. The specific rates to the destinations in Arkansas are applicable only over designated routes via Monett, Mo., while those to destinations in Oklahoma are subject to no routing restrictions. By routing shipments from the Kansas gas belt to destination in Arkansas through Oklahoma junctions, via which the specific rates to the Arkansas destinations

do not apply, shippers are able to avail themselves of the lower rates to Oklahoma by virtue of the intermediate rule carried in the tariff naming the rates to Oklahoma. The proposed routing restrictions would eliminate existing fourth section departures in so far as routes over the Frisco are concerned. The same result could be accomplished by reducing the rates to destinations in Arkansas. Respondents offered nothing to justify the increased rates which would result from the proposed routing restrictions. It appears that they are under an erroneous impression that shippers ought not to be permitted to indulge in indirect routing in order to escape the payment of rates which respondents themselves impliedly concede can not be justified. HELD, suspended schedules not justified. Routing Cement, 98 I. C. C. 94.

(m) As a matter of sound policy under the law, a carrier is not justified in attempting to restrict its traffic to movement between points on its own line. Orange Chamber of Commerce v. A. & W. Ry., 98 I. C. C. 101, 108.

(n) The shippers and not the carriers possess the right to designate the routing of traffic. Divisions of joint rates and fares of M. & N. A. Ry., 98 I. C. C. 119, 141.

(o) C. B. & Q. R. R., respondent, proposed routing restrictions which would have the effect of rendering joint rates on grain from certain points in transcontinental groups F and G to destinations in California inapplicable via primary markets on the Missouri River, such as Omaha, Neb., and Sioux City, Iowa. In respect of traffic to California, practically all points in Nebraska except those in the northwestern portion of that state and in a narrow strip in close proximity to the Missouri river are in transcontinental group G. Those along the Missouri river are in group F and those in the northwestern portion appear not to be involved here. The rates on wheat and coarse grains, from these groups to California are 68 and 61c. The tariff in which the rates are published contains no routing instructions applicable to that portion of the transportation east of Ogden, Utah, or El Paso, Tex., and accordingly grain may be shipped from point in Nebraska west of the Missouri river to California via Omaha or Sioux City. The proposed routing restrictions would make the com-Commission has recognized that carriers souri river cities applicable on grain traffic handled via those cities from points in group G when the eastbound movement to those cities is over lines other than those of respondent, the resultant increases in rates varying from about 7.5c to 19.5c. In view of the failure to make the restriction applicable to items in which rates on grain products are published, apparently such products would not be affected thereby and grain could continue to move via all lines from Group G to the Missouri river cities, be there milled into grain products, and subsequently shipped to California as heretofore. Group G rates would continue to apply on grain originating on respondents line. There is commercial necessity for permitting grain produced in Group G to move eastward to the Missouri river cities before being shipped to California. Indeed, this necessity appears to extend to points more than 150 miles west of the Missouri river cities. Provided reasonable charges are assessed for the total transportation, the Commission is of the opinion that grain should be permitted to move from all of Group G via the Missouri river cities to California, and that carriers should not be permitted to increase their charges to an unreasonable basis which will prohibit, or nearly prohibit, that movement. HELD, schedules not justified but carriers should maintain joint through rates from Group G via the Missouri river cities to California upon a reasonable basis for the through transportation involved. No attempt will be made to fix reasonable charges for such movements, but compensation may be maintained for the out of line service either by assessing out of line charges based on the distances out of the direct line of movement, or a higher rate from Group G when the movement is through Group F. Grain to Pacific coast, 98 I. C. C. 158.

(p) Respondents proposed to make certain changes and restrictions in the routing of lumber originating on the Central of Georgia, or delivered to that carrier by certain short line connections, when destined to points in central, Buffalo-Pittsburgh, and eastern territories. The present routing permits certain movements of lumber from the Centrals

rails by means of which shippers avail themselves of reconsignment service accorded by intermediate carriers and ultimate destinations are reached at the published joint rates, the distribution from the reconsignment point extending trunk line and eastern territories. The proposed routing restrictions attempt to limit the available routes to more direct lines. The proposed schedules, in so far as they would apply to destinations covered by the eastern lumber tariff are faulty and admittedly in error in that they provide routing through Augusta by the Clinchfield route and via Cincinnati, which is obviously wasteful and unnecessary. They are also faulty in that the Clinchfield route would be closed to certain points intermediate to destinations within the belt to which that route would remain open, thereby continuing and creating departures from the long and short haul clause of the fourth section of the act. The Johnson City route is shorter than the N. & W., route and in some instances is shorter than the N. & W., route and in some instances shorter than the Clinchfield route. No reason appears why the Johnson City route should not remain open to the destinations to which it is proposed to keep open the Clinchfield and N. & W., routes. Indeed, considering that the Johnson City route is now open in connection with the Southern and that the Central and Southern participate in rates over these routes, it would seem that the failure of the Central to provide for this routing would make the tariff contradictory in its terms. HELD, schedules not justified, but carriers may publish tariffs in accordance with the suggestions contained herein. Restrictions in routing of lumber, 98 I. C. C. 529.

(q) Notwithstanding fact that an originating carrier misquoted a rate to a shipper, it is not obliged to turn shipment over to competing carriers at point of origin and forego a haul thereon. McLean Lumber Co., 22 I. C. C. 349. Newsom v. M. & O. R. R. Co., 91 I. C. C. 68, 70.

(r) Proposal to restrict routing in connection with commodity rates on printing or book paper from Kalamazoo, Plainwell, Otsego, and White Pigeon, Mich., to Freeport and other destinations in northern Illinois and Wisconsin, for purpose of precluding application of commodity rates via unreasonably circuitous routes not covered by divisional arrangements, found not justified. Commission has repeatedly condemned attempts to make application of rates dependent upon existence of division arrangements ,and, although elimination of circuitous routes is desirable from a transportation standpoint, resulting increased rates would be unreasonable and would result in undue prejudice to Michigan manufacturers and in undue preference of Wisconsin paper producers. Routing on Paper from Michigan, 91 I. C. C. 452.

(s) Proposed change in routing of traffic between Texas and southwestern territory and eastern and New England territories, by cancellation of all class and commodity rates applicable as proportionals from or to Port Arthur, Tex., and as joint rates in connection with rail lines, of Transmarine Corporation, a water carrier, and proposed substitution of Beaumont, Tex., for Port Arthur as a port of call for its vessels, found justified. Routing on through traffic will only be changed from "via Port Arthur" to "via Beaumont," and only change in rates will be cancellation of rates to or from Port Arthur, and substitution of increased rates to or from that point applicable via Beaumont, when in connection with Transmarine Corporation. Routing to and from Eastern and New England Territories, 91 I. C. C. 455.

(t) Proposed restriction of routing on grain and products originating upon lines of Missouri Pacific in Kansas and Nebraska and destined to Texas, so that one-factor rates south of Kansas City will not apply via Frisco, M. K. T., or Kansas City Southern, found justified. Commission has recognized that carriers may ordinarily insist upon long haul for traffic which they originate provided routes afforded by them are not unreasonably long. No undue prejudice or preference will result, for if proposed tariffs are permitted to become effective only routes of which Missouri Pacific is initial carrier will be available south of Kansas City. Grain from Western Trunk Line Points, 91 I. C. C. 632, 647.

(u) Proposed restriction of commodity rates on sash, in mixed carloads with common unglazed doors and millwork, from certain points in Iowa, Illinois and Wisconsin to trunk-line and New England territories, so as not to apply on common glazed sash, found not justified.

Glazed Sash to Trunk Line and New England Territories, 91 I. C. C. 731.

(v) Respondents proposed to restrict the application of joint rates in livestock, in carloads, between certain points in Utah, Idaho, Montana and Wyoming on the Union Pacific system on the one hand and points on and east of the Missouri river on the other, to certain routes. The joint rates affected by the suspension apply between points on respondents lines north of Ogden and west of Granger, also west of Salt Lake City and south of Payson, Utah, on the one hand, and Kansas City, St. Joseph, Omaha and the other Missouri river cities and points east thereof, on the other hand. There is practically no movement westbound. Respondent proposed to cancel the routing of livestock under those rates via Denver, Pullman, and Pueblo, Colo., and east of those gateways over the Santa Fe, the Burlington and Rock Island, and M. P., and thus confine it to the Union Pacific. The cancellation would not affect shipments to or from points between the Colorado gateways and the Missouri river. If the schedules under suspension are permitted to become effective there will be no increase in charges on shipments routed over respondents lines, but on livestock routed over other lines east of the Colorado gateways combination rates would apply and would result in an increase of from 25 to 40c per 100 pounds over the present rates. Respondents lines constitute the shortest routes between the points of origin and destination here considered and furnish the most expeditious service in transporting livestock between them. HELD: Proposed schedules not justified. Routing of Livestock, 100 I. C. C. 751.

(w) Proposal of M. & O. R. R. to restrict routing in connection with joint rates on lumber from certain points in Alabama and Mississippi to points on C. & O. Ry., designed for purpose of retaining to itself the long haul on this traffic, found not justified. Proposed restriction would restrict markets in which shippers might dispose of their products, and in many cases result in combinations where lumber is reconsigned from Louisville. Lumber from Alabama and Mississippi Points, 92 I. C. C. 156.

(x) Proposed cancellation of routing via M. & O. R. R., in connection with joint rates on lumber from points on Gulf, Mobile & Northern, and Jackson & Eastern to points on C. & O. Ry., found not justified. Only justification offered was that there is not enough revenue in the business to pay for handling, the M. & O. apparently being dissatisfied with divisions it receives out of joint rates. Lumber from Alabama and Mississippi Points, 92 I. C. C. 156.

(y) Proposal to restrict territory of origin in rules governing stop-off in transit of lumber westbound at Black Rock, Buffalo, and North Tonawanda, N. Y., while no similar restriction is proposed at Falconer and Jamestown, N. Y., and Cory, Pa., competing points, found not justified. Proposal is induced by fear of unsatisfactory divisional arrangements with connecting carriers, but this is not recognized as a sufficient justification for increased rates. Moreover, there is no warrant for extending to Buffalo, Black Rock, and North Tonawanda different treatment from that accorded Falconer, Jamestown, and Cory. Transit Privileges on Lumber at Buffalo. 92 I. C. C. 181.

(z) Shipments of corn from defined territory in South Dakota to western destinations, principally in the State of Washington, found overcharged. While it was intention of carriers to restrict routing provisions of tariffs carrying lower rates so as to exclude certain intermediate carriers embraced in route of movement, and to restrict routing via their own lines, they did not do so in clear and unequivocal language. Reparation awarded. Routing via North Dakota Junctions, 93 I. C. C. 411.

(aa) On further hearing of Intermediate Routing, 81 I. C. C. 272, restriction by Great Northern of routing of corn from defined territory in South Dakota over its own lines from Aberdeen, S. Dak., to Montana, Idaho, Washington, and Oregon destinations found not justified. The Great Northern does not originate the traffic and considerations for keeping open routes over the Midland Continental R. R. are shown by present record to be as persuasive as they were in 78 I. C. C. 328, wherein commission declined to sanction a proposal of the Northern Pacific to eliminate that line as an intermediate carrier from Group F points to destinations in Montana on the Great Northern's line. Routing via North Dakota Junctions, 93 I. C. C. 411.

(bb) If it is intention of carriers to restrict routing provisions of tariffs so as to exclude certain carriers, provi-

sion should be made therefor in clear and unequivocal language. See 74 I. C. 489, 490; 81 I. C. C. 725, 727. Routing via North Dakota Junction, 93 I. C. C. 411, 414.

(cc) Proposed elimination of Salt Lake & Utah R. R. as an intermediate participating carrier in routing of westbound transcontinental traffic, found not justified. Its elimination from through routes on traffic moving into Salt Lake City over the Union Pacific's lines will result in increased rates over that route to points on the Salt Lake & Utah. Moreover, various transit services would remain available to competing shippers served by the D. & R. G. under transcontinental rates, whereas shippers on the Salt Lake would be compelled to pay higher combinations. Respondent offered no justification for the resulting increases. Routing via Salt Lake & Utah R. R., 95 I. C. C. 237.

(dd) Shipments of cement moved from Richard City, Tenn., to Normal, Tenn.; via an interstate route through Memphis. Shipments could have moved via another available route through Stevenson, Ala., over which latter route Normal is intermediate to Memphis. FOUND: While the normal route is through Memphis the route through Stevenson was actually open and its use in the tariff unrestricted. The maintenance, therefor, of a higher rate thereover to Normal than Memphis was in violation of the long-and-short-haul provision of section 4 of the act. Dixie Portland Cement Co. v. N., C. & St. L., 96 I. C. C. 47.

(ee) Shipment from Chester, Pa., to Tulsa, Okla., originally routed via rail to Philadelphia, and water and rail beyond was diverted at Philadelphia, upon shipper's request, to all-rail route, and upon arrival at Tulsa, was diverted to Wynona, Okla. Charges collected found inapplicable to extent they exceeded a lower combination, plus diversion charges, from Chester, Pa., via St. Louis to Wynona, although factor of rate found applicable was restricted to shipments "consigned through" from Chester to Wynona, "via all-rail routes." Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(ff) Rates on shipments of coal from West Virginia mines to Gary and Michigan City, Ind., which were not specifically routed as to intermediate carriers but specified Michigan Central delivery found not to have been unreasonable, unjustly discriminatory, or unduly prejudicial. During the period of movement no specific routing on shipments consigned for Michigan Central delivery was in force, but tariffs publishing lower rates on basis of which reparation is sought did not provide for Michigan Central delivery. Subsequent to period of movement the lower-rated route was made available for Michigan Central delivery. Bash & Co. v. B. & O., 96 I. C. C. 178, 182.

(gg) Following principle announced in 83 I. C. C. 93, and 85 I. C. C. 40, proposed cancellation of proportional class rates applicable from Rock Island, Ill., and Davenport, Iowa, on shipments from points east of the Indiana-Illinois State line to interior Iowa destinations, which would effect increase in rates on class traffic moving over the Peoria route, found not justified. The existing proportional class rates for service west of the Mississippi River were established without any condition that the carrier applying them should first have a haul east of the river. Proportional Rates from Upper Mississippi Crossings, 96 I. C. C. 715.

(hh) Proposed restrictions in routing of cement from points within the Kansas gas belt and certain other points, to destinations in Oklahoma and Kansas which would result in increases in rates by elimination of routes through Arkansas, found not justified. While the proposed restrictions would eliminate existing fourth-section departures in so far as routes over the Frisco are concerned, the same result could be accomplished by reducing the rates to destinations in Arkansas, and respondents offered nothing to justify the increased rates which would result. Routing Cement Between Western Trunk Line Points, 98 I. C. C. 94.

(ii) Proposal to restrict the routing on grain from certain points in transcontinental Groups F and G to California destinations, the effect of which would be to cancel joint rates via primary markets on Missouri River, leaving in effect over such routes higher combination of rates from Group G. points via Missouri River cities when the eastbound movement to those cities is over lines other than those of respondent, and involving an out-of-line haul, found not justified. But this finding does not require respondent or other carriers similarly situated to continue to transport

such grain via Missouri River cities at rate applicable for direct movements, following 43 I. C. C. 90 and other cases cited. Grain to Pacific Coast, 98 I. C. C. 158.

(jj) Proposal to restrict routing on lumber from points served by Central of Georgia and certain short-line connections to destinations in central, Buffalo-Pittsburgh and eastern territories, designed to limit the available routes to more direct lines and eliminate routing over other intermediate carriers and other short hauling, found not justified. Proposed schedules are shown to be faulty and admittedly in error; they would continue and create departures from the long-and-short-haul clause of fourth section of the act, and elimination of the Johnson City route would make the tariffs contradictory in terms. Restriction in Routing of Lumber, 98 I. C. C. 529.

(kk) Proposal to restrict routing on lumber from points served by Central of Georgia and certain short-line connections to destinations in central Buffalo-Pittsburgh, and eastern territories, designed to limit available routes to more direct lines, eliminating routing over other intermediate carriers and other short hauling, found not justified. Proposed schedule would, among other things, limit destination territory via Kenova, W. Va. and Ohio River crossing which routes protestants desire kept open in order to retain the use of St. Paul, Va., as a reconsigning point. Since other reconsigning points are available under applicable rates, no good purpose would be served by keeping St. Paul available to such a wide territory as at present. It should, however, be kept available to all destinations within the belt, so as to obviate departures from the long-and-short-haul clause of the fourth section. Restriction in Routing of Lumber, 98 I. C. C. 529.

(ll) The Commission has repeatedly found that unreasonably high rates may not be maintained in order to control the routing of traffic. Arbogast & Bastian v. L. V. R .R. 107 I. C. C. 105, 108.

(mm) Proposed tariff changes in rates, fares, and charges over the Natchez route issued in connection with the discontinuance of the Mississippi Central's operations and trackage arrangements between Hattiesburg, Miss., and Mobile, Ala., found not justified in certain respects and justified in others. The record with respect to the rates on phosphate, fertilizers, and naval stores outbound from Mobile and petroleum inbound is insufficient to warrant specific treatment of these commodities. The Natchez route from Mobile over the G., M. & N. and the B. & H. S. will be available to shippers from or to Mobile and the conclusions herein will be without prejudice to any findings in future proceedings with respect to the measure of such rates. Cancellation of Rates and Routes via Mississippi Central, 100 I. C. C. 71, 78.

(nn) Proposed increased class rates from Virginia cities and points taking same rates, or rates made differentially higher, to destinations on the Charleston division of the Baltimore & Ohio found not justified. First class rate from Lynchburg to Grafton on the main line of the B. & O. is lower than the present first-class and the proposed rate, to points on the Charleston division, and, since no restrictions upon the routing are made in the tariff, this rate is applicable over the Charleston division. Following Zelnicker Supply Co., 80 I. C. C. 651, and Dixie Portland Cement Co., 96 I. C. C. 47, respondents contention that no increase in discrimination against intermediate points under the fourth section results because no arrangements for divisions are in effect over these routes to Grafton, and routing over this line would not be observed, can not be sustained. Class Rates from Eastern Points to Points in West Virginia, 100 I. C. C. 215.

(oo) Proposal of Union Pacific system to restrict routing in connection with joint rates on livestock originating on its lines in Utah, Wyoming, Idaho, and Montana destined to Missouri River and east thereof, designed for purpose of retaining to itself the long haul on this traffic, found not justified. Proposed restriction would result in shipments from some points on respondent's lines being permitted feeding-in-transit privileges at certain feeding lots located on lines other than those of respondent, while shippers of livestock originating in northern Utah and Idaho would be deprived of this privilege and compelled to pay higher rates unless shipments were routed over the Union Pacific. Undue preference of certain shippers and localities and undue prejudice against others would result. Routing of Livestock, 100 I. C. C. 751.

(pp) Proposed increased rate on brick and clay products from Nashville, Tenn., to Paducah, Ky., to the basis approved by the commission in Brick and Clay Products in the South, 88 I. C. C. 543, found justified except to the extent that the rate proposed on common brick exceeds a certain amount over the route specified via Hopkinsville, Ky. Schedules ordered canceled without prejudice to the filing of other schedules in which respondents may apply the rate herein found reasonable on common brick over the more circuitous routes between Paducah and Nashville. Brick from Nashville to Paducah, Ky., 101 I. C. C. 11.

(qq) Shipments of sugar from San Francisco to Leadville, Colo., moved as routed by shipper over a so-called "uneconomical and circuitous" route at a rate higher than that contemporaneously in effect over other more direct routes available, which lower rate was subsequently made applicable, over route of movement. Complainant admits its own error in specifying higher-rated route but charges initial carrier with negligence for failure to point out at time of shipment that higher rate applied over specified route. HELD: Alleged error was apparently attributable to complainant's own carelessness rather than to negligence of initial carrier and rates can not be condemned upon the mere fact that a lower rate was subsequently established over route of movement. Rate assailed found not unreasonable, unduly prejudicial or otherwise unlawful. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113.

(qqa) Proposed increased rates on poles (electric light, telephone, and telegraph), piling, and box and crate shooks, from Sand Point, Kootenai, and Culver, Idaho, to certain group points in California on the Western Pacific and Sacramento Northern Railroads found not justified. The proposed tariff carries no requirement of specific or complete routing, but contains an unequivocal routing provision to which carriers attempt to apply a restricted construction, to which the commission can not lend its approval. Forest Products to California and Nevada, 102 I. C. C. 224.

Transit Privileges on Transcontinental Grain, 85 I. C. C. 43; Bituminous Coal from Mines in Illinois, 85 I. C. C. 105; Rating on Empty Barrels, 85 I. C. C. 154; Routing of Lumber from A. T. & N. R R. Stations, 85 I. C. C. 527; Kneeland-Bigelow Co. v. Director General, as Agent, 85 I. C. C. 659.

§6½. Rail-and-Water Route.

See Rail-and-Water Rates.

(a) Complainant attacked as misrouting on a car of clay shipped Dec. 11 1918 from Langley, S. C., to Neenah, Wis., as unreasonable. Shipment delivered unrouted to Southern, and moved over that road to Cincinnati, O., Big Four to Coster, Ill., E. J. & E., to Leithton, Ill., Soo Line beyond, charged applicable rate of $6.70. Rates were based upon proportionals to and from Cincinnati, the higher of the two applying over all rail routes the lower rail lake and rail. P. M., and G. T., were participants in the tariff. Both operate car ferries across Lake Michigan, a rate of $6.30 being applicable over rail lake and rail routes. No steamship line was named as a participating carrier and accordingly the rail lake and rail rate could have had no application over a rail and water break bulk route. It appears that the expression "rail lake and rail" was used to describe the car ferry routes and to distinguish them from the routes which were literally "all rail." HELD, shipment misrouted, reparation awarded. Bergstrom Paper Co. v. Director General 93 I. C. C. 591.

(b) Shipment delivered to carrier unrouted. Tariff provided two routes carrying proportionals, the higher applying "all-rail," the lower "rail-lake-and-rail." Carriers forwarded shipment all-rail and assessed higher proportional. HELD: Misrouting resulted as carriers operated car-ferry routes over which lower "rail-lake-and-rail" proportional applied. A car-ferry route is an "all-rail" route, and expression "rail-lake-and-rail route" describes a rail-and-water break-bulk route. Such terms, however, were not so used in the tariff, no steamship line being named as a participating carrier, thus rendering the rail-lake-and-rail rate inapplicable over a break-bulk route. Expression "rail-lake-and-rail" merely distinguished car-ferry routes from those literally all-rail, and it was carriers' duty, in absence of instructions, to have forwarded over the lower-rated car-ferry route. Reparation awarded. Bergstrom Paper Co. v. Director General, 93 I. C. C. 591.

(c) Rate on two carload shipments of canned tomatoes from Berlin and Conowingo, Md., to Monroe, La., found to have been unreasonable to extent it exceeded rate contemporaneously applicable rail-water-and-rail routes other than route of movement. Waiver of undercharges authorized. Sugar Bros. Co., Ltd., v. P. R. R. Co., 98 I. C. C. 613.

§7. Shipper's Instructions.

See Bills of Lading §10; Through Routes and Joint Rates VI.

(a) Desire of a carrier to get the long hauls on traffic does not warrant it in maintaining rates that are unreasonable or otherwise unlawful to particular consuming territories. A shipper is entitled to forward its products to any market over any route it selects at reasonable rates. United Verde Extension Mining Co. v. A., T. & S. F. Ry. Co., 89 I. C. C. 95, 100.

(b) Cars were specifically routed by shipper but no junction point specified. Failure of carrier to forward shipments in conformity with such instructions via junction point through which lowest rate applied found to result in misrouting. Reparation awarded. Nestle's Food Co. v. Director General, as Agent, 89 I. C. C. 340, 341.

(c) Complainant attacked combination rate charged on a car of household goods shipped August 13, 1921 from Murphysboro, Ill., to Lanexa, Va., as unreasonable, unduly prejudicial and in violation of the fourth section. Defendant informed complainant rate was $1.625 applicable via M. & O., Southern and C. & O., and complainant specified that route and rate in the bill of lading and prepaid the freight. Shipment moved M. & O., to Corinth, Miss., Southern to Richmond, Va., and C. & O., beyond distance 1,099 miles and combination on Cairo of $1.985 applied. A rate of $1.63 applied over all routes in connection with the I. C., and C. & E. I., and effective Oct. 20, 1921, the M. & O., established this rate. If the shipment had been handled by the M. O., to East St. Louis, Ill., delivered there to the Southern the haul would have been 1,037 miles. HELD, rate of $1.985 applicable, not unreasonable, complaint dismissed. Mrs. Pattie Newsom v. M. & O. R. R., 91 I. C. C. 68.

(d) In 87 I. C. C. 31, the Commission found that 11 cars of crushed stone shipped from Dell Rapids, S. D., to Max, Iowa, and reconsigned to Sioux City, Iowa, were misrouted by defendant and awarded reparation. Shipments were refused by consignee at Max, and were reconsigned to Sioux City without routing restrictions. Defendant moved shipment from Max to destination over its line via Canton, S. D., 126 miles, and collect class E rate of 9c. A lower rate of $1.455 was applicable over a two line route of 70.7 miles, made up of to Sheldon over defendants line, 13.5 miles, 67.5c; Sheldon to Sioux City over Omaha line, 57.2 miles, $1.08, less 30c as authorized in Kellys I. C. C. U. S. 1. Clearly, if complainants had directed routing of the shipments over the two line route defendant could not have ignored lawfully such routing instructions under authority of the provisions of section 15. It may be that the Commission could not have required the establishment of this route if it had not existed, but as it did exist and was available to complainants, the provisions of the section quoted have no application here. HELD, original findings affirmed. L. G. Everist v. C. M. & St. P. Ry., 92 I. C. C. 473.

(e) Complainants are aware of the ruling that where a consignor specifies the routing that he desires his shipments to take by naming a carrier which, in connection with the originating line, form a through route from point of origin to destination, the initial carrier can not be charged with having misrouted the shipment if it bills it over that route instead of selecting a cheaper route in which those carriers participate but with a third carrier intervening. Wright & Wimmer v. C. T. H. & S. E. Ry., 93 I. C. C. 183, 184.

(f) Complainant attacked combination commodity rates charged on two cars of hard coal shipped August 13, 1920 from West Nanticoke, Pa., to Ingalls, Ind., as unjust, unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. Shipments moved as routed over Pennsylvania to Cleveland, O., and Big Four beyond, 698.3 miles, applicable rate $3.30 to Cleveland and $2.14 beyond. If the shipments had been delivered to the Pennsylvania unrouted they would have moved over that line to Anderson, Ind., and Big Four beyond, distance 653.9

miles, at joint rate of $4.30. Record shows that defendants forwarded the shipments over the route specified by the consignor as it was their duty to do. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Goodrich Bros. Hay & Grain Co. v. C. C. C. & St. L. Ry. 95 I. C. C. 5.

(g) Where a consignor specifies the routing that he desires his shipment to take by naming a carrier which, in connection with the originating line, forms a through route from point of origin to destination, the initial carrier can not be charged with having misrouted the shipment if it bills it over that route instead of selecting a cheaper route in which those carriers participate but with a third carrier intervening. California Packing Corp. v. Director General, 96 I. C. C. 239, 341.

(h) Relying on joint rate and route quoted by originating carrier's agent, complainant specified such rate and route in bill of lading, and prepaid charges. However, there was no joint rate in connection with originating line, and higher combination rate was applicable. Undercharges collected at destination. Route of movement was shortest route in connection with originating line, and applicable rate was lowest available rate via any route over which originating line could have received a haul. Notwithstanding fact that originating carrier misquoted rate to complainant, it was not obligated to turn shipment over to competing carrier at point of origin and forego a haul thereon. Newsom v. M. & O. R. R. Co., 91 I. C. C. 68.

(i) The right of a shipper under section 15 of the Act to designate the routing of his shipments is subject to such reasonable exceptions and regulations as the Commission shall from time to time prescribe. National Lumber Co. v. N. O. N. E. R. R., 100 I. C. C. 334, 335.

(j) Complainant attacked combination rate charged on a car of sugar shipped from San Fransisco to Leadville, Colo, on Jan. 13, 1922, as unjust, unreasonable and unduly prejudicial. Shipment was routed by complainant S. P. Co., U. P., C. & S., and moved S. P. to Ogden, Utah, thence U. P., via Borie, Wyo., to Denver, Colo., thence C. & S., distance 1,523 miles, charged $1.615 based on joint rate of 96c to Denver and 65.5c beyond. A rate of 96c was applicable from and to the points under consideration over S. P. to Ogden and D. & R. G. W. beyond, about 1293 miles. Complainant relieved defendants of their duty by routing the shipment. The exact reason, if there was any, for routing the shipment as shown in the bill of lading is not disclosed. Three years after the shipment moved, the rate of 96c was published via route shipment moved. HELD: Rate attacked not unreasonable, complaint dismissed. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113.

(k) Complainant elected to route the shipment; no duty rested upon it to specify any routing. Had the shipment been tendered without routing instructions the duty would have been imposed upon defendants to have forwarded it over the route over which the lowest rate applied. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113, 114.

(l) Complainant attacked combination class rates charged on a printing press shipped Feb. 21, 1923, from Paterson, N. J., to Fort Smith, Ark., as unreasonable and in violation of the fourth section. Official, southern and western classifications rate printing presses, carloads, fifth, sixth and class A, respectively, minimum 24,000 pounds. Shipment was tendered as a carload with routing directions C-O M. K. & T., at St. Louis, Ft. S. & W., at Crowder, Okla. It moved over the Erie to Ohio City, O., T., St. L. & W., to St. Louis, M. K. & T., to Crowder, and Ft. S. & W., beyond, charged fifth class 66c to St. Louis and class A 90.5c beyond. Over a route identical with the route of movement west of St. Louis and to that point composed of the Erie to Croxton, N. J., Pennsylvania in connection with the R. F. & P., to Richmond, Va., and C. & O. and B. & O. beyond, a combination of $1.26 applied composed of 31c to Richmond plus 95c to Fort Smith. There is no basis for the claim that the rate attacked violates the fourth section. The allegation of unreasonableness is in reality based solely on the contention that the shipment was misrouted in not having been forwarded by way of Richmond. The length of the route through Richmond exceeds that of the route of movement by only about 140 miles and in a haul such as here involved, aggregating in excess of 1,700 miles, the route over which the lower rate applied may not be considered an unnatural route on this account because including the

lines of three additional carriers. HELD: Shipment misrouted, reparation awarded. Weldon Williams & Lick v. P. R. R., 101 I. C. C. 174.

(m) Shipment of lubricating oil from Okmulgee, Okla., to Cleveland, Ohio, was specifically routed by shipper. Carrier's agent at point of origin erroneously billed the car to Pittsburgh, from which point it was subsequently rebilled to Cleveland. Rate from Okmulgee to Cleveland plus rate from Pittsburgh to same destination assessed found inapplicable to extent it exceeded lower rate applicable via route of movement to East Dubuque, Ill., and a proportional beyond, since tariff naming proportional factor contained no restriction against movement via Pittsburg. Reparation awarded. Empire Refineries v. Director General, 92 I. C. C. 59.

(n) Shipments were specifically routed by shipper, but carrier forwarded via a route over which lower rate applied. HELD: Shipments found misrouted but shipper not damaged thereby. Prairie Oil & Gas Co. v. A. T. & S. F., 92 I. C. C. 248, 249.

(o) Where bills of lading contain no routing instructions it is initial carrier's duty to forward shipments over cheapest reasonable available route. Conf. Ruling 214c. Prairie Oil & Gas Co. v. A., T. & S. F., 92 I. C. C. 248, 249.

(p) Shipments were refused by consignee at originally billed destination, whereupon they were reconsigned without routing instructions. Carrier moved shipments from reconsignment point, retaining to itself the entire haul, instead of forwarding via a shorter two-line route over which a lower rate applied. HELD: Had complainants directed routing over lower-rated route carrier could not lawfully have ignored such instructions, and having failed to indicate any routing it was carriers duty to forward over the cheaper route. Shipments found misrouted and reparation awarded. Original report, 87 I. C. C. 31, affirmed. Everist v. C., M. & St. P., 92 I. C. C. 473.

(q) Shipments were specifically routed at solicitation of carrier's agent upon his assurance that lower rate applicable via another available route also applied via route of movement. However, a higher rate applied over route of movement. Upon allegation that complainant was coerced into prescribing the routing specified and was deprived of its freedom of choice of routes, FOUND: Situation presented is essentially a misquotation of a rate by a carrier's agent, which is an insufficient basis upon which to award reparation. See 202 U. S. 242 and other cited cases. Nor can it be held that shipments were misrouted, for had routing been left open or tariff routing and restrictions observed, complainant would have been protected in the lowest applicable rate between the two termini. Philadelphia Quartz Co. V. Director General, 95 I. C. C. 593.

(r) Shipments of wrought-iron pipe from Leeray, Tex., to Bristow, Okla., reconsigned from Okemah, Okla., with specific instructions that routing beyond Fort Worth be in connection with the M-K-T through Crowder, Okla. Diversion requested could not be effected in one shipment which had passed point of interception before reconsignment orders received and that shipment moved via Frisco through Weleetke, Okla. Applicable rate on shipments routed via M-K-T found unreasonable and unduly prejudicial to extent it exceeded lower rate contemporaneously maintained via other lines for comparable distances in same general territory and rate in effect between origin and destination in opposite direction and subsequently established in both directions. Combination rate assessed on shipment routed via Frisco found not unreasonable or unduly prejudicial. Reparation awarded and collection of undercharges ordered waived. Sinclair Oil & Gas Co. v. C. & N. E. Ry., 96 I. C. C. 286.

(s) The shippers and not the carriers possess the right to designate the routing of traffic. The Missouri and North Arkansas denied that it even undertook to control routing in order that it might receive the most favorable division of joint rates, and there is no proof to the contrary. Divisions of Joint Rates and Fares of M. & N. A. Ry. Co., 98 I. C. C. 119, 141.

(t) Contention that where shipments were routed by the shippers without specifying the junction point, the routing was a sufficient designation of a route over which the aggregates of the intermediate rates were lower than the joint rate, not sustained. Clark Equipment Co., v. C. B. & Q. R. R. Co. 98 I. C. C. 465, 466.

(u) Shipments of secondhand refrigerators from Camp Dix (Wrightstown) N. J., to Sheffield, Ala., found to have

been misrouted in that routing instructions of shipper were not complied with. Reparation awarded. Florence Chamber of Commerce v. N. S. R. R. Co., 98 I. C. C. 594.

(v) Rate applicable on five carloads of second hand refrigerators over route specified by shipper from Camp Dix (Wrightstown), N. J. to Sheffield, Ala., found not unreasonable as compared with contemporaneous rates over other available routes from surrounding points to Sheffield. Florence Chamber of Commerce v. N. S. R. R. Co., 98 I. C. C. 594.

(w) By the route shipments of secondhand refrigerators from Camp Dix (Wrightstown), N. J., to Sheffield, Ala., actually moved, a car-ferry transfer from Cape Charles to Norfolk, Va., was necessary which in complainant's opinion is equivalent to a rail-and-water movement. This contention not sustained, Conf. Ruling 316, and in the absence of specific instructions for rail-and-water route defendants were only under the obligation to protect the rate applicable over route specified by shipper. Florence Chamber of Commerce v. N. S. R. R. Co., 98 I. C. C. 594, 595.

(x) Complainant alleged misrouting of a car of bottle caps, in Oct. 1923, from New Orleans to Highlandtown, Md., Highlandtown is on the B. & O., within Baltimore. Shipment delivered to the Morgan Line, a water carrier, from New Orleans to New York. Each load was accompanied with a shipping ticket showing the consignee as the Crown Cork & Seal Co., Highlandtown, Md., but containing no routing instructions. When the complete shipment had been delivered, defendants agent took up the receipted tickets and issued a bill of lading in lieu thereof signed by defendants agent and by representative of complainant. In this bill of lading the only routing shown was B. &. O. Shipment moved via Morgan Line to New York and B. & O., beyond, charged 79.5c to New York and 34c beyond. An all water rate of 79.5c was in effect to Baltimore via Morgan Line to New York and Clyde line beyond. The latters terminal at Baltimore is not Highlandtown, and delivery at that terminal would not have been in accordance with the bill of lading. HELD, shipment not misrouted, complaint dismissed. Crown Cork & Seal Co. v. S. P. Co., 102 I. C. C. 331.

(xa) Shipment of bottle caps moving from New Orleans via Morgan Line to New York, thence rail via B. & O. to Highlandtown, Baltimore, found not misrouted. When delivered to the Morgan Line at New Orleans shipping ticket contained no routing instructions but bill of lading issued by that carrier showed routing as "B. & O.." While a lower all-water rate applied to and from New York York in connection with the Clyde Line, the latter's terminal at Baltimore is not at Highlandtown, and delivery at that terminal would not have been in accordance with bill of lading. Conf. Ruling 509. Also another lower water-and-rail rate cited by complainant was shown not to apply from the Clyde's Line at Baltimore. Moreover, notation on bill of lading "B. & O." indicated that a line haul by that carrier was desired, and bill of lading signed by complainant's representative on its behalf is binding on the parties. See Unrep. Op. 2224; 52 I. C. C. 671, 681; 82 Fed. 681. Crown Cork & Seal Co. v. S. P. Co., 102 I. C. C. 331.

(y) The notation on a bill of lading B. & O., indicated that a line haul over the B. & O., was desired. Crown Cork & Seal Co. v. S. P. Co., 102 I. C. C. 331, 332.

(ya) Shipment found misrouted where no routing instructions were specified by shipper and a tariff check developed that shipment could have moved between origin and destination via a route taking a rate lower than that applicable via route of movement. Wimberly Grocery Co. v. P. R. R., 102 I. C. C. 637.

(yb) Various shipments were tendered without intermediate routing, originating and delivering lines only being specified. When first shipment was received initial carrier requested instructions as to intermediate routing and consignor directed movement over standard route. Initial carrier, however, moved all shipments in accordance with instructions governing first car. HELD: Carrier was not justified in routing all shipments via higher-rated standard route simply because of explicit directions governing initial shipment. Those subsequent to first should have moved via cheapest route consistent with bill of lading instructions, which was a Canadian differential route and not an unreasonable one. Shipments, exclusive of first, found misrouted and reparation

awarded. Former report, 91 I. C. C. 699, affirmed. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693.

(z) Shipment of sugar from San Francisco to Leadville, Colo., moved as routed by shipper over a so-called "uneconomical and circuitous" route at a rate higher than that contemporaneously in effect over other more direct routes available, which lower rate was subsequently made applicable over route of movement. Complainant admits its own error in specifying higher-rated route, but charges initial carrier with negligence for failure to point out at time of shipment that higher rate applied over specified route. HELD: Alleged error was apparently attributable to complainant's on carelessness rather than to negligence of initial carrier and rates can not be condemned upon the mere fact that a lower rate was subsequently established over route of movement. Rate assailed found not unreasonable, unduly prejudicial or otherwise unlawful. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113.

(aa) No duty rests upon a shipper to specify any routing, and where he elects to route his shipments he relieves carriers of that duty. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113, 114.

(bb) Complainant attacked class rates charged on 10 cars of waxed wrapping paper, printed and unprinted, between June 26 and Dec. 6 1922 from Garfield, N. J., to Lynchburg, W. Va., as unreasonable, unduly prejudicial and in violation of section four. Real contention is that shipments were not misrouted. Lynchburg is served by the Southern, N. & W., and C. & O. Except as to the two shipments routed P. A. L. rail and water, the evidence is insufficient to warrant a finding of misrouting as to those two shipments, while it is true there was no joint rail and water route over the P. A. L., to Lynchburg such a route was open to Danville, Va., an intermediate point on the Southern. If defendants had followed the bill of lading routing instructions as far as practicable the two shipments routed would have been subjected to a combination fifth class rate of 80.5c based on Danville. Instead defendants transported those shipments by a route over which a lower rate applied. Such shipments were misrouted, but complainant is not shown to have been damaged thereby. HELD, applicable rates not unreasonable or otherwise unlawful, complaint dismissed. Traffic Bureau v. P. R. R. 112 I. C. C. 59.

Dells Paper & Pulp Co. v. Director General, as Agent, 85 I. C. C. 609; Consolidated Coal Co. v. M. P. R. R. Co., 88 I. C. C. 523.

§7½a. What Routes Open.

(a) Rates between any given points where no restriction is made as to routing apply over all routes of the carriers parties to the tariffs naming the rates, whether such routes are circuitous or not, if there be no back haul. Likewise transit arrangements applicable in connection with such rates, where no special restriction as to transit is contained in the tariff, are coextensive with the routes over which the rates apply, provided routes are not employed which necessitate a back haul. Maloney Tank Mfg. Co. v. B & O. R. R., 95 I. C. C. 725, 726.

(b) Rates to intermountain and transcontinental territory generally apply via any and all gateways. The Commission has frequently held that where tariffs are silent as to routing the rates apply over all reasonable available routes of participating carriers. Frazier Saddlery Co. v. M. P. R. R., 96 I. C. C. 1, 2.

(c) Tariff named rates on watermelons from Macon, Ga., to Asheville, N. C., lower than to Murphy, an intermediate point, via certain routes. No traffic moves via such routes but as tariff contained no restrictions as to routing, a technical fourth-section violation, unprotected by an appropriate application, exists which should be promptly removed. Fain Grocery Co. v. L. & N. R. R. Co., 91 I. C. C. 374, 376.

(d) On numerous occasions the Commission has found that if carriers desire to restrict the application of a joint rate to any particular route they should do so by clear and unequivocal language. With no routing restrictions shown in the tariff naming the joint through rate sought, the shipment is properly entitled to such rate. Rose Lake Lumber Co. v. O. S. L. R. R., 100 I. C. C. 221, 222.

(e) Complainant alleged that by reason of failure of defendants to carry out their contract of carriage of a car of potatoes shipped August 29, 1922, from Freehold, N. J., to Statesville, N. C., sections 1 and 15 of the Act were violated.

Car was placed on a team track for loading Aug. 21. According to the records of the Jersey Central, the car was completely loaded August 23. Shipping order and bill of lading were not turned over to the agent of the Jersey Central until August 29. The only routing instruction on the bill of lading was Southern Ry. The Jersey Central waybilled the shipment Jersey Central, Bound Brook, N. J., P. & R., Pack Jct., Pa., B. & O. Potomac Yard, Va., Southern Ry. The car arrived at Potomac Yard 11:45 a. m. Sept. 2. That was slightly ahead of average time. It was delivered to the Southern at 3:47 p. m. the same day. Because of labor trouble, and accumulation of freight for the Southern Ry. the car was detained in Potomac Yard until 8 a. m. Sept 5, and was then diverted to the R. F. & P. It left Potomac Yard over that line Sept. 5. It was delivered to the S. A. L. at Richmond, Va., Sept. 6 and turned over by that carrier to the C. & O., Sept.10. The car was delivered to the Southern at Marion, N. C., Sept 12 and arrived at Statesville, Sept. 16. Because of the emergency existing at the time this shipment moved, growing out of unfavorable labor conditions and shortage of fuel, the Commission required by service order 22 that traffic should be forwarded to destination over routes most favorable without regard to routing made by shippers or carriers. Consignee refused the shipment because of the delay. Under the routing instructions given by complainant the shipment could have been sent over the route traversed inasmuch as the Jersey Central does not connect with the Southern Ry. and complainant did not specify routing between those two carriers. In addition, the route traversed was in consonance with the requirements of the order made under authority of section 15 (4) of the Act to meet emergencies such as existed at the time of this movement. HELD: No violation of any provision of the Act has been shown, complaint dismissed. Lambertson Co. v. C. R. R. of N. J., 100 I. C. C. 259.

(f) Complainant alleged that a car of lumber shipped June 25, 1920, from Picayne, Miss., to New York, N. Y., was diverted or misrouted and that as a result the lumber was lost, to complainant's damage. Shipment was consigned to complainant at the 37th station of the Pennsylvania at New York. It was made for complainant's Laurel office by the Jordan River Lumber Co., from which the lumber was purchased, and complainant was shown as consignor. It moved over the N. O. N. E. to Meridian, Miss., and Southern thence to Alexandria, Va., arriving there July 9th. Its acceptance by the initial carrier was in error for the reason that since March 20, 1920, there had been an embargo on lumber destined to Pennsylvania stations east of Newark, N. J. The Pennsylvania declined to accept it at Alexandria until the routing was changed to provide for movement over the L. V. from Phillipsburg, N. J., to the 27th station of the L. V., at New York which is about one half mile from the Pennsylvania 37th St. station. It finally moved from Alexandria on or about July 17, 1920, and arrived in New York August 18. Complainant evidently was aware of the difficulty of getting the shipment through over the Pennsylvania, as, apparently upon request of complainant's traffic manager at Birmingham, the Pennsylvania on August 11, wired the Southern that permit had been issued for movement to the 37th St. station as routed. The shipment was then in transit over the other route. The routing was changed under authority of service order No. 1. The 27th street station of the L. V. was the practical point of delivery under all circumstances, and the change made by defendants must be regarded as one of routing rather than one of destination. The real difficulty arose from the failure of complainant or its vendee to receive notice of the change, and that was due primarily to the fact that complainant was shown as both consignor and consignee and could not be reached by mail either at point of origin or at destination. HELD: Shipment not misrouted, complaint dismissed. National Lumber Co. v. N. O. N. E. R. R., 100 I. C. C. 334.

(g) Complainant attacked combination rate charged on a car of molasses in crated cans shipped March 15, 1923, from Morton, Miss. to New Orleans, La., and reconsigned to Blytheville, Ark., as illegal and unreasonable. Shipment moved A. & V. to Meridan, Miss., thence N. O. & N. E. to New Orleans where it was recognized and moved to Blytheville via T. & P. and St. Louis Southwestern, rate charged 83c made up of 10 and 19.5c to New Orleans and 53.5c beyond. Applicable rate was 60c made up of 23.5c to New Orleans and 36.5c beyond. At time movement the 36.5c commodity rate applied from Morton to Blytheville. The

tariff in which this rate was published contained no restrictions against routing through New Orleans, and all of defendants whose lines comprised the route of movement were parties thereto. Blytheville is northwest of Morton. The shipment moved south to New Orleans, 262 miles, and thence north to Blytheville, 710 miles, a total distance of 972 miles; the distance over the direct route between these points is 315 miles. There was nothing in the tariff naming the joint commodity rate of 36.5c which would have precluded complainant from routing the shipment through New Orleans had it been billed direct from Morton to Blytheville. HELD: Rate charged illegal to extent it exceeded 36.5c, reparation awarded. Scott County Farm Bureau v. A. & V. Ry., 101 I. C. C. 357.

(h) If it was defendant's purpose to restrict the application of the joint rate to any particular route and the reconsigning privileges authorized in connection therewith to any particular point, it should have been done by clear and unequivocal language. Scott County Farm Bureau v. A. & V. Ry., 101 I. C. C. 357, 358.

(ij) Governing tariff provided no routing restrictions and allowed fabricating in transit at points in direct line to final destination. Shipments here involved moved via circuitous routes over one of which a back haul to and from transit point was required. FOUND: There being no routing restrictions in connection with the transit arrangements, joint rates applicable in connection therewith applied over all routes of carriers parties to tariff naming the rates where no back haul was involved, and combinations were applicable in connection with such routes where back hauls necessitated. Refund of overcharges directed. Maloney Tank Mfg. Co. v. B. & O., 95 I. C. C. 725.

(k) No specific joint rates were published from Petersburg, Va., to Pueblo, Colo., tariff naming joint rates from Petersburg to Columbus, N. Mex., in which Pueblo was not specified, carried an intermediate-point rule. The joint rates were not restricted to any particular route, nor did the tariff in any way limit movements up to the Pueblo gateway. The route via that gateway was not unreasonable or unduly circuitous, all defendants herein were parties to the Columbus rates, and in connection with other participating carriers made up to the latter point "a line or route" on which Pueblo was directly intermediate. FOUND: Under the circumstances, rates to Columbus were applicable to Pueblo and shipments here involved were overcharged. Reparation awarded. Frazier Saddlery v. M. P. R. R. Co., 96 I. C. C. 1.

(l) Where tariffs are silent as to routing the rates named therein apply over all reasonably available routes of participating carriers. Frazier Saddlery v. M. P. R. R. Co., 96 I. C. C. 1, 2.

(m) Shipment from Pittsburg, Duquesne station, Pa., to Tulsa, Okla., was diverted, through carrier's error to Waynoka, instead of Wynona, Okla., necessitating a back haul to Wynona. Tariffs of participating carriers named, without applicable restrictions, same rate from origin to both Wynoka, and Wynona, and this rate, plus diversion charge, found applicable. Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(n) Upon contention that commission ruled in 58 I. C. C. 205, 59 I. C. C. 119, and other cases, that during Federal control all lines were operated as a single system and that a rate applying over one route of federally controlled lines should apply over another route, if distances and operating conditions were favorably comparable, and that this ruling applicable via a route other than that of movement entitled shipper to lower rate, HELD: This contention goes beyond the scope of cited cases, and fact that two rates applied between the same points over different routes, both routes under Federal control, does not establish unreasonableness of higher rate and defendant can not be called upon to protect the lower rate. Moreover, such action would subject the Director General as operator of route over which higher rate applied to liability as operator of route over which lower rate applied. In Davis v. Donovan, 265 U. S. 257, his liability "was carefully limited to such as would have been incurred by some particular carrier if there had been no Federal control." California Packing Corp. v. Director General, 96 I. C. C. 239, 242, 243.

(o) Although routes were unusual, they were open, and the fourth section is violated. Sinclair Oil & Gas Co. v. C. & N. E. Ry., 96 I. C. C. 286, 288.

(p) The Commission has frequently found that rates between any given points, where no restrictions are made

as to routing, apply over all routes of the carriers parties to the tariff naming the rates, whether such routes are circuitous or not, if there be no back haul. Likewise transit arrangements applicable in connection with such rates, where no special restriction as to transit is contained in the tariff, are coextensive with the routes over which the rates apply, provided routes are not employed which necessitate a back haul. Jonesville Milling Co. v. N. Y. C. R. R. 109 I. C. C. 601, 602.

ALL OTHER CITATIONS

Elimination of Routes on Transcontinental Traffic, 85 I. C. C. 108.

III. LIABILITY FOR MISROUTING.

§7¾. In General.

(a) Formal complaint as originally filed alleged unreasonableness on shipments of cull apples moving during Federal control. At the hearing complaint was amended to include an allegation of misrouting. Contention that because routing specified by shipper was disregarded in the interest of speed and efficiency, under the terms of General Order No. 1 of the director general, misrouting resulted and a lower rate applicable between point of origin and destination should be protected, not sustained. Rate assessed was the same as that applicable over route prescribed in routing instructions and complainant has not shown that it was damaged by the alleged misrouting. California Packing Corp. v. Director General, 96 I. C. C. 239.

(b) Complainants contention is that the damage resulting from the alleged misrouting constitutes an overcharge within the meaning of section 206 of the transportation act, 1920, as amended Feb. 24, 1922. The Commission has considered that question informally on several occasions and have found that such damages are not "overcharges above the legal tariff charges" as contemplated by that amendment. Armour & Company v. Director General 107 I. C. C. 310, 311.

§8¼. Missing Transit or Other Privilege.

See Facilities and Privileges §15.

(a) Complainant attacked charges assessed on a car of coal shipped from Boonville, Ind., to Elkhart, Ind., and reconsigned to South Bend, Ind., as unreasonable. Shipment tendered April 26, 1923 to Southern Ry. at Boonville consigned to Elkhart. Bill of lading specified Big Four as delivering carrier. Shipment moved over Southern to Louisville, Ky., thence Big Four to Elkhart. Upon arrival at Elkhart it was reconsigned to South Bend and moved to that point over N. Y. C., charged $2.08 to Elkhart, 365 miles and $1.01 beyond 15 miles. Shipment was forwarded over a route which accorded the lowest available rate from and to those points via Big Four. Defendants can not be held for misrouting because complainant was unable to effect a reconsignment, of which the carriers had no notice prior to the reconsignment order, at the through rate available over other routes. HELD, rate attacked not unreasonable, complaint dismissed. Russell v. N. Y. C. R. R. 109 I. C. C. 193.

§9. Measure of Damages.

See Reparation §18.

ALL CITATIONS

Empire Lumber Co. v. Director General, as Agent, 88 I. C. C. 424.

§10. Parties to Make Refund.

See Parties; Reparation §19.

(a) Where initial carrier is primarily responsible for misrouting, reparation will be awarded against it, and not against delivering carrier merely because such delivering carrier advised shipper not to change his routing instructions. Petertyl v. N. Y., N. H. & H. R. R Co., 91 I. C. C. 699, 701.

§11. Reparation in General.

See Claims §1 (c) (ss); Reparation.

(a) Overcharge claim on shipment moving during Federal control filed informally more than one year after termination thereof. Formal complaint subsequently filed brought in additional issue of misrouting. HELD: Overcharge claim since filed within two years and six months after Federal control terminated, found not barred, but misrouting claim is barred because not filed within one year after that period had terminated. Empire Refineries v. Director General, 92 I. C. C. 59, 60.

(b) Shipments of milk and cream from Iowa points to Omaha, Nebr., moved over indirect route via Tara, Iowa, some of the shipments being unrouted and others being routed via Illinois Central. Charges based upon applicabe rates were collected. Upon contention that shippers are entitled to through express rates to Omaha via Onawa or

Sioux City, or to joint baggage and express rates equal to express rates applicable over these routes prior to decision in Express Rates on Milk and Cream, 74 I. C. C. 427, HELD: Contention has force in connection with demand for reasonable route and rate for future but its cogency is not apparent as to shipments made in the past. Furthermore, as to shipments which were unrouted there is no distinction in principle between this case and the situation presented in 24 I. C. C. 626, wherein commission refused to award reparation to basis of subsequently established joint through rate based upon the aggregate of intermediates over short lines which was lower than joint rate over more indirect route of movement. Kirschbraun & Sons, Inc., v. G. N. Ry. Co., 100 I. C. C. 28, 32, 33.

(c) Rates on pianos, c l. and l. c. l., from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., found not unreasonable or unlawful. Complainant contends that some of the shipments were misrouted depending upon his interpretation of the tariffs contemporaneously in effect naming lower rates from the same points to Mobile, Ala., claiming that such rates were applicable to Birmingham under the so-called intermediate rule contained in those tariffs. It is found that complainant paid the higher rates charged without protest for a long period, did not present his complaint until more than six months after the charges on the last shipment were paid and one day after the intermediate rule was changed so as to preclude his contention, and presented no request to the commission for suspension of the new rule which, under the construction contended for effected increased rates on his traffic. This tends to show that complainant was not misled to his damage by the intermediate rule under consideration and no evidence as to unreasonableness was presented. Forbes & Sons Piano Co. v. A. G. S. R. R. 101 I. C. C. 74.

(d) The claim for misrouting is barred from consideration because not presented within one year after the termination of federal control. Harman & Hulsey v. Director General. 112 I. C. C. 275, 276.

Empire Lumber Co. v. Director General, as Agent, 88 I. C. C. 424.

§14. Procedure.

See Procedure Before Commission.

(a) Request of counsel for parties outside the proceeding to file a brief as friends of commission, discussing principle of misrouting under consideration, granted. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693.

ALL OTHER CITATIONS

Howe v. C. & N. W. Ry. Co., 85 I. C. C. 760.

SAFETY APPLIANCE ACTS

See Cars and Car Supply §7¾; Employers' Liability Acts; Personal Injuries.

(a) In 69 I. C. C. 258 the Commission prescribed and adopted specifications and requirements for the installation of automatic train stop or train control devices and required 49 carriers by railroad subject to the act to install such devices, upon a passenger locomotive division included between points on their respective lines specified in the order. On March 21, 1924 the Commission reopened the proceeding for hearing with respect only to the second order, as it affects the remaining 42 roads, and denied in all other respects the petitions of the carriers. The record indicates that progress has been and is being made in eliminating undesirable features in operation, upon the installations in regular service, and upon the test installations of various types, although this progress has not been such as might have been made if the carriers generally during the past two years had made larger installations and more expensive tests. Nearly two years have elapsed since the Commission found, as a matter of fact, after a long series of tests, that devices of the ramp type were practicable under actual service conditions; that they properly perform the functions for which they are designed; and that, when properly installed and maintained, they increase the safety of train operation. The Commission has given consideration to the particular circumstances and conditions affecting the installation of automatic train stop or train control devices upon the lines of the respondents herein, and in view of the action which it has already taken with respect to installation of such devices upon the lines of the larger carriers and the extent thereof, HELD, with respect to the 42 carriers now be-

fore it, its second order should not be vacated and set aside as prayed by said respondents, but that the effective date thereof should be suspended until further orders. Automatic train control devices, 91 I. C C. 426.

(b) Commission instituted an investigation under section 26 of the act, which authorizes the Commission, after investigation, to order the installation of automatic train stop or train control devices, or other safety devices, which comply with specifications and requirements prescribed by the Commission, upon the whole or any part of the railroad of any carrier by railroad subject to the act. The reports of inspectors have indicated a lack of improvement in power brake conditions commensurate with the requirements of safe and efficient operation. Throughout this proceeding the necessity for better maintenance of present power brake equipment in order to secure proper operation and safely to control trains was repeatedly stressed, and this necessity was recognized by both carriers and employees. It is beyond question or argument that piston travel should be maintained within proper limits, triple valves should be kept properly cleaned, brake pipe and brake cylinder leakage should be kept below certain prescribed amounts, and retaining valves with their pipe connections should be kept in good condition; furthermore, rules should provide and proper tests should be made to insure that trains will not leave terminals with defective, inoperative or cut out brakes on any cars. It is most necessary from the standpoint of safety that trains on grades be controlled exclusively by means of power brakes. From the record in this case it appears that brake devices are available by means of which trains can be controlled on descending grades by simply increasing or decreasing the brake cylinder pressure or required, without the necessity of releasing to recharge the train brake system. This function is clearly desirable. HELD, improvements in the operation of power brakes for both passenger and freight trains are essential and must be effected. Improvements in power brake appliances can be made and increased safely in train operation can and must be obtained. A power brake system for passenger and freight trains should insure that only a service application of the train brakes will occur when a service reduction of brake pipe pressure is made. A power brake system for passenger and freight trains should provide means whereby effective emergency brake cylinder pressures will be obtained when an emergency reduction of brake pipe pressure is made from a fully charged brake system. A power brake system for passenger and freight trains should provide means whereby effective emergency brake cylinder pressures will be obtained when an emergency reduction of the brake pipe pressure is made after a full service brake pipe reduction has been made. A power brake system for passenger and freight trains should provide means whereby effective emergency brakes cylinder pressures will be obtained when an emergency reduction of brake pipe pressure is made following release after a full service brake application. A power brake system for passenger and freight trains should provide means whereby the engineman can control the release of pressure from brake cylinders and effect such release by graduated steps or gradually in order that he may increase or decrease brake cylinder pressures as required to control at relatively uniform rates the speed of trains. A power brake system for passenger and freight trains should provide for obtaining and maintaining brake cylinder systems within prescribed limits for specified periods of time during brake applications. Power brakes and appliances for operating, 91 I. C. C. 481.

(c) The statute imposing a penalty on a railroad corporation for using cars with defective safety appliances is not invalid, as denying equal protection of law, by penalizing the corporation, and not servants who should have inspected and repaired cars. United States v. Western & A. R. R., 297 Fed. 482.

(d) Inspection of cars by inspectors on the premises of a railroad without invitation or permission is not a violation of Const. Amend. 4, relating to unreasonable searches; inspection being made to determine whether safety appliances were in proper repair, under Act March 2, 1893, §6 (Comp. St. §8610), and Act May 27, 1908, §1, no paper or property having been seized, and no house or even private place having been entered. United States v. Western & A. R. R., 297 Fed. 482.

(e) A statute imposing penalties on railroads using cars with defective safety appliances does not take property for public use without compensation, nor deprive a carrier of its property without due process of law. United States v. Western & A. R. R., 297 Fed. 482.

(f) In a suit for penalty for using cars with defective safety appliances, it is no defense that, by reason of a strike and state of violence approaching war, inspection and repair of cars was impossible. United States v. Western & A. R. R., 297 Fed. 482.

(g) Safety Appliance Act 14, 1910, §2 (Comp. St. §8618), making it unlawful for a common carrier to "haul or permit to be hauled, or used on its line," any car not equipped with required appliances, HELD, inapplicable to a locomotive temporarily withdrawn from service and undergoing minor repairs in a roundhouse preparatory to early return to service, in view of section 4 (Comp. St. §8621). Baltimore & O. R. Co. v. Hooven, 297 Fed. 919.

(h) The test of liability under Safety Appliance Act April 14, 1910, §2 (Comp. St. §8618), is not the engagement of the vehicle in interstate commerce, and the right of a private individual to recover is not dependent on whether he was engaged in interstate commerce, but the act is applicable to all vehicles used on any railroad which is a highway of interstate commerce, whether the vehicles themselves are engaged in interstate commerce or not; it being necessary merely that the car is "in use on its line." Baltimore & O. R. Co. v. Hooven. 297 Fed. 919.

(i) The duty imposed on interstate railroads by the Safety Appliance Act April 14, 1910, §2 (Comp. St. §8618), is an absolute and unqualified one, both to install the safety appliances and to maintain them in a secure condition. Baltimore & O. R. Co. v. Hooven, 297 Fed. 919.

(j) Order of Commission entered January 14, 1924, requiring certain carriers to install automatic train-control devices upon passenger-locomotive divisions, modified so as to suspend effective date of such order until further order of Commission. Automatic Train Control Devices, 91 I. C. C. 426.

(k) Original report, 69 I. C. C. 258, wherein Commission prescribed and adopted specifications and requirements for installation of automatic train-stop or train-control devices and required certain carriers to install such devices upon passenger locomotive divisions of their lines, modified so as to permit use of permissive or manual-control feature in connection therewith. Automatic Train-Control Devices, 91 I. C. C. 426.

(l) Upon investigation by Commission on its own motion; FOUND: That improvements in operation and maintenance of power brakes for passenger and freight cars are necessary; that better control by engineman over service and emergency applications of brakes should be provided; and that a power-brake system should provide (1) means whereby effective emergency-brake application may be obtained immediately following a full-service application and also immediately following a release after a full-service application, (2) means whereby engineman may control release of brakes by graduated steps or gradually, and (3) for obtaining and maintaining brake-cylinder pressures within prescribed limits for specified periods of time during brake applications. In addition, full specifications and requirements covering functions, maintenance and operation of power brakes should be adopted. Power Brakes and Appliances., 91 I. C. C. 481.

(m) Use of hand brakes for control, or to assist in control, of trains on grades is clearly contrary to requirements of law, is not in accord with best current practice, and can and must be discontinued. Power Brakes and Appliances, 91 I. C. C. 481, 516.

(n) So-called short-cycle method of controlling trains on grades by means of power brakes described. Power Brakes and Appliances, 91 I. C. C. 481, 516.

(o) It is most necessary from standpoint of safety that trains on grades be controlled exclusively by means of power brakes. That it is entirely feasible to accomplish this is shown by demonstrations which have been conducted by Bureau of Safety, as well as by current practice of a majority of carriers having heavy grades on their lines. Power Brakes and Appliances, 91 I. C. C. 481, 517, 518.

(p) This report is made after inspection and test of the automatic train control system of the Union Switch & Signal Co., on the first division of the Oregon

Washington Railroad & Navigation Company, extending from East Portland, Ore., to The Dalles, Oreg., a distance of 83.6 miles. That portion of the division between East Portland and Crates, Ore., a distance of 81.1 miles is single track and that between Crates and The Dalles, a distance of 2.5 miles, is double track. HELD: The installation meets the requirements of specifications and order in 69 I. C. C. 258, except as noted below, and it is approved, except as indicated. 1. Those locomotives, the train control equipment of which is not in accordance with U. P. plan S. D. 220 B must be equipped in accordance with such plan, to warrant approval. 2. All locomotives must be provided with cut out switches which will, when operated, open the common return of the cut out relay holding coil. 3. All locomotives must be provided with pressure maintaining valves. 4. Provision must be made requiring enginemen to acknowledge at succeeding stop signals. 5. The pneumatic portion of this device containing the functional parts essential to brake application, and which are located outside the cab, must adequately be protected against freezing, because if these valves should be sealed closed in normal position, the result might be serious. 6. The electro-pneumatic valve stem in use apparently offers opportunity for sticking and freezing shut. The improved type should be substituted. 7. The main reservoir cut out cock draining the air supply to pipe No. 1 should either be so designed as to result in an automatic brake application if closed, or a single cut out cock in the main reservoir pipe should be substituted for the one first described and that in the pipe leading to the engineer's brake valve. Automatic Train Control Devices, 101 I. C. C. 487.

(q) Railroad which seldom transported interstate goods, and which possessed single track located wholly within state, though connecting with interstate line at one point, HELD: Not connected with interstate commerce so as to bring servant's action for injuries within Federal Safety Appliance Act (U. S. Comp. St. §§ 8613-8615). McMahan v. Montour R. Co., (Pa., 1925) 128 Atl. 918.

(r) Rules and regulations authorized by the Interstate Commerce Commission to fix the standard of safety appliances, when approved and filed, are the exclusive law of transportation to which they apply. Atlantic Coast Line R. Co. v. Napier, 2 Fed. (2d) 891.

(s) Safety Appliance Act, March 2, 1893, 27 Stat. 531, amended by Act April 1, 1896, and Act March 2, 1903 (Comp. St. §§ 8613-8615), is mandatory, and court must apply its penalties, when violation is shown. United States v. Gulf C. & S. F. Ry. Co., 4 Fed. (2d) 722.

(t) Logging cars, not belonging to interstate railroad, but transported over its tracks, wholly within state under control of railroad's train dispatcher, was within Safety Appliance Act March 2, 1893, as amended by Act April 1, 1896, and Act March 2, 1903 (Comp. St. §§ 8613-8615), which applies to all equipment moving on line of interstate railroad, regardless of nature of shipment. United States v. Gulf C. & S. F. Ry. Co., 4 Fed. (2d) 722.

(u) Amendment of Safety Appliance Act excluding cars used on street railways held declaratory. Borelli v. International Ry. Co., 240 N. Y. S., 54, 147 N. E. 356.

(v) Safety Appliance Act (U. S. Comp. St. §8605 et seq.) HELD to impose duty of maintaining couplers in operative condition, and not merely to require installation of couplers. Carter v. St. Louis, T. & E. R. Co., (Mo., 1925) 271 S. W. 358.

(w) Under U. S. Comp. St. §§8659, 8660, defenses of contributory negligence and assumption of risk in action for injuries by one employed in interstate commerce are not available where railroad's negligence consisted of violation of Safety Appliance Act (U. S. Comp. St. §8605 et seq.) Carter v. St. Louis, T. & E. R. Co., (Mo., 1925) 271 S. W. 358.

(x) Following investigation made under section 26 of the act, automatic train-stop system of the Miller Train Control Corporation installed on Chicago Division of C. & E. I. Ry., and as a result of inspection and test thereof, the installation found to meet requirements of commission's specifications and order in original case, Automatic Train-Control Devices, 69 I. C. C. 258 and is therefore approved, with certain exceptions which have been called to carrier's attention with instructions as to corrections to be made in certain specific respects. In the matter of Automatic Train-Control Devices, 96 I. C. C. 345.

(y) Complaint failed to name pre-

ferred interests or localities, and did not properly present the issue of undue prejudice. Rule III, Rules of Practice. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 528.

(z) Upon petition filed by Great Northern, respondent, order of Jan. 14, 1924 was reopened as it affects said carrier. The first order requiring installations of automatic train control devices was entered June 13, 1922 and the second order of Jan. 14, 1924 required the G. N., to install, on or before Feb. 1, 1926, an automatic train stop or train control device on one full passenger locomotive division between St. Paul and Glasgow, Mont. Pursuant to this order the carrier selected the division between Williston and Wolf Point, Mont. 106 miles apart. The character and number of trains operated over the G. N., west of Minot warrant the installation of some form of automatic train stop or train control device. It is pertinent to state here that an elaborate complicated, or expensive system of train control is not required to meet the specifications of the order. The purpose of such device, briefly stated, is to protect a train from accidents by stopping the train automatically when the engineman fails to act. The installation of a device to do this in connection with a system of automatic block signals is neither difficult nor unduly burdensome in view of the protection that will be accorded employees and passengers. HELD, request denied. Automatic train control devices 102 I. C. C. 433.

(za) Petitions of Great Northern Ry. Co. that commission's order, 69 I. C. C. 258 and 91 I. C. C. 426, requiring installation of an automatic train-stop or train-control device on a passenger-locomotive division be vacated and set aside in so far as it affects that carrier, denied. The character and number of trains operated over the line of that carrier warrant the installation of some form of such a device, and its installation is neither difficult nor unduly burdensome in view of protection that will be accorded employees and passengers. Automatic Train-Control Devices, 102 I. C. C. 433.

(aa) This report is made after inspection and test of the automatic train stop system of the National Safety Appliance Co. on the Houston division of the Galveston Harrisburg & San Antonio Ry. In 69 I. C. C. 258 the Commission required 49 carriers by railroad therein named, including the G. H. & S. A. Ry. to install automatic train stop or train control devices on portions of their respective roads designated in order, in accordance with specifications and requirements prescribed by the Commission. The installation inspected and tested was completed on Jan. 11, 1925. It extends from Rosenburg, Tex., to Glidden, Tex., a distance of 50.7 miles single track. There are 38 locomotives equipped. HELD, certain recommendations and requirements are outlined by the Commission and the G. H. & S. A. Ry. is expected to comply therewith. Automatic Train Control Devices 104 I. C. C. 549.

(bb) This report is made after inspection and test of the automatic train stop system of the National Safety Appliance Co. on the Western division of the Pacific system of the Southern Pacific Co. The installation inspected and tested was completed June 8, 1925. It extends from Oakland, Calif., to Tracy, Calif., a distance of 75.6 miles, of which 24.5 miles is double track and 51.1 miles single track. There are 98 equipped locomotives. HELD, the Southern Pacific is expected to comply with the recommendations of the Commission and as to progress made. Automatic train control devices 104 I. C. C. 558.

(cc) This report is made after inspection and test of the automatic train stop system of the National Safety Appliance Co. on the Southwestern division of the St. Louis San Francisco Ry. This device was placed in service on this carrier between Nichols, Mo., and Brookline, Mo., a distance of 5 miles on April 16, 1923 and was extended to Logan, Mo., by Sept. 15, 1924 a distance of 20 miles, with 22 equipped locomotives. The installation inspected and tested was completed on June 30, 1925, extending from Nichols, Mo., to Monett, Mo., a distance of 40 miles, of which 35.6 miles is single track and 4.4 miles double track. There are 31 locomotives equipped with the device. HELD, the St. L. S. F. Ry. to conform to the recommendations and suggestions of the Commission and to keep the Commission informed of the progress made. Automatic Train Control Devices 104 I. C. C. 565.

(dd) In 85 I. C. C. 403, 406, the Commission found the device as installed

upon the Rock Island met all the requirements of the specifications and order in 69 I. C. C. 258, except as indicated in the report. The situations described in the report which were to be corrected were eight in number. These have been again inspected by inspectors of the Commission and results reported. HELD, all the situations noted have been satisfactorily corrected and all the requirements have been met. Automatic train control devices 104 I. C. C. 577.

(ee) This report is made after inspection and test of the automatic train stop system of the Sprague Safety Control & Signal Corporation on the Minot division of the Great Northern Ry. The devise under consideration is an automatic train stop of the intermittent magnetic induction type with forestalling feature. This device was first placed in service by the G. N., between Minot, N. D., and Berthold, N. D., a distance of 23 miles with six equipped locomotives. The installation inspected and tested was completed in Oct. 1925. It extends from Minot, N. D., to Williston, N. D., a distance of 120.3 miles, of which 98.07 miles is single track and 22.25 miles double track. There are 35 locomotives equipped with the device. HELD, with exception of certain recommendations made as to tests, etc., G. N., to proceed to conform to such recommendations and report to the Commission. Automatic Train Control Devices 107 I. C. C. 385.

(ff) After inspection and test of the automatic train-control system of the Union Switch & Signal Co. installed on a division of the O., W. R. R. & Nav. Co., consisting of a two-speed device of the continuous-induction type, FOUND: That its installation, with certain exceptions, meets requirements of the commission's specifications and order in 69 I. C. C. 258. Automobile Train Control Devices, 101 I. C. C. 487.

(gg) Proceeding reopened for further hearing upon complaint of Sprague Safety Control & Signal Company that the automatic train stop device of the General Railway Signal Co. selected by the N. Y. C. for installation upon its line of railroad under orders entered in this proceeding 69 I. C. C. 258, 91 I. C. C. 426 is inherently unsafe under the operating conditions of said railroad in violation of the act. The Commission is of the opinion that the matter of automatic train stop or train control devices is controlled by the specific provisions of section 26 and that the question of the safety of such devices is governed by the specifications and requirements of orders of the Commission thereunder, and not by the general provisions of section 1 dealing with safe and adequate car service. Failure to install such a device as required by orders under section 26 would, however, constitute a violation of such orders and subject the carrier to the penalities provided for by that section. The safety and adequacy of installations of such devices are governed by the specifications and requirements of those orders, which furnish the criteria by which such installations may be judged. HELD, law has not been violated, complaint dismissed. Automatic Train Control devices. 112 I. C. C. 259.

ALL OTHER CITATIONS

Automatic Train-Control Devices, 85 I. C. C. 403.

SEASON RATES

See Reasonableness of Rates §35.

(a) Considering volume of traffic, its seasonal nature, and expense of assembling and returning equipment, fourth-class rates on fresh tomatoes from points in Silver Creek district in New York to Pittsburgh, Pa., found unreasonable to extent they exceeded 80 per cent of fourth class. Reasonable maximum rates prescribed and reparation awarded. Heinz Co. v. Director General, 91 I. C. C. 358.

(b) Movement of sugar beets is seasonal and seldom extends over a period of more than 90 days. Beets commence to move about first week in October, and factories endeavor to move all their beets before December 15. Heaviest movement occurs from October 5 through to November 20. Continental Sugar Co. v. N. Y. C. R. R. Co., 91 I. C. C. 677, 679.

SHERMAN ACT

See Anti-Trust Laws; Evidence §10.

SIDE TRACKS AND SPUR TRACKS

See Switch Tracks and Switching §11; Transportation §5.

(a) It is a matter of common knowledge that term "spur track" is given a

somewhat wider meaning than "a track" leading from a line of railway, and connected with it at one end only, synonymous with "stub track," the definition of standard lexicographers. Cleveland, C. C. & St. L. Ry. Co. v. Commerce Commission ex rel. J. K. Dering Coal Co., (Ill., 1925), 146 N. E. 606.

(b) Contention that under section 1, paragraphs (18) to (22) of the act, the commission has no jurisdiction in matter of proposed abandonment of mine sidings, relying largely on paragraph (22) which provides that authority conferred by paragraphs (18) to (21) shall not extend to sidetracks located wholly within one State or to street, suburban, or interurban electric railways not operated as part of a general steam-railroad system, not sustained. Provisions of foregoing paragraph limit commission's jurisdiction only with respect to specified paragraphs and do not come into conflict with the provisions of paragraph (9) under which commission may authorize the construction, maintenance, and operation of switch connection with private sidetracks of shippers when such connection is, in opinion of commission, reasonably practicable, can be safely put in, and will furnish sufficient business to justify its construction and maintenance. Hood Coal Co. v. M. V. T. Co., 101 I. C. C. 719, 720, 721.

(c) Proposal of Monongahela West Penn Public Service Co., to cancel interstate rates on coal from mines on its line and to eliminate mine sidings from its list of stations, found justified. Sidetracks concerned have not been used for approximately two years, with little likelihood of future operation except under abnormal market conditions, and in justice to carrier it should not be compelled to maintain switch connection and continue present rates because of the remote possibility of a return of favorable market conditions under which mines previously operated. Moreover, contracts between shippers and the Monongahela provided, among other things, that carrier should have the right, at any time after 30 days' written notice, to discontinue use of siding, terminate the contract, and remove tracks, and written notice had been duly served. Hood Coal Co., v. M. V. T. Co., 101 I. C. C. 719, 723.

SLEEPING CAR COMPANIES.

See Passenger Fares and Facilities.

(a) Injury to passenger's back by sneezing, or attempting to suppress sneezing, because she had to travel in drafty chair car without heat operated by railroad company, cannot be said to be proximate and natural result of breach of defendant Pullman company of contract to furnish berth, "proximate cause" being the active efficient cause which sets in motion a train of events that in their natural sequence might and ought to be expected to produce an injury as undisturbed by any independent intervening cause. O'Neil v. Pullman Co. (Mo. 1924) 260 S. W. 798.

(b) Where because of breach of defendant Pullman company's contract to furnish berth plaintiff was compelled to ride in chair car, court properly refused peremptory instruction offered by defendant, plaintiff being entitled in any event to nominal damages. O'Neil v. Pullman Co. (Mo., 1924) 260 S. W. 798.

(c) Breach of contract by Pullman company to furnish berth did not entitle passenger to damages for mental pain, though breach made it necessary to ride in chair car. O'Neil v. Pullman Co. (Mo., 1924) 260 S. W. 798.

(d) Sleeping car company's duty to passenger is to cause constant watch to be kept during usual hours for sleeping for protection of passengers from injury, and not merely to exercise reasonable care after apprehension of danger arises. Pullman Co. v. Culbreth, 2 Fed. (2d) 540.

(e) In passenger's action against sleeping car company for assault by other passenger, in which the company was charged with negligent omission of duty, evidence tending to show that none of employees came promptly to plaintiff's assistance HELD: To raise jury question. Pullman Co. v. Culbreth, 2 Fed. (2d) 540.

(f) That Pullman Company would not allow passengers to ride on their car unless they had purchased transportation tickets from railroad shows a joint enterprise. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(g) That railroad company may be liable as common carrier to passengers occupying Pullman car does not relieve

Pullman Company from any duty it may have assumed or been charged with by reason of its joining railroad in joint enterprize. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(h) Pulman Company, engaging in joint enterprise with railroad, is liable to passengers for failure to perform any duty imposed by railroad or assumed by it which contributed to safety of passengers while in transit. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(i) That railroad rule required conductor to pass through train and see that all vestibule doors were closed HELD: Not to relieve Pullman Company from its duty under rules imposed by railroad to see that outside and trap doors were closed while train was in motion. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(j) That side and trap doors were let open, and resulted in injuries to Pullman car passengers, HELD: Facts from which jury could infer lack of care on part of Pullman Company in performing part of common joint duty to traveler in which it had united with railroad. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(k) Passenger, who fell from moving train through failure of Pullman Company's employees to close side and trap doors to vestibule of car as soon as train was put in motion, and husband HELD: To have right of action against Pullman Company alone. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(l) In action by husband and wife against Pullman Company for injuries sustained by wife from fall from moving train, through failure of Pullman employees to close doors in vestibule of car, agreement between companies and rules of both Pullman and railroad companies affecting duty to close such doors HELD: Admissible. Pullman Co. v. Waln, 4 Fed. (2d) 1.

(m) Pullman Company is chargeable with highest degree of reasonable care consistent with practical operation of its cars for purposes intended. Caldwell v. Pullman Co. (S. C. 1925) 128 S. E. 504.

(n) Pullman Company is chargeable with the same high degree of accountability for wrongful and tortious acts of its servants as is a common carrier. Caldwell v. Pullman Co., (S. C. 1925) 128 S. E. 504.

(o) Upon investigation, FOUND: That present surcharge accruing to rail carriers in addition to regular passenger fare for the transportation of passengers in sleeping and parlor cars is not unreasonable. Carriers earn less per car-mile, on the average, from their Pullman business than from their coach business, even when surcharge collections and various financial benefits accruing from existing Pullman contracts are take into consideration. The added cost to carriers and greater value to passenger of the Pullman service justify the additional charge; moreover, when the time comes for requiring railroads to accept less passenger revenue than they now receive, those who experience the relative discomforts of ordinary coach travel, rather than those who select the most expensive and luxurious form of transportation, are entitled to prior consideration. Charges for Passengers in Sleeping and Parlor Cars, 95 I. C. C. 469.

(p) The surcharge in addition to the regular fare for the transportation of passengers in sleeping and parlor cars as authorized in Increased Rates, 1920, 58 I. C. C. 220, has not had effect of reducing travel in Pullman cars. On the contrary such travel has been increasing to a greater extent relatively than travel in coaches. Charge for Passengers in Sleeping and Parlor cars, 95 I. C. C. 469, 472.

(q) The surcharge in addition to regular passenger fare for the transportation of passengers in sleeping and parlor cars ought not to be regarded as an independent third charge upon the passenger. It was devised as a simple and convenient method for computing an addition to the basic passenger fare for those who ride in Pullman cars, and is thus equivalent to an increase in the rate per mile. Charge for Passengers in Sleeping and Parlor Cars, 95 I. C. C. 469, 478.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Constitutionality of Act.

See Constitutional Law; Exclusive Contracts.

(a) A contract by a railroad company to transport logs for a lumber company at an agreed rate, though made in connection with a sale to the lumber company of the land from which the logs were to be cut, and for the purpose of securing increased lumber traffic, HELD: Subject to the regulatory power of the national and state governments over rates. Northern Pac. Ry. Co. v. St. Paul & Tacoma Lumber Co., 4 Fed. (2d) 359.

II. LEGALITY AND EFFECT SINCE PASSAGE OF ACT.

See Legality of Rates.

§2. In general.

(a) Contracts in violation of the Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.) are void, and the carrier, when dealing with rates, is not estopped from asserting the illegality of payments in contravention of the act. Pennsylvania R. Co. v. Cameron (Pa. 1924) 124 Atl. 638.

(b) Interstate Commerce Act (Comp. St. § 8563 et seq.) HELD inapplicable to contract to furnish ships for transportation from Mobile to Pacific Coast, in absence of continuous shipment or through bill of lading from inland point. American Cast Iron Pipe Co. v. Atlantic, Gulf & Pac. S. S. Corp., 2 Fed. (2d) 397.

(c) Contract between shipper and carrier, fixing compensation to be paid for transportation, though made under state or federal authority, is subject to right of state or Congress to modify or annul. Hawkeye Portland Cement Co. v. Chicago, R. I. & P. Ry Co. (Ia. 1924), 201 N. W. 16.

(d) An agreement by a contractor constructing embarkation facilities for the Government to pay rental to a railroad for use of an engine to move and spot cars from the railroad yards where they were held because of congestion at its own siding where the railroad was supposed to deliver them is without consideration as such service is already covered by the line haul rate and the carrier can not, therefore, recover such rental. Chesapeake & O. Ry. Co. v. Westing House, Church, Kerr & Co (Va. 1924) 123 S. E. 352.

(e) Agreement of contractor constructing embarkation facilities for government to pay rental to a railroad for use of engine to move and spot cars HELD without consideration, and ineffective, where services rendered were those already fully paid for in line haul rate. Chesapeake & O. Ry. v. Westing House, Church, Kerr & Co. (Va., 1924) 123 S. E. 352.

(f) Though it be not provided for in the contract, still, if a subsequent change is made in the law whereby performance of the contract becomes unlawful, its principle, if the seller of coal is prevented from shipping to the purchaser because of a subsequent car service order of the Interstate Commerce Commission, the seller is excused from the performance of the contract even though the contract did not provide against such a contingency. Stoner & Co. v. Blocton Export Coal Co. (Miss. 1924) 100 So. 5.

(g) A contract by a railroad company to transport logs for a lumber company at an agreed rate is subject to the action of state authorities changing the lawful rate on such shipments, and it not destroyed by such action, but its terms are modified as was presumably contemplated by the parties. Northern Pac. Ry. Co. v. St. Paul & Tacoma Lumber Co., 4 Fed. (2d) 359.

(h) A contract made in 1888 by a manufacturer of lumber to ship a certain

proportion of its product over the lines of a railroad company, which implied an agreement by the railroad company to furnish cars for such shipments, was not invalid as in violation of Interstate Commerce Act, §§ 2, 3 (Comp. St. §§ 8564, 8565), prohibiting discrimination and undue preferences, as requiring the company to furnish the cars regardless of the rights of other shippers, but its obligation is to be construed as one to furnish cars on reasonable and lawful demand therefor. Northern Pac. Ry. Co. v. St. Paul & Tacoma Lumber Co., 4 Fed. (2d) 359.

(i) In view of Interstate Commerce Act, as amended by Act June 29, 1906 §2 (U. S. Comp. St. § 8569), operating agreement between trunk line railway and terminal railroad fixing charges for services and use of facilities of latter, where only rate published was that of railway company, which included in its rates to points of delivery or origin on terminal company's tracks. HELD: Invalid as not such agreement as is required for establishment of joint rate. Chicago & E. I. Ry. Co. v. Chicago Heights Terminal T. R. Co. (Ill., 1925), 147 N. E. 666.

(j) The service contracted for and performed under agreement between carrier and coal exchange, being the transportation of coal and its delivery into vessels, value of services to shippers was not impaired by dumping cars out of order, so as to make contract invalid, unless shipper was given lower rate. Smokeless Fuel Co. v. Chesapeake & O. Ry.Co., (Va., 1925) 128 S. E. 624.

(k) Claimant shipped two cars of cabbage to New York and upon learning that another car was to arrive on that day that these were supposed to requested the carrier to divert them to Jersey City. This was customary in the produce trade but was not understood to be a bona fide diversion but a request to delay the car at Jersey City. The carrier failed to obey the request but delivered the cars to New York by reason of which they brought a lower price than had they been delayed. In a suit for conversion the court held that an agreement to divert as a request to delay the shipment was a special contract which was not legal under the Interstate Commerce Act unless carried in the published tariff of the carrier and open to everyone. Eastern Shore of Virginia Produce Exchange v. New York, P. & N. R. Co. (Va., 1925), 126 S. E. 674.

(l) If carrier makes a contract to deliver within a particular time, it must publish a rate for such service open to all, otherwise it extends an advantage to one not extended to all, in violation of Elkins Act Feb. 19, 1903, §1 (1) (U. S. Comp. St. § 8597), amending Act Feb. 4, 1887. Eastern Shore of Virginia Produce Exchange v. New York, P. & N. R. Co. (Va., 1925), 126 S. E. 674.

(m) To permit the consignor to send a shipment consigned to themselves constitutes the extension of a special privilege to the shipper in so far as that part of instructions leading to the notifying of parties concerned unless there is on file a tariff which permits such a practice. Wall v. American Ry. Express Co. (Mo., 1925), 272 S. W. 76.

III. LIABILITY.

§4. Damages for Breach.

(2) In General.

(a) Where performance of a contract by a railroad company to transport logs for a lumber Company at an agreed rate. was made impossible by the action of state authorities in establishing a higher rate, it cannot be held liable on the contract for the lawful rate collected in excess of the contract rate. Northern Pac. Ry. Co. v. St. Paul & Tacoma Lumber Co., 4 Fed. (2d) 359.

(b) A condition subsequent in a deed, providing for the reversion of real property in case any certain act is done or omitted, is inoperative where the doing or omission is compelled by public authority. Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, 449.

(c) In so far as the alleged violation of section 3 is concerned the Commission is of the opinion that the acts complained of do not come within the prohibition of section 3. That section does not apply to the making of contracts by a carrier for the purchase of equipment. The fact that the equipment is apparatus for automatic train stop or train control devices which the Commission has authority, under section 26, to require a carrier to install in accordance with specifications and requirements prescribed by it, does not extend the applicability of the prohibitions of section 3 to matters connected with the selection or purchase of such equipment. Automatic train control devices. 112 I. C. C. 259, 260.

IV. ACTIONS TO ENFORCE.

See Actions at Law.

§5½. In General.

(a) Nor can the mill owner recover consequential damages which may result because of the failure of the railroad company to perform the contract since the passage of said acts. Whitaker Glessner Co. v. Wheeling Terminal Ry. Co. (W. Va., 1925), 127 S. E. 639.

(b) Where a railroad company has filed with the Interstate Commerce Commission and with the Public Service Commission of this state acceptable tariffs in proper form, duly published as required by the Act of Congress regulating interstate commerce (U. S. Comp. St. § 8563 et seq.) and the Public Service Commission Act of this state, respectively, regulating charges for hauling slag, cinders, ashes, and wastage from iron and steel mills located on its railway, a contract between an iron mill owner and the railroad company, executed before the passage of said acts, by which the latter agreed to haul away the wastage from the mill at its own expense, in part consideration of a deed to a right of way for its tracks over the land of the former, cannot be specifically enforced. Whitaker Glessner Co. v. Wheeling Terminal Ry. Co. (W. Va., 1925) 127 S. E. 639.

(c) Carriers serving the city of Atlanta acquired certain land from the city on which they erected terminals. Part of the land was not used and certain produce merchants of the city were induced to locate there in a building built by the carriers called Produce Row and the principle purpose of which was to obtain the routing of traffic over the lines of the carriers. The plaintiff became a tenant and his lease expired December, 1923. The carriers were dissatisfied with the amount of tonnage he handled owing to routing of his freight and the fact that he permitted certain outsiders to send their cars into his part of the side track and notified him that they would not renew his lease. HELD: The trial judge had a right to refuse to grant an injunction which the plaintiff requested to prevent eviction. Williams-Thompson Co. v. Louisville & N. R. Co. (Ga., 1925), 126 S. E. 833.

V. AS EVIDENCE OF REASONABLE RATES.

§7. In general.

(a) A contract between carrier and shipper contemplating the establishment of a certain rate for a particular service is not conclusive in determining the maximum reasonable rate for the service. Union Sulphur Co. v. T. & N. O. R. R., 98 I. C. C. 76, 81.

SPECIAL RATES AND SERVICES

See Additional Charges and Services; Car Ferry; Cars and Car Supply §9¼, §9½, §9⅝, §9¾, §9⅞; §10, §10½, §11, §11½, §11¾, §11⅞; Distance Rates §3 (4q); Expedited Service; Facilities and Privileges §9, §10, §12½; Passenger Fares and Facilities §7¾; Precooling; Protective Service; Reasonableness of Rates §31; Reconsignment; Refrigeration §3; Reparation §14; Stock Yard Companies; Stoppage in Transit; Switch Tracks and Switching §5; Transportation §8; Warehousing; Weights and Weighing.

(a) With the possible exception of livestock traffic and such commodities as move in refrigerator cars, the record indicates that the vegetable traffic requires special services, equipment, and facilities that are not required by other commodities referred to, thereby increasing the difficulties and costs of transportation. Mississippi R. R. Commission v. A. & R. R. R. Co., 98 I. C. C. 55, 63.

SPECIAL TRAINS

See Allowances §8 (5); Facilities and Privileges §12½; Switch Tracks and Switching.

STATE RATES AND REGULATION

See Accounting §2; Act to Regulate Commerce; Advanced Rates §5 (7¼); Bills of Lading §11½ (a); Cars and Car Supply §33; Class Rates §2 (tt); Classification §28 (x); Courts III, V; Demurrage §1½; Discrimination §2½, §8 (6), §11, §12½; Equalization of Rates §5, §13 (6), V; Evidence §13 (6), §25; Express Companies §1½; Interstate Commerce I, §2, §4, §5, §10; Interstate Commerce Commission §10, III; Jurisdiction of Commission; Loss and Damage, §2, §3, §5; Reasonableness of Rates §3; Reparation §½ (f); Routing and Misrouting §4½, §13; Tariffs §17; Through Routes and Joint Rates, §16½, §19, §22; Undercharges §7½; Water Carriers §4½.

(a) A reduction in rates on cotton would have a very serious effect on the ability of many short lines serving Mississippi to earn sufficient revenue to serve the public efficiently as many short roads serving that state are unable to stand any appreciable losses in revenue. Traffic density of these short roads is low and while they are seeking to stimulate greater production of farm produce the tonnage has not yet reached a heavy state. Some short lines are unable to pay operating costs; the rates from many points on such roads are held down by force of cross-country competition with points situated on stronger trunk-lines; and to compel them to bear any greater strain would undoubtedly cause an impairment of service inimical to the general welfare of Mississippi. Mississippi R. R. Commission v. A. & V. Ry. Co., 89 I. C. C. 47, 69.

(b) Ordinarily the commission does not have jurisdiction over intrastate rates in absence of a showing of substantial disparity which operates as a real discrimination against and obstruction to interstate commerce. Direction rests with State authorities to deal with interstate rates on general levels found by the commission to be fair to interstate commerce. Wisconsin R. R. Commission, 257 U. S. 563. Lake Dock Coal Cases, 89 I. C. C. 170, 200, 201.

(c) Maintenance of fertilizer basis of rates on nitrate of soda intrastate in Louisiana and Texas is not of itself a reason for requiring extension of that basis to movements of nitrate of soda from New Orleans, La., to Arkansas. New Orleans Joint Traffic Bureau v. A. & V. Ry. Co., 89 I. C. C. 223, 226.

(d) Rates on rough quarried Bedford limestone from Bedford district of Indiana to St. Paul and Minneapolis, Minn., found not unreasonable as compared with rates on rough and dressed stone from Bedford to various other points, and from points in various states to the Twin Cities, for comparable distances. Young v. C., I. & L. Ry. Co., 89 I. C. C. 428.

(e) Differences in transportation and traffic conditions must be taken into account in considering comparisons of intrastate rates in different states. Nebraska Livestock Case, 89 I. C. C. 444, 451.

(f) The commission has no jurisdiction over rates and charges collected for intrastate transportation subsequent to Federal control. Kingan & Co. v. Director General, as Agent, 89 I. C. C. 550.

(g) Based upon cost figures, minimum charge of $5 per car for movement of livestock at Indianapolis, Ind., from stockyards to complainant's plant, during Federal control, found not unreasonable. The transportation involves a road haul and two terminal handlings as well as preferred service in trainload lots and the return of approximately 100 per cent empties. If very small allowances for terminal and line-haul expenses were applied to a movement of this character, it would result in much higher cost per car than charge here assessed. Kingan & Co. v. Director General, as Agent, 89 I. C. C. 550.

(h) Complainant attacked commodity rates on sand and gravel carloads, between May 1, 1918 and Nov. 25, 1919 from Carpenterville to Edison Park and Park Ridge, Ill., as unjust, unreasonable, unjustly discriminatory and unduly prejudicial and preferential. Carpentersville is on a branch of the C. & N. W., extending from the junction at West Chicago with the Galena division of that carriers main line westbound, northerly to Crystal Lake, where it intersects the Wisconsin division of the main line from Chicago to St. Paul. It is about 18 miles from West Chicago and 10 miles from Crystal Lake. Park

Ridge and Edison Park are stations 1 mile apart on the Wisconsin division in the so called outer zone of the Chicago district, 40 and 41 miles from Carpentersville via Crystal Lake, the short line distance. Charged 2c prior to June 24, 1918 and 3c thereafter, while to Mayfair 5 miles south of Edison Park, rates of 1.5c and 2.5c were applicable, Edison Park and Park Ridge being intermediate via Crystal Lake. The tariff publishing the rate of 1.5c restricted the routing via West Chicago, no further restriction beyond. It was possible to protect the rate of 1.5c to Mayfair over a route beyond West Chicago via Proviso and Des Plaines, and over this route Edison Park and Park Ridge are intermediate to Mayfair. The rates to the latter point were applicable to Edison Park and Park Ridge. HELD, legal rates were 1.5c and 2.5c, reparation awarded. Richardson Sand Company v. Director General, 89 I. C. C. 555.

(i) Upon further hearing and reargument, previous report, 69 I. C. C. 282, charges on traffic from points west of Hudson River to the J. L. Kelso Co. warehouse on the Union Freight R. R., in Boston, Mass., found unreasonable and unduly prejudicial to extent they exceeded rates on like traffic to deliveries on the Boston & Albany, Boston & Maine, and New York, New Haven & Hartford railroads in the Boston district. Line-haul carriers refuse to absorb charges on the Union while making deliveries at all other points in and about Boston at the Flat Boston rates. Reparation awarded. Boston Wool Trade Asso. v. Director General, as Agent, 89 I. C. C. 589, 593.

(j) Rate on salt between West Cambridge, Mass., and East Cambridge, Mass., during Federal control found unreasonable as compared with lower rates on soda ash, which is twice the value of salt and of lighter loading. Boston Wool Trade Asso. v. Director General, 89 I. C. C. 596, 599.

(k) Complainant attacked combination rates charged on carloads of lumber and box shooks, during the period Oct. 31, 1918 to Feb. 29, 1920, from McCloud, Calif., to points in California on the S. P., Santa Fe, L. A. & S. L., W. P., Northwestern Pacific, Visalia Electric and Pacific Electric as inapplicable. Shipments moved from McCloud via the McCloud River railroad to Sisson, Calif., the junction points with the S. P., and thence by way of the latter carrier to destinations on its line or junction points with other delivering lines. Charged combination rates over Sisson and various other junction points. Contention is that lower through rates, constructed in accordance with combination rules contemporaneously published in defendants tariffs, were applicable to the shipments. In 62 I. C. C. 643 and 73 I. C. C. 551 the Commission held that where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to a single increase, there is a holding out to shippers of the rate so constructed, which the carrier publishing the rule is obliged to protect. HELD, during the period Feb. 15 to August 24, 1919, the rates charged were applicable. The rates charged were inapplicable between Oct. 31, 1918 to Feb. 14, 1919 to extent they exceeded rates establishing by use of combination rule and between August 25, 1919 and Feb. 29, 1920 rates were applicable as constructed by use of combination rule, reparation awarded. McCloud River Lumber Co. v. Director General, 89 I. C. C. 645.

(l) Complainant attacked commodity rates charged on sugar beets carloads to Blissfield, Mich., Fremont and Findlay, O., as unjust and unreasonable, unduly preferential and unjustly discriminatory in favor of intrastate commerce. Blissfield is on the N. Y. C., and T. & W. Electric line; Findlay by the L. E. & W., C. C. C. & St. L., and B. & O.; Fremont by the L. E. & W., and W. & L. E. Blissfield is 21.6 miles north of Toledo, O., and Findlay and Fremont are 44 miles south and 30 miles east of Toledo, respectively. The movement to the Findlay and Freemont plants is practically all intrastate. The interstate movement to Blissfield is about two thirds of the total movement to that plant, and is 27.2% of the total tonnage to all three plants. Beets move in open top equipment, are not loaded at regular freight stations, but at special sidings built at or between regular stations. There is practically a 100% empty movement. The sugar beet traffic is peculiarly a short haul movement, and seldom moves for distances in excess of 100 miles, average haul 40 miles. Present single line interstate scale was established when the sugar beet industry was in its infancy, there being no regularity as to joint line rates, the only reduction being the 10% reduction in July, 1922. Record is

clear that there is no transportation condition justifying different rates on interstate traffic than apply intrastate for hauls of the same length. HELD, interstate rates attacked unreasonable and unduly prejudicial and unjustly discriminatory against interstate commerce. This should be removed by establishment of distance rates ranging from 60c for 10 miles and under to 135c for 100 miles, single line, joint hauls an additional charge of 20c to be added, reparation awarded. Continental Sugar Co. v. N. Y. C. R. R., 91 I. C. C. 677.

(m) Complainant attacked class rate charged on 24 tank cars of refined cottonseed oil between August 1918 and February 1920 from Los Angeles to San Francisco and South San Francisco, Calif., as unjust and unreasonable. Shipments moved via S. P., 467 miles, charged fifth class of 34.5c. On February 29, 1920 defendants established a commodity rate of 28c which was the rate in the opposite direction on cottonseed, fish, nut, seed and soya bean oils. The volume of traffic is northbound. HELD, rate attacked unreasonable to extent it exceeded 28c, reparation awarded. Los Angeles Soap Co. v. Director General, 91 I. C. C. 691.

(n) D. & R. G. W., respondent proposed certain changes in its interstate and intrastate rates on petroleum and its products, in carloads, from Pueblo and Walsenburg, Colo., to destinations on its line. Rates are usually made on basis of combinations to and from Pueblo and Walsenburg. Effective Dec. 20, 1922 proportional rates were established from Pueblo and Walsenburg 2.5c lower than the local commodity rates and published so as to reflect but a single increase in the through rates, thereby eliminating the use of the socalled combination rule without a change in the existing through rates. Subsequently the combination rule was canceled. On Jan. 20, 1924 pursuant to order of the Colorado Commission respondent made reductions in its fifth class rates from Pueblo and Walsenburg to most of the Colorado destinations on its line. In the schedules under suspension, respondent proposed to cancel the local and proportional commodity rates, leaving the new fifth class rate in effect, state and interstate, local and proportional. Respondent proposed to continue local commodity rates from Florence to various points on its line, which are materially lower than the fifth class rate. It is clearly shown that there is no justification for the proposed increase in the proportional rates to the fifth class basis, and the increases resulting therefrom in the through combination rates. It does appear that some readjustment of the rates under consideration is necessary in view of the changes in the fifth class rates. HELD, schedules not justified. Petroleum between Colorado, New Mexico and Utah, 91 I. C. C. 734.

(o) Complainant attacked commodity rates charged on pig iron, carloads from South Chicago, Ill., to Acme, Ill., during federal control as unreasonable, unjustly discriminatory and in violation of long and short haul section. Shipments moved as routed by shipper over the C. S. L. to Whiting, Ind., and I. H. B., to junctions with the line haul carriers, charged $1.32 prior to June 25, 1918, and $1.70 on and after that date. A rate of $1.15 prior to June 25, 1918 and $1.40 thereafter applied from South Chicago to Keokuk, Iowa. On Dec. 20, 1919 a rate of $1.40 was established via all routes. HELD, rates attacked unreasonable to extent they exceeded $1.15 prior to June 25, 1918 and $1.40 thereafter, reparation awarded. Keystone Steel & Wire Co. v. Director General, 91 I. C. C. 741.

(p) Complainant attacked commodity rate of 60c charged on sand, carloads, from Thornburgh to Cleveland, O., between May 1919 and February 1920 as unreasonable and unduly prejudicial. Thornburgh is a local station on the B. & O., 11 miles south of the public square in Cleveland. Prior to February 1920 it was 1 or 2 miles south of the limits of the switching district, but on that date the switching rates were 30c to industries on the B. & O., and 40c on shipments to industries on other lines. The distances from Thornburg to points of delivery in Cleveland are practically the same as those from pits within the switching district and the services performed for shippers within and immediately outside the switching district were not substantially dissimilar during federal control. HELD, rate charged not unreasonable, but unduly prejudicial reparation denied through lack of proof. Cleveland Sand & Gravel Company v. Director General, 92 I. C. C. 45.

(q) Complainant attacked commodity rates charged on 58 cars of wooden ties shipped intrastate from Missouri to

St. Louis, Mo., between June 13, 1919 and February 27, 1920, as unjust, unreasonable and illegal. Shipments moved M. P., and Frisco, charged commodity rates published on wooden ties in M. P., I. C. C. A 4018 and Frisco I. C. C. 7227. The carriers named were parties to Lelands I. C. C. 1182 in which a distance scale of commodity rates prescribed by the Missouri Commission for the intrastate movement was published under protest. HELD, shipments overcharged to extent they exceeded the distance tariff contemporaneously published, reparation awarded. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311.

(r) Complainant attacked intrastate rates on cement, carloads, shipped from Superior, Neb., to destinations in Nebraska between April 1, 1920 and May 3, 1922, as unreasonable, unduly prejudicial and unjustly discriminatory. Superior is served by the Northwestern, Burlington, M. P., and Santa Fe, complainants plant being on the Burlington. The destinations are on the Northwestern. The direct route of that carrier from Superior is entirely within Nebraska, over which the distance to Fremont is 147 miles. Through interstate rates are available over the Santa Fe, M. P., or Burlington in connection with the Northwestern, the most direct being that of the Burlington to Geneva, Neb., and the Northwestern beyond, over which the distance is 14 miles greater than over the Northwestern direct. All of the shipments moved intrastate over the Northwestern, and charges were collected at intrastate rates. Lower rates were in effect from Superior to those destinations over interstate routes, which were the scale 111 rates prescribed in 48 I. C. C. 201, 53 I. C. C. 225. In 69 I. C. C. 644, the interstate rates from Superior to these Nebraska points were based on an average of the present scale 11 and scale 111 rates. Effective Jan. 1, 1923, the intrastate rates on the same basis were prescribed by the Nebraska Commission. HELD, complaint dismissed. Nebraska Cement Co. v. C. & N. W. Ry., 92 I. C. C. 457.

(s) The jurisdiction of the Commission over intrastate rates is prescribed by sections 3 and 13 of the act. The Commission has no authority to pass upon the measure of such rates except as provided in those sections. Nebraska Cement Co. v. C. & N. W. Ry., 92 I. C. C. 457, 460.

(t) In 60 I. C. C. 337, the Commission prescribed rates and charges for all freight service, except on coal for distances of less than 30 miles, for intrastate application in Indiana, which would remove undue prejudice found to exist against persons and localities outside the state and remove unjust discrimination found to exist against interstate commerce. Upon petition evidence was received with respect to rates for the movement of coal from mines located within Terre Haute, Ind., yard limits and the switching limits of the Big Four to points within said yard limits and switching limits; rates on baled straw, carloads, from Veedersburg, Hillsboro, and Layton, Ind., to Marion, Ind., rates on coal from the Linton district in Indiana to Putnamville, Ind., rates on coal from mines in the Linton, Brazil and Princeton districts to Irvington, Ind., rates on brick from Veedersburg and Martinsville, Ind., to Irvington; and rates on coke from points within the switching limits of Indianapolis to Irvington. Coal was shipped from the Wabash, Riverside and lower Vein mines on the Big Four located 2.02, 2.87 and 2.83 miles from its freight station and within its Terre Haute switching limits to various points in Terre Haute but in each case over routes entirely within the state, and for distances of less than 30 miles. At the termination of federal control there was a uniform rate into Terre Haute of 60c on one line hauls. On Oct. 4, 1920 the Indiana Commission fixed a rate of 55c for hauls of 10 miles and less and a rate of 65c for hauls of more than 10 miles and not more than 30 miles, and provided that for any switching movement not incident to a road haul the charge on coal should not exceed $10 per car. HELD, the order of Jan. 28, 1921 did not require any change in coal rates for hauls of 30 miles or less within Indiana, and there is therefore no necessity for any finding or order respecting the situation here considered in this proceeding at this time. Prior to 58 I. C. C. 220, the rate on coal from the Linton district to Putnamville was 90c. Interstate rates were increased 40%. The Indiana Commission did not permit a corresponding increase in the intrastate rates in Indiana, but on coal for distances in excess of 30 miles permitted an

increase of 33⅓%. Under the order in this proceeding the rate became $1.26 reflecting a 40% increase from 90c. The average distance from the shipping points in the Linton group to Putnamville is about 60 miles. The $1.26 rate also applied from the Linton district to Indianapolis, an average distance of about 105 miles. During the period of the movement of brick from Veedersburg and Martinsville to Irvington the rates had not been subjected to any increase under order of this Commission, inasmuch as no corresponding interstate rates had not been so treated. No finding with respect to this commodity is therefore necessary. Prior to 58 I. C. C. 220 fifth class rates were applicable on straw from Veedersburg, Hillsboro and Layton to Marion. Interstate rates were increased 40%. The Indiana Commission did not permit a corresponding increase, but prescribed a scale of rates about 15% lower than the interstate scale on the same commoditv. The distances are 134. 129 and 137 miles. Rates charged were 21c prior to Jan. 1, 1922 and 19c thereafter. The rate of 13.5c which was published on Feb. 20, 1922 was the rate under the above scale, plus the general increases for distances of 125 to 150 miles. The record shows that in this general territory straw usually moved on commodity rates and the assessments of class rates was unusual. HELD, rates on coal from Linton, Brazil, Princeton to Irvington and from Linton to Putnamville, coke from Indianapolis to Irvington and straw from Veedersburg, Hillsboro and Layton, Ind., to Marion, Ind., in effect on Jan. 28, 1921 did not cause any undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, or any undue, unreasonable, or unjust discrimination against interstate commerce. Indiana rates, fares, and charges, 92 I. C. C. 487.

(u) Complainant attacked rate of 9.5c charged on 149 cars of cement shipped from Crestmore, Calif., to San Pedro, Calif.. for exnort to Chile between August 2, 1918 and June 30, 1919, as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of fourth section. Crestmore is on the Salt Lake near Riverside, Calif., 56 miles east of Los Angeles. San Pedro is served by the Pacific Electric, the S. P., and Salt Lake, 25 miles south of Los Angeles. Shipments moved over Salt Lake to Rialto, Calif., 6 miles, thence Pacific Electric to destination. Shipments were tendered to the Salt Lake on bills of lading specifying routing "P. E." Joint domestic rate of 9.5c was charged. Prior to June 25, 1918, a rate of 3.75 was applicable on shipments destined for ocean carriage beyond San Pedro was in force over the route of movement. On that date, under G. O. 28, this rate was increased to 6c but was restricted to apply only on shipments intended for ocean movement from San Pedro to other points in the United States. On Feb. 20, 1920 this rate was again published to apply in connection with export shipments. Present rate on export traffic is 7c. HELD, rate attacked unreasonable to extent it exceeded 6c, reparation awarded. Riverside Portland Cement Co. v. Director General, 92 I. C. C. 667.

(v) Complainant attacked commodity rates charged on saw logs shipped from Meredith, Ore., to Springfield, Ore., during June, July, August and Sept., 1918 as unreasonable. Rates charged, published per unit of 1,000 feet, board measure, were $1.75 prior to and $2.19 on and after June 25, 1918, or 2.18c prior to and 2.75 on and after that date per 100 pounds. Meredith is on the Coos Bay branch of the S. P., 31.5 miles west of Springfield on the main line. On Feb. 11, 1918 a rate of $1.60 was established from Cram, 0.6 miles east of Meredith. The latter was then not shown as a station in the tariff. The record indicates that complainant and defendants were of the opinion that the rates from Cram would be applicable to these shipments from Meredith. A rate from Meredith was first established on Nov. 25, 1918, of $2 the same as that then applicable from Cram. HELD, rate attacked unreasonable, complaint dismissed. Booth Kelly Lumber Co. v. Director General, 92 I. C. C. 711.

(w) That a contract by a railroad company granting special rates to a shipper on local traffic was made before admission of the state does not exempt it from the operation of a law, subsequently enacted by the state prohibiting discrimination in rates and creating a public service commission with power to regulate rates. St. Paul & Tacoma Lumber Co. v. Northern Pac. Ry. Co. 296 F. 749.

(x) Act July 2, 1864, incorporating the Northern Pacific Railroad Company, HELD not to exempt a contract made by the company granting a special intrastate rate from the regulatory police power of the state. St. Paul & Tacoma Lumber Co. v. Northern Pac. Ry. Co. 296 F. 749.

(y) Pub. Laws 1912, c. 807, §4, providing for prevention of smoke nuisance, and subjecting to fine any person hindering inspection of engines and boilers, HELD within state's police power, and, in absence of action by Congress, not to violate commerce clause of federal Constitution, art. 1, §8, in authorizing inspection of boilers of vessels on navigable waters. State v. Leary (R. I., 1924) 125 A. 353.

(z) Pub. Laws 1912, c. 807, §4, providing for prevention of smoke nuisance, and subjecting to fine any person hindering inspection of engines and boilers, as applied to vessels on navigable waters within territory of state, HELD not to interfere with maritime jurisdiction of federal courts under Const. U. S. art. 3, §2, and U. S. Comp. St. §10445, limiting criminal jurisdiction of federal courts. State v. Leary (R. I. 1924) 125 A. 353.

(aa) The regulations by Congress properly made under the commerce clause of the Constitution, are comparable to the exercise of the police power by the states. United States v. Western & A. R. R. 297 F. 482.

(bb) The state has authority to declare a lumber company railroad a common carrier on its own application, and in accepting such company as a common carrier, and the Corporation Commission, in imposing on it, with its consent, the duties, privileges, and liabilities of such relation to the public, was acting for the state through its prescribed machinery. Corporation Commission v. Atlantic Coast Line R. Co. (N. C. 1924), 121 S. E. 767.

(cc) Commerce clause of federal Constitution (article 1, §8, cl. 3), of its own force, restrains states from imposing direct burdens on interstate commerce. State of Missouri ex. rel. Barrett, v. Kansas Natural Gas Co., 44 Sup. Ct. 544. Kansas Natural Gas Co. v. State of Kansas ex. rel. Helm, 44 Sup. Ct. 544. State of Kansas ex rel. Jackson v. Central Trust Co. of New York, 44 Sup. Ct. 544.

(dd) In absence of congressional legislation, a state may constitutionally impose taxes, enact inspection or quarantine laws, and, generally, laws of internal police, though they may have an incidental effect on interstate commerce. State of Missouri ex. rel. Barrett, v. Kansas Natural Gas Co., 44 Sup. Ct. 544. Kansas Natural Gas Co. v. State of Kansas ex. rel. Helm, 44 Sup. Ct. 544. State of Kansas ex. rel. Jackson v. Central Trust Co. of New York, 44 Sup. Ct. 544.

(ee) Abstract rules of construction stated in opinions of Interstate Commerce Commission in proceedings before it cannot affect Public Utilities Commission's decision as to whether freight rates or other charges are unreasonable and discriminatory. Jeremy Fuel & Grain Co. v. Public Utilities Commission (Utah, 1924) 226 Pac. 456.

(ff) In view of Comp. Laws 1917, §4838, authorizing Public Utilities Commission to order reparations only where no discrimination will result, Supreme Court would not direct Commission to allow or disallow reparations on shipments of coal sold by dealers in accordance with alleged excessive tariff rates paid by them. Jeremy Fuel & Grain Co. v. Public Utilities Commission (Utah 1924) 226 Pac. 456.

(gg) Complainant attacked commodity rates charged on 89 cars of bituminous coal from Mount Olive and Staunton, Ill., to West Pullman, Ill., between August 25 and Oct. 20, 1919, as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved via Wabash to Chicago, and Belt Ry. and C. W. P. & S., beyond, charged $1.31 plus $2.50 per car plus 10c per ton. Points of origin are in the Springfield group. Complainant admitted that the rates from Illinois mines to Chicago are low, and that the unreasonableness of the attacked rate can not be demonstrated by comparison with rates to other destinations. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Consolidated Coal Co. v. Director General, 93 I. C. C. 53.

(hh) Complainant attacked sixth class rate charged on 6 cars of old rags from New York, N. Y., to Binghamton, N. Y., during March 1923, as unreasonable and in violation of long and short haul clause. Shipments moved via D. L.

& W., charged sixth class of 25c on old rags. Shipments consisted of used Army knapsacks purchased by complainant from a dealer in surplus war material. The knapsacks after removal therefrom of the leather strips and metal buckles were sold by complainants to manufacturers of paper. When the shipments moved knapsacks were rated first class, any quantity, rate being 66.5c, undercharged. HELD, rate of 25c applicable, not unreasonable or in violation of the fourth section, complaint dismissed. Levenes Sons v. D. L. & W. Ry., 93 I. C. C. 103.

(ii) Complainant attacked commodity rates on bituminous coal over interstate routes from Linton and Clinton groups in Indiana to Marion, Kokomo, Elwood, Michigantown and Warren, Ind., as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments originated on the C. T. H. & S. E., delivered either to the T. St. L. & W., at Humrick, Ill., or L. E. & W., at Cheneyville, Ill. Prior to August 26, 1920 and since March 5, 1921 rates from Indiana groups to the destinations named were, and they now are, the same over both interstate and intrastate routes. During the intervening period rates over the intrastate routes were lower than those applicable interstate, due to the failure of the Indiana Commission to permit any increase until Oct. 4, 1920 and to its refusal to permit, even on that date, the same increases as were authorized in 58 I. C. C. 220. From Oct. 5, 1918 to August 25, 1920 the rate, intrastate and interstate, from the Clinton and Linton groups to all of the points named except Warren was $1.25; to Warren the rates were $1.40 from the Clinton and $1.45 from the Linton group. It has been customary to use the interstate routes through Humrick and Cheneyville rather than the intrastate routes, as the latter necessitate the use of a third carrier from Terre Haute to Frankfort. The consignors routed the shipments in the customary way, and the carriers were justified in assuming that movement over the usual routes was desired. HELD, shipments not misrouted, rates attacked not unreasonable, complaint dismissed. Wright & Wimmer v. C. T. H. & S. E. Ry., 93 I. C. C. 183.

(jj) Complainant attacked combination rate charged on 68 cars of tan bark shipped intrastate from Ross Spur, Wis., to Sheboygan, Wis., between Dec. 31, 1918 and Feb. 22, 1919 as unjust and unreasonable. Ross Spur is on the Milwaukee branch extending from Boulder Junction, Wis., northward to Blue Hill, Mich., distance of 13.5c. Sheboygan is served by the Northwestern. Shipments delivered to the Milwaukee unrouted. All but one moved over that line to Plymouth, Wis., Northwestern beyond 375 miles, the remaining shipment moved over Milwaukee to Wausau, Wis., Northwestern beyond, 251 miles, charged combination rate of 16c, composed of 3.5c from Ross Spur to Boulder Junction and 12.5c beyond. Tanbark takes lumber rates in Wisconsin, which are generally grouped as to points of origin and destination. It is the carriers policy to apply the group rates from branch lines serving points at which lumber or other forest products taking lumber rates originate and the same rates generally apply for single line and two line hauls. A rate of 14c was subsequently established via Wausau, Wis. HELD, rate attacked not unreasonable, complaint dismissed. American Hide & Leather Co. v. Director General, 93 I. C. C. 265.

(kk) Complainant attacked state rates charged on carloads of decomposed granite shipped between August 15 and Oct. 9, 1918, from Pacoima, Calif., to East San Pedro, Calif., as unlawful, unjust and in violations of sections 1 and 6 of the act. Shipments moved over S. P. to Los Angeles and L. A. & S. L., beyond, charged 60c to Los Angeles and 70c beyond, both of these factors being increased 1c per 100 pounds on June 25, 1918. A rate of $1.10 was applicable constructed by adding to the June 24, 1918 rates of 35c to Los Angeles and 54c beyond, a single increase of 1c per 100 pounds as per tariff of the L. A. & S. L. HELD, rate applicable $1.10, reparation awarded. Southwestern Shipbuilding Co. v. Director General, 93 I. C. C. 337.

(llmm) Complainant attacked distance commodity rates charged on cars of wood, shipped between July 26, 1919 and Feb. 28, 1920 from Mount Vernon, McIntosh, Palermo, Slades and Toinette, Ala., to Calvert, Ala., as unjust and unreasonable. Shipments were billed as wood moved over Southern to Calvert, where they were ground macerated, and other-

wise treated for the purpose of extracting oil, rosin and turpentine. Distance commodity rates on lumber were in effect from and to the above points, charged minimum charge per car of $15. The tariffs provided no rates specifically applicable to the traffic. HELD reasonable charges would be those applicable on lumber without regard to a minimum charge per car, reparation awarded. National Reduction Corp. v. Director General, 95 I. C. C. 284.

(nn) Complainant attacked commodity rates of 8 and 10c charged on steel wire, carloads from Monessen to Economy, Pa., as unreasonable and unduly preferential and prejudicial to extent they exceed 6.5c. Monessen is on the L. & E., and the route to Economy is via Homestead Transfer, and Pennsylvania R. R., 57 miles. Following 89 I. C. C. 606, rate was made 7c. HELD, rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Pittsburgh Steel Co. v. Director General, 95 I. C. C. 637.

(oo) Complainant attacked commodity rate of 45.5c charged on one car of strawberries shipped May 31, 1920 from Sarcoxie, Mo., to Kansas City, Mo., as unreasonable to extent it exceeded third class rate of 41.5c. Sarcoxie is in southeastern Missouri on the Frisco. The tariff provided a list enumerating only such articles as are given specific commodity rates; articles not specified will take class rates. Strawberries were not specified; but strawberries were accorded commodity rates in Lenand 1356 effective Dec. 31, 1919. HELD, commodity rate charged applicable, complaint dismissed. Singer v. St. L. S. F. Ry., 95 I. C. C. 667.

(pp) Complainant attacked commodity rate charged on 110 cars of bituminous coal shipped between Dec. 16, 1918 and July 27, 1919 from Panhandle, O., to Mingo Junction, O., as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved N. Y. C., to Dillonvale, O., thence W. & L. E., 30 miles, charged combination of 80c to Dillonville and 60c beyond. Mining operations at Panhandle were begun in 1918 and on Sept. 27, 1918 complainant applied to the Director General for a joint commodity rate but it was not until Dec. 7, 1919 that a commodity rate of $1 was published. HELD, rate attacked unreasonable to extent it exceeded $1, reparation awarded. Beacon Coal Co. v. Director General, 95 I. C. C. 687.

(qq) Complainant attacked commodity rates charged on domestic lump coal, carloads, between July 2, 1921 and March 31, 1922 from Mutual, Utah to Twin Falls, Idaho Falls, Hansen, Filer, Godwin and Kimberly, Idaho as unreasonable, unjustly discriminatory and unduly prejudicial. Mutual is on the D. & R. G. W., and traffic from that point is billed from Helper, Utah, shipments moving over D. & R. G. W., and O. S. L. It was the intention of defendants that lump coal rates should apply but the tariff was not so restricted. Effective May 7 1922 the tariff was amended so as to provide that mine run coal should include only coal as it comes from the mine, unscreened, unsized, and without any preparation whatever. HELD, rates applicable were rates on mine run coal, reparation awarded. Detweiler Coal Co. v. D. & R. G. W. Ry., 96 I. C. C. 88.

(rr) Complainant attacked class rates charged on 363 barrels of limecola syrup from Montgomery, Ala., to Mobile, Ala., during federal control as inapplicable. Charged third class of 30c prior to June 25, 1918 and 37.5c thereafter. Complainant contended that the commodity rates of 15 and 19c, respectively, applicable to syrup in wood or in tin cans, boxed, any quantity, as applicable. The commodity rates made the class rate inapplicable to syrup. HELD, charges attacked inapplicable, reparation awarded. Allen v. Director General, 96 I. C. C. 561.

(ss) Complainant attacked commodity rates charged on six tank cars of petroleum residuum from Wichita, Kas., to Elbing and Peabody, Kas., between August 1 and Nov. 1, 1918 as unreasonable. Charged 9c, all points on the Rock Island, Elbing 25.4 miles and Peabody 33.2 miles from Wichita. No comparisons were offered to show that the rates attacked were unreasonable. HELD, rate charged not unreasonable, complaint dismissed. Sterling Oil & Refining Co. v. Director General, 96 I. C. C. 586.

(tt) Upon petitions Increased Rates, 1920, 58 I. C. C. 220, and 60 I. C. C. 337, Indiana rates, fares and charges, were reopened with respect to rates on coal from the Clinton, Linton, Brazil, Princeton, and Boonville districts in Indiana to Crawfordsville, Sheridan, Lo-

gansport, Monticello, Anderson and Fort Wayne, Ind., and on sand and gravel from Terre Haute, Ind., to St. Marys of the Woods, Ind., and from Neal Gravel Company pit to Attica, Ind. Prior to Oct. 1918, rates were maintained on coal between particular points in Indiana, but there was no general line of coal rates. A general structure of rates was established in that month as a consequence of the coal zoning system which had been inaugurated and under which eastern coal was zoned out of Indiana, making that state more dependent on local coal. The rates here considered were built up on those rates. The record does not establish that they were relatively excessive, because of this fact, and respondents explain that the rates established in 1918 were made with proper relation to the rates already in effect. The rates here considered were increased under the authority of the Indiana Commission to lesser degree than were the interstate rates in the same territory, and this record fails to show that the resulting relationship of interstate and intrastate rates was proper. On the other hand it appears that, because of competitive conditions, the relation between the intrastate rates here considered and the interstate rates between the same points and from Illinois and other states to these destinations was so close that the failure to increase the intrastate rates would have had a direct effect upon the interstate rates and traffic. RATES ON SAND AND GRAVEL. St. Marys of the Woods is a local point on the Big Four about 4 miles west of Terre Haute and 2 miles from the yard limits. Prior to August 26, 1920 the applicable rate was 50c. On that date the interstate rate became 70c, but no increase was made in the intrastate rate. On Oct. 5, 1920 the intrastate rates were made 55c under authority of the Indiana Commission. On March 15, 1921 under I. C. C. order the rate became 70c. This rate remained in effect until Nov. 16, 1921. On that date it was reduced to 58c and petitioners seek an order which will enable the Indiana Commission to pass upon the reasonableness of the prior rate. There were, according to the record, no interstate movements to St. Mary's during this period, or any other movements except those with which the petitioners are concerned, and it can not be found that the failure to increase the rate to St. Marys to the same extent that the interstate rates were increased would necessarily have had any effect upon interstate traffic or have resulted in discrimination against interstate commerce. HELD, the record does not warrant any change in the order on coal but rates on sand do not cause any undue prejudice against interstate commerce. Indiana Rates, fares and charges, 96 I. C. C. 644.

(uu) S. A. L., and F. C. & G., proposed to cancel commodity rates on wet phosphate rock, carloads, from interior producing points on their lines in Florida to Jacksonville, Fla., when for export or to be dried and reshipped by rail or water. Effective Feb. 12, 1921 respondents published commodity rates on wet phosphate rock, carloads, from Florida points to Jacksonville, to be dried and reshipped by rail or water. Effective April 9, 1921 they published rates on wet phosphate rock in carloads to Jacksonville for export. The rates to Jacksonville made effective on those dates were the same as amount as the rates from the same territory of origin to Fernandina, a point to which commodity rates on wet phosphate rock had been published for many years. The Seaboard had long maintained at Fernandina extensive phosphate rock terminals, built long before deep water was available at Jacksonville. It had and has no such terminals at Jacksonville. Fernandina is 28 miles more distant than Jacksonville from the points of origin over respondents lines, and the rates to Fernandina are applicable through Jacksonville. The chief reason given by respondents for cancellation of the rates to Jacksonville is the absence of movement. This record shows a substantial movement in 1924 and the probability of continued movement in increased volume. HELD, proposed tariffs not justified. Wet phosphate rock to Jacksonville, 96 I. C. C. 711.

(vv) Respondents proposed to reduce the rates on cement, in carloads, from Kansas City and Sugar Creek, Mo., and Bonner Springs, Kas., to St. Joseph, Mo., Leavenworth and Atchison, Kas., and intermediate points. Complainant attacked commodity rates on cement, carloads from Iola district to northeastern Kansas and northwestern Misouri, as unreasonable and unduly prejudicial. Re-

spondents state reductions are proposed for the purpose of meeting an intrastate rate of 7c from Sugar Creek and Kansas City to St. Joseph over the Santa Fe via Henrietta, Mo., and also over Santa Fe in connection with the Burlington via Kansas City. Present interstate rates from Sugar Creek and Bonner Springs to St. Joseph and Atchison are 9c and to Leavenworth 8c. The schedules under suspension propose rates of 7c from Kansas City, Bonner Springs and Sugar Creek to the destinations named. HELD, reductions proposed not justified. Cement from Kansas City to St. Joseph, 96 I. C. C. 718.

(ww) Complainant attacked commodity rate charged on 11 cars of hollow building tile, between Dec. 2 and 20, 1919 from Alberhill, Calif., to Saticoy, Edfu and Santa Paula, Calif., as unjust and unreasonable. Shipments moved over Santa Fe and S. P., charged 22.5c, which prior to June 25, 1918 was 18c. On that date it was increased 25% under G O 28. On May 23, 1919 the 2c flat increase provided in that order on brick except enameled or glazed, was extended to items shown in tariffs taking brick commodity rates, and on Sept. 24, 1919, the 2c flat increase was further extended to clay and clay products where the rates on those commodities were the same as or based on arbitraries higher than the rates on brick, other than enameled or glazed. Distance from Alberhill to Saticoy and Edfu was 174 miles and to Santa Paula 167 miles. The attacked rates are higher than rates on lime, cement, and plaster between various points in California for similar distances, which commodities are comparable from the standpoint of value and transportation hazards with hollow building tile. The 17c rate requested by complainant is that which was in effect on fire and wire cut face brick between the points in issue. HELD, rate attacked unreasonable to extent it exceeded 17c, reparation awarded. Los Angeles Pressed Brick Co. v. Director General, 98 I. C. C. 45.

(xx) Complainant attacked commodity rate charged on 325 cars of sand between Jan. 1, 1918 and Dec. 15, 1919 from Falls Creek, Pa., to Vandergrift, Pa., as unreasonable, movement being intrastate. The shipments were switched by the B. R. & P., a distance somewhat less than a mile to the interchange with the Pennsylvania at Falls Creek and moved thence over the rails of the latter line to destination, about 108 miles. The rate from Falls Creek to Vandergrist was increased on April 8, 1918, from $1.05 to $1.20 and was further increased on June 25, 1918 to $1.40. Complainant paid in addition the switching charge of B. R. & P., of $4.50 per car. Prior to June 17, 1919 the Pennsylvania absorbed switching charges at Falls Creek only on stone from certain industries named in the tariff when the rate was $1.50 per ton or over. On that date sand also was included and the consignor of complainants shipments was named. On Dec. 29, 1919 the tariff was amended to provide for absorption of switching charges on all freight in lots of 12,000 pounds or over when loaded to full cubical capacity of the car, in one car, when the freight charges to or from the Pennsylvania tracks at Falls Creek, Pa., are $15 per car or over. HELD, charges attacked not unreasonable, complaint dismissed. United Engineering & Foundry Co. v. Director General, 98 I. C. C. 447.

(yy) Complainant attacked fourth class rate charged on empty wooden boxes returned from Los Angeles to various points in California between July 17, 1918 and Feb. 25, 1920 as unreasonable and unlawful. The cars used, 25 in all, were, with probably three exceptions, loaded to full visible capacity. All were tendered to the carriers as carloads. They were charged prior to Dec. 30, 1919 at minimum fourth class rate of 15c on minimum of 20,000 pounds, and on and after that date the class B or class E rate, with its minimum. Under section 1 of rules 18 and 15 of the classification the lowest charges, either at the carload rates and minima or the less carload rates and actual weights, were applicable. HELD, charges attacked inapplicable overcharges based on less carload rates at actual weight, subject to minimum of $15 per car, reparation awarded. Klein Simpson Fruit Co. v. Director General, 98 I. C. C. 547.

(zz) Prior to Transportation Act and federal control, Interstate Commerce Commission had no control over intrastate transportation or rates, except as their enforcement discriminated against interstate commerce. New York and Pennsylvania Co. v. New York Cent. R. Co. (Penn. 1924) 126 Atl. 382.

(3a) Local freight rates were in abeyance during federal control and, as far as interstate commerce was concerned, were subject to control of Interstate Commerce Commission until September 1, 1920, but after March 1, 1920, intrastate rates were subject to control of state Public Service Commissions, without requiring approval of Interstate Commerce Commission. New York & Pennsylvania Co. v. New York Cent. R. Co. (Penn. 1924) 126 Atl. 382.

(3b) Under Public Service Commission Act (Pa. St. 1920, § 18057 et seq.) failure to appeal from decision of commission makes decision conclusive in subsequent proceeding for reparation, covering excessive charges demanded and paid. New York & Pennsylvania Co. v. New York Cent. R. Co. (Penn. 1924) 126 Atl. 382.

(3c) To prevent unlawful discrimination against interstate commerce, state board of railroad commissioners may properly increase intrastate rates to conform to rates determined to be reasonable by federal agencies, any contracts for special rates notwithstanding. Hawkeye Portland Cement Co. v. Chicago R. I. & P. Ry. Co. (Ia. 1924) 201 N. W. 16.

(3d) Under Const. art. 6, §§1, 28, and 31, the Railroad and Warehouse Commission, or its successor, the Public Service Commission, has no jurisdiction or authority to determine the purely judicial question involved in a claim for damages by a shipper arising out of an excessive freight charge. State v. Public Service Commission (Mo. 1924) 259 S. W. 445.

(3e) Imported shipments of fertilizer and fertilizer materials delivered and stored in warehouses at Wilmington, N. C., and subsequently shipped under new bills of lading to North Carolina destinations, found to be intrastate traffic and not within Commission's jurisdiction. At time shipments were stored there was no original or continuing intention to ship goods to any particular inland destination, but they were to be sold wherever a sale might be found, otherwise they were stored and transportation ceased. Shipments here involved fall within class of shipments "where a local shipment follows quickly upon in interstate shipment and yet is not to be deemed part of it, even though some further shipment was contemplated when original movement began." See Settle Case, 260 U. S. 166. Goldsboro Chamber of Commerce v. A. C. L. R. R. Co., 91 I. C. C. 315, 321.

(3f) Fifth class rate on refined cottonseed oil from Los Angeles, Calif., to San Francisco and South San Francisco, Calif., during Federal control, found unreasonable to extent it exceeded lower commodity rate applicable in opposite direction on cottonseed, fish, nut, seed, and soyabean oils, in packages, c. l., and on cocoanut oil, in tank-car loads, which lower rate was subsequently established in both directions. Reparation awarded. Los Angeles Soap Co. v. Director General, 91 I. C. C. 691.

(3g) Rates on pig iron from South Chicago, Ill., to Acme (Peoria), Ill., during Federal control, found unreasonable as compared with lower rate from South Chicago to Keokuk, Iowa, a farther distant point, which lower rate was subsequently established from South Chicago to Acme, thereby removing any fourth-section departures that may have existed. Reparation awarded. Keystone Steel & Wire Co. v. Director General, 91 I. C. C. 741.

(3h) Rate on hollow building tile from Kankakee, Ill., to Chicago, Ill., during Federal control, found not unreasonable. Rate assailed compares favorably with rates prescribed by Commission in National Paving Brick Mfrs. Asso., 68 I. C. C. 213, for interstate short hauls on articles in uniform brick list, including hollow building tile, for application within c. f. a. territory, including all points in Illinois. Illinois Fire-Proof Construction Co. v. Director General, 91 I. C. C. 753.

(3i) In 58 I. C. C. 220, the Commission authorized increases in interstate rates of 40 per cent in the eastern group. The Indiana Commission authorized increases in rates in coal of 33⅓%. In 60 I. C. C. 337, the Commission prescribed rates in Indiana, except on coal for distances of less than 30 miles, which would remove undue prejudice found to exist against persons and localities outside the state and remove unjust discrimination found to exist against interstate commerce. The proceeding was reopened and the Commission is requested to except from the order the rates on coal from Boonville, Chandler, Francisco, Oakland City, and Winslow, Ind., to Tell City and Cannel-

ton, Ind., in order that the Indiana Commission may be permitted to pass on the March 15, 1921, and April 7, 1922. The reasonableness of those rates between points of origin and destination are on the Southern, 15.8, 24 and 30 miles west of Huntingburg. The rate charged was that established March 15, 1921, in response to the order. The rates which the petitioners will ask the Indiana Commission to find reasonable are those prescribed in 73 I. C. C. 27, increased 40%, namely, 70c from Boonville and Chandler to Tell City, and from Boonville to Cannelton; and 80c from Winslow and Oakland City to Tell City and Cannelton and from Francisco to Tell City. HELD: Rates in effect on Jan. 28, 1921, did not cause any undue or unreasonable preference against interstate commerce. Indiana Rates, Fares and Charges, 100 I. C. C. 169.

(3j) Complainant attacked commodity rate charged on 38 cars of coal shipped between Sept. 4 and Oct. 17, 1919, from East Birmingham, Ala., to Jasper, Ala., as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved Southern to Parish, Ala., thence Northern Alabama 51 miles, charged 80c. Rate charged was the so-called normal or commercial rate on coal from and to these points. Complainant prior to movement requested establishment of lower rates and on Sept. 10, 1919, a rate of 55c was made effective. HELD: Rate attacked not unreasonable, complaint dismissed. Sheffield Iron Corp. v. Director General, 101 I. C. C. 31.

(3k) Complainant attacked commodity rate of 80c per ton on sand and gravel, carloads, from Scottsville, N. Y., to Kodak Park Siding, Rochester, N. Y., in Nov. and Dec., 1919, as unjust, unreasonable and unjustly discriminatory. Kodak Park Siding is within the general switching limits of Rochester, 1.2 miles south of Barnard, N. Y., and 5.2 miles north of Rochester proper on the New York Central. Shipments originated on the Pennsylvania and were delivered to the N. Y. Co., at a connection in Rochester which is 4.52 miles from Kodak Park Siding. Distance handled 14 miles, rate charged 80c to Barnard, a farther distant point. Complainant makes the contention that Kodak Park Siding is located within Kent St. territory and is therefore entitled to the rate applicable to Kent St. station. This contention is without merit. The tariffs of the N. Y. C. show that Kodak Park Siding is in Group E Switching territory of Rochester while Kent St. is in Group A. HELD, rate charged applicable, complaint dismissed. Eastman Kodak Co. v. Director General, 101 I. C. C. 103.

(3l) On hearing before State Railroad Commission to determine reasonableness of passenger rates, where issue framed by Commission itself involved only question of reducing rates over main line to 3 cents and over a so-called Nevada and California line to 4 cents, an order reducing rates on "main line and the standard gauge branch lines" to 3 cents was broader than the issue involved, and invalid. Southern Pac. Co. v. Bartine, 1 Fed. (2d) 323.

(3m) The burden is on a party attacking rate before Nevada Railroad Commission to show its unreasonableness; defendant carrier being entitled to be heard, to have process to compell the attendance of witnesses, to introduce evidence, and to rebut or explain evidence adduced against it. Southern Pac. Co. v. Bartine, 1 Fed. (2d) 323.

(3n) Consideration by Railroad Commission, in fixing passenger rates, of data compiled by Interstate Commerce Commission, but not introduced in evidence, HELD: Improper, and sufficient to invalidate order based thereon, notwithstanding such matter was clearly relevant and material, had it been properly admitted. Southern Pac. Co. v. Bartine, 1 Fed. (2d) 323.

(3o) Under Act May 29, 1884 (Comp. St. §§ 8690-8697), authorizing Commissioner of Agriculture to take measures to prevent spread of disease of cattle from one state into another, the government could supervise dipping of domestic cattle in county of state bounded by other state; such supervision having direct tendency to prevent spread of disease into other state. Thornton v. United States, 2 Fed. (2d) 561.

(3p) Laws Ga., 1910, p. 125, authorizing state veterinarian to assume charge of work of cattle tick eradication in cooperation with Federal authorities, and Laws Ga., 1918, p. 256, providing for dipping of cattle in accordance with recommendations by United States Bureau of Animal Industry, HELD: Acceptance of regulations and methods of Commissioner of Agriculture of United States under Act Cong. May 29, 1884 §3 (Comp. St.

§8691). Thornton v. United States, 2 Fed. (2d) 561.

(3q) Laws Ga., 1924, p. 173, requiring railroad steam locomotives to be equipped with automatic fire box doors, HELD: Invalid as to locomotives engaged in interstate commerce; Act March 4, 1915 (Comp. St. § 8604a) and Act of June 7, 1924, amending Act Feb. 17, 1911, § 2 (Comp. St. § 8631), and rules of interstate Commerce Commission, having exclusively occupied the field as to safety appliances on locomotives engaged in interstate commerce. Atlantic Coast Line R. Co. v. Napier, 2 Fed. (2d) 891.

(3r) Under Laws Minn., 1921, c 278, §§6, 9, regulating the fares of street railway company, the Railroad and Warehouse Commission has complete authority to fix rates so long as not confiscatory under the Fourteenth Amendment or in excess of the maximum fixed by the act. Duluth St. Ry. Co. v. Railroad and Warehouse Commission, 4 Fed. (2d) 543.

(3s) The Interstate Commerce Commission is vested with extraordinary power in the matter of regulating interstate commerce, but there is still left a clear field of operation for the states in the matter of requiring just and reasonable freight and passenger service for intrastate business so long as such requirements are not inconsistent with lawful orders of the Interstate Commerce Commission in the interests of interstate commerce. State v. Seaboard Air Line Ry. Co. (Fla., 1925), 104 So. 602.

(3t) By the law of this state all orders of the Railroad Commission are held to be prima facie reasonable and just, unless the parties resisting them present evidence on which the court may adjudicate the legality of the order. State v. Seaboard Air Line Ry. Co. (Fla., 1925), 104 So. 602.

(3u) Denial of jury trial in mandamus action by city to compel railroads to eliminate grade crossings is not violative of the Fourteenth Amendment, nor Federal Act to Regulate Commerce (Comp. St. §8563 et seq.); neither the Federal laws nor Constitution giving a right to trial by jury when local statutes and practice prescribe otherwise. Southern Ry. Co. v. City of Durham, N. C., 45 Sup. Ct. 51.

(3v) Laws N. Y., 1922, cc 580, 581, making it a crime to sell or expose for sale with intent to defraud meat or meat preparation falsely represented to be "kosher" or product "sanctioned by orthodox Hebrew religious requirements," HELD: Not violative of commerce clause of United States Constitution, in so far as they relate to meat and meat preparations shipped into state. Hygrade Provisions Co. v. Sherman, 45 Sup. Ct. 141; Lewis & Fox Co. v. Same, Satz v. Same, 45 Sup. Ct. 141.

(3w) In matters where the national importance is imminent and direct, even where Congress is silent, the states may not act at all. Sanitary Dist. of Chicago v. United States, 45 Sup. Ct. 176.

(3x) A state cannot, by legislative act, convert property used exclusively in business of private carrier into a public utility, or make owner a public carrier, since in so doing it would take private property for public use without just compensation, in violation of due process clause of Fourteenth Amendment. Michigan Public Utilities Commission v. Duke, 45 Sup. Ct. 191.

(3y) A state cannot fetter right to carry on interstate commerce within its borders by the imposition of unnecessary and unreasonable conditions or regulations. Michigan Public Utilities Commission v. Duke, 45 Sup. Ct. 191.

(3z) Pub. Acts Mich., 1923, No. 209, §§1, 2, 7, making all persons engaged in business of transportation of persons or property for hire by motor vehicle over public highways common carriers, prohibiting them from engaging in such business without permit, and requiring them to carry insurance or execute indemnity bonds, HELD: Burden on interstate commerce, not within police power as applied to private carrier engaged exclusively in interstate commerce. Michigan Public Utilities Commission v. Duke, 45 Sup. Ct. 191.

(4a) Pub. Acts Mich., 1923, No. 209, making persons engaged in transportation of persons or property by motor vehicles on public highways common carriers, HELD: Unconstitutional, as violative of due process clause of Const. Amend. 14, as applied to private carrier engaged exclusively in transportation of property for certain concerns, under contracts with them. Michigan Public Utilities Commission v. Duke, 45 Sup. Ct. 191.

(4b) Intrastate shipment of goods under bill of lading limiting liability to declared value according to forms of interstate Commerce Commission after en-

actment of second Cummins Amendment to Interstate Commerce Act (Act Aug. 9, where Interstate Commerce Commission had ordered railroads to adopt rules not discriminating against interstate commerce. Lancaster v. McCarty, 45 Sup. Ct. 342.

(4c) State commission in recommending that application for abandonment of line be granted, requested that when question of sale of the road is finally considered the order of sale be in alternate form, both as a going concern and as junk, in order to give people along the line an opportunity to buy and operate the road. HELD: Question is one properly to be brought before court having jurisdiction in the premises. Abandonment of Pelham & Havana R. R., 90 I. C. C. 51, 52.

(4d) In considering whether or not a proposed acquisition of control of one carrier by another is in the public interest, the commission must consider not only the interests of the people of the State in which an applicant is located but also the interests of the people of other states, including those states served by railroads connecting with lines of carrier to be controlled. Acquisition of D. & R. G. W. Common Stock, 90 I. C. C. 161, 166.

(4e) Shipments of wooden ties from various points in Missouri to St. Louis, during Federal control, found overcharged. Carriers publishing tariffs under which rates were assessed failed to cancel an agency tariff, to which they were parties, in which a distance scale of commodity rates prescribed by the state commission for intrastate movement was published, and which provided that rates named therein "will take precedence over rates in other publications which are higher." Rates on same commodity between same points via same route should not be included in different tariffs at same time. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311.

(4f) Intrastate rates on salt from Jacksonville and other Florida basing points to interior points in Florida, lower than the corresponding interstate rates applicable on through shipments from Ohio and Michigan producing points found to result in undue prejudice to shippers and localities in interstate commerce, undue preference of shippers and localities in intrastate commerce, and in unjust discrimination against interstate commerce. Salt Cases of 1923, 92 I. C. C. 388, 434, 438.

(4g) Complainant formerly shipped intrastate shipments via joint-line interstate routes to obtain benefit of rates lower than those applying intrastate. Carriers subsequently limited application of interstate tariff to interstate traffic. Upon complaint assailing rates charged on shipments moving intrastate via intrastate routes, HELD: Limitation in interstate tariff precluded its application to complainant's shipments. Moreover, the commission's jurisdiction over intrastate rates is prescribed by section 3 and 13 of the act, and it has no authority under the law to pass upon the measure of such rates except as provided in those sections. Nebraska Cement Co. v. C. & N. W., 92 I. C. C. 457.

(4h) Limitation, in order of Illinois Commerce Commission that proposed track from mine already having shipping facilities to connect with a second railroad not adjacent to it, should be used only to haul coal from mine, unless commission's consent for other use was had, did not change character of such track as an extension of road, to that of a private spur track, since when built the track would be open to use of all shippers on adjustment by commission of proportionate cost thereof. Cleveland, C. C. & St. L. Ry. Co. v. Commerce Commission, ex rel., J. K. Dering Coal Co. (Ill. 1925), 146 N. E. 606.

(4i) Under Const. art. 1, §17, street railway rates are subject to legislative control by municipality, which may authorize higher rate than maximum fixed by franchise without impairing obligation of contract, of which reservation of such control is part, subject to proviso that rates fixed must not be so unreasonable as to practically destroy value of company's property, in violation of the process and equal protection clauses of federal constitution. Dallas Ry. Co. v. Getter (Texas, 1925), 271 S. W. 1106.

(4j) State may not directly regulate, prohibit, or burden interstate commerce. Interstate Transit Co. v. Derr Co. (Mont. 1924), 228 Pac. 624.

(4k) All reasonable regulations, properly within the police power of a state and not in conflict with any act of Congress, may be applied by the states to carriers engaged in interstate commerce. Interstate Transit Co. v. Derr Co. (Mont. 1924), 228 Pac. 624.

(4l) States cannot enact laws for

specific end of regulating interstate commerce, but may enact laws for protection of general public against apprehended harm including that caused by those engaged in interstate commerce. In Re Opinion of the Justices (Mass., 1925), 147 N. E. 681.

(4m) Bingham Co-operative Marketing Act, providing for tobacco growers' co-operative marketing association, HELD, not encroachment or jurisdiction of federal government over interstate commerce, since Clayton Amendment to Sherman Anti-Trust law relinquishes superior rights to regulate interstate commerce with reference to agricultural products. Liberty Warehouse Co. v. Burley Tobacco Growers' Co-op. Assn. (Ky., 1925), 271 S. W. 695.

(4n) Grain Grading Act N. D. 1923, prohibiting buying of wheat by grade unless buyer secures from state grading license for himself or his agent, requiring buyer to separate dockage and return it to producer, unless distinctly valued and paid for, requiring buyer who buys on credit to execute to state a bond securing payment for all wheat so purchased, to keep record of all wheat bought, showing grade given, price paid at elevator, and grade fixed and price received at terminal market, and to furnish such data to state supervisor when requested, and authorizing supervisor to investigate and supervise the marketing of grain, and to make and enforce orders, rules and regulations necessary to carry out provisions of act, HELD, a direct interference with and a burden on interstate commerce, and an attempt by the state to prescribe rules under which an important part of such commerce shall be conducted, in violation of commerce clause of Constitution (article 1, §8, cl. 3), in view of annual shipment from state in interstate commerce of more than 125,000,000 bushels of wheat, constituting about 90 per cent of that produced within the state. Shafer, Atty. Gen. of N. D. v. Farmers Grain Co. of Embden, 45 Sup. Ct. 481.

(4o) Under the commerce clause of the Constitution (article 1, §8, cl. 3), a state cannot prescribe rules under which an important part of interstate commerce shall be conducted. Shafer, Atty. Gen. of N. D. v. Farmers Grain Co. of Embden, 45 Sup. Ct. 481.

(4p) Grain Grading Act N. D. 1923, constituting a burden on interstate commerce in violation of commerce clause of Constitution (article 1, §8, cl. 3), is not valid because of evils sought to be remedied thereby, since the power of correction rests with Congress and not with the state. Shafer, Atty. Gen. of N. D. v. Farmers Grain Co. of Embden, 45 Sup. Ct. 481.

(4q) Grain Grading Act N. D. 1923, violative of commerce clause of Constitution (article 1, §8, cl. 3), is not valid as an attempt on the part of the state, through inspection regulations, to assist in carrying out the purposes of the United States Grain Standards Act. (Comp. St. §8747½-8747½K.) Shafer, Atty. Gen. of N. D. v. Farmers Grain Co. of Embden, 45 Sup. Ct. 481.

(4r) When the Corporation Commission has published an order prescribing the freight rates to be charged by common carriers within this state, and such order, so promulgated, provides for certain rates to be charged on certain kinds, grades, or values of cattle, in an action to recover damages for the killing of any cattle so shipped, through the negligence of the carrier, HELD, the order of the corporation commission is competent evidence to prove the rates so fixed, and to prove the cattle shipped were within a certain class, and valuation placed thereon by the shipper and the lawful rates for such class or valuation. Shaff v. Kramer (Okla., 1925), 235 Pac. 517.

(4s) Federal Transportation Act 1920, §208(a) (U. S. Comp. St. Ann. Supp. 1923, §10071¼d), prohibiting, during certain period, reduction of rates without approval of Interstate Commerce Commission, did not preclude the Railroad Commission from awarding reparation of excessive rates on shipments transported during such period, under Public Utilities Act, §71. Southern Pac. Co. v. Railroad Commission (Calif., 1924), 231 Pac. 28.

(4t) Under Public Utilities Act Railroad Commission has both legislative and judicial powers; power to fix rates being legislative, and the power to award reparation being judicial. Southern Pac. Co. v. Railroad Commission (Calif., 1924) 231 Pac. 28.

(4u) Under Ky. St. §§816, 821, 822, 825, 828, 829 (Acts 1916, c. 18, §14), railroad commission had jurisdiction to regulate joint rate of a railroad company and steamboat company; Acts 1920, c. 26, Acts 1922, c. 102, merely being declaratory of existing law. Southern Ry. Co. v. Louisville Cooperage Co. (Ky., 1924), 266 S. W. 382.

(4v) The courts will not, under Ju-

dicial Code, §266 (Comp. St. §1243), enjoin enforcement of order of state public service commission prohibiting railroad from discontinuing switching service for certain shipper, on theory that continuance of service results in undue discrimination, where the matter has not been investigated and passed on by the Interstate Commerce Commission. Western & A. R. R. v. Georgia Public Service Commission, 45 Sup. Ct. 409.

(4w) Under Transportation Act 1920, §402, subd. 22 (Comp. St. Ann. Supp. 1923, §8563), state Public Service Commission had authority to prohibit discontinuance of switching service on side track, though 85 per cent of the business done on the side track is interstate commerce. Western & A. R. R. v. Georgia Public Service Commission, 45 Sup. Ct. 409.

(4x) Public Service Commission's order prohibiting railroad from discontinuing switching service, HELD not confiscatory, in violation of Const. Amend. 14, even if cost of switching was in excess of price received therefor, in absence of showing that added facilities furnished by the switching did not benefit railroad by increasing its business. Western & A. R. R. v. Georgia Public Service Commission, 45 Sup. Ct. 409.

(4y) Rule of Public Service Commission of Georgia, prohibiting railroad from discontinuing service rendered shippers without commission's consent, adopted pursuant to Civ. Code Ga. 1910, §2664, HELD within police power of the state. Western & A. R. R. v. Georgia Public Service Commission, 45 Sup. Ct. 409.

(4z) Rule of Public Service Commission of Georgia, prohibiting dicontinuance of facilities and privileges enjoyed by shippers without consent of commission, HELD a reasonable rule, justifying commission's refusal to sanction discontinuance of switching service by railroad until a petition therefor had been filed with the commission and a showing made. Western & A. R. R. v. Georgia Public Service Commission, 45 Sup. Ct. 409.

(5a) Regulation of intrastate rates rests primarily with the state and the commission should interfere with such rates only upon a clear showing that they violate the provisions of the interstate commerce act pertaining to discrimination against interstate commerce. Certain-Teed Products Corp. v. A. & L. M. Ry., 95 I. C. C. 273, 279.

(5b) Combination rate on silicate of soda during Federal control, from Livny, Calif., to Los Angeles, Calif., via Fresno, found unreasonable to extent it exceeded lower rate contemporaneously in effect via a longer distant route through Stockton. Following American Agricultural Chemical Co., 66 I. C. C. 650, shipments moved at time when carriers were operated under a unified and coordinated national control and not in competition, and it was unreasonable for the director general to maintain a higher rate over one route than contemporaneously applied over another where such routes were practically same in length and subject to same transportation conditions. Reparation awarded. Philadelphia Quartz Co. v. Director General, 95 I. C. C. 593.

(5c) The commission has no jurisdiction to pass upon the unlawfulness, under section 6 of the act, of purely intrastate rates on shipments moving subsequent to Federal control. Campbell Construction Co. v. L. C. & S. E. Ry., 95 I. C. C. 603.

(5d) Rate on canned goods from Mobile to Montgomery, when used as a factor in constructing rates moving by water from interstate points of origin found unreasonable as compared with distance rates prescribed in Memphis Southwestern Investigation, 77 I. C. C. 473, and with Alabama Intrastate rates contemporaneously in effect. Reasonable rate prescribed and reparation awarded. Schloss & Kahn Grocery Co. v. L. & N., 95 I. C. C. 618.

(5e) Rates on steel wire from Monnessen to Economy, Pa., during Federal control, found not unreasonable or unduly prejudicial as compared with other short-haul rates on iron and steel articles in the Pittsburg district. Rates attacked are lower than fifth-class, the basis found reasonable by the commission in a number of cases cited for application on iron and steel articles for hauls of similar and greater distances. Pittsburgh Steel Co. v. Director General, 95 I. C. C. 637.

(5f) The commission is without jurisdiction to award reparation on intrastate shipments made during the guaranty period. Pittsburgh Steel Co. v. Director General, 95 I. C. C. 637.

(5g) Rate on bituminous coal from Panhandle, Ohio, to Mingo Junction, Ohio, during Federal control, found unreasonable as compared with rates be-

tween other points in Ohio for like distances, and to extent it exceeded lower rate requested by complainant prior to movement and established subsequent thereto. Reparation awarded. Beacon Coal Co. v. Director General, 95 I. C. C. 687.

(5h) Rates on logs from Goodrich, Whittlesey, Park Falls, and Rib Lake, Wis., to Black Creek, Wis., during Federal control, found unreasonable and reparation awarded. Konz Box & Lbr. Co. v. Director General, 95 I. C. C. 741.

(5i) Rates on hollow building tile from Alberhill, Calif., to Saticoy, Edfu, and Santa Paula, Calif., moving during Federal control, found unreasonable to extent they exceeded the rate contemporaneously in effect on fire and wire-cut face brick between the same points following National Paving Brick Mfrs. Asso., 68 I. C. C. 213, and the Memphis—Southwestern Investigation, 77 I. C. C. 474. Reparation awarded. Los Angeles Pressed Brick Co. v. Director General 98 I. C. C. 45.

(5j) Intrastate rates on cottonseed cake, meal, hulls, and oils, c. l., between all points in Texas and between all points in Oklahoma, and on cottonseed between points in Texas and between points in Oklahoma not exceeding 500 miles, found unduly prejudicial to interstate shippers and unduly preferential of intrastate shippers, to extent intrastate rates may be lower than corresponding interstate rates contemporaneously maintained for and Santa Paula, Calif., moving during like distances, resulting in unjust discrimination against interstate commerce between points in Texas and between points in Oklahoma. Undue preference and prejudice ordered removed and basis prescribed. Oklahoma Corp., Commission v. A. & S. Ry. Co., 98 I. C. C. 183, 201, 202.

(5k) Following American Sand & Gravel Co., 88 I. C. C. 1, rates on sand, gravel, and crushed rock from certain points in Minnesota to certain destinations in North Dakota found unreasonable to extent they exceed rates based upon the scale set forth in the appendix to the report, which, except for a small increase for distances over 130 miles, is equal to the present Nebraska interstate and intrastate scale for the distances here considered, plus an arbitrary of 1 cent per 100 pounds for joint-line hauls. The transportation conditions in the territory under consideration in the cited case are not so materially different from those existing between the points here considered as to warrant any different level of rates for application to these low-grade commodities which are of such great necessity for the building and maintenance of roads and other public and private projects. Reasonable basis of rates prescribed and reparation award. Hopeman Material Co. v. N. P. Ry. Co., 98 I. C. C. 361.

(51) Upon contention of complainants that from the comparative operating conditions in the portions of Minnesota and North Dakota here considered the Minnesota intrastate scale of rates applicable on sand, gravel, and crushed rock should be held to be a reasonable level of rates for application on these commodities from Missouri points to North Dakota destinations. FOUND, the record supports the conclusion that there is no justification for the maintenance of any higher level of rates in the one than in the other, and complainants contention would be correct if the intrastate scale was on a reasonable maximum basis. The commission takes into consideration the level of intrastate rates in reaching a conclusion as to the reasonableness of interstate rates in the same general territory, but it is not bound to adopt the intrastate level of rates as proper for application to interstate traffic. Hopeman Material Co. v. N. P. Ry. Co., 98 I. C. 361, 366.

(5m) Maintenance by defendant carriers of intrastate rates from certain points in Alabama to Mobile, Ala., on bar iron, manufactured iron, cast-iron pipe, rails, track material, barbed wire, and nails from Birmingham, Ala., and points grouped therewith taking same rates, lower than interstate rates contemporaneously maintained on same commodities from same points of origin to Pensacola, Fla., found to result in undue preference of and advantage to Mobile, and in unjust discrimination against interstate commerce. Pensacola Chamber of Commerce v. L. & N. R. R. Co., 98 I. C. C. 567.

(5n) Interstate class rates from St. Paul, Minneapolis and Duluth, Minn., Superior, Wis., and related points taking same rates, to Valley City and Jamestown, N. Dak., found unreasonable and unduly prejudicial as compared with lower Minnesota intrastate rates. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691.

(5o) Any difference or disparity between class rates from St. Paul, Minneapolis, Minnesota Transfer, Cloquet, Duluth, and West Duluth, Minn., and Superior and South Superior, Wis., to Fargo, N. Dak., and Moorhead, Minn., and rates between certain points in Minnesota and from Fargo to destinations in Minnesota distant 150 miles and less from Fargo over short-line routes, greater than that existing between rates from and to same points under the scale of Maximum distance class rates prescribed herein as just and reasonable for future, would result in unjust discrimination against interstate commerce to and from Fargo. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691, 715, 716.

(5p) In 60 I. C. C. 92 the Commission found certain rates and charges for freight services, required by state authority to be maintained by the respondent carriers within Illinois, to be unduly preferential of intrastate traffic, and ordered the same increased to remove such preference. The order was limited, however, to the establishment of rates or charges for the transportation of property in intrastate commerce not greater than corresponding rates or charges in interstate commerce. On petition, the Commission reopened this proceeding upon the sole question, whether the intrastate rates on lumber, ties and mine props, carloads, from Ava to Sesser, Christopher, West Frankfort, Johnston City and Buckner, all in Illinois, in effect on Jan. 11, 1921, were so related to interstate rates on the same commodities from, into, or through Illinois as to have been unduly preferential of localities or of shippers of such traffic under interstate rates, or any of them, or unduly prejudicial to localities or to shippers or receivers of such traffic under the interstates rates, or any of them, or to have resulted in unjust discrimination against interstate commerce. The rates in effect on Jan. 11, 1921 those found unreasonable by the state commission, and even the rate bases found reasonable by it as of that date and upon which reparation was awarded, are shown to have been and to be higher than rates applicable for interstate transportation from and to Illinois points to and from points in neighboring states for similar distances on like traffic. HELD, rates in effect Jan. 11, 1921 and those afterwards found reasonable as of that date by the Illinois Commerce Commission do not cause any undue disadvantage to interstate commerce. Interstate rates within Illinois, 102 I. C. C. 232.

(5pa) Upon further hearing, rates in effect January 11, 1921, and those afterwards found reasonable as of that date by the Illinois Commerce Commission for the intrastate transportation of lumber, railroad ties, mine props, mine collars, mine ties, and mine wedges from Ava to Sesser, Christopher, West Frankfort, Johnston City, and Buckner, Ill., did not and will not cause any undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce, on one hand, and interstate or foreign commerce, on other hand, or any undue, unreasonable, or unjust discrimination against interstate or foreign commerce. Prior order 60 I. C. C. 92, modified. Intrastate Rates within Illinois, 102 I. C. C. 232.

(5pb) Complaint bringing in issue intrastate rates subsequent to Federal control which do not subject traffic in interstate or foreign commerce to unjust discrimination, dismissed. In absence of undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce on one hand and interstate or foreign commerce on the other, or of any undue, unreasonable, or unjust discrimination against interstate commerce, the commission is without jurisdiction to consider intrastate rates in effect subsequent to Federal control. Gulf Refining Co. v. S. Ry., 102 I. C. C. 274.

(5q) In the absence of undue or unreasonable advantage preference or prejudice as between persons or localities in intrastate commerce on the one hand and interstate or foreign commerce on the other, or of any undue, unreasonable, or unjust discrimination against interstate commerce, the Commission is without jurisdiction to consider intrastate rates in effect subsequent to federal control. Gulf Refining Co. v. Southern Ry., 102 I. C. C. 274, 276.

(5r) Complainant attacked commodity rates on fuel oil in tank cars from Richmond Beach, Wash., to Wenatchee and Leavenworth, Wash., as unjust and unreasonable. The oil constituting the shipments on which reparation is asked was purchased by complainant from a California oil company under a contract providing for the distribution of the oil from Richmond Beach, which is on Puget

Sound about 15 miles from Seattle, Wash. The oil was shipped, without any previous rail haul from California ports to Richmond Beach in tank steamers owned and operated by the oil company exclusively for the transportation of its own commodities. No tariffs are filed by the oil company for such service, and its tank steamers do not operate on any regular schedule. Upon arrival at Richmond mond Beach the oil was discharged thru pipe lines into storage tanks owned by the oil company. Tank cars are never loaded from ships side at Richmond Beach. It is impossible to identify any particular oil originating in California and stored at Richmond Beach as the oil to be delivered to any particular purchaser. Upon order of complainant oil was loaded into tank cars from the storage tanks at Richmond Beach and shipped under straight bills of lading to consignees and to destinations specified by complainant. There is no arrangement between the oil company and defendant relative to the continuous carriage of oil from California to points beyond Richmond Beach. The rail transportation is entirely within the state of Washington. Defendant has no tariff on file authorizing the storage of oil in transit at Richmond Beach. HELD, Commission is without jurisdiction, complaint dismissed. Washington Dehydrated Food Co., v. G. N. Ry. 102 I. C. C. 363.

(5ra) Complaint alleging unreasonableness of intrastate rates on fuel oil previously transported via tank steamers from interstate points of origin dismissed for want of jurisdiction, no common control, management or arrangement for continuous carriage or shipment existing between rail carriers and tank steamers, the latter being owned and operated exclusively for transportation of its own commodities. Washington Dehydrated Food Co. v. G. N. Ry., 102 I. C. C. 363.

(5rb) Maintenance by C. & N. W. of multiple-trip and commutation fares for transportation of passengers in intrastate commerce within Illinois lower than corresponding fares applicable to interstate transportation of passengers to, from, or through the State, found unduly preferential of intrastate passengers, unduly prejudicial to interstate passengers, and unjustly discriminatory against interstate commerce. Intrastate Rates in Illinois, 102 I. C. C. 479.

(5rc) Upon further argument finding in original report, 64 I. C. C. 507, that rate on limerock from Flint, Calif., to Tolenas, Calif., during Federal control, was not unreasonable as compared with lower rates between other intrastate points for similar and greater distances as circumstances and conditions attendant upon transportation from Flint to Tolenas is substantially dissimilar from those obtaining from and to such other points, affirmed. Pacific Portland Cement Co. v. Director General, 102 I. C. C. 515.

(5s) In 64 I. C. C. 507 the Commission found the commodity rate of 70c on limerock, carloads, from Flint, Calif., to Tolenas, Calif., between June 25, 1918 and Feb. 29, 1920 not unreasonable or unduly prejudicial, and dismissed the complaint. Rehearing was had. Complainants cement plant is on the C. T. & T., owned by complainant at Cement, Calif., 2 miles from Tolenas, the junction point with the S. P. The quarries from which complainant obtains its limerock are on the Mountain Quarries R. R., also owned by it, which connects with the S. P., at Flint, 72 miles from Tolenas. Upon complainants request the S. P., published a rate of 50c from Flint to Tolenas, which rate complainant enjoyed from 1912 when it began shipments, until June 25, 1918. On that date the rate was increased to 70c under G. O. 28 of the Director General. HELD, rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Pacific Portland Cement Co., v. Director General 102 I. C. C. 515.

(5sa) While weight and respect are accorded to views of State authorities, decisions of State commissions in proceedings before them are not controlling in respect of issues raised in cases before this commission. Pacific Portland Cement Co. v. Director General, 102 I. C. C. 515, 517.

(5sb) Surcharges for the transportation of passengers in sleeping and parlor cars required by State authority to be maintained within North Carolina, and which are lower than the corresponding interstate charges authorized in Increased Rates, 1920, 58 I. C. C. 220, 241, 242, found to result in undue preference of intrastate passengers, undue prejudice of interstate passengers, and unjust discrimination against interstate commerce. Surcharge for Sleeping or Parlor Cars in N. C., 102 I. C. C. 537.

(5sc) Maintenance by St. L.-S. F. Ry.

of a higher charge for switching interstate traffic at Arkansas City, Kans., than for performing a like and contemporaneous service in switching intrastate shipments, found unduly prejudicial to interstate shippers, unduly preferential of intrastate shippers, and unjustly discriminatory against interstate commerce, on ground that such service is identical whether traffic is interstate or intrastate in character. Arkansas City Sand Co. v. St. L.-S. F., 102 I. C. C. 559.

(5t) Complainant atacked commodity rates charged on 35 cars of sand and gravel, 65 cars of dirt and 20 cars of clay shipped between April 1 and August 7, 1920 from Shieleys Pit, Minn., to St. Paul, Minn., as unreasonable. Applicable rates on the dirt, class E 5c, on sand and gravel 2.5c and on clay 2c, reparation being asked to basis of 1c per 100 pounds, minimum $6 per car, subsequently established. The fact that in the instant case a state commission has declared in a proceeding commenced subsequent to the termination of the guaranty period that certain intrastate rates collected during that period were unreasonable, and that the Commission is asked to approve that finding, does not enlarge the jurisdiction conferred under section 208a of the act. That section provides in respect of rates in effect on Feb. 29, 1920 that prior to Sept. 1, 1920 no such rate shall be reduced unless such reduction is approved by the Commission. Giving these words a strict construction, it is apparent that direct jurisdiction over reductions in intrastate rates was limited to action taken prior to Sept. 1, 1920. Under no provisions of the transportation act or of the interstate commerce act is the Commission given authority to review and approve a finding of a state commission made subsequent to Sept. 1, 1920 and to issue an order awarding reparation based on the finding and order of such commission. HELD, complaint dismissed. Armour & Company v. G. N. Ry 104 I. C. C. 34.

(5u) The authority of the Commission to pass upon the alleged unreasonableness of an intrastate rate and a prayer for reparation based thereon ceased with the relinquishment of federal control. Armour & Co. v. G. N. Ry. 104 I. C. C. 34, 36.

(5v) Upon further hearing, former report 58 I. C. C. 164, FOUND: That the collection of separate charges from complainants and interveners for the service of unloading and loading intrastate shipments of livestock at Chicago stockyards in addition to the line-haul rates, during the period of Federal control, was unlawful and unreasonable. Reparation due and parties entitled thereto determined herein. Chicago Live Stock Exchange v. A., T. & S. F. 100 I. C. C. 266.

(5w) Some of the reparation statements submitted embraced intrastate shipments which moved both prior and subsequent to Federal control. As to such shipments the commission is without authority to award reparation. Before these statements were finally submitted to the carriers for checking, prior to the entry of any reparation order which might be issued, such shipments should have been eliminated. Chicago Live Stock Exchange v. A., T. & S. F. Ry. 100 I. C. C. 266, 273.

(5x) The constitution of Missouri, as interpreted by the Supreme Court, 244 U. S. 191, prohibits charging more for a shorter than for a longer haul on Missouri intrastate traffic. Schedules designed to prevent such violations ordered canceled without prejudice to establishment of rates in accordance with findings. Class Rates between Missouri and Interstate Points, 100 I. C. C. 274, 278.

(5y) Upon further hearing, original report 81 I. C. C. 1, finding that minimum charge of $15 per car established under General Order No. 28 of director general, and assessed on lumber from San Pedro, Calif., to Wilmington, Calif., during Federal control, was not unreasonable as compared with lower minimum charge subsequently established, or as compared with charges for similar movements in immediate vicinity, affirmed. Service rendered was a short road-haul although a switch engine furnished the power. Subsequent establishment of lower charge can not be taken as an admission that former charge was unreasonable. Nor can lower charges for switching services elsewhere lead to conclusion that this charge was not reasonable for local nonswitching service. Consolidated Lbr. Co. v. Director General 101 I. C. C. 284.

(5z) On intrastate traffic, moving during Federal control under combination rates, the commission's jurisdiction is limited to rates over that portion of the haul over lines under Federal control. See also 60 I. C. C. 683 and 69 I. C. C.

STATUTE OF LIMITATIONS

See Claims I; Loss and Damage §13½; Procedure Before Commission §2 (s), §10 (3) (a); Reparation §7; Undercharges §10.

STATUTES

(a) It is a rule of construction that all statutes are to be considered prospective, unless the language is expressly to the contrary, or there is a necessary implication to that effect. Cohn v. C. M. & St. P. Ry., 96 I. C. C. 257, 258.

(b) A statute of limitation is construed as operating prospectively only where in the particular case, if retroactive, it would at once bar a right of action existing under the former law at the time of its passage, but, if no right is impaired or destroyed by giving it a retroactive effect, the reason of the rule ceases, and the rule itself should cease. Button v. Atchison, T. & S. F. Ry. Co., 1 Fed. (2d) 709.

(c) Statute should be construed as operating prospectively, unless language clearly expresses or necessarily implies contrary intent. Philadelphia, B. & W. R. Co. v. Quaker City Flour Mills Co., (Pa., 1925), 127 Atl. 845.

(d) The Federal Transportation Act should not be construed to prevent the state from exercising its police power to require adequate local facilities for intrastate passenger traffic, reasonably necessary for the protection of the health, comfort, and convenience of the passengers. State v. Seaboard Air Line Ry. Co. (Fla., 1925), 104 So. 602.

(e) The making of rates and the division of joint rates is legislative and not judicial function. Terminal R. Ass'n of St. Louis v. United States, 45 Sup. Ct. 5.

(f) Provisions of section 5 (8) of the act deemed sufficient to relieve carriers from restraints imposed by state constitutions prohibiting the leasing, operation, or purchase by foreign corporations or associations of railways within the state, or any interest therein. Clinchfield Ry. Lease, 90 I. C. C. 113, 134.

(g) Constitution and statutes of the State of Texas prohibit a railroad company organized under the laws of that state from consolidating with a railroad company organized under the laws of any other state or of the United States, and provide that no railroad corporation shall acquire control of another railroad corporation which owns or controls a par-

allel or competing line. However, with few exceptions, the controlling stock interest of all railroads operating in Texas is owned by railroad corporations foreign to that state, a fact of evidentiary value in illustrating the construction that the state has placed upon such constitutional provisions. If two railroads are, to some extent, parallel and competing, that fact should not control the commission's action in a proceeding involving the acquisition of control of one carrier by another, by purchase of capital stock. Control of I.—G. N. R. R., 90 I. C. C. 262, 267.

(h) Statutes must be construed in light of existing conditions to ascertain intention of Legislature in their enactment. City of Cherokee v. N. Western Bell Telephone Co. (Iowa, 1925), 202 N. W. 886.

(i) The rule obtains in this state that an enrolled bill on file in the office of the secretary of state imparts absolute verity, and the same cannot be impeached by the legislative journals, and when such an act is called into question the courts will look to the enrolled bill only. This is the rule where the bill is attacked for some irregularity. But when the very existence of the bill is questioned, based upon the fact that the enrolled bill cannot be produced, the court will look to the journals for the information. Western Union Telegraph Co. v. Hankins (Okla., 1924), 230 Pac. 857.

STOCK YARD COMPANIES

See Live Stock Shipments; Twenty Eight Hour Law.

STOPPAGE-IN-TRANSIT

See Express Companies §34; Facilities and Privileges §15.

(a) Stoppage in transit, which is enumerated in Interstate Commerce Act, §1, as amended by Act June 29, 1906, and subsequently amendments (U. S. Comp. St. §8563 et seq), as one of the regular services included in term "transportation," HELD not a privilege, to be granted or withheld at will of carrier. Chicago, M. & St. Paul Ry. Co. v. Board of Railroad Com'rs. (S. D. 1924) 199 N. W. 453.

(b) Complainant alleged the stop in transit and reconsignment charges at Cincinnati, O., and Chattanooga, Tenn., on 21 interstate cars of hay, during April, May and June 1923, as illegal, unreasonable, unjustly discriminatory and unduly prejudicial. Shipments originated at points in Indiana and Ohio and were originally billed to Jacksonville, Fla., and Chattanooga, Tenn. As to each of them, while in transit, complainant requested that it be stopped and held for reconsignment at Cincinnati or Chattanooga, as the case might be, and subsequently requested that it be reconsigned to an interstate destination other than that to which it was originally billed. Defendants complied with these requests, 19 of the shipments being handled at Cincinnati and 2 at Chattanooga, and assessed charges on the former of $2.70 and $6.30 per car for stopping and reconsignment, respectively, and on the latter of $2.25 and $5.85 per car for stopping and reconsignment, respectively, in one instance, and of $2.25 and $3.60 per car for stopping and switching, respectively in the other. These rules correspond to rules 5 and 6 approved by the Commission in 47 I. C. C. 590. HELD, charges not unreasonable or otherwise unlawful, complaint dismissed. Toberman Mackey & Co., v. C. N. O. & T. P. Ry., 96 I. C. C. 237.

(c) Charges, rules and practices pertaining to transportation of butter when cars are stopped in transit to finish loading, under which same charge is assessed whether car is spotted in order to receive additional load, or "loaded in passing" without being removed from train, found not unreasonable. If there were no charge for "loading in passing" shippers would always desire to load while car remains in train, and requests would have to be complied with regardless of possible delays to trains and interference with operating schedules. Carriers would thus lose control of operation of their trains to extent required to comply with shipper's instructions, whereas under present plan they decide whether a car is to be "set out" to receive load or is to be "loaded in passing." Minnesota Creameries Asso. v. C. M. & St. P. Ry. Co., 91 I. C. C. 21.

(d) Stop-over practice embodies some elements of reconsignment. In both cases aggregate charges from point of origin to destination are computed on basis of c. l. rate from point of origin to final destination plus whatever charge is made for service. Stopping of Cars in Transit to Complete Loading, 36 I. C. C. 130. Wool Rates Investigation, 91 I. C. C. 235, 281.

STORAGE

I. CONTROL AND REGULATION.

III. TARIFFS AND CONSTRUCTION.
§3. In general.

CROSS REFERENCES

See Car Ferry; Cars and Car Supply §9½ (a); Customs (b); Export Rates and Facilities §14, §16; Storage in Transit.

II. CHARGES AND REGULATIONS.

§2. Reasonableness and Discrimination in General.

(a) Storage charges on crated motor cycles, l. c. l., found unreasonable as compared with charges applicable for storage of general freight other than automobiles and other self-propelling vehicles, which lower charges were subsequently established on motor cycles or bicycle motor wheels. Reparation awarded. Hendee Mfg. Co. v. Director General, as Agent, 89 I. C. C. 38.

(b) Respondents proposed to reduce from 48 to 24 hours the free time allowed in connection with team track storage charges at Chicago, Ill., on cars held for reconsignment, diversion or reshipment and on cars placed to complete loading or to partly unload. Present rules provide 48 hours free time, and suspended rules would continue the present provision as to cars held for loading or unloading but on cars held for reconsignment, diversion or reshipment, and on cars placed to complete loading or to partly unload, they would reduce from 48 to 24 hours. Truck storage charges are justified on the ground that they are necessary in order to bring about the prompt release of track space in the interest of the general shipping public at certain points where business is very active and the track space correspondingly limited. The proposed change is largely for the purpose of making the free time provision in the track storage rules conform to the demurrage rules, which provide 24 hours free time on cars held for reconsignment, diversion or reshipment, or placed to complete loading or partly unload. HELD, respondents have justified suspended schedules. Team track storage at Chicago, 92 I. C. C. 117.

(c) Pennsylvania, W. J. & S. S. R. R., respondents endeavored to cancel storage charges on fruits and vegetables which have been unloaded from cars into a warehouse in its produce yards at Pittsburgh, Pa., awaiting sale at public auction. Shipments are shipped to the produce yards and unloaded upon the platform of one of the respondents buildings, located in those yards. The platform and two office rooms on the first floor and the auction room and two office rooms on the second floor are used exclusively by the Union Fruit Auction Co., the office rooms by written lease, and the platform and auction room by verbal arrangement, subject to termination by the respondent on 30 days notice. Some of the stockholders of the Union Company are stockholders also in fruit companies which ship to Pittsburgh and sell through the Auction Company. As to shipments which it sells at auction for others, it breaks the seals of the cars, unloads the freight onto the platform, opens a few boxes or crates from each car for the inspection of buyers, prints daily catalogues of the contents of the cars, auctions the shipments daily, and makes delivery to purchasers, charging a percentage commission for selling and a fee per package for platform handling. The fact here is that respondent sets the car at a warehouse used by the Union Company, and at which no freight other than that to be sold at auction by that company is handled and that the respondent after that has no further connection with the shipment. Its transportation service therefore ceases with the unloading of the car at the warehouse, the same as it would cease with the unloading of the car at team tracks in the yards if the warehouse were located blocks away from the yards and had to be reached by truck and whether leased from the respondent or from someone else In this respect the situation here differs from that in the cases cited, HELD, tariffs schedules suspended naming storage charges should be canceled. Storage rules on fruits and vegetables, 95 I. C. C. 87.

(d) Complainant attacked charges for storage in heater cars as published in New Haven I. C. C. F-2451, effective Nov.

8, 1920 as unjust and unreasonable, unduly prejudicial. The storage charge in heater cars of $3 per day between November and April, regardless of whether or not fires are lighted applies only when the cars are not loaded or unloaded within the 48 hours free time period. The Commission has informally interpreted the tariff as providing that between Nov. and April "a charge for storage in heater cars of $3 per car per day, or fraction thereof, should be assessed and that this charge should be assessed whether or not fires are lighted in the cars, and also that this charge should be applied at any other time of the year provided fires are lighted. When this kind of equipment is ordered by the shipper the carrier assumes the risk of protecting the lading from the time the car is set for loading at point of origin until the contents are removed from it at destination, and in addition to permitting the car to remain on the track because of failure of shipper to unload, the carriers, through the Eastman Company, are obliged to be ready at all times to protect the lading. They must have an organization, provide fuel and inspection, and render the service, or at all times be ready to render the service, required in the protection of the shipment, and if the shipments are not unloaded within the 48 hours free time they must of necessity continue to protect the same. For such service following the free time the charge for storage in heater cars has been established. HELD, charges attacked legal, applicable and not unreasonable or otherwise unlawful, complaint dismissed. Hunter v. N. Y. N. H. & H. R. R., 96 I. C. C. 57.

(e) Carriers may impose charges necessary to compel removal of freight from the carriers terminals and the prompt release of equipment. Hunter v. N. Y. N. H. & H. R. R., 96 I. C. C. 57, 60.

(f) Reasonableness of charge for storage by railroad is not question for courts; quantum of charge having been fixed by tariff established by Railroad Commission. Aleman Planting & Mfg. Co. v. Hines, Director General of Railroads, (La., 1925), 102 So. 815.

(g) Proposed reduction of free time from 48 to 24 hours in connection with team-track storage charges at Chicago, on cars held for reconsignment, diversion, or reshipment, or placed to complete loading or to party unload, found justified. Proposed change is largely for purpose of making the free-time provision in track-storage rules conform to the demurrage rules, and 24 hours free time seems ample on cars affected by the proposed change. Team-Track Storage at Chicago, 92 I. C. C. 117.

(h) Carrier, in addition to compensation for carriage of goods, may charge for their storage and keeping, as warehouseman, for whatever time they remain in its custody after owner has had reasonable opportunity to remove them. Allen v. Southern Ry. Co. (Ga., 1924), 126 S. E. 722.

(i) Proposed cancellation of tariff schedules providing for storage charges on shipments of fruits and vegetables which have been unloaded from cars into a warehouse in the Pennsylvania Railroad's Pittsburgh produce yards, for sale at public auction, respondent after unloading having no further connection with the shipments, found justified on grounds that transportation service of carrier ends with unloading of the car. Storage Rules on Fruits and Vegetables, 95 I. C. C. 87.

(j) Storage charges, applicable during winter months, on Eastman heater cars, provided with artificial-heating apparatus, found not unreasonable, discriminatory, or otherwise unlawful. Such charges are contained in published tariffs, and as they are assessed against all alike, there can be no undue prejudice or discrimination. C. R. R. of N. J. v. U. S., 257 U. S. 247. Moreover, no evidence was introduced tending to show that charges are unjust or unreasonable per se and no ambiguity exists in the tariff provision under which charges were assessed. Hunter v. N. Y., N. H. & H. 96 I. C. C. 57.

(k) Storage on shipments of chrome ore, made during November, 1918, from Oakland, Calif., to Coatsville, Pa., assessed on car-demurrage basis under governing tariff, found inapplicable subsequent to February 15, 1919, on which date storage rule in issue was canceled. Reparation awarded in the amount of charges accruing thereafter. Humphreys Co. v. Director General, 96 I. C. C. 317.

(l) The underlying principle for the imposition of storage charges is not primarily to produce revenue but to accomplish the prompt removal of freight from the carriers premises. The assessment of storage charges on gilsonite stored

in private warehouses falls neither within the authority nor contemplation of carriers tariff provisions. Utah Gilsonite Co. v. A., T. & S. F., 96 I. C. C. 653, 673.

(m) Failure of carrier to transmit diversion orders in connection with two carload shipments of leather moving from Whitehall, Mich., via Norfolk, Va., to Haverhill, Mass., in accordance with tariff rule governing, found to have resulted in damage to complainant to extent of charges collected for storage at Boston, Mass. Reparation awarded. Eagle-Ottawa Leather Co. v. B. & O., 98 I. C. C. 400.

ALL OTHER CITATIONS

Dockage, Handling, and Storage Charges, 88 I. C. C. 24; National Lumber Co. v. N. & W. Ry. Co., 88 I. C. C. 357.

III. TARIFFS AND CONSTRUCTION.

See Tariffs.

§3. In General.

(a) By not having facilities for storage for large quantities of grain Helena, Ark., lacks one of the elements necessary to entitle it to a rate-breaking adjustment. Helena Traffic Bureau v. M. P. R. R. Co. 89 I. C. C. 415, 416.

(b) Complainant attacked storage charges on two cars of chrome ore shipped during Nov. 1918 from Oakland, Calif., to Coatesville, Pa. Upon receipt by complainant of information as to the refusal of the ore by the consignee, and upon the statement by defendant that unloading was necessary as the cars were needed for immediate use, complainant notified defendant to unload the cars and place the ore in the cheapest available storage. Defendant unloaded the cars placing the ore along its right of way. For such storage complainant expected no charge would be made other than for unloading and loading. Charged $10 per day for 56 days on one car and 28 days on the other, prior to March 15, 1919 on which date the shipments were released. The rule in question was canceled on Feb. 15, 1919. HELD, on and after Feb. 15, 1919 defendant had in effect no published charges applicable to complainants shipments, and, therefore, no charges were assessable. Reparation awarded on and after that date. Humphreys Co. v. Director General, 96 I. C. C. 317.

(c) Tariff schedule, fixing storage charges for storage of freight, which is liable to be damaged by the elements, and must be stored at carrier's risk, either in carrier's warehouse, or, at carrier's option, in public warehouse. HELD: Inapplicable to lumber piled on railroad's right of way, in view of note to tariff schedule rule providing for storage, free of charge, of freight which is not liable to damage from the elements, and is not to be handled through freighthouses on railroad's vacant land at owner's risk. Payne v. Rodgers, 4 Fed. (2d) 827; Rodgers v. Payne, 4 Fed. (2d) 827.

(d) Under the uniform interstate tariff schedule, entitling a railroad company to storage in outbound freight actually delivered for transportation, and held by it to complete a shipment, or for forwarding directions, storage HELD: Not collectible on beets piled on right of way before shipment. Davis v. Continental Sugar Co., 5 Fed. (2d) 420.

(e) But where, under a contract of purchase and sale, goods are shipped in a single lot to the vendee, who accepts them, pays the freight, and actually removes and retains a portion thereof, but afterwards returns to the carrier a part of the goods so removed, and, with himself designated as consignor, returns all the unused portion of the shipment to the vendor, he is liable to the carrier for storage charges which accrued on the goods after their acceptance by the vendee and pending his negotiations with the vendor for their acceptance and return, irrespective of any equities which might exist as between himself and the vendor. The court in this case therefore did not err in directing a verdict in favor of the carrier against the defendant vendee for the storage charges sued for. Bailey v. Georgia R. R. (Ga., 1925), 126 S. E. 896.

(f) Failure of defendants to permit storage-in transit at Indianapolis, Ind., and Mounds, Ill., on shipments of sisal moving from New Orleans, La., to Welland, Ontario, Canada, and to various destinations in central and trunk-line territory, during Federal control, found not unjust, unreasonable or unduly prejudicial. Contention that delay in establishing storage in transit at Indianapolis and Mounds result in undue preference of the Gulf ports at which import commodity rates were in effect, not sustained. Storage at Gulf ports took place

before the rail transportation and was not a storage in transit under the rail rates and thus not comparable with such storage at inland points. Moreover the commission has repeatedly refused to sanction retroactive application of a transit service in absence of discrimination or prejudice and damages thereunder. See 68 I. C. C. 611. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 295, 296.

ALL OTHER CITATIONS

Hershman & Co. v. Director General, as Agent, 85 I. C. C. 695.

STORAGE-IN-TRANSIT

See Facilities and Privileges §15; Storage.

(a) Proposal to restrict storage in transit arrangements on green apples at points in Alabama and Tennessee so as not to apply in connection with shipments destined to points on or reached by way of the L. & N. R. R.; and to apply higher combinations to and from the transit point, found not justified. Reasons advanced for proposed restriction was a desire of the L. & N. to receive both inbound and outbound haul on the traffic and that present arrangement permits handling of traffic over circuitous routes. Similar reasons, however, were advanced in 77 I. C. C. 724 and 83 I. C. C. 60, wherein similar proposed restrictions were found not justified. Storage on Apples, 89 I. C. C. 135.

(b) Complainant attacked combination rate charged on sisal carloads from New Orleans, La., to Indianapolis, during May 1919 reshipped to Welland, Ont., during Sept. 1919 and failure of defendants to permit storage in transit at Indianapolis, Ind., under the through rate as unreasonable. Complainant attacked rates to and from Indianapolis on shipments from New Orleans between Sept. 25, 1918 and August 20, 1919 reshipped between March 20, 1919 and Jan. 21, 1921 to central and trunk line territories as unreasonable; that the failure of defendants to permit storage in transit at Indianapolis resulted in unjust unreasonable and unduly prejudicial rates. Complainant attacked combination rates between June 25 and July 23, 1919 from New Orleans to Mounds, Ill., reshipped between Jan. 1 and 24 1920 to Chicago, Ill., Kansas City, Mo., and Xenia, O., as unjustly discriminatory and unduly prejudicial, and rates charged to and from Indianapolis to St. Paul and North Kansas City, Mo., in 1920 as unjust and unreasonable. On March 15 and August 24, 1919 storage in transit rates were established at Mounds and Indianapolis permitting shipments of sisal from New Orleans to be stored at those points for six months and reshipped to designated destinations at the import commodity rates to those destinations plus transit charge of 2c. HELD, failure of defendants to accord storage in transit on sisal at Indianapolis and Mounds not unreasonable, unjust or unduly prejudicial. Present rate Indianapolis to St. Paul not unreasonable; rates from Mounds to Chicago applicable; rates attacked New Orleans to Mounds unreasonable to extent it exceeded 31c; rates from Mounds to Kansas City unreasonable to extent it exceeded 30c; rate from Indianapolis to North Kansas unreasonable to extent it exceeded 40c; reparation awarded. Capital Warehouse Company v. Director General, 96 I. C. C. 293.

STREET RAILWAYS

See Electric Lines.

(a) Easements in streets, whatever their duration or terms may be, are property of value, indispensible to other property rights of street railway company, whether or not such value can be considered in fixing the base on which rates are to be established. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

(b) A city possesses at all times police power to regulate fares to be charged and character of services to be rendered by a street railway, so long as such regulations provide a fair return on capital investment and its preservation unimpaired; but to allow a public utility less is confiscation, in violation of constitutional guaranties. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285.

(c) Ordinances granting easements and rights of way to street railway company, its successors and assigns, HELD: to have granted such easements in perpetuity. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285.

(d) Const. Colo. art. 2, § 11, prohibiting any irrevocable grant of special privileges, franchises, or immunities, HELD: Not applicable to the grant of perpetual easements in streets to street railway company; such easements being in furtherance of public right in the use of public highways. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285.

(e) Perpetual easements in streets granted to street railway company were not surrendered or cut down to a lesser term by the passage of subsequent ordinances, limited as to term of grant, and their acceptance by the company, which were applicable only to extensions on specified streets, and which expressly reserved all rights of both city and street railway company under the earlier ordinances. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

(f) Value of perpetual easements of street railway company in city streets cannot be included in valuation of company's property for rate-making purposes. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

(g) In valuation of street railway for rate-making purposes, accrued depreciation is a fact to be determined by inspection. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

(h) In proceedings for valuation of street railway by receiver for rate-making purposes, expert evidence on the question of value as going concern, HELD: To require allowance of lowest amount testified to; the municipality opposing increase in rates having offered no testimony on the question. Westinghouse Electric & Mfg. Co. v. Denver Tramway Co., 3 Fed. (2d) 285. Stenger v. City and County of Denver, 3 Fed. (2d) 285.

(i) In fixing the rates to be charged by a public utility, an amortized allowance for expenses of litigation may be considered as operating expenses in view of Laws Minn., 1921, c. 278. Duluth St. Ry. Co. v. Railroad and Warehouse Commission, 4 Fed. (2d) 543.

(j) Street railway fares fixed by Commission HELD: Inadequate, and street railway company entitled to charge six-cent fare. Duluth St. Ry. Co. v. Railroad & Warehouse Commission, 4 Fed. (2d) 543.

STRING PIECE DELIVERY

See Facilities and Privileges §10 (k).

SUBSTITUTION OF TONNAGE

See Facilities and Privileges §15, §20.

(a) Respondents proposed to reestablish a charge of 2.5c for transit services in connection with and in addition to the joint through rail and water rates on carloads of grain originating in the western half of Montana, shipped to intermediate milling points, but not including tidewater mills, and the products thereof forwarded through the north Pacific ports to California ports. A like charge is proposed on coarse grains originating in transcontinental groups F, G and J, and the products shipped in like manner. The present joint rail and water rates plus the transit charge would result in through charges somewhat less than the combinations on the ports. There is as much operating service in connection with an inbound and outbound transit shipment as there is on two separate shipments to and from the milling point, and the clerical, inspection, and policing services incident to a transit shipment are more numerous than on two ordinary shipments to and from the milling point. Ordinarily extra switching is required from and to the mill. There is an extra placement of an empty car suitable for grain at the mill for the outbound product and in some instances the extra switching at the milling point necessitates the absorption by one carrier of the switching charge of another. Notice of arrival must be mailed at the milling point as well as at the final destination. Presentation of freight bills and settlements of freight charges on the inbound shipments of grain must be made independently of the assessment and pay-

ment of the through charges based upon the outbound tonnage. Special records and accounting are required in order that the carriers may keep a check upon the arrival date of the inbound grain, and may record the inbound expense bills for the transit account. Credit slips of inbound grain must be checked and canceled in making up the through charges on the outbound product. See 24 I. C. C. 340, 346. The present rates plus the proposed transit charges aggregate less than the combinations, and the present through rates on flour are no higher than on wheat. The charge has remained in effect from intermediate and farther distant origin territory throughout the period when transit was free from western Montana. A reasonable transit charge applicable at mills not on tidewater would be unreasonable at tidewater mills on shipments loaded by the shipper directly into the holds of vessels. HELD, suspended schedules justified. Transit rules on grain, 98 I. C. C. 679.

(b) Tariff provided for waybilling of shipments from New Orleans to Mounds, Ill., at applicable rate and, upon surrender of paid inbound freight bills, rebilling from Mounds to final destination at remainder of rate plus transit charge. Defendant interpreted tariff as requiring shipper to preserve identity of cargoes according to vessel and as prohibiting substitution. Complainant's representative concurred in this construction. FOUND: Complainant can not excuse its failure to surrender inbound billing under tariff by alleging error on part of defendant and intrastate class rate assessed on shipments from Mounds to Chicago found applicable. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 296, 297.

(c) It would be unlawful for a carrier to allow the substitution of one commodity for another of like quantity from a different rate point without clearly and comprehensively specifying in the published tariffs the right to lose identity or to make substitution. See 29 I. C. C. 70, 88. Armour & Co. v. D., L. & W., 101 I. C. C. 337, 341.

See Control and Regulation.

§1. In General.

(a) Civ. Code 1922, §4878, providing for construction of connecting track by railroads passing through city, and empowering railroad commissioners to fix the proportion of the cost to be paid by the different railroads, HELD: Not violative of the Federal Transportation Act (U. S. Comp. St. Ann. Supp. 1923, § 10071¼ et seq.), or amendments thereto. Shealey v. Seaboard Air Line Ry. Co., (S. C., 1924) 126 S. E. 622.

(b) Contention that under section 1, paragraphs (18) to (22) of the act, the commission has no jurisdiction in matter

of proposed abandonment of mine sidings, relying largely on paragraph (22) which provides that authority conferred by paragraphs (18) to (21) shall not extend to side tracks located wholly within one State, or to street, suburban, or interurban electric railways not operated as part of a general steam-railroad system, not sustained. Provisions of foregoing paragraph limit commission's jurisdiction only with respect to specified paragraphs and do not come into conflict with the provisions of paragraph (9) under which commission may authorize the construction, maintenance and operation of switch connections with private side tracks of shippers when such connection is, in opinion of commission, reasonably practicable, can be safely put in, and will furnish sufficient business to justify its construction and maintenance. Hood Coal Co. v. M. V. T. Co., 101 I. C. C. 719, 720, 721.

§2. Jurisdiction of Commission.

See Interstate Commission I; Jurisdiction of Commission.

(a) Before authority of commission under paragraph 9 of section 1 of the act can be invoked by complainant asking commission to require defendants to construct a switch connection with its switch track, the following conditions must be observed: Complainant must be the owner of a lateral branch line of railroad, or a shipper tendering intrastate traffic for transportation; the connection must be reasonably practicable, and one that can be put in with safety, and will furnish sufficient business to justify the construction and maintenance of same. Conditions having been observed, connection ordered. Dering Coal Co. v. C., C., C. & St. L., 96 I. C. C. 143, 149, 150.

II. ABSORPTION OF SWITCHING.

See Absorption of Charges §3.

§3. In General.

(a) Upon further hearing and reargument, previous report, 69 I. C. C. 282, charges on traffic from points west of Hudson River to J. L. Kelso Co. warehouse on the Union Freight R. R. in Boston, Mass., found unreasonable and unduly prejudicial to extent they exceeded rates on like traffic to deliveries on the Boston & Albany, Boston & Maine, and New York, New Haven & Hartford railroads in the Boston district. Linehaul carriers refused to absorb charges of the Union while making deliveries at all other points in and about Boston at the flat Boston rates. Reparation awarded. Boston Wool Trade Asso. v. Director General as Agent, 89 I. C. C. 589, 593.

(b) Proposal of Manufacturers Ry. at St. Louis, Mo., to increase its minimum switching charges, such charges to be absorbed by various trunk lines reaching St. Louis, found justified. Respondent filed a complaint with the commission seeking reasonable divisions, but after investigation of the matter by trunk lines respondent was offered an increased allowance equal to amount named in the suspended schedules, and the complaint was withdrawn. Proposed minimum will not increase the charge to shippers or consignees, and it compares favorably with those of other lines generally in effect in the St. Louis switching district. Switching Charges of Mfrs. Ry. Co., 89 I. C. C. 664.

(c) Complainant, Laona & Northern Ry., alleged that the amount of its switching charges between Snyders, Wis., and the connection with defendant's tracks at Laona, Wis., absorbed by defendant are grossly inadequate. Complainant's main line extends from a connection with defendant at Laona Junction, Wis., a distance of ten miles. Not more than a mile from Laona is the station on complainant's line known as Snyders where the lumber mill of the proprietary industry, Connor Lumber & Land Company is located. There is no other industry at Snyders. Substantially all the outbound traffic from Snyders is lumber from this mill. Inbound traffic consists principally of intrastate shipments of logs. Defendants provides for absorption of not to exceed $3 per car although complainant's tariff provided for a charge of $5 per car. The absorption of $3 is the maximum for switching a distance of one mile or less from the junction permitted in 68 I. C. C. 676. HELD, the absorption of $3 per car not unreasonable, complaint dismissed. Laona & Northern Ry. v. C. & N. W. Ry., 92 I. C. C. 23.

(d) Complainant attacked commodity rates charged on hard coal, carload, from Shamokin, Pa., to Elmira, N. Y.,

as unreasonable and that the nonabsorption of the Pennsylvanias switching charge by the L. V., at Elmira resulted in charges on hard coal from Hazelton, Pa., to complainants sidings at Elmira as unreasonable and unduly prejudicial. In 35 I. C. C. 220, the Commission prescribed a rate not in excess of $1.30 to Van Etten over the L. V. When the L. V., reduced its rates to Elmira from $1.65 to $1.25 it discontinued its absorption of connecting lines switching charges of 30c at that point. HELD, rates attacked not unreasonable, and nonabsorption of switching charges at Elmira not unreasonable, complaint dismissed. Linn Chapel v. Pennsylvania R. R., 92 I. C. C. 662.

(e) It is the usual practice of rail carriers participating in joint rates to divide the switching expense when the services of an intermediate carrier are utilized in effecting interchange, the switching charge being absorbed by one or the other of the carriers according to the direction in which the traffic moves. Peoria & Pekin Union Ry Co., 93 I. C. C. 3, 21.

(f) In a proceeding to determine the propriety of switching charges which may be or may not be absorbed by other carriers the Commission has said it must consider them as though they were charged for by the railroad rendering the service and paid by the shippers. Switching at Kansas City, Mo., 96 I. C. C. 538, 541.

(g) Contention that switching service performed by Philadelphia & Reading Ry. Co., in delivering freight at complainant's plant at Wilmington, Del., is same as that performed when traffic is switched by that carrier to deliveries within industrial section of city, and that refusal of line-haul carriers to absorb switching charges on former while absorbing such charges on latter constitutes a violation of section 2 of the Act, not sustained. Circumstances of carriage surrounding the two classes of traffic are not same, and rule of law laid down in I. C. C. v. Alabama Midland Ry. Co., 168 U. S. 144, and in Wright Case, 167 U. S. 512, governs. Bancroft & Sons v. P. & R. Ry. Co., 91 I. C. C. 186, 192.

(h) Proposed rule in connection with refining of vegetable oil receiving transit at Portsmouth, Va., under which refiners would be required to pay switching charges on outbound movements, found not justified. For many years switching charges on inbound and outbound movements have been absorbed by road-haul carriers and respondents made no attempt to justify increased charges which would result from the proposed schedules which, if allowed to become effective, would also conflict with provisions of Pennsylvania's absorption tariff under which switching charges are absorbed by that carrier where it receives a road haul. Absorption of Switching Charges at Portsmouth, 91 I. C. C. 296.

(i) Proposed cancellation of absorption of switching charges at North Kansas City, Mo., on c. l. traffic originating at or destined to noncompetitive points on Missouri Pacific R. R., results of which would be increased freight charges by amount of such switching charges and violations of long and short haul provision of section 4 of the Act, found not justified. Switching Charges at North Kansas City, Mo., 91 I. C. C. 369.

(j) Milwaukee, respondent, proposed to cancel its absorption of the switching charges of the North Shore at Racine and Racine Jct., Wisc., on all interstate traffic. Protestant's plant is on the North Shore at Racine Quarry, Wisc., 1.25 miles north of the corporate boundary of Racine, and about 2.5 miles from the North Shore's connection with the Milwaukee just within the southwestern boundary of Racine. It is the only industry on the North Shore at or near Racine and it alone would be affected by the suspended schedules. The record shows that industries in the vicinity of Racine, apparently in substantially the same situation as protestant's plant, have all or a portion of their switching charges absorbed by the line-haul carrier. It would be unreasonable to continue that practice and to deny similar treatment to protestant. Undue prejudice would be created if the Milwaukee were permitted to cancel the absorption of $2.50 on crushed stone from protestant's plant and continue a like absorption from the competing plant at Ives. HELD: Suspended schedules not justified. Absorption of Switching at Racine, 101 I. C. C. 60.

(k) Allowance by C. & N. W. Ry. Co., to Laona & Northern Ry. Co., of a maximum absorption of $3 per car out of switching charges on interstate traffic moving between Laona and Snyders, Wisc., found not inadequate or otherwise unreasonable. In dealing with similar short lines not parties to The Tap Line

case, 31 I. C. C. 490, the commission has found that they should not receive from connecting carriers more than $3 per car, the maximum therein fixed, for distances of 1 mile or less. While the Laona has operated at a deficit, to sanction increased absorption sought would result in according that line a preferred position over other lines operated under similar circumstances and conditions. Laona & Northern Ry. Co. v. C. & N. W., 92 I. C. C. 23.

(l) Proposal of L. & N. to cancel its unlimited absorption of switching charges of the Gulf and Ship Island at Gulfport, Miss., on c. l. traffic destined to New Orleans, La., and to restrict its absorption to amounts not in excess of those applicable on similar traffic to other destinations, found justified. No traffic has moved from industries where the proposed restriction would result in increases, preponderance of all traffic will ordinarily move between Gulfport and New Orleans over competing lines, and no public good would be subserved by maintenance of a preference of traffic destined to New Orleans over traffic destined to other points. Absorption of Switching Charges at Gulfport, 92 I. C. C. 168.

(m) Failure of line-haul carriers to absorb switching charges of Minneapolis Eastern and Minneapolis Western railroads at Minneapolis, on grain moving from South Dakota, found not unreasonable. Complainants urge no circumstances justifying charges on interstate shipments while similar charges on intrastate shipments were absorbed, refering to absorption practices of line-haul carriers at other points. However, circumstances and conditions at other points are not shown similar to those at Minneapolis, nor does record establish that switching charge assailed was unreasonable per se or that collection thereof in addition to line-haul rate resulted in unreasonable charges for entire transportation service furnished. Shanard Elevator Co. v. M. E. Ry., 93 I. C. C. 151.

(n) Nonabsorption of switching charges of Pittsburgh, Allegheny & McKees Rocks R. R., on traffic to and from points of unloading and loading at complainant's plants at McKees Rocks and Allegheny, Pa., during Federal control, found not to have resulted in unreasonable charges because in excess of Pittsburgh district rates. While a number of large industries in that district performed their own spotting service, and some received allowances from trunk lines and others did not, record does not show that industries generally therein, without regard to size or complexity of plant tracks, received benefits of flat Pittsburg rates on all commodities regardless of origin or destination. Pressed Steel Car Co. v. Director General, 93 I. C. C. 224.

(o) Upon contention of N. Y. C. that establishment of switching charges subject to absorption by connecting lines between points on its line in the State Street zone in Rochester and connections with other carriers in the Rochester switching district amounts to establishment of through routes in violation of the short-hauling provision of section 15 (4) of the act, HELD: Provision of the act cited applies, if at all, under such circumstances, only to outbound traffic from the State Street zone. To give practical effect to section 15 for establishment of through routes, limitations on the Commission's power in paragraph (4) must be interpreted as prohibiting it from requiring a carrier to turn traffic over to a connecting line when to do so would require participation in a through route embracing substantially less than the entire length of its line. See 47 I. C. C. 643, 722, and other cited cases. Rochester Switching Case, 95 I. C. C. 30, 47, 48.

(p) Where a carrier publishes switching charges within switching limits of a city subject to absorption by connecting lines, and the commission includes an additional zone within such limits, it is a violation of section 3 (1) if such carrier does not make the switching charges published to and from the included zone subject to absorption by connecting carriers in same manner and to same extent as are existing switching charges. It is also a violation of this provision of section 3 by the connecting carriers if they do not absorb the new switching charges in same manner and to same extent as the old. Rochester Switching Case, 95 I. C. C. 30, 48.

(q) In determining the propriety of switching charges which may be or may not be absorbed by other carriers, the commission has said, 61 I. C. C. 205, that it must consider them as though they were charged for by the railroad rendering the service and paid by the shippers. Switching at Kansas City, Mo., 96 I. C. C. 538, 541.

(r) It is the general practice of carriers to absorb switching charges on competitive traffic and not to absorb such charges on noncompetitive traffic, and the nonabsorption on noncompetitive traffic at Kansas City, Mo., and absorption on competitive traffic at St. Joseph, Mo., is in accordance with this practice. Switching at Kansas City, Mo., 96 I. C. C. 538, 541.

(s) Proposed restriction of absorption of switching charges on coal from L. & N. stations and mines in Tennessee and Kentucky to points within the switching limits, suburbs and industrial limits of Atlanta, Ga., which would result in increased rates to Atlanta, found not justified. While it is desirable in the interest of uniformity, for the L. & N. to revise the absorption by it of connecting lines switching charges at Atlanta so that the amount which it absorbs is the same with respect to all lines serving Atlanta, such revision must not be accomplished in such manner as to materially increase the total charges which receivers of coal in the Atlanta district must pay. Coal and Coke from Kentucky and Tennessee Mines to Atlanta, 98 I. C. C. 11.

(t) Proposed restriction of absorption of switching charges on coal from L. & N. stations and mines in Tennessee and Kentucky to points within the switching limits, suburbs, and industrial limits of Atlanta, Ga., which would result in increased rates to Atlanta, found not justified. The present level of rates from L. & N. mines in Tennessee and Kentucky to Atlanta industrial district is not unreasonably low, particularly as the L. & N. transports the traffic over its own line under operating conditions which are favorable, and as it restricts the rate to the route over its own line, although there are other routes in connection with the Southern Ry. which are feasible and which can be used to advantage without an increase in the rate. Coal and Coke from Kentucky and Tennessee Mines to Atlanta, 98 I. C. C. 11.

(u) Proposed restrictions of absorption of switching charges on coal from L. & N. stations and mines in Kentucky and Tennessee to points within the switching limits, suburbs and industrial limits of Atlanta, Ga., which would result in increased rates to Atlanta, found not justified. Comparisons with rates from mines located on other lines in Tennessee and Kentucky and with rates from mines in Virginia and Alabama to Atlanta show that the ton-mile earnings produced by the proposed rates are considerably higher than the earnings under the rates with which they are compared. Comparison of the present rates and earnings from Windrock district of the L. & N. to Atlanta with rates and earnings from the same district to other points in Georgia shows that the rates to Atlanta generally produce higher ton-mile earnings. Coal and Coke from Kentucky and Tennessee Mines to Atlanta, 98 I. C. C. 11, 28.

(v) Switching charges collected by Hoboken Manufacturers R. R. Co. on trap car loads of l. c. l. freight switched by it from complainant's warehouse at Hoboken, N. J., to C. R. R. of N. J. at Weehawken, N. J., for interstate movement, found inapplicable. The Hoboken Manufacturers may not lawfully make a charge in addition to line-haul rate for switching cars direct from complainant's plant to line-haul carrier, as that would be charging for a service not actually rendered, and the hauling of such cars to its freight station before delivering to line-haul carrier is for its own convenience, is not required under the contract of transportation, and the shipper may not be assessed a charge therefor in addition to line-haul rate. Reparation awarded. Jewel Tea Co. v. C. R. R. Co. of N. J. 98 I. C. C. 424.

(w) Fact that absorption provisions of the carrier at point of origin, during Federal control, were less liberal than at other points found not to have resulted in unreasonable charges on sand from Falls Creek Pa, to Vandergrift, Pa. Complaint dismissed. United Engineering & Foundry Co. v. Director General, 98 I. C. C. 447.

(x) Complainant alleged it owned and operated a plant for milling lumber into match blocks at Spokane, Wash., on the joint tracks of the Oregon Washington and Milwaukee; that on lumber originating on those roads and shipped to its plant at Spokane, there milled in transit and shipped to its match factories in the east, no switching charge to or from the plant at Spokane is applicable; that on lumber originating at competitive points on the N. P., G. N., and S. I. milled in transit at Spokane, and shipped east over the originating carrier, that carrier absorbs the applicable switching

charges of $3.60 per car on each movement, inbound and outbound; that on like shipments originating at local points on any one of those three carriers the same switching charges are not absorbed by the originating carrier; that this failure to absorb switching charges on lumber originating at local points is in violation of sections 2 and 3 of the act; that the switching charges are unjust and unreasonable in violation of section 1. There is no evidence that $3.60 is an unreasonable charge for the switching movement, or that the amount of the through charges on shipments from local points is unreasonable except the fact that the switching charges are assessed in addition to the rate and the transit charge. HELD, rate attacked and defendant refusal to absorb the switching charges not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Federal Match Co. v. G. N. Ry 102 I. C. C. 353.

(xa) Switching charges and assessment thereof in addition to the road-haul rate and transit charge on lumber originating at local points and milled in transit at Spokane found not unreasonable, discriminatory, or unduly prejudicial as compared with the practice of carriers in absorbing such charges on traffic originating at competitive points. Federal Match Corp. v. G. N. Ry., 102 I. C. C. 353.

(xb) Defendant's failure to absorb intermediate line switching charges at Fargo, N. Dak., on various carloads of potatoes shipped through that point from stations in Minnesota and North Dakota to points in Kansas, as provided by applicable tariffs, found to have resulted in illegal charges. Reparation awarded. Hechtman v. C., M. & St. P., 102 I. C. C. 705.

(y) Complainant alleged refusal of defendant to refund a charge of $3.60 per car for switching numerous carloads of potatoes at Fargo, N. D., shipped between June 1, 1923 and June 1, 1924 from stations on the G. N., in Minnesota and North Dakota, to points in Kansas, is in violation of section 6 of the act in that the applicable tariff provided for the absorption of intermediate lines switching charges at all stations on defendants line, including Fargo. All moved as routed by shippers, G. N.. care C. M. & St. P. Ry., at Fargo, N. D., M. P., dely. The applicable rates were combination rates basing on Fargo. The G. N., has no direct connection with the defendant at that point and the interchange is effected through switching by the N. P., for which a charge of $3.60 per car was collected. The only issue presented is whether defendant undertook to absorb the switching charge. The provisions of the tariff provide that on shipments moving between stations on defendants line and stations on other lines, the total freight charges, after deducting connecting lines switching charges, must not be less than $30.50 per car, whether moving under through rates or on combination of local rates to and from the junction points. The total freight charges on each shipment after deducting connecting lines switching charges were considerably in excess of $30.50. In so far as defendant is concerned the shipments were received at Fargo, and defendants interpretation of the tariff may not be accepted. HELD, failure to absorb switching charges of $3.60 in violation of section 6, reparation awarded. Hechtman v. C. M. & St. P. Ry., 102 I. C. C. 705.

(z) Complainant alleged that it buys grain, grain products, cottonseed products, alfalfa meal and hay, in carloads in the primary markets along the Missouri, Mississippi and Ohio rivers, and that these products, transported to Meridian, Miss., by the M. & O., after storing and mixing in transit in their warehouses there, are forwarded thence to ultimate destinations upon joint rates from points of origin that their warehouses are on the rails of the M. & O.: that on out bound movements, after transit at Meridian, the M. & O., charged for switching to connections prior to July 1, 1922, $1.50 per car and after that date $1.35 per car; that defendants tariffs provide for the absorption of switching charges of connecting lines at Meridian on competitive traffic; and that, notwithstanding such absorption provision, defendants have not refunded to complainants the switching charges paid by them. There is no allegation or proof of unreasonableness, of undue prejudice, or of any violation of the act except an allegation of straight overcharge under section 6. All of the carriers provide in their tariffs for absorption of switching charges of their connections at Meridian on competitive traffic and the Southern Ry. provides for the absorption of the

M. & O., switching charges there on all carload traffic. The sole point in issue is whether the absorption provisions of the outbound carriers published for application at Meridian should be found applicable on these shipments notwithstanding the fact that the shipments did not originate at and were not ultimately destined to Meridian but merely stopped temporarily at that point on their thru journey. The record discloses no essential difference in the service performed in connection with the movement of an outbound transit shipment from the industry to the interchange tracks as compared with a similar service in respect of a shipment originating at the transit house in the first instance. By their tariffs defendants have held out to the shipping public that when a car is received by them from a connecting line at Meridian they will, under certain conditions absorb the switching charge published by that connection. Those tariff provisions have equal weight with the one which announces that in so far as the M. & O. is concerned the switching charges will be in addition to the through rate. If defendants desired to exclude transit shipments from the general provisions for absorption they had it in their power to do so by plain language rather than by inference. Their failure to do so can not cast the burden of paying the charges upon the shipper. HELD, switching charges illegally assessed, reparation awarded. Sturges Co. v. A. & V. Ry. 107 I. C. C. 136.

(aa) A general provision to the effect that a carrier will absorb the switching charges of "connecting lines" on traffic received by it at a certain point must, in the absence of clear and unequivocal language to the contrary, be taken to cover all traffic, whether originating at the point of absorption or whether handled there in transit as an incident to a through movement from a point beyond. Any other construction would require reading into the provision something which is not there, a method to which the Commission has repeatedly refused to resort in questions of tariff construction. Sturges Co. v. A. &. V. Ry. 107 I. C. C. 136, 138.

(bb) Proposed cancellation of absorption of the North Shore's switching charge at Racine and Racine Junction, Wis., on all interstate traffic found not justified. The record shows that industries in the vicinity of Racine apparently in substantially the same situation as protestant's plant, have all or a portion of their switching absorbed by the line-haul carrier, and it would be unreasonable to continue that practice and to deny similar treatment to protestant. Undue prejudice would be created if the Milwaukee were permitted to cancel the absorption of $2.50 on crushed stone from protestant's plant and continue a like absorption from the competing plant at Ives. Absorption of Switching at Racine and Racine Junction, Wis., 101 I. C. C. 60.

(cc) Upon reconsideration, original report 88 I. C. C. 368, total charges collected on interstate shipments to and from complainant's plant on the Owasco River Railway at Auburn, N. Y., which included switching charges of the Owasco, found not unreasonable as compared with flat Auburn rate. Contention by complainant that shipper in a given community is entitled to line-haul rates applicable to that community and if he pays a rate in excess thereof an abnormal rate structure exists, not sustained. An award of reparation would involve conclusion that line-haul rates to and from Auburn were up to the limit of reasonable maximum rates and that the relatively small switching charge sufficed to carry rates over the line by that amount. Such a conclusion is repugnant to common sense, nor does evidence establish any damage to complainant from undue prejudice found to exist in original report which is hereby reversed. International Harvester Co. v. N. Y. C. 101 I. C. C. 89.

(dd) Northwestern and St. Paul, respondents, proposed to cancel the absorption of switching charges of other lines at Chicago, Ill., on interstate shipments of ice, carloads, from points on their lines in Illinois and Wisconsin, which would have the effect of increasing the through charges on such traffic. The present rates include delivery to points on connecting lines. The bulk of the movement is from five points in a group from which the rate is 5c, a rate of 6.5c applying from a few more distant points. In most instances the switching charges of 2c per 100 pounds, or $12 per car. The suspended proposals would make the through charges to affected shippers exceed by the amount of the present absorption the total charges on shipments delivered to points

on respondents own rails. It is evident from this record that, under present conditions, the net revenue accruing to respondents after the absorption of connecting line charges in the Chicago district is insufficient to cover the line haul movement. When the line haul rates in question were originally established they did not include deliveries on connecting lines. When their application was voluntarily extended to cover such deliveries, the number of cars interchanged was relatively small and the switching charge only $3 per car. If that charge had received only the percentage changes of the general rate increases and reduction it would now be $4.75. It is probable that the difference in cost to respondents between making deliveries to points on their own rails and to points on connecting lines is not accurately measured by the amount of the switching charges which they now absorb on shipments delivered by connecting lines, but it is generally true, and has frequently been so recognized, that joint line service is more costly than single line service. The cost of the joint line service is further increased here in some instances by the expense of trackage rights over the lines of intermediate carriers where the originating carrier has no direct connection with the delivering line. Respondents are entitled to some compensation for this additional cost. HELD, increases in through charges that would result from the suspended proposals have been justified to the extent of $4.75 per car. Ice from Illinois and Wisconsin. 109 I. C. C. 3.

(ee) Refusal of defendants other than the Cuyahoga Valley to absorb its switching charges is alleged to have subjected and to subject complainant to the payment of charges for interstate transportation which were and are unjust and reasonable unjustly discriminatory and unduly and unreasonably prejudicial and disadvantageous. The allowance paid the Cuyahoga Valley by the other defendants is based on the assumption that it is a plant facility. the only question now presented is whether the C. V., is a common carrier or plant facility. The entire capital stock is owned by complainant, and it operates 14.42 miles of tracks in and around the plant of complainant; owns six locomotives and 44 freight cars, the cars not being interchanged with other carriers. It serves three independent industries and performs interplant and intraplant switching for the complainant and, to some extent, for the other industries served. All necessary facilities, including team tracks and track scales for serving the public, are provided. It complies with the law and regulations applicable to common carriers. HELD, Cuyahoga Valley Ry. Co. is a common carrier subject to the act, which may lawfully participate in joint rates with other common carriers, or have its switching charges on interstate shipments absorbed under proper tariff provision by the carriers which perform the line haul. Its compensation must not be more than is reasonable and a complete and specific statement of any basis agreed upon must be filed with the Commission immediately upon adoption. Otis Steel Co. v. C. V. Ry. 109 I. C. C. 238.

(ff) Apart from the defect in pleading, the Commission has repeatedly declined to require absorption of switching charges, except where necessary to remove unjust discrimination or undue prejudice, although in appropriate cases it may prescribe reasonable joint rates between points on switching and trunk lines. Western Indiana Gravel Co. v. N. Y. C. & St. L. Ry. 109 I. C. C. 727, 731.

(gg) Respondent, C. & N. W. Ry., proposed to increase from $3 to $5 per car the maximum amount of its absorption of the Laona & Northern switching charge to and from the plant of the Connor Land & Lumber Co., at Snyders, about 1 mile from Laona, Wis. Laona & Northern is a common carrier, its line running from Laona to Laona Junction, Wis., a distance of about 10 miles, where it connects with the Soo Line, being owned and controlled by the Connor Land & Lumber Co. This shipper is routing much of the competitive lumber traffic from its mill at Snyders through Laona Junction, for the reason that its own railroad for a 10 mile haul thus receives a division of 2.5c per 100 pounds out of the joint rates. The establishment of the proposed $5 absorption would attract some of this traffic to respondents line. HELD, respondent has not justified the proposed schedule. Absorption of switching charges at Laona, Wis., 112 I. C. C. 115.

III. DISCRIMINATION AND REASONABLENESS OF CHARGES.

See Advanced Rates §17 (bb); Discrimination; Reasonableness of Rates.

§4. In General.

(a) Based upon cost figures, minimum charge of $5 per car for movement of livestock, at Indianapolis, Ind., from stockyards to complainant's plant, during Federal control, found not reasonable. The transportation involves a road haul and two terminal handlings as well as preferred service in trainload lots and the return of approximately 100 per cent empties. If very small allowances for terminal and line-haul expenses were applied to a movement of this character, it would result in much higher coal per car than charge here assessed. Kingan & Co. v. Director General, as Agent, 89 I. C. C. 550.

(b) Complainant attacked charge of $5 per car paid by it for the switching or transportation of livestock from the stockyards in Indianapolis, Ind., over the Indianapolis Union Ry. to complainants plant in that city from February 1919 to August 1920, as unjust and unreasonable. The movements were intrastate, and wholly independent of prior rail transportation. This proceeding is properly brought in so far as the period Feb. 18, 1919 to Feb. 29, 1920 is concerned. Livestock, transported from the stockyards to complainants plant, is received at such stockyards by rail, including interurban trolley, by truck and on the hoof. Complainant buys such livestock free of freight charges, truckage, or drivers fees, and all movements here involved began at the stockyards and ended at complainants plant. It is in reality short haul transportation; it requires the placement of cars for loading and unloading, their hauling in trainload lots, and is made upon billing that is independent of prior billing transportation, or freight rates. Prior to June 25, 1918 the rate was 1c per head for hogs and $1 per car for livestock other than hogs, advanced on that date to 1.5c per hog and $1.50 per car for live stock other than hogs, and in February 1919, the director general established a minimum of $5 per car, advanced to $6.50 per car in October 1920 and $7 per car in March 1921. No substantial differences have been shown between movements to complainant and to other packing plants at Indianapolis. HELD, charge attacked not unreasonable or otherwise unlawful, complaint dismissed. Kingan Company v. Director General, 89 I. C. C. 550.

(c) Manufacturers Ry. respondent, proposed to increase its minimum switching charge except on coal, and the other respondents, the various trunk lines reaching St. Louis, Mo., proposed to absorb such increased switching charge. Prior to July 1, 1922 the switching charge on interstate traffic, excepting coal and on freight and privately owned refrigerator cars, not entitled to free movement, was $6.50 per car, reduced on that date to $5.85 the present charge. It is proposed to increase this to $6.50. HELD, proposed schedules justified. Switching charges of Manufacturers Ry., 89 I. C. C. 664.

(d) Charges of the C., R. I. & P. Ry. for interchange switching of interstate, c. l. shipments between certain industries on its line at El Dorado, Ark., and its connection with the Missouri Pacific at that point found not unduly prejudicial or preferential as compared with charges from competing industries on the El Dorado & Wesson R. R. at Pearson and Oak Hill, Ark., shipping to the same points. Such charges, however, found unreasonable for future, and reasonable charge prescribed. El Dorado Chamber of Commerce v. C., R. I. & P. Ry. Co., 89 I. C. C. 743.

(e) Complainant attacked charge of 2c per 100 pounds, minimum 60,000 pounds, maintained by defendant for the interchange switching of interstate carload freight between certain industries on its line at El Dorado, Ark., and its connection with the M. P., at that point as unreasonable, unduly prejudicial to local points on the M. P., and unduly preferential of industries on the El Dorado & Wesson at Pearson and Oak Hill, Ark. El Dorado is served by the El Dorado and Wesson, M. P. and defendant,

Rock Island. The two latter extend thru El Dorado from north to south, generally speaking, and are physically connected near the center of the town. The other line enters from the southwest and terminates at El Dorado. It connects only with defendant, about 400 feet south of defendant's connection with the M. P., but interchanges traffic with the M. P. by means of an intermediate switch movement performed by defendant. The switching charges at El Dorado are generally absorbed by the connecting line on competitive traffic. Only a small percentage of the cars switched originate at or are destined to local points. On these the shipper pays the switching charge. Interchange movements must be made through the busiest part of the yard, with many switches, across congested streets, and over a short piece of main line track. Physical conditions are such that these difficulties can not be readily overcome. The situation is peculiar at El Dorado and does not exist at any other point on defendants lines. HELD, rates attacked not unduly prejudicial or preferential but is unreasonable for future to extent it exceeds $6.50 per car. Chamber of Commerce of El Dorado, Ark., v. C. R. I. & P. Ry., 89 I. C. C. 743.

(f) Respondents, M. C., and N. Y. C., proposed to make certain changes, mostly increases, in their switching charges at Detroit, Mich. The terminal operations of the M. C. are by far the most extensive of any line serving Detroit. The switching hauls rang from 0.5 to 20 miles with average about 8 miles. About one-third of its total traffic originates or terminates within Detroit. The terminal of the N. Y. C. extends from Ecorse River to Milwaukee Junction, 11.5 miles. With the exception of the G. T., the terminal facilities of the other line haul carriers serving Detroit are comparatively limited. The most important purely terminal carriers are the Detroit Manufacturers and the Detroit Terminal. (1) Intraterminal, between industries, team tracks, and other facilities on the same line. (2) Interterminal, between such facilities on one line and its interchange with another where the connecting line also performs a switching service. (3) Reciprocal, between such facilities on one and its interchange with another where the connecting line performs a road haul and (4), intermediate, between one interchange and another. Respondents proposed to establish charges of 2c on reciprocal and interterminal switching from and to industries, 2.5c on team track, reciprocal and intraterminal switching, with the exception of coal, coke, sand, gravel, crushed stone and slag on which charges of 0.5c lower are proposed, and of livestock from the stockyards on which a charge of 3.5c interterminal and reciprocal, and intraterminal to certain destinations are proposed. On sand and gravel between the M. C. and Delray Connecting and Detroit Terminal the proposed schedules would result in reductions as the present joint rates would be superseded by lower combinations. The proposed charges for intermediate switching and on special movements of livestock represent both increases and reductions. Lower charges are proposed on coal, sand, gravel, crushed stone and slag than on other commodities on account of the volume in which these commodities move, comparatively higher average loading and the low risk attending their transportation. Respondents reciprocal switching charges are absorbed by its connecting lines down to a net road haul revenue of $19 per car. While the cost studies submitted in this proceeding do not justify unqualified approval of the proposed charges, they do warrant the conclusion that the present compensation received by respondents for performing the switching services affected is materially less than the cost properly chargeable against such services, including a reasonable return upon the portion of the investment of facilities used therein. The difference between the service performed for one industry and another is frequently greater than the difference between the service performed in connection with an industry and a team track, and there are many instances shown where the former requires greater service. Inasmuch as the charges are based on the average service rendered there is no warrant for distinguishing between industry and other switching. the Commission thinks that a uniform charge per car for each of the three types of movement is preferable to the bases proposed by respondents. Respondents are not justified in embracing within its reciprocal charges costs which

are assessed against the connecting lines in the form of reclaims. HELD, proposed charges not justified. That proposed intraterminal and interterminal charges on sand, gravel, crushed stone and slag have not been justified; and that proposed charges for intermediate, passenger and express, and special livestock movements have been justified; that the proposed charges on other traffic have not been justified, but that charges have been justified on such traffic of $16 per car for intraterminal switching, $12 per car for interterminal switching and $7 per car for reciprocal switching. Increased Switching Charges at Detroit, Mich., 91 I. C. C. 82.

(g) Complainant sought reparation under sections 2 and 3 and the long and short haul clause of section 4 on numerous cars of grain and grain products switched between its elevator and connections of defendant in the Kansas City, Mo., Kans., switching district between Feb. 3, 1921 and Sept. 27, 1923, to the extent that the switching charges paid exceeded those applicable on similar traffic of the Kimball Milling Company. The Rosedale elevator and the Kimball mill are on the Frisco in Rosedale within 200 feet of each other, the former being intermediate to the latter on both inbound and outbound movements. Rosedale is within the Kansas City switching district. The charges attacked are those maintained by defendant for switching between its connections and the industries referred to carloads of grain and grain products which originated at, or moved to, noncompetitive points on other lines outside of that district. Charges paid were $7 and $6.30, prior to and on and after August 30, 1922. The corresponding charges applicable on similar traffic of the Kimball Milling Co. were $5.50 and $4.95. Effective Sept. 28, 1923, defendant reduced the charge on complainants traffic to $4.95 the same as on the traffic of the Kimball mill which is satisfactory to complainant for the future. Complainant introduced no evidence of specific damage. HELD, complaint dismissed. Fowler Commission Co. v. St. L. S. F. Co., 92 I. C. C. 641.

(h) Complainant attacked commodity rate of 22c charged on one car of fuel oil shipped during July, 1917, from Cushing, Okla., to Lawn Switch, Omaha, Nebr., as unjust, unreasonable, and in violation of sections 4 and 6 of the act to extent it exceeded 18c. Shipment moved from Cushing via the Santa Fe to Kansas City and Burlington to Omaha. Originally consigned to Nicholas Oil Co., Omaha, Nebr., but was reconsigned to the Douglas County Commissioners for delivery at Seymour Park, Nebr., a point on the M. P., beyond the switching limits of Omaha. Subsequently the car was placed for unloading at Lawn Switch, a point on the M. P. within the switching limits of Omaha. Charged to Omaha 18c, beyond 4c. Lawn Switch is a team track, but at the time the shipment moved a spur track connecting with Lawn Switch served Pickards Anchor Concrete Company and the M. P. published a switching charge from Omaha to this plant of $6 per car. The tariff carried the clause reading that rates from and to intermediate industries and switches not indexed in this tariff will be the rate named from or to the first more distant industry or switch indexed in this tariff on the same line. Lawn Switch is not indexed in the tariff. The tariff of the Burlington provided for the absorption by that line of connecting lines switching charges at Omaha. HELD, rate of $6 per car applicable and Burlington tariff provided for its absorption, reparation awarded. Douglas County v. A. T. & S. F. Ry., 92 I. C. C. 717.

(i) Complainant attacked charge of $5 per car exacted for switching from the E. & I., between the mill it then operated at Terre Haute, Ind., and connecting lines of that carrier as unlawful in violation of section 6 to extent it exceeded $2 per car. On interstate traffic the director general admitted the correctness of the claim and expressed willingness to refund the overcharged, thus leaving intrastate shipments only for consideration. Prior to March 1, 1916 the rate for switching carload freight of the kind here involved between industries on the E. & I., and connecting carriers was $2 per car on both interstate and intrastate traffic. In Oct. 1917 the receiver of the E. & I., petitioned the court and alleged that this charge, among others was so low as to be confiscatory, whereupon the court issued its order of Oct. 23, 1917 to the effect that all unremunerative freight and switching charges prescribed by the Indiana Commission, in so far as they related to the E. & I., or its receiver, were unconstitutional and invalid. As a result of this

the $2 charge was canceled intrastate. HELD, charges attacked not illegal or otherwise unlawful, except in instances, if any, where a part of the charge should have been absorbed by connecting lines in road haul rates, reparation awarded. American Hominy Co. v. Director General, 93 I. C. C. 256.

(j) Respondents, Detroit, Western Ry., Detroit & Toledo Short Line R. R., Grand Trunk, Pere Marquette, Pennsylvania and Wabash proposed to increase their switching charges at Detroit, Mich. In 91 I. C. C. 82, M. C., and N. Y. C., justified charges of $16 for intraterminal switching, $12 for interterminal switching, and $7 for reciprocal switching. Present respondents established the reciprocal charge of $7 without protest, and they here ask approval of $16 and $12 for intraterminal and interterminal movements. The Detroit, & Toledo Short line offered no evidence as to the costs or operating conditions. It is stated that that carrier considers itself entitled to the same charges as other lines serving Detroit, but that it will not be greatly harmed if its charges are not increased. HELD, proposed charges justified, except D. & T. S. L. R. R. and D. & W. Switching at Detroit. 95 I. C. C. 21.

(k) Switching charges differ from line haul rates in that they are ordinarily not graded in accordance with either the value of the commodity moved or the distance of movement. As a rule, they take the form of a flat charge per car or per ton or per 100 pounds; and as a rule, also, they apply to any haul within the switching district no matter how long or how short it may be, subject to the qualification that a haul to and from a connecting line may take a lower charge than a haul complete in itself. The fact that the movement may be made by a switching engine not under train orders or that it may be incidental or ancillary to another transportation service in no way explains these characteristics of switching charges. Yet the circumstances that they have become so general throughout the country by voluntary action of the carriers in the process of railroad development, strongly suggests that there is sound reason for the differentiation. Rochester Switching Case, 95 I. C. C. 30, 44.

(l) It is evident that a policy with respect to switching charges which adds to flexibility and convenience in the use of the transportation facilities serving an industrial center will also create conditions favorable to its growth and prosperity. Rochester Switching case, 95 I. C. C. 30, 45.

(m) Line haul rates and switching charges are two methods of securing compensation for freight service which differ radically in principle. Both have developed naturally as the outgrowth of particular conditions. In the case of line haul rates, cost and value of service are factors which are, in theory at least, taken into consideration in fixing the rates for each and every commodity and for each and every haul. Switching charges, on the other hand, are largely based on average conditions. In every switching district there will almost invariably be found some hauls so long and so difficult that the costs is in excess of the switching charge collected; but that fact does not show the charge to be less than reasonable, for the question is whether the carrier is receiving adequate compensation for the total switching service rendered within the district. Rochester Switching case, 95 I. C. C. 30, 45.

(n) The bulk of the expense in making of a switch movement consists in the handling of the car at the two ends of the movement. Comparatively little is added in moving the cars a few miles even, when once upon the main track. Rochester Switching case, 95 I. C. C. 30, 47.

(o) In 95 I. C. C. 21, the Commission found the respondents herein, other than the Detroit, Western and the Detroit and Toledo Shore Line, has justified charges of $16 per car for intraterminal switching at Detroit, Mich., but that charges of the same amounts, proposed by the two respondents named, had not been justified. HELD, upon rehearing, these charges authorized as reasonable on the two carriers named. Switching at Detroit, Mich. 96 I. C. C. 415.

(p) Respondent, I. H. B. R. R., proposed to cancel the rate of $12 per car on ashes, cinders, clean, having value for construction purposes, and to cancel the application of a rate of $8.10 on other ashes and cinders, between stations on its line or between such a station and a junction with a connecting line, thus making applicable thereon the "all commodities" rates of 2.5c per 100 pounds between a station and a junction.

The joint rate on ashes and cinders between points on respondents road and points within the Chicago switching district on other lines is 2.5c per 100 pounds, one half of which is respondents division. HELD, schedules not justified. Ashes and cinders, 98 I. C. C. 163.

(q) Complainant caused to be shipped two cars of sugar from the warehouse of the McDonald Transfer & Storage Co. on the G. N., at Sioux City, Iowa, to the warehouse of the Warfield Pratt Howell Co. in the same city on the Omaha R. R., charged 6c per 100 pounds which it claimed is unreasonable to extent it exceeded 1.6c. The 6c rate collected by the G. N., out of which it paid $2 per car to the Omaha for the latters part of the haul, was the fifth class Iowa distance rate for 5 miles or less. The mileage tariff did not name any distance between the warehouses above mentioned, but effective Nov. 15, 1919, the G. N., established a switching charge of 1.5c but this charge was restricted to movements between industries on that road. Effective Dec. 31, 1922 the same carrier established a rate of 2c for switching between industries on its rails and connections with other lines at Sioux City, and this rate is still in effect. HELD, reasonable charge for movement in question was 2c per 100 pounds, reparation awarded. Seavey & Flarsheim Co. v. Director General, 98 I. C. C. 295.

(r) Complainant attacked charges collected between Oct. 1, 1921 and Feb. 15, 1922 on 32 trap cars of less carload shipments of tea, coffee, spices, china, glassware, earthenware and other merchandise from its warehouse at Hoboken on the Hoboken Mfrs. R. R., to the Central R. R. of N. J., for interstate shipments to destinations in other states as unreasonable and in violation of section six. Hoboken collected switching charges based on rate of 5.5c. The line haul rates applicable on those less carload shipments were the class rates. The class rate tariffs apply the New York rate from Hoboken, and were concurred in by the Hoboken; therefore the line haul rates were applicable from points on that line. No trap car tariff was in effect at that time. It is the view of the Commission that the Hoboken may not lawfully make a charge in addition to the line haul rate for switching the 16 cars which were transported direct from complainants plant to the Central, as that would be charging for a service not actually rendered. It is also of the opinion, that the hauling of the remaining 16 cars to the freight station was for the carriers convenience, was not required under the contract of transportation, and the shipper may not be assessed a charge therefor in addition to the line haul rate. HELD, shipments overcharged to extent of charges of the Hoboken, reparation awarded. Jewell Tea Co. v. C. R. R. of N. J., 98 I. C. C. 424.

(s) Charges on shipments of coal and coke to complainant's plant at Rockford, Del., located on Philadelphia & Reading Ry., within City limits of Wilmington, Del., composed of rates to Wilmington plus minimum scale of class rates beyond, found illegal to extent they exceeded line-haul charges from points of origin to Wilmington. There was nothing in switching tariff of Philadelphia & Reading, describing Wilmington switching limits, which would have effect of excluding complainant's plant from application of switching rate and its absorption on shipments here involved. Refund of overcharges directed. Bancroft & Sons v. P. & R. Ry. Co., 91 I. C. C. 186.

(t) Complainant attacked switching charges of 30 and 40c minimum $6.50 per car from Oct. 1, 1918, to Feb. 28, 1920, for the movement of materials, carloads, between various divisions of complainant's plant at Newark, N. J., as unreasonable. The movements here considered were performed by switch engines and crews from the Jersey Central break up yards at Brills, N. J., usually at the time when the engine and crew went to the plant for the daily drill of cars on which a line haul movement had been or was to be performed. The hauls ranged from 1,900 to 10,000 feet or more. The charges attacked were published in a local switching tariff of the Jersey Central applying at Newark and Brills. The charges attacked were applicable for intraplant and interplant switching at and between industries served. Considering the density of traffic in this district, the time and labor consumed in the movements, the dangerous character of the commodity of which most of the shipments consisted and the number of movements involving a main line haul, the Commission is not convinced that an average return of $14.40 per car was excessive for such service. HELD: proper applicable charge 30c, overcharge ordered refunded where 40c charged, reparation

awarded. Butterworth Judson Corp. v. Director General, 100 I. C. C. 337.

(u) Birmingham Belt R. R., respondent, sought to increase its charges for switching carload freight at Birmingham, Ala. Birmingham is also served by the A. G. S., A. B. & A., B. S., C. of Ga., L. & N., M. & O., S. A. L., and Southern. Respondents published switching charges on competitive traffic are absorbed by all connecting lines. On noncompetitive traffic the charges are paid by the shippers. All connecting lines other than the Frisco and I. C., have filed tariffs limiting their absorptions to the present charges. Respondents serves 124 industries and team tracks within the switching limits of Birmingham and many of them can be reached only over its rails. The cost study presented by respondent falls short of justifying the increases proposed. HELD: Proposed schedules not justified. Switching in Birmingham District, 100 I. C. C. 763.

(v) Rate on sand from Thornburgh, Ohio, located immediately outside the Cleveland switching limits, to Cleveland, during Federal control, found not unreasonable, but unduly prejudicial in favor of competing points located a few miles north and west of Thornburgh, within the Cleveland limits. Distances from Thornburgh are practically the same as from points within and immediately outside the district were not substantially dissimilar. Switching limits were subsequently extended to include Thornburgh. Reparation denied for lack of proof of damage. Cleveland Sand & Gravel Co. v. Director General, 92 I. C. C. 45.

(w) Switching charges of the K. C. S. on petroleum and products from Cedar Grove, La., to an industry on the Houston & Shreveport within switching limits of Shreveport, during Federal control, and those on similar shipments from Cedar Grove and Gas Center, La., moving to interstate points subsequent to Federal control, found inapplicable. While it was defendant's intention to restrict application of lower charges named in applicable tariff it did not do so and such tariff must be construed strictly in accordance with its printed language. Moreover, tariff provisions were ambiguous and contradictory, under which circumstances they must be construed in favor of shipper and force and effect be given to those provisions which result in lowest charge. Caddo Central Oil & Rfg. Corp. v. Director General, 92 I. C. C. 627.

(x) Following Clay Grain Co., 78 I. C. C. 539, aggregate of line-haul rates and charges for switching from connection with road-haul carriers to export elevators at Galveston, on export grain from points in Missouri, Iowa, Minnesota, Nebraska, Kansas, Colorado and Oklahoma found unreasonable to extent they exceeded such line-haul rates exclusive of switching charges. Reparation awarded. Armour Grain Co. v. A., T. & S. F., 93 I. C. C. 124.

(y) Prayer for an order requiring construction and operation of an interchange track between intersecting lines of A., T. & S. F. and C., R. I. & P. railways at Courtland, Kans., in order to reduce the mileage and therefore the rate, from Superior to Rock Island points, but more particularly to expedite delivery, complainant alleging loss of business to rival plants which can make more expeditious delivery, denied. No definite evidence was introduced as to probable difference in time over route sought and over present route; nor with respect to time consumed in shipments from competing points. Moreover, record fails to establish that there would be sufficient traffic over the connection to justify its construction and maintenance. Nebraska Cement Co. v. A., T. & S. F., 93 I. C. C. 163.

(z) As an outgrowth of receivership proceedings the United States District Court ordered increase in intrastate switching charges of the Evansville & Indianapolis R. R. Tariffs were forwarded to State commission which "neither accepted nor rejected them" on ground that they failed to comply with State statutes as to notice, but such tariffs were retained in the State commission's files "for information only". HELD: such increased charges assessed on intrastate shipments during Federal control found not illegal, and it is not within this commission's province to pass upon question of whether the district court erred. American Hominy Co. v. Director General, 93 I. C. C. 256.

(aa) Based upon studies submitted tending to show cost of performing the service, proposal of certain carriers to increase their charges for intraterminal and interterminal switching at Detroit, found justified as to the Pere Marquette, Wabash, Pennsylvania, and Grand Trunk railways, but not justified as to the De-

troit & Toledo Shore Line. Switching at Detroit, 95 I. C. C. 21.

(bb) Charges of the N. Y. C. for switching interstate traffic between points on the State Street branch in Rochester and various groups and intermediate points within the Rochester switching limits, found unreasonable in some instances and unreasonable and unduly prejudicial in others. Reasonable and nonprejudicial switching charges prescribed for the future. Rochester Switching Case, 95 I. C. C. 30.

(cc) State Street branch of N. Y. C. in Rochester, N. Y. Interstate class and commodity rates between points on defendants' lines, on the one hand, and industries in the State branch of the N. Y. C. in Rochester, on the other, found unreasonable and unduly prejudicial to extent they exceed the lowest rates contemporaneously in effect between same points and other industries on lines of the N. Y. C. in that city. The State Street zone is industrially, economically, and physically a part of the industrial district of Rochester, although it happens by accident of railroad construction to be 20 miles distant by rail. However, it is in the broad public interest that such zone be included within the Rochester switching limits, and the commission does not believe that such inclusion is inconsistent with carriers' interests. Rochester Switching Case, 95 I. C. C. 30.

(ddee) There is no exact or comprehensive definition of switching service. See Boston Wool Trade Asso., 69 I. C. C. 282, 294, 295. Rochester Switching Case, 95 I. C. C. 30, 44.

(ff) It is proper that industrial-switching charges be relatively higher than reciprocal-switching charges within a switching district, since in the former two terminal services are involved. Rochester Switching Case, 95 I. C. C. 30, 48.

(gg) Contention of defendant that, under the laws of Illinois, complainant is neither owner of a lateral branch-line railroad nor of a private sidetrack and therefore not entitled to a switch connection, not sustained. Dering Coal Co. v. C., C. C. & St. L., 96 I. C. C. 143, 152.

(hh) Rate on coal from Ohio mines to Huntington, Ind., moving over the Erie, found not to have been unreasonable, unjustly discriminatory, or unduly prejudicial as compared with lower rate contemporaneously in effect over the Wabash. Complainant receives coal from Ohio over either road, but when it arrives over the Wabash and is delivered to team track of Erie, a switching charge is assessed, therefore complainant could not profitably take advantage of the lower rate. Bash & Co. v. B. & O., 96 I. C. C. 178, 182.

(ii) Rates on coal from mines in Inner and Outer Crescent districts and Cincinnati, Ohio, to Ben Davis, Ind., found not unreasonable, unjustly discriminatory, or unduly prejudicial as compared with lower rate to Indianapolis, Ind., from the same points and from points in Indiana. Complaint seeking extension of Indianapolis rate plus switching charge to Ben Davis, dismissed. Bash & Co. v. B. & O., 96 I. C. C. 178, 183.

(jj) Proposed increases and reduction in rates on sand and gravel from points in inner and outer zones in Illinois and Wisconsin to Chicago switching district found not justified Although the proposed rates appear reasonable per se they would result in a division of the destination territory into two distinct districts and such a division was not contemplated by the Chicago Producers case, 64 I. C. C. 37, and was condemned by the commission in 89 I. C. C. 484. Suspended schedules ordered canceled without prejudice to the filing of new schedules in which respondents should publish rates from the outer zone, including Waukesha, which are the same to all destinations in the Chicago switching district as defined in the tariff, at the same time preserving the differential of 0.25 cent as between the inner and outer zones. Sand and Gravel Between Points in Illinois and Wisconsin, 96 I. C. C. 325.

(kk) Upon complaint seeking the application of the Atlanta, Ga., rate to complainants' sidings on ground that Sawtell, Ga., was accorded this rate and that complainants' sidings are intermediate to Sawtell from Atlanta, HELD: Rates to complainants' sidings were unreasonable to the extent they exceeded rates to Sawtell so long as fourth section violation existed, and thereafter rates to complainants' sidings were unreasonable to extent they exceeded rates to Constitution, Ga. Randall Bros. v. L. & N., 96 I. C. C. 342.

(ll) Texas Gulf Sulphur Co., found not entitled to allowances from the Santa Fe for switching service performed

by it between Gulf Hill, Tex., and its plant. A carrier has the right to itself perform any transportation service which it may lawfully be required to perform. Atchison Railway Co. v. United States, 232 U. S. 199. When, as here, it is prevented from performing the service by the election of the industry to itself perform it, and when the service of the carrier would not meet the needs and convenience of or be satisfactory to the industry, as is also here the case, the carrier's duty to perform the service is discharged, and consequently there is no obligation resting upon the Santa Fe to make an allowance to the sulphur company for performing the service. Allowances or Divisions Received by Texas Gulf Sulphur Co., 96 I. C. C. 371, 376.

(mm) Proposed joint switching charges of the Detroit & Western and Wabash at Detroit, Mich., found justified. Findings in original report, 95 I. C. C. 21, modified accordingly. Switching at Detroit, 96 I. C. C. 415.

(nn) Rates on coal screenings, shipped from Contrall, Springfield, and Pana, Ill., to Lyons, Iowa, during Federal control found not unreasonable, although lower rates on same commodity were contemporaneously applicable from same points to Clinton, Iowa, within the switching limits of which Lyons is located. Lower rates to Clinton were established through error. Complaint dismissed. Ford Roofing Products Co. v. Director General, 96 I. C. C. 471.

(oo) Increase charges for switching at Kansas City, Mo.-Kans., proposed by Kansas City Southern Ry. Co., found justified in part as indicated. Cost study submitted for a test period warrants the conclusion that the present compensation received for such service is less than the cost properly chargeable against it, including a fair return upon the investment in the facilities used therein. Switching at Kansas City, Mo., 96 I. C. C. 538.

(pp) Rate on fire brick from Vandalia, Mo., to Pearson, Ark., between February 3 and July 24, 1923, found unreasonable to extent it exceeded lower rate established on latter date from and to same points and from Vandalia to El Dorado, Ark., within the switching limits of which Pearson is located. Reparation awarded. Walsh Fire Clay Products Co. v. C. & A. R. R. Co., 98 I. C. C. 458.

(ppa) Rate on common brick from Blue Island, Ill., in Chicago switching district, to Illinois and Indiana points within that district, during Federal control, to which a flat increase of 2 cents per 100 pounds was added under General Order No. 28 of director general, found not unreasonable as compared with rate subsequently established when the rate basis was changed by addition of 25 per cent in lieu of the flat increase. In 64 I. C. C. 273 a rate similar to that here charged was found not unreasonable, and if that decision is correct the rate in effect within the switching district prior to the increase must have been less than a reasonable maximum rate. Moreover, in a similar case, 73 I. C. C. 215, it was found that considering the congested conditions in and around Chicago a rate equal to that charged can scarcely be denominated high even on a low-grade commodity and for comparatively short distances. Illinois Brick Co. v. Director General, 102 I. C. C. 64.

(ppb) Switching charges and assessment thereof in addition to the road-haul rate and transit charge on lumber originating at local points and milled in transit at Spokane found not unreasonable, discriminatory, or unduly prejudicial as compared with the practice of carriers in absorbing such charges on like traffic originating at competitive points. Federal Match Corp. v. G. N. Ry., 102 I. C. C. 353.

(ppc) Rate assessed on sand from LaFayette, Ind., to Kankakee, Ill., found applicable. To effect delivery at complainants' unloading lot a switching service was necessary, charges for which would have been absorbed by delivering line had point of delivery come within meaning of tariff rule which provided that switching charges from or to industries located on line of switching carrier would apply from or to additional industries which might so locate. This unloading lot can not be considered as coming within meaning of this rule, and since complainants were not included in list of industries to which rule applied, lower rate to Kankakee proper was not applicable. Shanks & Gannon Co. v. C., C., C. & St. L., 102 I. C. C. 462.

(ppd) Findings in original report, 80 I. C. C. 229, that intraplant switching charges from complainant's coal-mine tipple to its slack-coal storage bins at Sunnyside, Utah, during Federal control were unreasonable, modified. Additional

evidence adduced showing unfavorable operating conditions under which switching was made indicate that charges prescribed as maxima reasonably might have been somewhat higher. Reparation awarded. Utah Fuel Co. v. D. G., 102 I. C. C. 493.

(qq) In 80 I. C. C. 229 the Commission found the intraplant switching charges averaging $6.69 collected from complainant for the movement of 7,123 cars of slack coal between June 25 and Nov. 19, 1918 from complainants coal mine tipple to its slack coal storage bins at Sunnyside, Utah, as unreasonable to extent they exceeded $2.50 and awarded reparation. The present contention of defendant that the switching at Sunnyside was an intraterminal rather than an intraplant movement and accordingly subject to a higher basis can not be sustained. The movement was between two parts of the same plant and constituted an integral part of the single operation of coke manufacture. As the movement, however, was for a considerable portion of the distance over the tracks of the carrier, it does not fall within the category of a plant operation, as distinguished from the service of a common carrier, over which the jurisdiction of the commission does not extend. HELD, switching charges attacked unreasonable to extent it exceeded $3 per car, reparation awarded. Utah Fuel Co. v. Director General 102 I. C. C. 493.

(qqa) Complainant relied upon comparative switching movements to show unreasonableness in charges for similar movements at its own plant. Carriers, following investigations at comparative points, testified that in no instance was physical situation comparable with that at complainant's plant. FOUND: A mere variation in some aspects of a comparative movement does not necessarily destroy its value as a measure of reasonableness if operations are essentially similar, since comparisons of precisely similar situations would be difficult, if not impossible, to find. Utah Fuel Co. v. D. G., 102 I. C. C. 493, 495.

(qqb) Contention that switching service was an intraterminal rather than an intraplant movement, not sustained where such movement was between two parts of same plant and constituted an integral part of single operation of coke manufacture. In addition, such movement being for a considerable portion of the distance over tracks of a main line carrier, it does not fall within category of a plant operation, as distinguished from service of a common carrier, over which jurisdiction of the commission does not extend. Utah Fuel Co. v. D. G., 102 I. C. C. 493, 496.

(qqc) Charges assessed by St. L.-S. F. Ry. for switching interstate shipments at Arkansas City, Kansas., between its connections and complainants' industries found not unreasonable, considering character of such service and manner in which it is performed, elements of cost involved in the different services, together with other facts of record. Arkansas City Sand Co. v. St. L.-S. F., 102 I. C. C. 559.

(qqd) Maintenance by St. L.-S. F. Ry., of a higher charge for switching interstate traffic at Arkansas City, Kans., than for performing a like and contemporaneous service in switching intrastate shipments, found unduly prejudicial to interstate shippers, unduly preferential of intrastate shippers, and unjustly discriminatory against interstate commerce, on ground that such service is identical whether the traffic is interstate or intrastate in character. Arkansas City Sand Co. v. St. L.-S. F., 102 I. C. C. 559.

(rr) Complainant attacked switching charges since June 30, 1920 for switching interstate carload shipments between their plants at Arkansas City, Kas., and defendants connections as unreasonable, unduly prejudicial and unjustly discriminatory. Arkansas City, about 5 miles from the Oklahoma line, is served by the Frisco, defendant, Santa Fe M. P., and Midland Valley. The Frisco switching charges at Arkansas City between industries on its tracks and its connections have been and are the same for all industries. Prior to June 30, 1920 the tariffs named a charge of $2 on both interstate and intrastate shipments, changed on that date to $5 interstate, increased to $7 August 26, 1920, and $6.30 since July 1, 1922. The charge intrastate were increased to $2.50 on Oct. 23, 1920, reduced to $2.25 on July 1, 1922. The Frisco makes no switching charge on carload shipments moving to or from industries located on its tracks upon which it performs the line haul. The distance from the sand companys plant to the M. P., and Santa Fe connections is about 12,000 feet and to the Midland Valley connection 9,000 feet. The distance from the mill to M. P. and San-

ta Fe connections is 3,600 feet and to the Midland Valley connection 1,400 feet. The case was developed on the theory that it was impracticable to establish a different switching charge for each of the several industries located on the Friscos tracks and that a charge reflecting average costs should be prescribed. Other carriers switching charge at Arkansas City are $2.25 state and intrastate. HELD, switching charges attacked not unreasonable, but unduly prejudicial to extent interstate charges exceed those applicable intrastate, which undue prejudice should be removed. Arkansas City Sand Co., v. St. L. S. F. Ry 102 I. C. C. 559.

(ss) Complainant attacked rates on switching traffic at and between Menominee, Mich., and Marinette, Wis., as unreasonable, unjustly discriminatory and unduly prejudicial. Defendants are the Northwestern and Milwaukee. The Ann Arbor reaches Menominee by ferry but otherwise those cities are served directly only by defendants and the Wis. and Mich. East of Bagley Junction, Wis., the W. & M., operates over the rails of the Milwaukee which extends through Marinette to Menominee. The Victory mill is located on joint tracks of defendants. Mill No. 2 is served only by the Northwestern and mill No. 1 only by the Milwaukee. There are plant yards at the mills last noted but not at the Victory mill. No. 15087 attacks a rate of 7.5c minimum 40,000 pounds for switching wood pulp, in carloads, between mills No. 2 and 1, while sub. No. 1 attacks a rate of 7c minimum 40,000 pounds for switching carloads of wrapping paper and paper bags between the paper mills and between mill No. 2 and the Victory mill. Defendants have a joint track into the Victory mill. The movement between that mill and mill No. 2, a distance of 5.9 miles, is a service wholly by the North western. Between mills No. 2 and No. 1 the haul is a joint service by both defendants. The length of the haul is 7.1 miles from mill No. 2 to mill No. 1 and 9.1 miles in the reverse direction. In these movements three switching crews are required, there is some trucking of the traffic between the mills but there has been little or no rail movement. The rates for trucking appear to be materially lower than the rates attacked. The rate attacked and applicable on wood pulp is the minimum rate on class C traffic, the normal class C rate being 5c. The normal and minimum fifth class basis, applicable to such movement of wrapping paper and paper bags is 6.5c and 11c and the rate attacked and applicable is a commodity rate. HELD, reasonable maximum rates in lieu of those attacked would not have exceeded and would not exceed 3.5c and 4c in 15087 and sub. 1, respectively. Sub. No. 2 attacked a rate of 43c per ton applying on soft coal, carloads, from the coal docks at Menominee to mill No. 1. The rate attacked is a commodity rate, materially lower than the class D rate, which would otherwise apply. Thus the normal class D rate is 5c and the minimum rate applicable on class D rate is 6.5c. The tracks to the dock are jointly used by defendants, but the traffic is handled exclusively by the Milwaukee. This traffic is the only coal movement over the Milwaukee and apparently the only coal movement over the Northwestern between these cities, and defendants consider that the class basis should properly apply. Defendants show that this rate compares favorably with intrastate rates for corresponding distance, applicable on coal in various states. HELD, rate attacked on coal not unreasonable. Sub. 3 attacks a charge of $9 per car maintained by the Northwestern for switching between point of connection with the Milwaukee at Menominee and the Northwestern industries at Menominee for account of W. & M. Ry. The W. & M., absorbs the Northwestern switching charges at Menominee on outbound shipments from complainants mill. On inbound traffic the record is not sufficiently developed to disclose the facts except as to the switching charge of the Northwestern on pulpwood to mill No. 2 when from Oba, Ontario, Can., originating at Elsas, Ont. Can., and moving the W. C. & H. B., C. P., Soo Line, and W. & M. The distance from the Northwestern-Milwaukee interchange tracks to mill No. 2 is about 2 miles. The charge has not been shown to be unreasonable per se. When this charge was increased to $9 per car no increase was made in the corresponding charge of the Northwestern on traffic received from the Milwaukee, and that charge is now $2.25 per car. HELD, this switching charge unduly prejudicial to extent it exceeds the charge maintained on traffic received from the Milwaukee, at Menominee, reparation denied. Marinette & Menominee Paper Co. v. C. & N. W. Ry., 107 I. C. C. 21.

(tt) The fact that the interchange facilities are inadequate for convenient operation is not of itself a defense if through routes are shown to be necessary or desirable in the public interest. Facilities for interchange exist; if inadequate they may be made adequate to perform the service which the law requires. York Mfrs. Asso. v. P. R. R. Co., 107 I. C. C. 219, 239.

(uu) Respondent, Indiana Harbor Belt, proposed to increase the rate between stations on its line from $8.10 per car to $12 per car on manufacturing plant refuse, including ashes and cinders, not having value for construction purposes, and on quarry strippings, carloads, regardless of weight. At present manufacturing plant refuse is divided into two classes, the first, "ashes and cinders, clean, having value for construction purposes" and the second "manufacturing plant refuse, except clean ashes and cinders having value for construction purposes. A rate of $12 per car applies on the first class and the rate of $8.10 per car on the second. Respondent proposes to eliminate the distinction and apply the higher rate on both classes of refuse, and also on quarry strippings. Bearing in mind the worthless character of the commodity and the unexacting conditions incident to its transportation a charge of $8.10 seems sufficient for a movement of less than 3 miles. The time charged for its performance is computed on the assumption of the most unfavorable conditions of car supply, and even so appears excessive for economical operation. There may be instances not explained in this record where the present rate is inadequate for the service performed or where respondent could justify maintenance of higher specific rates, in line with those published by other carriers for similar services, in order to prevent this undesirable traffic from being diverted from competing lines to points on its own road. Such situations do not warrant a general increase in the rate for all movements to the basis of the rate applying on cinders having value for construction purposes. HELD, suspended schedules not justified. Ashes and cinders, 107 I. C. C. 408.

(vv) Having elected to perform a switching service, it must provide a reasonable charge therefor. Hammond Iron Works v. P. R. R. 107 I. C. C. 473, 481.

(ww) Present adjustment of rates on cotton from Oklahoma, Arkansas, Texas, and Louisiana to Texas Gulf ports found unduly prejudicial to the uptown and interior warehouses and compresses and unduly preferential of the waterfront warehouses and compresses; the rates should be so adjusted that one rate will apply for all deliveries within the usual switching limits of the ports, except that the export should be made higher than the domestic rates by amount equal practice of the carriers of absorbing to the wharfage charge. This finding is not to be construed as condemning the drayage charges in lieu of switching. Reasonableness of the rates was not in issue and the findings herein are not to be construed as authorizing the carriers to increase their present revenues, rather, the rates should be so readjusted as to preserve existing revenues. Application of Rates on Cotton to Gulf Ports. 100 I. C. C. 159.

(xx) Switching charges assessed during Federal control on carload movements of sulphuric acid, sulphur, salt, and fuel oil betwen various divisions of complainant's plant at Newark, N. J., found applicable and not unreasonable, considering the density of traffic in this district, the time and labor consumed in the movements, the dangerous character of the commodity of which most of the shipments consisted, and the number of movements involving a main-haul. Reparation awarded for certain overcharges. Butterworth-Judson Corp. v. Director General, 100 I. C. C. 337.

(yy) Proposed increased charges for switching carload traffic moving in interstate commerce in the switching district of Birmingham, Ala., found not justified, in view of fact that the cost-study on which respondent relies falls short of justifying the increases proposed. Switching in Birmingham District, 100 I. C. C. 763.

(zz) Following 83 I. C. C. 51, rates on naphtha, in tank-car loads, from Constantine refinery, near Devol, Okla., to Burkburnett, Tex., both origin and destination being within the Burkburnett yard limits, found unreasonable to extent they exceeded lower joint-line intracity switching rates applicable within the switching limits of Burkburnett. Reparation awarded. Skelly Oil Co. v. M., K. & T., 101 I. C. C. 47.

(3a) Upon reconsideration, original report 88 I. C. C. 368, total charges

collected on interstate shipments to and from complainant's plant on the Owasco River Railway at Auburn, N. Y., which included switching charges of the Owasco, found, not unreasonable as compared with flat Auburn rate. Contention by complainant that shipper in a given community is entitled to line-haul rates applicable to that community and if he pays a rate in excess thereof an abnormal rate structure exists, not sustained. An award of reparation would involve conclusion that line-haul rates to and from Auburn were up to the limit of reasonable maximum rates and that the relatively small switching charge sufficed to carry rates over the line by that amount. Such a conclusion is repugnant to common sense, nor does evidence establish any damage to complainant from undue prejudice found to exist in original report, which is hereby reversed. International Harvester Co. v. N. Y. C. 101 I. C. C. 89.

(3b) Rate charged on shipments of sand and gravel from Scottsville, N. Y. to Kodak Park Siding, which is within the general switching limits of Rochester, N. Y., found applicable. A lower rate was published to Rochester, and certain specific stations in Rochester, all named in tariff index, but this enumeration of stations obviously excluded the application of the lower rate to Kodak Park Siding, which was not named therein. Eastman Kodak Co. v. Director General., 101 I. C. C. 103.

(3c) In 93 I. C. C. 224, division 1 found that the rates charged complainant for the transportation of inbound shipments of iron, steel, coal, lumber, machinery and other commodities, and outbound shipments of new and repair cars, car trucks, car parts, and miscellaneous commodities, carloads, and in cars containing a number of less carloads shipments, not unreasonable during the period of federal control, reparation denied, complaint dismissed. No attempt has been made to test the reasonableness of the line haul rates as applied to the line hauls to and from the district, or of the combinations applied to complainants shipments on which reparation is sought otherwise than by the assured test of the indicated practice. It is proper to find a violation of the second or third section of the act where the trunk lines unlawfully discriminate in their practices toward different industries, but an adverse finding under the first section should not rest upon the artificial ground set up. The second contains no proof of pecuniary damage to complainant by reason of such unjust discrimination or undue prejudice as may have existed, and, as the so-called district rates now apply to and from complainants industry the alleged violations of sections 2 and 3 need not be considered. HELD, rates attacked not unreasonable, no damage shown, complaint dismissed. Pressed Steel Car Co. v. Director General. 109 I. C. C. 75.

(3d) Complainant attacked commodity rate of 6.5c charged on 15 cars of logs originating in Virginia in Sept. 1923 from Coopers Point, Camden. N. J., to Victor Talking Machine Co., Siding Camden, N. J., as unreasonable. The movement was within the switching district of Camden and required a rail haul to Pavonia, N. J., and subsequent switch by a second engine to a siding, a total distance of 2.47 miles. Contemporaneously defendants maintained between these points switching rates of $11 per car, on all carload freight, except coal and coke, paying a road haul charge when for movement in the same car, and $13 per car on all other carload traffic except coal and coke. The $13 charge was further restricted to be inapplicable on shipments arriving at or moved from Camden by water. It appears that the $13 charge would have applied if the logs had reached Bairds wharf by motor truck instead of by water. HELD, rate attacked unreasonable to extent it exceeded $13 per car, reparation awarded. E. Rickards v. P. R. R. 109 I. C. C. 297

Director General, as Agent, 88 I. C. C. 115; International Harvester Co. v. N. Y. C. R. R. Co., 88 I. C. C. 372; Trackage Charges at St. Louis, 88 I. C. C. 693.

§4½. Construction of Contracts for Sidetracks.

See Side Tracks and Spur Tracks; Special Contracts; Trackage Contracts.

(a) Complainant sought an order for the construction of an interchange track between the Santa Fe and Rock Island at Courtland, Kas., in order to reduce the

mileage and therefore the rate, from Superior, Neb., to Rock Island points, but more particularly in order to expedite delivery. Defendants have not urged that the connection sought is not reasonably practicable nor that it could not be put in with safety. Their objection is that the volume of traffic through Courtland is not sufficient to justify the order prayed. Without here determining whether this is a lateral, branch line of railway contemplated by the provisions of the act, HELD, the record fails to show that there would be sufficient traffic over the connection sought to show that the construction would be justified, complaint dismissed. Nebraska Cement Co. v. A. T. & S. F. Ry., 93 I. C. C. 163.

(b) Interstate Commerce Commission on finding that continuance of switching service for certain shipper on certain side track results in undue discrimination between shippers, need not order railroad to discontinue service on particular siding, but may merely order railroad to remove the undue discrimination between interstate shippers, and give railroad discretion to adopt a satisfactory method of meeting the requirement. Western & A. R. R. v. Georgia Public Service Commission, 45 Sup. Ct. 409.

§6. Reciprocal Switching.

See Reciprocal Switching.

(a) Defendants' refusal to interchange traffic from or to upper town, Lockport, N. Y., at a point in lower town, Lockport, and to provide for reciprocal absorption of switching charges from and to such point found not unreasonable or otherwise unlawful. While defendants interchange traffic upon a reciprocal switching basis at Buffalo, N. Y., and other points on the Niagara frontier, traffic and operating difficulties encountered in effecting interchange at lower town have no parallel with those encountered at such other Niagara frontier points. Moreover, a requirement for interchange at lower town would not be in the public interest. Lockport Board of Commerce v. N. Y. C. R. R. Co., 89 I. C. C. 144.

(b) Complainant attacked switching charges applicable at Rochester, N. Y., as unreasonable. By reciprocal switching is meant switching to and from a connection with another carrier where that other carrier has a line haul. Subject to a minimum of 12,000 pounds and various limitations as to minimum revenue and maximum absorption, the reciprocal switching charges in the main switching district are absorbed by the various carriers, so that industries located in that district enjoy the flat Rochester rate on carload traffic, except coal and coke, no matter by what line it enters or leaves the city. The effect of these reciprocal switching charges and absorptions is that in the districts where they apply the line haul rates of the various carriers reach every private siding. Similar opportunities are not available on the State Street branch. There are switching charges between industries in Groups F, G and H but there are no such charges between those groups and the Charlotte switching district or the main switching district. Instead of switching charges, line haul rates apply to such movements; and except as to a few commodities, these line haul rates are the minimum scale of class rates, beginning with 31.5c first class and ending with 9c sixth class. While State St. industries do not have the benefit of the reciprocal switching arrangement accorded industries in the main switching district, they do, with certain exceptions, enjoy the same class and commodity rates as are in effect to and from the main switching district. No joint class rates are published between State St. and stations on the Erie in New York, Pennsylvania, or New Jersey, except Patterson, N. J. The Central states that arrangements for such rates, except to and from New York City have almost been completed. With one or two exceptions, the commodity rates between State St. and Erie stations are on the same basis as the class rates. Complainant alleged that the failure of the Central to maintain switching rates between industries in State St. on the one hand, and its connections with other carriers within the corporate limits of Rochester, on the other hand, and the assessment of rates and charges between industries in State St. and interstate points on defendants lines in excess of the rates and charges between stations within the Rochester switching limits and such points result in unreasonable, unjustly discriminatory and unduly prejudicial rates and charges. It seems clear from the record that industries in the State St. zone are entitled in all cases to the same interstate class and commodity rates as are enjoyed by industries on the Central in the main switching dis-

trict. The shortest rail distance from Rochester to the New York-Pennsylvania state line is in excess of 100 miles, and the Central concedes that on long haul traffic the grouping of stations less than 20 miles apart is proper. When, in addition to that fact, it is borne in mind that the State St. zone was in fact the nucleus of the city and has from the beginning been, and is now, in the very heart of the business district, the case in favor of a parity of rates becomes complete. The real issue here, therefore, is whether the State St. zone may fairly and properly be included within the area in Rochester in which freight is moved under the average switching charge method rather than under the line haul rate plan. The State St. district is industrially, economically, and physically a part of the industrial district of the city, although it happens by the accident of railroad construction to be 20 miles distant by rail. Under such circumstances, it is certainly in the broad public interest that the State St. zone should be included within the Rochester switching limits, and the Commission does not believe that it is inconsistent with the carriers interests. It remains to determine what switching charges should apply to the State St. zone. Plainly they must be consistent with and be governed by the switching charges now maintained within the Rochester industrial district. A charge of $20 per car for carload movements between the State St. zone and connections of the Central in group A would be just and reasonable. In this connection it may be said that the ultimate solution of the State St. zone problem appears to be the construction of a direct connection between that zone and the main line of the central. The Commission thinks that a charge of $15 per car for carload movements between the Charlotte district and the Centrals connection in Group A and between the Central and B. R. & P., connection at Charlotte and the State St. Zone would be just and reasonable. The Central now publishes switching charges in Rochester which are subject to absorption by connecting carriers. If the State St. zone is included within the Rochester switching limits it will be a violation of section three by the Central if it does not make the switching charges that are published to and from this zone subject to absorption by connecting carriers in the same manner and to the same extent as are the existing switching charges. It will also be a violation of section three by the connecting carriers if they do not absorb the new switching charges in the same manner and to the same extent as the old. Rochester Switching Case, 95 I. C. C. 30.

(c) K. C. S., proposed to increase its switching charges on carload freight between points in Kansas City, Mo-Kas. The history of respondents switching charges at Kansas City is in 68 I. C. C. 591. The reciprocal charges range, generally, from $4.95 to $6.30, with slightly lower or higher charges for particular movements, and apply to or from respondents team tracks as well as industries on its terminals and interchange points with other railroads. The switching charge to or from points on the May Street switch is 2c per 100 pounds in addition to the charge per car. No increases are proposed in this or any other charge per 100 pounds, but the minimum charge in connection with certain charges in c per 100 pounds is proposed to be increased from $6.30 to $12 per car. It is proposed to increase the reciprocal charges by amounts ranging generally from $1.95 to $2.05 per car, with resulting charges in most instances of $7 where the charge is now $4.95 and $8.25 where the charge is now $6.30. The various lines serving Kansas City generally provide by tariff authority for the absorption of respondents switching charges on all competitive traffic, with the usual reservation that their revenue must not be reduced below a certain amount, generally $18 per car. Respondents present charges at Kansas City are generally higher than the switching charges of other carriers serving that point, except the Kansas City Terminal. The switching charges under suspension are generally higher than the switching charges of other carriers at other Missouri river points, Minneapolis, St. Paul and Duluth, Minn., and Memphis, Tenn. HELD, proposed increases in the reciprocal switching charges on grain products and on livestock in trains of 10 cars or more have been justified; proposed increases in reciprocal charges on other traffic not justified; reciprocal charges on such other traffic have been justified to extent of $6.40 where it is proposed to increase the charges to $7, to the extent of $7.50 where it is proposed to increase to $8.25, to the extent of $9 to and from Mount Washington,

Fairmont Park, and Sugar Creek, and to the extent of $9 per car as a minimum charge to Leeds under the rates per 100 pounds, to the extent of $8 and $9 to team tracks where charges of $9 and $10.25 are proposed, and, for intrayard or interyard charges to extent of $1 per car higher than the reciprocal charges herein approved. Switching at Kansas city, Mo., 96 I. C. C. 538.

(d) There is no general reciprocal absorption of switching charges in the Pittsburgh district such as prevails in other metropolitan districts. Pressed Steel Car Co. v. Director General, 93 I. C. C. 224, 232.

(e) By reciprocal switching is meant switching to or from a connection with another carrier where that other carrier has a line haul. Rochester Switching Case, 95 I. C. C. 30, 33.

(f) By reason of extent of respondent's terminals, the large number of industries thereon and the number and availability of its team tracks, it handles a great many more cars for other carriers than other lines handle for it. Respondent contends that reciprocity ceases when the ratio of service becomes so disproportionate. Switching at Kansas City, Mo., 96 I. C. C. 538, 542.

(g) The fact, however, that interchange switching rates are or are not reciprocal, is unimportant, as the so-called reciprocity theory of establishing switching charges has been condemned by the Commission in many cases. Marinette & Menominee Paper Co. v. C. & N. W. Ry., 107 I. C. C. 21, 28.

(h) Complainant alleged four issues with respect to (a) the lawfulness of the practice of the Pennsylvania and Western Maryland of interchanging carload traffic with each other at cities near York, Pa., by reciprocal switching or other methods while failing and refusing to interchange such traffic at York; (b) whether it would be in the public interest and practicable to require the use of the terminal facilities of the Pennsylvania at New York by the Western Maryland; (c) the lawfulness of the practice of the Pennsylvania and the Western Maryland of extending the use of their track to each other for the purpose of the terminal receipt and delivery of traffic at industries within a limited zone at York while refusing a similar service and facilities to industries and shippers outside the zone (d) the lawfulness of the practice of the Pennsylvania in interchanging traffic with the Maryland & Pennsylvania at York while failing and refusing to interchange traffic with the Western Maryland. York, Pa., is served by the Pennsylvania, Western Maryland and the Maryland & Pennsylvania. About 139 industries have direct connection with the rails of those railroads by spurs or industry sidings—most of the plants with only one of the three railroads. Although there is physical connection between their lines at York, the Pennsylvania and Western Maryland do not interchange at York carload traffic destined to or originating within that city. Such traffic is interchanged at Hanover, Pa., about 19.5 miles from York, and at other points where their lines connect. Within a limited zone at York, about a mile in length, the tracks of the Pennsylvania and Western Maryland are adjacent and parallel, with cross over connections. Each carrier uses the tracks of the other to receive or deliver carload freight at 17 industries located within the zone. Eight of these industries connect with the Western Maryland, seven with the Pennsylvania and two with both lines. These 17 industries are in the same situation as if each was physically located on the two lines in question. The Pennsylvania and Maryland & Pennsylvania interchange interstate traffic at New York on the basis of the York rates. The Pennsylvania and the Western Maryland also interchange traffic with each other and with other carriers at cities near York under reciprocal switching or similar arrangements. For the present it is sufficient to say that shippers within this trackage zone have all the advantage which would accrue to them if there were interchange at York with mutual absorbtion of switching charges, and also can take advantage of transit arrangements of bothlines at no disdvantage in rates. Within the zone the Pennsylvania and Western Maryland maintain joint class rates on the flat York basis between York and points on each others respective lines. This arrangement will ordinarily involve a haul through York by the Pennsylvania and a back haul by the Western Maryland on traffic originating north, south and east York. A number of joint commodity rates are in effect over like routes. The joint rate arrangement does not extend to points on the connections of either carrier. If a

shipment originates on a connection of the Pennsylvania, and comes to York via the Pennsylvania for delivery to an industry that is local to the Western Maryland, the local rates involved in the haul to Hanover and back would be added to the line haul rate. Moreover, terminal routing must be specified to secure application of the joint rates provided. If through ignorance of the circumstances attending delivery at York a shipper at a distant point fails to designate terminal routing, the car may arrive on the wrong road with attending inconvenience and expense. The shippers within the zone are not required to have terminal routing specified in order to enjoy the York rates. The Pennsylvania and the Maryland & Pennsylvania interchange traffic at York under a joint rate arrangement instead of by mutual absorption of switching charges. Joint rates on the flat York basis apply between industries on the Pennsylvania at York and points on the Maryland & Pennsylvania, and between industries on the Maryland & Pennsylvania and points on the Pennsylvania and its connections, except the Western Maryland. The Pennsylvania also switches traffic not covered by the joint rate arrangement from or to its junction with the Maryland & Pennsylvania at a charge of 42c per ton. This charge is not absorbed by the Maryland & Pennsylvania. The vital importance of the trackage arrangement to industries located in the trackage zone has been shown. This arrangement has been in effect for many years. Business has been planned and adjusted upon the assumption of a continuance of the practice. The carriers by contracts have provided for its continuance, and while such contracts may not stand in the way if they conflict with the enforcement of the interstate commerce act, the Commission should not strike them down without considering whether other means of removing violations of the act may not be adopted which will preserve such contract rights. In practical effect to shippers the interested carriers have established within industrial York a limited zone wherein they accord to shippers the equivalent of reciprocal switching, with the attendant advantage heretofore set forth, but the Pennsylvania steadfastly refused to do the same for other shippers outside the zone. The record shows that, outside of points in trunk line territory where the Pennsylvania dominates, reciprocal switching is quite generally in effect in this country. It was in effect in York for 16 months during federal control, to the entire satisfaction of York shippers. The Commission has commended reciprocal switching arrangements as being advantageous to the shipping public and carriers alike. HELD, the practice of the Pennsylvania and Western Maryland of interchanging traffic at Hagerstown, Md., but refusing to do so at York, Pa., under substantially similar transportation conditions is ununduly prejudicial to York and shippers there located, and unduly prefers Hagerstown and its shippers. That the practice of the Pennsylvania and the Western Maryland of extending the use of their tracks to each other for the purpose of terminal receipt and delivery of freight at industries in York within the trackage zone described, thus giving such industries the benefits and advantages in service, rates, and routes of location upon both lines, while contemporaneously refusing to accord to shippers or industries on their lines without the zone similar benefits and advantages, is unduly preferential of industries within the zone and subjects industries and shippers on their lines without the zone to undue prejudice and disadvantage. Shippers located in the present trackage zone have had the benefit of the flat York rates as well as the advantages of the service and routes of both the Western Maryland and the Pennsylvania, for a period of over 30 years. The withdrawal of these facilities now would result, in many instances, in increased rates to shippers located on either line desiring to use the service and routes of the other, for which increase no justification has been offered. No increases would result where there are now joint rates, but as a matter of simple justice shippers in the present trackage zone are entitled to a continuance of the service, rates, and routes of both lines substantially to the same extent as at present enjoyed. To withdraw this service now would be to deny shippers there located reasonable transportation facilities. HELD, further for the future it will be the just, fair and reasonable practice to be followed by the Pennsylvania and Western Maryland to continue to accord to industries within the trackage zone on interstate traffic the flat York basis of rates, with the ability to use the service and routes of both carriers, including the transit arrangements of each on the same terms as

at present used by shippers within the zone. That the practice of the Pennsylvania and Western Maryland of according to industries within the trackage zone on interstate traffic the flat York basis of rates and the advantages in service and routes of both carriers is tantamount in practical effect to the maintenance of a limited reciprocal free switching district. That there is no warrant from a transportation standpoint for according to industries on their lines outside the present trackage zone any higher basis of rates or any substantial difference treatment from that contemporaneously according to industries within the zone, and that for the future it will be unreasonable and unduly prejudicial for the Pennsylvania and Western Maryland to maintain any higher basis of rates or accord substantially different treatment or service on interstate traffic to or from such industries than is contemporaneously in effect or is accorded to industries within the present trackage zone. That for the future it will be in the public interest, and will be the just, fair and reasonable practice to be followed by the Western Maryland and Pennsylvania, to establish a switching district at York, with interchange at that point, and with reasonable switching charges, such switching district to include all industries in industrial York now having siding or spur connections with either carrier whether within or outside the trackage zone. There remains the question whether the Pennsylvania should be required to perform a "bridge" service between the Western Maryland and the Maryland & Pennsylvania. If the Maryland & Pennsylvania forwards a car from York to a point on the Western Maryland at York or elsewhere on its line, or to a point reached by Western Maryland routes and not reached by the Pennsylvania, it is clearly the duty of the Pennsylvania to switch that car at York and to establish a reasonable switching charge for the service. If the Pennsylvania will not voluntarily adjust this situation, the matter may be again brought to the attention of the Commission in this or in a subsequent proceeding. York Mfrs. Asso. v. P. R. R. Co., 107 I. C. C. 219.

(i) The opposition to reciprocal interchange with another carrier is based primarily on the natural desire of the first railroad to retain to itself the long haul on all traffic tributary to its lines. While this is a right ordinarily safeguarded to a carrier by the provisions of section 15 (4) of the act, the Commission has repeatedly found that the technical construction of one portion of the act may not be relied upon by carriers to justify a violation of other provisions. York Mfrs. Asso. v. P. R. R. Co. 107 I. C. C. 219, 236.

(j) Reciprocal switching arrangements place all the railroads entering the city in competition for the business of every shipper, and thus afford the best possible service to the public. York Mfrs. Asso. v. P. R. R. Co., 107 I. C. C. 219, 240.

(k) Respondent G. C. & S. F., proposed to cancel its reciprocal switching charge of $3.15 per car applicable on traffic to and from Fair Grounds, Beaumont, Tex. The effect of the proposal would be to eliminate Fair Grounds as a point to and from which respondent will switch connecting line traffic. Though included in the tariff as one of the industries entitled to the reciprocal switching arrangement, Fair Grounds is not even a siding, but merely a location on respondents spur track which passes the Fair Grounds of the protestants, where cars are placed and where freight may be loaded or unloaded by shippers generally. It is near the terminus of the spur. There are no industrial or side tracks, private or public, on this spur. Respondents policy is to reserve its team tracks exclusively for traffic on which it obtains a line haul. The fair grounds in other large cities are generally served by railroads and can be reached without trucking. HELD, proposed schedule not justified. Switching at Beaumont, 112 I. C. C. 125.

C. L. S. & S. B. Ry. Co. v. L. E. & W. R. R. Co., 88 I. C. C. 525.

§7. Right to connection.

See Electric Lines VIII.

(a) Complainant alleged that the failure and refusal of defendant to construct, maintain, operate, and install a switch connection between its line of railroad and a track constructed by complainant and extending from its coal mine to defendants right of way; and that the failure and refusal of defendant to receive or accept carload shipments of coal for interstate transportation, and to furnish cars for such traffic, is in vio-

lation of section 1 of the act. The Commission is asked to require the defendant to construct and maintain a switch connection, to accept interstate shipments of coal tendered it, and to award reparation all damages sustained by complainant from Dec. 1, 1923 to the effective date of the order. All points are in Illinois. The principal reasons advanced for the failure of the mine to develop properly is that the I. C., is unable to furnish sufficient car service, and that by having but one outlet it is deprived of additional markets. The mine is located on a branch line about 50 miles from the assembling yard, and the Central by reason of curves, grades, and other conditions is unable to handle in excess of 25 loads per train from the mine to the assembly yard. Complainant asserted that the mine would soon reach its capacity if it were granted the additional service of the defendant. At the hearing counsel for complainant admitted that this was their sole object in building a switch track and asking for a connection thereto. HELD, complainants siding has been constructed, that application in writing has been made by complainant for a switch connection therewith, and that interstate traffic has been tendered by complainant within the meaning of section 1; that there will be sufficient business to justify the construction and maintenance of the proposed connection; that the proposed connection is reasonably practicable and can be put in with safety; and that it should be constructed and maintained by defendant. Reparation denied. Dering Coal Co. v. C. C. C. & St. L. Ry., 96 I. C. C. 143.

(b) If the prerequisite statutory conditions exist the track connection must be made whether desired by the carrier or not. The shipper must construct his sidetrack before the carrier is obligated to grant him the switch connection. Dering Coal Co. v. C. C. C. & St. L. Ry., 96 I. C. C. 143, 153.

(c) Proposed track from coal mine having existing shipping facilities, to connect with a second railroad not adjacent to it, HELD: Not a spur track construction of which the Illinois Commerce Commission has jurisdiction to authorize under Public Utilities Act, §§ 45, 58 (Smith-Hurd Rev. St. 1923, c. 111⅔, §§ 45, 62), or under Mines Act, § 1 (Smith-Hurd Rev. St. 1923, c. 94, §1), or under Const. art. 13, §5, where by agreement two other railroads were granted operating rights over it, and it constituted a physical connection of three railroads completely adapted to extension of their lines. Cleveland C. C. & St. L. Ry. Co., v. Commerce Commission ex rel, J. K. Dering Coal Co., (Ill., 1925), 146 N. E. 606.

(d) Proposed track from coal company already having shipping facilities, to connect with second railroad not adjacent to it, HELD: To constitute an "extenstion" of such road within meaning of Interstate Commerce Act, § 1, pars. 18, 22, as amended, Feb. 28, 1920 (Comp. St. Ann. Supp. Ct. U. S. 1923, § 8563), and hence to be a matter in which sole jurisdiction was vested in Interstate Commerce Commission. Cleveland C. C. & St. L. Ry. Co. v. Commerce Commission ex rel. J. K. Dering Coal Co., (Ill., 1925), 146 N. E. 606.

(e) Const. art. 13, §5, requiring railroads to provide certain connections, HELD: Not to entitle coal company already having shipping facilities to compel a connection with an interstate railroad not adjacent to it, where to do so would connect two or more railroads, and amount to an extension of them. Cleveland C. C. & St. L. Ry. Co. v. Commerce Commission ex rel. J. K. Dering Coal Co., (Ill., 1925), 146 N. E. 606.

(f) Public Utilities Act, §45 (Smith-Hurd Rev. St. 1923, c. 111⅔, §45), requiring railroads to provide certain connections with shippers, does not apply to situations coming under Federal Transportation Act. And as to such the latter act is supreme. Cleveland, C. C. & St. L. Ry. Co. v. Commerce Commission ex rel. J. K. Dering Coal Co. (Ill., 1925) 146 N. E. 606.

(g) That proposed track from coal company, already having shipping facilities, to connect with a second railroad now adjacent to it, was to be built by railroad, would not authorize connection, where coal company was to pay for and own it, and railroad was but agent of coal company in building track. Cleveland C. C. & St. L. Ry. Co., v. Commerce Commission ex rel. J. K. Dering Coal Co. (Ill., 1925) 146 N. E. 606.

(h) The "provision" to paragraph 17, §402, of the Act of Congress, known as the Transportation Act of 1920 (41 Stat. 476 (U. S. Comp. St. Ann. Supp 1923, § 8563), and paragraph 22 of said section, reserves to the state the right to exercise its police power to require phys-

ical connection between railroads in order to interchange intrastate commerce, and the order of the state corporation commission, as agent of the state, requiring the same, is binding upon the railroads, except when it is inconsistent with some lawful order of the Interstate Commerce Commission, or when it amounts to an unjust discrimination against, or an unreasonable burden upon, interstate commerce. Midland Valley R. Co. v. State (Okla., 1924), 232 Pac. 113.

(i) Prayer for an order requiring construction and operation of an interchange track between intersecting lines of A., T. & S. F. and C., R. I. & P. railways at Courtland, Kans., in order to reduce the mileage and therefore the rate, from Superior to Rock Island points, but more particularly to expedite delivery, complainant alleging loss of business to rival plants which can make more expeditious delivery than it can, denied. No definite evidence was introduced as to probable difference in time over route sought and over present route; nor with respect to time consumed in shipments from competing points. Moreover, record fails to establish that there would be sufficient traffic over the connection to justify its construction and maintenance. Nebraska Cement Co. v. A., T. & S. F., 93 I. C. C. 163.

(j) Switch connection asked for by complainant between the track constructed by it from its coal mine near Eldorado, Ill., and the line of defendant found to be reasonably practicable, that it can be put in with safety, and that there will be sufficient business to justify the construction and maintenance. Connection ordered under provision of section 1 of the act. Dering Coal Co. v. C., C., C. & St. L., 96 I. C. C. 143.

(k) Contention that installation of switch connection sought would complete a new connecting railway between the Illinois Central and defendant without a certificate of public convenience and necessity having been first obtained, as required by law, for extension of line, not sustained. Dering Coal Co. v. C. C. C. & St. L., 96 I. C. C. 143, 151.

(l) Damages sought for failure to install a switch connection, accept freight, and furnish cars HELD: No finding or order with reference to alleged damages sustained will be made; this is without prejudice to complainant to pursue such remedy as it may have in a court of competent jurisdiction. Dering Coal Co. v. C. C. C. & St. L., 96 I. C. C., 143, 153.

(m) Proposal of Monongahela West Penn. Public Service Co. to cancel intrastate rates on coal from mines on its line and to eliminate mine sidings from its list of stations, found justified. Sidetracks concerned have not been used for approximately two years, with little likelihood of future operation except under abnormal market conditions, and in justice to carrier it should not be compelled to maintain switch connection and continue present rates because of a remote possibility of a return of favorable market conditions under which mines previously operated. Moreover, contracts between shippers and the Monongahela provided among other things, that carrier should have the right, at any time after 30 days' written notice, to discontinue use of siding, terminate the contract, and remove tracks, and such written notice had been duly served. Hood Coal Co. v. M. V. T. Co., 101 I. C. C. 719, 723.

(n) Upon petition of defendant Commission reopened 96 I. C. C. 143, directing defendant to construct and maintain a switch connection with complainants track. The Supreme Court of Illinois is charged with the duty of construing the laws of Illinois. Under the laws of that state a private track becomes a public track if and when it crosses a public highway. However, the laws of Illinois and the decision of the supreme court of that state in no way affect the character and use of the track so far as interstate commerce is concerned. The commission has issued no certificate. It follows that as to interstate commerce no carrier has a right of operation over this track which would change its character from a private track to a public track. The Commission is not concerned with the character of the track with respect to intrastate commerce. HELD, original finding affirmed. Dering Coal Co. v. C. C. C. & St. L. Ry. 109 I. C. C. 55.

(o) Complainant sought the establishment of a switch connection between the tracks of the defendants, Wichita Falls, Ranger and Fort Worth R. R. and Cisco and Northeastern in the city of Breckenridge, Tex., alleging that the absence of such a connection results in inconvenience and expense to shippers causes excessive drayage charges and misrouting of freight. From the record

it appears the movement of distillates and the shifting of empty tank cars from one plant to another seem to be their particular cause of complaint. The exercise of care in fully describing to shippers the route to be followed would eliminate considerable of the difficulty. That the connection would be reasonably practicable and could be put in with safety is not questioned. It goes without saying that where traffic can only move via one route and another route is subsequently made available for such traffic that some of said traffic will be diverted to the new route. The complaining parties are at present adequately served by existing routes with respect to interstate commerce, and it is shown, that the benefit accruing to complainants would not offset the detriment sustained by others. HELD, complaint dismissed. Breckenridge Chamber of Commerce, v. W. F. R. & F. W. R. R. 109 I. C. C. 81.

§9. Reparation.

See Reparation.

(a) In 69 I. C. C. 282 the Commission prescribed switching limits at Boston, Mass., and fixed reasonable maximum switching charges for the future. **Claims of J. L. Kelso Company.** Complainant attacked charges on traffic from points west of the Hudson river to its warehouse as unreasonable unjustly discriminatory, and unduly prejudicial by reason of the fact that the New Haven, the Maine and Albany refused to absorb the charges of the Union, while making deliveries to the competitors and at all other points in and about Boston on the flat Boston rates. At the time of the hearing the switching charge paid by the complainant to the Union, in addition to the Boston rate, was 1c per 100 pounds, minimum $3 per car. HELD, charges attacked unreasonable to extent they exceeded the rate to Boston, reparation awarded. **Mystic Wharf to East Cambridge.** Complainant attacked rate of $1.60 per long ton charged on 87 cars of bituminous coal during September and October, 1918, from Mystic Wharf to its plant at East Cambridge, a distance of 3.5 miles as unreasonable. Reparation is sought on basis of subsequently established charge of $20 per car, prescribed in the original report. Director admitted that the rate attacked was unreasonable to extent it exceeded $1.20 voluntarily established subsequently. HELD, rate attacked unreasonable to extent it exceeded $20 per car, reparation awarded. **Shipments between East Cambridge and West Cambridge.** Complainant attacked rates charged on 152 cars of various commodities which moved over the Maine between a storage plant established by them at West Cambridge and their plants at East Cambridge, a distance of 4 miles, as unreasonable. Subsequently established basis $15 per car. On 67 cars sixth class rate of 7c was charged and on others 5c. HELD, rate attackeed unreasonable to extent it exceeded 4.5c per 100 pounds, minimum $15 per car, reparation awarded. Boston Wool Trade Asso. v. Director General, 89 I. C. C. 589.

(b) Damages sought for failure to install a switch connection, accept freight and furnish cars. HELD: No finding or order, with reference to alleged damages sustained will be made, this is without prejudice to complainant to pursue such remedy as it may have in a court of competent jurisdiction. Dering Coal Co. v. C., C., C. & St. L., 96 I. C. C. 143, 153.

(c) Complaint alleging that switching charges collected in addition to line-haul rates, assessed under tariff items properly filed with commission, found not to present an overchage claim within meaning of section 6 of the act. See Flushing Farmers' Elevator Co., 87 I. C. C. 9, 10. Shanard Elevator Co. v. M. E. Ry. 93 I. C. C. 151, 153.

§9a. Section 4.

ALL CITATIONS

Detroit Board of Trade v. W. Ry. Co., 38 I. C. C. 413.

§9b. Switching Reclaims.

See Per Diem Charges.

(a) The per diem plan with reclaims applies to carriers which performs a switching service as distinguished from a line haul. No reclaim is allowed where a short line, whether industrially owned or otherwise, performs a line-haul service as distinguished from a switching service. Application of the modified de-

murrage plan prescribed in 61 I. C. C. 551, was restricted to industrial common carriers, and its purpose was to prevent undue favoritism to the proprietary industries through the payment of switching reclaims. Virginia Blue Ridge Ry. v. S. Ry. Co., 96 I. C. C. 591, 593.

§10. Tariffs and Publication.

See Tariffs.

(a) Complainant attacked switching charges on 113 cars of petroleum switched by defendant from Cedar Grove, La., to an industry on the Houston & Shreveport within the switching limits of Shreveport, La., between February, 1918, and February, 1920, were inapplicable. All of the shipments destined to points within the Shreveport switching district were subjected to two charges for switching, one for the movement over the rails of defendant to the interchange track and another for the movement beyond over the connecting line. For the switching service performed by defendant on the shipments which moved to interstate destinations in 1921 and 1922 a charge of $4.50 was assessed. Whatever may have been defendant's intention with respect to restricting the application of the lower charge the tariff must be construed strictly in accordance with its printed language. HELD, rates assessed inapplicable to extent they were greater or less than $2.50 per car from February, 1918, to June 25, 1918, $3 per car from June 25, 1918, to February 1, 1919, and $5 per car from that date to March 1, 1920, for that portion of the movement over the lines of defendant, rates charged between January, 1921, and April, 1922, inapplicable to extent they exceeded $3.50 per car. Complaint dismissed. Caddo Central Oil & Refining Corp. v. Director General, 92 I. C. C. 627.

(b) Charges on shipments of coal and coke to complainant's plant at Rockford, Del., on Philadelphia & Reading Ry., within city limits of Wilmington, Del., composed of rates to Wilmington plus minimum scale of class rates beyond, found illegal to extent they exceeded line-haul charges from points of origin to Wilmington. There was nothing in switching tariff of Philadelphia & Reading, describing Wilmington switching limits, which would have effect of excluding complainant's plant from application of switching rate and its absorption on shipments here involved. Refund of overcharges directed. Bancroft & Sons v. P. & R. Ry. Co., 91 I. C. C. 186.

(c) Switching charges of the K. C. S. on petroleum and products from Cedar Grove, La., to an industry on the Houston & Shreveport within switching limits of Shreveport, La., during Federal control, and those on similar shipments from Cedar Grove and Gas Center, La., moving to interstate points subsequent to Federal control, found inapplicable. While it was defendant's intention to restrict application of lower charges named in applicable tariff it did not do so and such tariff must be construed strictly in accordance with its printed language. Moreover, tariff provisions were ambiguous and contradictory, under which circumstances they must be construed in favor of shipper and force and effect be given to those provisions which result in lowest charges. Caddo Central Oil & Rfg. Corp. v. Director General, 92 I. C. C. 627.

(d) As an outgrowth of receivership proceedings the United States District Court ordered increase in intrastate switching charges of the Evansville & Indianapolis R. R. Tariffs were forwarded to State commission which "neither accepted nor rejected them" on ground that they failed to comply with State statutes as to notice, but such tariffs were retained in the State commission's files "for information only." HELD: Such increased charges assessed on intrastate shipment during Federal control found not illegal, and it is not within this commission's province to pass upon question of whether the district court erred. American Hominy Co. v. Director General, 93 I. C. C. 256.

(e) Line-haul rates were limited to delivery on "interchange tracks" in Iron Ore Rates Cases, 41 I. C. C. 181, 44 I. C. C. 368, this delivery being regarded as equivalent to usual team-track or private-siding delivery. It was contemplated that the interchange tracks would be so located the service under the line-haul rates would end at or near the plant gate. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 532.

(f) Switching charges collected by Hoboken Manufacturers R. R. Co., on trap-car loads of l. c. l. freight switched by it from complainant's warehouse at Hoboken, N. J., to C. R. R. of N. J. at Weehawken, N. J., for interstate movement, found inapplicable. The Hoboken Manufacturers may not lawfully make a

charge in addition to line-haul rate for switching cars direct from complainant's plant to line-haul carrier, as that would be charging for a service not actually rendered, and the hauling of such cars to its freight station before delivering to line-haul carrier is for its own convenience, is not required under the contract of transportation, and the shipper may not be assessed a charge, therefore, in addition to line-haul rate. Reparation awarded. Jewel Tea Co. v. C. R. R. Co. of N. J., 98 I. C. C. 424.

(g) Complainant attacked charges collected on less carload shipments of fresh meats and packing house products from complainants plant at South Omaha, Neb, to destinations in Nebraska, Iowa, South Dakota, Minnesota and Wisconsin, during the period from June 25, 1918 to March 1, 1920, as in excess of rates applicable in violation of section 6 of the act. The shipments were loaded into cars at complainants plant at South Omaha and switched over the line of the U. S. Yards of Omaha and the U. P., to the Northwestern local freight station at Omaha, except one car which went to the Burlington in the same manner. The agent of the Northwestern waybilled the shipments from Omaha to numerous destinations in the states previously mentioned at the applicable less carload rates. No facilities were maintained by the carriers at South Omaha for the acceptance of less carload shipments of perishable freight as here under consideration and consequently complainant, in order to make such shipments, was compelled to deliver them to the Northwestern to Omaha, from which they moved in refrigerator cars. On each of these cars, which contained numerous less carload shipments for various stations beyond Omaha, a single bill of lading was executed over the U. P., from South Omaha to Omaha "consigned to agent C. & N. W." "Local car." The Northwestern issued bills of lading on each of the individual less carload shipments covering the movement from Omaha, although it appears that the bills of lading show the origin as South Omaha. The $5 charge was not a specific charge on trap or ferry cars with provisions for the acceptance and distribution of such shipments but merely covered the movement of a carload from South Omaha to Omaha. One of the most effectual ways to destroy the continuity of a carload movement is to break it up into less carload shipments which was done in the instant case. The shipments from Omaha were of such a nature that they would not have been accepted by the carriers for transportation from South Omaha, being less carload lots, and it is therefore obvious that there was an essential difference between the character of the shipments from Omaha and from South Omaha. HELD, shipments charged at tariff rate, complaint dismissed. Armour & Company v. Director General, 104 I. C. C. 603.

(h) In 62 I. C. C. 618 the Commission found the rates on ice in carloads, between points in western trunk line territory and between St. Louis, Mo., or East St. Louis, Ill., and Chicago, Ill., between Feb. 1 and August 8, 1919 as unreasonable to extent they exceeded rates established March 22, 1919 for like distances. In 87 I. C. C. 81 Commission found rate of 16.5c on ice in carloads from Shell Lake, Wis., to Blue Island, Ill., between March 17, and March 20, 1919 unreasonable to extent it exceeded 12.5c plus the applicable switching charges. The case was reopened solely with respect to the question of switching charges. The Chicago Junction was a party to Agent Lowreys tariff I. C. C. 37, which governs switching and absorption charges and rules in the Chicago district, but it was not a party to the Boyd tariff and the Lowrey tariff. The Boyd tariff made no reference to the Lowrey tariff, in respect of the absorption of switching charges, or otherwise. Neither did the Lowrey tariff make any direct reference to the Boyd tariff. The Lowrey tariff provided for the application of the Chicago basis of rates on shipments of all commodities, except livestock, originating on the line haul carriers parties thereto, at points outside of the Chicago switching district, except to certain minimum rate and car revenue requirements met by these shipments of ice. The Boyd tariff and the Lowery tariff were contemporaneously in effect, and of equal weight in their respective spheres. In the absence of a cross reference betwen th two tariffs in accordance with rules 10a and 10d of tariff circular 18A, the two tariffs were usable in combination to make a through rate, just as two local tariffs of the line haul carriers would be. One of the provisions of the Lowrey tariff, binding upon the line haul carriers parties to it, was that they would absorb the switch-

ing charge of the Chicago Junction beyond their points of interchange with that carrier, which was also a party to the Lowrey tariff. The combination of these two tariffs made applicable the Chicago rate, with absorption of the Chicago Junction switching charges by the line haul carrier, to the shipments of Swift & Company. Certain shipments were made to South Omaha, Neb., in connection with the Union Stock Yards Co., of Omaha, a switching line at South Omaha. The local tariff of the Northwestern, applicable on commodities generally, provided for the absorption of switching charges of the U. S. Yards Co. to the extent of $3 per car, subject to minimum revenue requirements met by these shipments. The U. S. Yards Co. was not a party to the Northwestern tariff and the Northwestern did not refer to the switching tariff of the U. S. Yards Co. nor did the switching tariff of the U. S. Yards Co. directly refer to the Northwestern tariff. The conclusion reached concerning shipments under the Boyd and Lowrey tariffs governs here. The failure of cross reference between the two tariffs did not prevent the application of the absorption provision of the Northwestern tariff, when used in connection or combination, with the U. S. Yards Co. tariff. HELD, reparation awarded. Wilson & Company v. Director General, 107 I. C. C. 580.

North American Oil & Refining Co. v. Director General, as Agent, 85 I. C. C. 697.

IV. PROCEDURE AND PLEADING.

See Evidence; Procedure Before Commission.

§12. In General.

(a) Complainant relied upon comparative switching movements to show unreasonableness in charges for similar movements at its own plant. Carriers, following investigations at comparative points, testified that in no instance was physical situation comparable with that at complainant's plant. FOUND: A mere variation in some aspects of a comparative movement does not necessarily destroy its value as a measure of reasonableness if operations are essentially similar, since comparisons of precisely similar situations would be difficult, if not impossible, to find. Utah Fuel Co. v. D. G., 102 I. C. C. 493, 495.

V. SWITCHING DISTRICTS.

§13. In General.

See Advanced Rates §17 (bb).

(a) Upon reargument, prior report, 73 I. C. C. 161, rates on coal from various producing regions to Chicago switching district, higher to some deliveries than to Chicago itself, found unduly prejudicial and preferential in favor of points to which lower rates apply. This differentiation is not supported by sound transportation considerations, since it is clear that no greater service is necessary in making deliveries within excepted areas than is rendered in reaching many points to which Chicago rates apply. Chicago Coal Merchants Asso. v. Director General, as Agent, 89 I. C. C. 137.

(b) C. & N. W. Ry., respondent, proposed to increase rates on sand and gravel, carloads, from Barton, North Lake, Waukesha, Racine Junction, Racine,, Kenosha, Fox River, Berryville and Bassetts, Wisc., to Evanston, Ill., and stations south thereof in the outer zone of the Chicago switching district on its Lake Shore division and Mayfair-Evanston line, not including Mayfair; to cancel rates on this traffic from Ives, Wisc., to the same destinations, thereby making higher distance rates effective; and to apply from the originating points named and other sand and gravel producing points in the outer producing zone to industries and team tracks between Peterson Avenue and Montrose Boulevard, not including Mayfair, on its Mayfair-Evanston line, the rates maintained to Peterson Avenue. In 64 I. C. C. 37 the Commission found rates from the outer zone should not exceed 3.75c and from the inner zone 0.25c under the rate from the outer zone to points in the Chicago switching district, for distances of 91 and 48 miles respectively. On June 25, 1918, the Director General made the rates from inner and outer producing zones on the Madison and Galena divisions to the intermediate points applicable over either division. Respondent urged that through failure to publish certain routing restrictions the rate from Waukesa to Chicago was erroneously made applicable to Rogers Park. The record in 64 I. C. C. 37 did not afford a basis for a finding that rates to Rogers Park, Peterson Avenue and related points on Lake Shore and Mayfair-

Evanston divisions in the outer switching zones should be maintained on a higher basis than to other points in the Chicago switching district. Nor does the present record show a difference in transportation conditions which would justify such a finding. HELD schedules not justified. Sand and Gravel from Wisconsin, 89 I. C. C. 484.

(c) Upon further hearing and reargument, taking into consideration unusual character of the movement, complicated nature of the two-line short haul within the Boston terminal district,, and as compared with other rates for local hauls within the Boston district and between other points in Massachusetts for considerably greater distances, charges on coal from Mystic Wharf, Boston, Mass., to East Cambridge, Mass., during Federal control, found unreasonable. Previous report, 69 I. C. C. 282. Boston Wool Trade Asso. v. Director General, 89 I. C. C. 589, 596.

(d) Complainant attacked failure of P. & R. to include complainants sidings within the Wilmington, Del., switching limits has subjected it to payment of charges which are unreasonable, unjustly discriminatory and unduly prejudicial. Wilmington is served by three trunklines, the Pennsylvania, B. & O., and P. & R. Under a reciprocal switching arrangement, each of these carriers performs switching services for the others within defined switching limits, the charge of 27c per ton on general merchandise, with a minimum of $6.75 per car, and a flat charge per car on coal of $2.70 or $3.60 as the case may be, dependant upon the character of the movement, being absorbed by the line haul carrier. Complainant's plant is at Rockford, Del., on the Wilmington & Northern R. R., operated under lease by the P. & R., and situated on the south side of Brandywine creek in the extreme northwest section of Wilmington. Rockford is within the city limits, but outside of the territory in which the reciprocal switching arrangement has been applied. traffic for complainant's plant entering Wilmington on the Pennsylvania for P. & R. delivery is interchanged with the P. & R. at West Yard, and thence moves northwestwardly over the Readings main line to Kentmere Jct., and thence east over the Kentmere branch, a distance from West Yard of about 6.2 miles. The B. & O. can reach complainant's plant only over the lines of the Reading, and this traffic is interchanged at Elsmere Junction about 2 miles west of West Yard, and moves a distance of about 4.2 miles to complainant's plant. Both of these movements, that from Elsmere Junction being included within that from West Yard, are outside the city limits until a point about one mile from complainant's plant is reached. Shipments for complainant coming in over the Reading's rails do not move into Wilmington but are set off at Kentmere Junction. On traffic which the Pennsylvania and the B. & O. hauled to West Yard and Elsmere Junction, except on B. & O. traffic upon which joint through rates applied, charges were collected at the rates to Wilmington plus a minimum scale of 31.5c first class. On shipments upon which the Reading received the line haul and upon which through rates did not apply, charges were collected at the Wilmington rate plus 3.5c for the movement from Kentmere Junction to Rockford. The great bulk of Complainant's shipments move on joint through rates which are on the flat Wilmington basis, except that on lime from points in Virginia the applicable joint through rates are slightly higher than the Wilmington rates. The Reading has expressed a willingness to join with its connections in the establishment of other joint through rates. Notwithstanding the existence these joint thru rates on the greater portion of its shipments, complainant seeks the benefit of the reciprocal switching arrangement principally because it feels that its market should no longer be restricted and that it should be enabled to purchase its raw materials with greater freedom. The mere fact that its plant in located within the city limits is not controlling. Complainant's plant is admittedly an important one, but it is not shown that the service rendered it places it on the same footing from a transportation standpoint with industries within the district. The record indicates that the contrary is true. The service rendered by the Reading between complainant's plant and the line haul connections is in fact a line haul service. Considering the length of the hauls and the charges made for similar services on other traffic, the Commission is of the opinion that the class rates in effect since June 25, 1918, are

too high for use in constructing through rates to and from complainant's plant. HELD, the circumstances of carriage surrounding the traffic here considered are not the same as those surrounding traffic delivered in the industrial section. This contention is not sustained. HELD, charges attacked on coal and coke are illegal to extent they exceeded line haul charges at rates from points of origin to Wilmington; that the failure of defendant P. & R. to include complainant's plant within the switching limits of Wilmington except as to coal and coke, and failure of defendants B. & O., and Pennsylvania to absorb the charges of the P. & R. for transportation between complainant's plant and connection with line haul carriers, except coal and coke, not unreasonable, unjustly discriminatory or unduly prejudicial; that class rates between complainant's plant and P. & R. connections with line haul carriers unreasonable to extent they exceed 13c first class, reparation awarded. Bancroft & Sons Co. v. P. & R. Ry., 91 I. C. C. 186.

(e) Proposed increased rates on sand and gravel from points in Wisconsin to Evanston, Ill., and various destinations south thereof in the Chicago switching district, and cancellation of rates from Ives, Wisc., to same destinations, designed to correct an error in tariff publication and to place inner and outer producing zone points on a parity with respect to the rates to Rogers Park, Ill., found not justified. To permit suspended schedules to become effective would contravene findings and order of the Commission in Chicago Sand & Gravel Producers case, 64 I. C. C. 37. Sand and Gravel from Wisconsin, 89 I. C. C. 484.

(f) Failure of Philadelphia & Reading Ry. to include complainant's plant at Rockford, Del., within switching limits of Wilmington, Del., and failure of Baltimore & Ohio and Pennsylvania to absorb charges of Reading for transportation between complainant's plant and connections with line-haul carriers, found not unreasonable, unjustly discriminatory, or unduly prejudicial. Rockford is a separate station, and has never been under jurisdiction of Wilmington agent. Haul to and from complainant's plant is performed by a road engine and crew who are paid road wages, the highest paid, and trip actually consumes greater portion of a work day. Bancroft & Sons Co. v. P. & R. Ry. Co., 91 I. C. C. 186.

(g) Carrier urges that extension of its switching limits to include a certain point would result in demands for its extension to include still other points. While this fact does not, of course, constitute a defense, it is apparent that there is a limit beyond which Commission should not require switching rates to be extended; and in determining that limit actual extent of industrial section must be given weight. Bancroft & Sons Co. v. P. & R. Ry. Co., 91 I. C. C. 186, 191.

(h) Original complaint requested establishment of corporate limits as the switching limits of Rochester, and reasonable and nondiscriminatory switching charges between industries located in State Street and connections of the N. Y. C. with other railroads within corporate limits of Rochester. Amendment filed seeking inclusion of that portion of the State Street branch parallel with and close by but outside the Rochester city line, and establishment of switching charges requested between the main Rochester switching district and intermediate points, allowed. Amendment does not unduly broaden the issues since territory referred to therein is within corporate limits, and if charges originally sought were established, inclusion of territory requested in amendment and alignment of existing charges between various intermediate industrial sections would be necessary to obviate fourth-section departures. Rochester Switching Case, 95 I. C. C. 30, 36, 37.

(i) In every switching district there will almost invariably be found some hauls so long and so difficult that cost is in excess of switching charge collected, but the fact does not show the charge to be less than reasonable for the switching service rendered within the district. Rochester Switching Case, 95 I. C. C. 30, 45.

(j) Where a carrier publishes switching charges within switching limits of a city subject to absorption by connecting lines, and the commission includes an additional zone within such limits, it is a violation of section 3 (1) if such carrier does not make the switching charges published to and from the included zone subject to absorption by connection carriers in same manner and to same extent as are the existing switching charges. It is also a violation of this provision of section 3 by the connecting

carriers if they do not absorb the new switching charges in same manner and to same extent as the old. Rochester Switching Case, 95 I. C. C. 30, 48.

(k) Western Maryland, respondent, proposed to restrict its proportional switching limits at Hagerstown, Md., so as to exclude that portion of its line east of the city limits. The switching limits now extend to and embrace the Security Cement & Lime Co., plant at Security, Md., a point 0.625 miles east of the Hagerstown city limits. Hagerstown is served by the Western Maryland, B. & O., N. & W., and Pennsylvania. Prior to Nov. 1, 1922 the switching limits of all of these roads were confined to the corporate city limits, but on that date the W. M., extended its proportional switching limits to include protestants plant at Security. Respondent now proposes to restore its proportional switching limits to the original limitations,. Under the present arrangement, on traffic that has had or will receive a road haul beyond Hagerstown, respondent makes a charge of $6.30 per car for the service between its interchange with connecting lines in Hagerstown and protestants plant, and this charge is absorbed by its connections out of the line haul rate. Under the proposed change protestant will be denied the benefit of the Hagerstown rates under switching absorption and compelled to pay higher joint or combination rates. Security is a separate agency station on the W. M., but the agents sole duty is to handle protestants traffic. Protestants plant is considered to be within the industrial community of Hagerstown, however, and the Pennsylvania and the N. & W., show it in their tariffs as an industry at Hagerstown. Joint coal and coke rates were published to Security and were the same as to Hagerstown so that there was no necessity for proportional switching on these commodities. Clearly the primary motive in taking action at this time is to forestall anticipated difficulty in obtaining a satisfactory proportion of the rates which may be established from Security in Southern Cement cases, Dockets 15380 and 15900 now pending. If respondents present switching charge is inadequate for the service performed, it should be increased to a proper level. If it purposes to obtain a greater proportion of the through revenue charge, that should be sought by negotiations with its connections or by proper proceeding before the Commission. HELD, proposed schedules not justified. Switching at Hagerstown, Md., 102 I. C. C. 14.

(ka) Proposal of the Western Maryland Ry. Co., to restrict switching limits of Hagerstown, Md., so as to exclude Security, Md., found not justified. Primary motive lies in a dissatisfaction of the above carrier with divisional arrangements, which affords no justification for increased rates. Under the proposed arrangement protestant at Security would be denied the benefit of switching absorptions on traffic moving beyond Hagerstown, and would be compelled to pay higher rates to the decided advantage of competitors at Hagerstown and Fordwick, Va. Moreover, Security is listed as a point taking Hagerstown rates in tariffs of other carriers. Switching at Hagerstown, 102 I. C. C. 14.

(l) Frisco, respondent, proposed to eliminate the plant of the Wertzberger Derrick Company from the list of industries at Tulsa, Okla., from and to which switching would be performed. As a result of negotiations in January 1924, protestant leased from respondent a track of land upon which to erect a plant for the manufacture of oil well derricks. This land paralleled a stockyard siding maintained by respondent about 1 mile southwest of Red Fork, which is on its main line between Tulsa and Sapulpa, Okla. Protestants plant is about 5 miles from the passenger station at Tulsa, West Tulsa, within the city limits of Tulsa, is the first station southwest thereof and is considered the boundary of the Tulsa switching limits. Red Fork, an agency station, is 2.4 miles southwest from West Tulsa. It is clear that prior to June 16, 1925 the date on which protestants plant was listed as an industry at Tulsa, West Tulsa was considered to be the western boundary of the Tulsa switching district. The suspended schedules would restore conditions as they existed prior to that date. The switching charge is now absorbed by respondents connections out of the through rate. Under the proposed change protestant would be denied the benefit of the Tulsa rates and compelled to pay the rates applicable to and from Red Fork. This would result in increased rates to many points, particularly to destinations in Kansas. No attempt was made by respondent on this record to show that the Tulsa rates are too low for application from Red Fork. HELD, proposed sched-

ules not justified. Switching at Tulsa, Okla., 104 I. C. C. 42.

(m) Except at some of the larger terminals, such as Chicago, the limits of a switching district are not defined in tariffs. Switching charges are usually established from and to industries, in connection with line-haul movements within the judgment and discretion of the carrier's traffic officers. Absorption of Switching at Racine and Racine Junction, Wis., 101 I. C. C. 60, 62.

ALL OTHER CITATIONS

TANK CAR SHIPMENTS

See Across Lake Rates (a); Advanced Rates §17 (yy); Blanket Rates §6 (c); Branch Lines §1 (y) (aa); Cars and Car Supply §10, §17; Class Rates §1 (a), §2 (a) (c) (h); Classification §16 (m), §17 (uu), §22 (e); Commodity Rates §5 (4y); Demurrage §10; Equalization of Rates §3 (i), §4 (5) (n); Long and Short Hauls §2 (5x), §4 (yy), §6¾ (hh); Minimums §10; Overcharges (m); Reasonableness of Rates §32½ (kk); Reconsignment §3 (o); State Rates and Regulations (n) (ss); Weights and Weighing §5 (ma).

(a) Charges on fuller's earth, in box cars, from Georgia and Florida points to Richmond, Cal. based on combinations to and from Memphis, Tenn., or New Orleans, La., found not unreasonable, but on shipments moving in tank cars furnished by shipper because of inability of carriers to furnish adequate boxcar equipment, found unreasonable to extent class rates for haul east of New Orleans, La., exceeded the contemporaneous commodity rates applicable on shipments moving in box cars. Reparation awarded. Standard Oil Co. v. A. T. & S. F. Ry. Co., 89 I. C. C. 27.

(b) Complainant attacked charges on three empty private tank cars returned from Norwood and Providence, R. I., to Los Angeles, Calif., during March, 1920, as unreasonable, unjustly discriminatory, unduly prejudicial and illegal. This proceeding grows out of the application of the rule for equalization of empty and loaded tank car mileage at the beginning and ending of federal control. All shippers of commodities in tank cars pay the regular established freight rates, regardless of ownership of equipment. In the oil industry most of the tank cars are owned by shippers or lessors, and not by the carriers. In such instances, under appropriate tariff provisions, a certain amount per loaded and empty car mile is allowed the shipper or owner by the carrier for its use of the privately owned equipment. With authorized changes in the allowance, these provisions were continuously in effect prior to, during, and subsequent to federal control. Defendants admit that, if the equalization rule had been in effect during the entire period, the charges in question would not have been rendered. Shippers are governed by the applicable tariffs and have no direct concern with the fact of a change in ownership or control of the particular carriers. The applicable tariffs continuously carried prior to, during, and subsequent to federal control a rule which provided that the tank car owners should be paid an allowance by carriers for their use of privately owned cars loaded or empty, and that private tank cars would be moved empty without charge, at the time movement is made between stations or junction points on the lines of the carriers whose tariffs were governed by the applicable classification. The equalization rule was also in effect during the time it was suspended. Neither the latter, nor any other tariff item, at any time annulled the provision for payment of the allowance and for the return of empty cars. In other words, there was a continuous holding out to the shipper that his empty cars would be returned without additional charge at time of movement. It was the completion of a transaction that began when the outbound loaded cars originally came into the carriers possession. This was a liability assumed by the director general at the beginning of federal control and by the corporate carriers at the termination of federal control under the tariffs in the case of shipments that moved prior thereto, respectively. Compensation therefor was included in the freight charges on the outgoing shipments. The accounting is a matter with which the shipper should have no concern, this be-

ing solely a detail between the director general and the corporate carriers. The shipments made prior to the termination of federal control moved under the tariff provision that empty cars should be returned without additional charge and the fact of transition from federal to corporate control did not annul its effect. The equalization rule subsequently published was not applicable to such movements. It applied only on shipments initiated from the effective date of its restoration. HELD, equalization rule was not applicable to the shipments in question made during federal control of which the empty cars were returned subsequent thereto, and that charges attacked are illegal, bills canceled accordingly. General Petroleum Corporation v. C. B. & Q. R. R., 91 I. C. C. 388.

(c) Complainant attacked commodity rates on crude, fuel and gas oil, in tank cars, which moved prior and subsequent to federal control from Kansas, Oklahoma, Texas and Louisiana to Minneapolis, Minn., as unjust, unreasonable, unjustly discriminatory and unduly prejudicial in that they exceed rates 5c less than the rates on refined oils. In 87 I. C. C. 149 the Commission found rates attacked during federal control unreasonable to extent they exceeded rates 5c less than on refined oils. HELD, rates attacked unreasonable to extent they exceeded rates 5c less than on refined oils, reparation awarded. Barber Company v. A. & V. Ry., 91 I. C. C. 621.

(d) Complainant attacked commodity rates charged on 11 tank cars of crude oil shipped during January and February, 1920, from Lawton and Walters, Okla., to Omaha, Nebr., as unreasonable. Charged 32.5c applicable on refined oil. Rate sought was applicable on fuel oil and was established on crude oil effective Feb. 29, 1920. HELD, rate attacked unreasonable to extent it exceeded 27.5c, reparation awarded. Omaha Refining Co. v. Director General, 91 I. C. C. 575.

(e) Complainant attacked commodity rates charged on 47 cars of liquid asphalt, in tank cars, moving between February, 1922, and March, 1923, from Port Arthur and Port Neches, Tex., to West Monroe, La., as unreasonable and in violation of the fourth section. All shipments originated at Port Neches, on the K. C. S., 4 miles north of Port Arthur. Shipments moved K. C. S., to Shreveport, La., and V. S. & P. to West Monroe, 318 miles, charged 29c prior to July 1, 1922 and 26c thereafter. Effective May 18, 1923 they were reduced to 19c. West Monroe is intermediate to Vicksburg over route of movement. There was practically no movement from Port Arthur or Port Neches to West Monroe prior to the shipments in question. Liquid asphalt is rated class D in southwestern territory. Rates attacked were 43 per cent of class D prior to July 1, 1922, and 42.6c thereafter. HELD, rates attacked not unreasonable and complainant not damaged by fourth section violation, complaint dismissed. Dead Company v. K. C. S., 92 I. C. C. 256.

(f) Respondents proposed increases in the rates on liquid chloride of zinc, in tank cars, from Chicago, Ill., and St. Louis, Mo., to Little Rock and North Little Rock, Ark., Texarkana, Ark., and other Arkansas destinations, and reductions in the rates on dry or fused chloride of zinc, carloads, from and to the same points. Grasselli takes the same rates as Chicago and the same rates apply from East St. Louis as from St. Louis. Chloride of zinc in either the fused or liquid form is rated fifth class in official and western, and sixth class in southern classification. Prior to 1921 the commodities moved on class rates. But since that time respondents have distinguished between liquid and fused chloride of zinc in the publication of rates from St. Louis to Arkansas. Effective June 15, 1922, respondents reduced the rates on zinc chloride in tank cars from St. Louis to Arkansas. Respondents proposed to establish from the Chicago and St. Louis groups to the destination territory the same basis of rates on zinc chloride, regardless of whether it is shipped as a liquid or in the fused form. The rates on the liquid from the St. Louis group to Little Rock would be increased from 19c to 25c, and rate on fused reduced from 45.5c to 25c. The proposed reduced rate of 36c from the Chicago group to Little Rock is made by the addition of the proposed rate from the St. Louis group of the fifth class differential of 11c, Chicago over St. Louis. The commodity in both forms is used as a wood preserver, although dry chloride of zinc is used for other purposes The chief difference be-

tween the commodity in the two forms is that the dry is concentrated, is higher in zinc chloride content, and is more valuable than the liquid. The two commodities are rated the same in the three classification territories, and throughout the country generally there is no difference in rates except from the St. Louis group. HELD, proposed rates justified. Chloride of Zinc to Texarkana, 92 I. C. C. 569.

(g) Complainant attacked commodity rate of 29c charged on crude petroleum, in tank cars, from Irvine and Beattyville, Ky., to Blue Island, Ill., a point within the switching district of Chicago, as unreasonable, unjustly discriminatory and unduly prejudicial as compared with a rate of 24.5c from the midcontinent field in Kansas and Oklahoma to Chicago. In 59 I. C. C. 689 the Commission found the rate attacked not unreasonable or unduly prejudicial and dismissed the complaint. The rate on crude oil from the midcontinent field to Chicago is 83% of the rate on refined oil, whereas the factor charged north of the Ohio river on eastern Kentucky oil is the same on both crude and refined. Commission has held that reasonable rates on crude oil should be relatively lower than reasonable rates on refined oil, and there is here no showing that the rate on refined oil north of the Ohio river to Chicago is less than reasonable. HELD, rates attacked unreasonable to extent they exceeded 20c prior to June 25, 1918, 25c from that date to July 24, 1918 and 24.5c thereafter until August 26, 1920 since that date 29.5c, reparation awarded. Barnett Oil & Gas Co. v. Director General, 93 I. C. C. 85.

(h) Complainant attacked class rates charged on 31 tank cars of imported linseed oil shipped from San Francisco to Los Angeles, Calif., between May 1922 and December 1922 as unjust, unreasonable, unduly prejudicial and inapplicable. Fifth class rates of 43c prior to July 1, 1922 and 38.5c thereafter were charged and contemporaneously there were published rates of 35c prior to July 1, 1922 and 31.5c subsequent thereto on linseed oil in packages from San Francisco to Los Angeles. HELD, rates attacked on linseed oil in tank cars, unreasonable to extent they exceeded 35c and 31.5c reparation awarded. Fuller & Company v. S. P. Co., 93 I. C. C. 154.

(i) Complainant attacked class and commodity rates charged on raw cucumbers, in brine, in bulk in barrels, and in tank cars, shipped between August 16, 1921 and Jan. 24, 1923 from Blytheville, Ark., to Omaha, Neb., as unreasonable. Blytheville is on the Frisco, the St. Louis Southwestern and J. L. C. & E. With exception of two cars, shipments moved over Frisco to St. Louis and Burlington beyond, 696 miles, one moved over Cotton Belt to St. Louis and Burlington beyond, 739 miles and one over J. L. C. & E., to Nettleton, Ark., M. P., beyond, 774 miles. Charged prior to Dec. 22, 1921 fifth class rate of 92c, from that date to Jan. 24, 1923 commodity rates of 59.5c and 53.5c prior and subsequent to July 1, 1922 applicable on pickles in brine in wood. Effective June 30, 1923 defendants established a commodity rate of 42.5c on pickles, cucumbers, in brine, in tank cars, which rate is still in effect. The 53.5c rate applicable on pickles, in brine, in wood, was canceled Nov. 27, 1923, on which date a rate of 58.5c was established on canned goods, including pickles. The carriers established a rate of 59.5c between the points, which was the same as the rate then applicable from Colorado common points to Missouri river points. The short line distance from Blytheville to Omaha is over the Frisco to St. Louis and Wabash beyond, 654 miles. HELD, rates attacked unreasonable to extent they exceeded 59.5c from Aug. 16, 1921 to June 30, 1922 and 53.5c thereafter, reparation awarded. Haarman Vinegar & Pickle Co. v. C. B. & Q. Ry., 93 I. C. C. 251.

(j) Complainant attacked commodity rate of 37c charged on a tank car of fuel oil shipped March 20, 1919 from Loftus, Calif., to Bisbee, Ariz., as unreasonable and unduly prejudicial to extent it exceeded 34.5c. Loftus is on the Pacific Electric, 27 miles east of Los Angeles, moved via Los Angeles, thence S. P., and E. P. & S. W., to destination, charged group rate of 34.5c. Subsequently it developed that the group rate did not apply from Loftus, and combination rate of 37c based on Stewart was applied, made up of 22.5c to Stewart and 30c beyond. HELD, rate assessed inapplicable, and applicable rate unreasonable to extent it exceeded 34.5c, reparation awarded. Gilmore Co. v. P. E. Ry., 93 I. C. C. 357.

(k) Complainant attacked commodity rate charged on oil, in tank cars, from

Bayonne, N. J., to Brooklyn as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved over Jersey Central to Jersey City, floated to Bush Terminal docks and handled thence to rails of Southern Brooklyn Ry. in Brooklyn by the Bush Terminal Co. Complainant was notified by the South Brooklyn Ry. that it would not transport oil in tank cars to complainants plant after June 1, 1924. This was done because the New York Rapid Transit Corporation refused longer to permit shipments of oil in tank cars to be transported through the subway on account of the risk to passenger traffic. Distance is 13 miles, which does not include constructive mileage for the floating service in New York harbor. A commodity rate of 16c is applicable. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Huber v. C. R. R. of N. J., 93 I. C. C. 539.

(l) Complainant attacked commodity rates charged on tank car of naptha and gasoline shipped from Hodge, Tex., to Blue Creek, W. Va., since Feb. 3, 1921 as unreasonable to extent they exceeded rates on these commodities from the same point to Charleston, W. Va. Hodge is about 4.5 miles north and within the switching limits of Fort Worth, Tex. Blue Creek is 13 miles northeast of Charleston on the B. & O. Charged 73c prior to Feb. 25, 1921, 75.5c from that date to July 1, 1922 and 68c thereafter. These rates are made by combination of proportional commodity rates to and from the Mississippi and Ohio river crossings, the lowest total rate via any of the crossings constituting the through rate applicable usually via all crossings. Rates charged were based on Vicksburg combinations. The rates from Hodge to Charleston ranged from 6 to 9.5c lower than to Blue Creek, present rate being 58.5c. Blue Creek is intermediate to Charleston over the B. & O., through Clarksburg and the resulting violation of the long and short haul rule of the fourth section apparently was unprotected. Effective June 9, 1923, the B. & O., eliminated the route to Charleston in connection with its line through Clarksburg and the present rate does not contravene the provisions of the fourth section. The rates charged are the same as to New York and Albany to which the haul exceeds that to Blue Creek by 490 and 573 miles. HELD, rates attacked unreasonable to extent they exceed 67.5c prior to Feb. 25, 1921, 70c from that date to June 30, 1922 and 63c from that date to Dec. 6, 1922, and 60c thereafter, reparation awarded. Transcontinental Oil Co. v. A. & V. Ry., 96 I. C. C. 136.

(m) Complainant attacked commodity rate charged on two tank cars of kerosene which moved June 7, 1920 from Fort Worth, Tex., to Waterbury, Conn., as unjust and unreasonable. Charged 76c. There were rates of 69.5c in effect to the greater part of New England which were applicable over the route these shipments moved, through Waterbury to more distant points. HELD, rate attacked unreasonable to extent it exceeded 69.5c reparation awarded. Transcontinental Oil Co. v. D. L. & W. R. R., 96 I. C. C. 173.

(n) Complainant attacked commodity rate of 10c charged on tank cars of fuel oil shipped from Texas to Sulphur Mine, La., between April 9, 1921 and July 26, 1922 as unreasonable to extent it exceeded 6.5c. Sulphur Mine is served by the Brimstone R. R. Points of origin are Chaison and Sabine, Tex., on the T. & N. O., and Sun, Magpetco, and Port Neches, Tex., on the T. & Ft. S. From Chaison and Sabine, the movement was over the T. & N. O., to Sabine River, La. W., to Brimstone Jct., and Brimstone beyond. From the other points the shipments moved over T. & Ft. S. to Ruliff, Tex., K. C. S., to Mossville and Brimstone beyond. Mileages are from Chaison 58.3, from Sabine 79.7, from Sun 79.6, 81.2 from Magpetco, and 87.7 from Port Neches. From July 1 to July 26, 1922 the proper rate was 9c and the overcharges should be refunded. July 27, 1922 a rate of 6.5c was established and the rate was allowed to become effective following 69 I. C. C. 345. Although it was shown that the 6.5c was not unremunerative and did not result in undue prejudice or otherwise violate the act, there would be nothing inconsistent in finding that the 10c rate was not unreasonably high for the same service. The Commission recognized the controlling force of the competitive situation in permitting the carriers to reduce their rates below what would be a maximum reasonable basis, but these competitive features are entitled to little, if any, weight in determining the maximum reasonable rate. The record demonstrates that the 6.5c rate, although it

may be remunerative, is less than a maximum reasonable rate, all the circumstances considered, and was established by defendants because of competitive influences and for the purpose of avoiding loss of traffic. HELD, rates attacked not unreasonable, complaint dismissed. Union Sulphur Co. v. T. & N. O. Ry., 98 I. C. C. 76.

(o) Complainant attacked commodity rate of 8c charged on 11 cars of liquid bleach, shipped in tank cars between June 19 and August 23, 1923 from Menominee, Mich., to Peshtigo, Wis., as unreasonable to extent it exceeded 3c minimum 80,000 pounds, established on August 25, 1923. Distance 8.3 miles. Defendant does not oppose the claim for reparation. HELD, rate attacked unreasonable to extent it exceeded 3c, reparation awarded. Michigan Electrochemical Co. v. C. & N. W. Ry., 98 I. C. C. 435.

(p) Complainant attacked commodity rates charged on tank cars of gas and fuel oils shipped since April 30, 1922, from Kansas and Oklahoma to Maryville, Mo., as unjust and unreasonable to extent they exceeded 5.5c prior to July 1, 1922, and 5c thereafter less than the rates on refined oils, and unjustly discriminatory. Maryville is on the Burlington and Wabash, 108 miles over the former and 223 miles over the latter from Kansas City, average distances 418 and 270 miles from Oklahoma and Kansas fields. On April 30, 1922, the rate on refined and low grade oils from the Kansas fields to Maryville was 33c. On the same date the rates to Maryville from the Oklahoma fields were 36.5c on refined oils and 36c on gas and fuel oils. On July 1, 1922, the Kansas rate was reduced to 29.5c and the Oklahoma rates to 33 and 32.5c. Effective Oct. 20, 1922, over the Burlington and Nov. 1, 1923, over the Wabash, the rates on gas and fuel oils were reduced to 26.5c from the Kansas field and 28c from Oklahoma. The effect of this was to make the fuel oil and gas oil rates lower than the refined oil rates by 3c from Kansas and 5c from Oklahoma. HELD: Rates attacked from Oklahoma unreasonable and unduly prejudicial prior to July 1, 1922, to extent they exceeded rates 5.5c lower than rates on refined oil and rates attacked from Oklahoma and Kansas unreasonable and unduly prejudicial from and after July 1, 1922, to extent they exceeded 5 and 3c respectively lower than the rates on refined oil, reparation awarded. Maryville Electric Light & Power Co. v. A. T. & S. F. Ry., 101 I. C. C. 229.

(q) Rates on fuel oil, in tank cars, from certain Texas subports to Sulphur Mine, La., found not unreasonable as compared with a lower rate subsequently established. The record demonstrates that the lower rate, although it may be remunerative, is less than a maximum reasonable rate and was established by defendants because of competitive influences and for the purpose of avoiding loss of traffic, and the rates assailed were less than the normal basis of rates in the territory in question, and were from 58 to 65 per cent of the contemporaneous rates for similar distances between Texas and Louisiana. Union Sulphur Co. v. T. & N. O. R. R. Co., 98 I. C. C. 76.

(r) Upon contention that in determining reasonable rates on cottonseed oil consideration should be given to the high percentage of empty to loaded mileage of tank cars used in the transportation of that commodity. HELD, while the total mileage may be about twice that of the loaded mileage, this fact is to a large extent offset by the further fact that the maintenance expense to the owners of these tank cars is considerably more than twice the mileage allowance by the carriers. It is a convenience to interveners to have their own equipment, but the fact remains that if this equipment, or other equipment of like serviceability, were not purchased and maintained by shippers, carriers would be put to a great deal of additional expense which is now borne by shippers. Oklahoma Corp. Commission v. A. & S. Ry. Co., 98 I. C. C. 183, 225.

(s) Rate on liquid bleach in shipper's tank cars from Menominee, Mich., to Peshtigo, Wis., found unreasonable to extent it exceeded lower rate subsequently established. Reparation awarded. Michigan Electrochemical Co. v. C. & N. W. Ry. Co., 98 I. C. C. 435.

(t) Rate applicable to petroleum products, in tank-car loads, from Greybull, Wyo., to Belgrade, Mont., during Federal control, found unreasonable to extent it exceeded lower rate contemporaneously applicable to contiguous points and which through oversight was not established to Belgrade until subse-

quent to movements here involved. Reparation awarded. Continental Oil Co. v. Director General 98 I. C. C. 544.

(ta) Private tank cars of complainant were forwarded to a lessee who, after three years use, turned them back to complainant. Due to lessee's insolvency, carrier demanded from complainant payment of excess empty mileage accruing against it. Upon complaint seeking to offset against excess empty movement of lessee, an excess of loaded over empty movement accruing to complainant after cars were returned, FOUND: Tariff rules allow six months after close of accounting year within which excess empty mileage may be offset by subsequent loaded mileage, and it is here sought to effect an offset accruing three years later. Carriers can not reasonably be expected to hold their books open indefinitely to permit offsets of this character. Moreover, the rules are part of uniform regulations, and there is nothing shown of record which would justify conclusion that they should be changed. Kansas City Structural Steel Co. v. A., T. & S. F., 102 I. C. C. 113.

(tb) Upon further hearing, findings in original report, 73 I. C. C. 251, modified and rates on fuel and gas oils, in tank-car loads, found unreasonable and unduly prejudicial for future to extent they exceed rates 6 cents lower than rates contemporaneously maintained on refined oil. Davenport Commercial Club v. Director General, 102 I. C. C. 523.

(u) Complainant attacked commodity rates on fuel and gas oils in tank cars from Midcontinent fields to Rock Island, Moline, Ill., Davenport, Bettendorf, Muscatine, Iowa City, Cedar Rapids, Ottumwa, Mason City, Fort Dodge and Burlington, Iowa, as unreasonable and unduly prejudicial prior to August 26, 1920 to extent they exceeded rates 5c lower than on refined oil. In 73 I. C. C. 251 the Commission found rates attacked unreasonable to extent they exceeded rates 5c lower than on refined oil. In 78 I. C. C. 667 the Commission found rates to Fairfield and Ottumwa, Ia., unreasonable as follows: From Group 1 of Midcontinent fields to extent they exceeded rates to St. Louis, and from Groups 2 and 3 to extent they exceeded the St. Louis rates by more than 1c. Request was made for modification of outstanding orders to permit the establishment of rates on low grade oils uniformly 6c less than the rates on refined oil. The effect of the general increase of August 26, 1920 was to destroy the uniformity of differentials between the rates prescribed on refined and low grade oils. That increase and the general reduction of 1922 have resulted in differentials of 5.5, 6 and 6.5c, the amount of the differential being controlled by the rules for disposition of fractions prescribed in connection with the general increase and the general reduction. HELD, original reports modified so that the rates on low grade oils will not be more than 6c less than rates on refined oil. Davenport Commercial Club v. Director General 102 I. C. C. 523.

(v) Complainant attacked commodity rates of 77c prior to July 1, 1922 and 69c on and after that date on gasoline and kerosene in tank cars from Fort Worth and Hodge, Tex., to Gastonia, N. C., as unjust, unreasonable and unduly prejudicial. Gastonia is in the south western part of North Carolina 7 miles from the South Carolina state line on the Southern between Atlanta, Ga., and Washington, D. C. It is also served by the Piedmont & Northern and the Carolina & Northwestern. Hodge is 5 miles north of Forth Worth on the MKT, the T. & P., and St. L. S. W. Rates from both points are the same. The rate on petroleum and its products from Fort Worth to Gastonia is based on the Mississippi river combination which is the usual basis for making rates from the southwest to the southeast and to destinations in Carolina territory. The evidence was confined to the factors east of the Mississippi river and to the resulting measure of the through rates from Forth Worth. The manner in which rates from the river were constructed to Carolina territory gave rise to numerous fourth section departures. Gastonia is intermediate to Charlotte, Mooresville, Winston Salem, Greensboro, Durham, and Raleigh, N. C., and Lynchburg and Petersburg, Va., on the Southern. At the date of hearing the rate to Gastonia was 69c, the rate to Charlotte 66c to Salisbury 62.5c, to Winston Salem, 105 miles north of Gastonia 61.5c. The latter was the lowest rate to any destination in North Carolina on the Southern. The carriers have eliminated fourth section departures. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Piedmont Oil Co., v. A. & V. Ry. 102 I. C. C. 583.

(va) Rates on sulphuric and muriatic acids in tank cars and carboys, from Grasselli, Ind., to Sioux City, Iowa, found not unreasonable and present group adjustment in territory involved not unduly prejudicial, since record here does not warrant a condemnation of adjustment on ground that group boundaries are too extensive. Kennedy & Parsons Co. v. C. & N. W., 102 I. C. C. 591.

(vb) Rates on fuel and gas oils, in tank-car loads, from Okmulgee and Tulsa, Okla., to Davenport, Iowa, found unreasonable to extent they exceeded rates 5 cents less than those contemporaneously maintained on refined oil from same points. Reparation awarded. Davenport Locomotive Works v. C., M. & St. P., 102 I. C. C. 639.

(w) In 93 I. C. C. 221, the Commission found that the rate of 59.5c on tank cars of crude and fuel oils, shipped from Gainesville, Tex., to Miami, Ariz., between August 10 and Sept. 22, 1921 was not unreasonable and dismissed complaint. Upon reconsideration, HELD, previous finding affirmed. Miami Copper Co. v. A. & E. Ry. 104 I. C. C. 467.

(x) Rates applicable on shipments of blackstrap molasses, in tank-car loads, from certain points in Louisiana to Fort Calhoun, Nebr., found not unreasonable or unduly prejudicial as compared with rates on like traffic from same points of origin to other destinations for similar distances and rates between other points for comparable distances. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471.

(y) Rates on liquid asphalt, in tank-car loads, from Port Neches, Tex., to Morrilton, Conway, and Galla, Ark., found to have been unreasonable to extent they exceeded the rate contemporaneously applicable on solid asphalt to the destinations concerned from points near Port Neches. The present rates from Nort Neches to these destinations are the same on both solid and liquid asphalt. Reparation awarded. Texas Co. v. K. C. S. 101 I. C. C. 177.

(z) Exaction of local rates and charges for transportation of lard shipped from points of origin west of Buffalo and Black Rock, N. Y., in tank-car loads, to Jersey City, there unloaded at complainant's plant and put into barrels, tierces, and other containers and forwarded to ship-side points within free lighterage limits of New York Harbor, for export, found not unreasonable but in certain instances illegal. Inbound and outbound movements to and from transit point were separate shipments to which separately established rates were applicable except and to extent that there were explicit tariff provisions connecting the inbound and outbound movements in such manner as to establish the fiction of a continuous through movement. Reparation awarded. Armour & Co. v. D., L. & W., 101 I. C. C. 337.

(aa) Complainant attacked commodity rate of 22.5c charged on 222 tank cars of crude petroleum shipped between May 5 and Dec. 30, 1921 from Sallyards, Kas., to St. Joseph, Mo., as unreasonable, unduly prejudicial as compared with rates to Kansas City, Mo. Sallyards is a local point on the Mo. Pac., shipments moving via that line 245 miles. In 36 I. C. C. 109 the Commission found rates on crude oil unreasonable to extent they exceeded 5c lower than the rates on refined oil. HELD, rates charged unreasonable to extent they exceeded 19.5c, reparation awarded. St. Joseph Viscosity Oil Co. v. M. P. R. R., 109 I. C. C. 286.

(bb) Complainant attacked commodity rates of 59.5c charged on 15 cars of fuel oil shipped from Burkburnett and Wichita Falls, Tex., and Becket, Okla., to Globe, Ariz., between August 11 and Nov. 14, 1921 as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. Points of origin lie north of Fort Worth, Tex. in transcontinental group H. Globe is on the A. E., 124 miles north of its junction with the S. P., at Bowie, Ariz. Shipments moved as routed, over various routes, an average of 1,161 miles, average short line distance from the three points being 932 miles. On Aug. 10, 1921 defendants reduced to 50c the rates from three points in Group H and from 20 points in group F in south Texas, but the rates from the points under consideration were left unchanged. On Nov. 15, 1921 the 50c rate was extended so as to include all points in Groups G, H and F. On April 15, 1922 these rates were reduced to 47c and on June 1, 1922 to 45c. As the routing was unrestricted in the tariffs, the 50c rates could be made applicable over defendants lines through Wichita Falls, and, by

circuitous routes even through Becket. HELD, rates attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Globe Light & Power Co. v. A. E. R. R., 109 I. C. C. 405.

(cc) Complainant attacked fifth class rate of 52c on red oil, carloads, from Ivorydale, O, to East Hartford, Conn., as unreasonable and unduly prejudicial; that fifth class rate charged on one tank car of red oil shipped on April 1, 1924 was illegal, sixth class rate being sought for the future. By exceptions to the classification in effect at time of movement, soap stock and a number of other commodities were rated sixth class under the caption "grease, animal and garbage, nonedible." Included with soap stock in this list were cocoanut and other kinds of oil foods, oil settlings and oil tank bottoms, peanut oil (inedible), etc. While the record is persuasive that red oil compares favorably from a transportation standpoint with certain other articles used in the manufacture of soap, the Commission is not prepared to say that the failure of defendants to accord red oil by exception the same rating as these other articles results in unreasonable rates on red oil. HELD, rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Williams Co. v. C. N. E. Ry., 112 I. C. C. 158.

(dd) Complainant attacked commodity rate of 17.5c charged on crude oil, in tank cars, from Ponca City, Okla., to Joplin, Mo., as unjust and unreasonable and as compared with rate of 16c from the same point to southeastern Kansas, unduly prejudicial. Ponca City is in a group with 25 other points of origin on the Santa Fe. From the origin group to all the Kansas points a mileage rate applies as an alternative where it makes less than the group rate, but this is not extended to include Joplin. The rate attacked does not appear excessive for haul of 220 miles and the empty return movement. HELD, rate attacked not unreasonable but unduly prejudicial to extent it exceeded rate under the alternative scale to Kansas points for the distance to Joplin, reparation awarded. Wilhoit Refining Co. v. A. T. & S. F. Ry., 112 I. C. C. 225.

(ee) Complainant attacked commodity rate of 39.5c charged on gas oil, in tank cars, shipped since Oct. 13, 1923 from Casper, Wyo., to Sioux City, Ia., as unreasonable and inapplicable. Some of the shipments moved Burlington others Northwestern and Omaha. Rate charged applicable on petroleum and petroleum products rated fifth class or lower in western classification, except crude, fuel, smudge, gas and road oils, rate on latter commodities being 33.5c. Oil was described as refined oil distillate with specific gravity of 36 degrees to 38 degrees and in the bills of lading and freight bills as petroleum refined oil distillate. The tariffs do not define the various kinds of oil. Rate charged applicable. Subsequent to filing of complaint carriers established rates 6c under rates on refined oil. HELD, rate charged applicable and not unreasonable, complaint dismissed. Sioux City Gas & Electric Co. v. C. B. & Q. R. R., 112 I. C. C. 344.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Definition of Tap Line.

(a) Findings in original reports, 52 I. C. C. 656, and 58 I. C. C. 450, that divisions of joint rates on lumber and forest products accruing to tap lines under orders in the Tap Line case, 31 I. C. C. 490, must be measured by distance to the junction with trunk line over direct route of movement toward final destination, rather than by out of line movements involving wasteful transportation, affirmed. Wasteful Service by Tap Lines, 89 I. C. C. 327.

§4½. When Common Carrier.

See Infra §6; Common Carrier.

(a) The holding that a particular industrial railroad is a common carrier means simply that it serves the public as well as the proprietary industry. It does not change the character of the service performed for the proprietary industry. Pressed Steel Car Co. v. Director General, 93 I. C. C. 224, 232.

II. POWERS AND DUTIES.

§6. As Common Carriers.

See Supra §4½; Common Carrier §7½.

(a) Hannibal Connecting Ry., respondent, inquired as to its operations with a view of determining its status as a common carrier and whether the provisions of section 15a of the act are applicable to it. Respondent operates a steam road from Hannibal, Mo., to plant of Atlas Portland Cement Co. at Ilasco, Mo. The majority of its capital stock is owned by the cement company. Respondents traffic consists chiefly of commodities transported to and from the plant of the cement company, but it serves and has served shippers located along its line and holds itself out to the public generally as ready to transport freight in interstate commerce. Respondent publishes a switching charge of 7c per ton which is absorbed by the Burlington. Respondent concedes it is a common carrier within the meaning of section 1 of the act. HELD, respondent was and is a common carrier engaged in interstate commerce and was and is subject to the provisions of section 15a of the act. Status of Hannibal Connecting R. R. Co., 91 I. C. C. 744.

(b) In 13665 complainant alleged that the Lorain & Southern, which operates a railroad from South Amherst, O., to its connection with the N. Y. C., a distance of one mile, is a common carrier; that all of their competitors on the N. Y. C., in the vicinity of Amherst, O., the N. Y. C. station nearest South Amherst, ship their products under rates which are the same from all the points of origin; that the rates charged complainants are higher than those rates by the amount of the difference between the rate of $7.50 per car, reduced to $6.75 July 1, 1922, established by the L. &. S., and the allowance of $3.29 per car to the L. & S. established by the tariff of the N. Y. C.; and that the through rates charged on interstate shipments are unreasonable to the extent of that difference, and unduly prejudicial. In 13665 Sub. 1, the L. & S. alleged it is a common carrier, that the allowance by the N. Y. C. was based on plant facility service and it not a sufficient allowance. The L. & S. holds itself out as a common carrier of property for hire and has served all who have applied; it issues bills of lading; and it files tariffs and makes the usual report to the Commission. It has no passenger or express service. HELD, the Lorain & Southern is a common carrier subject to the act, which may lawfully participate in joint rates with other carriers or have its switching charges on interstate shipments absorbed under appropriate tariff provisions by the roads having the line haul. HELD, through rates attacked on stone and stone products from points in the L. & S., not unreasonable of otherwise unlawful and that the amount now paid by the N. Y. C. to the L. & S. for movement of all commodities between points on the L. & S. and its interchange point with the N. Y. C., has not been shown to have been or to be unreasonable or otherwise unlawful, complaint dismissed. Ohio Quarries Co. v. N. Y. C. R. R. 92 I. C. C. 703.

§6½. Amount of Allowances.

See Allowances; Common Carrier §7½; Divisions.

(a) Complainant attacked combination rates on classes and commodities, except coal, between all points on the Federal Valley R. R. and points on other lines as unreasonable, unlawful, and dis-

criminatory to the extent that they exceed the rates to and from competing points on other lines in Athens County, O. Complainant, Federal Valley R. R., alleged divisions accorded it out of the joint rates on bituminous coal from mines on its lines to points on the lines of its connections, and its local rates on other traffic are insufficient to pay the cost of operation and are confiscatory. The Federal Valley extends 16 miles from Palos, O., to Lathrop, O. Joint rates are maintained by the carriers on coal, in carloads from mines on the Federal Valley, which are equal to the district rates in effect from mines on other roads. Rates on all other traffic are made by combination on Palos. HELD, interstate class rates are unjust and unreasonable to extent that, to or from points north of Palos, O., they exceed rates between those points, on the one hand and Albany, O., on the other; and to the extent that, to or from points south of Palos they exceed rates from or to Palos by more than the respective amounts by which the rates to or from Albany may exceed those to or from Palos on like traffic from or to points north of Palos for substantially similar distances. In February, 1918, the Railroad Administration allowed the Federal Valley an arbitrary of 20c on coal, increased to 30c in June, 1918, and to 42c in August, 1920, reduced in July, 1922 to 38c. The prayers for increased divisions is based pricipally upon the inability of the Federal Valley, under the present allowance, to earn sufficient revenue to pay the costs of operation, taxes and a return of 6 per cent upon the value of the property. There can be but little question that the movement over the Federal Valley 16 miles of track is proportionally much more expensive on coal shipments than the remainder of the hauls to interstate destinations. The 100% haul of empty coal cars coupled with the severe grades encountered on the return movement under load, and the inevitably greater expense of an independently operated short line, combine to make the service a relatively costly one. The Commission is persuaded that complainant should receive a somewhat larger share of the present joint rates on coal. HELD, divisions accorded Federal Valley should be 50c per ton on coal and on class rates should be figured upon the basis of a mileage pro rate of 32 miles, being 200 per cent of the actual mileage of complainant. Ohio Farm Bureau Federation v. A. &. W. Ry., 89 I. C. C. 489.

(b) Divisions and allowances accorded Christie & Eastern Ry., a common carrier tap line, by trunk-line conections, out of joint rates on lumber and forest products, found not unjust, unreasonable, inequitable or, otherwise unlawful. The Christie originally connected with but a single trunk line at Sandel but by extending its service under trackage rights additional outlets were established at Lecompte and Long Leaf. HELD: Hauling traffic through Long Leaf or Lecompte, instead of to less distant connection at Sandel, is an unnecessary and uneconomic service and not in the public interest. Service, as extended, falls under the ban of inefficiency since it entails a burden of expense voluntarily assumed which can not be overcome by increased volume of traffic. Moreover, such unnecessary expense should not be offset by depleting revenues of trunk-line connections. Christie & Eastern Ry. v. K. C. S., 93 I. C. C. 675.

(c) Divisions between carriers not operated under similar circumstances and conditions are not a proper measure of divisions to tap lines. Christie & Eastern Ry. v. K. C. S., 93 I. C. C. 675, 677.

(d) Upon further hearing, former report 68 I. C. C. 487, FOUND: That principles announced in The Tap Line Cases, 23 I. C. C. 549; 31 I. C. C. 490, have no further application to the Prescott & Northwestern R. R., and such carrier dismissed as a party thereto. All timber owned by the proprietary company in vicinity of the line has been removed and operation of the mill at Prescott discontinued. Such mill has been leased by the proprietary company to a lumber company in which none of the stockholders of either petitioner or the proprietary company has any interest. Since execution of such lease petitioner has not been, and in the future will not be, operated by or in the interest of the proprietary company. Accumulated stock of lumber at the mill at Prescott has all been shipped out, and the proprietary company has no additional timber adjacent to the line or in any territory to which it can be extended. The Tap Line Case, 95 I. C. C. 235.

(e) In 70 I. C. C. 690, the Commission granted to the Chaffee Railroad Company, complainant, a certificate of public convenience and necessity to operate its line of railroad. In 81 I. C. C. 72 the Commission found the Chaffee to be a common carrier subject to the act. Further, found that rates on coal from mines on its line to interstate destinations as unduly prejudicial to extent they exceeded rates contemporaneously maintained on like traffic from the Cumberland-Piedmont district of defendant to same destinations. Complaint, the Chaffee, alleged it has been unable to agree with defendant as to the divisions to be accorded to it on coal traffic originating on its line and that defendant will furnish cars for such traffic but will demand payment of per diem or other charges which will be unjust, unreasonable and inequitable. The Chaffee, 3.25 miles in length, extends from its junction with defendant at Chaffee, across the Potomac river to mine 1 of Manor Coal Co., beyond Vindex, Md. The line is the only means of ingress to or egress from the territory which it serves. It is chiefly an originating line. HELD, 22c per long ton will be just, reasonable and equitable divisions to be received by complainant. Chaffee R. R. v. W. M. Ry. 102 I. C. C. 53.

§7. Legality of divisions, allowances or practices.

See Allowances §10; Common Carrier; Divisions IV; Legality of Rates.

(a) Complainant, Puget Sound & Cascade Ry., is a short line railroad in Washington and complainant Clear Lake Lumber Company is a corporation manufacturing lumber at Clear Lake, Wash. Complainants attacked interstate carload commodity rates on lumber and forest products from points on the Cascade to eastern destinations as unduly prejudicial in relation to other points of origin in the coast group. The Cascade extends from Skagit Landing, near Mount Vernon, Wash., to Potts, Wash., 16.4 miles, connectings at Mount Vernon with the G. N., and Pacific Northwest Traction Company, the latter connecting at Bellingham, Wash., with the C. M. & St. P. The lumber company's plant is 6 miles east of Mount Vernon at Clear Lake, at which point the Cascade connects with the N. P. On Feb. 14, 1922, shortly prior to the submission of the case, the coast group basis was made applicable from points on the Cascade, as desired, leaving for determination only the divisional question and the demand for reparation. It appears that during the period covered by the shipments the coast group rates were available to the lumber company on traffic to all points on the Northern Pacific and via that line and its connections to all points east of Minnesota Transfer. Inasmuch as the lumber company's recourse to the G. N., was for the purpose of obtaining a better car supply, such damage as was sustained is not attributable primarily to the rate adjustment, and reparation may not be awarded. HELD, Cascade is a common carrier, rates attacked not unreasonable but unduly prejudicial to extent that rates to points on the G. N., west of Minnesota Transfer exceeded the coast group rates, reparation awarded. Question of divisions to be left for interested parties to adjust. Puget Sound & Cascade Ry. v. Director General, 91 I. C. C. 467.

(b) In 80 I. C. C. 268, the Pittsburgh & Ohio Valley was found to have been and to be a common carrier subject to the Act. The assessment of demurrage by its trunk line connections on cars delivered or placed for loading by the Valley at complainant's plant was found to be unlawful, and rates from and to complainant's plant found unreasonable and unduly prejudicial and reparation awarded. The extent of the interstate traffic handled for shippers other than complainant is not controlling. It sufficiently appears that interstate shipments have been and are transported by the Valley and its facilities are open to the public. In 41 I. C. C. 181, 44 I. C. C. 368, the Commission found that, owing to the special conditions surrounding the transportation of iron ore from the Lake Erie ports, the terminal or spotting service should be subject of a special charge as distinguished from the line haul service and other services involved in the transportation of iron ore. HELD: Original finding affirmed except as to exlake iron ores, reparation awarded. Carnegie Steel Co. v. Director General, 101 I. C. C. 638.

(c) Divisions and allowances accorded Christie & Eastern Ry., a common-carrier tap line, by trunk-line connections, out of joint rates on lumber and forest products, found not unjust, unreasonable, inequitable, or otherwise unlawful. The Christie originally connect-

ed with but a single trunk line at Sandel but by extending its service under trackage rights additional outlets were established at Lecompte and Long Leaf, HELD: Hauling traffic through Long Leaf or Lecompte, instead of to less distant connection at Sandel, is an unnecessary and uneconomic service and not in the public interest. Service, as extended, falls under the ban of inefficiency, since it entails burden of expense, voluntarily assumed which can not be overcome by increase volume of traffic. Moreover, such unnecessary expense should not be offset by depleting revenues of trunk-line connections. Christie & Eastern Ry. v. K. C. S., 93 I. C. C. 675.

§9. Right to allowances.

See Allowances; Common Carrier; Divisions §6.

(a) Findings in original reports, 53 I. C. C. 656 and 58 I. C. C. 450, that divisions of joint rates on lumber and forest products accruing to tap lines under orders in the Tap Line Case, 31 I. C. C. 490, must be measured by distance to the junction with the trunk line over direct route of movement toward final destination, rather than by out-of-line movements involving wasteful transportation, affirmed. Wasteful Service by Tap Lines, 89 I. C. C. 327.

III. THROUGH ROUTES AND JOINT RATES.

§10. Right in general.

See Common Carrier §7½; Through Routes and Joint Rates II.

(a) Complainant, Salina Northern Ry., alleged that its divisions of the interstate joint rates on traffic delivered to and received from defendants were unjust, unreasonable, inequitable and unduly prejudicial. Complainant extends from Salina, Kas., to Osborne, Kas., about 81 miles. It is operated independently and transports both freight and passengers. None of its equipment goes off its line. All cars for the transportation of freight to points off complainants line are furnished by the connecting carriers and payment therefor is made on the regular per diem basis. Salina Northern connects with Santa Fe and Rock Island at Salina, M. P., at Osborne, Kas., and U. P., at Lincoln Center, Kas. It is essentially an originating carrier. Joint rates are maintained with its connections. HELD, divisions of interstate joint rates not unjust, unreasonable, inequitable or otherwise unlawful, complaint dismissed. Salina Northern R. R. v. A. T. & S. F. Ry., 92 I. C. C. 475.

(b) Overruling Conf. Ruling 341, FOUND: That where a common carrier subject to the act performs an intermediate service in connection with traffic moving at joint rates, it should concur in such joint rates and receive divisions thereof, divisional arrangements to be so adjusted as to, in effect, result in absorption thereof by line that delivers traffic to carrier performing the intermediate service. Peoria & Pekin Union, 93 I. C. C. 3, 22.

IV. TARIFFS AND PUBLICATION.

See Tariffs II.

§12. Reparation.

See Reparation.

(a) In 88 I. C. C. 368 the Commission found rates charged on interstate shipments to and from complainant's plant on the Owasco Ry. at Auburn, N. Y., between April 12, 1915, and Jan. 8, 1921, as unreasonable to extent they exceeded the flat Auburn rates, and awarded reparation. Complainant introduced no rate comparisons. An award of reparation to complainant upon the ground of unreasonableness such as it sought would necessarily involve the conclusion that the line haul rates to and from Auburn were in each and every instance up to the limit of reasonable maximum rates and that the addition of the relatively small switching charges of the Owasco was sufficient, in every case to carry the rates over the line of maximum reasonableness by the exact amount of the switching charge. Such a conclusion is repugnant to common sense. HELD: Total charges not unreasonable, complaint dismissed. International Harvester Co. v. N. Y. C. R. R., 101 I. C. C. 89.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. **Jurisdiction of Commission.**

See Advanced Rates §1 (4); Common Carrier; Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Under the powers conferred by section 6 of the act the Commission has promulgated certain rules and regulations governing the form and construction of tariffs. Those rules require that rates be explicitly stated and arranged in a systematic manner. They do not require the publication of joint rates from and to all points. Wool rates investigation, 1923, 91 I. C. C. 235, 259.

(b) The haulage of a railroad company operating in this state of such slag, cinders, ashes, wastage, and the like is the service of a common carrier and the tariffs and charges therefor fall within the provisions of the Act of Congress to Regulate Commerce (U. S. Comp, St. §8563 et seq.), if the service be interstate or within the provisions of the Public Service Commission Act of this state, if the service be intrastate; and no compensation can be received by the carrier for such service other than that stated in its tariffs filed and published. Whitaker Glessner Co. v. Wheeling Terminal Ry. Co. (W. Va., 1925), 127 S. E. 639.

(c) Commission has frequently found that a shipper is chargeable with knowledge of the tariff rates. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113, 114.

(d) Rate on "Machinery, n. o. i. b. n.," assessed on portions of dismantled marine engines, billed as scrap iron, found applicable and not unreasonable. It was and is the practice of complainant to break similar parts into smaller pieces, but this was not done when these shipments moved. While there is no evidence to indicate whether or not commodities were sold for remelting purposes or were remelted, complainant's witness conceded that parts could be used in assembling other engines. The articles shipped were therefore not scraps or pieces of iron or steel having value for remelting purposes only. To come within that tariff description articles must not be shipped in their original form, but must be so reduced into fragments, scraps, or pieces as to be useless for any purpose other than remelting. It is nature of article shipped, not price at which it is sold or use to which it is put, which determines whether the rate on scrap iron applies. Simon v. S. Ry., 102 I. C. C. 325.

II. PUBLICATION.

§3. Effect in general.

(1) Adherence to Published Rate.

(a) The duly filed and published tariff rate, while it is in force, is the only lawful rate. Chicago, B. & O. R. Co. v. Merriman & Millard Co., 297 Fed. 1.

(b) A rate which is the clearly established rate must govern, though unjust. Davis, Director General of Railroads, v. Prairie Pipe Line Co., 298 Fed. 393.

(c) A carrier of freight can contract for no service not provided for in its tariff, and if it undertakes to do so the contract is unenforceable. Pennsylvania R. Co. v. S. M. Hamilton Coal Co. (Md. 1923) 125 Atl. 405.

(d) "Upon an interstate shipment the freight charges for the transportation of the goods are fixed by the schedule of rates and joint tariffs filed and posted in accordance with the act of Congress of June 29, 1906, known as the Hepburn act; and though a common carrier, by mistake or otherwise, delivers goods upon the payment of a lower rate than that stated in the schedules, the carrier may thereafter demand of the shipper the difference between the rate collected, and upon his refusal to pay may maintain an action therefor." Seaboard Air-Line Ry. v. Luke, 19 Ga. App. 100, 102, 90 S. E. 1041, 1042; Ga. R. v. Creety, 5 Ga. App. 424, 63 S. E. 528; Central of Ga. Ry. Co. v. O'Neill Mfg. Co., 19 Ga. App. 490, 91 S. E. 877. (a) "The fact that the rate was agreed on through mistake of one or both parties does not affect the operation of the rule requiring the established rate to be charged and paid, since both are bound to take notice of the filed tariff rates. Nor is it material whether the mistaken rate is fixed in the bill of lading or whether it was by parol agreement on a mistaken quotation of the rates made by the agent at the point of shipment." 10 C. J. 511, 512. (b) The carrier may collect freight charges from either the consignor or the consignee, in the absence of a special contract binding itself to collect such charges from one of them only. Southern Cotton Oil Co. v. So. Railway Co., 147 Ga. 646, 647, 95 S. E. 251; Id., 19 Ga. App. 453, 91 S. E. 876; Seabard Air-Line Ry. Co. v. Montgomery, 28 Ga. App. 639 (1), 112 S. E. 652. Western & A. R. R. v. Legg (Ga. 1924), 123 S. E. 31.

(efg) The published tariff rates must be charged and paid regardless of whether they are otherwise lawful or not; and an unlawful rate may subject the carrier to the payment of penalties to the Government, but its charging by the carrier does not give the shipper any right save to recover the full amount of damage sustained in consequence of any such violation of the provisions of the act. Pacific Adjustment Co. v. Director General, 93 I. C. C. 50, 51.

(h) Under the act the rate of the carrier duly filed is the only lawful charge. Deviation from it is not permitted upon any pretext. Shippers and travelers are charged with notice of it, and they as well as the carrier must abide by it, unless it is found by the Commission to be unreasonable. Ignorance and misquotation of rates is not an excuse for paying or charging either less or more than the rate filed. This rule is undeniably strict and it obviously may work hardship in some cases, but it embodies the policy which has been adopted by Congress in the regulation of interstate commerce in order to prevent unjust discrimination. American Licorice Co. v. C. M. & St. P. Ry., 95 I. C. C. 525, 527.

(i) Under Interstate Commerce Act and its amendments (Comp. St. § 8563 et seq.), train transportation embraces all services in connection with the shipment, including storage of goods after arrival at destination, and every common carrier subject to the act is required in its tariffs to state separately demurrage and other terminal charges and to adhere thereto, as to other parts of its tariff

schedule. Turner, Dennis & Lowry Lumber Co. v. Chicago, M. & St. P. Ry. Co., 2 Fed. 291.

(j) The published tariff schedule of an interstate carrier is due notice of its terms to all shippers. Turner, Dennis & Lowry Lumber Co. v. Chicago, M. & St. P. Ry. Co., 2 Fed. 291.

(k) Lawful rate on an interstate shipment, as established by rates and schedules filed by carrier, must be collected. American Ry. Express Co. v. Mohawk Dairy Co. (Mass. 1924) 144 N. E. 721.

(l) A carrier cannot depart to any extent from its published schedule of rates for interstate transportation on file, without incurring penalties of act of Congress. Missouri Pac. R. Co. v. Pfieffer Stone Co. (Ark. 1924) 266 S. W. 82.

(m) Shippers are governed by applicable tariffs and have no direct concern with fact of a change in ownership or control of particular carriers. General Petroleum Corp. v. C. B. & Q., 91 I. C. C. 388.

(n) With respect to interstate shipments, rates established according to law may not, by importunity, mistake, or otherwise, be changed for advantage of individual shippers, nor may any special advantage or discrimination be secured by contract or otherwise. Louisville & N. R. Co. v. A. H. Cleaver & Co., (Ala., 1924) 101 So. 597. (State shipment.)

(o) Misquotation of rates by a carrier does not in any way change the application of rates or relieve carrier of responsibility for collection of rates legally applicable. Randolph Furniture Works v. E. R. R., 92 I. C. C. 245.

(p) Carriers are obliged to collect and shippers to pay the legally published charges, and it is not within the commission's purview to pass upon the question of liability of consignors or consignees therefor. See Conf. Ruling 314; Wilson case 50 I. C. C. 571, and American Smelting & Refining Co., 62 I. C. C. 583, 589. Wuille & Co. v. M. H. R. R., 92 I. C. C. 299.

(q) Parties to interstate shipment cannot by agreement alter schedule of tariffs filed with and approved by Interstate Commerce Commission under Hepburn Act June 29, 1906, §2(pars. 1, 7 (U. S. Comp. St. § 8569, pars. 1, 7), amending Interstate Commerce Act, §6, pars. 1, 7, and Federal Control Act March 21, 1918, §10 (U. S. Comp. St. Ann. Supp. 1919, § 3115¾j), though agreement is in writing and is performed, and collection of less than schedule rate will not prevent recovery of shortage. Davis v. Keystone Steel & Wire Co. (Ill., 1925), 148 N. E. 47.

(r) No contract of carrier can reduce amount of freight on an interstate shipment legally payable, or release from liability a shipper who had assumed an obligation to pay such charges, and no act or omission of carrier, except allowing statute of limitations to run, will estop or preclude it from enforcing payment of full amount. Louisville & N. R. Co. v. Central Iron & Coal Co., 44 Sup. Ct. 441.

(s) A carrier cannot depart to any extent from its published schedule of rates for interstate transportation on file, without incurring penalties of act of Congress. Missouri Pac. R. Co. v. Pfeiffer Stone Co. (Ark., 1924), 266 S. W. 82.

(t) The commission is inclined to view with favor any steps which may be taken by carriers to simplify the present system of publishing rates from Southwestern territory to the east, with the important qualification, however, that the resulting rates must be reasonable. Butter, Eggs, Dairy Products, and Poultry, 96 I. C. C. 19, 29.

(u) Defendants' agents were by law charged with knowledge of the rates sought on the dates of shipment as well as subsequent to commission's decisions, for the combination rule was lawfully published and, until canceled, was binding. Crowell Lumber & Grain Co. v. Director General, 96 I. C. C. 259, 261.

(v) No charges were legally assessable on and after February 15, 1919, the defendant having no published charges applicable to complainant's shipments. Humphrey's Co. v. Director General, 96 I. C. C. 317, 318.

(w) A rule relating to the performance of a transportation service under published tariffs was part of the tariff and could not be waived. Dill Crossett, Inc. v. Director General, 104 I. C. C. 48, 49.

ALL OTHER CITATIONS

Republic Coal Co. v. C. St. P. M. & O. Ry. Co., 85 I. C. C. 331; Royall & Borden Mfg. Co. v. A. C. L. R. R. Co., 85 I. C. C. 715; Slogo Coal Corp. v. M. P. R. R. Co., 88 I. C. C. 111.

§3. (2) Erroneous quotation or publication.

See Erroneous Rates; Passenger Fares and Facilities §15.

(a) The publication of a tariff provision through error does not justify a carrier's failure to comply with its requirements. Miles Lumber Co. v. C. B. & Q. R. R., 89 I. C. C. 761, 763.

(b) Notwithstanding the fact that the defendant misquoted the rate to complainant, it was not obligated to turn the shipment over to another line at point of origin and forego the haul thereon. Mrs. Pattie Newsom v. M. & O. R. R., 91 I. C. C. 68, 70.

(c) Complainant contended the rates attacked were in violation of section 6 and were not lawfully published. This contention is based upon the fact that defendants failed to indicate a change in the arbitrary when it was increased. This omission did not render the rate unlawful. Package Sales Corporation v. U. P. R. R., 91 I. C. C. 697, 698.

(d) Erroneous publication of rates does not justify a departure therefrom and the intention of the framers is not controlling. Murray-Egan-McLeod Co. v. Pennsylvania R. R., 93 I. C. C. 79, 80.

(e) Under federal statute prohibiting discrimination in freight rates, no agreement between shippers and carriers or mistake or negligence by carriers in representing or collecting their freight charges can defeat their right and duty to collect published rates. New York Cent. R. Co. v. Sharp, 206 N. Y. S. 755.

(f) Misquotation of rates by carriers does not in any way change the application of rates or relieve carriers of responsibility for the collection of rates legally applicable. Randolph Furniture Works v. E. R. R., 92 I. C. C. 245.

§3. (3) Notice to Shipper.

See Notice; Released Rates §3½; Reparation §8.

(a) A law requires carriers to publish and post tariffs on the theory that they will be informative. A shipper is chargeable with knowledge of the tariff rates. Western Sugar Refinery v. S. P. Co., 101 I. C. C. 113, 114.

(b) The consignee of merchandise in interstate shipments is chargeable with knowledge of the amount chargeable in accordance with the tariff schedules on file from point of shipment to point of delivery, but is not chargeable as a matter of law with knowledge that the same merchandise has been prior to the purchase shipped from place to place by different carriers for different shippers, and is not chargeable as a matter of law with knowledge that the car containing the same has been kept out of service at intermediate points, resulting in demurrage charges. Cleveland C. C. & St. L. Ry. Co. v. McKenzie Lumber Co. (Ohio, 1925), 147 N. E. 8.

ALL OTHER CITATIONS

St. Louis Fruit & Vegetable Dealers v. W. Ry. Co., 85 I. C. C. 496.

§4. Necessity of publication.

See Allowances §4, II; Common Carrier §4; Demurrage §11; Divisions §2; Facilities and Privileges §17; Reconsignment §4; Refrigeration §5; Water Carriers III.

(a) In rule 4 h of tariff circular 18 A containing rules governing the construction and filing of tariffs, it is provided that all rules and regulations which in any way affect the rates shall be stated in the same tariff with the rates, or if contained in another tariff shall be made a part of the rate tariff by specific reference. The reason for such requirement is obvious. Any practice which would permit of rates being changed by the use of rules not referred to in connection with the rates themselves must of necessity tend to create the very discrimination, prejudice, and preference which the Act was designed to prohibit and make unlawful. Mason By Products Co. v. Director General, 92 I. C. 646, 648.

(b) Combination of local rates found applicable on shipment stopped in transit to finish loading, no tariff authority existing for such a stop. Mississippi Pearl Button Co. v. A., T. & S. F. Ry. Co., 98 I. C. C. 560, 563.

(c) The only requirement placed on carriers by the law respecting tariffs or changes therein is the filing and posting of same in the way specified, without requiring them to notify or advise shippers of such changes. However, there were no changes which would affect the situation here involved, as contended by complainant. Haas & Co. v. Director General 98 I. C. C. 619, 622, 623.

III. POSTING.

See Cars and Car Supply §40; Crimes §10, §22; Reparation §9.

§6. In General.

(ab) Section 6 of the Act requires that charges for services subject to the Act be filed with Commission, which requirement Commission has always construed as making necessary the statement in tariffs of such charges separately from other charges not subject to the Act. Motor-Truck or Wagon Transfer Service, 91 I. C. C. 539, 549.

(c) Contention that increased rates were in violation of section 6 of the Act and not lawfully published because tariff reissue publishing such increases failed to indicate that a change had been made in rate. HELD: Such omission did not render published rate unlawful. National Preservers & Fruit Products Asso., 74 I. C. C. 179, 182. Package Sales Corp. v. U .P. R. Co., 91 I. C. C. 697, 698.

(d) Where special permission is granted carriers to establish rates upon less than statutory notice, such permission has no effect upon rates until they have been published and filed in accordance with requirements of the act. Oklahoma Portland Cement Co. v. A., T. & S. F., 93 I. C. C. 203, 204.

(e) The only requirement placed on carriers by the law respecting tariffs or changes therein is the filing and posting of same in the way specified, without requiring them to notify or advise shippers of such changes. However, there were no changes which would affect the situation here involved, as contended by complainant. Haas & Co. v. Director General 98 I. C. C. 619, 622, 623.

(f) The sixth section of the act now requires, among other things, that common carriers subject to the act shall file with this commission and print and keep open to public inspection schedules which shall state separately all terminal charges, storage charges, icing charges, etc. National Livestock Exchange v. A. T. & S. F. Ry. 107 I. C. C. 512, 521.

IV. CONSTRUCTION.

§7. In general.

See Supra II; Advanced Rates §8½a, §9½, §24; Allowances §8 (5) (o); Bills of Lading §2½ (b); Classification §17, §20. §22, §24; Commodity Rates I, II, §3; Courts V; Differentials III; Express Companies X, §13; Facilities and Privileges §17½, §18, §19; Long and Short Hauls §16; Pipe Lines III; Proportional Rates I (i); Reconsignment §5; Refrigeration §6; Reparation §8; Storage III; Tap Lines IV; Through Routes and Joint Rates §18, §21, V; Track Storage III; Water Carriers III; Weights and Weighing VI.

(a) Words of a tariff must be construed in their ordinary sense, and where the meaning, so construed, is clear it must govern. Flanley Grain Co. v. Director General, 89 I. C. C. 33, 36.

(b) Rates on "Feed, prepared stock, poultry or pigeon, not medicated or condimental," found applicable on condensed buttermilk. Article shipped was intended for and used as animal food which appears to be its only use. Process of production does not involve medication or addition of condiments and thus comes clearly within description of prepared stock feed, "not medicated or condimental." Moreover, if carrier desired to except it from other prepared stock foods it could have done so by enumerating commodities intended to be covered by the item, or by specific exclusion. Specific class B rating on condensed buttermilk found inapplicable and refund of overcharges directed. Consolidated Products Co. v. C., B. & Q. R. R. Co., 89 I. C. C. 103.

(c) Commodity tariffs must be read in the light of the governing classification. Grosjean Rice Milling Co. v. Director General, 89 I. C. C. 395, 396.

(d) The reduction of the property to complainants possession was a condition precedent to the lawful application of the combination to the shipments. Complainants contention is that it intended to take possession of the shipments, and sent an agent with a check for that purpose. Mere intention can not be allowed to control in cases of this character. What was actually done must govern. Stetson Cutler & Company v. N. Y. N. H. & H. R. R., 91 I. C. C. 3, 5.

(e) Complainant presented a question of tariff interpretation in connection with less carload shipments of canned goods from Kansas City, Mo., to destinations in Kansas during 1920 and 1921 over the M. P. Some were charged second class and some third class, a commodity basis being subsequently established. Defendants tariff provided less carload commodity rates on canned goods, includ-

ing those of the character here considered, and referred in connection therewith to item 155 which provided: Where this item is referred to: Canned goods rates apply on the following articles carload, also less than carload when packed as required in Western Classification as taking fourth class rates. The western classification did not provide for fourth class rates on any of the articles shipped and complainant conceded that the commodity rates are not made applicable by item 155. HELD, proper basis applicable second and third class, complaint dismissed. Ridenour Baker Grocery Co. v. M. P. R. R., 91 I. C. C. 739.

(f) Shippers are justified in relying upon the published rates, and if the intention of defendants may not fairly be gathered from the tariffs themselves, the familiar rule that the intention of the tariff framers is not controlling must be applied. Nashville Traffic Bureau v. Director General, 92 I. C. C. 211, 214.

(g) When question is raised concerning the proper construction of carriers tariffs, the rule of fair and reasonable construction applied. Nashville Traffic Bureau v. Director General, 92 I. C. C. 211, 214.

(h) Oral representations of a carrier do not in any way change the application of rates or relieve the carrier of responsibility for the collection of such rates. Randolph Furniture Works v. E. R. R. 92 I. C. C. 245, 246.

(i) Rates on the same commodity between the same points via the same route should not be included in different tariffs at the same time. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311, 314.

(j) The construction of a freight tariff is a question of law, but the relation of tariffs to one another in a common territory is not entirely a question of law, but more in the nature of a mixed question of law and fact. Davis, Director General of Railroads v. Prairie Pipe Line Co., 298 Fed. 393.

(k) While freight tariffs should be construed according to plain import or language employed, particular phrases or sentences in tariff sheet must be considered in connection with subject-matter and circumstances to which language refers, such as footnotes or other extraneous matters, technical terms must be given their full meaning and effect. Jeremy Fuel & Grain Co. v. Public Utilities Commission (Utah 1924) 226 P. 456.

(lmn) The law imposes upon shippers the duty of ascertaining the rates and conditions under which they ship, and noncompliance by a shipper with tariff rules affords no basis for a finding that the rate legally applicable is unreasonable or unjustly discriminatory. American Licorice Co. v. C. M. & St. P. Ry., 95 I. C. C. 525, 527.

(o) In the determination of a tariff question the intentions of the carrier publishing the tariffs can not control. The Commission can look only to the wording of the specific tariffs under which the shipments moved. Des Moines Saw Mill Co. v. Director General, 96 I. C. C. 557, 560.

(pqr) In interest of simplicity of tariffs, it has been Commission's practice to discourage publication in tariffs of matter other than necessary to comply with the Act and Commission's regulations. However, in view of circumstances of instant case surrounding motor-truck service in connection with water and rail transportation, permission granted carriers to include in their tariff charges of motor trucks for service from inland points of origin, such charges to be published separately from charges subject to the Act; also to include combined charges for the two services from such inland points to ultimate destinations, motor-truck charges and combined charges to be clearly shown as being published for information only. Motor-Truck or Wagon Transfer Service, 91 I. C. C. 539, 540, 549.

(st) Tariff provisions which are ambiguous and contradictory will be construed in favor of shipper. Caddo Central Oil & Rfg. Corp. v. Director General, General, 92 I. C. C. 627, 631.

(u) Tariff provision that a certain charge applies "from" or "to" a given point is more specific than a provision applying "between" two points. Caddo Central Oil & Rfg. Corp. v. Director General, 92 I. C. C. 627.

(v) Tariffs must be construed strictly in accordance with their printed langauge, and intention of framers is not controlling. Caddo Central Oil & Rfg. Corp. v. Director General, 92 I. C. C. 627, 631.

(w) Shippers are justified in relying upon published rates, and if intention of carriers may not fairly be gathered from tariffs themselves, the familiar rule that intention of tariff framers is not

controlling must be applied. However, when question is raised concerning proper construction of tariffs, the rule of fair and reasonable construction applies. Raymond Hadley Corp., 174 N. Y. Supp. 342. Nashville Traffic Bureau v. Director General, 92 I. C. C. 211, 214.

(xy) Requirement of rule 4 (h) of Tariff Circular 18-A, which provides that all rules and regulations which in any way effect rates shall be stated in same tariff with the rates, or if contained in another tariff shall be made a part of the rate tariff by specific reference "Governed by rules and regulations shown in — I. C. C. No. —," was designed to obviate rate changes by use of rules not referred to in connection with rates themselves, a practice which must of necessity tend to create the very discrimination, prejudice, and preference which the act was designed to prohibit and make unlawful. Mason By-Products Co. v. Director General, 92 I. C. C. 646, 648.

(z) Tariffs are to be construed according to their language and intention of framers is entitled to little, if any, consideration. Smokeless Fuel Co. v. Chesapeake & O. Ry. Co. (Va., 1925), 128 S. E. 624.

(aa) In case of doubt, language of tariff is to be construed most strongly against carrier. Smokeless Fuel Co. v. Chesapeake & O. Ry. Co., (Va., 1925), 128 S. E. 624.

(bb) Nontechnical words of a written tariff are to be given their ordinary significations, and instrument is to be read as a whole, and apparent inconsistences should, if possible, be reconciled. Smokeless Fuel Co. v. Chesapeake & O. Ry. Co., (Va., 1925), 128 S. E. 624.

(cc) In ascertaining meaning of language of tariff, object sought to be accomplished is to be considered, and, if language is fairly susceptible of reasonably plain meaning, that construction should be put thereon. Smokeless Fuel Co. v. Chesapeake & O. Ry. Co., (Va., 1925), 128 S. E. 624.

(dd) Interstate Commerce Commission Tariff 8645, rule 3 (b), cl. 4, read as a whole, HELD: Not to provide that the dumping of a substituted car of coal into a ship operates to release, not only that car, but also the one for which it was substituted. Smokeless Fuel Co. v. Chesapeake & O. Ry. Co., (Va., 1925), 128 S. E. 624.

(ee) Erroneous publication of rates does not justify a departure therefrom and intention of framers is not controlling. Murray-Egan-McLeod Co. v. P. R. R., 93 I. C. C. 79, 80.

(ff) Where special permission is granted carriers to establish rates upon less than statutory notice, such permission has no effect upon rates until they have been published and filed in accordance with requirements of the act. Oklahoma Portland Cement Co. v. A., T. & S. F., 93 I. C. C. 203, 204.

(gg) Under the law as it now stands carriers are under no obligation to make their terminal charges with a view to insuring a profit upon operations of other public terminals. Nor does it seem to the commission to have been contemplated that the expressed policy of Congress of developing public terminals at port cities is to be carried out by imposing unnecessary expenses upon shippers and traffic, which would defeat a policy of real terminal improvement. Handling Charges on Cement, Fertilizer, and Salt, 93 I. C. C. 640, 644.

(hh) Tariffs are construed according to their language, and intention of framers is not controlling. Boldt Co., 42 I. C. C. 308, 310; Southern Veneer Asso., 62 I. C. C. 669, 674. United Cycle & Supply Co. v. B. & O., 93 I. C. C. 689, 690.

(ii) A tariff is construed according to its terms, whatever may have been intention of compilers, and conflict or ambiguity is resolved against compilers. Cosden Oil & Gas Co. v. A., T. & S. F., 95 I. C. C. 116, 118.

(jj) Irrespective of intentions of framers, tariffs will be construed according to their language. If it is carriers' intention to limit rates so as to exclude specific commodities they should do so in clear and unequivocal language. Louisiana Red Cypress Co. v. M. L. & T. R. R. & S. S. Co., 95 I. C. C. 159, 160.

(kk) The subsequent establishment of a commodity rate has effect of removing the article covered thereby from the classification and class-rate tariffs which theretofore applied. Rule 7 (a) of Tariff Circular 18-A. Furthermore, under rule 8 (a) of that tariff circular, it is not a condition precedent to application of such a commodity rate that tariff containing it make cross reference to tariff in which class rates are named. Singer v. L. S. F., 95 I. C. C. 667, 668.

(ll) Under complainant's construction of tariffs, "handling incidental to storage" and "handling to and from ship side" would be synonymous, making the tariff contradictory in its terms. Such construction should not be placed upon it, unless clearly required by the tariff itself. New Orleans Export Co. v. I. C. R. R. Co., 96 I. C. C. 509.

(mm) In the determination of a tariff question the intentions of carrier publishing the tariffs can not control; neither can the action taken by the director general on other shipments which moved during Federal control under rates contained in other tariffs. We can look only to the wording of the specific tariffs under which the shipments moved. Des Moines Saw Mill Co. v. Director General, 96 I. C. C. 557.

(nn) In the determination of a tariff question the intentions of the carrier publishing the tariffs can not control; neither can the action taken by the director general on other shipments which moved during Federal control under rates contained in other tariffs. Des Moines Saw Mill Co. v. Director General, 96 I. C. C. 557, 560.

(oo) While doubts as to the meaning of tariff must be resolved in favor of the shipper and against the carrier which compiled it, the doubt must be a reasonable one. In interpreting a tariff the terms used must be taken in the sense in which they are generally understood and accepted commercially, and neither carrier nor shippers can be permitted to urge for their own purposes a strained and unnatural construction. Armstrong Mfg. Co. v. A. & R. Ry Co., 96 I. C. C. 595, 599.

(pp) Commission has uniformly found that tariffs must be constructed strictly according to their language, and the intention of the framers is not controlling. Chapin-Sacks Corp. v. P. R. R. Co., 96 I. C. C. 706, 707.

(qq) Shipment of steel rivets from Vancouver, Wash., to Portland, Oreg., found not scrap steel within meaning of the tariffs, and not entitled to prevailing lower rates on that commodity. Complaint dismissed. Alaska Junk Co. v. S. P. & S. Ry. Co., 98 I. C. C. 551.

(rr) Commodity tariffs must be strictly construed. Milne Chair Co. v. A. C. L. R. R. 102 I. C. C. 165, 166.

(rra) Rule 6 of Tariff Circular 18-A provides that commodity rates must be specific, and that they must not be applied to analogous commodities. If a tariff should be filed naming commodity rates on "grain products," for example, the commission could require carriers to correct it by specifying a full list of articles to be included within that designation. A commodity rate on a specific article of transportation, stated definitely as so many cents per 100 pounds, is a specific commodity rate, notwithstanding the fact that the same rate is not repeated in the tariff in connection with each point of origin and each point of destination from and to which the rate is made to apply. Miller & Lux v. S. P., 102 I. C. C. 137, 139.

(rrb) Refusal of rail carriers to handle, at their own expense, import shipments of cork waste, in bales, from side of ships docked at Baltimore, Port Covington piers to cars on such piers, for transportation to Beaver Falls, Pa., found unlawful. Tariff specifically provided that rates will apply from ship's side when property is received from vessels docked at piers or from ship's side in stream, within lighterage limits, when ship is awaiting docking at piers. Fact that such provision was carried under heading "Handling of freight by lighter or float within lighterage limits" did not operate to restrict it to traffic involving floatage or lighterage, but was also applicable to traffic handled from ship to car in transfer of which no lighterage or floatage is involved. Reparation awarded. Armstrong Cork Co. v. W. M. Ry., 102 I. C. C. 713.

(ss) Tariffs must be read in strict accordance with their terms. Lewiston Elevator Co. v. C. G. W. R. R. 104 I. C. C. 473, 474.

(tt) The failure of defendants to publish their rates and charges in clear and unmistakable terms, as required by the tariff rules, may not be used as a cloak to defeat the claims of shippers. In construing doubtful and ambiguous tariffs, the Commission has always resolved the doubt against the party responsible for having such tariffs in effect. North Packing & Provision Co. v. Director General, 104 I. C. C. 607, 614.

(uu) The Commission has often held that in interpreting the tariff the terms must be taken in the sense in which they are generally understood and accepted commercially. Iron and steel articles, 104 I. C. C. 616, 621.

(vv) While doubts as to the meaning of a tariff must be resolved in favor of the shipper and against the carrier which compiled it, the doubt must be a reasonable one. In interpreting a tariff the terms used must be taken in the sense in which they are generally understood and neither carriers nor shippers can be permitted to urge for their own purposes a strained and unnatural construction. Roswell Auto Co. v. A. T. & S. F. Ry. 107 I. C. C. 555, 557.

(ww) When question is raised concerning the proper construction of carriers tariffs, the rule of fair and reasonable construction applies. Roswell Auto Co. v. A. T. & S. F. Ry. 107 I. C. C. 555, 558.

(xx) Upon contention of complainants that during Federal control the rule under section 2 (e) of General Order No. 28 of director general must govern all tariffs, and that as it limits the power to increase rates, the legality of the rates depends upon the observance of this condition, HELD: Legal rates must be determined by the words of the published tariffs themselves, rules or provisions of that order to the contrary notwithstanding. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 226.

(yy) The commission has uniformly found that carriers' tariffs must be construed strictly according to their language, and that the intention of the framers is not controlling. Further, that although doubts as to the meaning of a tariff must be resolved in favor of the shipper and against the carrier which compiled it, the doubt must be a reasonable one; and that in interpreting a tariff the terms used must be taken in the sense in which they are generally understood and accepted commercially, and neither carriers nor shippers can be permitted to urge for their own purposes a strained and unnatural construction. Forbes & Sons Piano Co. v. A. G. S. R. R., 101 I. C. C. 74, 76.

(zz) Tariffs are construed according to their language, and intention of framers is not controlling. See 42 I. C. C. 308; 62 I. C. C. 669. United Cycle Supply Co. v. B. & O., 101 I. C. C. 334, 335.

(3a) Tariffs must be strictly construed, and the commission may not read into a tariff rule something that would be favorable to a shipper's contention. Armour & Co. v. D., L. & W., 101 I. C. C. 337, 339.

(3b) Tariffs are to be construed strictly, and the intention of the framers is not controlling Doubt as to the meaning of a provision must be resolved in favor of the shipper. American Sand & Gravel Co. v. Director General, 109 I. C. C. 557, 559.

(3c) In case of ambiguity, the familiar rule of construction is that a tariff must be construed against the framer. Central Commercial Co. v. A. T. & S. F. Ry., 109 I. C. C. 639, 640.

(3d) Where there is doubt as to the meaning of a tariff provision the doubt should be resolved against the maker and in favor of the shipper. Wagner Electric Corp. v. Director General, 112 I. C. C. 57, 58.

ALL OTHER CITATIONS

Republic Coal Co. v. C. M. St. P. M. & O. Ry. Co., 85 I. C. C. 331; Mason City Brick & Tile Co. v. Director General, as Agent, 88 I. C. C. 37; Chicago Live Stock Exchange v. Director General, as Agent, 88 I. C. C. 202; Furnishing Ice and Salt, 88 I. C. C. 361; Barrett Co. v. Director General, as Agent, 88 I. C. C. 535.

§8. **Ambiguity.**

(a) The Commission has consistently held that, irrespective of the intentions of their framers, tariffs will be construed according to their language. Any ambiguity or uncertainty in a tariff will be resolved against its makers. Louisiana Red Cypress Co. v. M. L. & T. R. R., 95 I. C. C. 159, 160.

(b) It is well settled that ambiguity in tariffs must be resolved in favor of the shipper. Transit on Hogs, 98 I. C. C. 153, 154.

(c) Tariff provisions which are ambiguous and contradictory will be construed in favor of shipper. Caddo Central Oil & Rfg. Corp. v. Director General, 92 I. C. C. 627, 631.

(d) As between inconsistent or conflicting tariff provisions force and effect must be given to those provisions which result in lowest charge to shipper. Cadda Central Oil & Rfg. Corp. v. Director General, 92 I. C. C. 627, 631.

(e) A tariff is construed according to its terms, whatever may have been intention of compilers, and conflict or ambiguity is resolved against compilers. Cosden Oil & Gas Co. v. A., T. & S. F., 95 I. C. C. 116, 118.

(f) It is a familiar rule of construction that ambiguities in a tariff must be resolved against the maker. Williams Co. v. C. N. E. Ry., 112 I. C. C. 158, 159.

ALL OTHER CITATIONS

North American Oil & Refining Co. v. Director General, as Agent, 85 I. C. C. 697.

§8½. Amendments and Supplements.

ALL CITATIONS

North American Oil & Refining Co. v. Director General, as Agent, 85 I. C. C. 697.

§9. Cancellation.

(a) Upon contention of complainants that commodity rates in effect when shipments moved were not legally published, in that the tariff did not show proper cancellation of the previous issues, and therefore no through commodity rates were established, leaving the class rates to apply, FOUND: Tariff carrying the rates charged states on its title-page "cancels I. C. C. No. 166," and this is sufficient to constitute cancellation of that tariff in full, notwithstanding an item on another page under the heading "Cancellation" which explains the reason of the noninclusion of rates from or to certain stations which theretofore had been named. Failure to comply with the requirements of the railroad administration that freight-rate authority shall be obtained for all changes in rates of carriers under Federal control does not invalidate the tariff. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 226.

§9a. Combination rule.

See Infra §13a.

(a) Where carriers under Federal control publish the so-called combination rule, which provides a method for constructing through rates made by use of combinations, and tariffs do not restrict its application to Federally controlled lines, there is a holding out to shippers of rate so constructed which publishing carriers must protect, and principle laid down in the Sligo case, 62 I. C. C., 643, 73 I. C. C. 555, applies. This situation is applicable to shipments moving to points on nonfederally controlled lines, even though such carriers do not concur in the rule or carry a similar rule in their tariffs, and is equally applicable to intrastate shipments moving during Federal control. McCloud River Lumber Co. v. Director General, as Agent, 89 I. C. C. 645, 647.

(b) Where one of the tariffs used in making combination rates on through shipments contained a rule known as a combination rule there was a holding out to the shipper of the rate so constructed which the carrier should protect. Romann & Bush Pig Iron & Coke Co. v. Director General, 92 I. C. C. 605, 606.

(c) Complainant attacked commodity combination rates charged on 10 cars of ground limestone, shipped during the period Sept. 13, 1921, to Oct. 24, 1921, from Barber, Va., to Greensboro, N. C., as in excess of the rate authorized by defendants tariffs. Shipments moved over C. & O. to Lynchburg, Va., and thence Southern to Greensboro. Factor of C. & O. to that point was $1.40 and a like factor applied over the Southern from Lynchburg to destination. As the tariff of the C. & O. in reality contains a rule which was not so specifically restricted as to render it inoperative in connection with this tariff, that carrier must protect the aggregate rate constructed on the basis of the rule. HELD: The Southern under its tariff, was entitled to retain charges based on its local rate of $1.40 per ton, but aggregate rate was $2.50 per ton and shipments overcharged, reparation awarded, complaint dismissed. Armour Fertilizer Works v. Southern Ry., 93 I. C. C. 186.

(d) Where the delivering carrier is the only line which publishes the equalizing clause and the tariffs of the other carrier participating in the movement do not publish the clause or refer to any other tariff which publishes such a rule, the Commission has ruled that, where one of the tariffs used in making combination rates on through shipments contains a rule that such rates will be subject to the increase but once, there is a holding out to the shipper of the rate so constructed, which the carrier should protect. California Cotton & Factorage Co. v. Director General, 93 I. C. C. 260, 261.

(e) If, in connection with one of the factors of a combination rate and not with the others, a carrier makes reference to the combination tariff there is a holding out to the shippers that the through rate constructed in accordance

with the combination tariff will be protected by that carrier. Combination Rule on Lumber, 93 I. C. C. 278, 280.

(f) Direct reference in the rate tariffs to a rule in the combination tariff in effect makes such a rule a part of the former just as definitely as though it was published therein. Combination Rule on Lumber, 93 I. C. C. 279, 280.

(fg) The publication in one of the tariffs used in making combination rates on through shipments, of a rule that such rates would be subject to a single increase was a holding out to the shipper of the rate so constructed which the publishing carrier must protect. Southern Products Co. v. Director General, 98 I. C. C. 462, 464.

(h) Complainant attacked combination rates charged on gasoline and other petroleum products, carloads, during federal control from Sugar Creek, Mo., and El Segundo, Calif., to Blythe, Calif., as in excess of applicable rates. Shipments moved over Santa Fe to Blythe Junction, Calif., and California Southern to Blythe, the latter carrier not being under federal control. The rates on petroleum throughout the country were increased 25% on June 25, 1918, and on July 11, 1918, a flat increase of 4.5c per 100 pounds was established over lines under federal control in lieu of the 25% increase. This 4.5c increase was established by the Santa Fe but not by the California Southern. Rates charged combination of local rates to and from Blythe Junction. The tariff of the Santa Fe carried a rule to the effect that the increase was to be paid but once. HELD: Rates applicable the combination basis plus 4.5c, reparation awarded. Standard Oil Co. v. Director General, 98 I. C. C. 587.

(i) Complainant attacked combination rate of 51.5c charged on five cars of gasoline shipped during March, April and May, 1923, from Tulsa, Okla., to Rochester, Ind., as in violation of section 6 to extent it exceeded 49c. Shipments were routed by shipper MV, MKT, C&A, and LEW, and Frisco, St. L. C. & A, L. E. W. In each case a rate of 49c was inserted by the shipper. The shipments moved as routed through Peoria, Ill. No joint through rates were in effect. The applicable rate in effect at the time the shipments moved was 50.5c, made up of a commodity rate from Tulsa to Chicago of 33.5c plus 17c beyond. This combination applied to the shipments in question under rule 5b of tariff circular 18A. HELD: Shipments overcharged to extent of 1c per 100 pounds, reparation awarded, complaint dismissed. Cosden Co. v. L. E. & W. Ry., 98 I. C. C. 597.

(j) No joint rates were in effect and shipments moved under a two-factor combination. Tariff of one participating carrier carried the combination rule which provided a method for constructing through rates made on combination, but did not specifically provide for its use in connection with first component of the through rate. Carrier publishing other factor made no reference to the rule nor carried a similar one in its tariff. Contention that above circumstances precluded application of the rule, and to find otherwise would contravene certain provisions of Tariff Circular 18-A, not sustained, following the Sligo case, 62 I. C. C. 643, and 73 I. C. C. 551. Minneapolis Steel & Machinery Co. v. Director General, 92 I. C. C. 603, 604. National Supply Co. v. Director General, 92 I. C. C. 610, 611.

(k) Shipments moved under combination rates. Tariff governing second component carried the combination rule which provided a method for constructing through rates made on combination. Tariff of originating carrier carried no similar rule, nor made reference to any tariff in which such rule was carried. HELD: There was a holding out to shipper of rates constructed in accordance with the rule which publishing carrier must protect. See Sligo case, 62 I. C. C. 643. Reparation awarded. California Cotton & Factorage Co. v. Director General, 93 I. C. C. 260.

(l) Direct reference in rate tariffs to the combination rule in a combination tariff in effect makes such a rule a part of the former just as definitely as though it were published therein, and principle announced in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is controlling. Combination rule on lumber, 93 I. C. C. 279, 280.

(m) Carriers stress fact that in several reports the commission has commented upon undesirability of the combination rule from a tariff standpoint, and refer to cooperation and suggestions of the Bureau of Traffic looking to the ultimate elimination of the combination

tariff. FOUND: Suggestions did not contemplate increase in rates, for which no sound justification is offered, by cancellation of the rule. Combination rule on lumber, 93 I. C. C. 279, 281.

(n) The commission has no desire to continue indefinitely operation of the so-called combination rule, but on contrary feels that carriers should use all due diligence in eliminating that rule from their tariffs as it is not a desirable method of publication or one which fully meets requirements of section 6 of the act. Cancellation rule for Combination rates, 93 I. C. C. 614, 615.

(o) The Commission has repeatedly held that the notation on a tariff in accordance with rule 77 is a substantial compliance with the fourth section requirements, and that a request for the publication of a rate under that rule prior to the movement of shipments is not essential in order that the shipper may take advantage of such provision. Liberty Cooperage & Lumber Co. v. Erie R. R. 107 I. C. C. 165, 166.

(p) Tariffs of originating line neither carried nor made reference to the so-called combination rule which provided a method for constructing through rates made on combination, while tariff of other participating carrier made reference thereto. There is no merit in contention that in order to apply this rule each tariff naming the factors of such combination rates should refer to tariff containing the rule. HELD: Principle laid down in Sligo case, 62 I. C. C. 551, is controlling, and rates charged were in excess of those applicable. Reparation awarded. Hardwick Stove Co. v. Sou. Ry. Co., 100 I. C. C. 409.

(q) Combination rate assessed on cork sheets or slabs without binder, from Camden, N. J., to El Centro and Brawley, Calif., found inapplicable. Joint rate alleged applicable was restricted by exception to exclude shipments passing enroute through points taking Group K, L, or M rates and complainant's shipments were therefore not entitled to the joint rate. They were, however, entitled to a lower combination based on St. Louis, applicable under rule 5 (b) of Tariff Circular 18-A. Refund of overcharges directed. Armstrong Cork & Insulation Co. v. Reading Co., 100 I. C. C. 468.

(qa) Shipments of printing paper from Lawrence, Mass., to Long Island City, N. Y., found overcharged. There were no joint through rates in effect and charges were collected on basis of combinations. However, lower combinations contemporaneously in effect could have applied and were legally applicable. Reparation awarded. Merrimac Paper Co. v. B. & M., 102 I. C. C. 133.

(qb) Upon contention of complainant that under Conference Ruling 239 had there been no joint through rate published a lower combination rate would have applied. FOUND: A rate can not be said to be unlawful because under a different state of facts a lower rate would have applied. Refiners Oil Co. v. P. R. R., 102 I. C. C. 249, 250.

(qc) Combination rates assessed on shipments moving from Edmonton and Patricia, Canada, to Chicago, Ill., found inapplicable. Tariff naming rates covering one factor of combination made reference to combination rule which provided a method for constructing through rates made on combination and, by express terms, limited application to continuous rail shipments. There being an original and continuing intention on part of shippers that cattle should move through to Chicago the doctrine of the Settle case, 260 U. S. 166 is controlling, and following principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, shipments were subject to rates made by application of combination rule. Reparation awarded. Chicago Live Stock Exchange v. Director General, 102 I. C. C. 452.

(r) Complainant attacked combination rates charged on four cars of lumber shipped during June and July 1924 from Pachuta, Miss., to Homestead, Meadville, Titusville and Mercer, Pa., as illegal. Shipments moved NO&NE, Meridian, Miss., AGS to Birmingham, Ala., L. & N., to Cincinnati, O., and either Pennsylvania or Erie beyond, combination being 29.5c to Cincinnati and 18.5c beyond, both rates being subject to the combination rule, or 44.5c, defendants collecting on full combination, 48c. HELD, applicable rate 44.5c, reparation awarded. Moore Marshall Lumber Co. v. N. O. & N. E. R. R., 112 I. C. C. 33.

(s) Complainant attacked combination rate applicable on three cars of ground limestone in June and Sept. 1924 from Sparta, Tenn., to Fairfield, Conn.,

as unreasonable and in violation of section four. Shipments moved over N. C. & St. L., to Nashville, Tenn., L. & N., to Cincinnati, O., Pennsylvania to New York and New Haven to destination, applicable rate $7.73 composed of $2.43 to Cincinnati and $5.30 beyond, one of the factors being subject to the combination rule. HELD, overcharges found, complaint dismissed. Thompson Weinman & Co. v. N. Y. N. H. & H. R. R., 112 I. C. C. 65.

(t) Complainant attacked combination rate charged on 29 cars of crushed limestone shipped from Rocky Point, Va., to Charleston, S. C., between Feb. 20 and Dec. 7, 1923 as unjust and unreasonable in violation of section 6. Shipments moved C. & O., to Lynchburg, Va. and Southern beyond, charged $2.90, composed of local rates of 92c to Lynchburg and $1.98 beyond. Complainant contends that by reason of deductions authorized under a combination rule the aggregate rate applicable was $2.60. HELD, rate of $2.60 was applicable, reparation awarded. Phosphate Products Corp. v. C. & O. R. R., 112 I. C. C. 161.

(u) The combination rule applies to combination rates over routes where no joint rates are applicable regardless of whether joint rates are maintained from and to the same points over other routes. Montgomery Cotton Exchange v. L. & N. R. R., 112 I. C. C. 325, 328.

§11. Conflict.

See Bills of Lading §9, §9 (2); Through Routes and Joint Rates §21, §22.

(a) Where a tariff names conflicting rates the lower or lowest of rates so published is the legal rate. Conference Ruling 239. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311, 312.

(b) Rule 13 (f) of Tariff Circular 18-A provides that "A carrier that grants authority to an agent or to another carrier to publish and file certain of its rates must not in its own publications publish rates that duplicate or conflict with those which are published by such authorized agent or other carriers." Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311, 312.

(c) A rate once lawfully established continues to be the legal rate until legally canceled. A subsequent tariff naming new rates without canceling previous rates can not carry new rates into lawful effect. Dewey Portland Cement Co., 56 I. C. C. 444. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311, 313.

(d) As between inconsistency of conflicting tariff provisions force and effect must be given to those provisions which result in lowest charges to shipper. Caddo Central Oil & Rfg. Co. v. Director General, 92 I. C. C. 627, 631.

(e) Requirement of rule 4 (s) of Tariff Circular 18-A, which provides that all rules and regulations which in any way affect rates shall be stated in same tariff with the rates, or if contained in another tariff shall be made a part of the rate tariff by specific reference 'Governed by rules and regulations shown in — I. C. C. No. —," was designed to obviate rate changes by use of rules not referred to in connection with rates themselves, a practice which must of necessity tend to create the very discrimination, prejudice, and preference which the act was designed to prohibit and make unlawful. Mason By-Product Co. v. Director General, 92 I. C. C. 646, 648.

(f) Where two designations and tariffs are equally appropriate, shippers are entitled to have applied the one specifying the lower rates. U. S. v. Gulf Refining Co., 45 Sup. Ct. 597.

(g) Where a commodity shipped is included in more than one tariff resignation, that which is more specific will be held applicable. U. S. v. Gulf Refining Co., 45 Sup. Ct. 597.

(h) In Conf. Rulings 50, 70, and 239, the commission has distinguished between conflicting provisions in the same and different tariffs. Walsh Fire Clay Products Co. v. Director General, 95 I. C. C. 439, 442.

(i) Rates collected on logs, moving during Federal control between points in the State of Iowa, which were based on the soft lump coal rates, found applicable. The tariffs named two rates on logs—namely, the soft lump coal rates and the lumber rates—and provided that the lower of the alternative rates be effective, which in this case were the rates on soft lump coal. Complaints dismissed. Des Moines Saw Mill Co. v. Director General, 96 I. C. C. 557.

(j) Where rates on an article are published in two separate tariffs and respondents propose to increase the rates in one to conform with those in the other, the commission finds that their tariffs should be made to conform to the provisions of Tariff Circular 18-A rela-

tive to duplication and conflict in the publication of rates. Brick from Nashville to Paducah, Ky., 101 I. C. C. 11.

(k) Where two tariffs in effect at same time conflict the one carrying the lowest charges applies. Armour & Co. v. D., L. & W., 101 I. C. C. 337, 340.

(ka) Applicable rate on a carload shipment of dried beans from Mills, N. Mex., to Rockdale, Tex., found to have been unreasonable to extent it exceeded lower contemporaneous rate on like traffic from and to same points over other available routes and to contiguous points, which lower rate was not made applicable to Rockdale over route of movement until subsequent to movement here involved through error on part of carriers. Reparation awarded. Waco Chamber of Commerce v. E. P. & S. W., 102 I. C. C. 105.

(kb) Second-class rates assessed on l. c. l. shipments of automobile crank-shaft counterbalance weights under classification description "iron or steel automobile parts, n. o. i. b. n.," found to have been illegal, in view of fact that at time of movement same classification provided l. c. l. rating of fourth class on "Weights: Counterbalance, iron or steel, n. o. i. b. n." Reparation awarded. Western Auto Supply Co. v. C., B. & Q., 102 I. C. C. 117.

(l) Complainant attacked commodity rates charged interstate from Grasselli, Ind., to Vincennes, Ind., between March 30 and Dec. 22, 1922, as unreasonable. Grasselli is on the I. H. B., in the Chicago switching district. Vincennes is on the C. & E. I., 52 miles north of Evansville, also on the B. & O., 10 miles east of Lawrenceville, Ill., routed by shipper I. H. B., to Dolton, Ill., and C. & E. I., beyond 235 miles, charged 21c prior to August 5, 1922 18.5c on Sept. 2, 1922 and 19c thereafter. During all of the period here considered another tariff of the C. & E. I., named rates on this traffic to Lawrenceville which, under the terms of an intermediate rule therein, applied to Vincennes. An examination of the tariff discloses that the Lawrenceville rate was first established on Nov. 1, 1912, whereas the Evansville rate was not established until May 23, 1918. HELD, applicable rates were 14.5c prior to July 1, 1922 and 13c from that date to August 15, 1922 and 13.5c thereafter, reparation awarded. Vincennes Refining Co. v. C. & E. I. R. R., 109 I. C. C. 25.

(m) The Commission has uniformly found that where conflicting rates between two points are named in different tariffs, the rate first established remains in effect and is the lawful rate until formally cancelled. Vincennes Refining Co. v. C. & E. I. R. R., 109 I. C. C. 25, 26.

(n) It is well settled that the intention of the tariff compilers is not controlling; and it is equally well settled that where a tariff contains conflicting provisions the one according the lowest rates or charges governs, and particularly when the rule producing the lower rates or charges was first in effect and has not legally been canceled. Schweitzer & Co. v. Director General, 109 I. C. C. 663, 666.

ALL OTHER CITATIONS

Parkersburg Rig & Reel Co. v. Director General, as Agent, 85 I. C. C. 665.

§11½. Description.

(a) Absorption-process gasoline of a vapor pressure at 100 degree F. not exceeding 10 pounds per square inch must be described in tariffs as gasoline or casing-head gasoline. Standard Oil Co. v. Director General, as Agent, 89 I. C. C. 7, 9.

(b) Iron or steel articles which have a recognized commercial value other than that of the elementary article from which they are manufactured are not properly described as scrap iron. Continental File Co. v. P. C. C. & St. L. Ry., 93 I. C. C. 373, 375.

(c) Rates on scrap steel generally are understood to a apply on scraps or pieces of steel useful only for remelting. The words "value for remelting purposes only" defines the nature of the article, and they do not make the rate applied dependent on its use. Steel articles which have a recognized commercial value other than that of the elementary metal from which they are manufactured do not properly come within the description scrap steel. Alaska Junk Co. v. S. P. & S. Ry., 98 I. C. C. 551, 552.

(d) It is an elementary rule of tariff interpretation that in the absence of ambiguity, a general tariff description of a commodity does not take precedence over a specific commodity description. Abilene Flour Mills Co. v. A. & S. Ry., 101 I. C. C. 14, 16.

(e) Rates on bar iron or steel charged on shipments of rectangular wire rods, in coils, found inapplicable. Such commodity found to fall within tariff description carrying lower rates on "Rods, wire, rivet and bolt, iron or steel, in coils (not in straight lengths) * * *." Reparation awarded. Clark Bros. Bolt Co. v. N. Y. C., 102 I. C. C. 355.

§12. Cross references.

(a) Direct reference in rate tariffs to the combination rule in a combination tariff in effect makes such rule a part of the former just as definitely as though it were published therein, and principle announced in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is controlling. Combination Rule on Lumber, 93 I. C. C. 279, 280.

(b) Commodity rates higher than class rates charged on strawberries from Sarcoxie, Mo., to Kansas City, Mo., via an interstate route, found applicable. While carrier's individual tariff provided class rates on strawberries by not including them in its list of articles taking commodity rates, the subsequent establishment of a commodity rate had effect of removing that article from the classification and class-rate tariffs which theretofore applied. Furthermore, it is not a condition precedent to application of such a commodity rate that tariff containing it make cross-reference to tariff in which class rates are named. The general index to carrier's tariffs contained a reference that commodity rates on fruits and vegetables, including strawberries, were to be found in the tariff under which rates were assessed, and this was a sufficient compliance with rule 4 (c) of Tariff Circular 18-A. Singer v. St. L.-S. F., 95 I. C. C. 667.

(c) Purpose of rule 4 (c) of Tariff Circular 18-A is to require a carrier, in publishing a tariff which on its face purports to cover all commodities, to make cross-reference to other tariffs which contain exceptions to general application of the tariff when published. Singer v. St. L.-S. F., 95 I. C. C. 667, 668.

(d) Tariffs of originating lines neither carried nor made reference to the so-called combination rule, which provided a method for constructing through rates made on combination. Tariffs of other participating carriers either carried the rule or made specific reference thereto. The rule, however, restricted its use to lines under Federal control, and since originating carriers were nonfederally controlled, the rule laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, that there is a holding out to shipper of the rate constructed in conformity with the rule which publishing carrier must protect, is not controlling. Combinations, both factors of which were increased under General Order No. 28 of the director general, found to have been legally assessed. Pendleton & Gilkey v. Director General, 95 I. C. C. 699.

(e) Tariffs of originating lines neither carried nor made reference to the so-called combination rule, which provided a method for constructing through rates made on combination. Tariffs of other participating carriers either carried the rule or made specific reference thereto. Contention that specific reference to the rule must be made in each tariff naming a factor of a combination found untenable following Armour Fertilizer Works, 93 I. C. C. 186. The rule laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, that there is a holding out to shipper of the rate constructed in conformity with the rule which publishing carrier must protect, is controlling. Pendleton & Gilkey v. Director General, 95 I. C. C. 699.

(f) Contention of complainant that rate assessed was unlawful because tariff did not refer to the application covering the fourth-section departure involved not sustained. A reference to fourth-section applications is not necessary, although the regulations of the commission require that where a tariff carries rates which depart from the provisions of the fourth section under authority of commission's order a reference shall be made to the order on the title-page of the tariff. West End Scrap Iron & Metal Co. v. C., St. P., M. & O., 101 I. C. C. 108, 109.

(g) If a tariff contains a reference to another tariff providing rules for constructing through rates made on combination, and the application of such rules will produce lower rates, the lower rates are legally applicable. Macgillis & Gibbs Co. v. L. E. & W., 102 I. C. C. 333.

(h) Combination rate charged on cedar posts from Starks, Minn., to Deer Creek, Ill., found inapplicable. Tariff naming rate assessed contained reference to another tariff which provided rules for constructing combination rates and application of those rules produced

a lower rate. Refund directed. Macgillis & Gibbs Co. v. L. E. & W., 102 I. C. C. 333.

§13. Index.

See Commodity Rates §3 (1) (a); Tariffs, §18 (3k).

(a) Statements on title-pages of tariffs which are general in nature should not be given narrow construction as to defeat specific provision contained in bodies of the issues. Armour Fertilizer Works v. S. Ry., 93 I. C. C. 186, 187.

(b) Rate charged on shipments of sand and gravel from Scottsville, N. Y., to Kodak Park Siding, which is within the general switching limits of Rochester, N. Y., found applicable. A lower rate was published to Rochester and certain specific stations in Rochester, all named in tariff index, but this enumeration of stations obviously excluded the application of the lower rate to Kodak Park Siding, which was not named therein. Eastman Kodak Co. v. Director General, 101 I. C. C. 103.

§13a. Intermediate Rule.

See Supra §9a; Claims §3 (1) (a).

(a) Shipments of lumber from Falco, Ala., to Manitou Beach and Northville, Mich., found overcharged. While shipments moved via direct routes a lower rate, applicable under Rule 5 (b) of Tariff Circular 18-A and unrestricted in its application, was contemporaneously in effect via a circuitous route. If carriers participating in tariff carrying the lower rate desired to restrict its use over certain routes they should have done so by the use of proper tariff notations. A failure to do so left all routes open, should shippers desire to use them. Reparation awarded. M'Gowin-Foshee Lbr. Co. v. A., F. & G., 95 I. C. C. 451.

(b) Class rates on spelter from Trenton, N. J., to Baltimore, and Sparrow's Point, Md., Weir Branch, Cambridge, Boston, and Worcester, Mass., Providence, R. I., and Stamford, Springdale, Cheshire, Bridgeport, and Waterville, Conn., found not to have been unjustly discriminatory or unduly prejudicial and not unreasonable, except for a certain period when they exceeded lower commodity rates which were published subject to Rule 77 of Tariff Circular 18 A and would have been applicable upon request. Reparation awarded. Trenton Smelting & Refining Co. v. P. R. R., 96 I. C. C. 264.

(c) Intermediate provision of the tariff did not contain any restriction making its application dependent upon reference being made thereto by other tariffs, and thus, in the absence of reference, was nevertheless applicable. Bogue Supply Co. v. N. C. B. R. R. Co., 96 I. C. C. 434.

(d) Contention that the publication of rates to intermediate points in tariffs different from those naming rates to farther distant points, in connection with which rule 77 of Tariff Circular 18-a is published, precludes the application of rule 77, not sustained. Carey Co. v. C., N. O. & T. P. Ry. Co., 96 I. C. C. 455, 456, 457.

(e) Combination rates on fuel oil from El Dorado, Kans., to Detroit, Mich., found inapplicable. The sum of the proportional factors in effect on June 24, 1918, plus an increase of 4.5 cents found applicable. Reparation awarded against defendant which carried the unrestricted combination rule in its tariffs, following 81 I. C. C. 193. Timken-Detroit Axle Co. v. M. P. R. R. Co., 96 I. C. C. 680.

(f) Request was made for establishment of rates to points intermediate between Eau Claire, Wis., and Detroit, Mich., in conformity with provisions of rule 77 of Tariff Circular 18-A, and publishing agent notified to comply therewith. Upon request from participating carriers in central territory, publication of these rates withheld and respondents defaulted in their obligations under rule 77, notwithstanding requests from shipper. Proposal to increase rate to Detroit instead of fulfilling existing tariff obligations found not justified and suspended schedules ordered canceled. Sand from Eau Claire to Michigan, 100 I. C. C. 213.

(g) If rule 77 is to continue available to carriers it must be scrupulously observed. Sand from Eau Claire to Michigan, 100 I. C. C. 213, 214.

(h) Rate on zinc ore from Murray and Midvale, Utah, to Canon City, Colo.; during Federal control, found unreasonable to extent it exceeded a rate contemporaneously in effect from these points to Denver and Pueblo, Colo., more distant points. The tariffs publishing the lower rate, which was not limited as to value, contained a notation that in accordance with rule 77 of Tariff Circular 18-A, rates to intermediate points not in excess of those to the more distant points

would be established on one day's notice, upon reasonable request, but, because of the specific rate in effect at Canon City, rule 77 was not applicable. Standard Asphalt & Refining Co., 66 I. C. C. 611. Reparation awarded. Western Metals Co. v. Director General, 100 I. C. C. 314.

(i) Intermediate rule of Countiss's tariff provided for intermediate application of rates "except as may be otherwise specified." Complainant contended that under this rule rates from Cheyenne, Wyo., were applicable on shipments from Tacoma, Wash., an intermediate point, to San Francisco and South San Francisco, Calif. The application of the tariff was, however, restricted to States named and Washington was not named. Rate sought found not applicable from points in States not specifically named. Pacific Coast Steel Co. v. Director General, 100 I. C. C. 415.

ALL OTHER CITATIONS

Lafayette Lumber Co. v. Director General, as Agent, 85 I. C. C. 647; Mid-Continent Equipment & Machinery Co. v. M. & O. R. R. Co., 85 I. C. C. 683; Pacific Grain Co. v. Director General, as Agent, 85 I. C. C. 710.

§15. Reasonableness.

(a) If tariffs are not clear, and it is doubtful from the tariffs filed and their interrelationship one to another what rate applies in a given case, the court is warranted in considering how the rates claimed as applicable would operate as a matter of justice in getting at the railroad's intention with relation to the tariffs. Davis, Director General of Railroads v. Prairie Pipe Line Co., 298 Fed. 393.

§18. What is legal rate.

See Advanced Rates §8½a (c); Classification §17, §24; Commodity Rates §2, §2½ (n), II, §3, §5 (4q) (6r); Crimes; Demurrage §12; Evidence §47; Legal Rates; Overcharges; Reconsignment §5, §6½a; Tariffs IV; Through Routes and Joint Rates §15, §15½, §18, §20, §20½, §21, §22.

(a) Where an article is clearly embraced within a generic commodity designation, and neither the tariff nor governing classification discloses a contrary intention, the Commission has found the commodity rate applicable, even though the classification description was more specific, and have done so even though the particular article was not in contemplation when the commodity item was framed. Grosjean Rice Milling Co. v. Director General, 89 I. C. C. 395, 396.

(b) Upon rehearings, prior report, 58 I. C. C. 442, modified, and shipments of lumber from Hopkins, Fla., to Baltimore, Md., and other points during Federal control, found overcharged. None of the applicable tariffs specifically referred to tariff which provided a rule for the construction of through rates made on combination under which but a single increase was to be added to sum of the separate factors, nor did latter make specific reference to applicable tariffs. Following Acme Cement Plaster Co., 81 I. C. C. 298, combinations to and from Jacksonville, Fla., each increased 5 cents under General Order No. 28 of the director general, were applicable. Reparation awarded. Union Cypress Co. v. F. E. C. Ry. Co., 89 I. C. C. 679.

(c) Complainant attacked commodity rates charged on 10 cars of potatoes from Montana to destinations in Kansas during October 1921, as illegal in violation of section 6. Four originated at Kalispell on the G. N., four at Pablo, Mont., and one at Waterloo and one at Polson, Mont. On all but two of the shipments joint commodity rate of 95c was charged, on shipment to Trousdale a rate of 94c charged and to Greensburg $1.085. Contemporaneous joint commodity rates of 70.5c, minimum 30,000 pounds and 62.5c minimum 40,000 pounds were in effect from Pablo, Waterloo and Polson to Denver, Colo. The rates contended for did not apply from Kalispell, no specific rate from that point to Denver being published until after the shipments had moved. The rate was applicable only via Billings and Burlington. HELD, rate of 95c applicable, overcharges to be refunded, complaint dismissed. Hutchinson Produce Company v. A. T. & S. F. Ry., 92 I. C. C. 115.

(de) Complainant attacked commodity rates charged on beet sugar, carloads, from Delta, Cornish and other points in Utah to Boston during November and December, 1919 and January 1920 as unreasonable and inapplicable. Charged $1.10. The through combination of rates in effect on June 24, 1918 from Colorado factories to Boston for cars of 60,000 pound minimum was 64c composed of a

commodity rate of 25c to Chicago and fifth class rate of 39c beyond. On a minimum of 33,000 pounds the combination rate was 74c. Adding the 37c arbitrary to these rates made through rates of $1.01 and $1.11. HELD, rate assessed inapplicable; that applicable rates were $1.01 minimum 60,000 pounds, and $1.11 minimum 33,000 pounds, shipments overcharged, reparation awarded. Bird v. Director General, 92 I. C. C. 494.

(f) Complainant attacked class rates since Jan. 1, 1918, charged on wire rods in carloads, from Pittsburgh and Johnstown, Pa., from Buffalo, N. Y., and points taking same rates, to Mansfield, O., as unreasonable. Fifth class rates charged although there were and are commodity rates in effect. The question here presented is whether the shipments received by complainant consist of bars in coils or rods in coils. Clearly the material was steel in coils. Steel bars in carloads are rated substantially as fifth class. Following 73 I. C. C. 567, rates attacked inapplicable to extent they exceed commodity rates on rods (iron or steel) in coils, reparation awarded. New England Drawn Steel Co. v. Director General, 93 I. C. C. 171.

(g) Complainant attacked class rate charged on one car of granite monuments shipped Dec. 31, 1920, from Northfield, Vt., to Anderson, Ind., as unreasonable, unjustly discriminatory and illegal. Shipments billed as boxed granite monuments, charged fifth class rate of 52.5c. There were contemporaneously in force on granite blocks, slabs or pieces, commodity rates of 31c when "rough quarried, chiseled, dressed, hammered, sawed or otherwise finished" and 35.5c when "carved, lettered, polished or traced" subject to a declaration by the shipper that the actual value of the shipment was not in excess of $2.25 per 100 pounds. The shipment consisted of rough granite and fell within the description of the material on which the commodity rate of 31c applied. HELD: Rate applicable was 31c, reparation awarded. Carpenter v. Central Vermont Ry., 93 I. C. C. 309.

(h) Complainant attacked commodity rates charged on three cars of poultry crates consisting of wooden crate material, wired, in bundles, from Dyer, Tenn., to Cincinnati, O., on August 17, Sept. 9, and Oct. 14, 1920, as unjust, unreasonable, unjustly discriminatory, unduly prejudicial and in excess of those applicable at the legal tariff rate. A rate of 19.5c was charged on the shipment that moved August 17, and 24.5c on those that moved Sept. 9 and Oct. 14. These rates were applicable on lumber and articles taking lumber rates, including box or crate material, wood, wired, loose or in bundles. HELD: Lumber rates applicable, complaint dismissed. Dyer Fruit Box Mfg. Co. v. B. & O. R. R., 93 I. C. C. 386.

(i) Complainant attacked commodity rates charged on walnut logs, carloads, 16 feet and under in length, from Illinois and Iowa to Des Moines, Iowa, between June 27, 1918, and Oct. 22, 1919, as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. Charged on basis of soft lump coal commodity rates. Complainant contended the applicable rates were the soft lump coal rates in effect June 24, 1918, increased 25%. On June 24 the tariffs named two rates on logs, namely, the soft coal lump coal rates and the lumber rates and on June 25 the same situation existed. The classification had not been changed and it provided that the lower of the alternative rates be effective. On each date the soft lump coal rates were lower than the lumber rates, and therefore, regardless of their method of construction, they were the applicable rates on logs. HELD: Rates charged applicable, complaint dismissed. Des Moines Saw Mill Co. v. Director General, 96 I. C. C. 557.

(j) Complainant attacked commodity rates charged and minimum weights applied on 32 cars of mixed livestock shipped between May 4, 1918, and Feb. 25, 1919, from Texas to North Fort Worth, Tex., as inapplicable. Shipments consisted of mixed carloads of cattle, calves, hogs and sheep and the tariffs provided that on cattle, calves, horses and mules in mixed carloads or mixed with hogs, sheep, or goats, the rate and minimum weight on straight carloads of the highest rated livestock in the car would apply. Charges in excess of that basis were paid by complainants and deducted from the account sales when settlement was made with the shippers. HELD: Rates attacked inapplicable, reparation awarded. Barse Livestock Commission Co. v. Director General, 98 I. C. C. 539.

(k) Complainant attacked class rates

charged on scrap steel for remelting purposes, carloads, shipped during August, 1922, from Vancouver, Wash., to Portland, Ore., as in excess of the applicable rates and of the aggregate of intermediates. Shipments consisted of steel ship rivets which remained on hand at shipyards after the building of steel ships at Vancouver was discontinued. Complainants witnesses estimated that about 98% of the articles shipped were unused rivets and the remainder nuts and washers. Fifth class rates of 11c applied on rivets. There was in effect a commodity rate of 6c on iron and steel scrap having value for remelting purposes only. For the rivets complainants received scrap iron prices; and testimony of record indicates that the rivets were or will be melted and used for scrap. One of the complainants conceded that if there had been a market for such rivets, complainants would have sold them as rivets instead of as scrap. HELD: Rivets in question were not scrap steel within the meaning of the tariffs and were not entitled to the rates on that commodity; and that the 11c rate did not constitute a violation of section four or six of the act, complaint dismissed. Alaska Junk Co. v. S. P. & S. Ry., 98 I. C. C. 551.

(l) Tariffs carried description on "fabrics, made wholly of cotton, in original piece—but not finished articles ready for use—in rolls covered with burlap or in bales or boxes, any quantity," and on cotton piece goods, any quantity, viz. cotton fabrics (made wholly of cotton), in original piece (but not finished articles ready for immediate use), packed in rolls covered with burlap, or in boxes or bales." Contention that terms "wholly manufactured articles" and "finished articles" in above description had effect of limiting application thereof to unfinished cotton fabrics, or cotton fabrics requiring some further process of manufacture to render them suitable for commercial use as fabrics, not sustained. More apt terms would have been employed to give expression to such meaning if intended. Rosenblatt & Sons v. Director General, 91 I. C. C. 18, 19.

(m) When complainant discovered that wheat grits had been included in tariff item taking flour rates it thereafter ceased to bill its product, Cream of Wheat, as a cereal food preparation and availed itself of flour rate by billing as wheat grits. HELD: Such billing was improper, and fact that commodity is prepared and represented to the trade solely as a cereal food and not as grits is sufficient to make rates on cereal foods applicable. Andrews Soap Co., 4 I. C. C. 41. Cream of Wheat Co. v. A., T. & S. F. Ry. Co., 91 I. C. C. 45, 47.

(n) The legal rates must be determined by the words of the published tariffs themselves, rules or provisions of G. O. 28 to the contrary notwithstanding. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 226.

(o) In 93 I. C. C. 79 the Commission found a 33c commodity rate applicable on a less carload of iron pipe fittings from Barberton, O., to Duluth, Minn., destined to Virginia, Minn., and awarded reparation to the amount of the difference between the fourth class rate of 59c and 33c. Complainant's evidence of unreasonableness of the rate charged was confined to a comparison of the rates from Barberton to Virginia and Duluth with the rates from Birmingham and Bessemer, Ala., to Boston, New York, Philadelphia and Baltimore. HELD: Rate charged not unreasonable. The 33c rate was subject to the general reduction of July 1, 1922, and applied on iron and steel articles carloads as described in note 8. Note 8 contained a list of iron and steel articles preceded by a clause reading: "where reference is made to this note, rates apply on the following commodities, in either carloads or less carloads, unless otherwise provided." Some of the articles listed in the note are indicated a c. l. and others as l. c. l. Neither the note nor the tariff contains any explanation of these symbols. The list contains the item "fittings, pipe." No symbols appear opposite the item. Defendant contended that word "carload" appearing in connection with the rate item on page 53 is a part of the commodity description and that it answers the requirements of the words "unless otherwise specified" in note 8, thereby excepting less carload shipments from the application of the commodity rates. HELD: 33c rate not applicable to less carload shipments, complaint dismissed. Murray Egan McLeod v. P. R. R., 101 I. C. C. 233.

(p) Contention that proportional rate was not available as a factor in a combination rate because tariff restricted its use to points "where no through rates

are published," not sustained, as no thru rates were published in such tariff, and item attempted restriction of the proportional rate made no reference to any tariff in which through rates could be located. Joseph Iron Co., 37 I. C. C. 591; 40 I. C. C. 525; Ash Grove Lime & Portland Cement Co. v. M. P. R. R. 92 I. C. C. 51, 52.

(q) Specific rates were published on traffic from Cincinnati to Nashville. Complainant alleged that under terms of tariff rules in effect, lower rates from Jeffersonville were applicable on traffic originating at Cincinnati. FOUND: A fair and reasonable conclusion, when all pertinent tariff provisions are considered, is that such lower rates did not apply as alleged. For approximately five years, during which time thousands of shipments moved, neither shippers nor carriers considered tariffs as authorizing application of Jeffersonville rates from Cincinnati, and no shipper, therefor, was misled, or relied upon lower rates to his damage. Nashville Traffic Bureau v. Director General, 92 I. C. C. 211.

(r) A rate once lawfully established continues to be the legal rate until legally canceled. A subsequent tariff naming new rates without cancelling previous rates can not carry the new rates into lawful effect. Dewey Portland Cement Co., 56 I. C. C. 444. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311, 313.

(s) Shipments of wooden ties from various points in Missouri to St. Louis, during Federal control, found overcharged. Carriers publishing tariffs under which rates were assessed failed to cancel an agency tariff, to which they were parties, in which a distance scale of commodity rates prescribed by the State commission for intrastate movement was published, and which provided that rates named therein "will take precedence over rates in other publications which are higher." Rates on same commodity between same points via same route should not be included in different tariffs at same time. Walsh Tie & Lumber Co. v. Director General, 92 I. C. C. 311.

(t) Rate on "Fibre, chemically hardened, flexible or hard, such as fibreoid, leatheroid or vulcanized fibre, forms or shapes, n. o. i. b. n." found not applicable on shipments of Textan soles. Soles such as Textan are composed of rubber, fiber, and filler, and are known commercially as rubber soles. Chemically hardened fiber is manufactured by subjecting an all-cotton cellulose paper to the action of zinc chloride, contains no rubber, and its use in the manufacture of soles is impracticable, as it is inflexible when the thickness of the Textan soles. Rate on rubber soles assessed found applicable and not unreasonable. Tomahawk Shoe Co. v. C., M. & St. P., 92 I. C. C. 351.

(u) No joint rates were in effect and shipments moved under a two-factor combination. Tariff of one participating carrier carried the combination rule which provided a method for constructing thru rates made on combination, but did not specifically provide for its use in connection with first component of the through rate. Carrier publishing other factor made no reference to the rule nor carried a similar one in its tariff. Contention that above circumstances precluded application of the rule, and to find otherwise would contravene certain provisions of section 6 of the act and of Tariff Circular 18-A, not sustained following the Sligo case, 62 I. C. C. 643 and 73 I. C. C. 551. Minneapolis Steel & Machinery Co. v. Director General, 92 I. C. C. 603, 604.

(v) Shipments of riveted-steel pipe found not entitled to rates published under tariff item on "Articles of iron and steel,—Conduits (not insulating nor flexible), iron, coated or enameled." Rates under tariff item on "Articles of iron and steel,—Pipe, riveted, ...," found applicable and to have been legally assessed. Duluth Boiler Works v. A. T. & S. F., 92 I. C. C. 692.

(w) Rates on steel plates from Claymont, Del., to certain points in Pennsylvania found unreasonable to extent they exceeded lower rates contemporaneously in effect from Chester, Pa., a farther distant point. Such lower rate was published subject to rule 77 of Tariff Circular 18-A, and was established from Claymont subsequent to movement of shipments. Reparation awarded and original report, 87 I. C. C. 29, reversed. Worth Steel Co. v. Director General, 93 I. C. C. 37.

(x) Class rate on l. c. l. shipment of iron pipe fittings from Barberton, Ohio, to Duluth, destined to Virginia, Minn., found inapplicable to extent it exceeded lower commodity rate published in same tariff on "iron and steel articles, c. l.,"

which lower rate by tariff note applied on a list of commodities in which pipe fittings were included without limitation as to whether c. l. or l. c. l. While carriers intended to omit all reference to l. c. l. rates in connection with lower commodity rate, through oversight this was not done. Moreover, erroneous publication of rates does not justify a departure therefrom and intention of framers is not controlling. Reparation awarded. Murray-Egan-McLeod Co. v. P. R. R., 93 I. C. C. 79.

(y) Following Lancaster case, 73 I. C. C. 567, class rates on "Iron or steel bars," assessed on steel rods, in coils, found inapplicable to extent they exceeded commodity rates on "Iron or steel rods, in coils." Class rates did not specifically provide for shipments in coils, whereas commodity item contained such provision, and shipments here involved otherwise complied with requirements of the commodity description. Reparation awarded. New England Drawn Steel Co. v. Director General, 93 I. C. C. 171.

(z) Contention that cucumbers in brine were not pickles but were only packed in salt solution to facilitate transportation to a point where they could be manufactured into pickles not sustained, since some shipments moved, several months after the gathering season and must have been in brine sufficiently long to remove them from category of fresh cucumbers. Haarmann Vinegar & Pickle Co. v. C., B. & Q., 93 I. C. C. 251, 252.

(aa) Tariff provided commodity rate on granite blocks, slabs, or pieces, when "rough quarried, * * *" subject to declaration by shipper that actual value was not in excess of a certain amount, and for application of class rate when of greater value. Actual value exceeded limited value specified under commodity rate and class rate was assessed. Limitations as to value in connection with the commodity rate were unlawful and void since they were published without commission's authorization as provided in section 20 (11) of the act. Shipment here involved consisted of rough granite and fell within description of material on which commodity rate applied. Reparation awarded. Carpenter v. C. V. Ry., 93 I. C. C. 309.

(bb) At time of movement there was no specific rate or rating on "earthenware jugs, insulated and metal jacketed," and under analogous article rule rate applicable on "jugs, class, insulated and metal jacketed," was assessed. Contemporaneously lower rates applied on "pottery, earthenware, stoneware, common brown or gray jugware." FOUND: An earthenware jug, when insulated and metal jacketed, completely loses its identity as an ordinary earthenware jug or jar and value of insulated metal-jacketed articles greatly exceeds that of ordinary earthenware jugs. Article under consideration does not fall within generic term "pottery earthenware, stoneware, common brown or gray jugware," and rate charged was applicable. Cullum & Boren Co. v. C., B. & Q., 93 I. C. C. 354.

(cc) Bicycles were classified under the heading of "hand vehicles" upon which first-class rates applied. Contemporaneously a lower commodity rate was maintained on "light and heavy non-self-propelling freight and passenger vehicles." HELD: Since a bicycle is neither a freight nor a passenger vehicle, first-class rates assessed were applicable. United Cycle & Supply Co. v. B. & O., 93 I. C. C. 689; Jones v. P. R. R., 93 I. C. C. 697.

(dd) Use of other than actual distance in applying distance rates on shipments of wrought iron pipes and other iron and steel articles and oil-well supplies between points in Oklahoma and points in Kansas, as specifically provided in applicable tariffs, found to have resulted in overcharges. While it was intention of carriers to make rates from farther distant points applicable from unnamed intermediate stations, the tariff as published did not carry out that intent and must be construed against framers. Cosden Oil & Gas Co. v. A., T. & S. F., 95 I. C. C. 116.

(ee) Shipments of lumber from Falco, Ala., to Manitou Beach and Northville, Mich., found overcharged. While shipments moved via direct routes a lower rate applicable under Rule 5(b) of Tariff Circular 18-A and unrestricted in its application, was contemporaneously in effect via a circuitous route. If carriers participating in tariff carrying the lower rate desired to restrict its use over certain routes they should have done so by use of proper tariff notations. A failure to do so left all routes open should shippers desire to use them. Reparation awarded. M'Gowin-Foshee Lbr. Co. v. A., F. & G., 95 I. C. C. 451.

(ff) Failure of tariffs to impose upon initial carrier the duty of directing shipper's attention to a tariff requirement that a certificate be made on bills of lading that packages used conform to packing requirements and specifications, found not unreasonable. Complainant here was fully advised of the tariff provision, and while containers used fully complied with tariff requirements, through oversight its shipping clerk neglected to stamp the necessary certificate so stating on the bill of lading, resulting in the collection of penalty charges. American Licorice Co. v. C., M. & St. P., 95 I. C. C. 525.

(gg) Rates assessed on grain and products moving from points west of Buffalo to destinations on Maine Central in Washington and Somerset Counties, Me., via Washington Junction and Oakland, during Federal control, found inapplicable in so far as proportionals for movements beyond Washington Junction and Oakland were applied. These proportionals were applicable only when there were no joint rates in effect from points of origin. Applicable rates were those under tariffs naming rates from points of origin and billing books to which reference was made in those tariffs. Shipments found overcharged and reparation awarded. Thaxter & Co. v. Director General, 95 I. C. C. 693.

(hh) Governing tariff provided no routing restrictions and allowed fabricating in transit at points in direct line to final destination. Shipments here involved moved via circuitous routes over one of which a back haul to and from transit point was required. FOUND: There being no routing restrictions in connections with the transit arrangements joint rates applicable in conection therewith applied over all routes of carriers parties to tariff naming the rates where no back haul was involved, and combinations were applicable in connection with such routes where back hauls necessitated. Refund of overcharges directed. Maloney Tank Mfg. Co. v. B. & O., 95 I. C. C. 725.

(ii) Combination rates on mixed carloads of fruit and vegetables from Los Angeles, Calif., to Globe, Ariz., found inapplicable inasmuch as lower combinations contemporaneously applied over route of movement. Tariff publishing one factor of the lower combination did not publish rates on vegetables but provided for application of highest rate and minimum to mixed carloads of fruits and vegetables. Fact that rates on vegetables were named in another tariff did not operate to make the mixture rule inapplicable. Refund of overcharges required. Mauk Produce Co. v. Director General, 95 I. C. C. 728.

(jj) Lump coal rates charged on shipments of so-called domestic lump, found inapplicable. Coal here shipped, after coming from the mine, was passed over either a 1¼-inch wire mesh screen or 1⅝-inch round perforated plate. In other words, it consisted of run of mine except that all slack and screenings that would pass through the above-described screens were removed. The tariff described mine-run coal as "lump mixed with smaller sizes" and it did not follow of necessity that it must include screenings or slack. While it was intention of carriers that lump coal rates should apply on such coal as was here shipped, the tariff was not so restricted. Run-of-mine rates were legally applicable, and shipments were overcharged. Reparation awarded. Detweiler Coal Co. v. D. & R. G. W., 96 I. C. C. 88.

(kk) Shipment from Pittsburgh, Duquesne Station, Pa., to Tulsa, Okla., was diverted, through carrier's error to Waynoka, instead of Wynona, Okla., necessitating a back haul to Wynona. Tariffs of participating carriers named, without applicable restrictions, same rate from origin to both Waynoka and Wynona, and this rate, plus diversion charge, found applicable. Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(ll) Shipments from Chester, Pa., to Tulsa, Okla., originally routed via rail to Philadelphia, and water and rail beyond was diverted at Philadelphia, upon shipper's request, to all-rail route, and upon arrival at Tulsa, was diverted to Wynona, Okla. Charges collected found inapplicable to extent they exceeded a lower combination, plus diversion charges, from Chester, Pa., via St. Louis to Wynona, although factor of rate found applicable was restricted to shipments "consigned through" from Chester to Wynona "via all-rail routes." Reparation awarded. Tidal Osage Oil Co. v. Director General, 96 I. C. C. 112.

(mm) Tariff provided for waybilling of shipments from New Orleans to Mounds, Ill., at applicable rate and, upon surrender of paid inbound freight bills,

rebilling from Mounds to final destination at remainder of rate plus transit charge. Defendant interpreted tariff as requiring shipper to preserve identity of cargoes according to vessel and as prohibiting substitution. Complainant's representative concurred in this construction. FOUND: Complainant can not excuse its failure to surrender inbound billing under tariff by alleging error on part of defendant and intrastate class rate assessed on shipments from Mounds to Chicago found applicable. Capital Warehouse Co. v. Director General, 96 I. C. C. 293, 296, 297.

(nn) Rates on coal from mines in Tennessee and Kentucky to sidings on the Fort Valley branch of the Southern Ry., intermediate to Sawtell, Ga., found to have been unjust and unreasonable to the extent they exceeded rates from the same mines to Sawtell prior to a certain date and to extent they exceeded rates from same points to Constitution, Ga., since that date. The tariffs under which these shipments moved and which named the rates to Sawtell and Constitution contained a notation to the effect that in accordance with Rule 77 of Tariff Circular 18 A, rates to intermediate points not in excess of those to the more distant points would be established on one day's notice. The legal effect of the publication of the lower rates to Sawtell and Constitution under authority of Rule 77 is equivalent to an admission by defendants that the higher rates to intermediate points here involved were unreasonable. Producers Refining Co., 69 I. C. C. 403; Pittsburgh Crucible Steel Co., 81 I. C. C. 659; and the Pacific Grain Co., 85 I. C. C. 710. Reparation awarded. Randall Bros. v. L. & N., 96 I. C. C. 342.

(oo) Third-class rates on lime-cola sirup shipped during Federal control from Montgomery to Mobile, Ala., found inapplicable. Lower commodity rates in effect on "sirup in wood or in tin cans, boxed" should have been assessed. Reparation awarded. Allen v. Director General, 96 I. C. C. 561.

(pp) Combination rates on fuel oil, from El Dorado, Kans., to Detroit, Mich., found inapplicable. The sum of the proportional factors in effect on June 24, 1918, plus an increase of 4.5 cents, found applicable. Reparation awarded against defendant which carried the unrestricted combination rule in its tariff, following 81 I. C. C. 193. Timken-Detroit Axle Co. v. M. P. R. R. Co., 96 I. C. C. 680.

(qq) First-class rates assessed on uncompressed cotton, in bales, from Greenville, Miss., to Dyersburg, Tenn., found unreasonable to extent it exceeded lower commodity rate contemporaneously in effect on cotton, in bales, compressed or uncompressed, from Greenville to Cairo, Ill., over route of movement and the Illinois Central, subject to Rule 77 of Tariff Circular 18-A. Reparation awarded. Churchill Compresses v. C. & G. R. R. Co., 98 I. C. C. 5.

(rr) It is well settled that ambiguity in tariffs must be resolved in favor of the shipper, and it is the opinion of the commission that under the present rules here involved the through double-deck rate on hogs applies on shipments moving inbound to the transit point in single-deck cars and outbound in double-deck cars. Transit on Hogs, 98 I. C. C. 153, 154.

(ss) Rate assessed on two carloads of sugar at Sioux City, Iowa, during Federal control, found inapplicable because governing tariff did not name either the point from which shipments moved or point of interchange with delivering carrier as a "station" and failed to show distance between those points. Reasonable rates prescribed and reparation awarded. Seavey & Flarsheim Co. v. Director General 98 I. C. C. 295.

(tt) Commission finds defendants are in error in construing the classification item covering pea threshers as applicable on complainant's type C pea hullers. The applicable rates are determinable under the classification item covering agricultural implements, other than hand, n. o. i. b. n. Star Pea Huller Co. v. C., N. O. & T. P. Ry Co., 98 I. C. C. 357, 359.

(uu) Two carload shipments of dressed turkeys moved from Lander and Wheatland, Wyo., to Omaha, Nebr., loaded in bulk in straw, and were charged a rate higher than if the shipments had been packed in barrels or boxes or in barrels with cloth tops, in accordance with the provisions of the classification. FOUND, rates charged were not unreasonable, as shipments were not entitled to same rating and rates as would have applied if the packing specifications had been complied with. Omaha Cold Storage Co. v. C. & N. W. Ry. Co. 98 I. C. C. 437.

(vv) Shipments of steel plates, gauge No. 11 or heavier, from Johnstown, Pa.,

to Portland, Oreg., were assessed rates applicable on iron and steel articles under item "Plate (No. 11 and heavier * * *)," while a lower rate contemporaneously applied on "Plates, ship," HELD, shipments consisted of ship plates within meaning of governing tariff, since all of such plates were adapted for use in ship construction, and the lower "ship plate" rate found applicable. Finding in original report, 85 I. C. C. 629, affirmed, and reparation awarded. Sabin v. S., P. & S. Ry. Co., 98 I. C. C. 471.

(ww) Shippers have the right to rely upon the obvious meaning of the terms of a tariff; but even if there is anything obscure or uncertain about a term, the lower rate would still be applicable, since an obscure or uncertain tariff provision must be construed against its framers. Sabin v. S. P. & S. Ry. Co, 98 I. C. C. 471, 474.

(xx) Rates on moss in machine-pressed bales from Rosedale La., and Louisiana points west of Mississippi River intermediate from Rosedale and Baton Rouge, La., to destinations in the defined territories named intermediate to Albany, Rochester, Syracuse, and Utica, N. Y., found to have been unreasonable prior to August 1, 1924, to extent they exceeded lower contemporaneous rates applicable from farther distant points, subject to Rule 77 of Tariff Circular 18-A for intermediate application. Reparation awarded. National Asso. of Furniture Mfrs. v. A. A. R. R. Co., 98 I. C. C. 501.

(yy) The commission has taken steps looking to the simplification of tariffs. It can not consistently refrain from again emphasizing the need therefor or from urging upon defendants that they undertake promptly the clarification and simplification of these tariffs. National Asso. of Furniture Mfrs. v. A. A. R. R. Co., 98 I. C. C. 501, 510.

(zz) Rate on wooden wagon bows from Columbus, Ohio, to Sherman and Stamford, Tex., specifically named in the tariff on this commodity, found unreasonable to extent it exceeded and exceeds lower contemporaneous rate on "wagon wood, not otherwise specified," which latter rate is prescribed as reasonable for future. Reparation awarded. Fort Smith Rim & Bow Co. v. B. & O. R. R. Co., 98 I. C. C. 536.

(3a) Charges assessed on mixed carload shipments of livestock from various points in Texas to North Fort Worth found inapplicable in that they exceeded those accruing at the "rate and minimum weight on straight carloads of the highest-rated livestock in the car" provided for in tariffs. Reparation awarded. Barse Live Stock Commission Co. v. Director General, 98 I. C. C. 539.

(3b) Shipments of returned empty fruit boxes from Los Angeles, Calif., to various intrastate destinations, during Federal control, found overcharged to extent that charges assessed exceeded the lowest charges under tariff rules providing that the charge for a car fully loaded must not exceed the charge for same lot of freight if taken as a l. c. l. shipment, subject to a minimum charge on each car. Reparation awarded. Klein-Simpson Fruit Co. v. Director General, 98 I. C. C. 547.

(3c) Shipments of steel rivets from Vancouver, Wash., to Portland, Oreg., found not scrap steel within meaning of the tariffs, and not entitled to prevailing lower rates on that commodity. Complaint dismissed. Alaska Junk Co. v. Spokane, Portland & Seattle Ry. Co., 98 I. C. C. 551.

(3d) Steel articles having a recognized commercial value other than that of the elementary metal from which they are manufactured do not properly come within the description scrap steel. Alaska Junk Co. v. Spokane, Portland & Seattle Ry. Co., 98 I. C. C. 551, 552.

(3e) Class rates charged on tomatoes shipped from St. Louis, Mo., to New Orleans, La., during 1920 and 1921, found applicable under governing tariffs. Contention that lower commodity rates applied under the tariffs can not be sustained. St. Louis Fruit & Vegetable Asso. v. L. & N. R. R. Co., 98 I. C. C. 553, 555, 556.

(3f) The commission has consistently found that commodity rates must be applied strictly, from which it follows that only the article or articles clearly comprehended within the descriptive terms of the commodity rate can be considered as having been removed from the classification. Contention that commodity item on "Vegetables and fruits, viz: Pears, peaches and plums" was applicable on tomatoes on ground that classification description of "vegetables" included tomatoes, not sustained. St.

Louis Fruit & Vegetable Asso. v. L. & N. R. R. Co., 98 I. C. C. 553. 556.

(3g) Shipments of gasoline moving from Tulsa, Okla., to Rochester, Ind., found to have been overcharged to extent that rate charged was in excess of the combination rate applicable under rule 5 (b) of Tariff Circular 18-A. Cosden & Co. v. L. E. & W. R. R. Co., 98 I. C. C. 597.

(3h) Tariff contained a note providing that when reference is made thereto rates will apply on traffic originating in Northwest territory. Contention that because the note did not contain some word of limitation such as "only" rate involved was open to use from any territory, not sustained. Cosden & Co. v. L. E. & W. R. R. Co., 98 I. C. C. 597, 598.

(3i) Contention that during period of Federal control the lines, both inbound and outbound, were being operated as a unified system by reason of which the forwarding of commodities over any line was same as forwarding them over the particular line having the inbound movement into transit point, not sustained from standpoint of tariff interpretation, since the lines were still distinguished in the tariffs by their corporate names. Haas & Co. v. Director General, 98 I. C. C. 619, 621.

(3j) Class rate charged on automobile heaters in l. c. l. from Chicago, Ill., to San Francisco, Calif., found applicable and not shown to be unreasonable. Under the tariff governing, provision is made for a lower commodity rate on automobile parts, but heaters can not be classed as a part of an automobile, being more in the nature of an accessory or added feature. Neither are heaters included in the list of automobile parts specifically named in the classifications, they being separately provided for under the heading "Heaters." Complaint dismissed. Western Auto Supply Agency of Los Angeles, Calif. v. C., B. & Q., 98 I. C. C. 647.

(3ja) Rate on coal from complainant's mine at Mabie, W. Va., on the Coalton branch of the B. & O., to Port Covington (Baltimore) found unreasonable and unduly prejudicial to extent it exceeded the rate contemporaneously in effect from Mabie mine No. 6, a farther distant competing mine, to which complainant's mine was intermediate. Applicable tariff carried reference to rule 77 of Tariff Circular 18-A that upon reasonable request rates which would not exceed those in effect from or to more distant points would be established from or to intermediate points on one day's notice. Complainant made request for establishment of such rates but was refused. Reparation awarded. Brady v. B. & O., 102 I. C. C. 19, 25, 26.

(3jb) Rate on printing paper from Lawrence, Mass., to Long Island City, N. Y., found unreasonable and inapplicable to extent it exceeded sixth-class rate contemporaneously in effect. Printing paper with few exceptions moves at sixth-class throughout official classification territory, and that basis of rates was approved in 38 I. C. C. 120. Reparation awarded and maximum reasonable rate prescribed. Merrimac Paper Co. v. B. & M., 102 I. C. C. 133.

(3jc) Specific commodity rates from farther distant points, applied at intermediate point of origin, found to have been legally assessed. Lower class rates were carried in another tariff, but neither it nor the commodity tariff specifically named the intermediate point as a point of origin, such point being specifically included in both tariffs in index of stations. Both also provided that rates from next farther distant origin points would apply from intermediate points not specifically named. The class rate tariff, however, was limited to apply where commodity rates are not otherwise specifically provided. Fact that commodity tariff did not name the intermediate point "specifically" as an origin point does not mean that there was no "specific" commodity rate in effect. The intermediate provision established the specific commodity rates just as positively, plainly, and legally from the unnamed intermediate point as from the farther distant point. Miller & Lux v. S. P., 102 I. C. C. 137.

(3k) Complainant attacked as illegal charges collected in 20 double deck cars of sheep from Galt, 15 to Los Banos, and 5 to Oxalis, all in California, over an interstate route, during the period Nov. 1, 1919 to Feb. 1, 1920, during federal control. Galt is a short distance south of Sacramento, Calif., and Los Banos and Oxalis are south of Stockton, Calif., and northwest of Fresno, Calif. The rates charged were specific commodity rates from Sacramento, applied from Galt, an intermediate point of origin not named in the commodity item.

The class B rates from Sacramento and Galt were lower than the specific commodity rates from Sacramento and Galt, and neither the commodity item nor the class item specifically named Galt as a point of origin, but Galt was specifically included in the index of stations in both the commodity tariff and the class tariff. Both tariffs contained a provision that rates from the next farther distant named points of origin would apply from points not specifically named in the respective tariffs. The fact that the commodity item did not name Galt specifically as a point of origin does not mean that there was no specific commodity rate in effect. The provision for application from intermediate points of origin established the rates of $62.50 per car to Los Banos and $75.50 per car to Oxalis just as positively, plainly, and legally from Galt, the unnamed point, as from Sacramento, the named farther distant point, and these rates were established as specific commodity rates. The limitation of the class B rates, to apply in the absence of specific commodity rates, did not mean from and to specifically named points. The word "specific" was used as descriptive of the character of the published rate and not descriptive of the manner in which stations were named. On the other hand, the provision for alternate use of class and commodity rates was limited for use only when the commodity and class rates are named between specific points. When the shipments moved, therefore, there were in effects specify commodity rates on livestock and sheep from Gault to these destinations, and there were no applicable class rates then in effect from this specified point. There being no concurrently applicable class rates from this specific point of origin the provision for alternative use of class rates when lower than commodity rates had no effect upon the specific commodity rate. HELD, rates attacked not illegal, complaint dismissed. Miller & Lux v. S. P. Co. 102 I. C. C. 137.

(3ka) Class rate assessed on thin lumber or veneer, found applicable. While a commodity tariff carried a lower rate on lumber and articles taking same rates, the list of articles published therein did not include thin lumber or veneer, such tariff being specific as to what manufactured commodities are entitled to rate on lumber. On the other hand, the classification specifically described veneer of the kind here shipped. Commodity tariffs must be strictly construed, therefore, until the specific commodity description is physically incorporated into the commodity tariff the class rate must be applied. Milne Chair Co. v. A. C. L., 102 I. C. C. 165.

(3kb) Original report, 83 I. C. C. 361, affirmed and third-class rating on gas stoves and ranges, iron or steel, n. o. i. b. n., found applicable to l. c. l. shipments of Radiantfire heaters. General Gas Light Co. v. A. G. S., 102 I. C. C. 181.

(3kc) Rate on fuel wood from Baca, Perea, and Thoreau, N. Mex., to El Paso, Tex., found applicable but unreasonable to extent it exceeded lower rate published in tariff supplement by special permission, but which was rejected and returned as being in transgression of General Order No. 28 of director general. The rejection may have been in error, but the fact remains that the schedules were returned, and it must be concluded they never took effect. Kaseman v. A., T. & S. F., 102 I. C. C. 315.

(3kd) Rate on "Machinery, n. o. i. b. n.," assessed on portions of dismantled marine engines, billed as scrap iron, found applicable and not unreasonable. It was and is the practice of complainant to break similar parts into smaller pieces, but this was not done when these shipments moved. While there is no evidence to indicate whether or not commodities were sold for remelting purposes or were remelted, complainants witness conceded that parts could be used in assembling other engines. The articles shipped were therefore not scraps or pieces of iron or steel, having value for remelting purposes only. To come within that tariff description articles must not be shipped in their original form, but must be so reduced into fragments, scraps, or pieces as to be useless for any purpose other than remelting. It is nature of article shipped, not price at which it is sold or use to which it is put, which determines whether the rate on scrap iron applied. Simon v. S. Ry., 102 I. C. C. 325.

(3ke) Rate assessed on sand from LaFayette, Ind., to Kankakee, Ill., found applicable. To effect delivery at complainants' unloading lot a switching service was necessary, charges for which would have been absorbed by delivering line had point of delivery come within

meaning of tariff rule which provided that switching charges from or to industries located on line of switching carrier would apply from or to additional industries which might so locate. This unloading lot can not be considered as coming within meaning of this rule, and since complainants were not included in list of industries to which rule applied, lower rate to Kankakee proper was not applicable. Shanks & Gannon Co. v. C., C., C. & St. L., 102 I. C. C. 462.

(3kf) Upon reconsideration, finding in original report, 91 I. C. C. 3, that application of penalty charges for detention at originally billed destination of shipments of lumber which were subsequently reforwarded to new destination, were not illegal, affirmed. Cars were placed for delivery on defendants' team tracks, but they had not been unloaded or accepted by consignee or owner, and, under the terms of the governing tariff rule, must be considered reconsignments and not reshipments as contended by complainants. Stetson, Cutler & Co., N. Y., N. H. & H., 102 I. C. C. 471.

(3kg) Shipment of lumber moved from Jasper, Tex., to St. Louis, and was ordered reconsigned to Harlem Transfer, N. Y., or if that point was embargoed, Long Island City, N. Y. Complainant was notified reconsignment could not be made due to an eastern embargo. Shipment was placed in storage and subsequently moved under permit to New York. While applicable tariff prohibited reconsignment to embargoed points not only was there no embargo on eastern lines against Long Island City, but one of such lines reaching St. Louis was willing to accept shipment for transportation. Carrier's disability preventing immediate movement was theoretical disability based upon supposed embargo and it follows that charges assessed as result of refusal to reconsign were illegal. Reparation awarded. Milne Lbr. Co. v. Director General, 102 I. C. C. 520.

(3kh) Shipments of anthracite coal moving from Providence, Pa., to Matawan, N. J., thence reconsigned to Asbury Park, N. J., were assessed joint rates and reconsigned charges, plus additional charges because of movement through Matawan. Contention that additional charges were properly assessed under reconsignment tariffs, which provide for their application where return or additional hauls are involved and where rate from original point of shipment to final destination is not applicable through reconsignment point, it being shown that customary route between origin and final destination is via South Amboy and Sea Girt, not sustained. Tariff naming through rate having contained no routing restriction, such rate was applicable via route of movement, and charges assessed were illegal to extent of additional charges collected. See 47 I. C. C. 59, and other cases cited. Reparation awarded. Hartwell & Lester v. D. & H. Co., 102 I. C. C. 703.

(3l) Complainant attacked combination rates charged in 10 cars of fuel oil shipped Oct. 3, 1918 from Tulsa, Okla., to St. Catherines, Que., but before delivery reconsigned to Pittsburgh, Pa., and again reconsigned to Woodlawn, Pa., as unjust and unreasonable, and in violation of section 6. Charged 22.5c to Chicago 27c Chicago to St. Catherines and 24.5c from that point to Woodlawn. Complainant contended rates were to East St. Louis, Ill., 17.5c, to Pittsburgh 27.5c and beyond 12c. The tariff naming the rate of 26.5c from East St. Louis to Pittsburgh contained no restriction as to routing, and all lines over which shipments moved were parties to the tariff. The actual route of movement was Frisco to East St. Louis, C. & E. I., to Chicago, G. T., to St. Catherines and Buffalo Pennsylvania to Pittsburgh, and P. & L. E., to Woodlawn. The route of movement was very circuitous, but no question of reasonableness is involved. HELD, rate attacked inapplicable, and applicable rates were those contended by complainant, reparation awarded. Kyoleum Co. v. Director General 104 I. C. C. 1.

(3m) Complainant attacked as illegal in violation of section 6 and unreasonable in violation of section 1 freight charges collected on five cars of what it describes as cottonseed hull fibre or shavings, from Sylacauga, Ala., to Meridian, Miss., in December 1921 and April 1922. Shipments moved C. of Ga., to Birmingham and Southern and AGS beyond. The shipments were originally billed as cottonseed hullfiber or shavings, but the description was changed by the Southern Inspection Bureau to cotton linters. During the entire period of movement a class A rating was applicable on fibre or shavings in carloads. In Dec. 1921 when two of the shipments moved, cotton rates were applicable on cotton linters. In April 1922 when the remaining three cars were shipped, cot-

ton linters took sixth class rate. Charged on two shipments 91.5c and on three 63c. The rates applicable on cotton linters were 86.5 and 68.5c, respectively. The applicable rate on cottonseed hull fibre or shavings was a combination of 20.5c to Birmingham and 27.5c beyond. The commodity contained in the five cars, as shown by samples submitted, is more nearly analogous in appearance to the sample of second cut linters than to the sample of fibre or shavings. In the absence of a tariff provision defining linters and fibre or shavings, the question of whether or not the material shipped was fibre or shavings or linters is one of fact which must be determined upon the evidence submitted. HELD, applicable rate was combination of 48c, reparation awarded. Speir Co. v. A. G. S. Ry. 107 I. C. C. 161.

(3n) Following Joseph Iron Co., 37 I. C. C. 591; 40 I. C. C. 525 proportional rate found not so properly restricted as to make its application definite, clear. or ascertainable, and that the restriction thus failing, the rate found an intermediate within the meaning of section 4. Defendant attempted to distinguish the cited cases from the present one on the ground that here the through rate is published in a commodity tariff, which is a natural place to look for it. But the test is whether the restriction itself gives a definite reference by which the presence or absence of the through rate may be ascertained, thus the rates here are in violation of the aggregate-of-intermediates-clause of section 4 and are prima facie unreasonable. Borden Co. v. A. A. R. R. Co., 100 I. C. C. 153.

(3o) Upon contention of complainants that during Federal control the rule under section 2 (e) of General Order No. 28 of director general must govern all tariffs, and that as it limits the power to increase rates, the legality of the rates depends upon the observance of this condition. HELD: Legal rates must be determined by the words of the published tariffs themselves, rules or provisions of that order to the contrary notwithstanding. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 226.

(3p) Commodity rates on watermelons and vegetables from points in California to Spokane, Wash., found applicable. Complainant contended that a lower proportional Class C rate was applicable but tariff carrying that rate provided that the rates therein could not be used where through rates were established. There was no tariff authority for departing from the use of the published through commodity rate. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 225, 226.

(3q) Upon further hearing, finding in original report, 83 I. C. C. 267, that fourth class rating and rates on galvanized corrugated riveted sheet-iron and sheet-steel culverts or culvert pipe, from Pueblo, Colo., to points in certain other States were applicable and not unreasonable, but unduly prejudicial, affirmed. Rate alleged applicable was restricted in its application to pipe, n. o. i. b. n., and since culverts were specifically indexed by name, was obviously inapplicable. Colorado Culvert & Flume Co. v. A., T. & S. F., 100 I. C. C. 311.

(3r) Class A rates on shipments of household and office electric fans and motors from Springfield, Ohio, to San Francisco, Calif., found not inapplicable or unreasonable. Lower combination sought, composed of a factor applicable on "sugar-making machinery" includnig "fans" and "motors" found not applicable to complainant's shipments which could not be put to any normal use in connection with machinery in a sugar mill. Therefore, no violation of the aggregate-of-intermediates provision of the fourth section existed. Robbins & Meyers Co. v. C., C., C. & St. L. Ry. Co., 100 I. C. C. 418.

(3s) Rates on clothing, n. o. s., applied on l. c. l. shipments of overalls from Cincinnati, Ohio, to Pacific coast terminals and certain other western territory, found applicable since overalls were not of a value entitling them to the application of the commodity rates on overalls, but unreasonable to extent they exceeded lower contemporaneous rates on clothing restricted as to value. Reparation awarded. Crown Overall Mfg. Co. v. Director General, 100 I. C. C. 471.

(3t) Rates on wheat bran since January 7, 1922, found to have been and are those specifically named in the tariffs on bran, and that rates on mill feed, mill stuff, or animal and poultry feed have not been and are not applicable on wheat bran. Abilene Flour Mills Co. v. A. S. Ry., 101 I. C. C. 14, 17.

(3u) It is an elementary rule of tariff interpretation that in the absence of am-

biguity, a general tariff description of a commodity does not take precedence over a specific commodity description. Abilene Flour Mills Co. v. A. & S. Ry., 101 I. C. C. 14, 17.

(3v) Fifth-class rates on sugar from Philadelphia, Pa., and New York, N. Y., to St. Louis, Mo., found inapplicable in that a lower commodity rate was contemporaneously in effect. The item in tariff publishing commodity rate contained a note restricting rates to proportional application only in so far as east Mississippi River crossings are concerned. It may have been the intention of carriers to so restrict application of the rate to all points listed in the item but the tariff does not effectuate that intention in so far as St. Louis is concerned. The language of the tariff rather than intention of the framers is controlling. Defendants state that use of rates on local shipments to St. Louis will result in fourth section violations, but this does not constitute a ground for holding that they apply other than in accordance with the terms of the tariff. Refund of overcharges directed. National Candy Co. v. P. R. R., 101 I. C. C. 43.

(3w) Rates on pianos, c. l. and l. c. l., from Hammond. Ind., and Steger and Oregon, Ill., to Birmingham, Ala., found not unreasonable or unlawful. Complainant contends that some of the shipments were misrouted depending upon his interpretation of the tariffs contemporaneously in effect naming lower rates from the same points to Mobile, Ala., claiming that such rates were applicable to Birmingham under the so-called intermediate rule contained in those tariffs. It is found that complainant paid the higher rates charged without protest for a long period, did not present his complaint until more than six months after the charges on the last shipment were paid and one day after the intermediate rule was changed so as to preclude his contention, and presented no request to the commission for suspension of the new rule which, under the construction contended for, effected increased rates on his traffic. This tends to show that complainant was not misled to his damage by the intermediate rule under consideration and no evidence as to unreasonableness was presented. Forbes & Sons Piano Co. v. A. G. S. R. R., 101 I. C. C. 74.

(3x) Rates charged on shipments of sand and gravel from Scottsville, N. Y., to Kodak Park Siding, which is within the general switching limits of Rochester, N. Y., found applicable. A lower rate was published to Rochester and certain specific stations in Rochester, all named in tariff index, but this enumeration of stations obviously excluded the application of the lower rate to Kodak Park Siding, which was not named therein. Eastman Kodak Co. v. Director General, 101 I. C. C. 103.

(3y) Upon reconsideration, class rate charged on l. c. l. shipment of iron pipe fittings in lieu of lower commodity rate, found applicable and not unreasonable. The word "carloads" appearing in tariff in connection with lower commodity rate on iron and steel articles was part of the commodity description, and answered requirement of the words "unless otherwise specified" in tariff note, which contained a list of iron and steel articles, including pipe fittings, in either c. l. or l. c.l. thereby excepting l. c. l. shipments from application of commodity rates. While it was the intention of carriers to omit all reference to l. c. l. shipments in connection with commodity rates, through oversight this was not done; however, intention of framers of tariffs is not controlling. Original report, 93 I. C. C. 79, reversed. Murray-Egan-McLeod Co. v. P. R. R., 101 I. C. C. 233.

(3z) Upon reconsideration, original report 93 I. C. C. 689, reversed and class rate applicable on "hand vehicles" charged on bicycles, in crates, found inapplicable to extent it exceeded a commodity rate contemporaneously maintained on "Light and heavy non-self-propelling freight or passenger vehicles." Terms "passenger" and "freight" as used in this description are merely designations of the means of conveyance for persons and things, respectively. A bicycle is a means of conveyance or travel for persons, is non-self-propelling, and therefore comes within definition of a light "non-self-propelling passenger vehicle." Reparation awarded. United Cycle Supply Co. v. B. & O., 101 I. C. C. 334.

(4a) Exaction of local rates and charges for transportation of lard shipped from points of origin west of Buffalo and Black Rock, N. Y., in tank-car loads, to Jersey City, there unloaded at complainant's plant and put into barrels, tierces, and other containers and forwarded to ship-side points within free lighterage limits of New York Harbor, for export, found not unreasonable but in certain instances illegal. Inbound and outbound movements to and from transit points were separate shipments to which

separately established rates were applicable except and to extent that there were explicit tariff provisions connecting the inbound and outbound movements in such manner as to establish the fiction of a continuous through movement. Reparation awarded. Armour & Co. v. D., L. & W., 101 I. C. C. 337.

(4b) Inbound and outbound rates charged on sand moving from Montezuma, Ind., to Illiopolis, Ill., there placed for unloading and subsequently reconsigned to Buffalo, Ill., found legally assessed, notwithstanding fact that shipments could have moved via a less circuitous route taking a lower rate. Applicable reconsignment tariff provided that if shipment has been placed for unloading at original billed destination and reforwarded therefrom without being unloaded, to a point outside the switching limits, it will be subject to published rates to and from reconsignment point. Here the cars were so placed and reforwarded and combination assessed was therefore applicable. Reconsignment charges, however, assessed in addition to rates to and from reforwarding point found unreasonable, following 89 I. C. C. 236 and 91 I. C. C. 615, and reparation awarded. Meneely Co. v. C., I. & W., 101 I. C. C. 389.

(4c) Applicable rate on oil-well outfits and supplies, which was the same as the rate contemporaneously in effect on machines and machinery, assessed on rig irons, found not unreasonable, discriminatory, or unduly prejudicial. In 80 I. C. C. 335, the commission found that rates on rig irons were unreasonable and should be lower than on oil-well outfits. But commodities here shipped consisted principally of castings and record does not conclusively show whether contents of cars consisted chiefly of castings or of partly finished and partly assembled machines or machinery. It is clear, however, that they were oil-well outfits to be used as rig iron drilling outfits for drilling oil or gas wells. Marion Machine Co. v. L. A. & S. L., 101 I. C. C. 599.

(4d) Rating on "bags, bedding, blanket or clothing," assessed on shipments of bed sacks found inapplicable. Shipments were not entitled to commodity rate on cotton bags but rating on "dry goods, n. o. i. b. n." was applicable since sacks were neither bedding nor bags but simply cloth articles for which no specific provision had been made in the classification or commodity tariffs. Refund of overcharges directed. Triad Corp. v. C. of G. Ry., 101 I. C. C. 687.

(4e) Rates on scrap steel generally are understood to apply on scraps or pieces of steel useful only for remelting. The words "value for remelting purposes only" defines the nature of the article, and they do not make the rate to be applied dependent upon its use. Steel articles which have a recognized commercial value other than that of the elementary metal from which they are manufactured do not properly come within the description scrap steel. Southern Steel Rolling Mill v. L. & N. R. R., 109 I. C. C. 539, 541.

TAXES

See Act to Regulate Commerce I (h); Evidence §57½a.

(a) Under a state statute providing for the levy of an excise tax on foreign corporations doing business in the state, assessed on such proportion of their authorized capital stock as represents the property owned and used and the business done in the state, where a manufacturing corporation has all of its property in the state, where it sells its product, some to residents of the state, but the greater part to purchasers residing in other states, including the latter sales in computting the tax imposes a direct and substantial burden on interstate commerce, and is unauthorized and unlawful. Air-way Electric Appliance Corporation v. Archer, 3 Fed. (2d) 669.

(b) Cars let to railroad corporations and used exclusively in interstate commerce are taxable in state, and tax is ap-

portionable among counties of state according to mileage. Union Tank Car Co. v. Day (La., 1924), 101 So. 581.

(c) A tax on net income is not a burden on interstate commerce, although included therein is income derived in whole or in part from interstate commerce. State v. Gulf, M. & N. R. Co. (Miss., 1925), 104 So. 689.

(d) Where gasoline has been delivered to consignee within state, placed in its tank, and is being sold therefrom, Interstate Commerce Law (U. S. Comp. St. § 8563 et seq.), has no application to state's right to taxes on gasoline so sold. Charleston Oil Co. v. Carter (S. C., 1925), 128 S. E. 8.

(e) The Massachusetts Corporation Tax Act imposing an excise tax on foreign corporations, measured by proportion of capital attributed to transactions within state and income derived therefrom, violates the commerce clause (Const. U. S. art. 1, § 8, cl. 3), by taxing interstate business, when applied to a foreign corporation maintaining in the state only a local sales office from which its salesmen solicit orders subject to approval at principal office, and contravenes Const. U. S. Amend. 14, by attempted taxation of property without state. Alpha Portland Cement Co. v. Commonwealth of Mass., 45 Sup. Ct. 477.

(f) Const. Amend. 14, does not permit state taxation of property beyond the state borders. Alpha Portland Cement Co. v. Commonwealth of Mass., 45 Sup. Ct. 477.

(g) In view of the commerce clause of the Federal Constitution, a state may not burden interstate commerce under the guise of regulating or taxing intrastate business. Alpha Portland Cement Co. v. Commonwealth of Mass., 45 Sup. Ct. 477.

(h) Pulpwood cut during the winter in the adjacent forests of Cook county, Minn., afloat in the Pigeon river on May 1st and on its way to the booms in Pigeon Bay on Lake Superior, there to await the opening of navigation and the arrival of boats to transport it to its final destination in another state, had not begun its final journey to the latter point so as to become an article of interstate commerce to the extent that it was not taxable as of May 1st in Minnesota. State v. Hughes Bros. Timber Co. (Minn., 1925), 203 N. W. 436.

(i) The Commission's without power to order refund of war taxes. Gulliksson v. Director General 102 I. C. C. 327, 330.

I. DISCRIMINATION IN SERVICE.

See Discrimination; Facilities and Privileges §21.

§1. In general.

(a) A telephone company is a public servant, and as such is required to furnish reasonable telephone facilities to those who desire them and comply with its lawful requirements. Masterson v. Chesapeake & Potomac Telephone Co., 299 Fed. 890.

ALL OTHER CITATIONS

Davis v. W. U. T. Co., 88 I. C. C. 489.

§1a. Rules and Regulations.

(a) Defendant owns and operates a telephone system within West Virginia, and, in connection with other telephone corporations forming the Bell system, between Huntington and points in other states. Complainant is engaged in the construction of buildings and public highways in and adjacent to Huntington, and in the conduct of its business uses defendants telephone service as a means of transmitting intelligence between its place of business and points within the state and points in other states. The same instruments are used for the

transmission of both state and interstate messages. In order to obtain the use of this service complainant is required to make a cash deposit of $40 with defendant as security for the payment of bills that become due. Complainant alleged that the requirement of said cash deposit by defendant as a condition precedent to the right and privilege of using its telephone service subjects complainant to a charge therefor that is unjust, unreasonable and unduly prejudicial. Defendant is within its rights in requiring a cash deposit of subscribers who arbitrarily or otherwise fail to pay their bills promptly, but the rule making provision for the deposit specifies no definite amount that may be required, nor does it provide any definite means for determining what it shall be. The amount of the deposit required of complainant does not appear to be unreasonable, and no undue preferences of other subscribers to the undue prejudice of complainant is shown. Defendant might reasonably require a deposit equal to, but not in excess of, the sum of accrued charges for any two successive months during the 12 months period next preceding the date the services were withdrawn on account of nonpayment or failure to pay promptly. HELD, cash deposit of $40 not unreasonable or unduly prejudicial, complaint dismissed. Huntington Engineering Co. v. C. & P. T. Co., 112 I. C. C. 377.

II. CHARGES.

§2. In general.

(a) Five-year period from 1916 to 1920 held fair period in which to take average costs of labor and material in determining value of telephone company's property for rate-making purposes. Indiana Bell Telephone Co. v. Public Service Commission of Indiana, 300 Fed. 190.

(b) A subscriber to and for defendant's telephone service is entitled to have his name in and be furnished with directories containing his name and the number of his telephone properly arranged. Masterson v. Chesapeake & Potomac Telephone Co., 299 Fed. 890.

ALL OTHER CITATIONS

Consolidated Press Asso. v. W. U. T. Co., 85 I. C. C. 15.

III. CONTROL AND REGULATION.

See Control and Regulation.

§3. In general.

(a) Permits granted by Secretary of the Interior to construct and maintain an electric power transmission line and a telephone line, used only in connection with maintenance of power line across Indian reservation, under Act Feb. 15, 1901 (Comp. St. § 4946), were not terminated by issuance of patents, not containing a reservation of prior permits, to persons who had made homestead filings on the land, though Act March 3, 1901, §3 (Comp. St. § 4191), relating to rights of way for construction of telephone lines, does not apply. Swendig v. Washington Water Power Co. 44 Sup. Ct. 496.

(b) Interstate transmission of telegram is "Interstate Commerce," and governed by federal law (Act Congress, June 18, 1910). Thos. G. Hardie & Co. v. Western Union Telegraph Co., (N. C. 1925), 128 S. E. 500.

(c) It is common knowledge that in 1851 the telephone had not been invented, and Code 1851, §780, authorizing construction of telegraph lines along highways, had reference only to long-distance telegraphic communication between cities. City of Cherokee v. Northwestern Bell Telephone Co. (Iowa, 1925), 202 N. W. 886.

(d) Telephone company authorized under Code 1873, § 1324, as amended by Acts 19th Gen. Assem. c. 104, Code 1897, § 2158, to maintain a long distance line through municipalities without obtaining a franchise, HELD: Not denied due process of law by sections 775, 776, requiring franchise to maintain a local exchange. City of Cherokee v. N. Western Bell Telephone Co., (Iowa, 1925) 202 N. W. 886.

(e) Telephone company which acquired right under Code 1873, § 1324, as amended by Acts 19th Gen. Assem. c. 104, Code 1897, § 2158, to carry a long distance or toll line through any city or town and to occupy necessary streets for such purpose without obtaining franchise from municipalities, HELD: Not authorized, in view of Code 1897, §§ 775, 776, to maintain a local exchange and use streets and alleys of such places without first obtaining franchise. City of Cherokee v. N. Western Bell Telephone Co. (Iowa, 1925), 202 N. W. 886..

§3½. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Under Transportation Act, § 435 (Comp. St. Ann. Supp. 1923, § 8592), the Interstate Commerce Commission may not prescribe depreciation rate for public utilities for other than bookkeeping and reporting purposes, except after investigation, and where it has made no investigation, and has fixed no rate proper for rate-making purposes, a state Public Service Commission has right to fix depreciation rate. Indiana Bell Telephone Co. v. Public Service Commission of Indiana, 300 Fed. 190.

(b) By the amendatory act of June 18, 1910 telephone and telegraph companies were declared to be common carriers and the Commission was given jurisdiction and control over their interstate rates and practices, as well as the rules, regulations, conditions, and restrictions affecting their interstate rates. That telephone companies whose lines extend from one state to another, either of themselves or in connection with the lines of other companies, are engaged in interstate Commerce and that messages passing over their lines from one state to another constitutes such commerce, is indisputable. Any rule or regulation affecting or obstructing such commerce is within the jurisdiction of the Commission. Huntington Engineering Co. v. C. & P. Tel. Co., 112 I. C. C. 377, 379.

ALL OTHER CITATIONS

Davis v. W. U. T. Co., 88 I. C. C. 489.

IV. LIABILITY FOR DAMAGES.

§4. In general.

(a) Power of Public Service Commission under Public Service Commission Law to determine whether rates of telegraph corporations are just and reasonable, and therefore lawful, necessarily includes the power to determine the reasonableness and lawfulness of limitations of liability which are integral parts of the rates. State v. Public Service Commission (Mo. 1924) 264 S. W. 669.

(b) Where undisputed evidence showed that property of a telephone company was taken over by the federal government, on July 31, 1918, and that the government was operating the property at the time of the accident, the court should have determined as a matter of law that the government was in possession and control at the time of the accident, and it was error to submit the question to the jury, and a somewhat ambiguous admission in telephone company's answer could not prevail over a patent fact, of which the court might have taken notice without proof. Wilks v. New York Telephone Co., 203 N. Y. S. 665.

V. PUBLICATION AND TARIFFS.

See Tariffs II.

§5. In General.

(a) Telephone companies are not required to file their tariffs with the commission. Huntington Engineering Co. v. C. & P. Tel. Co., 112 I. C. C. 377, 378.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) The Commission is empowered in a proper case to require the use of terminal facilities by a carrier other than the owning carrier. Peoria & Pekin Union Ry. Co., 93 I. C. C. 3, 22.

(b) In view of Transportation Act, § 400, par. 3 (U. S. Comp. St. Ann. Supp. 1923, § 8563), amending Interstate Commerce Act §1, where service rendered by terminal railway was that of common carrier, it was subject to rules and regulations to which common carriers are subject, including Interstate Commerce Act, §6, par. 1, as amended by Act June 29, 1906, § 2 (U. S. Comp. St.§ 8569), of which provides for filing schedule of rates, fares and transportation charges. Chicago & E. I. Ry. Co. v. Chicago Heights Terminal T. R. Co. (Ill., 1925), 147 N. E. 667.

(c) The order of the Interstate Commerce Commission in the case of Manufacturers Association of York v. Pa. R. R., 73 I. C. C. 40, where seventeen manufacturing plants in the so-called inter-zone received reciprocal switching and a large number of plants in the so-called outer-zone do not receive it and which practice was found to be unduly discriminatory by the Interstate Commerce Commission, is upheld. United States v. Pennsylvania R. Co., 45 Sup. Ct. 43.

(d) Extension of trackage rights by one carrier to another, enlarged common use of terminals, or establishment of through routes and joint rates, or withdrawal of any of them, could not be ordered by Interstate Commerce Commission except on findings and conditions prescribed in Interstate Commerce Act (Comp. St. § 8563 et seq.), U. S. v. Pennsylvania R. Co., 45 Sup Ct. 43.

(e) Where Interstate Commerce Commission found that use by two railroads of each other's tracks and terminal facilities within certain zone of city as common property which resulted in favoring 17 out of 100 manufacturing plants in city, was unduly prejudicial. Commission could require railroads to desist from practice, leaving them free to remove discrimination by any appropriate action. U. S. v. Pennsylvania R. Co., 45 Sup. Ct. 43.

(f) While Congress has expressed a policy looking to development of public terminals at port cities, it has not delegated authority to the commission to enforce that policy. Scope of the commission's activities is limited by terms of the interstate commerce act, and unless proposed terminal charges are found to be in contravention of some provision of that act it is beyond the commission's power to condemn them. Handling Charges on Cement, Fertilizer, and Salt, 93 I. C. C. 640, 643, 644.

(g) Congress can determine what private property is needed for public purposes but it does not have the right to determine what shall be the measure of the compensation, as that is a judicial question. Consequently when it provided that in the public interest the Commission could require a carrier to give up the use of its terminal facilities to another carrier, Congress was faced with the necessity of not only satisfying the constitutional prohibition that private property shall not be taken for public use without just compensation, but in addition had to provide for a judicial review of the question of compensation at the option of the owning carrier. However, Congress did impose upon the Commission the duty in the first instance, to fix the just and reasonable terms and compensation, for any use that it may require "on the principle controlling compensation in condemnation proceedings." In giving the Commission this direction, it is clear that Congress did nothing more than recognize the constitutional right of a carrier to just compensation in the event that its property or any portion of it, was taken for public use. Hastings Commercial Club v. C. M. & St. P. Ry. 107 I. C. C. 208, 212.

(h) The courts have held in cases involving terminal facilities as have come before them that Congress has fully occupied the field of regulation by placing the control of terminal facilities of interstate railroads in the Commission. Hastings Commercial Club v. C. M. & St. P. Ry. 107 I. C. C. 208, 215.

II. DUTY TO PERFORM TERMINAL SERVICE.

§2. In general.

(a) Proposed new rules, regulations, and practices restricting application of certain transit, terminal, and other privileges and allowances on transcontinental traffic, found not justified. Proposed schedules attempt to restrict rights of individual carriers to extend to shippers such privileges at points on their own lines, as they may see fit, and is in effect tantamount to an attempt to say that carriers may not grant privileges to shippers without consent of the transcontinental bureau, unless such carriers are willing to subject shippers to the application of combination rates. Terminal

Charges on Transcontinental Traffic, 89 I. C. C. 332.

(b) Tracks laid within confines of an industrial plant, placed for furtherance of industrial operations, used principally for intraplant switching, and usually within exclusive control of industry, are not ordinarily to be considered as parts of line-haul carriers' terminal facilities. Jackson Iron & Steel Co. v. Director General, 91 I. C. C. 201, 205.

(c) The terminal service, as used in section 1 of the Act, may include accessorial services in the nature of collection and delivery of freight commonly referred to as store-door delivery. There is nothing in the Act to prevent establishment of such service or publication of charges in connection therewith by carriers subject to the Act. See 27 I. C. C. 347 and 30 I. C. C. 388. Motor-Truck or Wagon Transfer Service, 91 I. C. C. 539, 547.

(d) The requirements of the general public must be met by such an arrangement of terminal facilities as will suit the convenience of the greatest number and enable the carrier best to discharge its public obligations. However, a legal duty is imposed upon all common carriers of frieght to receive for carriage all proper articles tendered at suitable places of receipt. But a carrier is not under legal compulsion to furnish the same terminal facilities for all descriptions of traffic. It may prescribe regulations concerning the receipt and delivery of freight, and what constitutes reasonable terminal facilities depends in part upon the particular locality. National Asso. Waste Material Dealers v. D., L. & W. R. R. Co., 98 I. C. C. 606, 611, 612.

(e) A legal duty is imposed upon all common carriers of freight to receive for carriage all proper articles tendered at suitable places of receipt. A carrier may not select preferred freights and refuse to handle other articles because they are less remunerative or more inconvenient to handle. But it is not under legal compulsion to furnish the same terminal facilities for all descriptions of traffic. National Asso. Waste Material Dealers v. D., L. & W. R. R. Co., 98 I. C. C. 606, 611, 612.

(f) The "just compensation" guaranteed requires that the recompense to the owner for the loss caused to him by the taking of a part of a parcel or single tract of land shall be measured by the loss resulting to him from the appropriation. If the taking of a part has depreciated the usefulness and value of the remainder the owner is not justly compensated by paying only for that actually appropriated and leaving him uncompensated for the depreciation over benefits to that which remains. In recognition of this principle of justice it is required that regard be had to the effect if the appropriation of a part upon the remaining interest of the owner, by taking into account both the benefits which accrue and the depreciation which results to the remainder in its use and value. Hastings Commercial Club v. C. M. & St. P. Ry. 107 I. C. C. 208, 213.

(g) The requirement that "just compensation" shall be paid is comprehensive and includes all elements. Hastings Commercial Club v. C. M. & St. P. Ry. 107 I. C. C. 208, 213.

(h) Public convenience and necessity found to permit abandonment by defendants of such portions of their lines of steam railroad, or all or any portion of the interstate service thereon, as may be incidental to the rearrangement of routes, tracks, and terminal facilities necessitated by the establishment of a union passenger station and terminal in city of Los Angeles, Calif. Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, 460.

§3. Duty to Allow Use.

(a) Complainant alleged defendants refused, under tariff provisions, to accept shipments of rags (except in compressed covered bales) and waste paper at certain freight stations in Manhattan Borough, New York, N. Y., while contemporaneously accepting certain other commodities for shipment at those stations, including new paper and wall paper, and while accepting rags and waste paper without restriction at other stations in New York City and elsewhere, is unreasonable and unduly prejudicial to shippers of waste paper and rags located in Manhattan Borough. There are 109 paper packers and shippers in Manhattan and Bronx Boroughs, New York City, 99 of these shippers being loaded in the vicinity of the downtown pier stations at which defendant refuses to handle the commodities in question. The desirability of segregating commodities which involve an exception-

al fire hazard is apparent, especially at congested points. Defendant has a right and duty in such cases to prescribe such reasonable regulations as will protect it and the general public.

At the time of the first hearing defendant was the only carrier at New York that refused to receive these commodities at its New York piers. Subsequently, the N. Y. C. established an embargo against the handling of waste paper and rags at its St. John Park station. This action is said to have been taken on account of the fire hazard attached to the handling of these commodities at pier stations, but that carrier receives at its pier stations, and defendants accepts without restrictions at the piers under particular consideration, rags (covered), cotton waste, wool waste, and other like articles. Waste paper must be disposed of, and proper facilities should be provided for this purpose. The Commission can not agree that conditions previously existing should by its order be allowed to endanger others and more valuable commodities, and even life itself. In highly congested districts such as Manhattan Island, the matter of providing adequate facilities for the receipt and delivery of freight is a serious problem. The requirements of the general public must be met by such an arrangement of terminal facilities as will suit the convenience of the greatest number and enable the carrier best to discharge its public obligations. HELD: Refusal of defendant to receive shipments of rags (except in compressed covered bales) and waste paper at Piers 41 and 68, North River, Manhattan Borough, New York, not unreasonable. The protection of the public against fire requires that the receipt as freight of rags and waste paper at Pier 13, North River, and Pier 26, East River, Manhattan Borough, should be limited to dry materials, so baled as to prevent loss of pieces from the bales, and reasonably free from loose edges, strips, pieces, fibers or other parts protruding from the bales or surrounding them. HELD: Further, the refusal of defendant to receive shipments of rags (except in compressed covered bales) and waste paper at Pier 13, North River, and Pier 26, East River, Manhattan Borough, New York, is unreasonable to extent that the restrictions preclude the receipt at and shipment from such piers of carload shipments of bales of rags and waste paper, other than dump stock, when packed and offered for transportation in the condition described above. National Asso. Waste Material Dealers v. D. L. & W. Ry., 98 I. C. C. 606.

(b) The carrier's duty to provide reasonable terminal facilities and to receive freight for transportation is equally compelling in case of the instant commodities as of more desirable traffic. But defendant is not under legal compulsion to furnish the same terminal facilities for all descriptions of traffic. Defendant may prescribe regulations concerning the receipt and delivery of freight and what constitutes reasonable terminal facilities depends in part upon the particular locality. National Asso. Waste Material Dealers v. D. L. & W. Ry., 98 I. C. C. 606, 611.

(c) Complainant sought under section 3 paragraph 4 of the act to have the service of the Burlington extended to the city of Hastings, Minn., by the use of the "terminal facilities" of the Milwaukee. Original report 69 I. C. C. 489. The Milwaukee serves Hastings and the Burlington, although now located within the corporate limits of that city, is on the opposite side of the Mississippi river. There are no houses or industries in the part of Hastings served by the Burlington. It is nothing but barren country. The Burlington never voluntarily assumed any service obligation to Hastings, and maintained no station and did not stop its trains there until ordered to do so by the Minnesota Commission after the incorporation into Hastings city limits, by a special act of the Minnesota Legislature, of the area on the north bank where the Burlington tracks are located. The Burlington has physical connection with the Milwaukee, which has a bridge across the river, but no interchange arrangements are in effect at that point. The connection is at St. Croix Junction, where an electrically operated interlocking plant is located. Freight between Hastings proper and the Burlington station must be trucked a distance of several miles. The conditions which the Cimmission must determine antecedent to the exercise of the power conferred in the section of the law which was invoked are the (1) public interest, and (2) practicability, without substantially impairing the ability of the owning carrier to handle its business. In the instant case any traffic

gained by the Burlington would be at the expense of a corresponding loss to the Milwaukee and although this is not controlling, the Commission should consider it in arriving at its conclusion as to the public interest. The cost to be met by the user carrier, as compared with the traffic served, is an important element. The Commission must consider the financial consequences to the carriers involved and the inconveniences that may result to the shipping and traveling public in general. The record upon which the former report was based contained no evidence as to the compensation on the principles controlling in condemnation proceedings. Fairness demands that the whole question of "public interest" be now reconsidered on the more complete record before the Commission, especially as no order was entered and the record was expressly held open. The complaint in this case was filed shortly after there had been a severe car shortage on the Milwaukee, which had temporarily compelled the mill in question to reduce its output, and the record makes it clear that primarily this mill wants to have the advantage of the Burlington car supply in the event of future car shortages. Essentially the question here is whether the desires and needs of this one industry and the natural desire of Hastings for service by an additional trunk line, constitute the public interest contemplated by the statute. That it would be to the interest of Hastings and its shippers is apparent, but the Commission must consider both the convenience of shippers at Hastings and of shippers elsewhere who depended upon these carriers for service. In addition the rights of the individual carriers must be considered. HELD, previous holding reversed, and joint use of the terminal facilities of the Milwaukee at Hastings, Minn., by that carrier and the Burlington has not been shown to be in the public interest within the meaning of the statute, complaint dismissed. The Commission comments to the Milwaukees consideration the matter of the publication of a reasonable switching charge between industries at Hastings, on the one hand, and the Burlington connection on the north side of the river on the other, such switching charge to be appropriately restricted so as not to apply on traffic destined to or received from points served by both Milwaukee and Burlington routes, or, if the carriers prefer, that they publish joint rates from and to such points. Hastings Commercial Club v. C. M. & St. P. Ry., 107 I. C. C. 208.

(d) Just compensation rests on equitable principles and it means substantially that the owner should be put in as good position pecuniarily as he would have had if his property had not been taken. Hastings Commercial Club v. C. M. & St. P. Ry. 107 I. C. C. 208, 213.

(e) The provision in section 3, paragraph (4), for joint use of terminal facilities expressly covers only facilities existing when the requirement is made. Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, 426.

(f) Joint use by defendent steam railroads of such main-line tracks of each other as may be incidental, and necessary or convenient, to the proper operation of a union passenger depot and terminal established as indicated herein, found to be in public interest and to be practicable, without substantially impairing the ability of the carrier or carriers owning or entitled to the enjoyment of such track or tracks to handle its or their own business. Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, 460.

(g) Extension by defendants of their main lines of steam railroad so as to reach and serve such union passenger station and terminal as they may construct and establish in a described portion of city of Los Angeles, Calif., and extension of such main lines to provide for rearrangement of their passenger and freight routes incidental to the convenient and proper operation of such union station and terminal, found reasonably required in the interest of public convenience and necessity, and expense involved therein found not to impair the ability of defendants to perform their respective duties to the public. Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, 460.

(h) A carrier has no absolute right to deny connecting lines the use of its terminal facilities. Where public convenience makes it desirable, such facilities must be kept open. The proprietary carrier is entitled to proper compensation, and is not without means of protecting itself against competition. Switching at Beaumont, 112 I. C. C. 125, 127.

§5. Reasonableness of Charges.

See Bridges and Tolls; Evidence §57½; Reasonableness of Rates.

(a) Practice of Peoria & Pekin Union Ry., in assessing charges at and in the vicinity of Peoria, Ill., for interchange service between connections with its tenants and rails of the Minneapolis & St. Louis, and St. Louis, Springfield & Peoria, an electric line, while contemporaneously performing a like service between connections with its tenants and rails of C., B. & Q., and Rock Island without charge, found unjustly discriminatory and unduly prejudicial. Peoria & Pekin Union, 93 I. C. C. 3, 23.

(b) Whether line-haul rates include terminal services to points of loading and unloading in large industrial plants is a question which must be determined upon facts and circumstances of each particular case. The question is so closely related to the industrial railway problem that it has seldom been considered apart from question of whether an industrial railway serving a particular industry was or was not a common carrier. Pressed Steel Car Co. v. Director General, 93 I. C. C. 224, 229.

(c) Under the law as it now stands carriers are under no obligation to make their terminal charges with a view to insuring a profit upon operations of other public terminals. Nor does it seem to the commission to have been contemplated that expressed policy of Congress of developing public terminals at port cities is to be carried out by imposing unnecessary expense upon shippers and traffic, which would defeat a policy of real terminal improvement. Handling Charges on Cement, Fertilizer, and Salt, 93 I. C. C. 640, 644.

(d) Fact that terminal costs at Chicago should be somewhat higher than the average in c. f. a. territory, does not justify imposition of a disproportionate share of those costs upon short-haul traffic. Indiana Chamber of Commerce v. A. T. & S. F., 95 I. C. C. 177, 179.

(e) Carriers may impose charges necessary to compel removal of freight from their terminals and the prompt release of equipment. Providence Fruit & Produce Exchange, 36 I. C. C. 307. Hunter v. N. Y., N. H. & H., 96 I. C. C. 57, 60.

(f) The cost at large terminals in southern territory incident to the receipt or delivery of l. c. l. traffic is probably in the neighborhood of 10 cents per 100 pounds, including a reasonable allowance for return on investment. This compares with 12 cents per 100 pounds estimated by carriers for Atlanta, Ga., and Chattanooga, Tenn. Data here submitted are inadequate to support any conclusion with respect to similar cost at small local stations. Southern Class Rate Investigation, 100 I. C. C. 513, 638.

III. STATUS OF TERMINAL ROADS.

§7. In General.

(a) Terminal Railroad Association and subsidiary companies HELD: "Common carriers" subject to regulation by Interstate Commerce Commission. Terminal R. Ass'n of St. Louis v. United States, 45 Sup. Ct. 5.

(b) Terminal railways are "common carriers." Chicago & E. I. Ry. Co. v. Chicago Heights Terminal T. R. Co. (Ill., 1925), 147 N. E. 666.

(c) Interstate Commerce Act, § 3, as originally enacted (Compt. St. § 8565), providing that prohibition of discrimination between connecting carriers in respect to facilities for interchange of traffic, rates, and charges should not be construed as requiring carrier to give use of its tracks or terminal facilities to another carrier, was intended to make clear that mere grant to one carrier of use of such facilities and their refusal to another does not make preference illegal. U. S. v. Pennsylvania R. Co., 45 Sup. Ct. 43.

§10 Discrimination.

See Discrimination; Facilities and Privileges §21.

(a) This report has to do with charges of the Peoria & Pekin Union for intermediate switching at and in the vicinity of Peoria, Ill., considered in former reports 68 I. C. C. 412 and 77 I. C. C. 43. Peoria is in Peoria county, on the west bank of the Illinois river. Directly across the river to the east is East Peoria. Pekin is about 9 miles south of Peoria on the east bank of the river. The Peoria-Pekin switching district includes Peoria, East Peoria and Pekin. East Peoria is within the Peoria switching district, but not within the municipal limits of Peoria. The Rock Island enters Peoria from the northeast and the Burlington, North-

western and M. & St L. enter from the northwest by lines practically parallel. The rails of the Rock Island, the Burlington and M. & St. L. terminate at Peoria. The Northwestern has a line extending to the south on the west side of the river. The Big Four, C. P. & St. L., and I. C. terminate in Pekin. The C. & A. extends through Pekin to a junction with the Union in the vicinity of Grove. The L. E. & W., T. P. & W. and Pennsylvania approach the Peoria district from the east, the latter two over the rails of the T. P. & W. None of these so-called east side lines has rails into Peoria proper, although they hold themselves out to the public as serving Peoria. Entry into that city is effected by means of the Union, which has a double track line on the east side of the river between Pekin and East Peoria, with a bridge crossing at the latter point, and a single track line on the west side of the river from Peoria to a point across the river from Pekin. The P. R. T., referred to as the Terminal, the stock of which is owned jointly by the Rock Island and Alton, has a line extending southward from Peoria on the west side of the river to Pekin, in addition to certain terminal and industrial facilities. The Union is conceded to be a common carrier and the Commission has recognized it as such in 26 I. C. C. 226. In February, 1881, the Union entered into contracts with the predecessors in interest of the Big Four, T. P. & W., C. P. & St. L., and I. C., which obligated the Union to perform certain terminal services for those lines and granted them certain rights in the properties and facilities of the Union. Contracts of similar tenor were afterwards executed with other steam railroads in the Peoria district, including the M. & St. L., but not with the Burlington or the Rock Island. The Pennsylvania and Alton have contractual rights with the Union but own no part of the latter's capital stock. The carriers serving Peoria under these contracts are commonly known as tenant lines. Some of the contracts have expired and have not been formally renewed, the tenants holding over under the provisions thereof. The contract with the M. & St. L. expired on March 31, 1921, and that company, instead of continuing its relationship with the Union, made arrangements with the Rock Island for such additional facilities as it deemed necessary. The contracts provide that the tenant lines of the Union shall pay reasonable charges for transferring freight cars to and from connecting railroads at a uniform rate per car previously fixed by the Union, to be charged to all companies for such service without discrimination, to approximate the actual cost of service as nearly as practicable, and to include charges for making up trains. The withdrawal of the M. & St. L. from its arrangement with the Union precipitated the present controversy. The contracts, clearly contemplate that the Union shall be compensated for its services and the right of the Union to make transfers for all companies and persons desiring such services is expressly reserved. While the proprietary lines are in a position to influence the policies of the Union, the record does not disclose that the Union has been reduced to the status of the Minneapolis Eastern, 247 U. S. 490, nor can the Union be looked upon as a legal fiction devised to cover up discriminatory charges. The Union is a property of some size and does a very considerable business on its own account and in its own right. The Commission has found that the Union is an independent common carrier. As such it is entitled to assess reasonable and otherwise lawful charges for transportation services which it renders. Such charges should be filed and published in accordance with the provisions of section 6 of the act. Ordinarily the service of making up and breaking up trains is an operating incident compensation for which is included in the transportation rate. In view of the situation here existing, however, where the make up and break up service is rendered in some instances and not in others, and in still others is the only service performed by the Union, it is the opinion of the Commission that the charge for that service should be separately stated. Where the Union performs an intermediate service in connection with traffic moving thru Peoria at joint rates, it should concur in such joint rates and receive divisions thereof, the divisional arrangements to be so adjusted as to, in effect, result in the absorption of the Union's division by the line that delivers the traffic to it. This overrules Conf. Ruling 341. HELD: The charges proposed from the rails of the Terminal and the practice of the Union in assessing charges for

the interchange service between connections with its tenants and the M. & St. L., and Traction, while contemporaneously performing a like service between connections with its tenants and the Burlington and Rock Island without charge, are unjustly discriminatory and unduly prejudicial against the M. & St. L., Terminal and the Traction, and that increased charges to shippers under joint rates through Peoria or under combination rates breaking on Peoria have not been justified. The principal parties to the record have been so concerned with what were conceived to be their rights in the premises that slight interest apparently has been shown in the amount of the charges for the services of the Union. While not unmindful of the controversial character of these proceedings, the Commission believes that the existing unsatisfactory terminal situation at and near Peoria can be corrected by the carriers by the exercise of a spirit of mutual accommodation such as has been displayed at other important terminals. Peoria & Pekin Union Ry. Co., 93 I. C. C. 3.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Adjacent Foreign Country; Interstate Commerce Commission I; Jurisdiction of Commission; Rail and Water Rates (ff) (rr) (ss).

(a) The Commission has no power under section 15 to prevent the cancellation of through routes and joint rates voluntarily established by the carriers, when the circumstances and conditions are such as would not warrant an order to compel arrangements if not already in effect. Jackson Traffic Bureau v. A. & V. Ry., 92 I. C. C. 89, 92.

(b) Paragraph 3 of section 3 of the act provides that all carriers shall afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines and that they shall not be discriminatory in their rates, fares and charges between such connecting lines. It follows, therefore, that where the rail lines to and from the ports of interchange with the barge line participate with rail lines, operating between such ports, in through all rail routes and joint rates from and to the points covered by the barge lines petition, the Commission has power, not only to require the establishment of through routes in connection with the barge line, but also to prescribe joint rail barge rail rates which will be nondiscriminatory, under the above provision of the act, as compared with the corresponding joint all rail rates. U. S. War Department v. A. & S. Ry., 92 I. C. C. 528, 546.

(c) Under paragraph 3 of section 15 of the act the Commission is empowered, upon proper showing, to prescribe through routes such as are desired and the maximum rates to be applied thereover. U. S. War Department v. A. & S. Ry., 92 I. C. C. 528, 546.

(d) In view of Interstate Commerce Act, as amended in 1906 and in 1910 (Comp. St. §8563 et seq.), an order establishing additional through routes on express matter to secure competition HELD not shown to be unreasonable, notwithstanding time required for delivery over existing routes was as short as it would be over competitive routes. United States v. American Ry. Express Co., 44 Sup. Ct. 560. Southeastern Express Co. v. Same, 44 Sup. Ct. 560. Southern Traffic League v. Same, 44 Sup. Ct. 560.

(e) Where connecting rail lines participate in all-rail through routes and joint rates in which intermediate rail carriers operating between a barge line's ports also participate, the commission has power to require establishment of a through route in connection with the barge line and to prescribe a joint rail-barge-rail rate which is differentially lower than the corresponding all-rail rate, provided the differential fairly reflects the lower cost and value of the barge line's service. U. S. War Dept. v. A.. & S. Ry., 92 I. C. C. 528. 547.

(f) A federal court holds that where the Interstate Commerce Commission finds the through rate in excess of the combination of intermediates to be unreasonable and awards reparation, recovery can not be had in the federal court on petition to enforce such order although the Commission finds the complainant has been damaged unless in the federal court such complainant specifically alleges special damages. Patterson v. Louisville & N. R. Co., 2 Fed. (2) 592, 593.

(g) To give practical effect to section 15 for establishment of through routes, limitations on the commission's power in paragraph (4) must be interpreted as prohibiting the commission from requiring a carrier to turn traffic over to a connecting line when to do so would require participation in a through route embracing substantially less than the entire length of its line. See 47 I. C. C. 643, 722, and other cited cases. Rochester Switching Case, 95 I. C. C. 30, 47, 48.

(h) The commission is without authority to require establishment of joint through rates to points in Canada. New Orleans Joint Traffic Bureau v. A. & A. R. R. Corp., 95 I. C. C. 77, 82.

(i) Contention that commission is without jurisdiction to prevent cancellation of joint rates from points in Alabama to Canadian destinations not sustained. It is the commission's duty to see that no inequalities in rate levels and no violation of act result from tariff changes. Lumber from Alabama to Canadian Points, 96 I. C. C. 709, 710.

(j) The power of the Commission to establish through routes and joint rates which is invoked is derived from section 15 (3) of the act, and the exercise of that power is limited to instances where

the through routes and joint rates sought are "necessary or desirable in the public interest." Fort Smith S. & R. I. R. R., v. A. & V. Ry. 102 I. C. C. 708, 711.

ALL OTHER CITATIONS

Northwestern Clay Mfg. Co. v. R. I. S. Ry. Co., 88 I. C. C. 132.

§2. What is through route or "Common arrangement."

See Crimes; Tariffs §10.

(a) It should be understood that where the term "carriers under the same management and control" is used, it refers to carriers generally controlled through ownership, lease, or otherwise, to the extent of controlling traffic policy, even though separate corporate entity may be maintained. Livestock to, from, and between points in the southeast, 91 I. C. C. 292, 295.

(b) Lines which are under common control and management, though owned by separate corporations, shall be deemed single units for rate making purposes. Livestock to, from, and between points in the southeast, 91 I. C. C. 292, 295.

(c) "Carriers under same management and control:" Term understood to refer to carriers generally controlled through ownership, lease, or otherwise, to extent of controlling traffic policy, even though separate corporate entity may be maintained. Blackshear Mfg., 87 I. C. C. 654, 664. Livestock to, from and between Points in the Southeast, 91 I. C. C. 292.

(d) It should be understood that where the term "carriers under the same management and control" is used it refers to carriers generally controlled through ownership, lease or otherwise, to the extent of controlling traffic policy, even though separate corporate entity may be maintained. Livestock to, from and between points in Southeast, 101 I. C. C. 103, 106.

(e) Phrase can not have any meaning broader than that of "through shipments," that is, a shipment subject to application of a through rate or made by combination either of local or proportional rates. Bird v. Director General, 92 I. C. C. 494, 496.

(f) The shipments apparently moved on through billing. A through route therefore already exists, although joint rates do not apply thereover. Arrogast & Bastian Co. v. L. V. R. R. 107 I. C. C. 105, 107.

§3. What is joint rate.

See Infra, §3½.

(a) Where joint rates are concerned each carrier has at least some control over those rates and contributes to the injury complained of. Midland Coal Co. v. M. V. R. R., 91 I. C. C. 571, 573.

(b) But it by no means follows that one carrier can add to the duly established rates of another carrier any amount it pleases, less than its own local rates, and publish and use that sum as a thru rate to points on the line of such other carrier. Such a through rate is neither a joint rate nor a combination rate. It is obviously not a joint rate, for joint rates can be made only by the concurrence or assent of connecting carriers. It is not a combination rate, for one of its component parts has no legal existence or sanction as a separate or local rate. Southern Class Rate Investigation, 100 I. C. C. 513, 681.

(c) The fact that the combination through rates were composed of proportional factors, the use of each of which was dependant upon the use of the other factor or factors, did not invest them with the character of joint through rates. Proportional rates on livestock, 109 I. C. C. 417, 424.

§3½. Participation in Through Traffic.

See Supra §3; Discrimination §7; Interstate Commerce Commission §2, §3.

(a) While there is no express prohibition in the Act against publication of joint rates in connection with a common carrier not subject to the Act, Commission has consistently held that line must be drawn between those carriers whose rates and practices Commission can control and those which it can not control; and upon this line of reasoning it has been Commission's ruling that joint rates can not be made between carriers subject to the Act and those not subject to the Act. Motor Truck or Wagon Transfer Service, 91 I. C. C. 539, 548.

II. ESTABLISHMENT BY CARRIER

See Common Carrier; Distance Rates §1 (r); Electric Lines IV; Proportional Rates I (d), II (t); Rail and Water Rates (ff); Tap Lines §4.

§4. In general.

(a) While there is no express prohibition in the act against the publication of joint rates in connection with a

common carrier not subject to the act, the Commission has consistently held that the line must be drawn between those carriers whose rates and practices it can control and those which it can not control; and upon this line of reasoning it has been its ruling that joint rates can not be made between carriers subject to the act and those not subject to the act. Tariffs embracing motor truck or wagon transfer service, 91 I. C. C. 539, 548.

(b) There is no provision in the law for the establishment of through rates by absorbing the local rates of another carrier for the purpose of establishing through rates over a through route composed of two or more carriers over which through route no joint through rate has been fixed by the agreement. Southern Class Rate Investigation, 100 I. C. C. 513, 681.

(c) Contention that addition of joint-line differentials would place defendant Fort Smith & Western at a disadvantage in competition with other trunk lines can not be sustained. The commission has repeatedly approved the general practice in the Southwest of adding differentials for joint-line hauls, on intrastate as well as interstate traffic, where rates are constructed on a distance basis, and the record does not warrant a reversal of such general practice. Accordingly, joint-line differentials have been prescribed which diminish in proportion to length of haul and are allowed only for distances not exceeding 500 miles. Oklahoma Corp. Commission v. A. & S. Ry. Co. 98 I. C. C. 183, 248.

§6. Circuitous Routes.

See Advanced Rates §18 (8); Long and Short Hauls §9.

ALL CITATIONS

Elimination of Routes on Transcontinental Traffic, 85 I. C. C. 108.

§8. Relation to Similar Points.

See Relative Rates.

(a) Complainant attacked through charges assessed on black strap molasses, carloads, shipped from New Orleans, La., and points taking same rates, to Cincinnati, O., there converted into alcohol and reshipped to destinations in Ohio, Indiana, Illinois, Wisconsin, Minnesota, Michigan, Pennsylvania, New York, Maryland, Connecticut and Massachusetts, as unjust and unreasonable, and, as compared with the through rates contemporaneously maintained from the same points to and from Peoria and Pekin, Ill., as unjustly discriminatory and unduly prejudicial. No evidence was introduced bearing upon the reasonableness of the rates per se, nor upon the issue of unjust discrimination . The gist of the case is the relationship between the through charges on blackstrap molasses in and alcohol out when the distilling is performed at Cincinnati, on the one hand, and at Pekin, on the other hand. The joint rates from New Orleans to the important consuming territories on both blackstrap molasses and alcohol are the same via Peking and Cincinnati. But to the same territory of consumption the full combinations of locals would be materially higher through Pekin. The same conditions applied as between Pekin and distilleries at other eastern points, and in order to alleviate this rate disadvantage transit arrangements were established at Peoria and Pekin by the C. & A., on Oct. 4, 1922 and by the I. C., on Nov. 7, 1922. Complainant seeks the establishment of similar arrangements at Cincinnati. It requires 350 pounds of blackstrap to make 100 pounds of alcohol. Under the transit arrangement in effect at Pekin the distiller pays the joint rate from point of origin to final destination published to apply on blackstrap or edible molasses, whichever is lower, on the 100 pounds of alcohol shipped out. On the 250 pounds of blackstrap which is wasted he pays the local rate from point of origin to Pekin. In addition, he pays a transit charge of 0.5c per 100 pounds on the 350 pounds shipped in. The joint rates from New Orleans to the eastern destinations being the same via both Pekin and Cincinnati, it follows that the distillers at both points would be on the same basis as to the through charges on the 100 pounds of alcohol manufactured, if the same transit arrangement were to be established at Cincinnati. The reason Cincinnati would have an advantage of 12.5c in every instance over Pekin, under such an arrangement, is that the inbound rate on blackstrap to Cincinnati is 25c as compared with a rate of 30c to Pekin. Consequently, the wastage of 250 pounds would cost the Cincinnati distiller 62.5c and the Pekin distiller 75c. The distance from New Orleans to both points is about the same. The tariff of the Illinois Central providing for transit service at Pekin is not concurred in by the Big Four or by any of the lines serving the destina-

tion territory therein indicated. The Big Four performs a switching service to and from the plant of complainants competitor at Pekin, from and to its connection at that point with the Illinois Central. For this service it receives its local switching charges, which are absorbed by the I. C. The Big Four had no impelling motive to grant transit at Pekin and it secures no portion of the charge made for that service. It takes no part in keeping the usual and necessary transit accounts. It is in the position of an agent of the I. C., a position which is not at all unusual and which is not unlawful because of its lack of concurrence in the I. C., transit tariff. Although various lines, including the Big Four, may participate in all or a partion of the haul of the finished product to its final destination, they do so on basis of their usual proportions of the through rate on alcohol from point of origin to final destination, as they would in any instance where they received shipments of alcohol from the I. C., or other connections. The Big Four can not be found guilty of undue prejudice although it serves both Pekin and Cincinnati. The record shows that it does not grant a similar transit privilege at any point on its lines. The lines which serve Cincinnati from New Orleans, such as the L. & N., and Southern do not reach Pekin with their own rail and have no voice in the establishment of the transit arrangements at that point. Conversely, the I. C., which serves Pekin, does not serve Cincinnati and would be powerless to remove the alleged undue prejudice by establishment of a similar arrangement at Cincinnati. HELD, charges complained of not unduly prejudicial or otherwise unlawful, complaint dismissed. Federal Products Co. v. I. C. R. R. 107 I. C. C. 271.

§9. **Right to favor own line.**

See Discrimination §7, §10; Routing and Misrouting §1.

(a) The intent of section 15 of the act is that if a railroad has traffic in its possession it shall be allowed to handle it by its own line as far as it can unless the public interest will suffer thereby. Jackson Traffic Bureau v. A. & V. Ry., 92 I. C. C. 89, 92.

(b) With certain exceptions a carrier may reserve to itself the long haul on traffic it originates or obtains from connections, but it may not under the guise of so doing restrict the markets in which its shippers may dispose of their products. Such restriction of markets may be as effectually accomplished through the imposition of higher rates over competitive routes as by closing them entirely. Lumber from Alabama and Mississippi, 92 I. C. C. 156, 160.

(c) In establishing a through route the Commission shall not require any carrier, by railroad, without its consent, to embrace in such route substantially less than the entire length of its line, provided that the route over such line is not unreasonably long as compared with another practicable through route which could otherwise be established. L. G. Everist v. C. M. & St. P. Ry., 92 I. C. C. 473, 474.

(d) To give practical effect to the provisions of section 15 for the establishment of through routes, the limitation on power of the Commission in paragraph 4 must be interpreted as prohibiting the Commission from requiring a carrier to turn traffic over to a connecting line, when to do so would require it to participate in a through movement embracing substantially less than the entire length of its line between the points in question. Rochester Switching case, 95 I. C. C. 30, 47.

(e) Commission has declined to require a carrier to participate in a thru route embracing substantially less than the entire length of its line between termini of the through route unless to do so would make such through route unreasonably long as compared with another practicable through route which could otherwise be established. Routing on Livestock, 100 I. C. C. 751, 755.

(fg) Carriers are entitled to the protection of their long haul only when it is over a reasonably direct route. Harriss, Irby & Vose v. B., S. L. & W. R. R., 92 I. C. C. 304, 305.

(h) Upon contention that establishment of through routes and joint rates sought would in several instances short-haul carriers participating in existing routes, in violation of section 15 (4) of the act, and in others divert traffic from existing routes without justification and thereby deprive carriers of traffic long enjoyed, HELD: First objection has no application unless carrier originates the traffic or receives it from a connection,

in which event it should be allowed to transport it as far as it can before delivering it to a connecting line. Relative to second objection, it is equally true that a carrier under usual conditions has no existing right to traffic still in possession of connecting lines. Flory Milling Co. v. C. N. E. Ry., 93 I. C. C. 129, 134.

(i) A carrier can not insist upon its long haul if undue prejudice results. Jackson Traffic Bureau v. G. & S. I. R. R. 102 I. C. C. 259, 260.

(j) Section 15 (4) has no application unless the carrier has originated the traffic or received it from a connection in which event it should under ordinary circumstances be allowed to transport the freight as far as it can before delivering it to a connecting line. On the other hand, it is equally true that a carrier under usual conditions has no existing right in traffic still in the possession of connecting lines. In other words, the right of an originating or intermediate carrier to its long haul is superior to that of a delivering line. Fort Smith S. &. R. I. Ry. v. A. & V. Ry. 107 I. C. C. 523, 524.

ALL OTHER CITATIONS

Simms Oil Co. v. H. & T. C. R. R. Co., 85 I. C. C. 537; Montana R. R. Commrs. v. C. M. & St. P. Ry., 88 I. C. C. 184.

§10. Status of Intermediate Carriers.

(a) This proceeding involves primarily a controversy between complainant and defendant M. P. R. R., arising from complainants desire to participate as an intermediate carrier in through routes and joint rates from various points of origin to destinations on the M. P., and beyond. In 102 I. C. C. 708, division 4 found that the through routes and joint rates sought by complainant were not necessary or desirable in the public interest, reversing its former finding made in 87 I. C. C. 617, to the effect that the establishment of such routes and rates would be in the public interest. The rates and routes sought by complainant would apply only on westbound traffic moving through Ola and Dardanelle, Ark., over its line and the Paris branch of the M. P., to Fort Smith, Ark., and points beyond. Questions presented for decision are (1) that establishment of the routes sought by complainant would necessarily require the M. P., to short haul itself in violation of section 15 (4) of the act, and (2) that the public interest would not be served by their establishment. The position of the M. P., with respect to section 15 (4) is untenable. The need of complainant and the benefit which it would derive from the proposed routes far outweigh any possible adverse effect upon the M. P., from the establishment of such routes. It is unnecessary in this case to rely solely upon the financial needs of complainant for the reasons stated below. In 87 I. C. C. 617, 619, it was found that complainants line was economically operated and of great benefit to the country which it serves, although its revenues had been insufficient to meet its operating expenses and fixed charges. The distance between Memphis, Tenn., and Fort Smith, over the route which complainant seeks to have established, is approximately the same as that over the M. P., alone, and there is nothing to show that any of the other routes sought would be unduly circuitous. There is ample proof that the routes sought would be of value to those shippers in many respects. HELD, through routes and joint rates prayed for found to be desirable in the public interest. Fort Smith S. & R. I. R. R. Co. v. A. & V. Ry. 107 I. C. C. 523.

§11. What is satisfactory thru route.
(2) When Through Route ordered or Denied.

(a) Upon further hearing, former report, 80 I. C. C. 383, affirmed and no such public demand exists as to warrant the commission requiring the publication of additional joint rates from Utah mines to destinations in the Northwest. Western Coal Rates, 89 I. C. C. 666, 677, 678.

(b) While it appears that the rates complained of are higher, distance considered, than those generally prevailing from nearby points to the destinations in question or to points in that vicinity, over the same or other routes, the question whether the rates are reasonable or unduly prejudicial can not be determined from that standpoint alone. Complainant was and is entitled to reasonable and nonprejudicial rates, but in determining whether the rates attacked are unreasonable or unduly prejudicial the Commission must consider all the circumstances surrounding the traffic. It is the conclusion that the Commission would not be warranted in requiring defendants to establish joint rates on coal

from and to the points in question, and upon the facts of record it finds that the combination rates applicable to these shipments are not shown to have been or to be unreasonable or unduly prejudicial. Chicago Heights Mfrs. Assn. v. B. & O. R. R., 95 I. C. C. 83, 85.

(c) The maintenance of alternative available through routes, if not unreasonably long, is undoubtedly an advantage to the carriers and beneficial to the public. K. C. M. & O. Divisions, 96 I. C. C. 378, 393.

(d) Request for establishment of certain additional through route and joint rates on wool from Pacific coast points and intermediate points adjacent thereto to eastern defined territories denied. In at least one instance relief sought would result in short-hauling originating carrier, and as to situation in general no sufficient reason appears for requiring opening of additional routes. Wool Rates Investigation, 1923, 91 I. C. C. 235, 265, 266.

(e) Complainant, Kansas & Oklahoma Ry. sought establishment of reasonable joint rates on grain and grain products from State Line, Kans., to interstate destinations and alleged existing joint rates from Milner, Kans., to those destinations are unreasonable. The original plan was to construct a line of railroad from Hugoton, Kans., a point on the Santa Fe thru Liberal, Kans., on Rock Island to Forgan, Okla., the northern terminus of a line of the M. K. & T. Fifteen miles of line have been constructed from Liberal northwest through Milner to Woods and 4 miles of line southeast from Liberal to State Line. The company is in the hands of a receiver and no further construction is now under way. The company has no freight cars and only one locomotive. It does not appear that the movement of the 56 cars of grain is indicative of any regular movement in the future from State Line even if the rates asked by complainant should be established. HELD: Joint rates not shown to be necessary or desirable in the public interest, complaint dismissed. Duvall v. C. R. I. & P. Ry., 101 I. C. C. 630.

(f) Overruling Conf. Ruling 341, FOUND: That where a common carrier subject to the act performs an intermediate service in connection with traffic moving at joint rates, it should concur in such joint rates and receive divisions thereof, divisional arrangements to be so adjusted as to, in effect, result in absorption thereof by line that delivers traffic to carrier performing the intermediate service. Peoria & Pekin Union, 93 I. C. C. 3, 22.

(g) Defendants' refusal to establish joint rates on grain and products from the West and South via Bangor, Pa., over certain through routes, with milling in transit at that point, found contrary to public interest and unreasonable. Because of business and transportation practices prevalent in dealing in grain and products, to compete upon an equality complainant requires joint rates with transit at Bangor equal to rates in effect over existing routes through other milling points. Moreover, if joint rates via Bangor are confined to routes involving substantial similarity in service to already existing routes with joint rates, and lawful rights of carriers are preserved, the commission is unable to see that results will be numerous unreasonable requests for extension of transit or that publication of such joint rates will result in undue multiplication of routes or diversification of traffic. Flory Milling Co. v. C. N. E. Ry., 93 I. C. C. 129.

(hi) Defendants' refusal to establish joint rates on grain and products from the West and South via Bangor, Pa., over certain through routes via which originating carrier would be short-hauled, or where an additional carrier would be injected without compensatory advantage of the shortened haul, found not unreasonable. Flory Milling Co. v. C. N. E. Ry., 93 I. C. C. 129.

(j) Defendants' refusal to establish joint rates on grain and products from the West and South via Bangor, Pa, over certain through routes, found not unreasonable where fourth section violation would be created, originating carrier short-hauled, or where an additional carrier would be injected without compensatory advantage of the shortened haul. Flory Milling Co. v. C. N. E. Ry., 93 I. C. C. 129.

(k) The public interest is not conserved by shutting out, by denial of joint rates, a miller from markets which he can reach by routes not necessitating performance of a greater total service for him than service over present routes over which joint rates apply unless some substantial right of carriers is hereby invaded. On the other hand, the commission would clearly not be justified in attempting to neutralize the disadvantage

of geographical location by requiring wasteful service or additional service without adequate compensation, although shipper may be in dire need. Flory Milling Co. v. C. N. E., 93 I. C. C. 129, 134.

(l) Upon contention that establishment of through routes and joint rates sought would in several instances short-haul carriers participating in existing routes, in violation of section 15 (4) of the act, and in others divert traffic from existing routes without justification and thereby deprive carriers of traffic long enjoyed, HELD: First objection has no application unless carrier originates the traffic or receives it from a connection, in which event it should be allowed to transport it as far as it can before delivering it to a connecting line. Relative to second objection, it is equally true that a carrier under usual conditions has no existing right to traffic still in possession of connecting lines. Flory Milling Co. v. C. N. E. Ry., 93 I. C. C. 129, 134.

(m) It is one of the duties of a common carrier to participate in joint rates if the public interest requires such participation. And equity does not demand that carriers be compensated by larger divisions because they are not in great need of certain joint rates, or because they would be financially bettered if they were not maintained. Pittsburgh & W. Va. Ry. Co., 61 I. C. C. 272, 282, 283. Alabama & Mississippi Ry. Co. v. A., T. & S. F., 95 I. C. C. 385, 394.

(n) Complainant alleged that it was unreasonable, unjustly discriminatory and unduly prejudicial for defendants to fail to establish through routes and joint rates via El Centro and San Diego, Calif., on traffic moving between points in Oregon and California, on the one hand, and points in other parts of the United States, on the other hand, and that the existing rates between those points are likewise unlawful. Many routes are open in connection with transcontinental rates, and, generally, to apply transcontinental rates to Sacramento and San Francisco and points south thereof, through San Diego, would not create hauls longer than hauls under existing available routes. On the merits there appears to be no warrant on the part of defendants for restricting the markets of San Diego industries when not similarly restricting the markets served by Los Angeles and other California cities. The through routes and joint rates sought would have to apply over the lines of the Tijuana & Tecate Ry. Co., and the Inter-California Ry. Co., both of which lines are located entirely within Mexico and are not parties defendant. HELD, Commission is without jurisdiction to establish for the future the through routes and joint rates sought, complaint dismissed. San Diego Chamber of Commerce v. A. & V. Ry. 102 I. C. C. 27.

(na) Establishment of through routes and joint rates on rail-and-water traffic from lower Michigan points via Detroit to Cleveland and Buffalo, by restoring differentials under all-rail rates previously in effect and which are now in effect in opposite direction, found not necessary or desirable in public interest. Interested shippers testified that if differential should be restored they would use boat lines because of saving in transportation charges but practically no evidence was offered tending to show that all-rail service was inadequate or unsatisfactory. Detroit & Cleveland Nav. Co. v. M. C. R. R., 102 I. C. C. 607.

(nb) Establishment of through routes and joint rates from Mississippi River crossings and points east thereof to points on Paris Branch of Missouri Pacific R. R., including Fort Smith, Ark., and points beyond, in connection with Fort Smith, Subiaco & Rock Island R. R. as intermediate carrier, based on revenue needs of latter, found not necessary or desirable in public interest. Opening of this additional route would not result in any increase in total traffic and that moving over it must be attracted from other available routes, principally the Missouri Pacific which is not in a position to withstand resulting loss in revenue, which loss would tend materially to exceed relief obtained by intermediate carrier. Fort Smith, S. & R. I. R. R. v. A. & V. Ry., 102 I. C. C. 708.

(o) Complainant, Ft. Smith Subiaco & Rock Island R. R., asked an order requiring the Arkansas Central and M. P., to establish through routes and joint rates on freight and passenger traffic moving to and from points on the A. C., (now the Paris branch of the M. P.) including Fort Smith, Ark., via the Subiaco from and to eastern interstate points through the Dardanelle-Ola-Little Rock, Ark., gateway. In 87 I. C. C. 617 the complaint was held open because of lack of proper parties defendant. Through routes and joint rates are now available on interstate traffic to and from points

on the Paris branch in connection with the Subiaco through its Daranelle-Ola gateway, but the movement of interstate traffic to and from such points is restricted to the M. P., through Fort Smith. The Commission found this route not unreasonably long. The prayer now is for westbound routes and joint rates via Little Rock, Ola., and the Subiaco, and is based not on allegations that these routes would be more desirable than existing routes, either because shorter in distance, or upon other grounds, but on allegations that the Subiaco urgently needs the revenue which the overhead business would produce for it, and that if it does not get revenue in this way it must cease operations. Any traffic moving over the Subiaco route must be attracted from other available routes, and it seems quite clear that under the circumstances here presented the M. P. would be the principal loser. It is very probable that that carrier is not at present earning a fair return on its property, and to the extent that its revenues are diminished by the diversion to the Subiaco route of traffic which it can and does handle, it would be less able than at present efficiently to function as part of the national transportation machine, to serve adequately those dependent upon it for transportation and to earn money for its stockholders. Furthermore, the amount of revenue thus diverted from the M. P., would largely exceed the revenue accruing to the Subiaco as its share of the new joint rates. The loss entailed upon the M. P., would thus tend to materially exceed the relief obtained by the Subiaco. While it undoubtedly would benefit that part of the public served by the Subiaco to have that line in a prosperous condition, it is the opinion of the Commission that the method here adopted by the Subiaco to improve its condition does not comport with that broad view of the public interest which the Commission is constrained to take. HELD, through routes and joint rates not necessary or desirable in the public interest, complaints dismissed. Fort Smith S. & R. I. R. R. v. A. & V. Ry., 102 I. C. C. 708.

(p) Upon investigation of commission on its own initiative, FOUND: That the Mississippi Central, B. & H. S., and the G., M. & N., should establish on short notice, effective the same date, and maintain and apply a through route and joint rates on lumber, c. l. of a certain amount per 100 pounds, from stations on the Mississippi, Brookhaven to Tallahala, inclusive, but not including Hattiesburg, and a certain amount from stations west of Brookhaven, to and including Natchez, to Mobile, and just, reasonable, and equitable divisions of such joint rates prescribed for the future. Cancellation of Rates and Routes via Mississippi Central, 100 I. C. C. 71.

(q) Upon investigation of commission on its own initiative, FOUND: That the Mississippi Central, B. & H. S., and the G., M. & N., should establish on short notice, effective the same date, and maintain and apply a through route and joint rates on lumber, c. l., of a certain amount per 100 pounds, from stations on the Mississippi, Brookhaven to Tallahala, inclusive, but not including Hattiesburg, and a certain amount from stations west of Brookhaven, to and including Natchez, to Mobile, and just, reasonable, and equitable divisions of such joint rates prescribed for the future. Cancellation of Rates and Routes via Mississippi Central, 100 I. C. C. 71, 77.

(r) Upon investigation by commission on its own motion, establishment of joint rates on prepared sizes of low-volatile bituminous coal from mines served directly by C. & O. Ry. Co., N. & W. Ry. Co., and the Virginian Ry. Co. to certain points in trunk line and New England territories deemed to be necessary and desirable in the public interest, and basis for such new joint rates prescribed. Anthracite Coal Investigation, 101 I. C. C. 363, 384.

(s) Through routes and joint rates on coal required to be established and maintained by the B. & O. in connection with the Strouds Creek & Muddlety R. R., a short line carrier located in the Gauley district of West Virginia. Tioga Coal Co. v. B. & O., 101 I. C. C. 611.

(t) Establishment of joint rates on grain and grain products from State Line, Kans., a point on complainant's line to destinations on the C., R. I. & P. Ry. not found to be necessary or desirable in the public interest. Evidence as to volume and nature of traffic and value of route to public was meagre. Duvall v. C., R. I. & P., 101 I. C. C. 630.

cago Live Stock Exchange v. Director General, as Agent, 88 I. C. C. 202; C. M. & St. P. Ry. Co. v. U. P. R. R. Co., 88 I. C. C. 312.

IV. REASONABLENESS AND DISCRIMINATION.

See Advanced Rates §3 (aa); Blanket Rates §10; Class Rates §2 (3k); Commodity Rates II; Discrimination §7; Equalization of Rates; Evidence §66; Local Rates and Combinations; Proportional Rates; Reasonableness of Rates §27½; Water Carriers V.

§13. In general.

(a) Complainant attacked joint rates on crude sulphur, carloads, from New York and Baltimore to Hamilton, Ont., as unreasonable and unduly prejudicial compared with rates to Buffalo, N. Y., and Detroit, Mich. Crude sulphur is shipped rail and water from Louisiana to north Atlantic ports from whence it is reshipped to inland destinations. Rate charged to Hamilton from New York 31c distance 480 miles, from Baltimore 28c distance 473 miles while the rate to Buffalo from New York is 31.5c dis-21.5c distance 413 miles. The rate to Buffalo is about 80% of sixth class. The great disparity, distance considered, between the rates to Hamilton and the rates to Buffalo, is not warranted by any transportation consideration. For movements within the trunk line territory the Commission has found in numerous cases that 80% of sixth class is a reasonable basis for commodity rates on crude sulphur. HELD, rates attacked unreasonable to extent they exceeded 28c from New York and 25c from Baltimore. Grasselli Chemical Company v. B. & O. R. R. 89 I. C. C. 383.

(b) Complainant attacked fifth class rate charged on 126 cars of gasoline from Point Breeze, Philadelphia, Pa., to Fresh Pond, Long Island, N. Y., was unjust, unreasonable and unduly prejudicial. Point Breeze is within the switching limits of Philadelphia. Fresh Pond is on the Long Island R. R. about 4 miles from Long Island City. Shipments moved, in tank cars furnished by shippers, over the Pennsylvania to Greenville Piers thence car ferry to Long Island float bridges, thence by switching movement to private side track of complainant, 106 miles, charged fifth class rate of 21.5c prior to July 1, 1922 and 19.5c on and after that date. No commodity rate has ever been published. Commodity rates on refined oils including gasoline are in effect from Philadelphia to points in trunk line and New England territories such as Albany and Rochester, N. Y., Boston and Worcester, Mass., Jersey City, N. J., and Pittsburgh and Scranton, Pa. These commodity rates are from 82.1% to 95.3% of the fifth class rates HELD, rates attacked unreasonable to extent they exceeded 20c prior to July 1, 1922 and 18c, thereafter, reparation awarded. Transcontinental Oil Company v. Pennsylvania R. R. 89 I. C. C. 739.

(c) Complainant attacked sixth class rate charged of 27.5c on nine cars of spelter from Locust Point, Baltimore, Md., to Apollo, Pa., during March and April 1921, as unjust and unreasonable to extent it exceeded 23c. Locust Point is served by the B. & O. Apollo is about 40 miles northeast of Pittsburgh on the Pennsylvania. Shipments moved via B. & O., to Everson, Pa., Pennsylvania beyond, charged sixth class 27.5c There was in effect from Baltimore to Apollo over the Pennsylvania a rate of 23c, which rate included a lighterage service within Baltimore Harbor. The same rate of 23c was applicable from Baltimore to a large number of consuming points in the New York-Chicago 60% territory. HELD, rate attacked unreasonable to extent it exceeded 23c, reparation awarded. Apollo Steel Company v. Pennsylvania R. R., 89 I. C. C. 747.

(d) Complainant attacked fifth class rates charged of 35 and 33c on 201 carloads of raw sugar shipped before March and August 1920 from Brooklyn and New York, N. Y., Weehawken, N. J., and Philadelphia, Pa., to Marine City, Mich., as unreasonable to extent they exceeded 27 and 25c. Some moved via D. L. & W., to Buffalo, P. M., to Port Huron, and D. B. C. & W., to destinations and others over Pennsylvania to Toledo, O., D. & T. S. L. and G. T. to Port Huron and D. B. C. & W., beyond. A commodity rate of 29c from Philadelphia to Marine City was available over the B. & O., and connections, but this route was not used. Commodity rates of 27c from New York and 25c from Philadelphia were in effect to Marine City but were subsequently canceled. The record justifies the conclusion that the circumstances governing

the application of commodity rates to the Ontario points substantially differed from those surrounding the movement of raw sugar to Marine City. HELD, rates attacked not unreasonable, complaint dismissed. Garcia Sugar Corporation v. N. Y. C. R. R., 92 I. C. C. 239.

(e) Complainant attacked commodity rates charged on numerous cars of zinc ore from Missouri, Kansas and Oklahoma to South Fort Smith, Ark., as unreasonable, unjustly discriminatory and unduly prejudicial. Complainant's plant, 5 miles from Fort Smith, is served by the M. P. The points of origin are the Joplin and Oklahoma fields. The former field includes points in southwestern Missouri, such as Joplin, and in southeastern Kansas, around Galena. The latter field lies in the extreme northeastern portion of Oklahoma in the vicinity of Picher. Ore originating on the short lines in Oklahoma moves to the junctions, Baxter, Quapaw, and Miami, for distances averaging 6 miles, and thence to South Fort Smith over either the Frisco to Fort Smith and M. P., beyond, or over the Gulf to Okay, Okla., and M. P. beyond. The average haul over these routes is 197 miles. Cars are generally loaded to their maximum capacity. Through routes from points on the short line to South Fort Smith are made up of combinations on the junction points mentioned. The rate applicable from all trunk line and junction points proper in both fields was and is the same, and constitutes the other factor of the through charge to Fort Smith. HELD: Through routes on zinc ore, carloads, from points on the Mineral Belt and Northeast Oklahoma to South Fort Smith not unreasonable, but unduly prejudicial to extent factors of the Mineral Belt and Northeast Oklahoma exceeded by more than 0.5c the factors of those lines on like traffic to the east side smelters. This undue prejudice was removed by voluntary adjustments made on different dates subsequent to Jan. 20, 1922, over the various routes of defendants. Athletic Mining & Smelting Co. v. K. C. S. Ry., 93 I. C. C. 119.

(f) Complainant attacked joint commodity rate charged on newsprint paper, carloads, from Thorold, Ont., to New York as unreasonable, unjustly discriminatory and unduly prejudicial. Thorold is on the Canadian National Rys., 50 miles from Black Rock, N. Y., where connection is made with the N. Y. C., D. L. & W., and other railroad reaching New York and 12 miles from Suspension Bridge, N. Y., where connection is made with the N. Y. C., L. V. and other railroads serving New York. Short line distance from Thorold to New York is C. N. to Black Rock and Lackawanna beyond, 444 miles. Newsprint paper is fifth class in official classification, but by exceptions is accorded sixth class rating. HELD: Rate attacked unreasonable to extent it exceeded 32c from August 26, 1920, to June 30, 1922, and 29.5c since that date, reparation awarded. Ontario Paper Co. v. C. N. Rys. 95 I. C. C. 66.

(g) Complainant attacked combination commodity rates charged on coal in October and November, 1920, from Meyersdale district in Pennsylvania and Fairmount district in West Virginia as unreasonable, unjustly discriminatory and unduly prejudicial to New Castle, Del. New Castle is on the Pennsylvania, 7.3 miles south of Wilmington, Del. Shipments from Fairmont moved over B. & O. to Wilmington and thence Pennsylvania 364 to 389 miles, charged combination rates of $3.43 and $1.26 to and from Wilmington. From Meyersdale district shipments moved B. & O. to Gyndman, Pa., thence Pennsylvania, distance ranging from 311 to 337 miles, charged $1.12 to Hyndman or Johnstown, Pa., and $3.18 beyond. From the same regions on the Pennsylvania the rates were $3.18 and $3.34. In accordance with its long standing policy the Pennsylvania did not join in maintaining these rates from mines on other lines to destinations local to its own rails, and its failure to do so is the gravamen of the complaint. HELD: Rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Chicago Heights Mfrs. Assn. v. B. & O. R. R., 95 I. C. C. 83.

(h) Complainant attacked commodity rates charged on pulpwood, carloads, to Covington, Va., from Virginia, North and South Carolina, Tennessee and Georgia as unreasonbale and unduly prejudicial. Rates on pulpwood are published in amounts per cord, per 100 pounds, or per net ton and are usually distance rates. There is very little competition between the paper, extract, and excelsior mills in the purchase of their woods, but the value of the various woods is about the same, ranging from

$7 to $9 per cord. Pulpwood can be transported in any kind of equipment, except a flat car. Under the present rates Covington procures its hemlock and spruce principally from timberland adjacent to Cass and its other pulpwood from points as near Covington as possible, and from points on practically every railroad in Virginia. Covington, Coleman, Big Island, and Buena Vista are on the C. & O.; Hopewell, Bristol and Buena Vista are on the N. & W.; Canton and Bristol are on the Southern and Kingsport is on the C. C. & O. The only joint rates in effect from points on the Southern to the complaining mills are from its Norfolk division, ranging from 190 to 260 c for 120 to 260 miles. The C. C. & O. connects with the N. & W. at St. Paul, Va., 230 miles from Glasgow. It participates in no joint rates on this traffic. The Virginian connects with the Southern at Alta Vista 23, C. & O. at Potomac Yard and Doswell, Va., 219 and 178 miles from Covington. No joint rates are maintained from points on that line to complaining mills. Virginian connects with the Southern at Alta Vista 23 miles from Lynchburg and with N. & W. at Brookneal, Va., 34 miles from Lynchburg and at Roanoke, Va., 44 miles from Glasgow. S. A. L. connects with the C. & O. at Richmond and Norfolk, 244 and 294 miles from Covington. There are no joint rates on this traffic from points on its line. A. C. L. connects with C. & O. at Richmond and at Norfolk through the Belt line. A joint rate of 189c was in effect at the time of hearing from certain A. C. L. points to Canton for distances of 170 to 320 miles. The N. & W. and Virginian express willingness to apply the C. & O. proposed scale as proportional rates on their lines. Covington is located close to the line dividing central and southern territories and, in view of the nature of this traffic and the competitive situation disclosed by the record, is entitled to rates based as nearly as possible on a joint scale properly aligned with the lower level of rates in southern territory, on the one hand, and the higher level of rates in official territory, on the other. HELD: Rates attacked unreasonable and unduly prejudicial to extent they exceed rates ranging from 6c for 40 miles to 16.5c for 550 miles. West Virginia Pulp & Paper Co. v. Southern Ry., 96 I. C. C. 244.

(i) Complainants attacked rates on coal, carloads, from mines on the Virginian to interstate destinations as unreasonable and unduly prejudicial. It also attacked failure of the Virginian to establish the necessary track connections whereby complainants mine may enjoy rates over and joint service by the Virginian and C. & O., resulting in undue prejudice. Since the filing of this complaint the Commission has prescribed the New River district rates, east bound and westbound, from mines on the Kanawha, Glen Jean & Eastern an independent short line connecting with the Loup Creek branch of the C. & O. and from mines on the Gree brier & Eastern, an independent short line connecting with the Sewell Valley at G. & E. Jct. Complainants mines are in the New River district on the Virginian which geographically corresponds to the New River district on the C. & O. The two carriers maintain parity of rates on eastbound movements from mines in their respective districts. Other mines on the Virginian within its New River district receive the benefit of district rates to central territory under trackage agreements between the Virginian and the C. & O. Complainants mines and others served exclusively by the Virginian, are the only mines, in the districts thus far named, of the Outer Crescent, which are denied the benefit of district rates to central territory. HELD, rates on coal, carloads, from complainants mines on the Virginian to interstate destinations unreasonable and unduly prejudicial to extent they exceed rates maintained from main and branch line points on the C. & O., in the New River district. Wyoming Coal Co. v. V. Ry. 96 I. C. C. 359.

(j) In 85 I. C. C. 557, the Commission found the through rates on gilsonite from American, Utah to Colorado and states east thereof since May 7, 1920 were unreasonable to extent they exceed any quanitity factor of $10.35 per to applicable over the Uintah Ry. from American to Mack, Colo., junction with the Rio Grande, exceeded $9.75 per ton. Case reopened upon petition of Uintah Ry. It is clear that if the $9.75 rate remains in effect from American the attacked rate of $9.95 from Watson, 2 miles nearer Mack, can not be maintained also that the $10.50 from Rainbow, 1 mile beyond American, would be so excessively out of line that it could not in justice

remain undisturbed. HELD, upon the new record, rates attacked not unreasonable or otherwise unlawful, complaint dismissed, previous order vacated. Utah Gilsonite Co. v. A. T. & S. F. Ry., 96 I. C. C. 653.

(k) Respondents proposed joint rates which are from 4 to 7c lower than existing combinations on intermediate markets on grain, grain products and articles taking same rates, carloads, from 340 points in Minnesota, in Iowa, and Missouri on the C. G. W., D. M. & C. I., Ft. D. M. & S., M. & O., M. C. & C. L., M. N. & S., and W. C. F. & N., to practically the entire state of Texas. The proposed rates apply only over the lines named to Kansas City, Mo., thence over all the principal carriers beyond. The Rock Island and certain of its connections maintain one factor through rates from this general territory of origin to Texas and the southwest generally, and the rates here in issue from common points are the same as those maintained by that carrier to the same destinations. HELD, proposed rates reasonable. Grain to Texas, 96 I. C. C. 727.

(l) Complainant attacked joint class C rate of 50c charged on 7 cars of zinc concentrates shipped from Minnequa, Colo., to Collinsville, Okla., in March 1918 as unreasonable and unduly prejudicial to extent it exceeded the commodity rate of $2.70 per ton in effect from Colorado common points. Minnequa is 3 miles from Pueblo. It is grouped with and usually accorded the same rates as Pueblo and other Colorado common points, this basis subsequently becoming effective from Minnequa. HELD, rate attacked unreasonable to extent it exceeded $2.70 per ton, reparation awarded. Tulsa Fuel & Mfg. Co. v. Director General, 98 I. C. C. 411.

(m) Complainant attacked rates charged on shingles in mixed carloads with lumber, shipped between June 11 and Dec. 29, 1919 from Pacific coast points to Toledo, O., subsequently reconsigned to various destinations as unjust and unreasonable. Complainant routed the shipments via the M. & L. S. R. R., which was not a party to the 65c rate to Manistique and over the route of movement the rate to Toledo, was 81.5c made by adding the 5c arbitrary to the sum of rates in effect June 24, 1918 of 55c from points of origin to Duluth, 11c from Duluth to Manistique and 10.5c to Toledo. On Dec. 31, 1919 the M. & L. S., was made a party to the joint rates to Manistique. Complainant makes no comparison of distances or transportation conditions over the route of movement and over other available routes. HELD, rates attacked not unreasonable, complaint dismissed. Mauk Lumber Co. v. Director General, 98 I. C. C. 599.

(n) Complainant attacked class rates charged on newsprint ink, carloads, from Bayonne, Hoboken, and Jersey City, N. J., Brooklyn and New York, N. Y., Boston and Morrills, Mass., and Philadelphia, Pa., to Washington and Baltimore as unreasonable. For many years prior to Nov. 15, 1922 official classification rated printing ink, carloads, fourth class, minimum 30,000 pounds. On that date the rating was reduced to the present fifth class basis, minimum 36,000 pounds. From Boston the fifth class rate is the same to Baltimore and Pittsburgh while the first class rate is 12c higher to Pittsburgh than to Baltimore. From both Boston and New York to Washington the fifth class rate is 5c higher than to Pittsburgh, while the first class rate is 4.5c lower. From Boston, New York and Philadelphia the first class rates are higher to Washington than to Baltimore by 7.5c, 5c and 9.5c, while the fifth class rates are higher by 5c, 0.5c, and 6c, respectively. With respect to the rates from Philadelphia, the haul from Baltimore to Washington is a considerable portion of the aggregate haul from Philadelphia to Washington. Printing ink is rated fifth class in each of the classifications, and moves without exception on the class basis throughout the country. If a departure from the class basis is required on complainants traffic, it is evident that departures from that basis could not reasonably be avoided with respect to at least a large portion of such traffic in official classification territory. Certain of the class rates in this territory appear to need readjustment but the general class rate structure is now under consideration in another proceeding. HELD, rates attacked not unreasonable, complaint dismissed. Washington Publishers Asso. v. B. & O. R. R., 98 I. C. C. 668.

(o) Complainant attacked class rates from St. Paul, Minneapolis, Minnesota Transfer, Cloquet, Duluth and West Duluth, Minn., and Superior and South

Superior, Wis., to Fargo, N. D., as unreasonable, unduly prejudicial, and unjustly discriminatory against interstate commerce to the extent that they exceed the intrastate rates applicable to Moorhead, Minn., 1.2 miles east of Fargo; that the distributing distance class rates from Fargo to points in Minnesota are unreasonable, unduly prejudicial, and unjustly discriminatory against interstate commerce to the extent they exceed the rates from Moorheead and other Minnesota points to the same destinations; that the class rates to Fargo from Chicago, Ill., and from central, trunk line and New England territories made with relation to the Chicago rates are unreasonable and unduly prejudicial to extent they exceed 140% of the rates to St. Paul, Minn; that the class rates from Fargo to North Dakota are unreasonable, unduly prejudicial and unjustly discriminatory against intrastate commerce as compared with corresponding rates from the Twin Cities; that the class rates from Omaha, Neb., and Kansas City, Mo., and related points of origin to Fargo are unreasonable and unduly prejudicial to extent they exceed the rates to Duluth; that the class rates from California, New Mexico, Nevada and Utah points to Fargo are unreasonable and unduly prejudicial to extent they exceed rates to Twin Cities. They also asked for a through route from California points to Fargo via Butte, Mont., and of joint through rates over such a route no higher to Fargo than to St. Paul. Fargo is located at the extreme eastern boundary of North Dakota, on the west bank of the Red River, which is the dividing line beteween that state and Minnesota. It is served by the main lines of the N. P., and G. N., and a branch line of the Milwaukee. Fargo is 241 miles from Minneapolis and 252 miles from Duluth over the N. P., 232 miles from Minneapolis and 307 miles from Duluth over the G. N., and 295 miles from Minneapolis over the Milwaukee via its branch line north of Ortonville, Minn. **Rates From Minnesota Points to Fargo Valley City and Jamestown.** Valley City is 58 miles west of Fargo on the main line of the N. P., 299 miles from Minneapolis and 310 miles from Duluth. It is also served by the Soo Line and is over that line 291 miles from Minneapolis and 370 miles from Duluth. Jamestown is on the main line of the N. P., 34 miles west of Valley City, 325 miles from Minneapolis and 344 miles from Duluth. It is also served by the Midland Continental, a north and south line connecting with the Milwaukee at Edgeley, N. D., and with the Soo Line at Wibledon, N. D. Valley City meets the competition of the Twin Cities and Duluth in distributing fancy lines of groceries, but its strongest competition is with Fargo. The evidence leaves no doubt that jobbers at Jamestown and Valley City have been seriously handicapped and the industrial growth of these cities has been materially retarded by the rate situation complained of. The record leaves no doubt that the class rates now in effect from the Minnesota points and points taking the same rates to Fargo are less than reasonable maxima, but that Fargo is laboring under substantial disadvantage in the relationship which its rates bear to the rates available to its competitors in Minnesota, such as Moorhead, the Twin Cities and Duluth, due to the comparatively low level of the Minnesota intrastate rates. It further appears that Valley City and Jamestown are laboring under even greater disadvantages than Fargo in attempting to distribute their products in their natural trade territories. Fargo is the most important trade competitor of Valley City and Jamestown. Its advantage in rates is shown to be in part due to the relatively lower rates accorded it by the application of arbitraries over the Minnesota intrastate rates and in part to the inbound commodity rates and exceptions to the western classification on certain articles accorded to Fargo which are not accorded to Valley City and Jamestown. There are no circumstances and conditions of transportation which warrant the existing disparities in these rates or a different level of rates to one than to another of these points in western Minnesota and eastern North Dakota. HELD, class rates from Twin Cities and Duluth and Superior and points taking same rates to Valley City and Jamestown unreasonable to extent they exceed class rates ranging from 33c first class for 10 miles to 157c for 500 miles, with arbitraries for extra line hauls beginning with 8c first class to 1c class E. HELD, further the maintenance of class rates from the points of origin above named to Fargo, which are lower distance considered, than the class rates maintained from the same points of

origin to Valley City and Jamestown is unduly prejudicial to Valley City and Jamestown to extent the rates to the latter point exceed the rates to Fargo by more than the differences that would exist between the rates from said points of origin to Valley City and Jamestown on the one hand and Fargo on the other under the scale of maximum rates prescribed above. **Rates From Fargo to Minnesota Points.** Fargo merchants haul many of their shipments from Minnesota destinations to Moorhead by truck, where they are loaded into a car which is switched to Fargo, reworked, and placed in a train moving back through Moorhead to the Minnesota destinations. Transportation conditions do not justify any different basis of class rates from Fargo to Minnesota points 150 miles and less from Fargo over short line routes than from Moorheead and other competing Minnesota jobbing points to the same destinations. HELD, class rates from Fargo to Minnesota distant 150 miles and less from Fargo over short line routes are not unreasonably high, but are unduly prejudicial to Fargo to extent they exceed the rates maintained from the said Minnesota points to same destinations by more than the differences that would exist between the rates from said points of origin, on the one hand, and from Fargo on the other, to said Minnesota destinations under the scale of class rates previously prescribed, and that any greater difference or disparity between the aforesaid rates from Minnesota origin points and from Fargo results in unjust discrimination against interstate commerce from Fargo. HELD, further, the class rates from Fargo and Minnesota points of origin to points in Minnesota 150 miles and less from Fargo over short line routes are less than reasonable maximum rates, and that reasonable maximum rates from Fargo and the Minnesota origin points to said Minnesota destinations will be those prescribed, supra. **Rates From Chicago and Points East Thereof to Fargo.** Class rates from points east of Chicago to Fargo are based on the lowest combination, generally on the Twin Cities. Present class rates from Chicago to Fargo are joint rates ranging from nothing on second class to 14.5 on class A less than the combination on the Twin Cities. The joint rates from central, trunk line, and New England territories to the Twin Cities are published in tariffs subject to the official classification, while the rates from Chicago to Fargo are published in tariffs subject to the western classification. There can be no doubt upon this record that the present class rates from Chicago and points basing thereon in central, trunk line, and New England territories to Fargo place the latter point and its shippers at an undue disadvantage as compared with the rates to the Twin Cities. The finding that both of the factors of the Twin Cities combination from Chicago to Fargo are depressed is not conclusive that the joint through rate, which is only 0.5c lower than the combination is reasonable. HELD, class rates from Chicago to Fargo are unreasonable to extent they exceed rates ranging from 165c first class to 30c class E. HELD, further class rates from all points east of Chicago in central, trunk line and New England territories to Fargo are unreasonable to extent the factors from Chicago to Fargo exceed rates ranging from 149c first class to 27c class E. HELD, class rates from Duluth to Fargo on traffic from beyond Duluth by lake or by rail and lake are unreasonable to extent they exceed rates ranging from 85c first class to 15c class E. **Rates From Fargo to Points in Montana.** The present class rates from Fargo to points in Montana beyond Malta on the G. N., Melstone on the Milwaukee and Myers on the N. P., are the same as the rates from the Twin Cities, while to destinations in Montana east of those three points the rates from Fargo are lower. The material advantage is distance which Fargo holds over the Twin Cities entitles Fargo to better than equal rates at Montana points some distance beyond the territory in which differences now exist. It appears that Fargo distributors do not compete actually or potentially with distributors from the Twin Cities at Montana points more than 900 miles distant from Fargo. HELD, class rates from Fargo to points in Montana are not unreasonable. HELD, further, that to points in Montana more than 900 miles from Fargo over short line routes and to points in Montana east of Malta, Melstone and Myers the class rates from Fargo are not unduly prejudicial, but that to Malta, Melstone and Myers and to all points in Montana west thereof not more than 900 miles from Fargo over short line routes, they are unduly

prejudicial to Fargo and unduly preferential of Twin Cities to extent said rates from Fargo exceed rates which are less than the rates maintained from the Twin Cities to the same destinations by 25c on first class, and on the other classes by amounts ascertained by applying the same percentages to the first class rates so constructed as are reflected by the rates maintained from the Twin Cities to the same points.

Rates from Omaha and Kansas City to Fargo. The class rates from Omaha are uniformly higher to Fargo than to Duluth, although the difference is respective short line distances is only 9 miles in favor of Duluth. The direct route from Kansas City and Omaha to Fargo is through Sioux City and G. N. The haul over this route to both Fargo and Duluth is identical as far as Willmas, Minn., from which point the distances over the G. N., are 159 miles to Fargo, 101 miles to St. Paul and 197 miles to Duluth. HELD, class rates from Omaha and Kansas City to Fargo are unreasonable to extent they exceed from Omaha rates ranging from 155c first class to 28c class E and from Kansas City rates ranging from 174c first class to 31c class E. **Rates From California, New Mexico, Nevada and Utah to Fargo.** Defendants admit that Fargo may be entitled to the Duluth rates from California and points in Nevada and Utah taking the same rates. HELD, class rates from California, Nevada and Utah to Fargo are unreasonable to extent they exceed rates to Duluth. **Rates from and to Grand Forks, N. D.** While the issues do not embrace rates to or from Grand Forks the record fails to reveal any such difference in transportation conditions from and to Fargo and Grand Forks as would justify defendants in maintaining a different level of rates to one point than to the other. In making the readjustment required herein defendants should revise the corresponding rates from and to Grand Forks in harmony with the resulting rates from and to Fargo. **Application of Rates under Distance Scale Prescribed.** In computing distances under the scale of rates prescribed the shortest routes via existing connections for the interchange of carload traffic shall be used, embracing as a maximum the lines of not more than three line haul carriers, except where through routes for the transportation of class traffic are now in use by defendants which embrace the lines of more than three line haul carriers, and over which the distances are less. Lines unde common ownership or control will be considered as a single line, and where a portion of the same railroad is used more than once in computing a distance it will be counted as a separate line each time it is used. **Fourth Section Relief** Under appropriate application, consideration will be given to the matter of fourth section relief to enable circuitous lines or routes to meet the rates herein prescribed over short lines or routes and to maintain higher rates at intermediate points. Fargo Commercial Club v. A. & W. Ry., 98 I. C. C. 691.

(p) Rate on cotton seed from Memphis, Tenn., to Altheimer, Ark., found unreasonable to extent it exceeded rate from Memphis to Pine Bluff, Ark., which latter rate was published in accordance with rule 77 of Tariff Circular 18-A, application for publication thereof to Altheimer not having been made prior to shipments, and was not subsequently established thereto by carriers. Reparation denied for lack of proper parties complainant. Russell-Heckle Seed Co. v. Director General, 91 I. C. C. 63.

(q) In interest of tariff simplification it is Commissions opinion that joint rates on wool should be published from Pacific coast terminals and adjacent points in eastern destinations, if practicable, in one or a very few consolidated tariffs, and that such tariffs should include all transit rules, regulations, and practices appertaining to movement of wool. Wool Rates Investigation, 1923, 91 I. C. C. 235, 260.

(r) Rates on sewer pipe from Brazil, Ind., to Manitowoc, and Sheboygan, Wisc., and Menominee, Mich., found unreasonable as compared with lower unrestricted rates applicable over car-ferry routes across Lake Michigan to more distant points in Wisconsin, Minnesota and Michigan, and to extent they exceeded aggregate of intermediate contemporaneously in effect. Reparation denied due to lack of proof as to payment and bearing of freight charges. Chicago Fire Brick Co. v. Director General, 91 I. C. C. 755.

(s) Complainant attacked commodity rate charged of $4.40 on 25 cars of pig iron shipped between Nov. 21, 1918, and Jan. 14, 1920, from Everett and Earlston, Pa., to Boston, Mass., as unreasonable, unjustly discriminatory and unduly prejudicial. Distances from Everett and

Earlston, 593 and 595 miles, respectively. Prior to Nov. 1, 1918, the applicable rate was $3.80, but on that date increased to $4.40 following 49 I. C. C. 238. On Aug. 26, 1920, the $4.40 rate became $6.16. On Dec. 27, 1920, it was reduced to $5.32, which represented an increase of 40% over the rate of $3.80 in effect prior to Nov. 1, 1918. HELD: Rate attacked unreasonable to extent it exceeded $3.80, reparation awarded. Hunt Spiller Mfg. Corp. v. Director General, 100 I. C. C. 243.

(t) Complainant attacked rates charged on rig irons, carloads, from Iola, Kan., to Tulsa, Okla., as unreasonable and in 80 I. C. C. 335, the Commission found the following rates to be reasonable: 22c prior to June 25, 1918, 27.5c between that date and Aug. 26, 1920, and 37c from that date to July 1, 1922, and 33.5c thereafter. Reopening was had on request of defendants. In the original report the Commission stated that there is a regular and substantial movement of rig irons from Iola to Tulsa. The present record does not substantiate this. No shipments of rig irons moved from Iola to Tulsa over the Santa Fe from May 24, 1920, to Dec. 5, 1923, date of hearing. There were 49 cars of rig irons shipped during 1922 and 19 during 1923. These shipments all moved over the M. K. & T. The record does not establish that the 41.5c rate on oil well supplies is a reasonable maximum rate over either the short or long route from Iola to Tulsa. The rate on oil well supplies as such, is not in issue and the Commission is not prepared to determine upon this record what was or would be a reasonable rate on that commodity. HELD: Rates attacked not unreasonable, complaint dismissed. Bradford Rig & Reel Co. v. Director General, 100 I. C. C. 261.

(u) Complainant attacked joint and combination rates charged on 85 cars of rolled oats from Buffalo, N. Y., to destinations in California, Nevada, Oregon and Washington between July 1, 1922, and March 6, 1923, as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of section four. Charged prior to Nov. 30, 1922, at joint rate of $1.41, and on those on and after that date at a combination of $1.21 to Toledo, O., or Detroit, Mich., composed of 16c to those points plus $1.05 beyond. Complainants case is grounded on the fact that, although reductions had been made in rates from certain transcontinental groups west of Buffalo, rates from transcontinental groups B, within which Buffalo is situated, were not correspondingly reduced until after these shipments moved. The record falls short of establishing that the rates charged were excessive and unreasonable for the transportation service rendered. HELD: Rate attacked not unreasonable or unjustly discriminatory, complaint dismissed. H-O Cereal Co. v. A. T. & S. F. Ry., 100 I. C. C. 297.

(v) When distances are relatively great, and when transfer at rate breaking points is not attended by unusual costs, the combination basis, using local rates, ordinarily is abnormal and unscientific and often discriminatory. The railroads should be regarded more and more as one national system, and the time may not be far distant when the Commission should proceed to the establishment of joint through class and commodity rates, lower than the combination of locals, between practically all points in the country. Southern Class Rate Investigation, 100 I. C. C. 513, 661.

(w) The Commission has condemned, expressly or in effect, the practice of basing interterritorial rates upon the combination of local rates to and from border points. Southern Class Rates Investigation, 100 I. C. C. 513, 661.

(x) Complainant attacked combination class rate charged on five carloads and six less carloads of pianos between 1922 and 1923 from Hammond, Ind., and Steger and Oregon, Ill., to Birmingham, Ala., as unreasonable and unlawful. Rates charged were lowest combination on the Ohio river crossings of first class on less carloads and second class, carloads. The rate sought are joint first class rates on less carloads and joint commodity rates on carloads maintained to Mobile, Ala., in other tariffs subject to the intermediate clause. No specific rate on pianos in carloads or less carloads from Hammond, Steger and Oregon to Birmingham was named in any other tariff. Birmingham is not indexed in the tariffs containing the intermediate rule, but joint traffic on the traffic here considered were published in those tariffs to Binghamton and Paris, Tex., local and junction points on the L. & N.; to Corinth and columbus, Miss., Junction points on the Southern; to Chickasaw, Ala., a local point on the Southern; and to Mobile, a junction point on the L. & N. and Southern. None of the shipments under

consideration moved through the points mentioned over such routes. Defendants show beyond question that the intermediate rule was not intended to operate in the manner contended for by complainant. The Commission has uniformly found that carriers tariffs must be construed strictly according to their language and that the intention of the framers is not controlling. It has also found that, although doubts as to the meaning of a tariff must be resolved in favor of the shipper and against the carrier which compiled it, the doubt must be a reasonable one; and that interpreting a tariff the terms used must be taken in the sense in which they are generally understood and accepted commercially, and neither carriers nor shippers can be permitted to urge for their own purposes a strained and unnatural construction. Complainant relies entirely upon a literal interpretation of the intermediate rule, but in determining a question of this kind all of the pertinent provisions of the tariffs must be considered together and if those provisions may be said to expression the intention of the framers under a fair and reasonable construction, that intention must be given effect. So far as the record discloses, complainant paid the higher rates charged without protest during a period of about 14 months, did not present his complaint until more than six months after the intermediate rule was changed so as to preclude his contention, and presented no request to the Commission for suspension of the new rule, which under the construction contended for, effected increased rates on his traffic. This tends to show that complainant was not misled to his damage by the intermediate rule under consideration. HELD: Rates charged not unreasonable or unlawful, complaint dismissed. Forbes & Sons Piano Co. v. A. G. S. Ry., 101 I. C. C. 74.

(y) In 74 I. C. C. 496 the Commission required defendants to establish through routes and joint rates in connection with the Michigan Railroad Co. between points on its lines, namely, Saugatuck, Vriesland, Gorest Grove, Jamestown, and Frankenmouth, Mich., on the one hand, and interstate points from and to which through routes and joint rates are maintained in connection with the Michigans Allegan-Battle Creek division, on the other. HELD: Joint rates may properly be on the same basis. Nor does there appear to be any persuasive reason why the divisions of such joint rates should not be on the percentage basis applying in connection with the Allegan-Battle Creek line. Michigan R. R. v. P. M. R. R., 101 I. C. C. 146.

(z) Complainant attacked as unreasonable, discriminatory and prejudicial to complainant, in their relation to the rates in effect for the transportation of livestock, from which fresh meat and packing house products are produced, from Ogden and other Utah points and fresh meat and packing house product rates from Ogden to Missouri river, Chicago, etc. The gravamen of this complaint is that the rates attacked on fresh meat and packing house products, and rates now in effect, are not properly related to the rates on live stock, and that rates on fresh meat and packing house products are unreasonable. Ogden, located within a large livestock producing area in north central Utah, is reached by the O. S. L., U. P., D. & R. G. W. and S. P. All of these lines serve complainant's plant. Local or joint rates were assessed on shipments to Chicago, and Missouri river and Mississippi river crossings, including New Orleans, and combinations based upon Chicago or the river crossings, not including New Orleans, were assessed on those to all other points, the Mississippi river proportional applying as a maximum to such points as Ottumwa. Complainant's evidence is directed mainly to the propriety of the rates from Ogden to Chicago, Omaha, Kansas City and St. Louis, especially Chicago and Omaha, both as specifics and as components of the combination rates. The short line distance, 990 miles, from Ogden to Omaha is 184% of the short line distance, 538 miles from Denver to Omaha. During the reparation period the rates on fresh meats and packing house products from Ogden to Omaha were 233 and 219% of the rates on those commodities from Denver to the same point, whereas the average of the class rates from Ogden was 187% of the average of those from Denver. At the time of the hearing the rates on fresh meats and packing house products from Ogden were 174 and 179% of the rates from Denver and the average class rates from Ogden was 184% of the average of those from Denver. That complainant is at a disadvantage in marketing his products at some, if not all, of the destinations named is clear. But it does not follow that the rates on the live animals and

on the products must be measured by the cost of service without consideration of other elements of rate making, or that complainants disadvantage arises from the fact that the adjustment attacked is not so measured. The value of the products is substantially greater than that of the live animals. Complainant is seeking, at the expense of the carriers, to reach, from a distance of about 1,000 or 1,500 miles, markets which are naturally tributary to the packers at the river cities and Chicago. Its disadvantage arises not from the rate adjustment attacked but from its geographical location and commercial conditions. **Atlantic Seaboard & Montreal and New Orleans.** The shipments to these points consisted principally of dry salt pork. The frozen meat moved to New York, Brooklyn and Boston, and rates constructed on the Mississippi river, of $2.69 and $2.235, respectively, were assessed. These were the domestic rates. The contemporaneous export rate from Ogden to New York and points taking same rate was $2. On the date of the hearing the domestic and export rates were $2.735 and $2.665, respectively. The rates from Ogden, on the date of the hearing from Ogden on packing house products, including lard and dry salt pork, applicable to either export or domestic shipments were $2.26 to New York, Weehauken, Guttenburg and Montreal; $2.24 to Philadelphia, $2.23 to Baltimore, $2.28 to Boston and $2.265 to New Orleans. During the period of movement there was in effect a rate of $1.565 on lard and lard substitutes from south Pacific coast terminals to these points. This rate also applied from intermediate points including West Weber, Utah, a point on the S. P., 6 miles west of Ogden. The rate on lard from Ogden to West Weber was 2.5c. The joint class rate to New Orleans was 3.5c higher than the combination to and from Denver, $1.665. Higher rates on packing house products, including dry salt pork, applied from West Weber and other points from which the $1.565 rate on lard applied. The Commission is not convinced that the rate on lard affords a fair measure of the reasonableness of complainant's rates. HELD: Rates attacked except the rates on fresh frozen meat to New York, Brooklyn and Boston, not unreasonable, unjustly discriminatory or unduly prejudicial. HELD: Further, rates on fresh frozen meat to New York, Brooklyn and Boston unreasonable to extent they exceeded $2, reparation awarded. Ogden Packing & Provision Co. v. A. T. & S. F. Ry., 101 I. C. C. 236.

(aa) Complainant attacked as unreasonable, unjustly discriminatory and unduly prejudicial the carload rates to California on fresh meat and packing house products from Ogden and Reno, and those rates plus the rates on livestock to Ogden from Utah, Idaho, Montana, Oregon, Wyoming and Nebraska and to Reno from points in Nevada. The real question in issue is whether or not the rates attacked on fresh meat and packing house products should bear a fixed relationship to the rates on livestock from and to the same points in order that complainant, as it asserts, successfully compete with packers in California in the distribution of these commodities in that state. Estimates of record of the purchases of stock made by the California packers at the Ogden yards range from 25 to 70% of the stock handled at those yards. But the record also shows that the California packers obtain the bulk of their livestock in California, Nevada and Oregon. The larger amount slaughtered at San Francisco and Los Angeles originates within 300 miles of those points. It appears that the purchases of livestock made by the California packers in competition with the Ogden company are confined to certain seasons or to certain kinds or classes of stock, and that those packers pay from 10 to 50c per 100 pounds more than complainant pays. It is true that the spread between the rates from Ogden on the livestock and the products may be such as to permit of this spread in the purchase price and yet prove to be of advantage to the California packers in marketing the products. But complainants have been and are able to obtain sufficient stock within their local territory to meet their requirements. Such advantage to the California packers can not, therefore, be said to subject complainants to undue prejudice in the purchase of the animals. The Commission has recognized that there may be a competitive relationship between livestock and its products, but have never established for general application products rates upon the basis of a fixed relation to the livestock rates, and the wide variances in percentage relationship between the rates in territories east of that here considered on livestock and its products instanced of record indicate that no fixed relation has been observed. Whether or no it is proper to meas-

ure complainant's rates on the products by a fixed relation to the rates on livestock, complainants are entitled to rates which are reasonable per se. Fresh meat and packing house products are rated third class and fifth class, respectively, in the western classification, but commodity rates are maintained thereon from Ogden and Reno to California destinations. The commodity rates are 10.5, 13 and 16c less than third class rates. To Los Angeles the corresponding differences were 32, 40 and 50c. The commodity rates on packing house products from Ogden to the California points have been and at the time of submission of this case were the same as the fifth class rates, but the mixture of articles thereunder is broader than that provided by the classification. The commodity rates from Reno on both fresh meat and packing house products are lower than the class rates. Class rates apply from the plants of the California packers to points in that state at which the principal rail distribution is made. After these cases were submitted substantial reductions were made in the rates on fresh meat and packing house products from Ogden and Reno to California points. The reductions became effective Oct. 3, 1922, from Ogden and Oct. 11, 1922, from Reno, and the rates now in effect are materially lower than the corresponding class rates. Each of the rival packing houses is entitled to a reasonable rate, which should be fairly related, the one to the other, upon the live animals from various points of production, that each is also entitled to a reasonable rate, which again should be so related, upon the products to the various markets of consumption, and that any locality which remains at a disadvantage after this has been done must sustain that burden, which is due to its location with respect to this business. The fact that the rates on the products are higher, even materially higher, than the rates on livestock does not necessarily warrant a finding that they are unreasonable. It may well be that the rates on livestock are too low to be used as a proper measure of the reasonableness of the rates on the products. The Ogden company must pay on shipments from its branch houses to consuming markets the same rates as those paid by the California packers located at those points of shipment. Even if the rates on live animals and the products were the same it does not appear that complainant would be able to compete with California packers on a profitable basis. The losses incurred in the operation of the branch houses materially exceeded the total freight charges on the shipments from Ogden to those points. Complainant's disadvantage seems to be due to their location with respect to this business and not to an improper relationship between the rates on their products and the rates on livestock. HELD: Rates attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Ogden Packing & Provision Co. v. D. & R. G. W. Ry., 101 I. C. C. 258.

(bb) Complainant attacked commodity rates charged on five cars of slack coal shipped Nov. 10 and 11, 1922, from Rock Springs, Wyo., to Cornish, Utah, and diverted in transit to McMillan, Ida., as unjust and unreasonable. Rock Springs is a local point on the U. P., 45 miles east of Granger. Shipments originally billed to Cornish, a point on the Short line. On Nov. 12, 1922, complainant instructed U. P. to divert shipments to McMillan. Traffic from Rock Springs to McMillan generally moves over U. P. to Granger, Wyo., and Short Line beyond. As the instructions were not received in time to accomplish the diversion before the shipments had passed Granger they moved over U. P. to Ogden and Short Line beyond, distance 453 miles. Applicable rate over route of movement was $1.80 to Coalville, Utah, and $3.15 beyond. A joint rate of $3.15 in effect over the Granger route was subsequently made applicable over route of movement. HELD: Rate attacked unreasonable to extent it exceeded $3.15, reparation awarded. Colony Coal Co. v. O. S. L. R. R., 101 I. C. C. 330.

(cc) Complainant attacked commodity rates charged on 3 cars of newsprint paper shipped between Jan. 19 and April 6, 1922, from International Fall, Minn., to Arkansas City, Kans., as unreasonable and unduly prejudicial. Subsequent to the shipments and in compliance with 66 I. C. C. 571, the rate on newsprint paper from International Falls to Arkansas City was reduced from 77.5c to 60c, reduced on July 1, 1922 to 54c. Distance is about 1,039 miles. HELD: Rate attacked unreasonable to extent it exceeded 60c, reparation awarded. News Publishing Co. v. A. T. & S. F. Ry., 101 I. C. C. 419.

(dd) Complainant attacked sixth class rate of 77.5c charged on three cars of

peanuts from Suffolk, Va., and Plymouth, N. C., to Tupelo, Miss., as unreasonable, unjustly prejudicial and unjustly discriminatory. Tupelo is 105 miles southeast of Memphis, Tenn., on the Frsico and M. & O. In the adjustment of class rates from Virginia cities and North Carolina points to Mississippi valley territory it is located in the Memphis group. Two shipments moved Southern to Corinth, Miss., and M. & O., beyond; and one from Plymouth over Norfolk Southern to Charlotte, N. & C., Southern to Corinth, thence M. & O. A rate of 58c was applicable to Memphis, average short line distance from Suffolk and Plymouth to Tupelo, 879 miles, is 75 miles less than the like distance to Memphis. The 58c rate is not applicable to Memphis over the routes by which the shipments moved. It does apply, however, through Tupelo on shipments moving via Birmingham, Ala., thence Frisco. HELD: Rate attacked not unreasonable but unduly prejudicial to extent it exceeds the rates to Memphis, reparation denied. Northeast Miss. Traffic Bureau v. M. & O. R. R., 101 I. C. C. 451.

(ee) Complainant attacked class D rate of 94c charged on solid asphaltum, carloads, from Franklin, Pa., to Ranger, Tex., as unreasonable and unduly prejudicial as compared with rates from Franklin to Comanche and Duncan, Okla. Shipments moved N. Y. C. and Big Four to St. Louis, Mo., M. P. to Texarkana, Tex., and T. & P. beyond, 1,517 miles. The short workable route beyond St. Louis under the formula used in 77 I. C. C. 473, is over the Frisco to Vinita, Okla., M. K. & T. to Fort Worth, Tex., and T. & P. beyond, the total distance from Franklin in connection with this route being 1,442 miles. The class D rate of 70c was applicable on solid asphaltum from St. Louis to Ranger, 829 miles. A commodity rate of 27.5c was and is applicable on solid asphaltum from Franklin to St. Louis, 688 miles. Effective June 15, 1924, a commodity rate of 52c was established from St. Louis to Texas common point territory, resulting in a combination over that point of 79.5c from Franklin to Ranger. On June 4, 1924, a rate of 77c was established based on 25c class D differential over the commodity rate from St. Louis. On Feb. 28, 1925, carriers further reduced the rate from Franklin to Ranger to 75.5c. The class D rate from Franklin to Comanche and Duncan is 93c of 1c less than to Ranger, and on June and August, 1924, rates of 58c to Comanche and Duncan were established. HELD: Rate attacked unreasonable to extent it exceeds 63c, reparation awarded. Lone Star Gas Co. v. C. C. C. & St. L. Ry., 101 I. C. C. 465.

(ff) Joint-line combination rates applicable via Pecos, Tex., on traffic between El Paso, Tex., and points in New Mexico, found not unreasonable, discriminatory, or unduly prejudicial as compared with lower single-line joint rates applicable over a shorter route through Clovis and Belen, N. Mex. Complainant bases his case upon theory that if single-line basis of rates were available over the joint-line route, a more expeditious service would be possible by reason of relatively shorter mileage, but evidence as to present service over respective routes is vague. Moreover, establishment of joint rates over the joint-line route is not shown to be necessary in the public interest. El Paso Chamber of Commerce v. A. T. & S. F., 92 I. C. C. 75.

(gg) Rates on crude clay from Dedrick, McIntyre and Dry Branch, Ga., to Niagara Falls, N. Y., and New Brighton, Pa., found not unreasonable as compared with lower proportional rate applying to the Ohio river, which is restricted so as not to apply in constructing rates to Niagara Falls and New Brighton. Niagara Wallpaper Co. v. M., D. & S. R. R., 92 I. C. C. 329.

(hh) Fifth-class rate and rating on alkali salts, so-called potash, from Omaha, Nebr., to Dubuque, Iowa, assessed as factor of combination from Omaha to destinations east of Mississippi river, found not unreasonable or otherwise unlawful as compared with commodity rates applicable on through shipments from complainant's plant at Lakeside, Nebr., to same destinations, or as compared with lower rate subsequently established. Ordinarily complainant ships in bulk direct to consumers, but these shipments were unusual in that they were stored at Omaha because of insufficient storage facilities at complainant's plant; furthermore, the subsequent reduction of this factor is not sufficient to warrant a condemnation of the combination rate. Standard Potash Co. v. Diirector General, 92 I. C. C. 337.

(ii) Considering character of the commodity, amount of the rates, and extra service performed, a differential of 20

cents per net ton for joint-line hauls on slag found reasonable. Duquesne Slag Products Co. v. P. R. R., 92 I. C. C. 554, 562.

(jj) Through rates on interstate shipments of stone and products from South Amherst, Ohio, a local point on the Lorain & Southern R. R., a common carrier short line, found not unreasonable or otherwise unlawful. Non-absorption by New York Central of all of the Lorain & Southern's local charges, in and of itself, does not establish unreasonableness or undue prejudice, and fact that tariffs of New York Central named rates on stone from various points on its line within a radius of 25 miles from Amherst, the junction point of the two carriers, equal to the junction-point rate, does not establish unreasonableness or prejudice in rates from South Amherst, in absence of a showing with respect to operating situation at such other points. Ohio Quarries Co. v. N. Y. C., 92 I. C. C. 703.

(kk) Rates on zinc ore from points in Oklahoma on Miami Mineral Belt and Northeast Oklahoma railroads, and from trunk-line and junction producing points in Missouri, Kansas, and Oklahoma, to South Fort Smith, Ark., found not unreasonable but unduly prejudicial in favor of competitors operating zinc-smelting plants at Collinsville, East St. Louis, La Salle, Peoria, and Chicago, Ill., and Grasselli, Ind., to extent that factor of above-named carriers exceeded by more than 0.5 cent the contemporaneous factors on like traffic to the preferred plants. Nonprejudicial basis of rates prescribed. Athletic Mining & Smelting Co. v. K. C. S., 93 I. C. C. 119.

(ll) Aggregate of line-haul rates and trackage charges for use of tracks during period cars remain in hold yards awaiting delivery to elevators at Texas City, Tex., on export grain from points in Missouri, Iowa, Minnesota, Nebraska, Kansas, Colorado, and Oklahoma found unreasonable to extent they exceeded such line-haul rates exclusive of trackage charge. Reparation awarded. Armour Grain Co. v. A., T. & S. F., 93 I. C. C. 124.

(mm) Rates on wheat from various points in Kansas and Colorado, to Leavenworth, Ft. Leavenworth, and Atchison, Kans., and St. Joseph, Mo., milled in transit at Kansas City, Mo.-Kans., found unreasonable and unduly prejudicial to extent they exceeded contemporaneous through rates from and to same points on which milling in transit is allowed at points west of Kansas City. Reasonable rates prescribed and reparation awarded. Rodney Milling Co. v. M. P., 93 I. C. C. 200.

(nn) Mere fact of participation by carrier in joint rates in connection with which transit is allowed at points on other lines does not make it guilty of undue prejudice against shippers or localities on its own line. C. R. R. Co. v. U. S., 257 U. S. 247. Lange & Crist Box & Lbr. Co. v. B. & O., 93 I. C. C. 207, 208.

(oo) Whether, as a matter of rate making, in constructing through rates on the distance-scale basis, an allowance of a given number of miles should be made for river transfer service, or arbitraries in cents per 100 pounds be added to the rate computed on basis of strict mileage, is incapable of mathematical demonstration. Mileage for Mississippi Crossings, 93 I. C. C. 462, 475.

(pp) Under the law as it now stands carriers are under no obligation to make their terminal charges with a view to insuring a profit upon operations of other public terminals. Nor does it seem to the commission to have been contemplated that the expressed policy of Congress of developing public terminals at port cities is to be carried out by imposing unnecessary expense upon shippers and traffic, which would defeat a policy of real terminal improvement. Handling Charges on Cement, Fertilizer, and Salt, 93 I. C. C. 640, 644.

(qq) Rate on empty wooden boxes from Kansas City to Carl Junction, Mo., during Federal control found not unreasonable because in excess of the rate to Carthage, Mo., to which Carl Junction is intermediate. Complainant submitted no evidence bearing upon unreasonableness of rate assailed but takes position that because rate to intermediate point is higher than to more distant point, the higher rate is therefore unreasonable under section 1 of the act. but this does not follow. Defendants show that rate assailed compares favorably with rates on similar and other empty containers for similar hauls from Kansas City. Forrester-Nace Box Co. v. Director General, 93 I. C. C. 665.

(rr) Combination rates on coal from points in the Meyersdale district of Penn-

sylvania and Fairmount district of West Virginia to New Castle, Del., a local point on the Pennsylvania, found not unreasonable or otherwise unlawful as compared with joint rates maintained by carriers other than the Pennsylvania from these districts to numerous eastern and New England destinations. Shipments moved during abnormal periods of car shortage and the Pennsylvania defends its policy of refusing to join with other coal-originating lines in publishing joint rates to local points on its line on ground that it is unable to find consumers on its own rails for all coal which it originates, and to maintain such joint rates would cause crosshauling or substitution of two-line for one-line hauls with resulting reduction of transportation efficiency. Moreover, in 62 I. C. C. 49, the commission refused to condemn similar combinations. Chicago Heights Mfrs. Asso. v. B. & O., 95 I. C. C. 83.

(ss) Rate on canned goods from Mobile to Montgomery, when used as a factor in constructing rates moving by water from interstate points of origin found unreasonable as compared with distance rates prescribed in Memphis Southwestern Investigation, 77 I. C. C. 473, and with Alabama intrastate rates contemporaneously in effect from Mobile to Montgomery. Reasonable rate prescribed and reparation awarded. Schloss & Kahn Grocery Co. v. L. & N., 95 I. C. C. 618.

(tt) Combination rates assessed on sporadic shipments of wrought-iron pipe and oil-well supplies from Walden, Colo., located on the Colorado, Wyoming & Eastern, to Casper, Wyo., found unreasonable to extent they exceeded lower commodity rates, constructed by combining the Wyoming intrastate class rate and class rates of the short-line carrier. Reparation awarded. Carter Oil Co. v. C., B. & Q., 96 I. C. C. 215.

(uu) Applicable combination rate assessed on cull apples shipped from Lewiston, Idaho, to San Francisco, Calif., during Federal control, found not unreasonable because the factor Lewiston to Portland, Oreg., over route of movement, exceeded corresponding factor over a different route. Upon contention by defendant that a combination rate must be considered in its entirety, HELD: It is the measure of the rate assessed for the through service which must be considered. California Packing Corp. v. Director General, 96 I. C. C. 239.

(vv) Rates on pulp wood, for joint-line hauls, to Covington, Va., from certain points in southern territory, found unreasonable and unduly prejudicial to complainant and preferential of wood pulp and paper manufacturers at Coleman, Big Island, and Hopewell, Va., Canton, N. C., Kingsport, Tenn. and Bristol, Va.-Tenn. The general rate level is higher in southern than in official territory, while the reverse is true with respect to the commodity under consideration. Covington is situated close to the line dividing the two territories and in view of the nature of this traffic and the competitive situation disclosed is entitled to rates based as nearly as possible on a joint scale properly aligned with the lower level of rates in southern territory on the one hand, and the higher level in official territory on the other. Reasonable and nonpreferential and nonprejudicial rates based on joint distance scale prescribed for the future. West Virginia Pulp & Paper Co. v. S. Ry., 96 I. C. C. 244.

(ww) Rates on vegetable oils from Oklahoma points to Sherman, Tex., for distances of 325 miles or less, found unreasonable and unduly prejudicial to the extent they exceeded or exceed rates for like distances under the scale prescribed in Procter & Gamble, 64 I. C. C. 213, graded downward in manner indicated for single-line application, and for joint-line application, by addition of 2.5 cent differential to the single-line rates, which scale applies from origin points to Dallas and Fort Worth, competing points, and is in effect from Arkansas and Louisiana points to Sherman. Reparation awarded. Determination of future rates left pending decisions in Corporation Commission of Oklahoma v. A. & S. Ry. and Texas Cottonseed Crushers Asso. v. Same, now before the commission. Texas Chamber of Commerce v. A., T. & S. F., 96 I. C. C. 283.

(xx) Combination rates assessed on coal to specific interstate destinations from Hot Coal, Wyco, Jonben, Tracoal, Devils Fork, Corinne, and Fireco, W. Va., Points in the Winding Gulf section of the New River district served exclusively by the Virginia Railway found unreasonable and unduly prejudicial for the future to the extent they may exceed rates contemporaneously maintained from competing points on the main and branch line of the C. & O. in the New River district. Wyoming Coal Co. v. V. Ry. Co., 96 I. C. C. 359.

(xxa) Following American Creosoting case, 257 U. S. 247, no undue prejudice results where a carrier participates in joint rates with connecting lines upon whose rails transit arrangements are permitted while denying similar arrangements at points on its own rails. San Diego Chamber of Commerce v. A. & V., 102 I. C. C. 27, 30.

(xxb) Complainant attacked commodity rate charged on common brick, carloads, from Blue Island, Ill., in Chicago switching district to industries and team tracks in that district, during the period from June 25, 1918 to Dec. 5, 1918, as unreasonable. The rates charged were subsequently reduced to the basis prayed, and reparation only in issue. The shipments to South Chicago, Ill., moved over the joint route of the B. & O. C. T., and B. & O. The shipments to West Pullman, Ill.. over joint route of Rock Island and W. P. & S., and the other shipments over B. & O. C. T., to Illinois and Indiana, or over the Rock Island to stations in Illinois. Rate charged was 70c, except that on shipments over the B. & O. C. T., to Illinois stations the rate was 65c from June 25, 1918 to August 19, 1918. Reparation is prayed on the basis of rates of 30 and 40c, subsequently established. The rates charged included the flat increase of 2c per 100 pounds on June 25, 1918, which was applied generally to rates on brick for line hauls throughout the country. The rates on basis of which reparation is prayed represented a change in that basis of increase to 25% above the rates in effect on June 24, 1918. Considering the congested conditions in and around Chicago, a rate of 70c per ton, can scarcely be denominated a high rate even on a low grade commodity and for comparatively short distances. HELD, rates attacked not unreasonable and complaint dismissed. Illinois Brick Co., v. Director General, 102 I. C. C. 64.

(yy) Complainant attacked commodity rate of $2.25 charged on carloads of coal from mines in western Kentucky on defendants lines, to Franklin, Tenn., prior to July 1, 1922 and rate of $2.03 on and after that date, as unreasonable to extent they exceeded $1.50 and $1.35, respectively. Franklin is a local point on defendants line about 18 miles south of Nashville. Coal from mines on defendants lines in western Kentucky to Nashville and points beyond is generally hauled in trainloads. Cars for Franklin are hauled in local trains from Radnor yards through Mayton to destination where the train crews perform the switching. The distance from Mayton to Franklin is about 13 miles. HELD, rate attacked unreasonable prior to July 1, 1922 to extent it exceeded $1.94 per ton and $1.75 thereafter, reparation awarded. Lillie Mill Co. v. L. & N. R. R. 102 I. C. C. 67.

(zz) Complainant attacked combination rate charged on nine cars of lumber shipped in August 1923 from Manchester Vt., to Cobleskill, N. Y., as unreasonable and unduly prejudicial. Shipments moved over Rutland R. R., to Rutland, Vt., and D. & H., beyond 148 miles, charged $1.80 per ton to Rutland and $2.27 per ton beyond. Effective Dec. 27, 1923 a commodity joint rate of 17.5c per 100 pounds was established over route of movement. It appears that in Jan. 1923 complainant requested defendants to establish a joint rate between the points, but definite action was not taken thereon until the 17.5c rate was established. HELD, rate attacked unreasonable to extent it exceeded 17.5c, reparation awarded. Harder Mfg. Co. v. D. & H. Co., 102 I. C. C. 167.

(3a) Complainant attacked rate charged on alcohol, not denatured since Jan. 19, 1921 from St. Louis, Mo., to Peoria, Ill., as unreasonable and unlawful. In 87 I. C. C. 307 the Commission found rates attacked not unreasonable or otherwise unlawful and dismissed the complaint. HELD, original finding affirmed. Anheuser Busch, Inc., v. C. & A. Ry., 102 I. C. C. 169.

(3b) Respondents proposed to increase the rates on potatoes carloads, from Michigan, Minnesota and Wisconsin to Jellico and Knoxville, Tenn., and Birmingham, Ala., by cancelling the joint through rates to those points, leaving for application the Ohio river combination rates. Joint rates lower than the Ohio river crossings combination rates are published from Groups 2 and 11 only to Birmingham, the normal Ohio river combination basis applying from the other groups to that point. Joint through rates are published from all the groups to Jellico and Knoxville. No other joint rates to southeastern territory are published from the groups named. Joint rates apply to principal points in Mississippi valley territory. HELD,

proposed schedules not justified. Potatoes to Alabama and Tennessee, 102 I. C. C. 183.

(3c) Joint commodity rates on heavy traffic moving long distances are usually less than the combination rates. Potatoes to Alabama and Tennessee, 102 I. C. C. 183, 185.

(3d) Complainant attacked commodity rate on carload of mirrors from Chicago, Ill., to Los Angeles, Calif., on Jan. 16, 1924, as unreasonable. Shipment moved Burlington Kansas City, Santa Fe beyond, charged rate of $3.51. The rate of $2.03 applied on bed room furniture released to certain values, it being stated that the values of the mirrors shipped were no greater than such released values. There is no evidence to support that assertion. HELD, rate attacked not unreasonable, complaint dismissed. Barker Bros. Inc., v. C. B. & Q. R. R., 102 I. C. C. 241.

(3e) Complaint attacked commodity rates charged on four cars newsprint paper and wrapping paper from Nekoosa and Port Edwards, Wis., to San Antonio and Austin, Tex., Jan. 10 and June 2, 1919 as unjust, unreasonable, and illegal. In so far as the complaint alleged the collection of unreasonable charges it is barred because the informal complaint was not filed within the statutory period of one year from the termination of federal control. In so far as it alleged an overcharge it is not barred because the informal complaint was filed within the statutory period of two years six months from the termination of federal control. No reference to value was made in the billing and the rates of 99c on newsprint paper and 93c on wrapping paper were applied. HELD, rate attacked applicable, complaint dismissed. San Antonio Paper Co. v. Director General, 102 I. C. C. 243.

(3f) Complainant attacked commodity rate charged on coal since March 1922 from Harrisburg, Leford, El Dorado, Carrier Mills, and Norris City, Ill., to Hoopeston, Ill., over an interstate route, as unreasonable and that the relationship of that rate and the rates from the same points to Chicago, Ill., and Indianapolis and Vincennes, Ind., subjects Hoopeston to undue prejudice. Hoopeston is on the C. & E. I., 99 miles south of Chicago. It is also on the Nickle Plate west from Sandusky, O., to Peoria, Ill. All of the points of origin are on the Big Four. Carrier Mills is 7 miles and Ledford 3.7 miles south of Harrisburg. El Dorado is 7.5 miles and Norris City 20.6 miles north of Harrisburg. Shipments moved Big Four to Danville, 190 miles, thence N. Y. C., to Handy, Ill., 29 miles, thence Nickle Plate to Hoopeston, 11 miles, total distance 230 miles. All except one of the complainants are served only by the C. & E. I. The charges of that carrier for switching from the Nickle Plate is absorbed by that carrier. No joint rate is published over the route of the Big Four to Danville and C. & E. I., beyond 214 miles. The joint rate applicable over the route first described is $1.92. The rate requested is $1.50. Complainants are entitled to reasonable rates from the points named, but in considering the level of those rates their relationship to rates from other points in the southern Illinois group, and to rates from other groups in the same general territory of which they are apart, can not be ignored. The conditions affecting the rates to Chicago, Indianapolis and Vincennes are not comparable with those affecting the rates to Hoopeston, and the record does not justify the condemnation of the rates from the southern Illinois group to Hoopeston or the application to that point of lower rates from the points of origin named than those from the group. HELD, rates attacked not unreasonable or unduly prejudicial, complaints dismissed. Hoopeston Grain & Coal Co. v. C. & E. I. Ry., 102 I. C. C. 269.

(3g) Complainant attacked commodity rate of 26 2-3c charged on 60 cars of fuel wood shipped between June 12 and June 23, 1918 from Baca, Perea, and Thoreau, N. M., to El Paso, Tex., as illegal and unreasonable to extent it exceeded 20c. Shipments moved over Santa Fe to El Paso and were switched to Fort Bliss, Tex. Complainant had made application for a 20c rate to El Paso and this was published May 14, 1918 in Santa Fe tariff effective June 25. Complainant having received assurance that the rate would be established made a contract which called for delivery in June. The tariff naming the 20c rate was rejected by the Commission. HELD, rate attacked unreasonable to extent it exceeded 20c, reparation denied as the record does not show who paid and bore the freight charges. Complaint dis-

missed. Kaseman v. A. T. & S. F. Ry. 102 I. C. C. 315.

(3h) Complainant attacked combination rates charged on automobile and automobile parts, carloads, from groups A and M, to all points north of Willits, Calif., on the Northwestern Pacific in California as unjust and unreasonable. The main line of the Northwestern Pacific extends from San Francisco northward 284 miles to Eureka. It extends through Willits, which is 140 miles from San Francisco. Transcontinental rates from eastern defined territories are blanketed over a wide area in Pacific coast states of destination. They are likewise blanketed at eastern points of origin, and there is a wide variation in the distances via the various routes over which the rates apply. While Willits and points south thereof take the same blanket rates as are applicable to San Francisco, the rate to Eureka from the same points of origin is made by combination on San Francisco, using the commodity blanket rate to San Francisco plus the class rate of 84.5c beyond. Rates to all other points north of Willits are made on the same basis. HELD, rates attacked unreasonable to extent they exceeded the routes to California coast group points of destination, reparation awarded. Eriksen v. A. A. R. R. 102 I. C. C. 374.

(3i) Complainant attacked commodity rates on crushed stone (gypsum rock) from Blue Rapids, Kas., to Superior, Neb., since Nov. 1, 1921 as unreasonable, unjustly discriminatory and unduly prejudicial. Superior is about 1 mile north of the Kansas-Nebraska state line, served by the Burlington, Santa Fe, M. P., and Northwestern. Blue Rapids is on the M. P., and U. P., 104 miles southeast of Superior. By the U. P., to Marysville, Kas., St. J. & G. I., to Endicott, Neb., and Burlington distance is 102 miles. A longer route over the U. P., to Beatrice, Neb., thence Burlington 145 miles, is used to a considerable extent. The use of the longer route is apparently for the convenience of carriers. Rate prior to July 1, 1922 was 10c and on and after that date 9c. The Santa Fe publishes a distance rate applicable on crushed stone between Kansas points and Superior which for the distance of 104 miles is 6.5c. The M. P., likewise publishes a distance rate of 6.5c for this mileage on crushed stone between Kansas and Nebraska. The Kansas intrastate scale is 5.5c while a rate of 6c is applicable for the 143 mile haul from Blue Rapids to Bonner Springs, Kas., where a mill offering keen competition with complainant is located. A 6.5c basis for gypsum from Blue Rapids to Superior would practically remove the disadvantage experienced by complainant in competing with Kansas mills. The transportation characteristics of gypsum in this form are identical with those of crushed stone, and, as an ingredient of a manufactured product, the carriers enjoy both inbound and outbound hauls. HELD, rate attacked prior to July 1, 1922 unreasonable to extent it exceeded 7c, and 6.5c thereafter, reparation awarded. Nebraska Cement Co. v. M. P. R. R. 102 I. C. C. 411.

(3j) Complainants kilns are west of the Blue Ridge Mountains and are located in that section which extends from Kimballton and from Eagle Mountain on the west and south to Strassburg, Riverton and Leesburg north, served by the N. & W., Virginian, C. & O., B. & O., Southern and W. & O. D. Complainant alleged complainants produce agricultural lime at their plants and distribute the same in interstate commerce to North and South Carolina; that defendants participate in rates applicable on the transportation of agricultural line from Virginia to point in the California and also in rates on powdered limestone from Mascot, Tenn., and that rates on agricultural lime, carloads, from Virginia to Carolina destinations are unjust and unreasonable and unduly prejudicial compared with rates from Mascot, Tenn. About 1912 the state of Virginia recognizing that the correction of soil-acidity was a matter involving the prosperity and welfare of its people, engaged in the production of ground limestone and induced the defendants to publish rates that were very low for the transportation of that commodity within its borders. The same or similar bases of rates have since been extended until today they apply not only on intrastate traffic in verious southern states but also on traffic moving between those states. The ground limestone from Mascot comes into competition in the Carolinas with complainants agricultural line and moves on the rates which are on a materially lower basis than those applying on agricultural lime from Virginia kilns. The present rates on ag-

ricultural lime from the Virginia kilns are generally on a lower basis than applies on building or chemical lime, whereas under the carriers proposed adjustment no distinction is made in the rates on the above description of lime, but the carriers propose to establish the same rates on burnt lime of all kinds. HELD, that the maintenance by defendants of any higher level of rates to Carolinas on complainants agricultural lime than is maintained by defendants on ground limestone from Mascot to the same destination territory would result in rates from the Virginia kilns that are relatively unreasonable and unduly prejudicial has not been sustained. Any undue prejudice that may have been shown on this record to exist under the present adjustment of those rates will be removed as a result of the pending general revision of lime rates, complaint dismissed. Riverton Lime Co. v. A. & R. Ry. 102 I. C. C. 415.

(3k) Complainant attacked through commodity rates of 56 and 64c charged on cars of corn and oats from Iowa and Nebraska to Ogden and other Utah points in 1918 and 1919 as unreasonable and unduly prejudicial to extent they exceeded 51c, the rate to more distant points and subsequently made effective to Ogden and other intermediate points. The rates here attacked were considered in 87 I. C. C. 310 in which the Commission found the rates attacked unreasonable to extent they exceeded 51c. HELD, rate attacked unreasonable to extent it exceeded 51c, reparation awarded. Farrell v. C. M. & St. P. Ry., 102 I. C. C. 455.

(3l) Complainant attacked through commodity rate charged on copper bullion of $16.50 between June 25 and July 24, 1918 from Cananea, Mexico, to Perth Amboy, N. J., as unreasonable to extent it exceeded $9.06 for rail and water transportation and $10.56 for all rail service. The rail and water route was over the S. P., to Naco Ariz., E. P. & S. W., to El Paso, Tex., S. P.. to Galveston, Tex., and Morgan or Mallory lines to destination. The all rail route was over the S. P., to Naco, E. P. & S. W., Rock Island, E. J. & E., M. C., and L. V. Prior to June 25, 1918 the joint rail and water rate was $9.06 and all rate $10.56. Both rates were increased to $16.50 on that date, following G. O. 28. The issue is similar to that in 80 I. C. C. 121. There, as here, complainant relied upon its contention that the rates were unlawful to establish their unreasonableness. The rates were lawfully established under the law administered by the Commission and the Commission is without jurisdiction to determine whether they were lawfully established under the laws of Mexico. No evidence has been submitted to prove that the rates were unreasonable. HELD, rates attacked not unreasonable or otherwise unlawful under the act of federal control act, complaint dismissed. Green Cananea Copper Co. v. Director General, 102 I. C. C. 473.

(3la) Upon further hearing, finding in original report, 83 I. C. C. 712, that rate on anthracite bird's-eye coal from group mines in Pennsylvania to Thomson, N. Y., for joint-line haul, is unreasonable as compared with rate computed on basis of single-line haul, and further prescribing reasonable rate and awarding reparation, affirmed. United Paperboard Co. v. G. & J. Ry., 102 I. C. C. 502.

(3m) Complainant attacked commodity rates on salt, carloads from Anse La Butte, Avery, Salt Mine and Weeks Island, La., to all destinations in Mississippi as unreasonable, unduly prejudicial and in violation of the fourth section. The points of origin are near one another in southern Louisiana nearly due west of New Orleans, La., on the S. P., except Jefferson Island, which is on the G. C. L. Complainants give average distance from the Louisiana mines to New Orleans as 136 miles, and to Baton Rouge, La., 83 miles. Most of this traffic moves via these crossings. Short line distances to substantially all Mississippi destinations are figured through them. The record indicates that the short route is usually one of the routes over which the joint rate through to destination applies. Joint rates are generally maintained from Louisiana mines to Mississippi. They are, with few exceptions, based upon the New Orleans or Baton Rouge combinations, usually the latter, consisting of a proportional rate of $1.825 to either crossing and the local rate beyond. Combinations or joint rates constructed in like manner are applicable on salt to nearly all points in southern territory, but the proportionals to New Orleans and Baton Rogue reflected therein vary widely according to the state of destination. Such proportional on traffic to Alabama is the same

as to Mississippi, $1.825, to Georgia, South Carolina, and Florida, $1.58; and to states north of those named $1.095. Thus, traffic to Tennessee, immediately north of Mississippi enjoys a proportional rate to the above crossings of 73c which is only 40% of the rate on traffic to Mississippi. HELD, rates attacked unreasonable to extent they exceeded a distance scale ranging from $3.15 for 130 miles to $5 for 540 miles, reparation awarded. Mississippi Railroad Commission v. A. & V. Ry., 102 I. C. C. 540.

(3n) Complainant attacked commodity rate charged on coke dust or breeze coke, carloads, from Pittsburgh, Pa., to Moundsville, W. Va., as unreasonable, unjustly discriminatory and unduly prejudicial. Coke dust or breeze coke is the term applied to screenings from regular coke rejected for use in steel mills, shipments moving via B. & O., at rate of $2.02. No justification for rate charged was offered. A rate of $1.60 was published on March 2, 1925. HELD, rate attacked unreasonable to extent it exceeded $1.60 per ton, reparation awarded. United Zinc Smelting Co. v. Pennsylvania R. R. 102 I. C. C. 601.

(3na) Refusal of defendant rail carriers to establish through routes and joint rates on rail-and-water traffic from lower Michigan points via Detroit to Cleveland and Buffalo found not unjustly discriminatory or unduly prejudicial. No showing has been made that rail carriers participate in through routes and joint rates with a water carrier in competition with complainant, thereby establishing the allegation of undue prejudice, nor do facts of record support allegation of unjust discrimination. Detroit & Cleveland Nav. Co. v. M. C., 102 I. C. C. 607.

(3o) Complainant attacked commodity rates since Sept. 23, 1922 on crushed slate, carloads, from Delta, Pa., to Lockport, N. Y., as unreasonable, unjustly discriminatory and unduly prejudicial. Delta is on the Maryland & Pennsylvania, 33.4 miles southeast of York, Pa., where connection is made with the Pennsylvania. Lockport is on the N. Y. C., and Erie, about 25 miles northeast of Buffalo. Effective Sept. 10, 1923 a joint commodity rate of 17.5c was established from Delta to Lockport routing restricted via York, Pa., and Pennsylvania, and is still in effect. Complainant sought rates from Delta to Lockport which shall not exceed the rates from Delta to Erie. The distances from Delta to Erie and to Lockport are 401 and 382 miles, respectively. The rates on crushed slate from Delta to Erie were from Sept. 1, to Oct. 1, 1922, $3.42; from that date to Feb. 16, 1924 $3.20 and since that date $3.40. The movement of crushed slate from Delta began in September, 1922. A commodity rate to Lockport of $3.28 per ton was requested by complainant on Oct. 24, 1922. On Sept. 10, 1923 almost a year later, rate of $3.50 per ton was established. If this commodity is to move any distance it must be on comparatively low commodity rates. No satisfactory reasons are given for the long delay which followed complainants request for the establishment of a joint commodity rate. HELD, rate of $3.50 not unreasonable or otherwise unlawful, but from Sept. 23, 1922 to Sept. 10, 1923 combination of 30c applicable via Buffalo unreasonable to extent it exceeded 20.5c reparation awarded. Lockport Paper Co. v. M. & P. Ry. 102 I. C. C. 624.

(3p) Complainant attacked combination rates charged on one car of apples from Clearbrook, Va., to Jonesboro, Ark., on Oct. 16, 1922 as unjust, unreasonable and in violation of section four. Clearbrook is on the Pennsylvania, 6 miles south of Winchester, Va., which latter point is 20 miles north of Strasburg, Va. Shipment moved over Pennsylvania, B. & O., and Southern to Memphis, Tenn., and Frisco beyond, charged $1.035 but a lower combination was in effect of 92.5c by way of Pittsburgh, Pa., made 31.5c to that point and 61c beyond. Shipment was misrouted. Defendants maintained a joint commodity rate of 74.5c to Jonesboro, at time of movement, from Strasburg, Riverton and other Virginia points in the same vicinity on the B. & O., N. & W., and Southern. HELD, rate attacked unreasonable to extent it exceeded 74.5c, reparation awarded. Wimberly Grocer Co. v. Pennsylvania, R. R. 102 I. C. C. 637.

(3q) In 98 I. C. C. 339 the Commission found rates on newsprint paper, carloads, from New England, New York and Canada and from Philadelphia, Pa., to Baltimore, Md., not unreasonable, but that rates to Washington were unreasonable to extent they exceeded the rates to Baltimore by more than 3c from Phil-

adelphia and 2c from the other points of origin. HELD, original findings affirmed. Washington Publishers Asso. v. B. & O. R. R. 102 I. C. C. 662.

(3qa) Reshipping rates on logs to Louisville from stations in Kentucky and Tennessee on Scottsville-Hartsville branch of L. & N. found unreasonable to extent they exceeded lower contemporaneous rate on like traffic from equidistant main-line points of that carrier, which lower rate was subsequently established from branch-line points. Reparation awarded. Wood Mosaic Co. v. L. & N., 102 I. C. C. 684.

(3r) Complainant attacked commodity rates on newsprint paper, carloads, from Minnesota, Wisconsin, Indiana, Ohio, Virginia, New Jersey, New York, New Hampshire, Maine, Washington, and Oregon and from points in Canada, moving all rail except from West Linn, Ore., to Dallas and Fort Worth, Tex., as unreasonable on and after Mar. 1, 1920. The rates from Wisconsin, Minnesota and Ontario were prescribed to Dallas and Fort Worth in 66 I. C. C. 571. In effecting these revisions a rate of 60c was established from St. Louis to Texas common points on Dec. 15, 1922. The rates from producing points in central and eastern seaboard territories over the all rail and from the Pacific coast states, to Texas common points were reduced on or subsequent to June 15, 1922. From points in eastern seaboard territory over the rail ocean and rail routes the reductions became effective on June 1, 1922. RATES FROM FOX RIVER AND RELATED GROUPS. Newsprint paper is rated fifth class in the western classification. In the Paper case a rate of 82c was prescribed from the Fox river group to Texas common points, including Dallas and Fort Worth. The rates from the northern Wisconsin and Minnesota groupes were made 1c, and from International Falls, Fort Francis and Sault Ste Marie 5c over the Fox River groups rates. HELD, the Commission is unable to reach the conclusion that the rates on newsprint paper from the Fox River and related groups in Minnesota, Wisconsin and Ontario to Dallas and Fort Worth should have been in the past, or should be now or in the future, lower than the basis of rates applicable to Texas common points generally. The same conclusion applies to rates from points in defined and eastern seaboard territories from which the all rail rates to Dallas and Fort Worth are made differentials over, or by combination on, St. Louis, or other basing points. RATES FROM POINTS IN DEFINED TERRITORIES. Although complainants attack the rates from points in defined territories in Indiana, Ohio, Virginia and New York made differentials over the rates St. Louis they contend that the unreasonableness is due primarily to the measure of the factor west of St. Louis, and do not attack the measure of the differentials added thereto to make the through rates. The short line distances from St. Louis are stated to be 647 miles and 706 miles to Dallas and Fort Worth, respectively, and to Texas common points an average of about 800 miles. RATES FROM POINTS IN EASTERN SEABOARD TERRITORY. Complainants contend that the rates from points in eastern seaboard territory were unreasonable to the extent that the factor west of St. Louis exceeded 56.5c prior to July 1, 1922 which proposed rate is equivalent to the fifth class differential of 15.5c less than the rate of 72c claimed as reasonable from Fox River territory. The previous conclusion of the Commission herein respecting the claims for lower rates to Dallas and Fort Worth than to Texas common points generally negatives this contention. In revising the rates from these territories pursuant to the decision in the Paper case, defendants established, effective Dec. 15, 1922 a rate of 60c from St. Louis which reflects what would have been a rate of 66.5c from August 26, 1920 to July 30, 1922 and 49c from June 25, 1918 to August 25, 1920. The rates from eastern seaboard territory to Texas common points over the all rail routes are, and have been for a long time, made by combination on St. Louis or other basing points. They are the same from all points of origin. The joint rates from eastern seaboard territory over the rail ocean and rail routes through New York and Galveston are lower than the combination rates over the all rail routes, and as in the case of the all rail rates, the origin points are grouped with the same rate to points in Texas. The average distance from the points in eastern seaboard territory to New York is shown to be 334 miles, and from Galveston to Fort Worth and Dallas an average of 299 miles. The dis-

tance from New York to Galveston over the water route is about 2,180 statute and 1,887 nautical miles. For a number of years the class rates from eastern seaboard territory heretofore named, over to Texas common points, including Dallas and Fort Worth, have been substantially on a parity. The commodity rates, however appear to be lower from eastern seaboard territory. RATES FROM POINTS IN OREGON AND WASHINGTON. Newsprint paper producing points in Oregon and Washington are grouped and take the same rate to Texas common points. The only question before the Commission for determination respecting rates from Washington and Oregon to Dallas and Fort Worth is their reasonableness in the past and reparation on past shipments. Newsprint paper is a comparatively low grade commodity. It loads about 26 tons to the car and moves regularly and in substantial volume throughout the year. It is desirable traffic for the carriers. HELD, present rates not unreasonable but rates in past unreasonable to extent they exceeded between August 26, 1920 and June 30, 1922, 82c from Fox River group and 83c from northern Wisconsin and Minnesota; 87c from Ontario; 79c from Alexandria; 86.5c from Dayton; 93c from Big Island; $1 from Niagara Falls; $1.75 from the points in eastern seaboard territory heretofore named, over the all rail differential routes, and $1.22 from the same points of origin over standard routes; $1.12 from Washington and Oregon and 90c from eastern seaboard territory over the rail ocean and rail routes; that rates for the period from March 1 to August 25, 1920 and rates on and after July 1, 1922 where in excess of the above bases, made to reflect the general reduction of that date, were unreasonable to extent they exceeded rates made by deducting, respectively, from the rates found reasonable as above the percentages of increase authorized by the Commission on July 29, 1920 and the general reduction of 1922, reparation awarded. Wortham Carter Pub. Co., v. Director General, 102 I. C. C. 729.

(3s) In most cases recently before the Commission where rates on traffic moving in large volume have been found to be upon full combinations of locals the Commission has required the establishment of through rates less than the combinations. Morrell & Company v. N. Y. C. R. R. 104 I. C. C. 104, 137.

(3t) Complainant attacked commodity rates charged on green coffee, carloads, from New York to Austin, Tex., from New Orleans, La., to La Grange, Austin and San Antonio, Tex., during the period from Feb. 22, 1921 to Jan. 23, 1923 as unreasonable. Complainants expressed themselves as satisfied with the present rates from New Orleans, and those rates will not be considered. In 92 I. C. C. 14 the Commission found that on and since March 1, 1920 the rates on green coffee, carloads, from New York to Denison, Fort Worth and Dallas, Tex., were unreasonable to extent they exceeded 64 and 86.5c, prior and subsequent to August 26, 1920. Generally speaking the foreign coffee producers sell their products to importers located at the ports of entry and these importers distribute the coffee to roasters located at the ports and interior points. Upon arrival at the ports the coffee is stored in warehouses to await reshipment beyond. The temporary storage at the ports does not divest this traffic of its foreign character acquired at the time it begins its journey from the foreign port. The movement to the Gulf ports is only a step in its transportation to the interior destinations. Green coffee is rated fifth class in western classification. The Texas destinations are within the socalled Texas common point group but distance class rates apply when lower than the group rates. If the import rates from New Orleans to La Grange, Austin and San Antonio had remained in effect on and after June 25, 1918 they would have been 36.5c to LaGrange, 49c to Austin and 56c to San Antonio prior to August 26, 1920. The water and rail rate from New York to Austin was 65c on June 25, 1918. This rate became 90.5c on August 26, 1920 and 81.5c on July 1, 1922. Effective Feb. 1, 1923 a rate of 70c was established to Texas, common points, except Dallas, to which point the rate was 67c increased to 70c on June 1, 1925. Although the Commission has heretofore used a ratio of water miles to rail miles for the purpose of comparing rail and water and all rail rates, it is not prepared to accept this basis as a controlling principle in prescribing rates for rail and water hauls. Before this is done careful analysis should be made of the conditions surrounding the trans-

portation of the different lines. Under rail and water rates traffic must be unloaded from the ship and reloaded into cars. The Commission has heretofore called attention to the fact that the cost of operating a ship is practically the same whether it carries full cargo or no cargo, and that much depends upon the ability of the ship to obtain a proper load and return cargo. Transportation conditions in connection with both and rail haul and the water haul have changed from time to time, and the Commission has before it no definite comparison of the relative expenses of transportation. HELD, rates attacked unreasonable to extent they exceed from New Orleans to Austin and San Antonio, 66c prior to July 1, 1922 and 59.5c thereafter; from Galveston and Houston 56c prior to July 1, 1922 and 50.5c thereafter; from New York to Denison, Fort Worth, Dallas and Austin 61.5c and 83c prior and subsequent to August 26, 1920 and 74.5c on and since July 1, 1922, reparation awarded. Alexander Grocery Co. v. B. S. L. & W. Ry. 104 I. C. C. 155.

(3u) Respondents proposed both increases and reductions in their rates on grain, grain products, and alfalfa meal, carloads, from Colorado common points and points grouped therewith to destinations in Wisconsin and Upper Peninsula of Michigan. The rates in which changes are proposed apply to certain destinations north of the Milwaukee-Prairie du Chein line of the Milwaukee principally in Wisconsin. Although in a few instances the increases are as much as 8c, they are as a rule about 6c. The rates apply through Kansas City, Mo., or Omaha, Neb., where transit arrangements obtain. To the principal Wisconsin points the joint rates at present in effect are the same as those to Chicago, Ill., and Milwaukee, Wis., which on wheat are equal to the combination of a local rate of 33c to the Missouri river and a proportional rate of 17.5c beyond. According to the record the proportional rates do not apply to the destinations here considered, only local rates being in effect, or the same as the locals to Chicago and Milwaukee. The proposed joint rates equal the combination of locals to and from the Missouri river cities. This is quite generally the basis for rates on these commodities from points west of the Missouri river in Oklahoma, Kansas, Nebraska, Wyoming and eastern Colorado. Proportional rates are now in effect to some of the destinations and in those instances the proposed rates would exceed combinations on the Missouri river. To certain points in the northern part of the destination territory respondents proposed higher rates than those which apply from Utah common joints. This action was left unexplained. HELD, proposed rates justified except where they would exceed the present rates from Utah common points, the combinations of the local to and the proportionals beyond Omaha, or the rates to farther distant destinations in violation of the fourth section. Grain and grain products from Colorado, 104 I. C. C. 281.

(3v) Original report in 101 I. C. C. 363 prescribed rates and routes on low volatile bituminous coal from Virginia mines to New England. This proceeding was reopened for the purpose of developing the facts with respect to the need for the establishment of additional or new joint rates and through routes on such coal, both in run of mine and in prepared sizes, and coke from the New River, Pocahontas, Tug River, Kanawha, Coal River, Logan, Thacker, and Kenova districts in West Virginia and eastern Kentucky, from Clinch Valley districts Nos. 1 and 2 in Virginia and from the Big Sandy division of the C. & O., in eastern Kentucky, to all points in the middle Atlantic and New England states. Inquiry was also made into the reasonableness of the present rates and routes on semi-anthracite coal from mines in the vicinity of Pulaski, Va., and on bituminous coal, sem-bituminous coal and coke from the Meyersdale, Cumberland-Piedmont and Fairmont districts of Pennsylvania, Maryland and northern West Virginia to the same destination territories. At the hearing the B. & O., the principal carrier serving Somerset County field, expressed its intention to establish a proportional rate of 75c from this field to Johnstown, Pa., in the Clearfield district, which would open the entire eastern market to the coal operators in Somerset County. The Commission shall expect the B. & O. to publish this proportional rate to Johnstown so that it will become effective not later than the effective date of the rates published in compliance with the order herein. Handling at the Atlantic ports of bituminous coal in prepared sizes for shipment to New England by way of tidewater causes degradation to such an extent that the rail and water routes are

undesirable for the movement of this coal. This does not apply to run of mine coal. HELD, (1) That because of imminent shortage of fuel for household use in New England and some portions of the Middle Atlantic states an emergency, such as is contemplated by paragraph 4 of section 15 of the act, has arisen which requires immediate action, and (2) that it is in the public interest that as far as possible the serious consequences of such an emergency, such as the severe suffering on part of the public which would result from a shortage of household fuel, should be avoided and that it can be avoided to a large extent by the prompt establishment of joint all rail rates and through routes on prepared sizes of bituminous coal from mines in Virginia, southern West Virginia and eastern Kentucky to all destinations in New England and to points in the Middle Atlantic states. HELD, from all mines in the New River, Pocahontas, and Tug River districts and in Clinch Valley district No. 1, to all points in New England and New Jersey rates which shall not exceed by more than $1.10 rates from Clearfield district. From all mines in Clinch Valley No. 2 to all destinations on B. & O., Pennsylvania and Long Island, and New England and New Jersey rates not exceeding those from Pocahontas and Tug river. From all mines in the Kanawha, Coal River, Logan, Kenova and Thacker districts rates which shall not exceed the rates from New River, Pocahontas and Tug River by more than 25c. From all mines on the Big Sandy division of the C. & O., in Kentucky rates which will not exceed those from Tug River by more than 40c. Rates on prepared sizes of semi-anthracite coal, from McCoy and Merrimac, Va., on the Virginian Ry. and from stations Pulaski to Vicker, Va., on the N. & W., rates for the future will be unreasonable to extent they exceed rates on prepared sizes of bituminous coal from Pocahontas district to same destinations. Transportation of anthracite coal, 104 I. C. C. 341.

(3w) Complainant attacked commodity rates charged on coal, carloads from Alabama on the C. of Ga., to Florence, Ala., as unjust, unreasonable and unduly prejudicial. Between August 21 and Sept. 27, 1922 the complainant shipped five cars of coal from Grants, Ala., to Florence. Shipments moved C. of Ga., to Birmingham and L. & N., to destination by way of Columbia, Tenn., distance 257 miles, applicable rate $2.25. There were three possible intrastate routes, (1) C. of Ga., to Birmingham, Frisco to Jasper, Ala., Northern Alabama to Sheffield, Ala., and Southern beyond, 149 miles; (2) C. of Ga., to Birmingham, L. & N., to Decatur and Southern 152 miles, and (3) C. of Ga., to Birmingham, Southern to Parrish, Ala., Nor. Ala., to Sheffield and Southern 160 miles. The rate over the first and third routes is $1.69 and by way of the second route $3.37. The shipments were originally unrouted but due to a strike of machinists at the time of movement traffic over the short line intrastate route in connection with the Nor. Ala. was delayed, and the C. of Ga., at Birmingham was instructed to route four of the cars over L. & N., from that point. As no instructions were given as to the routing of the other car, it is admitted by defendants that it was misrouted and should have moved over one of the intrastate routes at a rate of $1.69. The interstate route over which the shipments moved is not the logical or reasonable route, and the record indicates that it will probably not be used except in case of an emergency. HELD, interstate rate not unreasonable or otherwise unlawful, overcharge to be refunded, complaint dismissed. Florence Chamber of Commerce v. C. of Ga. Ry., 104 I. C. C. 373.

(3x) Complainant attacked commodity rates charged on three cars of printed fruit wrapping paper from Los Angeles to Ordway and Rocky Ford, Colo., in July 1922 as unjust and unreasonable, charged $1.50 and $1.33, respectively. Contemporaneously defendants maintained a rate of 84.5c on printed wrapfruit wrapping paper, to Ordway and ping paper, also applicable on printed Rocky Ford from the principal paper producing points in Washington and Oregon. Subsequently the rate from Los Angeles was reduced to 94c, the present rate. HELD, rates attacked unreasonable to extent they exceeded 94c reparation awarded. Crown Williamette Paper Co. v. U. P. R. R. 104 I. C. C. 399.

(3y) Complainant attacked commodity rate charged on coke, in carloads, since April 16, 1923 from Chickamauga and Durham, Ga., Chattanooga and Alton Park, Tenn., to Pacific coast terminals as unreasonable, unjustly discrimi-

natory and as compared with the rates from Birmingham, Ala., unduly prejudicial. The coke ovens at Chickamauga are located on the C. of Ga., 13 miles south of Chattanooga. In 34 I. C. C. 10 the Commission found the rate on coke from Durham and Chickamauga to Pacific coast terminals unduly prejudicial as compared with rates from Birmingham and the Birmingham rates were made applicable. The rates on coke from Chattanooga, Chickamauga and Durham remained on a parity with the rate from Birmingham until April 16, 1923 when the rate from Birmingham over the L. & N., and S. P., via New Orleans was reduced from 68 to 60c, no change being made from the other points.. Complainants meet the most active competition in the sale of coke from Birmingham district. HELD, rate attacked not unreasonable or unjustly discriminatory but unduly prejudicial to extent they exceed rates from Birmingham district to the same destinations. Durham Coal & Iron Co. v. C. of Ga. Ry., 104 I. C. C. 483.

(3z) Complainant attacked commodity rate of 47c charged on glucose or corn sirup, in tank cars, from Clinton, Iowa and Roby, Ind., to Atlanta, Ga., as unreasonable. The distance from Chicago to Atlanta is 732 miles and the joint commodity rate of 47c has been applicable for more than two years. Contemporaneously there have been in effect rates of 41.5c from Chicago, Clinton and Roby to Birmingham and Montgomery, Ala., and New Orleans, La., for distances from Chicago of 649, 746 and 911 miles. Since August 23, 1923 a rate of 38c has been in effect from Chicago to Meridian, Miss., 721 miles. HELD, rate attacked unreasonable to extent it exceeded 38c reparation awarded. Cairo Syrup Co. v. I. H. B. R. R. 104 I. C. C. 487.

(4a) In 101 I. C. C. 474 Commission had before it rates on anthracite coal via joint line routes to points in upper New England. Respondents now come to the Commission for approval of a proposal for removing these disparities which contemplates some increases in the single line rates and generally reductions in the rates for joint hauls. It is proposed to increase the single line rate to Albany to $2.75 and to increase or reduce, as the case may be, the rates for the joint hauls to $2.88, the rates on pea size and generally on smaller sizes to be 25c less. The single line rate of $2.65 to points east of Geneva, N. Y., applies only from the Wyoming region. The joint line rates apply from the Wyoming, Lehigh and Schuylkill regions. The proposed rates would apply from all three regions. The average distance from the Lehigh and Schuylkill regions is substantially greater than that from the Wyoming region. The difference of 13c between the single and joint line hauls in this proposed readjustment does not appear to be unreasonable, nor is it great enough to place the retail coal dealer served by the joint routes under any serious handicap in competing with the dealer served by the single line at the same point. HELD, readjustment proposed will remove the existing undue prejudice and will not result in unreasonable rates. Anthracite Coal Investigation, 104 I. C. C. 514.

(4b) Complainant attacked commodity rates charged on brick carloads from its plant at East St. Louis to St. Louis, Mo., as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. Shipments from complainants plant to destinations within the switching district of St. Louis move over the Alton & Southern to its connection with the Terminal at East St. Louis thence over Terminal across Eads bridge to points of delivery, or to connecting lines in St. Louis upon which the points of delivery are located. Prior to June 6, 1924 the rate of these defendants on all kinds of brick from complainants plant for Terminal delivery in St. Louis or for delivery to connecting lines such as the Belt, was 70c. On that date the Terminals rate of 50c for connecting line delivery was reduced to 40c. The distances from complainants plant at East St. Louis do not exceed 20 miles. For such distances the rate prescribed by the Commission in 68 I. C. C. 213 was 70c on common or facing brick and 90c on brick other than common. It is not shown that complainant has lost any sales at St. Louis by reason of the rate adjustment complained of and apparently shipments from its plant for delivery within the switching district of St. Louis move freely under the present rates. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. H. & R. Mining Co. v. A. & S. R. R. 104 I. C. C. 671.

(4c) Complainant attacked class rate charged on 19 cars of scrap iron between July 1, 1922 and Jan. 1, 1923 from Superior, Wis., to Steelton, Minn., as inapplicable, unreasonable, unjustly discriminatory and unduly prejudicial. Steelton is at the western edge but within the corporate limits of Duluth, Minn., the shipments were unrouted and moved from complainants yard within the corporate and switching limits of Superior to plant at Steelton, route of movement being C. St. P. M. & O., to South Itasco, Wis., and D. M. & N., beyond, charged minimum class D rate of 6.5c. After the shipment moved a rate of 90c per long ton, minimum 40,000 pounds, was established and is still in effect. No evidence was offered attacking the present rate. Complainant contends that they should have moved over the Omaha to Rices Point, N. P., to Missabe Jct., and Missabe beyond at a combination rate of 2c per 100 pounds of the Omaha, N. P., switching rate of $2.25 per car and $11.50 per car of the Missabe. The 2c switching charge of the Omaha applied only on cars having a "road haul" defined as cars having "either destination or origin outside of switching limits." The cars here consideration admittedly originated within the switching limits of Superior, but it is complainants theory that because Steelton is shown as a station on the Missabe, and as reference is made in the tariffs of that carrier to certain switching areas at Missabe Junction and Steelton, the intervening distances necessarily involves a road haul. The conclusion, however, disregards the fact that the industrial section of Duluth extends beyond Steelton and includes that part of the city between Missabe Junction and Steelton. The movement over the route claimed by complainant is more in the nature of an intraterminal transfer than a road haul, and the 2c charge of the Omaha switching tariff is inapplicable over that route. HELD, shipment not misrouted and charges attacked not unreasonable or otherwise unlawful, complaint dismissed. Kaner v. C. St. P. M. & O. Ry. 104 I. C. C. 710.

(4d) A line which participates in a joint rate is not guilty of undue prejudice in failing to accord a transit service at a point on its line merely because another carrier party to the same joint rate does not accord transit service. Federal Products Co. v. I. C. R. R. 107 I. C. C. 271, 275.

(4e) Complainant attacked through class rates applicable on 23 cars of rough granite from Middlebrook, Mo., to Elmwood, Ill., between Dec. 1920 and April 1923 as unreasonable and discriminatory. Shipments originated at De Soto, Iron Mountain and Middlebrook, Mo., stations on the M. P., 45, 84 and 86 miles, south of St. Louis, Mo. Shipments moved M. P., to St. Louis, Mo., thence Burlington. The commodity rates to and from St. Louis subject to the combination rule would reduce the combinations of 9.5c plus 14.5c and 8.5c plus 13c from 24 and 21.5c, respectively, to 21.5c and 19c, respectively. HELD, rates attacked unreasonable to extent they exceed 24c prior to July 1, 1922 and 21.5c thereafter, reparation awarded. Burgoin & Company v. C. B. & Q. R. R. 107 I. C. C. 376.

(4f) Complainant attacked joint rate of 40.5c charged on cypress, ash and maple lumber shipped between Feb. 1923 and May 1924 from Gable, S. C., to Cincinnati, O., as unjust and unreasonable to extent it exceeded 34c. Gable is on the Alcolu R. R., a line extending 25 miles from its junction with the A. C. L., at Alcolu, S. C., all shipments being charged 40.5c and most of them delivered to defendant. Fifteen cars moved over various routes via Augusta, Ga., to destination. Five cars moved through Virginia cities gateways. The distances from Alcolu to Cincinnati varied from 791 miles over the shortest route of movement through Augusta to 964 miles via Richmond, Va. Except for general rate changes, complainant shows that the 34c rate to which basis it now seeks reparation had been voluntarily established and maintained for nearly eight years prior to the establishment of the rate attacked on Feb. 1, 1923. Defendants are unable to say how the 40.5c rate was constructed. HELD, rate attacked unreasonable to extent it exceeded 36.5c from Feb. 1923 to May 1924 from Gable to Cincinnati, reparation awarded. Gulf Red Cypress Co. v. Alcolu R. R. 107 I. C. C. 397.

(4g) Complainant attacked commodity rates on iron and steel articles, carloads and less carloads, from Coatesville, Milton and Harrisburg, Pa., Cleveland and Youngstown, O., Buffalo and Lackawanna, N. Y., and Claymont, Del.,

to Warren, Pa., as unreasonable, unduly prejudicial and in violation of the fourth section. Warren is served by the Pennsylvania and New York Central. Complainant is located on the Pennsylvania at a point called Struthers, about 2 miles from the Warren freight yards. The Pennsylvania is the short rate making line from Pittsburgh to Warren and has two routes, both entirely intrastate, between the points named one via Red Bank, 190 miles, and the other via New Castle, 170 miles. Practically all of complainants shipments from points in the Pittsburgh district, as well as other iron and steel traffic, moved over the route through Red Bank. There are numerous possible interstate routes between Pittsburgh and Warren, over some of which joint rates are published. At the time of the hearing, the rates from points in the Pittsburgh district to Warren, intrastate and interstate, were 23.5c carloads, and 33.5c less carloads, these being the fifth class and fourth class rates, applicable on iron and steel articles under the socalled Disque scale in effect in central territory. Subsequently the intrastate carload rate was reduced by the Pennsylvania Commission to 18c. There is some evidence of record relating to the rates from the points in issue outside of Pennsylvania. This evidence is mainly directed to the carload rates and only those will hereinafter be considered. RATES FROM BUFFALO. The commodity rate in effect to Warren is 81.5% of the fifth class rates, and is the same in amount as the rate from the latter point to Titusville, Oil City and Franklin, Pa., with which points Warren has been grouped as to rates from Buffalo since 1908. The present rate from Buffalo to Sharon, Sharpsville, and Greenville, Pa., and Leetonia, Niles and Warren, O., which points are listed as competitors of complainant and are served by the Pennsylvania, is 25c, or 9.5c higher than the Buffalo-Warren rate, whereas in 1908 those points paid a rate only 1.5c higher than Warren. While complainant lays stress upon the shorter distance from Buffalo to Warren than from Buffalo to a number of the competing points, these differences in distance are not great and their importance is minimized where rates are made on the group basis, as is the case in connection with many of the iron and steel commodity rates in this territory. RATES FROM CLEVELAND AND YOUNGSTOWN. The applicable rate from Cleveland to Warren is the fifth class rate of 25c, the same rate being in effect to Corry and Titusville, which are also on the class basis. Generally, short haul and interdistrict traffic in iron and steel articles in central territory has for many years moved on commodity rates somewhat lower than fifth class. These low rates resulted from the establishment by the Erie, which did not serve Pittsburgh, of a commodity rate from Youngstown to Cleveland which was 50% of the class rate. The carriers serving Pittsburgh thereupon equalized that rate from Pittsburgh to Youngstown the distance being almost equal. This was likewise reflected in other directions. The rate from Youngstown to Warren, 21c, is also on the class basis. To Titusville, which is 44 miles nearer to Youngstown, it is 20c, a class rate. Fifth class rates have generally been applied to the longer hauls in central territory comparable to those here considered, although there are many exceptions in the form of commodity rates. To points in short haul territory the same general situation prevails with respect to the rates from Youngstown as above outlined with reference to the rates from Cleveland. RATES FROM CLAYMONT. From Claymont the applicable commodity rate of 31c is 96.8% of the current fifth class rate. The same commodity rate applies to Oil City, Corry, Titusville and Franklin, Pa. Although Buffalo, Cleveland, Youngstown and Claymont are referred to as important iron and steel producing points, nothing is shown on this record with respect to the volume of movement therefrom to either Warren or the competing points referred to by complainant. FOURTH SECTION DEPARTURES. Applications of B. & O., seeking permission to continue to charge for iron and steel articles from Johnstown, Pa., to Titusville, Pa., rates which are lower than those maintained on like traffic from, to and between intermediate points. This situation has been corrected by the establishment of the same rate from Johnstown to Titusville as applies from the former point to Warren. To the extent involved herein the applications will be denied. SWITCHING SITUATION. Complainants plant is located in that part of the borough of Warren called Struthers, which is served only by the Pennsylvania. Defendant pub-

lishes switching charges, varying in amount, applicable to the interchange with the Central at Warren of numerous commodities. It does not publish such charges on iron and steel consigned to industries at Struthers. On any such shipments which arrive at Warren over the Central defendant charges its local fifth class rate of 11c per 100 pounds in effect from Warren to Struthers, for the movement from its connection with the Central to complainants plant. HELD, interstate rates on iron and steel articles from Pittsburgh, Cleveland and Youngstown Buffalo and Claymont to Warren and Struthers not unreasonable or otherwise unlawful. Charges of defendant Pennsylvania for interchange and switching at Warren of interstate inbound cars of iron and steel articles consigned to Struthers unreasonable to extent they exceeded prior to July 1, 1922, 66c per ton and subsequently 60c per ton, reparation denied. Hammond Iron Works v. Pennsylvania R. R. 107 I. C. C. 473.

(4h) In 93 I. C. C. 579, Division 3 found that the rate on bituminous coal, carloads, from Harrisburg, Ill., to Lafayette, Ind., from Oct. 1922 to June 1923 was not unreasonable and dismissed the complaint. The rates from Harrisburg to Indianapolis and destinations in Indiana to which rates are based on the rate to Indianapolis are lower than the rate to Lafayette because the rates to Indianapolis and vicinity reflect competition with Indiana mines. The rates from Harrisburg to Fort Wayne and South Bend, Ind., are lower than the rate to Lafayette because the rates to the former points are related to the rates to Chicago. HELD, original finding affirmed. Lafayette Box Board & Paper Co. v. C. C. C. & St. L. Ry., 107 I. C. C. 509.

(4i) In determining distances in compliance with the rates herein prescribed to or from Galveston, Tex., or New Orleans, La., the respective ports, the shortest routes via existing connections for the interchange of carload traffic shall be used, embracing as a maximum the lines or parts of lines of not more than three line-haul carriers, lines under common ownership or control to be considered as a single line. Galveston Commercial Asso. v. G., H. & S. A. Ry. Co., 100 I. C. C. 110, 123.

(4j) Joint rates on tin plate from McKeesport, Pa., Yorkville, Ohio, and Cumberland, Md., to New London, Wis., found not unduly prejudicial but found unreasonable. Complainant did not pay or bear freight charges based on the rates herein found unreasonable on shipments fromCumberland and is not entitled to reparation, but on the shipment from McKeesport and Yorkville some of which were sold F. O. B. origin, while it mikht be said that the consignee paid an invoice price which reflected freight charges based on the Pittsburg rate, the fact that these points took the same rate as Pittsburg is but a coincidence, and the evidence falls short of proving that complainant under these contracts paid or bore as such the freight charges assessed under the particular rates herein found unreasonable. It is clear upon this record that if the joint rates herein found unreasonable had not been in effect, complainant's invoices would still have reflected the rate from Pittsburg, as was actually the case, and not the rates from these points of origin. Reparation denied. Borden Co. v. A. A. R. R. Co., 100 I. C. C. 153, 156, 157.

(4k) Upon further consideration, findings in original report, 89 I. C. C. 356, to effect that joint rates on gasoline from points in Texas and Oklahoma to destinations in California and Washington were unreasonable to extent they exceeded lower combinations contemporaneously in effect for segments of same movement, modified and changed in accordance with so-called combination rule, reversed and rates found not to have been unreasonable or otherwise unlawful. Complaint dismissed. McLeob v. T. & P. Ry. Co., 100 I. C. C. 219.

(4l) Following 78 I. C. C. 273 and 87 I. C. C. 51, rates for rail portions of hauls on wood pulp, shipped all-rail or water-and-rail route from points in Oregon and Washington to Los Angeles, Calif., found not unreasonable as compared with lower contemporaneous rates on paper. Crown Williamette Paper Co. v. Director General, 100 I. C. C. 397.

(4m) In prescribing scales of distance rates for single and joint-line hauls, commission has almost invariably required lines under a common management and control to apply the single-line rates. These decisions were based on fact that such management and control result in certain benefits in opera-

tion and on commission's opinion that single-line rates would be reasonable for application over such lines. No reason is apparent for departing from these precedents. Livestock to, from, and between Points in Southeast, 101 I. C. C. 105, 107.

(4n) Applicable through charges assessed on an isolated shipment of coal from Marissa, Ill., to Anderson, Ind., found not unreasonable following 64 I. C. C. 503, 506, and cases cited therein. No evidence was offered to show that the through charges attacked were unreasonable and the separate factors are not under attack. Moreover, rates charged compare favorably, distance considered, with those prescribed in 85 I. C. C. 446. Municipal Elec. & Water Depts. v. C., C., C. & St. L. 101 I. C. C. 618.

(4o) Complainant attacked combination commodity rates on anthracite coal, carloads from producing fields in Pennsylvania to all points in Iowa as unjust and unreasonable, unjustly discriminatory and unduly prejudicial as compared with relatively lower rates to Chicago and Peoria, Ill., St. Louis, Mo., and St. Paul, Minn. With the exception of that moving via the Erie, practically all the anthracite that moves all rail to Iowa is billed first to Chicago and is there recognized. Such coal as moved over the Erie is billed to Hammond, Ind., and distributed from that point. From the mines to the Niagara frontier about 280 miles there is a proportional rates of $2.64. Thence to Chicago $2.42, 785 miles. From Chicago the rates applicable range from $2.14 to Burlington, for 206 miles to $3.89 to Sioux City for 509 miles. To the Missouri river points the rates are based on proportional commodity rates to and from the Mississippi river. The rates from Chicago are the same on all rail business as they are on the exlake traffic. The Chicago rates generally apply also from Milwaukee, Wis., and other west bank Lake Michigan ports to Iowa points, which involve longer hauls. They move a large quantity of anthracite shipped from the lake docks, and also some that arrives over car ferry lines, on which the same through rates to Iowa apply as are in effect via Chicago. Notwithstanding the much longer hauls the rates to the Iowa points yield considerably greater ton mile revenue than does the rates to Chicago. The combination rate from the mines to Chicago is $5.06. On the average the short line distance from the mines to the upper Mississippi river cities are roughly about the same as those to St. Louis, and there is no reason, from a distance standpoint solely, for lower rates to St. Louis than to the upper river cities. The wide differences between the rates to St. Louis and those to the upper river cities are not due to differences in transportation conditions, but to the fact that the policies pursued by the lines serving the upper river cities have differed from those pursued by the lines serving the lower river cities. It seems clear that although there is no water competition at St. Louis, the rate to that point, relatively speaking, is not a reasonable maximum rate. The relatively lower rates to Chicago and St. Louis do the upper river cities no tangible harm. HELD: through rates on prepared sizes of anthracite coal from the mines to points in Iowa unjust and unreasonable to extent they exceed the amounts shown below; Where present rate is $7.20 or $7.33, reduce to $6.81; $8.22 reduce to $7.40; $8.34 reduce to $7.66; $8.46 reduce to $7.86; $8.58 reduce to $8.06; $8.71 reduce to $8.26; $8.83 reduce to $8.38; $8.95 reduce to $8.50; on traffic destined to points intermediate between the river and the present $8.22 group the carriers will be expected to grade the rate of $7.40 back to merge into the rate of $6.81 prescribed for the river points. Iowa Railroad Commissioners v. C. R. R. Co., of N. J. 109 I. C. C. 27.

(4p) Complainant is entitled to reasonable through rates, and, while comparisons shown indicate that the separate components of the through rates charged are not greatly out of line for individual consideration, the Commission must consider the measure of the through rates for the through hauls from the mines to destinations in Iowa. Iowa Railroad Commissioners v. C. R. R. Co. of N. J. 109 I. C. C. 273, 283.

(4q) Complainant attacked rates and charges collected on 7 cars of wheat shipped from Eaton, Ossian and Helmer, Ind., to Jonesville, Mich., there milled and reshipped to Three Rivers, Kalamazoo and Hopkins, Mich., as unreasonable and unlawful. Shipment from Ossian moved over N. Y. C. & St. L., to Fort Wayne, Ind., thence N. Y. C. Shipments from Helmer moved Wabash to Butler, Ind., thence N. Y. C. From Fort Wayne and Butler the shipments moved north over the Fort Wayne-

Jackson branch of the N. Y. C., through Waterloo, Ind to Jonesville. At Jonesville the shipments were milled and the product reshipped, moving west over the N. Y. C., old road division to White Pigeon, Mich., and thence north over its Grand Rapids branch to destinations. The N. Y. C. main line, called the air line extends from Waterloo west to Elkhart from which point the Grand Rapids branch extends north through White Pigeon to the destinations named. The distance via Jonesville exceeds that via Elkhart by 26.4 miles. The published out of route charge for this distance is 3.5c. Charged joint through rates points of origin of the wheat to destination of the product plus 0.5c the transit charge, plus an improper out of route charge of 2.5c on the shipment from Ossian and the published out of route charge of 3.5c on the shipments from Helmer. The tariffs publishing the joint through rates from the points of origin to destinations with provisions for milling in transit at Jonesville carry no restrictions as to routing. HELD, out of route charges not legally applicable, reparation awarded, complaint dismissed Jonesville Milling Co. v. N. Y. C. R. R. 109 I. C. C. 601.

(4r) In 80 I. C. C. 185 the Commission found that rates on compoboard in carloads from Minneapolis, Minn., to various points in United States as not unreasonable but unduly prejudicial to extent they exceeded rates on other wall boards. Since March 15, 1922 commodity rates applicable alike on compoboard and wall board and lower than class B. rates have been provided from Minneapolis to all points in western trunk line territory, including Milwaukee and Chicago. The fourth section departures were brought about because the combinations on Milwaukee or Chicago to eastern territory were lower than the through fifth class rates but they were removed on or about August 27, 1923 when the joint commodity rates on wallboard from Minneapolis to all points in central territory established on Dec. 26, 1921 were made applicable on compoboard. HELD, rates attacked to points in central territory unreasonable to extent they exceeded aggregate of intermediates, reparation awarded. Green Lumber Co. v. A. A. R. R. 109 I. C. C. 710.

(4s) Complainant attacked joint through rates on sand and gravel, carloads, from Lafayette, Ind., to points in Illinois as unreasonable; unduly prejudicial as compared with the rates from Attica, Ind; and that failure of defendant Wabash to absorb the switching charge of the Nickel Plate for its haul from complainants plant to its connection with the Wabash to Lafayette Junction, all within the switching limits of Lafayette on sand and gravel destined to points in Illinois while contemporaneously absorbing such charge on other commodities to the same destinations, and on sand and gravel to points in Indiana, subjected complainant and its interstate traffic to the payment of unreasonable rates and to undue prejudice. Lafayette is 21 miles east of Attica and about 30 miles from the Illinois-Indiana border. Complainants plant is on the Nickle Plate about 2 miles from its connection with the Wabash. Joint sixth class rates now apply on sand and gravel from Lafayette to points on the B. & O., between Springfield and Altamont; points on the I. C., to and including Paxton, Leroy, Mattoon, Decator and Vandalia; and to most of the Kankakee & Urbana and Illinois Traction stations. The establishment of joint commodity rates is asked to these points. Joint commodity rates are now maintained from Attica to certain of these stations. Sand, Gravel and crushed stone are among the lowest graded commodities known to commerce. They can usually be obtained at nearby points, and do not and can not move great distances. The freight rates, therefore, have an important bearing on securing and developing the markets. The complainant has been satisfied by the adjustment of Jan. 1, 1926 in so far as the measure of the present commodity rates from Lafayette is concerned. HELD, joint sixth class rates unreasonable to extent they exceeded subsequently established rates, and rates from Lafayette unduly prejudicial to extent they exceed the rates from Attica by more than 10c per ton. Western Indiana Gravel Co. v. N. Y. C. & St. L. Ry. 109 I. C. C. 727.

(4t) Complainant attacked commodity combination charged of 45c on a car of bulk corn shipped May 8, 1923 from Jefferson, S. D., to Fowler, Colo., as illegal, unjust, unreasonable and in violation of the fourth section to extent it exceeded 33c. Shipment moved from Jefferson over C. M. & St. P., to Council Bluffs, Ia., U. P., to Denver, Colo., thence Santa Fe, charged 33c to Pueblo and 12c beyond. There was contempor-

aneously in effect a rate of 33c from the same point of origin to Trinidad, Colo., a point on the Santa Fe 110 miles south of Fowler and to which Fowler is intermediate. Fowler was named in the tariff, but it was not named in the item which carried the rates on bulk corn from Jefferson to Colorado points. As under the wording of the intermediate provision, rates apply to intermediate points only when they are not named in the tariff, the rate published to Trinidad was not applicable to Fowler. Effective August 15, 1923 defendants provided for application of Trinidad rate to Fowler. HELD, rate attacked unreasonable to extent it exceeded 33c, reparation awarded. Summit Grain Co. v. C. M. & St. P. Ry. 109 I. C. C. 763.

(4u) Complainant attacked joint commodity rates on 48 cars of cannel coal, shipped between May 4, 1915 and April 27, 1917 from Cannel City, Ky., to New York and New Jersey destinations as unreasonable. Charged $4.50 to Tuckahoe and $4.10 to the other destinations, except Harrison. To the latter point a charge in addition to the $4.10 was made by the delivering line for the movement beyond New York, but the propriety of that charge is not in issue. Prior to the movement of these cars complainant had negotiated with the N. Y. C., for reductions in the rates. Subsequently the rates were reduced to $3.67 to New York and $3.90 to Tuckahoe. HELD, rates attacked not unreasonable, complaint dismissed. Leach v. C. N. O. & T. P. Ry., 112 I. C. C. 38.

(4v) Complainant attacked commodity rate charged on wrapping paper, carloads, shipped since June 28, 1922 from Orange, Tex., to Wichita, Kans., as unreasonable to extent it exceeded rate to Kansas City, Mo. Short line distance from Orange to Wichita is 714 miles and to Kansas City 763 miles, 48.5c rate to Wichita earning over the short route 13.6 mills per ton mile and over route of movement 10.4 mills. The 43c rate to Kansas City earns 11.3 mills over short route Wichita is in Kansas City territory on traffic generally from Texas common points. The 66c rate from Orange to Hutchinson was prescribed in 95 I. C. C. 457. HELD, rates attacked unreasonable to extent they exceeded 66c prior to July 30, 1923, rate on and after that date not unreasonable, reparation awarded. Wichita Chamber of Commerce v. A. T. & S. F. Ry. 112 I. C. C. 67.

(4w) Complainant attacked commodity rates on coke, in car loads, from St. Louis to Colorado, Iowa, Kansas, Missouri and Nebraska as unreasonable and as compared with rates from Birmingham, Ala., and Chicago, Ill., unduly prejudicial. The Missouri river cities from Kansas City to Omaha are grouped with respect to the rates on coke from St. Louis, Chicago and Milwaukee. This is the usual western trunk line adjustment. From Memphis and southeastern points, the Missouri river cities are in two groups with respect to the rates on coke, one group from Kansas City to St. Joseph, Mo., usually designated as the lower Mississippi river points, and the other group consisting of Nebraska City and Omaha, Neb., the upper Missouri river points. Memphis is the natural gateway from the southeast to the Missouri river and the general adjustment of rates from the southeast to western trunk line territory is the combination of rates to and from Memphis. This basis has been departed from in the rates on coke from Birmingham. Coke is rated class D in western classification. Distance from Birmingham to Kansas City is 260 per cent of the distance from St. Louis to Kansas City and the rate on coke from Birmingham is only 142 per cent of the rate from St. Louis. The rate on pig iron from Birmingham to Kansas City is 245 per cent of the rate on pig iron from St. Louis to Kansas City, and the rate on cast iron pipe from Birmingham to Kansas City is 185 per cent of the rate from St. Louis to Kansas City. At the present time, the rates on coke from both St. Louis and Chicago are grouped with respect to destinations on the Missouri river and complainant does not desire to have this grouping disturbed. The short line distance from St. Louis to Kansas City is 278 miles and to Omaha from St. Louis 413 miles. Average distance from St. Louis to the principal Missouri river cities is 340 miles. The present rates on coke, carloads, from St. Louis to the Missouri river cities are unreasonable, high and, as compared with the rates from Chicago and Birmingham to the same destinations, unduly prejudicial. The evidence clearly shows that St. Louis is at a disadvantage in competition with Chicago and Birmingham at the Missouri river cities and that such disadvantage can be removed by the publication of rates from Chicago to the Missouri river cities 72c higher than from St. Louis, and rates from

Birmingham to the lower Missouri river cities, $2.04 higher, and to upper cities $2.64 higher than rates from St. Louis. HELD, rates on coke, carloads from St. Louis, Mo., to the Missouri river cities unreasonable to extent they exceed $3.25 to Missouri River cities and Missouri points and $3.49 to southwest Missouri and southeast Kansas points. HELD, further rates on coke from St. Louis to Missouri river cities southwest Missouri and southeast Kansas unduly prejudicial to St. Louis to extent difference in rates from St. Louis and Chicago is less than 72c and Birmingham and St. Louis $2.04 to lower cities and $2.64 to upper cities. Warren Coke Co. v. A. T. & S. F. Ry. 112 I. C. C. 71.

(4x) Complainant attacked commodity rates on sand, carloads from Michigan City, Ind., to Chicago and points in the Chicago district as higher than the rates from Millers, Gary, Liverpool, Willow Creek, Aetna, and Dune Park, Ind., to said destinations; that to other destinations, particularly those east and south of said point of origin, the rates from Michigan are the same as the rates from the other Indiana points mentioned, and that rates charged are unreasonable and unduly prejudicial. Michigan City is on the M. C., P. M., C. L. S. & S. B., N. Y. C. & St. L., and C. I. & L. The three first mentioned roads constitute the direct routes to Chicago. The distances to Chicago are, from Michigan City 56 miles, Willow Creek 38 miles, Dune Park 36 miles, Aetna, 33 miles, Millers 30 miles, Liverpool 30 miles and Gary 27 miles. The rate from all these points to Chicago proper for delivery on the originating line is 63c, but to stations within the Chicago switching district on practically all connecting lines the rate is 88c from Michigan City and 84c from the other points. The difference of 4c in the rate from Michigan City over the rate from other points was the result of a reduction made during 1922 in the rates from points other than Michigan City, and by lines other than those having the direct routes from Michigan City to Chicago. In so far as the allegation of undue prejudice is concerned, it should be noted that the differential between Michigan City and the alleged preferred points is less than that prescribed between the inner and outer zones, that the class rates from Michigan City have been found to be properly included in the higher 52 mile scale, where as the alleged preferred points are in the lower 35 mile scale. HELD, rate attacked not unreasonable, unduly prejudicial or otherwise unlawful, complaint dismissed. Bos Sand Co. v. A. T. & S. F. Ry., 112 I. C. C. 121.

(4y) Complainant attacked commodity rates charged on soft coal, carloads, from Illinois mines to Kansas City and St. Joseph, Mo., Atchison and Leavenworth, Kas., as unjust and unreasonable and as compared with the rates from mines of its competitors on the Alton and Wabash in the Springfield district, as unduly prejudicial. The great majority of complainants mines are in the Belleville district, several being in the southern part of the Springfield district, immediately north of the Belleville district. All are in the socalled inner group, the mines in which take the same rates to the St. Louis East St. Louis district. Rates are $2.98 and $2.92 on lump and fine coal, respectively. The rates to Leavenworth, Atchison and St. Joseph from these Alton and Wabash mines are 40c higher than those to Kansas City. Withdrawal of the Alton and its receivers as defendants was equivalent to withdrawal of the allegation of undue preference of mines on that road. The subsequent intervention of the Alton did not operate to revive this allegation. The only remaining issue of undue prejudice and preference was in connection with the Springfield district rates of the Wabash. It is clear that the Wabash is not responsible for, and can not by its own act, remove any of the undue prejudice from which complainants members may suffer because of the lower rates from the Springfield district. The Alton is responsible for the latter rates and the Wabash has only met the competition of that road. If the Wabash increased its Springfield rates to the Belleville basis, the lower rates of the Alton, not a defendant, would remain. The Wabash does not reach mines in the Belleville district but participates with its eastern connections in rates therefrom. It could not, without the consent of its connections, reduce those rates. Undue prejudice does not exist. The evidence in this proceeding does not warrant the conclusion that it would be proper to apply as maximum reasonable rates from the Belleville district to Kansas the rates now maintained by the Alton and Wabash from mines

in the Springfield district. HELD, rates attacked not unreasonable or unduly prejudicial, complaint dismissed. Fifth & Ninth Districts v. C. R. I. & P. Ry. 112 I. C. C. 139.

(4z) . Complainant attacked commodity rate of 25.5c charged on 33 cars of copperas from Farrell to Easton, Pa., interstate, between Jan. 9 and March 28, 1923 as unreasonable and unduly prejudicial. Copperas is a low grade commodity and contains from 40 to 50 per cent water. It is not susceptible to damage in transit, rated sixth class. Shipments moved N. Y. C., to Seneca, N. Y., and L. V., beyond 564 miles, A rate of 21.5c was in effect from Newcastle, Pa., to Easton, and applicable under an intermediate clause from Farrell on shipments moving over Erie and L. V., was established from and to the points considered over route of movement on Feb. 1, 1924. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Williams & Co. v. L. V. R. R. 112 I. C. C. 171.

(5a) Complainant attacked fifth class rates charged on fish and whale oil, carloads, from various points of origin to Port Ivory, Staten Island, N. Y., as unjust and unreasonable and in violation of the fourth section. Complainant attacked fifth class rates on fish oil, in tank cars and in wooden barrels and iron drums between August 1922 and June 1924 from various points of origin to Bayway and from Bayway to Philadelphia and Marcus Hook, Pa. The movement of fish oil is seasonal and occurs almost wholly during the period of production. Generally speaking, rates and ratings on crude and refined oils are the same. It is testified that refined oil is about 10c per gallon higher in value than the crude. There is little doubt that the entire adjustment on vegetable and fish oils within trunk line territory and between trunk line and central territories has been directly or indirectly affected by competition from the Pacific coast. It is also true that the effect or even the existence of this competition has been overestimated or mistakenly considered in many instances, resulting in the grouping of various oils as to which no competition existed with others highly comparative with the Pacific coast products. HELD, rates attacked not unreasonable from Ivorydale to Port Ivory, not unreasonable in the past but for future unreasonable to extent they exceeded certain specific rates from and to specific points, reparation denied. Procter & Gamble Mfg. Co. v. B. & O. R. R. 112 I. C. C. 177.

(5b) Complainant attacked class rates charged on a car of strawberries shipped June 5, 1922 from Stevensville, Mich., to Duluth, Minn., as unjust and unreasonable in violation of section 1 and section four. Shipment moved P. M. & to Indiana Harbor, Ind., thence I. H. B., and C. & N. W., C. St. P. & O., distance 559.2 miles, charged first class rate of $1.425 which was higher than combination of $1.175 made up of 56.6c to Chicago plus proportional rate of 61c beyond. HELD, rate attacked unreasonable to extent it exceeded $1.175, reparation awarded. Stacy Merrill Fruit Co. v. P. M. Ry., 112 I. C. C. 189.

(5c) Complainant attacked fourth class rates charged on cars of fresh tomatoes to Pittsburgh, Pa., from Silver Creek district in New York for average distance of 236 miles as unreasonable. Previous report 91 I. C. C. 358. Stock cars have been found to be preferable to refrigerator cars for the length of haul here considered, on account of the ventilation afforded. The cars must be assembled, thoroughly cleaned, and devoted entirely to the tomato traffic during the season of movement. The number of tomatoes which can be shipped on any particular day depends entirely on weather conditions and the cars must be held in readiness. Special train service is given. The fourth class rate from Silver Creek to Pittsburgh of 38c yields revenue of $106.40 per car, 32.2 mills per ton mile and 45c per car mile, using the average loading of 28,000 pounds. This revenue does not appear to be unduly high, considering the highly perishable nature of the commodity and the special transportation service required. Ripe tomatoes for canning purposes generally move to factories for distances not exceeding 50 miles. Commodity rates established for these short hauls are made with reference to truck competition. No such competition is possible with the traffic in question. HELD, rates attacked not unreasonable, complaint dismissed. Heinz Co. v. Director General 112 I. C. C. 206.

(5d) Complainant attacked fifth class rate of 72c charged on three cars of mine cars shipped during Feb. 1925 from Chattanooga, Tenn., to Carbon Hill,

Ala., as unjust and unreasonable to extent it exceeded a rate of 45c. Carbon Hill is local on the Frisco, 61 miles west of Birmingham. The cars can conveniently be loaded in coal cars. Shipments moved T. A. & G., to Gadsden, Ala., L. & N., to Birmingham and Frisco to destination, 223 miles. Prior to shipment the question of reduced rates was the subject of correspondence resulting in a proposal to publish a rate of 45c but Frisco refused to join in the rate. Over certain routes a rate of 43c is applicable in connection with the local rate of Frisco from Jasper, 19 miles less distance than Carbon Hill. Defendants offered no evidence in support of the rate attacked, and admit that rates to points in the immediate vicinity of Carbon Hill are substantially lower than rates to that point. HELD, rate attacked unreasonable to extent it exceeded 45c, reparation awarded. Gustafson Mfg. Co. v. St. L. S. F. Ry. 112 I. C. C. 277.

(5e) U. P., and D. & R. G. W., and their southwestern connections propose to revise their rates on grain and grain products, in carloads, from Utah and southern Idaho to Texas, Louisiana, Arkansas, Mississippi and Alabama and to cancel the application of such rates over routes through Texas. The present rates from quite a number of points in southern Idaho to the destination territory are lower than the rates from Utah common points and are applicable through Utah common points. Respondent proposes to revise their rates from Utah to the same basis as the rates from southern Idaho. A rate of 74.5c applies from numerous points in western Utah, Nevada and California to the destination territory, but no change is proposed in it. Increasing the rate to New Orleans from Utah common points and continuing the present lower rates from the more distant points will increase the discrimination under the fourth section at points of origin. HELD, schedules not justified. Grain and grain products from western points 112 I. C. C. 283.

(5f) In 109 I. C. C. 46, the Commission found the through fifth class rates charged on iron and steel articles, carloads from Buffalo N. Y., to Cleveland, Elyria and Lorain, O., unreasonable to extent they exceeded 23c, reparation awarded. Similar findings are requested for shipments moving prior to July 1, 1922 which through error the original findings did not cover. HELD, rates attacked prior to July 1, 1922 unreasonable to extent they exceeded 25c, reparation awarded. Columbia Steel Co. v. B. & O. R. R. 112 I. C. C. 287.

(5g) Complainant attacked joint commodity rate of 48.5c charged on a car of refined sulphur shipped Feb. 29, 1923 from Freeport, Tex., to Carl Junction, Mo., as unreasonable and unduly prejudicial. Shipment moved over H. & B. V., I. G. N., and Frisco. Rate contemporaneously applicable was 46c from Sulphur Mines, La., which is generally grouped with and takes the same rates as Freeport, this rate being established from Freeport Aug. 26, 1923. The rate from Freeport to Pittsburgh, Kas., a more distant point over the route of movement was 46c subject to rule 77. HELD, rate attacked unreasonable to extent it exceeded 46c, reparation awarded. Stauffer Chemical Co. v. H. & B. V. Ry. 112 I. C. C. 311.

(5h) Complainant attacked commodity rates charged on potatoes, carloads from Pocomoke, Md., and Virginia to Jacksonville, Fla., in July and August 1922 and 1923 and July, August and Sept. 1924, as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. Shipments originated in what is known as the eastern shore of Virginia. Cape Charles is 12 miles from the southernmost point of the peninsula and Pocomoke City 64 miles north of Cape Charles. All of the other points are between Cape Charles and Pocomoke City, with the exception of Capeville, Va., which is on a branch line of the Pennsylvania extending in a southerly direction from a point on its main line 1.5 miles north of Cape Charles and is 7.4 miles from the latter point. The transportation of all the shipments involved a 36 mile float service from Cape Charles to Norfolk across Chesapeake Bay and Hampton Roads. Pennsylvania is the only line serving the territory. Distance to Jacksonville 725 miles, charged 72c from Pocomoke City, plus 4.5c per package from Capeville and 66.5c from the remaining points. Applicable rate combination to and from Cape Charles. At time of movement there was a rate of 65c from Wilson, N. Y., 1,360 miles, 63c from New York, and Philadelphia, 1,004 and 912 miles, 60c from Baltimore, 796 miles, 52.5c from Washington 756 miles and 45c from Norfolk, 657 miles. On March 18, 1925 carriers

reduced the rate from all points except Capeville to Jacksonville to 63c. HELD, rates attacked unreasonable to extent they exceeded 63c from all points except Capeville, the latter 4.5c over, reparation awarded. Hulsey Bessent Co. v. P. R. R. 112 I. C. C. 317.

(5i) Complainant attacked commodity rates charged on five cars of newsprint paper and printing paper shipped between Dec. 28, 1921 and May 23, 1922 from Port Edwards, Wis., and Wisconsin Rapids, Wis., to Dallas, Tex., as unreasonable. Charged $1.17. In 66 I. C. C. 571 the Commission found this rate to be unreasonable to extent it exceeded 82c on newsprint paper and 90c on printing paper. HELD, rate attacked unreasonable to extent it exceeded 82c on newsprint paper and 90c on printing paper, reparation awarded. Palmer & Co. v. C. G. W. Ry., 112 I. C. C. 323.

ALL OTHER CITATIONS

Utah Gilsonite Co. v. A. T. & S. F. Ry. Co., 85 I. C. C. 557; Beaver Sand Co. v. Director General, as Agent, 88 I. C. C. 115.

§13a. Burden of Proof.

See Evidence I.

(a) It is the measure of the rate attacked for the through service which must be considered. California Packing Corp. v. Director General, 96 I. C. C. 239, 242.

(b) Through rates, no matter how constructed, must in all cases be reasonable and where increases are proposed the burden is upon carriers to justify the resultant increased rates. Butter, Eggs, Dairy Products, and Poultry, 96 I. C. C. 19, 29, 30.

(c) Applicable combination rate assessed on cull apples shipped from Lewiston, Idaho, to San Franciso, Calif., during Federal control, found not unreasonable because the factor, Lewiston to Portland, Oreg., over route of movement exceeded corresponding factor over a different route. Upon contention by defendant that a combination rate must be considered in its entirety, HELD: It is the measure of the rate assessed for the through service which must be considered. California Packing Corp. v. Director General, 96 I. C. C. 239.

(d) It is not the separate factors in a through rate but the rate or charge as a whole to which the test of reasonableness must be applied. Iowa Railroad Commissioners v. C. R. R. of N. J. 109 I. C. C. 273, 284.

§13½. Factor of the rate.

See Claims §1 (a); Class Rates §2; Local Rates and Combinations (gg); Proportional Rates.

(a) The Commission has recognized the principle that ordinarily the rate charged as one factor of a combination on a through movement might well be less than the corresponding local rate covering the same haul. Salt cases of 1923, 92 I. C. C. 388, 437.

(b) Except that where one or both of the factors are depressed by special conditions, full combinations of locals on traffic moving in considerable volume results in unreasonable rates. Proctor & Gamble Distributing Co. v. St. L. S. F. Ry., 101 I. C. C. 563, 581.

(c) Rates on pulp wood from points in Idaho to Millwood, Wash., found unreasonable to extent that factor to Spokane exceeded by more than $4 the Northern Pacific's charge for the switching movement at Spokane, the corresponding factor subsequently established in conformity with distance scale found reasonable in Wood Rates between North Pacific Coast Points, 61 I. C. C. 159. Reparation awarded. Inland Paper Co. v. C., M. & St. P., 92 I. C. C. 29.

(d) Through rates on caustic soda from Painesville, Ohio, and Detroit, Midland, and Wyandotte, Mich., to Ardmore, S. Dak., found unreasonable to extent that commodity-rate factor from Chicago and Manitowoc to Ardmore exceeded like rates from Chicago to various points in Nebraska and Colorado for similar distances. Reasonable maximum rates prescribed and reparation awarded. Refinite Co. v. C. & N. W., 92 I. C. C. 266.

(e) Even though one factor of a combination rate appears unreasonable no reparation will be awarded by the commission if the through charges paid are not unreasonable. Standard Potash Co. v. Director General, 92 I. C. C. 337, 338.

(fg) Rates on acid phosphate from Nashville to Seymour, Ind., found unreasonable due to factor Louisville to Seymour. Complainant instanced lower rates from Nashville to New Albany and Jeffersonville, Ind., competing points,

and between other points for comparable distances. Reasonable rate prescribed and reparation awarded. Buhner Fertilizer Co. v. B. & O., 92 I. C. C. 756.

(h) Rates on zinc ore from points in Oklahoma on Miami Mineral Belt and Northeast Oklahoma railroads, and from trunk-line and junction producing points in Missouri, Kansas, and Oklahoma, to South Fort Smith found not unreasonable but unduly prejudicial in favor of competitors operating zinc-smelting plants at Collinsville, East St. Louis, La Salle, Peoria, and Chicago, Ill., and Grasselli, Ind., to extent that factors of above-named carriers exceeded by more than 0.5 cent, the contemporaneous factors on like traffic to the preferred plants. Nonprejudicial basis of rates prescribed. Athletic Mining & Smelting Co. v. K. C. S., 93 I. C. C. 119.

(i) Rate on wrapping paper from International Falls, Minn., to Chicago found unreasonable to extent that factor up to Duluth exceeded rate prescribed in Minnesota & Ontario Paper Co., 66 I. C. C. 571, from Fox River group to Chicago. Reparation awarded. Seaman Paper Co. v. Director General, 93 I. C. C. 139.

(j) Combination rates on lumber, box shooks, and articles taking lumber rates, from Williams, Flagstaff, and Holbrook, Ariz., to Nogales, Ariz., destined to points in Mexico, found not unreasonable or otherwise unlawful as compared with joint rates from California points to same destinations. The excessive charges complained of accrued solely in the local rate component of the connecting line in Mexico, which is operated as a separate road, is not a party defendant, and is not subject to the commissions jurisdiction. Arizona Lumber & Timber Co. v. A. E. R. R. Co., 96 I. C. C. 203.

(k) Third-class rates applicable on soapstone disks, loose, from Schuyler and Tye River, Va., to Toledo, Ohio, and Muncie, Ind., found unreasonble to extent components beyond Esmont, Va., exceeded fifth class. Maximum reasonable rates prescribed for future and reparation awarded. Toledo Cooker Co. v. N. & A., Ry., 93 I. C. C. 271.

(l) Combination rates on tripoli, in carloads, from Seneca, Mo., to destinations in central, trunk-line and Canadian territories found unduly prejudicial to the extent the factors beyond St. Louis exceed amounts having the same relationship to the sixth-class rates, which rates on silica from Tamms, Ill., bear to the corresponding sixth-class rates. St. Louis Traffic Bureau v. A., T. & S. F., 96 I. C. C. 421.

(m) Combination rates charged on wheat shipped during Federal control from various points in Colorado to Antonito, Colo., there milled, and the flour reshipped via Memphis to Nashville, Tenn., found not unreasonable, as compared with lower joint rates, with milling in transit privileges, subsequently established from Durango, Colo., and other intermediate points of origin to Memphis and lower joint rates contemporaneously in effect from Utah common points, with like privileges, to Cairo and Memphis, Tenn., except to extent that the aggregate of the factors assessed from Antonio to Nashville exceeded a rate herein prescribed as reasonable. Reparation awarded. Conejos Cooperative Mills & Mfg. Co. v. Director General, 98 I. C. C. 515.

(ma) Mere fact that through rates are same as combination of local factors to and from intermediate points does not constitute proof of unreasonableness in absence of a showing that neither factor is depressed below what would normally be a reasonable basis. Caruso & Co. v. C. & E. I., 102 I. C. C. 619, 621.

(mb) The components of inbound and outbound rates on two different commodities should not afford a criterion of the propriety of rates on one of them. New Orleans Joint Traffic Bureau v. B., S. L. & W., 102 I. C. C. 686, 691.

(n) It is elementary that the total charge under a through rate made on a combination basis may or may not be unreasonable because one of the factors is unreasonable. Wortham Carter Publishing Co. v. Director General, 102 I. C. C. 729, 738.

(o) Under ordinary conditions the practice of making through rates by adding to a rate for a long distance the local rate from the basing point to a destination, a relatively short distance beyond, can not be approved. Jewell Co. v. A. T. & S. F. Ry., 104 I. C. C. 380, 384.

(p) Rates on certain iron and steel articles from various points in Ohio, Kentucky, Indiana, Alabama, Illinois, Pennsylvania, New York, and Missouri to Dallas, Fort Worth, and Harrys, Tex., found unreasonable to extent that the factors from St. Louis, Mo., and points

taking the same rates exceeded, prior to the effective date of the general reductions in rates, a certain amount and from and including that date to extent they exceeded rates for similar distances as prescribed in Memphis-Southwestern Investigation, 77 I. C. C. 473. The rates from the other points of origin were and are unreasonable to extent they exceeded or may exceed the rates herein prescribed from St. Louis, plus the established differentials. Bases for award of reparation and reasonable rates for the future prescribed. Atlas Metal Works v. A., C. & Y. Ry. Co., 100 I. C. C. 173.

(q) Rates on China-wood oil from Pacific coast points to Cleveland, Ohio, found not unreasonable or in violation of the aggregate-of-intermediates clause of section 4 of the act. Applicable import tariff provided for alternative application of domestic tariff if lower, and domestic tariff, in turn, provided for aggregate-of-intermediates rates whereever found lower than joint rates. Under these double alternatives no fourth-section violation existed, but lower combinations applied on two of the shipments involved, resulting in overcharges. Refund of such overcharges directed and complaint dismissed. Glidden Co. v. E. R. R. Co., 100 I. C. C. 331.

(r) Contention that basing rates to and from Jacksonville, Fla., on traffic to Florida are, in effect, through rates which must be considered in their entirety, and that, so considered, reduction in the rate north of Jacksonville, coupled with proposed increase in rates south of that point, results in no change in the through rates, not sustained, only the rates south of Jacksonville being in issue. Commission is continually dealing with proportional rates without reference to other factors used in constructing through rates. Basing Rates on Paving Brick, 100 I. C. C. 390, 392.

(s) Following 78 I. C. C. 273 and 87 I. C. C. 51, rates for rail portions of hauls on wood pulp, shipped all-rail or water-and-rail from Camas, Wash., and West Linn and Lebanon, Oreg. to Floriston, Calif., found unreasonable to extent factors beyond San Francisco or Oakland, Calif., exceeded contemporaneous rates on like traffic from San Francisco or Oakland to Los Angeles, Calif. Reparation awarded. Crown Williamette Paper Co. v. Director General, 100 I. C. C. 397.

(t) Following 78 I. C. C. 273 and 87 I. C. C. 51, rates for rail portions of hauls on wood pulp, shipped all-rail or water-and-rail from Camas, Wash., and West Linn and Lebanon, Oreg., to Floriston, Calif., found unreasonable to extent factors beyond San Francisco or Oakland, Calif., exceed contemporaneous rates on like traffic from San Francisco or Oakland to Los Angeles, Calif. Reparation awarded. Crown Williamette Paper Co. v. Director General, 100 I. C. C. 397, 400.

(u) Rates on peanuts from points in Alabama, Florida, Georgia, South Carolina, and Tennessee to Chicago, Ill., Milwaukee, Wis., Canton and Cleveland, Ohio, South Bend, Ind., and Dubuque, Iowa, found unjust and unreasonable to extent that factors thereof north of Ohio River exceed those specified herein, which are prescribed as reasonable for future. United Fig & Date Co. v. A. C. L., 101 I. C. C. 138.

(v) Combination rates on cottonseed hull shavings from Hermitage, Tenn., to Peoria, Ill., consisting of class A rates to Ohio River crossings and commodity rates beyond, found unreasonable to extent the factor to the river crossing exceeded 15.5 cents prior to July 1, 1922, and 14 cents thereafter. Reparation awarded to that basis and reasonable rates prescribed for future. Barrett Co. v. N., C. & St. L. 101 I. C. C. 279.

(w) Applicable through charges assessed on an isolated shipment of coal from Marissa, Ill., to Anderson, Ind., found not unreasonable following 64 I. C. C. 503, 506, and cases cited therein. No evidence was offered to show that the through charges attacked were unreasonable and the separate factors are not under attack. Moreover, rates charged compare favorably, distance considered, with those prescribed in 85 I. C. C. 446. Municipal Elec. & Water Depts. v. C., C., C. & St. L., 101 I. C. C. 618.

(x) Complainant attacked charges to be collected on 25 cars of anthracite coal from Pennsylvania to Minneapolis, Minn., from June 11 to Sept. 19, 1921 as illegal, unjust and unreasonable. The real issue is with respect to the unreasonableness of certain additional charges due under the applicable tariffs which the Soo Line sought to recover by court action. Shipments moved to Suspension Bridge, N. Y., thence M. C., and A. A., to Manitowoc, Wis., and Soo beyond,

charged combination on Suspension Bridge. The rates charged for the movement to Suspension Bridge are not attacked. Charges beyond that point were based on joint rates of $4.865 prior to June 25, 1921 and $4.87 thereafter for which there was no tariff authority the rate applicable being combination of $5.44 based on Manitowoc. The joint rates were applicable via other routes and defendants offered no evidence in support of the reasonableness of the rates attacked. HELD, rates attacked unreasonable to extent the factor from Suspension Bridge exceeded $4.865 prior to June 25, 1921 and $4.87 on and after that date, undercharges waived, complaint dismissed. Elliott Fuel Co. v. M. St. P. S. S. M. Ry. 109 I. C. C. 385.

Co., 85 I. C. C. 644; Northwestern Clay Mfg. Co., v. R. I. S. Ry., 88 I. C. C. 131; Cleveland Provision Co. v. A. G. S. R. R. Co., 88 I. C. C. 161; International Harvester Co. v. N. Y. C. R. R. Co., 88 I. C. C. 368; Barrett Co. v. Director General, as Agent, 88 I. C. C. 535; Coal to Minnesota Points, 88 I. C. C. 631.

§14. Divisions.

See Absorption of Charges §5 (c); Divisions §4; Evidence §13 (2).

(a) Findings in original reports, 53 I. C. C. 656 and 58 I. C. C. 450, that divisions of joint rates on lumber and forest products accruing to tap lines under orders in The Tap Line case, 31 I. C. C. 490, must be measured by distance to the junction with the trunk line over the direct route of movement toward final destination, rather than by out of line movements involving wasteful transportation, affirmed. Wasteful Service by Tap Lines, 89 I. C. C. 327.

(b) Divisions of joint rates on bituminous coal and joint class rates accorded the Federal Valley R. R. Co., found unjust, unreasonable, and inequitable and just, reasonable, and equitable divisions for future prescribed. The road has been efficiently operated, is important to the public at large, territory served is dependent upon it for transportation, and it was shown that in the past it has failed to earn enough to cover operating expenses, taxes and fair return upon value. Ohio Farm Bureau Federation v. A. & W. Ry Co., 89 I. C. C. 489.

§15. Exceeding combination of intermediates.

See Evidence §13 (2), §13 (3), §13 (5); Local Rates and Combinations; Long and Short Hauls §6¾.

(a) Rate on cottonseed hulls from Greenville, Mass., to Marietta, Ga., exceeded the aggregate of intermediate rates to and from Atlanta, Ga. Reparation awarded. Pinson Brokerage Co. v. C. & G. R. R. Co., 89 I. C. C. 125.

(b) Through rate on scrap iron from South Range, Mich., to Duluth, Minn.; exceeded the aggregate of intermediate rates to and from Houghton, Mich. Reparation awarded. West End Scrap Iron & Metal Co. v. Director General, as Agent, 89 I. C. C. 149.

(c) Rate on gasoline and petroleum from North Baton Rouge, La., to Pikeville, Tenn., exceeded the aggregate of intermediates to and beyond Chattanooga, Tenn. Reparation awarded. Standard Oil Co. of Louisiana v. Y. & M. V. R. R. Co., 89 I. C. C. 157.

(d) There is no violation of the aggregate of intermediates clause of section 4 of the act unless carrier maintains a specific through rate which is higher than the lowest aggregate of intermediate rates over the same route. The product of intermediate rates treated by a rule which results in something less than the aggregate is not the aggregate within the meaning of this section. McLeod v. T. & P. Ry. Co., 89 I. C. C. 356, 357.

(e) Upon further argument, rates on iron and steel articles from Pittsburgh, Pa., and other points in western Pennsylvania to Cleveland, Lorain, Canton, and Akron, Ohio, found unreasonable to extent they exceeded the aggregate of intermediate rates contemporaneously in effect. Reasonable rates prescribed for future to Cleveland, Lorain, and Canton, and reparation awarded. Prior reports, 77 I. C. C. 439 and 78 I. C. C. 724. American Shipbuilding Co. v. Director General, as Agent, 89 I. C. C. 601.

(f) Long ago the Commission found that the fair measure of the reasonable-

ness of a joint through rate which exceeds the aggregate of the intermediate rates over the same route will be held to be the lowest combination that would apply if the joint through rate were canceled. Mason By Products Co. v. Director General, 92 I. C. C. 646, 649.

(g) Rates on petroleum and products from Lawrenceville, Ill., to Bristol, Va., Tenn., exceeded the aggregate of intermediate rates contemporaneously in effect. Reparation awarded. Indian Refining Co. v. Director General, as Agent, 89 I. C. C. 657.

(h) Rates higher than the aggregate of intermediate rates are prima facie unreasonable. Midland Coal Company v. St. L. S. F. Ry., 92 I. C. C. 283, 284.

(i) Rates which exceed the aggregate of intermediate rates are prima facie unreasonable. Mason By Products Company v. Director General, 92 I. C. C. 646, 648.

(j) A joint rate which exceeds the aggregate of the intermediate rates is prima facie unreasonable. Kaw River Sand & Material Co. v. Director General 93 I. C. C. 346, 347.

(k) Except in special and unusual circumstances the fair measure of the reasonableness of a joint rate that exceeds the combination between the same points via the same route will hereafter be held to be the lowest combination that would lawfully apply if the through joint rate were canceled. Omaha Chamber of Commerce v. A. B. & A. Ry., 93 I. C. C. 584, 586.

(l) Joint rates which exceed the aggregate of intermediates are not unreasonable where there is a showing that one or both factors of the lower combinations were depressed rates. Omaha Chamber of Commerce v. A. B. & A. Ry. 93 I. C. C. 584, 586.

(m) Joint rates constructed as those here in issue are higher than combinations of local or proportional rates when, as here, one factor of the combination covers transportation within 25% territory, and the other factor covers transportation within 35% territory or interterritorial traffic. The contrary is true on traffic moving between the higher rated territories. It is not a fair application of the rule to condemn these joint rates as unreasonable inasmuch as no compensating advantage is accorded when the situation is reversed. Omaha Chamber of Commerce v. A. B. & A. Ry., 93 I. C. C. 584, 586.

(no) Ordinarily the through rate should be somewhat less than the combination of intermediate rates. Deviations from this rule have been permitted in instances where it has been shown that one of the factors has been unduly depressed. Class and commodity rates from Utah, 95 I. C. C. 417, 422.

(p) Ordinarily it is the view of the Commission that where traffic moves in considerable volume, through rates should be lower than the sums of the separately established factors except in instances where one or both of such separately established factors is shown to be in some manner depressed. Through rates no matter how constructed, must in all cases be reasonable and where increases are proposed the burden is upon the respondents to justify the resultant increased rates. Butter, eggs, dairy products and poultry, 96 I. C. C. 19, 29.

(qr) A joint rate which exceeds the aggregate of intermediate rates is prima facie unreasonable. Illinois Steel Bridge Co. v. C. B. & Q. R. R., 96 I. C. C. 698, 700.

(s) The Commission has consistently adhered to the view in recent years that joint rates should be somewhat lower than the aggregate of intermediate rates because of the facts that ton mile earnings should decrease as distance increases and that, as a general rule, a through movement entails less terminal expense than two local movements to and from the intermediate point. Fargo Commercial Club v. A. & W. Ry., 98 I. C. C. 691, 723.

(t) Rate on cotton denims from Little Rock, Ark., to Beloit, Wisc., exceeded aggregate of intermediate rates contemporaneously in effect to and beyond St. Louis, Mo. Reparation awarded. Rosenblatt & Sons v. Director General, 91 I. C. C. 18.

(u) Application of joint rates which equal combination of locals is not of itself a sufficient reason for their condemnation. Lumber from Missouri Points to Iowa, 91 I. C. C. 218, 220.

(v) Rates on cypress lumber and lumber articles from Waycross, Hebardville, and Hopkins, Ga., to southeastern, eastern trunk-line, New England and central

territories found not unreasonable except in instances where prima facie showing is made in connection with through rates in excess of aggregate of intermediates. Hebard Cypress Co. v. A. & R. R. R. Co., 91 I. C. C. 343, 352.

(w) Following Hudson Mule Co., 63 I. C. C. 6, and Live Stock to, from and between Points in Southeast, 74 I. C. C. 419, rates on horses and mules from points north of Ohio and west of Mississippi river to Atlanta, Ga., and Birmingham, Ala., found unreasonable to extent they exceeded aggregate of intermediate rates contemporaneously in effect. Reparation awarded. Hudson Mule Co. v. Director General, 91 I. C. C. 459.

(x) Rate charged on c. l. shipment of hubs, in the white, from Tullahoma, Tenn., to South Clarksville, Va., found unreasonable to extent it exceeded combination rates contemporaneously in effect over route of movement. Reparation awarded. Lynchburg Chamber of Commerce v. N., C. & St. L. Ry., 91 I. C. C. 586.

(y) Complainant attacked combination class and commodity rates charged on crushed stone, carloads, reconsigned out of route or return hauled from nonproducing points as unreasonable. The car was shipped April 27, 1923, from Port Deposit, Md., consigned through error to Linden Hall, Pa., and reconsigned at Marysville, Pa., to Mendenhall, Pa. Charged $1.15 to Marysville, and sixth class of $4.30 Marysville to Mendenhall. Through Marysville to Mendenhall there is a combination of rates lower than that charged, constructed as follows: Port Deposit to Marysville, $1.15; sixth class rate Marysville to Bainbridge, Pa., $2.50; commodity rate from that point to Mendenhall, $1.15, less 30c, Jones I. C. C. U. S. 1. HELD: Rate attacked of $4.30 Marysville to Mendenhall unreasonable to extent it exceeded $1.75 per ton, reparation awarded. Budding Co. v. P. R. R., 100 I. C. C. 411.

(z) It is a generally accepted principle of rate making, which has frequently found expression in the Commission's decisions, that through rates should be less than the sum of the intermediate rates. Southern Class Investigation, 100 I. C. C. 513, 661.

(aa) Joint fourth-class rates on matches moving from Oswego, N. Y., to New York City by rail, thence by water to Charleston, S. C., Brunswick, Ga., and Jacksonville, Fla., found unreasonable to extent they exceeded the aggregate of the contemporaneous fourth-class rates from Oswego to New York and the commodity rates by water beyond. Reparation awarded. Diamond Match Co. v. Director General, 92 I. C. C. 68.

(bb) Proposed changes in tariff description of beets, carrots, and parsnips from Texas points to eastern destinations, by adding to description "with tops" the words "or clipped tops" found not justified. The clipped variety consists of those with only leaves removed, from 3 to 6 inches of the stems being retained to permit tying in bundles. The trade considers commodities so shipped as being "without tops," and on them lower rate apply under present tariff description. To permit the proposed change would effect increases and unauthorized departures from aggregate-of-intermediates provision of section 4 of the act, which carriers made no attempt to justify. Beets and Carrots from Texas, 92 I. C. C. 141.

(cc) The commission regards rates which are higher than the aggregate of intermediate rates as prima facie unreasonable where there is no evidence to overcome that presumption. Midland Coal Co. v. St. L.-S. F., 92 I. C. C. 283, 284.

(dd) Rates on alfalfa meal from Melina, Colo., to St. Louis, found unreasonable to extent it exceeded the aggregate of intermediates contemporaneously in effect. Reparation awarded. Denver Alfalfa Products Co. v. Director General, 92 I. C. C. 326.

(ee) Through rate on refuse molasses from Grants Pass, Oreg., to Oakland, Calif., found unreasonable to extent it exceeded aggregate of intermediates contemporaneously in effect to and from San Francisco. Reparation awarded. Mason By-Products Co. v. Director General, 92 I. C. C. 646, 648.

(ffgg) Rates which exceed the aggregate of intermediates are prima facie unreasonable; Davison & Namack Foundry Co., 81 I. C. C. 345, and fair measure of reasonableness of a joint through rate which exceeds aggregate of intermediates over same route is lowest combination that would apply if joint rate were canceled. Windsor Turned Goods Co., 18 I. C. C. 162. Mason By-Products Co. v. Director General, 92 I. C. C. 646, 648, 649.

(hh) While commission has consistently found that a joint rate that ex-

ceeds the aggregate of intermediate rates over the same line or route is prima facie unreasonable, it has never found that the charging of such a rate is an overcharge. Moreover, it has always maintained that "the statute requires rigid observance of the tariff, without regard to the inherent lawfulness of the rates specified." Pacific Adjustment Co. v. Director General, 93 I. C. C. 50, 52.

(ii) Joint rate on furniture from Fort Smith to Jackson found unreasonable to extent it exceeded the aggregate of intermediates to and from Vicksburg. Reparation awarded. Jackson Traffic Bureau v. A. & V., 93 I. C. C. 55.

(jj) Rates on steel grinding balls moving water-and-rail from Chrome, N. J., to Ada, Okla., via Galveston, found not unreasonable or in violation of aggregate-of-intermediates clause of section 4 of the act. Tariffs in effect provided for alternative application of maximum rates, whereby rates to Deming, N. Mex., and Clifton, Ariz., would apply if lower than rate to Ada. The Clifton and Deming rates, however, were restricted to routes other than route of movement, and application of the alternative rule was contingent upon specific reference being made to it in connection with rates to destination in the tariff, and no such reference was made in connection with rate to Ada. Moreover, rate from point of origin to Deming was higher than rate to Ada. Oklahoma Portland Cement Co. v. A., T. & S. F., 93 I. C. C. 203.

(kk) Joint rate on gasoline from Salt Lake City to Baker, Oreg., found unreasonable to extent it exceeded the aggregate of intermediate rates to and beyond Weiser, Idaho. Reparation awarded. Standard Oil Co. v. Director General, 93 I. C. C. 278.

(ll) Joint class E rates on sand from St. Joseph, applicable under the intermediate rule from Turner, Kansas., to Bolivar and Cabool, Mo., found unreasonable to extent they exceeded combinations to and from Kansas City. No evidence was presented by defendants to justify rates on basis higher than Kansas City combination. Reparation awarded. Kaw River Sand & Material Co. v. Director General, 93 I. C. C. 346.

(mmnn) Rates on horses and mules between Fort Worth, and points in Kansas and Missouri found unreasonable to extent they exceeded the aggregate of intermediates contemporaneously in effect. Reparation awarded. Horse and Mule Rates in the Southwest, 1924, 93 I. C. C. 479.

(oo) Joint rates from points in Florida to Omaha, to which were applied the interterritorial increases of 33⅓ per cent authorized in Increased Rates, 1920, 58 I. C. C. 220, in lieu of the territorial increases based on rates to and from Jacksonville, found not unreasonable or in violation of the aggregate-of-intermediates provision of section 4 of the act. Situation presents a "special and unusual circumstance" sufficient to justify a departure from a strict application of the rule laid down in Windsor Turned Goods Co., 18 I. C. C. 162, that the fair measure of reasonableness of a joint rate that exceeds the combination of locals is the lowest combination that would apply if the joint rate were cancelled. Moreover, it is not a fair application of the rule to condemn these joint rates as unreasonable inasmuch as no compensatory advantage is accorded when the situation is reversed. Omaha Chamber of Commerce v. A., B. & A., 93 I. C. C. 583.

(pp) A joint rate does not violate the aggregate-of-intermediates clause of the fourth section unless it exceeds the sum of the rates contemporaneously effective to and from some intermediate point. It can not be said to violate that clause if it must first be broken up into component parts in order to provide rates to and from an intermediate point which are lower in the aggregate, because in such event the basis of comparison is destroyed. Omaha Chamber of Commerce v. A. B. & A., 93 I. C. C. 583, 585.

(qq) A joint rate which does not violate the aggregate-of-intermediates clause of the fourth section may still be unreasonable because it exceeds the through charges which would be applicable in event of its cancellation. Omaha Chamber of Commerce v. A., B. & A., 93 I. C. C. 583, 585, 586.

(rr) Joint rates which exceed the aggregate of intermediates are prima facie unreasonable, but the presumption is rebuttable. La Crosse Chamber of Commerce v. Director General, 93 I. C. C. 602, 603.

(ss) Joint rates exceeding the sum of intermediate rates subject to the act contemporaneously in effect are prima

facie unreasonable. Alton Mercantile Co. v. A. & W. Ry., 95 I. C. C. 645, 656.

(tt) Joint rates on clean rice from points in Arkansas, Louisiana, and Texas to points in Oklahoma found unreasonable to extent they exceeded the aggregate of intermediates contemporaneously in effect, carrier having offered no evidence to rebut the presumption of prima facie unreasonableness attaching to such rates. Reparation awarded. Alton Mercantile Co. v. A. & W. Ry., 95 I. C. C. 645, 656.

(uu) Where traffic moves in considerable volume through rates should be lower than the sums of the separately established locals except in instances where one or both of such separately established factors is shown to be in some manner depressed. Butter, Eggs, Dairy Products, and Poultry, 96 I. C. C. 19, 29.

(vv) Combination rates assessed on shipments of fruits and vegetables originally consigned from western points to New York, but reconsigned from Croston, N. J., a hold point, to Philadelphia and Washington, found illegal to extent that they exceeded those which would have accrued at the joint rates from the point of origin to ultimate destinations, plus a reconsignment charge, the applicable transcontinental tariffs containing no restrictions prohibiting such movement. Freeman Grain Co., 68 I. C. C. 559. Van Dusen Harrington Co. 47 I. C. C. 59. Steinhardt & Kelly v. E. R. R. Co., 96 I. C. C. 229.

(ww) Contention that through and local rates from Mount Harris, Colo., to destinations in Nebraska, were in violation of aggregate of intermediates provision of the fourth section, not sustained. The the sum of the two separate rates and aggregate of intermediate rates within the meaning of the fourth section was not the sum of these rates subjected to combination rule. See Caddo Central Oil & Refining Co., 83 I. C. C. 734. Such aggregates were higher than rates charged and there was no violation of the fourth section. Crowell Lumber & Grain Co. v. Director General, 96 I. C. C. 259, 261.

(xx) Rate on bridge iron, in carloads, from Chicago territory to points in Texas, following decision in 87 I. C. C. 115, found unreasonable to the extent it exceeded the aggregate through charges contemporaneously in effect to and beyond Shreveport, La. Reparation awarded. Illinois Steel Bridge Co. v. C. B. & Q. R. R. Co., 96 I. C. C. 698.

(yy) Rate charged for the transportation of gasoline, in carloads, from points in Texas to Milwaukee, Wis., found applicable. While such rate, which was the through rate, was greater than the sum of the intermediate rates in violation of the fourth section, no unreasonableness or violation of the fourth section was alleged and no evidence of unreasonableness of the rate charged was offered. Complaint dismissed. Producers Refining Co. v. St. L. S. W. Ry. Co., 96 I. C. C. 701.

(zz) Sixth-class rate on potatoes, moving from Hightstown, Cranbury, Jamesburg, Plainsboro, Prospect Plains, and Windsor, N. J., to New York by rail, thence by water to Jacksonville, Fla., found unreasonable to extent it exceeded the aggregate of contemporaneous fifth-class rate from points of origin to New York and a proportional rate beyond. Reparation awarded. Chamberlin & Barclay v. C. S. S. Co., 98 I. C. C. 7.

(3a) Present rates, established subsequent to movement of shipments here in issue, on lumber from Gantt and Sports, Ala., to Pensacola, Fla., via Andalusia, Ala., found not unreasonable, but group rates assessed on shipments under consideration found to have been in contravention of the aggregate-of-intermediates clause of the fourth section and unreasonable to extent they exceeded lower combination on Andalusia contemporaneously in effect from origin points to destination. Reparation awarded. Pensacola Creosoting Co. v. C. of G. Ry., 98 I. C. C. 36.

(3b) Fifth-class rate on steel hoops shipped during Federal control from Allegheny, Pa., to Cleveland, Ohio, found unreasonable to extent it exceeded aggregate of the contemporaneous commodity rates to and beyond Youngstown, Ohio, the route via which a great majority of the shipments are known to have moved. Reparation awarded. Greif Bros. Cooperage Co. v. Director General, 98 I. C. C. 419.

(3c) Rates on molding sand from Ottawa and Utica, Ill., to Buchanan, Mich., found not unreasonable or otherwise unlawful except to extent they exceeded aggregates of intermediate rates contemporaneously in effect over routes of movement. Reparation awarded. Clark

Equipment Co. v. C., B. & Q. R. R. Co., 98 I. C. C. 465.

(3d) The commission has repeatedly said that a joint rate which exceeds the aggregate of the intermediates is prima facie unreasonable, and it is not convinced that the aggregate of the intermediates represents the proper measure for the future in the case here involved. National Asso. of Furniture Mfrs. v. A. A. R. R. Co., 98 I. C. C. 501, 508.

(3e) Rates on cement plaster from Plasterco, Plasterco Junction, and Hamlin, Tex., to Meridian, Miss., and Middlesborough, Ky., found unreasonable. Revision of rates following 64 I. C. C. 107 and 306 resulted in through rates which exceeded combination of proportional rates to Memphis, Tenn., and local beyond. Reparation awarded. Texas Cement-Plaster Co., v. A. & M. R. R. Co. 98 I. C. C. 519.

(3f) Through rates to certain North Dakota points exceed the aggregates of intermediate factors to and from Fargo, using to Fargo rates made by use of the exceptions to the classification. Fourth-section violations should be promptly eliminated. Fargo Commercial Club v. A. & W. Ry. Co., 98 I. C. C. 691, 714.

(3gh) The commission has consistently adhered to the view in recent years that joint rates should be somewhat lower than the aggregates of the intermediate rates because of the fact, among others, that, as a general rule, a through movement entails less terminal expense than two local movements to and from the intermediate point. Fargo Commercial Club v. A. & W. Ry. Co. 98 I. C. C. 691, 723, 724.

(3i) Complainant attacked commodity rate charged on 37 cars of lubricating oil and gasoline shipped between Oct. 5, 1921 and Jan. 4, 1922 from Burkburnett, West Port Arthur, Witchita Falls, Fort Worth, North Fort Worth, and Houston, Tex., to Dayton, O., as unjust, unreasonable, unjustly discriminatory, unduly prejudicial and in excess of aggregate of intermediate rates. Charged joint through rate of 61c. Complainant makes no showing that the through rate charged was higher than the lowest aggregate of intermediate rates over the routes over which the shipments moved. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Refiners Oil Co. v. P. R. R., 102 I. C. C. 249.

(3j) The fair measure of the reasonableness of a joint through rate that exceeds the combination between the same points via the same route is and will hereafter be held to be the lowest combination that would lawfully apply if the joint through rate were canceled. Refiners Oil Co. v. P. R. R. 102 I. C. C. 249, 251.

(3k) No presumption of unreasonableness attaches to a joint through rate applicable over a particular route because a lower combination applies over another route. Refiners Oil Co. v. P. R. R. 102 I. C. C. 249, 251.

(3ka) In original report, 89 I. C. C. 601, rates on iron and steel articles from points in Pennsylvania to Cleveland and Lorain, Ohio, were found unreasonable to extent they exceeded aggregate of intermediate rates over routes of movement. Some shipments moved via a route through Wellsville and others via route through Youngstown, the aggregate of intermediates via the Wellsville route being higher than via the Youngstown route. HELD: Finding was in fact a finding that rates were unreasonable per se and regardless of measure of aggregate of intermediates via Wellsville, the record amply supports a finding that rates over that route were unreasonable to extent they exceeded contemporaneous aggregate of intermediates via Youngstown. Reparation awarded. American Shipbuilding Co. v. Director General, 102 I. C. C. 530.

(3l) The fair measure of the reasonableness of a joint rate that exceeds the combination between the same points via the same route is and will hereafter be held to be the lowest combination that would lawfully apply if the joint through rate were canceled. See 18 I. C. C. 162. Hollingshead Co. v. T. & P. Ry., 102 I. C. C. 603, 604.

(3la) Joint rate on lumber from Golden, Miss., group points to Buffalo-Pittsburgh territory found unreasonable to extent it exceeded the aggregate-of-the-intermediate rates to and from Corinth, Miss. Northeast Mississippi Traffic Bureau v. A. & V., 102 I. C. C. 611.

(3m) The mere fact that through rates are the same as the combination of local factors to and from intermediate points does not constitute proof of unreasonableness, in the absence of a showing that neither factor is depressed

below what would normally be a reasonable basis. Caruso & Co. v. C. & E. I. Ry. 102 I. C. C. 619, 621.

(3n) It is a generally accepted principle of rate making which has frequently found expression in opinions of the Commission, that through rates should be less than the sum of the intermediate rates. Caruso & Co. v. C. & E. I. Ry. 102 I. C. C. 619, 621.

(3na) Rates on horses and mules from Wichita, Kans., to Houston and other Texas destinations found unreasonable to extent they exceeded the aggregate of the intermediate rates contemporaneously in effect from and to same points over route of movement. Reparation awarded. Wichita Chamber of Commerce v. Director General, 102 I. C. C. 745.

(3o) A through rate higher than the aggregate of the intermediate rates over the same route is prima facie, but not conclusively, unreasonable. The presumption of unreasonableness can be rebutted upon satisfactory evidence. Lewiston Elevator Co. v. C. G. W. R. R. 104 I. C. C. 473, 475.

(3p) Complainant attacked commodity rates charged on iron and steel articles, including steel bars, plates, rods, angles and other forms, from the Pittsburgh, Pa., district to Canton and Massillon, O., as unreasonable, unduly prejudicial and in violation of section four. Canton and Massillon are on the Pensylvania, B & O., and W. & L. E. Shipments to these destinations from the Pittsburgh district may move over the Pennsylvania or B. & O., direct or over those lines or the P. & L. E., in connection with the N. Y. C., and W. & L. E., through Youngstown and Alliance, O., among other junction points. Massillon is 7.8 miles west of Canton over the Pennsylvania which is the short line to both destinations. Alliance is 18.6 miles Canton on the same line. The distances from Pittsburgh to Canton and Massillon over the Pennsylvania are 101.6 and 109.4 miles, respectively. Rate charged to Canton was fifth class rate of 20c. The fourth section violation arise from the existence of combinations of 19c on Youngstown (9.5c and 9.5c) and 17.5c on Alliance (11.5c and 6c) and of a rate of 12.5c from Butler and Natrona, Pa., on the Butler branch of the Pennsylvania north and east from Pittsburgh to Butler. The latter rate applies through Pittsburgh. HELD, rate attacked unreasonable to extent it exceeded aggregate of intermediates, reparation awarded. Canton Bridge Co. v. B. & O. R. R. 107 I. C. C. 141.

(3q) Joint rates which exceed the aggregate of the intermediates have uniformly been found by the Commission to be prima facie unreasonable. The presumption of unreasonableness may be overcome by showing that the sum of the intermediate commodity rates was less than a reasonable maximum charge. Hamm Brewing Co. v. Director General 107 I. C. C. 600, 602.

(3r) Joint rates on tin plate from McKeesport, Pa., Yorkville, Ohio, and Cumberland, Md., to New London, Wis., moving via Ludington, Mich., thence by car ferry to Manitowoc or Kewaunee, Wis., thence by rail to destination, found not unduly prejudicial but unreasonable to the extent that they exceeded the combinaton of proportional and local factors which would have applied in the absence of joint rates. Proportional factors which would have been applicable were so restricted as to result in violations of section 4 from McKeesport and Yorkville, but not from Cumberland. Reasonable rates prescribed for the future, and reparation denied. Borden Co. v. A. A. R. R. Co., 100 I. C. C. 153.

(3s) Rate on watermelons and vegetables from Merced, Calif., to Spokane, Wash., found unreasonable to extent it exceeded the aggregate-of-intermediate rates contemporaneously applicable, but rates from certain other points in California to Spokane found not unreasonable. Reparation awarded. Nash Spokane Co. v. Director General, 100 I. C. C. 223.

(3t) Joint third-class rates on plate glass from Toledo and Rossford, Ohio, Saginaw, Mich., and Blairsville, Pa., to Memphis, Tenn., found not unjustly discriminatory or unduly preferential, but found to have been unreasonable to extent they exceeded the contemporaneous aggregate of intermediates, composed of third-class rates to Ohio River crossings and commodity rates beyond. Reparation awarded. Memphis Freight Bureau v. B. & O., 100 I. C. C. 327.

(3u) Upon general investigation instituted by commission on own motion of interstate class rates within southern territory and between southern and official territories, FOUND: Through rates

lower than combination of locals to and from boundary line should be established between official and southern territories, such rates to be relatively no higher than those prescribed for application within southern territory. Southern Class Rate Investigation, 100 I. C. C. 513, 664.

(3v) Commodity rates from points on the N., C. & St. L. to junctions with other lines may be increased sufficiently to prevent departures from the aggregate of intermediates rules of the fourth section. Dairy Products from Southern Points, 100 I. C. C. 756.

(3w) Rate charged on two carloads of cottonseed from Clarksville, Tex., to Memphis, Tenn., found unreasonable to extent it exceeded the aggregate-of-intermediates rates contemporaneously applicable over route of movement. Russell-Heckle Seed Co. v. M. P. R. R., 101 I. C. C. 29.

(3x) A rate which exceeds the aggregate of intermediates is prima facie unreasonable, but that presumption is not conclusive. See 78 I. C. C. 107. Ogden Packing & Provision Co. v. A., T. & S. F., 101 I. C. C. 236, 255, 256.

(3y) Complainant attacked fifth class rates charged on 13 cars of steel plates and channels and on iron and steel pipe shipped between Sept. 7, 1923 and August 30, 1924 from Girard, New Philadelphia, Youngstown and Newton Falls, O., to Parkersburg, W. Va., as unjust, unreasonable and in violation of the fourth section. Shipments moved over B. & O., through Wheeling, W. Va., HELD, rates attacked unreasonable to extent they exceeded the aggregate of intermediate rates of 19.5c from New Philadelphia and 21.5c from Girard, Youngstown and Newton Falls, reparation awarded. Parkersburg Rig & Reel Co. v. B. & O. R. R. 109 I. C. C. 209.

(3z) A through rate, particularly for long hauls, might be somewhat lower than the aggregate of intermediate rates. Iowa Railroad Commissioners v. C. R. R. Co. of N. J. 109 I. C. C. 273, 283.

(4a) Complainant attacked commodity rates on petroleum products, carloads, from March 15, 1918 and Feb. 27, 1920 from and to points in Wyoming, Idaho, Colorado, Utah and Montana as unjust, unreasonable and in excess of applicable rates to the extent they exceeded rates made in accordance with the socalled combination rule. No. 15069. Shipments moved interstate from Casper, Wyo., over the Burlington to Clearmont, Wyo., thence Wyoming, Ry. to Buffalo, Wyo. During the period of movement specific commodity rates were in effect from Casper to Clearmont and from Clearmont to destination. Applicable rates were joint fifth class rates considerably higher than the Clearmont combination. Basis of Clearmont combination using the combination rule was established May 15, 1922. No. 15069 (subs. 1 to 9.) Charged combination of rates the trunk line tariffs providing for the use of the combination rule. HELD, through fifth class rates from Casper Wyo. to Buffalo were applicable and prior to August 13, 1918 unreasonable to extent they exceeded the aggregate of intermediate rates, and on and after that date unreasonable to the extent they exceeded the rate under the combination rule, reparation awarded. Continental Oil Co. v. Director General 109 I. C. C. 289.

(4b) The aggregate of intermediate rates must be determined without reference to the combination rule. Darnell Commission Co. v. M. P. R. R. 109 I. C. C. 427.

(4c) Complainant attacked joint rate of $1.07 charged on three cars of dried beans shipped Nov. 24, 1917 and March 11 and 27. 1918 from Wilmington and Modesto, Calif., to Jacksonville, Fla., as unjust, unreasonable and unduly prejudicial to extent it exceeded $1.04. Shipments were routed by shipper S. P. Sunset L. & N., S. A. L. and moved as routed through New Orleans, La., thence L. & N., either to River Junction, Fla., or Montgomery, Ala. and thence S. A. L., and connections. The sole question is whether a combination rate based on a point that contemplates an out of line or back haul of over 1,000 miles represents the aggregate of intermediate rates via the route over which shipment moves. HELD, rate applicable was the joint through rate applied, complaint dismissed. Resser & Fitch v. Director General, 109 I. C. C. 724.

Co., 88 I. C. C. 754.

§15½. Rate Via Other Routes.

See Evidence §47.

(a) Joint-line combination rates applicable via Pecos, Tex., on traffic between El Paso, Tex., and points in New Mexico, found not unreasonable, discriminatory, or unduly prejudicial as compared with lower single-line joint rates applicable over a shorter route through Clovis and Belen, N. Mex. Complainant bases his case upon theory that if single-line basis of rates were available over the joint-line route, a more expeditious service would be possible by reason of relatively shorter mileage but evidence as to present service over respective routes is vague. Moreover, establishment of joint rates over the joint-line route is not shown to be necessary in the public interest. El Paso Chamber of Commerce v. A. T. & S. F. 92 I. C. C. 75.

ALL OTHER CITATIONS

Portland Flouring Mills Co., v. G. N. Ry. Co., 88 I. C. C. 94.

§16. Reparation.

See Procedure Before Commission V; Reparation.

(ab) Even though a factor of a combination rate appears to be unreasonable no reparation will be awarded if the through charges paid are not unreasonable. Standard Potash Co. v. Director General 92 I. C. C. 337, 338.

(c) Under a joint rate the liability is joint and several. Consolidated Coal Co. v. Director General, 93 I. C. C. 53, 54.

(d) On the question of reparation the reasonableness of the joint rate as a whole must be considered. Ontario Paper Co. v. C. N. Rys., 95 I. C. C. 66, 72.

(e) Relying on joint rate and route quoted by originating carrier's agent, complainant specified such rate and route in bill of lading, and prepaid charges. However there was no joint rate in connection with originating line, and higher combination rate was applicable. Undercharges collected at destination. Route of movement was shortest route in connection with originating line, and applicable rate was lowest available rate via any route over which originating line could have received a haul. Notwithstanding fact that originating carrier misquoted rate to complainant, it was not obligated to turn shipment over to competing carriers at point of origin and forego a haul thereon. Newsom v. M. & O. R. R. Co., 91 I. C. C. 68.

(f) Where joint rates are concerned each carrier has some control over those rates and contributes to injury where they are unreasonable. But where through rates are made up of separate locals of individual carriers, none of whom control any factor except that maintained by it, or contribute to injury except to extent of unreasonableness in its particular rates, to find in such cases that carriers are jointly and severally liable would be to require one or more carriers to bear injury done by another or other participating carriers where former had no control over actions or rates of latter, and under circumstances which render it impossible for carriers thus injured to obtain contribution from other carrier or carriers. Midland Coal Co. v. M. V. R. R. Co., 91 I. C. C. 571, 573.

(g) Where an unreasonable joint rate has been collected, liability of parties to such action is joint and several, and Commission may award reparation against one of defendant roads which participated in traffic, even though other roads which performed a part of service are not made parties defendant. See 6 I. C. C. 378 and 21 I. C. C. 20. Midland Coal Co. v. M. V. R. R. Co., 91 I. C. C. 571, 572, 573.

(h) Shipments originated during Federal control but were delivered after that period had terminated. Upon contention of Director General that Commission may not award reparation on such shipments because corporate carriers are not made defendants. HELD: Applying well-established principle that charging of an unreasonable rate is a tort, and that parties to such rate are jointly and severally liable for damages resulting from its collection, recovery may be had from Direc-

tor General in connection with such shipments. Darnell Taenzer Case, 245 U. S. 531; International Nickel Co., 66 I. C. C. 627. Omaha Refining Co. v. Director General, 91 I. C. C. 575, 576.

(ij) Complainant seeking reparation, as overcharges, based upon violation of aggregate of intermediates provision of section 4 of the act, dismissed following Portland Seed Co. case, 264 U. S. 403. While case cited did not involve violations of that clause, the court's reasoning is conclusive as applied to it as well as to long-and short-haul clause. Published rates must be charged and paid whether lawful or not; and while an unlawful rate may subject carrier to payment of penalties to the Government, its charging does not give shipper any right save to recover "the full amount of damage sustained in consequence of any such violation of the provisions of this act." It would be going too far to find that unauthorized publication established the lower aggregate of intermediate rates as the maximum permissible charge, and only rate which could be demanded. Pacific Adjustment Co. v. Director General, 93 I. C. C. 50.

(k) On shipments moving during Federal control objection to complaint was raised by director general because one participating carrier was not named as a party defendant; also that since another carrier named was not under Federal control the commission's jurisdiction does not extend to that portion of the transportation over the latter's line. HELD: Rate attacked is a joint rate and, even if Federal control had not intervened, it would not have been necessary to name all carriers participating in the transportation as parties defendant. Moreover, under joint rates liability of defendants is joint and several. Consolidated Coal Co. v. Director General, 93 I. C. C. 53, 54.

(l) Where shipments move under joint rates, the nonjoinder of one of the participating carriers as a party defendant is immaterial. Gulf City Mfg. Co., 66 I. C. C. 763. Standard Mineral Co. v. N. S. R. R., 95 I. C. C. 704, 705.

(m) Facts that rates to an intermediate point were in excess of those to more distant points is not proof of unreasonableness, nor, in absence of evidence of specific damage to shipper, is it a sufficient basis for an award of reparation. Vessler Co. v. E. J. & E. Ry., 96 I. C. C. 75, 76.

(n) Shipments originated during Federal control but were delivered after that period had terminated. Complaint named delivering carrier only as a party defendant. FOUND: Since rates charged were joint rates the nonjoinder as defendants of other carriers participating in the transportation is not material. See 66 I. C. C. 763. Stailey Lbr. Co. v. P. R. R., 96 I. C. C. 175, 176.

(o) Shipments of milk and cream from Iowa points to Omaha, Nebr., moved over indirect route via Tara, Iowa, some of the shipments being unrouted and others being routed via Illinois Central. Charges based upon applicable rates were collected. Upon contention that shippers are entitled to through express rates to Omaha via Onawa or Sioux City, or to joint baggage and express rates equal to express rates applicable over these routes prior to decision in Express Rates on Milk and Cream, 74 I. C. C. 427, HELD: Contention has force in connection with demand for reasonable route and rate for future but its cogency is not apparent as to shipments in the past. Furthermore, as to shipments which were unrouted, there is no distinction in principle between this case and the situation presented in 24 I. C. C. 626, wherein commission refused to award reparation to basis of subsequently established joint through rate based upon the aggregate of intermediates over short lines which was lower than joint rate over more indirect route of movement. Kirschbraun & Sons v. G. N. Ry. Co., 100 I. C. C. 28, 32, 33.

(p) Contention by carriers that no reparation may be awarded covering a period of more than two years prior to filing of a subcomplaint; that original complaint did not put in issue the through rates; that a finding of unreasonableness and award of reparation can not be made because carrier participating in one factor is not a party defendant; and that as to the other factor reparation to full amount can not be made against delivering carrier named in original complaint because other participating carrier is not a party, not sustained. Allegations in original complaint specify through rate and are in substantially same form as in previous cases where commission found rate charged unreasonable to extent a specified factor exceeded a certain amount. See 92 I. C. C. 29; 88 I. C. C. 535; and 87 I. C. C. 668, 672. Delivering carrier named in

original complaint participated in joint-rate factor and is jointly and severally liable irrespective of whether other participant in that joint rate is a party to the proceeding. Barrett Co. v. N., C. & St. L., 101 I. C. C. 279, 280, 281.

V. TARIFFS AND CONSTRUCTION.

See Tariffs IV.

§17. In General.

(a) Neither through billing, uninterrupted movement, continuous possession by the carrier, nor unbroken bulk, is an essential of a through interstate shipment. There are common incidents of a through shipment; and when the intention with which a shipment was made is in issue the presence, or absence of one or all of these incidents may be important evidence bearing upon that question. But where it is admitted that the shipment made to the ultimate destination had at all times been intended, these incidents are without legal significance as bearing on the character of the traffic. The mere fact that cars received on interstate movement are reshipped by the consignee, after a brief interval, to another point does not of course establish an essential continuity of movement to the latter point. The reshipment, although immediate, may be an independent intrastate movement. The instances are many where a local shipment follows quickly upon an interstate shipment and yet it is not to be deemed a part of it, even though some further shipment was contemplated when the original movement began. Shipments to and from distributing points often present this situation, if the applicable tariffs do not confer reconsignment or transit privileges. The distinction is clear between cars of that character and the one at bar, where the essential nature of the traffic as a through movement to the point of ultimate destination is shown by the original and persisting intention of the shippers which was carried out. Goldsboro Chamber of Commerce v. A. C. L. R. R., 91 I. C. C. 315, 320.

(b) In interest of tariff simplification it is commission's opinion that joint rates on wool should be published from Pacific coast terminals and adjacent points to eastern destinations, if practicable, in one or a very few consolidated tariffs, and that such tariffs should include all transit rules, regulations and practices appertaining to movement of wool. Wool Rates Investigation, 1923, 91 I. C. C. 235, 260.

§18. Application of Proportional Rate.

See Supra §13½; Across Lake Rates (b); Facilities and Privileges §11½, §15, §18; Proportional Rates; Reconsignment §6¼.

(a) Wherever the through rate is equal to the sum of the locals a dealer situated at the point where the locals combine, as, in this case, at Cairo, may avail himself of such advantages as may result from making two shipments instead of one, but to obtain such advantages he must bear the increased expense incident to two shipments and there must in fact be two shipments without any carrier or agent of the carrier acting for the shipper. Stetson Cutler & Company v. N. Y. N. H. & H. R. R. 91 I. C. C. 3, 5.

(b) Grain moving from country stations to reshipping points is subject to local rates and upon reshipment by rail, buyer at reshipping point pays difference between reshipping rate and joint all-rail rate from points of origin to ultimate destination. This difference, known as a "specific," is ordinarily less than local rate to reshipping point and results in a refund out of original charges to that point. Armour Grain Co. v. Director General, 92 I. C. C. 482, 483.

(ba) Rate assessed on wheat moving from Chappell, Nebr., to Wichita, Kans., there stored and later reshipped to San Diego, Calif., found not unreasonable. While tariff carrying rate claimed was applicable over circuitous route of movement because unrestricted in its application, on other hand, tariff of carrier moving the shipment into transit point did not authorize storage at that point where outbound movement is made over other lines, as was the case here. Moreover, shipment here moved out of direct route to such extent as to entail wasteful transportation of the nature objected to by commission in 73 I. C. C. 116. Wallingford Bros. v. C., R. I. & P., 102 I. C. C. 239.

(c) Complainant attacked net or reshipping rates of 9 and 11.5c charged on logs, carloads, shipped prior to and from and after August 26, 1920 to Louisville from points in Kentucky and Tennessee

on the Scottsville-Hartsville branch of the defendant as unjust and unreasonable to extent they exceeded 7.5c and 9.5c. From Gallatin, Tenn., a point on the main line of defendant 159 miles south of Louisville, a branch line extends northeast to Scottsville, Ky., a distance of 35 miles. From Hartsville Junction, Tenn., a point on the Scottsville line a branch extends southeast a distance of 11 miles to Hartsville, Tenn. From points on the Scottsville-Hartsville branch at which complainants shipments originated the distances to Louisville are from 174 to 194 miles, and the route is interstate. Prior to July 19, 1913, rates from stations on the branch line described were the same as those in effect from equidistant main line points but in making reductions on that date defendant through oversight left unchanged rates from said stations. On Aug. 20, 1920 when complainants first shipment was made, the net rate on logs to Louisville from points on the Scottsville Hartsville branch was 9c as compared with 7.5c on equidistant main line points. On June 5 1922 defendant published the 9.5c rate from points on the branch line. HELD, rates attacked unreasonable to extent they exceeded 7.5c prior to August 26, 1920 and 9.5c thereafter to May 27, 1922, reparation awarded. Wood Mosaic Co. v. L. & N. R. R. 102 I. C. C. 584.

(d) Contention that through rates on China-wood oil, higher than a combination composed of a commodity factor applicable on whale, fish, and coconut oil and fifth-class factor were in violation of section 4, not sustained. The commodity factor was not specifically applicable on China-wood oil and it would not be proper to base a fourth-section violation on an assumption of analogy. Glidden Co. v. E. R. R. Co., 100 I. C. C. 331, 332.

(e) Class A rates on shipments of household and office electric fans and motors, from Springfield, Ohio, to San Francisco, Calif., found not inapplicable or unreasonable. Lower combination sought, composed of a factor applicable on "sugar-making machinery" including "fans" and "motors" found not applicable to complainant's shipments which could not be put to any normal use in connection with machinery in a sugar mill. Therefore, no violation of the aggregate-of-intermediates provision of the fourth section existed. Robbins & Meyers Co. v. C., C., C. & St. L. Ry. Co., 100 I. C. C. 418.

§20a. Combination Rule.

See Infra §21.

(a) Although the combination rule, designed as a temporary expedient, is undesirable as a permanent tariff rule, carriers publishing one factor of a through rate under which there is substantial movement, should not be permitted to cancel application of the rule to that factor, unless carriers publishing other factors join in the cancellation or in the publication of joint through rates. Cancellation of Combination Rule on Petroleum, 73 I. C. C. 146. Combination Rule on Box Shooks, 89 I. C. C. 219, 220, 221.

(b) Proposed cancellation of combination rule in connection with proportional rate from Grand Junction, Colo., to other Colorado points on box shooks and car strips from Pacific coast, found not justified. Carriers publishing joint rates to Grand Junction would be compelled to protect existing through rates and accept a less compensation than the published point rates; tariffs containing joint rates to Grand Junction and proportional rate beyond would contain conflicting provisions as to application of the combination rule, resulting in confusion in application of the through rate; and complications as to division of joint rate would result. Combination Rule on Box Shooks, 89 I. C. C. 219.

(c) The so-called combination rule was adopted by the director general as a temporary expedient whereby combination rates on certain commodities, each factor of which had been increased under his General Order No. 28 by specific amounts should thereafter reflect only the increase which they would have received had they been published in the form of joint rates. It provided that where no specific through rates are in effect between points of origin and destination and two or more factors, increased under the general order, are used to construct the through rate, a specific amount shall be deducted from each factor and a specific amount added to the sum of the reduced factors thus obtained. Combination Rule on Box Shooks, 89 I. C. C. 219, 220.

(d) Applicable point rates on gasoline from points in Texas and Oklahoma

to destinations in California and Washington found unreasonable to extent they exceeded lower combinations contemporaneously in effect for segments of the same movement, modified and changed in accordance with the so-called combination rule. Reparation awarded. McLeod v. T. & P. Ry. Co., 89 I. C. C. 356.

(e) Complainant attacked commodity rates charged on rough quarry stone, carloads, from the Bedford district, Ind., to Minneapolis and St. Paul, Minn., as unjust, unreasonable and unduly prejudicial. The Monon and the Milwaukee handled about 95% of the stone from the Bedford district. Rates of 27 and 29c apply from the Bedford district to a large group of destination points extending from Duluth, Minn., and Superior and Ashland, Wis., on the north to a considerable portion of western Wisconsin, southeastern Minnesota and eastern Iowa. The rates to other destinations in western trunk line territory are largely grouped. A violation of the long and short haul clause of the fourth section was shown to exist, as there are no through rates to Taylors Falls, Minn. Using the proportional rate of 16c to Chicago and 12c beyond, under the combination rule, as rate of 25.5c applied to Taylor Falls to which the Twin Cities are intermediate. On June 1, 1923 a through rate of 27c was published to Taylors Falls, which became applicable to intermediate points. No movement of stone to these points were shown. They are well within the group of destination points taking the rate of 27c. To all points in the United States except Omaha, Neb., and the Twin Cities the rates from the Bedford district on rough and dressed stone are the same. HELD, rates attacked not unreasonable except prior to June 1, 1923 they were in violation of the long and short haul clause of the fourth section, complaint dismissed. Young v. C. I. & L. Ry., 89 I. C. C. 428.

(f) Where carriers under Federal control published the so-called combination rule, which provides a method for constructing through rates made by use of combinations, and tariffs do not restrict its application to Federally controlled lines, there is a holding out to shippers of the rate so constructed which publishing carriers must protect, and the principle laid down in the Sligo case, 62 I. C. C. 643, 73 I. C. C. 555, applies. This situation is applicable to shipments moving to points on nonfederally controlled lines, even though such carriers do not concur in the rule or carry a similar rule in their tariffs, and is equally applicable to intrastate shipments moving during Federal control. McCloud River Lumber Co. v. Director General, as Agent, 89 I. C. C. 645, 647.

(g) Where carriers under Federal control publish the so-called combination rule, which provides a method for constructing through rates made by use of combinations, and applicable of the rule is specifically restricted so as not to apply in connection with rates between points on such roads and points on lines not under Federal control, "except * * * where specific reference hereto is made in tariffs," the rule applies from points on nonfederally controlled lines whose tariffs make specific reference to the rule. McCloud River Lumber Co. v. Director General, 89 I. C. C. 648, 649.

(h) Upon rehearing, prior report, 58 I. C. C. 442, modified and shipments of lumber from Hopkins, Fla., to Baltimore, Md., and other points, during Federal control, found overcharged. None of the applicable tariffs specifically referred to tariff which provides a rule for the construction of through rates made on combination under which but a single increase was to be added to sum of the separate factors, nor did the latter make specific reference to applicable tariff. Following Acme Cement Plaster Co., 81 I. C. C. 298, the combinations to and from Jacksonville, Fla., each increased 5 cents under General Order No. 28 of director general were applicable. Reparation awarded. Union Cypress Co. v. F. E. C. Ry. Co., 89 I. C. C. 679.

(i) Complainant attacked combination rates charged of $4.62 on 82 cars of coke shipped between June 10 and June 20, 1922 from Cascade, W. Va., to Monessen, Pa., as unjust, unreasonable and unduly prejudicial to extent it exceeded $1.82. Shipments moved via Morgantown and Kingwood to Morgantown, W. Va., B. & O., to West Youghiogheny Transfer, Pa., and P. & L. E., beyond, charged $1.26 to Morgantown, $1.68 Morgantown to West Youghiogheny Transfer, and $1.68 from that point to Monessen. Prior to June 21, 1922 there was no joint rate from Cascade to Monessen, but on that date a joint rate of $1.82 was established in response to an application made to the B. & O. by complainant on or about

May 26, 1922. The rate was established on short notice. HELD, rate attacked unreasonable to extent it exceeded $1.82, reparation awarded. Pittsburgh Steel Company v. B. & O. R. R., 89 I. C. C. 749.

(j) Respondents proposed to cancel the application of the so-called Jones rule for constructing combination rates in connection with livestock from Washington, Idaho, Montana and North Dakota to various destinations, principally the primary livestock markets. The increases would range from 2.5 to 4.5c. HELD, proposed schedules not justified. Combination rule on livestock between western points, 92 I. C. C. 205.

(k) The Commission has given its approval to the efforts of the carriers to eliminate the combination rule by the publication of joint through or proportional rates to take care of the traffic which would move under the combination rule. It has refused to allow the cancellation of the rule where it would result in increased rates. Combination rule on livestock between western points 92 I. C. C. 205, 206.

(l) Complainant attacked combination rate charged on 37 cars of coke from Indianapolis, Ind., to Harriet, N. Y., between October 1918 and March 1919, as unjust and unreasonable. They attacked rate charged on 14 cars of coke from Indianapolis, Ind., to Niagara Falls during the same period as unjust and unreasonable and that the rate on a commodity described as Reilly carbon coke, pitch coke, petroleum coke and coke shipped between June and December 1919, from St. Louis Park, Minn., to Harriet Station, Black Rock, N. Y., and to Niagara Falls as unjust and unreasonable. On the N. Y. C., Harriet and Black Rock are separate agency stations within the Buffalo district, 13.1 and 9.7 miles north of Buffalo. When through rates are published to Harriet for hauls of appreciable distances, they are the same as the rates to Buffalo and Black Rock. There being no through rate to Harriet on complainants commodity, the applicable rates were combinations in excess of the rate to Buffalo or Black Rock, to Harriet and Niagara Falls, via route of movement over L. E. & W., and N. Y. C., of $5.10 and $5.20, respectively, composed of commodity rates of $2.30 from Indianapolis to Cleveland, O., $1.90 from Cleveland to Black Rock and 90c and $1 beyond. Effective March 15, 1919, the rate of $3.40 became applicable on coke from Indianapolis to Black Rock, Harriet, and Niagara Falls in connection with the N. Y. C., Reilly coke is a residuum of coal tar-pitch. Coal tar pitch was rated 80% of sixth class and took rates of $3.40 from Indianapolis to Niagara Falls and $6.40 from St. Louis Park to Black Rock. HELD, rates attacked unreasonable to extent they exceeded $3.40 from Indianapolis and $6.40 from St. Louis Park, reparation awarded. Acheson Graphite Company v. Director General, 92 I. C. C. 215.

(m) Complainant attacked commodity rates charged on sugar, carloads, from California to Indiana as unduly prejudicial to points in Indiana and unduly preferential of Chicago and other Illinois points. Complainant attacked rates on sugar, carloads, from Colorado, Idaho, Kansas, Nebraska and Utah to points in Indiana as unreasonable, unjustly discriminatory and unduly prejudicial. Rates from the origin territories in question to Indiana are made on a combination basis by using commodity rates up to the Mississippi river, Chicago, or points taking the same rate as Chicago and fifth class beyond. The factor to Chicago from California is 79c from Colorado 56c and from Utah and Idaho 69.5c. The rates from western points to Chicago are made by the western carriers for the purpose of enabling western producers to meet at Chicago the competition of eastern and southern sugar refiners and are less than maximum reasonable rates. HELD, rates attacked not unreasonable or unduly prejudicial, complaints dismissed. Indiana Public Service Commission v. A. T. & S. F. Ry., 92 I. C. C. 279.

(n) Respondents proposed to cancel the combination rule for constructing combination rates on common brick between points on their lines in Iowa, Wisconsin, Minnesota, North Dakota, South Dakota, Montana, Idaho, Oregon and Washington. The rates on brick were published in conformity with 80 I. C. C. 179, and are used in constructing combination rates. Under the terms of the combination rule, such combinations are now subject to a 2.5c deduction. The proposal is to cancel reference to this rule in connection with the rates on common brick only, which will result in the application of the full combination of

local rates. HELD, proposed schedules not justified. Combination rule on common brick, 92 I. C. C. 289.

(o) Complainant attacked combination rate charged on two cars of gum veneer shipped from Clarendon, Ark., to Newport, Vt., in December, 1920, as unjust, unreasonable and excessive to extent it exceeded 60c applicable on lumber. Applicable rate was $1.075 composed of a commodity rate of 32.5c to East St. Louis, and fifth class 75c beyond. HELD, rate attacked not unreasonable, complaint dismissed. Frosts Veneer Seating Company v. St. L. S. W. Ry., 92 I. C. C. 317.

(p) Where one of the tariffs used in making combination commodity rates on coal contained the combination rule there was a holding out to the shipper of the rate so constructed which the carrier should protect. National Supply Co. v. Director General, 92 I. C. C. 610, 611.

(q) A provision in a tariff carrying rate which may be used in combination to the effect that the rates are subject to the combination rule in Morris I. C. C. U. S. 1 is equivalent to the publication of said rule in the rate tariff. Armour Fertilizer Works v. Southern Ry. 93 I. C. C. 186, 188.

(r) Respondents proposed to restrict the application of the socalled combination rule for constructing through rates on lumber from the Mississippi valley and southern points of origin to Ohio and Mississippi river crossings, when shipments are destined to a point beyond these crossings. In 81 I. C. C. 745 the Commission found that the proposed schedules had not been justified. The record shows that if the proposed schedules had been allowed to become effective, certain of the rates involved would have been increased. HELD, proposed schedules not justified. Cancellation rule for combination rates, 93 I. C. C. 614.

(s) The mere desire to eliminate the combination rule is not a justification for increased rates. Cancellation rule for combination rates, 93 I. C. C. 614, 615.

(t) Rate on sand from Nichols, N. Y., to Athens, Pa., found unreasonable to extent it exceeded lower rate to Miland and Ulster, Pa., further distant points. Tariff publishing lower rate referred to rule 77 of Tariff Circular 18-A and provided that upon reasonable request therefor rates in tariff would be established from or to intermediate points, and such lower rate, was subsequently established to Athens. Reparation awarded. Warren Bros. Co. v. Director General, 91 I. C. C. 559.

(u) In 89 I. C. C. 356, the Commission found joint rates charged on gasoline, carloads, between August 26 and Dec. 31, 1920, from Texas and Oklahoma to California and Washington as unreasonable. Joint through rates of $1.26 from the points of origin to destinations in California, and $1.46 to Richmond Beach were applicable. The tariff naming these rates provided that if the aggregate of intermediate rates over the route traversed was less than the joint rate, such aggregate of rates would be applied. When the shipments moved, separately established intermediate rates to and beyond junction point is Oklahoma, Kansas and Texas, aggregated more than the joint rates. The tariffs naming the intermediate rates provided that where charges were constructed by a combination of separately established rates to and from junction points through charges would be obtained by deducting from one intermediate rate 4.5c, adding to the figure thus obtained the rate for the remainder of the through haul in effect on June 24, 1918, and to the total so obtained adding 4.5c to make the through rate. After modifying the published intermediate rates under the rule described the resulting combinations would be less than the joint rates. The specific joint rates were not rendered inapplicable under the alternative rule in the same tariffs for the intermediate rates did not aggregate less than the joint rates. Complainants introduced no other evidence with respect to the reasonableness of the join thru rates charged. HELD: Rates charged not unreasonable or otherwise unlawful, complaint dismissed. McLeod v. T. & P. Ry., 100 I. C. C. 219.

(v) Respondents proposed to cancel the application of the so-called combination rule in connection with the rates on brick and on drain tile, carloads, from Mason City, Rockford and Sheffield, Ia., to Minnesota basing points, including the Twin Cities and the head of the lakes, also Wisconsin points; to increase the rates on brick from Mason City to destinations on the Omaha and Soo Line in Wisconsin; and to cancel the commodity rates on brick, drain tile and other clay

products from Iowa producing points, such as Rockford, Mason City, Des Moines and Acme to Ashland, Wisc., over the Rock Island in connection with Soo Line. **Cancellation of Application of Combination Rule.** The tariffs sought to be amended are now subject to the combination rule. The suspended schedules publish an exception to the application of that rule in connection with the rates from Mason City to Minnesota basing points and to Wisconsin. Most of the tariffs publishing the rates beyond the Twin Cities and other basing points make reference to the combination rule so that, generally speaking, no increased through rates would result under the principle announced in 62 I. C. C. 643 and 73 I. C. C. 551. **Increased Rate from Mason City to Wisconsin Destinations on Omaha and Soo Line.** Prior to Nov. 11, 1924, the rate on brick from Mason City to destinations in Wisconsin on the Omaha and Soo Line was 12c. By schedules filed to become effective July 15, 1924, the M. & St. L., proposed to reduce this rate to 10.5c This was suspended in 93 I. C. C 81, but was permited to become effective Nov. 11, 1924. The suspended schedules here under consideration propose to restore the rate existing prior to the reduction under 2184. **Cancellation of Rates from Iowa Producing Points to Ashland, Wisc.** No commodity rates are maintained in intermediate points on the Soo Line, but the present 10.5c rate to Ashland is subject to rule 77 tariff circular 18-a. The cancellation of the commodity rate would eliminate the possible operation of rule 77, leaving in effect to Ashland and intermediate points, the class E rate. The class rate to Ashland would be greatly in excess of the aggregate of the commodity rates on Twin Cities. HELD: Suspended schedules not justified. Combination Rule on Brick and drain tile, 101 I. C. C. 729.

(w) Although the Commission has frequently indicated that the combination rule designed as a temporary expedient, is undesirable as a permanent tariff rule, it does not think that carriers publishing one factor of a through rate under which there is substantial movement, should be permitted to cancel the application of the combination rule to that factor, unless carrier publishing the other factors join in the cancellation or in the publication of joint through rates. Combination Rule on Brick and Drain Tile, 101 I. C. C. 729, 730.

(x) Proposed cancellation of combination rule in connection with rates on cotton and linters from the South and Southwest to the North and East, without first providing joint through rates for application in absence of that rule, found not justified. Innumerable rate increases would result in absence of such rule on traffic moving through New Orleans, Memphis, and other gateways, which carriers made no attempt to justify. While combination rule, as applied to cotton and linters, may be objectionable, that fact alone does not justify its cancellation and application of resulting higher rates. Combination Rule on Cotton and Linters, 92 I. C. C. 165.

(y) The so-called combination rule was adopted by director general as a temporary expedient whereby combination rates, each factor of which had been increased under General Order No. 28 by specific amounts, should thereafter reflect only increase which they would have received had they been published in form of joint rates. It provided that where no specific through rates are in effect between points of origin and destination, and where two or more factors, increased under the general order, are used to construct the through rate, a specific amount shall be deducted from each factor and a specific amount added to sum of reduced factors thus obtained. Combination Rule on Cotton and Linters, 92 I. C. C. 165, 166.

(z) While the combination rule as applied on certain commodities may be objectionable, that fact alone does not justify its cancellation and application of resulting higher rates. Combination Rule on Cotton and Linters, 92 I. C. C. 165, 167.

(aa) Proposed cancellation of combination rule in connection with shipments of livestock from Washington, Idaho, Montana, and North Dakota to primary markets, found not justified. To many destinations present rates would be protected under decision in Sligo case, 62 I. C. C. 643, because most tariffs of eastern lines carry the combination rule, but to points on roads which do not publish the rule increases would result. While commission has approved effects of carriers to eliminate this rule by publication of joint through or proportional rates to take care of traffic which would move under the rule, it has refused to allow its cancellation where increases would result. Combination Rule on Livestock, 92 I. C. C. 205.

(bb) Proposed cancellation of combination rule on common brick between points on lines of Great Northern and Northern Pacific in Iowa, Wisconsin, Minnesota, the Dakotas, Montana, Idaho, Oregon, and Washington, found not justified. Proposal to cancel application of the rule in connection with common brick only, would result in many instances in rates higher than those approved in the General Brick case, 68 I. C. C. 213, 80 I. C. C. 179. Moreover, confusion would result from application of full combination of locals as certain lines serving many destinations in above territory carry reference to the rule in their tariffs and have not joined in the proposal to cancel the same. Combination Rule on Common Brick, 92 I. C. C. 289.

(cc) Shipments moved during Federal control on combination rates. Certain carriers carried in their tariffs the combination rule which provided a method for constructing through rates made on combination. Other carriers participating in the movement neither participated in tariffs carrying the rule, nor carried a similar rule in their tariffs. HELD: Following Sligo case, 62 I. C. C. 643; 731 I. C. C. 551, rates charged on basis contrary to the rule found inapplicable. Reparation awarded. Bird v. Director General, 92 I. C. C. 494.

(dd) No joint rates were in effect and shipments moved under a two-factor combination. Tariff of one participating carrier carried the combination rule which provided a method for constructing through rates made on combination, but did not specifically provide for its use in connection with first component of the through rate. Carrier publishing other factor made no reference to the rule nor carried a similar one in its tariff. HELD: Following Sligo case, 62 I. C. C. 643 and 73 I. C. C. 551, rates constructed in conformity with the rule were legally applicable. Shipments found overcharged and reparation awarded. Minneapolis Steel & Machinery Co. v. Director General, 92 I. C. C. 603.

(ee) No joint rates were in effect and shipments moved under a two-fold combination. Tariff of one participating carrier carried the combination rule which provided a method for constructing through rates made on combination, but did not specifically provide for its use in connection with first component of through rate. Carrier publishing other factor made no reference to the rule nor carried a similar one in its tariff. Contention that above circumstances precluded application of the rule, and to find otherwise would contravene certain provisions of section 6 of the act and of Tariff Circular 18-A, not sustained following Sligo case, 62 I. C. C. 643 and 73 I. C. C. 551. Minneapolis Steel & Machinery Co. v. Director General, 92 I. C. C. 603, 604; National Supply Co. v. Director General, 92 I. C. C. 610, 611.

(ff) Shipments moved under combination rates and charges were collected on basis of separate components. Tariff of one participating carrier contained the combination rule, which provided a method for constructing through rates made on combinations, but other participating carrier made no reference to the rule or carried a similar rule in its tariff. Nor did tariff containing the rule specifically restrict its application so as to render it inoperative in connection with traffic here involved. HELD: Carrier publishing the rule must protect the aggregate rate constructed in conformity therewith, and other carrier is entitled to retain its full local. Refund of overcharges directed. Armour Fertilizer Works v. S. Ry., 93 I. C. C. 186.

(gg) Proposal to restrict application of the combination rule so that it will apply only where all issues publishing factors used in arriving at through rates from origin to destination carry reference to the rule and authorized an affirmative application thereof, found not justified. Carriers made no effort to justify increased rates, which would result in instances where the rule is published in a separate combination tariff and no reference is made there to in connection with one factor of a combination, although such reference is made in connection with other factors. While commission has repeatedly sanctioned efforts to eliminate the rule by publication in its stead of joint or proportional rates, it has denied authority to cancel it where unjustified increases would result. Combination Rule on Lumber, 93 I. C. C. 279.

(hh) The legal effect of the publication of the lower rates under authority of Rule 77 is equivalent to an admission by defendants that the higher rates to intermediate points involved were unreasonable. Producers Refining Co., 69 I. C. C. 403; Pittsburg Crucible Steel Co., 81 I. C. C. 659; and Pacific Grain Co., 85 I. C. C. 710. Reparation awarded. Randall Brothers v. L. & N., 96 I. C. C. 342, 344.

(ii) Rate on sand from Portsmouth, Ohio, to Charleston, W. Va., found unreasonable to extent it exceeded lower rate subsequently established on same commodity from and to same points in accordance with the so-called combination rule. Reparation awarded. Fuller Co. v. Director General, 98 I. C. C. 468.

(jj) It appears sufficient to point out that the combination rule was not applicable when a joint through rate was in effect, nor when one of the factors of the combination rate was a class rate and the other a commodity rate. Bourgoin & Co. v. C. B. & Q. R. R. 107 I. C. C. 376.

(kk) Upon further consideration, findings in original report, 89 I. C. C. 356, to effect that joint rates on gasoline from points in Texas and Oklahoma to destinations in California and Washington were unreasonable to extent they exceeded lower combinations contemporaneously in effect for segments of same movement, modified and changed in accordance with socalled combination rule, reversed and rates found not to have been unreasonable or otherwise unlawful. Complaint dismissed. McLeod v. T. & P. Ry. Co., 100 I. C. C. 219.

(ll) Tariffs of originating lines neither carried nor made reference to the so-called combination rule which provided a method for constructing through rates made on combination, while tariff of other participating carrier made reference thereto. There is no merit in contention that in order to apply this rule each tariff naming the factors of such combination rates should refer to tariff containing the rule. HELD: Principal laid down in Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is controlling, and rates charged were in excess of those applicable. Reparation awarded. Hardwick Stove Co. v. Sou Ry. Co., 100 I. C. C. 409.

(mm) Proposed cancellation of so-called combination rule in connection with rates on cotton and cotton linters, from Louisiana and Arkansas points to points in the South, North, and West, resulting in increased rates to points principally in the Southeast, central territory and trunk-line territory in all instances where the rates through New Orleans, La., a desirable concentration point, are made on the combinations to and from that point under the combination rule, found not justified. Combination Rule on Cotton and Cotton Linters, 101 I. C. C. 63.

(nn) Proposal to cancel application of so-called combination rule in connection with rates on brick and articles taking same rates, and on draintile, from Iowa producing points, including Mason City, Rockford, and Sheffield, to Minnesota basing points, including the Twin Cities and head of the lakes, also Wisconsin points, found not justified. Although the combination rule, designed as a temporary expedient, is undesirable as a permanent tariff rule, carriers publishing one factor of a through rate under which there is substantial movement, should not be permitted to cancel application of the rule to that factor, unless carriers publishing the other factors in the cancellation or in publication of joint through rates. See 89 I. C. C. 219. Combination Rule on Brick and Draintile, 101 I. C. C. 729.

(nna) Proposed cancellation of combination rule on brick and related articles from Texas points to interstate destinations, the effect of which would be to prevent application of a single increase in combination rates which are lower than joint rates, but which would not prevent the application of lower combinations untreated by the rule, found not justified. Carriers made no attempt to justify increases which would result, relying solely upon the short-hauling provision of section 15 (4) of the act, not in point, no attempt here being made to establish joint rates in the first instance. In addition, the commission had condemned the cancellation of combination rules without the substitution of some method of rate publication which would have effect of holding the rates to their former level or to a level which is affirmatively shown to be reasonable. See 81 I. C. C. 745; 93 I. C. C. 614. Combination Rule on Brick, 102 I. C. C. 97.

(nnb) Combination rates assessed on shipments moving from Edmonton and Patricia, Canada, to Chicago, Ill., found inapplicable. Tariff naming rates covering one factor of combination made reference to combination rule which provided a method for constructing through rates made on combination and, by express terms, limited application, to continuous rail shipments. There being an original and continuing intention on part of shippers that cattle should move

through to Chicago, the doctrine of the Settle case, 260 U. S. 166 is controlling, and following principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, shipments were subject to rates made by application of combination rule. Reparation awarded. Chicago Live Stock Exchange v. Director General, 102 I. C. C. 452.

(nnc) Governing tariff specifically provided that through rates made on combination were to be subjected to single increase under General Order No. 28 of director general. Shipments moved under combination rates to each factor of which increase was added. HELD: Following Acme Cement Plaster Co., 81 I. C. C. 298, shipments were overcharged to extent that charges exceeded those which would have accrued by application of single increase to sum of factors. Reparation awarded. Lehigh Portland Cement Co. v. Director General, 102 I. C. C. 617.

(oo) Publication of or reference to the combination rule which need not be made in each tariff naming a factor of the combination, is a holding out of a manner of making rates on through shipments which the carrier publishing or making reference to the rule must protect. Pacific Coast Shippers Asso. v. Director General 109 I. C. C. 166, 167.

(pp) Where one of the carriers comprised in the through route authorizes by its tariff the use of the combination rule there is a holding out to the shipper by that carrier of a through rate constructed in accordance with that rule, which that carrier must protect. Ladd Lime & Stone Co. v. L. & N. R. R. 109 I. C. C. 251, 252.

ALL OTHER CITATIONS

Cancellation of Rule for Combination Rates, 85 I. C. C. 101.

§20½. Concurrences.

See Class Rates §2 (3k).

(a) Although the combination rule, designed as a temporary expedient, is undesirable as a permanent tariff rule, carriers publishing one factor of a through rate under which there is substantial movement, should not be permitted to cancel application of the rule to that factor, unless carrier publishing other factors join in the cancellation or in the publication of joint through rates. Cancellation of Combination Rule on Petroleum, 73 I. C. C. 146. Combination Rule on Box Shooks, 89 I. C. C. 219, 220, 221.

(b) Where carriers under Federal control publish the so-called combination rule, which provides a method for constructing through rates made by use of combinations and tariffs do not restrict its application to Federally controlled lines, there is a holding out to shippers of the rate so constructed which publishing carriers must protect, and principle laid down in the Sligo case, 62 I. C. C. 643, 73 I. C. C. 555, applies. This situation is applicable to shipments moving to points on nonfederally controlled lines, even though such carriers do not concur in the rule or carry a similar rule in their tariffs, and is equally applicable to intrastate shipments moving during Federal control. McCloud River Lumber Co. v. Director General, as Agent, 89 I. C. C. 645, 647.

(c) Upon general investigation on commission's own motion of interstate class rates and l. c. l. commodity rates within southern territory and between southern and official territories. FOUND: Joint rail-water-rail class rates between interior points in eastern territory and interior points in southern territory are necessary and desirable in public interest and should be established, in lieu of present noncurrence rates, between such points in all cases where maximum reasonable rail-water-rail rates are herein prescribed. Southern Class Rate Investigation, 100 I. C. C. 513, 683.

§21. Intermediate Clause.

See Supra §20a; Tariffs §13a.

(a) The application to the shipment of the through rate—which is often less than the sum of the intermediate rates in and out of the point of original destination—is the distinctive feature of reconsignment, and separates it from reshipment, which is otherwise quite similar. Any consignee has a right to reship goods received by him, without removal from the car, upon payment of the freight charges to that point, the goods going forward under a new transportation contract. When the through rate is equal to the sum of the intermediates in and out, reconsignment and reshipment differ only as to the rules applicable to them particularly the rules found in the demurrage codes of the carriers. Stetson Cutler & Company v. N. Y. N. H. & H. R. R., 91 I. C. C. 3, 4.

(b) Proposed modification of rules governing intermediate application of rates on lumber and articles taking same rates from stations on the St. L.-S. F. Ry. between St. Louis and Springfield, Mo., to Missouri River cities and certain points beyond, for purpose of eliminating application of St. Louis rates from such points found not justified. Combination rates which would result would be in line with rates from points in surrounding territory to same destinations, but because of maintenance of lower rates from St. Louis to points beyond Missouri River, would violate the long-and-short-haul provision of the fourth section. Intermediate Rule on Lumber, 92 I. C. C. 153.

(c) Contention that lower rate from Lake Charles, La., a more distant point than Columbia, La., on traffic moving to Howard, Kans., was subject to rule 77 of Tariff Circular 18—A, which authorizes establishment of rates from intermediate points not exceeding that from next more distant station, not sustained, since application tariffs carrying lower rate from Lake Charles provided specific routing under which Columbia was excluded. Transcontinental Oil Co. v. A., T. & S. F., 92 I. C. C. 285.

(d) Shipments moved under combination rates and charges were collected on basis of separate components. Tariff of one participating carrier contained the combination rule, which provided a method for constructing through rates made on combinations, but other participating carrier made no reference to the rule or carried a similar rule in its tariff. Nor did tariff containing the rule specifically restrict its application so as to render it inoperative in connection with traffic here involved. HELD: Carrier publishing the rule must protect aggregate rate constructed in conformity therewith, and other carrier is entitled to retain its full local. Refund of overcharges directed. Armour Fertilizer Works v. S. Ry., 93 I. C. C. 186.

(e) Shipments moved under combination rates. Tariff governing second component carried the combination rule which provided a method for constructing through rates made on combination. Tariff of originating carrier carried no similar rule, nor made reference to any tariff in which such rule was carried. HELD: There was a holding out to shipper of rates constructed in accordance with the rule which publishing carrier must protect. See Sligo case 62 I. C. C. 643. Reparation awarded. California Cotton & Factorage Co. v. Director General, 93 I. C. C. 260.

(f) Proposal to restrict application of the combination rule so that it will apply only where all issues publishing factors used in arriving at through rates from origin to destination carry reference to the rule and authorize an affirmative application thereof, found not justified. Carriers made no effort to justify increased rates which would result in instances where the rule is published in a separate combination tariff and no reference is made thereto in connection with one factor of a combination, although such reference is made in connection with other factors. While commission has repeatedly sanctioned efforts to elimate the rule by publication in its stead of joint or proportional rates, it has denied authority to cancel it where unjustified increased rates would result. Combination Rule on Lumber, 93 I. C. C. 279.

(g) Rate on peaches from Fort Valley, Georgia, to Watuppa, Mass., found not unreasonable, discriminatory or unduly prejudicial as compared with rate in effect at time of movement from Eufaula, Ala., a farther distant point to which Fort Valley is directly intermediate over route of movement, or with lower rate established after shipment moved. Existence of the fourth-section departure, protected by an appropriate application, is not in itself proof that rate from Fort Valley was unreasonable. The subsequent reduction was part of a voluntary general reduction in rates from Georgia to New England points, made at request of shippers in order to enable them to meet adverse marketing conditions. Under the circumstances it can not be regarded as implying any admission on part of carriers that prior rate was unreasonable. Gentile Bros. Co. v. C. of G. Ry., 93 I. C. C. 328.

(h) Former report, 81 I. C. C. 745, in which proposed cancellation of the combination rule for constructing combination rates on lumber between southern points and Ohio and Mississippi River crossings, and proposed restriction of routing over Atlantic Coast Line from southern points to Virginia gateways were found not justified, affirmed upon reargument. Carriers made no attempt to justify increased rates which would result; moreover the tariff provision does

not fully conform to requirements of section 6 of the act and is objectionable in that restriction proposed makes necessary a search of other tariffs in order to determine whether there are joint rates over any route before it can be determined whether the combination rule is applicable. Cancellation Rule for Combination Rates, 93 I. C. C. 614.

(i) The commission has no desire to continue indefinitely operation of the so-called combination rule, but on contrary feels that carriers should use all due diligence in eliminating that rule from their tariffs, as it is not a desirable method of publication or one which fully meets requirements of section 6. Cancellation Rule for Combination Rates, 93 I. C. C. 614, 615.

(j) Tariffs of originating lines neither carried nor made reference to the so-called combination rule, which provided a method for constructing through rates made on combination. Tariffs of other participating carriers either carried the rule or made specific reference thereto. The rule, however, restricted its use to lines under Federal control and since originating carriers were nonfederally controlled, the rule laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, that there is a holding out to shipper of the rate constructed in conformity with the rule which publishing carrier must protect, is not controlling. Combinations, both factors of which were increased under General Order No. 28 of the director general, found to have been legally assessed. Pendleton & Gilkey v. Director General, 95 I. C. C. 699.

(k) Shipments moved under combination rates both factors of which were increased under General Order No. 28 of the director general. Tariff of initial line did not contain the so-called combination rule, which provided a method for constructing through rates made on combination, nor did tariffs naming the separate factors refer one to the other. The combination rule, however, was contained in a supplement governing one of the factors. HELD: Principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, applied and but a single increase should have been added to the through rate. Reparation awarded. M'Fadden & Bros. Agency v. Director General, 95 I. C. C. 734.

(l) Proposed cancellation of the "intermediate clause" in connection with transcontinental rates on lumber from Pacific coast, Hawley-Truckee, and Arizona groups to destinations in Kansas, Oklahoma, Texas, Iowa, Missouri, Arkansas, Louisiana, Wisconsin, Ohio, West Virginia, New York, and Pennsylvania; also to eliminate Bradford and East Bradford, Pa., from Group K, found not justified. If suspended schedules become effective rates to unnamed intermediate points will become higher than to farther distant points and thereby create new and unauthorized fourth-section departures, and will transfer to Group E certain points geographically located in Group F territory. Lumber from Pacific Coast, 95 I. C. C. 744.

§22. What is Legal Rate.

See Supra §18, §20; Basing Points and Lines §3 (q); Facilities and Privileges §18; Legal Rate; Local Rates and Combinations (xx); Tap Lines; Tariffs §3 (1), §3 (2), §18.

(a) Complainant attacked commodity rate of $5.70 charged on 59 cars of coke shipped during federal control from West Virginia points to Minneapolis as inapplicable. Shipments originated at Carbondale, Longacre, MacDonald, Thurmond and Turkey Mound, W. Va., moving to Manistique, Mich., and Soo Line beyond, charged $3.80 to Manistique and $1.90 beyond. The Soo Line tariff carried a rule for the construction of combination rates on through movements of coke, which provided that the applicable rates should be the sum of the components in effect June 24, 1918, plus an arbitrary amount of 75c whenever the sum of those components equaled or exceeded $3. On that date the rates were $3.10 from Carbondale and Longacre and $3.05 from the other points to Manistique and $1.50 beyond, and on that basis the legal rates for application of these shipments were $5.35 and $5.30. HELD, rates attacked not applicable, but rates of $5.35 from Carbondale and Longacre and $5.30 from the remaining points of origin, shipments overcharged, reparation awarded. Minneapolis Steel & Machinery Co. v. Director General, 92 I. C. C. 603.

(b) Complainant attacked as overcharge rates charged on two cars of lumber shipped Sept. 8 and Oct. 5, 1921 from Falco, Ala., to Manitou Beach and Northville, Mich. Shipments moved over A. F. & G., to Galliver, Fla., L. & N., via Nashville, Tenn., Memphis Junc-

tion, Ky and Evansville, Ind., to East St. Louis, Ill., thence as routed, T. St. L. & W., in connection with P. M., in one instance, and via C. N., in another, to destinations. A rate of 30c was applicable from Falco to Louisville and 24c in effect beyond. This latter rate was not restricted as to routing, and complainant contends that it was applicable over the L. & N., from Louisville, via Amqui, Tenn., Evansville and East St. Louis, and the Louisville combination was applicable over route traversed under rule 5B of tariff circular 18A. Applying the combination rule in Jones U. S. 1, to the Louisville combination, the through rate would become 24c to Louisville plus 6.5c or a total of 49.5c. The Louisville combination was applicable without the necessity of hauling the shipments to Louisville and back to the junction point. HELD, shipments overcharged, reparation awarded on basis of 49.5c. McGowin Foshee Lumber Co. v. A. F. & G. Ry., 95 I. C. C. 451.

(c) Complainant attacked fifth class rates charged in sugar between Mar. 2, and July 28, 1920, from Philadelphia, Pa., and New York to St. Louis, Mo., as illegal. Charged fifth class 50.5c from Philadelphia and 52.5c from New York. Complainant seeks refund to basis of commodity rates of 40 and 42c. The tariff named these rates on sugar to East Mississippi river crossings and St. Louis, Mo., with a note stating that they applied only as proportional rates to East Mississippi river crossings specified, on traffic destined to points beyond, to which no through rates are in effect. There is no restriction on the rates to St. Louis. HELD: Legal rates are 40 and 42c, defendants should refund overcharges, complaint dismissed. National Candy Co. v. Pennsylvania R. R., 101 I. C C. 43.

(d) Complainant formerly shipped intrastate shipments via joint-line interstate routes to obtain benefit of rates lower than those applying intrastate. Carriers subsequently limited application of interstate tariff to interstate traffic. Upon complaint assailing rates charged on shipments moving intrastate via intrastate routes, HELD: Limitation in interstate tariff precluded its application to complainant's shipments. Moreover, commission's jurisdiction over intrastate rates is prescribed by sections 3 and 13 of the act, and it has no authority under the law to pass upon the measure of such rates except as provided in those sections. Nebraska Cement Co. v. C. & N. W., 92 I. C. C. 457.

(e) Rates on steel grinding balls moving water-and-rail from Chrome, N. J., to Ada, Okla., via Galveston, found not unreasonable or in violation of aggregate-of-intermediates clause of section 4 of the act. Tariffs in effect provided for alternative application of maximum rates, whereby rates to Deming, N. Mex., and Clifton, Ariz., would apply if lower than rate to Ada. The Clifton and Deming rates, however, were restricted to routes other than route of movement, and application of the alternative rule was contingent upon specific reference being made to it in connection with rates to destination in the tariff, and no such reference was made in connection with rate to Ada. Moreover, rate from point of origin to Deming was higher than rate to Ada. Oklahoma Portland Cement Co. v. A., T. & S. F., 93 I. C. C. 203.

(f) Rate assessed on petroleum fuel oil from Loftus, Calif., to Bisbee, Ariz., found inapplicable. Applicable rate which exceeded aggregate of intermediates found in contravention of section 4 of the act, and unreasonable to extent it exceeded lower group rate applicable from farther distant points in southern California, which lower rate carriers subsequently extended to Loftus. Reparation awarded. Gilmore Co. v. P. E. Ry., 93 I. C. C. 357.

(g) Shipments of apples and pears moving on through rates may be stopped in transit at points in c. f. a. territory for privilege of storage, regardless of points of origin, provided storage point is on a direct line and directly intermediate between point of origin and final destination. Proposal of the B. & O. to restrict application of joint rates on such commodities stored in transit at c. f. a. points to shipments moving into and out of transit points over its own rails, found not justified. Numerous increases and an abnormal rate situation would result which carrier made no attempt to justify. Storage in Transit of Apples and Pears, 95 I. C. C. 101.

(h) Due to embargo shipments of feldspar from Keene, N. H., to Manchester, Conn., were forwarded over an indirect route to Willimantic, Conn., thence reconsigned to destination. Combination rates assessed found unreasonable, the initial factor to extent it ex-

ceeded lower rate subsequently established and equivalent to 90 per cent of sixth class, the basis maintained by carriers in this territory, and the Willimantic-Manchester factor as compared with rates for entire distance via the direct route and with rates and earnings on numerous comparable commodities for like distances. Reasonable rate for the Willimantic-Manchester factor prescribed and reparation awarded. Orford Soap Co. v. B. & M., 95 I. C. C. 615.

(i) No specific joint rates were published from Petersburg, Va., to Pueblo, Colo. Tariff naming joint rates from Petersburg to Columbus, N. Mex., in which Pueblo was not specified, carried an intermediate-point rule. The joint rates were not restricted to any particular route, nor did the tariff in any way limit movements up to the Pueblo gateway. The route via that gateway was not unreasonable or unduly circuitous, all defendants herein were parties to the Columbus rates, and in connection with other participating carriers made up to the latter point "a line or route" on which Pueblo was directly intermediate. FOUND: Under the circumstances, rates to Columbus were applicable to Pueblo and shipments here involved were overcharged. Reparation awarded. Frazier Saddlery v. M. P. R. R. Co., 96 I. C. C. 1.

(ia) Upon contention of complainant that under Conference Ruling 239 had there been no joint through rate published a lower combination rate would have applied, FOUND: A rate can not be said to be unlawful because under a different state of facts a lower rate would have applied. Refiners Oil Co. v. P. R. R., 102 I. C. C. 249, 250.

(j) Neither through billing, uninterrupted movement, continuous possession by the carrier, nor unbroken bulk, is an essential of a through interstate shipment. These are common incidents of through shipments; and when the intention with which a shipment was made in issue, the presence, or absence, of one or all of these incidents may be important evidence bearing upon that question. But where it is admitted that the shipment made to the ultimate destination had at all times been intended, these incidents are without legal significance as bearing on the character of the traffic. Chicago Livestock Exchange v. Director General 102 I. C. C. 452, 454.

(k) Where there is an original or continuing intention to ship goods from a point in one state to a point in another state the commerce is interstate and its character, as such, is not changed by mere accidents or incidents of billing. United States Finishing Co. v. N. Y. N. H. & H. R. R. 107 I. C. C. 412, 413.

(l) Combination rate assessed on a shipment of lumber from Rose Lake, Idaho, to Danvers, Ill., found inapplicable and illegal to extent it exceeded the rate applicable to both Chicago Heights and Peoria, Ill. Danvers is intermediate between Peoria and Chicago Heights, and while the tariff carrying the rate to these points did not prescribe a specific rate to Danvers, it carried an intermediate clause. The commission has frequently found that if carriers desire to restrict the application of a joint rate to any particular route they should do so by clear and unequivocal language. With no routing restrictions shown in the tariff naming the joint rate sought, the shipment is properly entitled to such rate. Reparation awarded. Rose Lake Lumber Co., Ltd., v. O. S. L. R. R. Co., 100 I. C. C. 221.

(m) Upon contention of complainants that commodity rates in effect when shipments moved were not legally published, in that the tariff did not show proper cancellation of the previous issues, and therefore no through commodity rates were established, leaving the class rates to apply, FOUND: Tariff carrying the rates charged states on its title-page "cancels I. C. C. No. 166," and this is sufficient to constitute cancellation of that tariff in full, notwithstanding an item on another page under the heading "Cancellation" which explains the reason of the noninclusion of rates from or to certain stations which theretofore had been named. Failure to comply with the requirement of the railroad administration that freight-rate authority shall be obtained for all changes in rates of carriers under Federal control does not invalidate the tariff. Nash Spokane Co. v. Director General, 100 I. C. C. 223, 226.

VI. RIGHT TO WITHDRAW OR MODIFY.

§24. In General.

See Infra §26; Supra §9, §14; Advanced Rates §2½ (d), §5 (2) (m), §5 (2½) (i), §5 (6) (b) (j), §7 (6), §17 (p) (ee) (ll) (3g); Commodity Rates §2½ (b), §5 (a) (r) (4j) (4va); Distance Rates §1 (f); Long and Short Hauls §6⅞ (q); Proportional Rates II (e) (i) (q) (u) (w); Rail and Water Rates (j) (aa) (ll); Restricted Rates; State Rates and Regulations (uu); Water Carriers IV.

(a) Proposed cancellation of combination rule in connection with proportional rate from Grand Junction, Colo., to other Colorado points on box shooks and car strips from Pacific coast, found not justified. Carriers publishing joint rates to Grand Junction would be compelled to protect existing through rates and accept a less compensation than the published joint rates; tariffs containing joint rates to Grand Junction and proportional rates beyond would contain conflicting provisions as to application of the combination rule resulting in confusion in application of the through rate; and complications as to division of joint rates would result. Combination Rule on Box Shooks, 89 I. C. C. 219.

(b) Proposed cancellation of provision for free out-of-line haul and transit arrangement at Springfield, Mo., on grain originating at points on St. L.- S. F. Ry. Co. west of Neodesha, Kans., and north of Enid, Okla., and to apply in lieu of present arrangement, the general transit rules which provide for additional charges for out-of-line hauls, found justified. The Frisco's earnings under existing rates are extremely low and it can not continue to permit transit at Springfield at the direct-line rates in view of the additional haul of 174 miles. Moreover, no points are accorded more liberal transit arrangements than Springfield would have if suspended schedules are permitted to become effective. Transit on Grain at Stations in Missouri, 89 I. C. C. 349.

(c) Proposal to restrict joint rates on lumber from Pacific coast points to stations on Copper Range R. R. to shipments handled via C., M. & St. P. Ry. via McKeever, Mich., or delivered to that carrier at Missouri River gateways, found not justified. In justification respondents urge that Copper Range has divisional arrangements with the Milwaukee but none with the Duluth, South Shore & Atlantic, which it connects at Houghton, Mich., and that the Copper Range receives a shorter haul frequently involving the participation of an additional carrier when traffic moves through Houghton. However, under proposed restrictions traffic to the Twin Cities could not be forwarded under joint rates to points on Copper Range because the Milwaukee would not receive shipments at Missouri gateways. Routing on Lumber, 89 I. C. C. 351.

(d) Proposed cancellation of joint rates on oil, crude and fuel, from north Texas points to Louisville, Ky., and Jeffersonville and New Albany, Ind., substituting therefor the lowest combinations and placing those rates on same basis as gas oil, found justified. Crude, fuel and gas oils generally take same rates and crude and fuel oil rates herein under consideration were depressed because of carrier competition. Standard Oil Co. v. M.-K.-T. R. R. Co., 89 I. C. C. 463.

(e) Proposed cancellation of joint rates on coal, from eastern Kentucky and Tennessee and southwestern Virginia to St. Paul, Minneapolis, and Minnesota Transfer, Minn., leaving in effect higher combination rates, found not justified; but guided primarily by transportation considerations, such as distance, and fact that the transportation involves at least a three-line haul, leads to conclusion that a rate somewhat in excess of the present rate has been justified. Cancellation of Coal Rates to Minnesota, 89 I. C. C. 573.

(f) L. & N., and connections proposed to cancel the joint rates applicable on coal moving from districts served by them in eastern and southeastern Kentucky, eastern Tennessee and southwestern Virginia, to St. Paul, Minneapolis and Minnesota Transfer, Minn., in connection with the Rock Island, leaving in effect higher combinations. The usual basis of rates on coal from the Crescents to the Northwest is the combination on the gateway through which the traffic moves. These gateways include Chicago and Peoria, Ill., and the west bank Lake Michigan ports. Combination rates through the several gateways, except Peoria, are generally equal-

ized by the publication of proportional rates. In this case the vital consideration should not become obscured. The Commission should be careful not to permit the consideration of market competition to overshadow fundamental factors. It should be guided primarily by transportation considerations, such as distance, the fact that in the transportation of this coal from eastern Kentucky to the Northwest at least a three line haul is necessary, and generally, in addition, both Ohio and Mississippi river crossings. Giving due weight then, to all these material considerations it is difficult to escape the conclusion that a rate somewhat in excess of $4.86 has been justified. The Commission is not justified in denying the establishment of reasonable rates from eastern Kentucky mines simply because to do so happens to increase the existing differences between the rates from those mines and the rates from southern Illinois mines. The more pertinent consideration is the effect which the continued maintenance of these rates from these particular Crescent mines in eastern Kentucky to less than 7% of the destinations in the Northwest will have upon the level and basis of rates maintained from all the other Crescent mines with which other mines the eastern Kentucky mines are grouped. Eastern Kentucky mines are not to be denied entry to the Northwest markets, but there is no justification for according these mines an undue advantage in rates in order to secure such entry. It is to be observed that other mines and carriers in the Crescents are not urging any change in their present level or basis of rates. HELD, Rates proposed not justified but respondents have justified a rate of $5.40 to the Twin Cities from the origin territory hereinbefore described. Cancellation of coal rates to Minnesota, 89 I. C. C. 573.

(g) Proposed schedules limiting to certain direct routes the application of distance rates on stocker or feeder cattle moving from points on the Texas-Mexican Ry. to Arkansas City, Wichita, and Wichita Union Stock Yards, Kans., the effect of which will be to eliminate admittedly circuitous routes through Coffeyville, Kans., found justified. Livestock between Texas and Kansas Points, 89 I. C. C. 720.

(h) Respondents proposed to change the routing of traffic between Texas and southwestern points, on the one hand, and eastern and New England points on the other, by the cancellation of all class and commodity rates applicable as proportional rates from or to Port Arthur, Tex., and as joint rates in connection with rail lines, of the Transmarine Corporation, a steamship line operating between Port Newark, N. J., and Port Arthur, and the substitute Beaumont, Tex., for Port Arthur as a port of call for its vessels, the proposed schedules to name the same proportional rates to or from Beaumont, and the same rates in connection with the same and other rail carriers operating to and from Beaumont, as are now maintained to, from, or via Port Arthur. The interior points in the southwest and the eastern and New England territories will not be affected by the proposed cancellation, as the routing on through traffic will only be charged from "via Port Arthur" to "via Beaumont". The change in rates that will occur will be the cancellation of the rates to or from Port Arthur, and the substitution in the future of increased rates to or from Port Arthur applicable via Beaumont, when in connection with the Transmarine Corporation. HELD, proposed schedules justified. Routing between Texas and Eastern territories, 91 I. C. C. 455.

(i) D. S. S. & A., and Soo Line proposed to eliminate certain southern carriers from their respective tariffs naming joint rates on carbide of calcium, carloads, from Sault Ste Marie, Mich., to various southern destinations, and to cancel certain joint rates mentioned. At present the South Shore publishes joint rates on carbide of calcium from Sault Ste. Marie to Bessemer, Birmingham, Ensley, Fairfield and Mobile, Ala.; Memphis and Chattanooga, Tenn; New Orleans, La., and Pascagoula and Vicksburg, Miss. It is proposed to eliminate as participating carriers the Birmingham Southern, the C. N. O. & T. P., and L. & N., and to cancel the present joint rates, leaving in effect combinations on Cairo, Ill. The Soo Line tariff proposed to eliminate the C. N. O. & T. P., L. & N., M. & L. S., and Southern as participating carriers in the joint rates of 59c to Memphis and 74c to Mobile, New Orleans, Pascagoula, Vicksburg and a few other points. In view of the low level of the joint rates and the fact that it does not appear that the combined commodity rates, which would take their place, would result in unreasonable

charges, HELD, the proposed schedules justified. Carbide of Calcium from Sault Ste Marie, 91 I. C. C. 649.

(j) Respondents proposed to cancel commodity rates on woven wire cloth, carloads, from points in defined territories to certain points in Arkansas. Woven wire cloth, carloads, other than copper, brass or bronze, is rated fifth class, minimum 30,000 pounds, in all three classifications. Copper, brass, and bronze woven wire cloth, carloads, is rated third class, minimum 30,000 pounds. Present commodity rate from St. Louis territory to Little Rock, Ark., is 35c while fifth class rate is 76.5c. Iron woven wire cloth is substantially more valuable than merchant iron, bar iron, horseshoes, and many other commodities earning higher car revenues. The proposed schedules will increase the rates on woven wire cloth in many instances over 100% and will materially affect the continuance of the manufacture of screen doors and windows at the points where plants are now located. HELD, rates on copper, brass and bronze woven wire cloth may be published not in excess of the proposed rates while rates on iron woven wire cloth from St. Louis territory should not exceed to Fayetteville and Little Rock 56c, to Stuttgart and Benton 57.5c, to Malvern and Pine Bluff 59c, to Fort Smith 60.5c and to Canden 63.5c. Woven wire cloth to Arkansas, 92 I. C. C. 120.

(k) Respondents proposed to cancel joint commodity rates on lumber, carloads, from stations on the A. C. Ry., A. T. & N. Ry., B. S. & M., and W. & C. Ry. to points on the C. & O., Ashland, Ky., to East Huntington, W. Va., and to cancel the route via the M. & O., in connection with joint rates on the same commodity to the same destinations from points on the G. M. & N., and J. & E., and to restrict the routing in connection with joint rates on the same commodity to such destinations from stations on the D. & W., M. & A., M. E., M. & O., so that they will apply only via Rives, Tenn., and the I. C., and C. & O., or via Humboldt, Tenn., and the L. & N., to Louisville and C. & O., beyond. All of the origin points are located south of the C. & G., Ry., which extends from Greenville, Miss., through Winona, Miss., to West Point, Miss. The cancellation of joint rates from stations on the A. C., A. T. & N., B. S. & M., and W. & C., to the Huntington group would leave in effect full combination rates and would result in higher rates to Ashland and Huntington than to points immediately beyond. The rates proposed are the same as those which now apply to points on the C. & O., Wilson, W. Va., to Elk, W. Va., which is the next group of destination points east of East Huntington. The rates to points on the C. & O., both east and west of the Huntington group, are constructed generally on the combination basis. With respect to the cancellation of routing via the M. & O., in connection with joint-rates on lumber from points on the G. M. & N., and J. & E., respondent seems to be dissatisfied with the divisions it receives out of the joint rates. HELD, respondents have not justified the proposed schedules. Lumber from Alabama and Mississippi points, 92 I. C. C. 156.

(l) Respondents proposed to cancel the application of the so-called Kelly rule combination published in Jones I. C. C. U. S. 1 in connection with the rates on cotton and cotton linters contained in certain tariffs applying from points in the south and southwest to various destinations in the North and East. The proposed cancellation is with respect to the rates on cotton and cotton linters from the south and southwest to destinations principally north of the Ohio and Potomac rivers. The combination rule as applied to cotton and cotton linters may be objectionable, but that alone does not justify its cancellation which will result in higher rates in innumerable instances. HELD, proposed schedule not justified. Combination rule on cotton and cotton linters, 92 I. C. C. 165.

(m) Respondents proposed to restrict the application of the socalled Kelly rule, in connection with rates on lumber and other forest products from Ohio and Mississippi river crossings, Chicago, Ill., and related points, to destinations in central and western trunk line territories, when used as factors of combination rates. The suspended provision represents a new attempt on the part of the carriers to avoid the consequences of the lawful, although unintended and unforseen, operation of the combination rule. It would cancel the application of the combination rule in so far as traffic moving under such instances is concerned, and would thus increase present rates. The Commission has repeatedly sanctioned the carriers efforts to eliminate

that rule by the publication in its stead of joint or proportional rates, but have denied authority to cancel it where unjustified increased rates would result. HELD, suspended rates not justified. Combination rule on lumber, 93 I. C. C. 279.

(n) Respondents proposed to establish joint rates on cedar lumber and cedar shingles from north Pacific coast points to southern points as provided in Countiss tariff I. C. C. 1136. The proposed rates would result in both increases and reductions in the present rates but do not reflect the lowest available combinations now in effect. No evidence was offered in support of the suspended schedules. HELD, proposed rates not justified, but tariffs may be published providing for rates not in excess of the lowest available combination. Lumber and shingles from North Pacific coast to southern points, 93 I. C. C. 501.

(o) Respondents proposed, by an exception to the applicable tariffs, to prevent the Salt Lake & Utah from participating as an intermediate carrier in traffic from eastern transcontinental groups to Arizona, British Columbia, California, Idaho, Mexico, Montana, Nevada, New Mexico, Oregon and Utah, on respondents lines. Protestant operates an electric line extending from Salt Lake City to Payson, Utah, 67 miles. Protestant transports freight, express, mail and passengers between points on its lines. It has a connection at Provo, Utah, with the D. & R. G., by means of a direct interchange, and with the L. A. & S. L., and with the Utah Ry by means of a switching movement performed by the D. & R. G. At Salt Lake City protestant has a direct connection with respondent which performs the switching movement for protestants interchange with all other roads entering Salt Lake City. The record indicates that if protestant is eliminated from the through routes on traffic which moves into Salt Lake City over respondents lines there will be an increase in rates over that route to points on protestants line. Rates to those points are not named specifically but apply over that route under an intermediate application clause and elimination of protestant from the through route will make this clause inapplicable in connection with shipments to those points. Respondent has offered no justification for any increases in those rates. The record shows that a great amount of transcontinental traffic solicited by general agents of protestant will not originate on the lines of respondent but will be delivered to respondent at Omaha and that respondent will participate in such traffic only as an intermediate carrier. HELD, suspended schedules not justified. Routing via Salt Lake & Utah R. R., 95 I. C. C. 237.

(p) Respondents proposed to cancel joint commodity rates on cotton linters, carloads, delivered to carrier uncompressed, to go through to destination uncompressed, from Texas and Oklahoma to Indianapolis, and Marion, Ind., leaving applicable higher combination rates If the suspended schedules are allowed to become effective the lowest combination to Cleveland, Detroit and Boston would make on Chicago and not on East St. Louis, and the combinations on both Chicago and Danville would be lower than the present joint rates to Buffalo and Pittsburg. The rates to Chicago are in the main unrestricted as to routing and this traffic may move through either Indianapolis or Marion to that point. The proposed cancellation of the joint rates to Indianapolis and Marion would, therefore, result in fourth section violations. HELD, suspended schedules not justified. Cotton linters to Indiana points, 95 I. C. C. 514.

(q) Respondents proposed to cancel joint rates on lumber, carloads, from Alabama served by the A. T. & N., and by the W. & C., to certain points in Dominion of Canada. A. T. & N., is a short line of railroad which extends from Calvert, Ala., northward through York, Ala., to Reform, Ala. Calvert is 35 miles north of Mobile, Ala., on the Southern; 113 miles north of Calvert is York, where the A. T. & N., connects with the Southern and Reform is 73 miles north of York. Respondent participates in joint rates from points on several independent short line connections in the immediate vicinity of the A. T. & N., and although the tariffs publishing these rates are described as applying from Mississippi valley territory as distinguished from southeastern territory, two of these short lines, the Alabama Central and Birmingham Selma & Mobile, connect with respondents Montgomery branch east of the A. T. & N. The proposed schedules would result in undue prejudice to shippers of lumber on the A. T. & N., and the Choctaw, and in un-

due preference of their competitors, who continue to enjoy joint rates participated in by respondent. HELD, suspended schedules not justified. Lumber from Alabama to Canadian points, 96 I. C. C. 709.

(r) C. M. & St. P. Ry., respondent proposed to cancel certain proportional class rates applicable from Rock Island, Ill., and Davenport, Ia., to Iowa destinations on its lines. From points east of the Indiana Illinois state line to destinations in Iowa on respondents lines one route is over various lines to Peoria, Ill., thence C. R. I. & P., to Davenport and respondent beyond, known as the Peoria route. Another route between the same points is over various lines to Chicago, Ill., thence over respondents lines through Sabula, Iowa, north of Davenport. This route will be known as the Chicago route. The through rates over the Peoria and the Chicago routes are combinations of flat rates to Davenport or Sabula and proportional rates beyond. The proposed schedules would increase the combination over the Peoria route, which is 9c less than over the Chicago route, and would increase the rate 9c on shipments diverted to the Chicago route when moving on the Sabula combination. Respondents purpose is to secure to itself, between Chicago and Sabula, the haul east of the river that now goes to the Rock Island between Peoria and Davenport. HELD, proposed schedules not justified. Proportional rates from Upper Mississippi crossings, 96 I. C. C. 715.

(s) Proposed cancellation of commodity rates on boots and shoes from various New York points to trunk-line and New England territories and application of higher class rates in lieu thereof, found not justified. Only justification assigned for proposed cancellation to Boston, Mass., is that New England carriers requested that this be done in order to prevent its extension to other points, while cancellation to such points as Philadelphia, Richmond, and Norfolk is proposed in order to satisfy a complaint of Baltimore, Md., for removal of unjust discrimination. However, present rates have been long in effect, have evidently been satisfactory to carriers, and it was not shown that there has been such change in condition as to warrant adjustment sought, or that present rates are unremunerative or unreasonably low. Boot and Shoes from New York Points, 91 I. C. C. 591.

(t) Proposed withdrawal of certain southern carriers from participation in joint rates on carbide of calcium from Sault Ste. Marie, Mich., to various southern points, and cancellation of joint rates to Birmingham, Ala., rate points and to Chattanooga, Tenn., leaving higher combination rates in effect, found justified. present joint rates are subnormal as compared with rates from other producing points, and proposed rates compare favorably with rates for like distances from Sault Ste. Marie and other producing points to destinations in Alabama, Georgia and Tennessee, to which commodity rates are published. Carbide of Calcium from Sault Ste. Marie, 91 I. C. C. 649.

(u) Proposed cancellation by International-Great Northern R. R. Co. of its participation in rates on Cotton and cotton linters from the Southwest, via rail-and-water, to eastern points, when moving through New Orleans, La., which would result in substantial increases, prevent movement to New Orleans, and thereby increase movement through Texas ports, found not justified. Only justification shown is that respondent serves Texas ports more directly than it serves New Orleans, that there is an additional haul beyond its lines to move cotton through New Orleans, and that it desires to retain all revenues accruing out of joint rates for rail haul from points of origin to ports. Cotton and Cotton Linters from Southwest, 91 I. C. C. 717.

(v) Respondents proposed to make numerous changes in rates, fares and charges between, from, to, and via points in Arkansas, Louisiana, Mississippi and Alabama over the so-called Natchez route. The Natchez route extends from Hope, Ark., and Shreveport, La., over the L. & A., to Vidalia, La., where it uses the ferry of the M. P., over the Mississippi river to Natchez, Miss., thence over Mississippi Central to Hattiesburg, Miss., the B. & H. S. to Beaumont, Miss., and G. M. & N. to Mobile, Ala. The distances are from Shreveport to Mobile, 547 miles, Natchez to Mobile, 246 miles, from Natchez to Hattiesburg, over the Mississippi Central, 150 miles, Hattiesburg to Beaumont over the B. H. & S., 27 miles, Beaumont to Mobile over the G. M. & N., 69 miles. At the time of the hearing the B. H. & S., and the

G. M. & N. were hauling carload freight between Hattiesburg and Mobile for the account of the Mississippi Central without any agreement with respect to the compensation therefor. Under the schedules now in effect the Mississippi Central technically offers or concurs in transportation at stated charges from and to points east of Hattiesburg which it neither reaches nor serves by trackage arrangements with its connecting lines. Respondents purpose in filing the schedules here under suspension was to remove this anomaly. None of the interested carriers has shown any disposition to impede the free movement of through traffic over the Natchez route between Shreveport and Mobile, as it has existed since Jan. 19, 1925, The three principal companies apparently regard as futile any further attempts to arrange for joint operations by the Mississippi Central into Mobile. Apparently, none of them desires any joint or dual operations and none contemplates filing a supplemental petition. The most important tariff changes occasioned by the discontinuance of the Mississippi Centrals freight service to and from Mobile are those in which numerous respondents, at the request or upon the instructions of the Mississippi Central, propose to cancel through routes and joint rates on lumber. They propose to transfer the Hattiesburg branch stations from the Mississippi Central to the B. & H. S. list, to eliminate all routes over the Miss. Cent. via Mobile and connections to the Ohio river and central territory, leaving other more direct routes available with no increases in rates. Like changes are proposed in rates on lumber to the middle eastern mining district, canceling rates to points on the L. & N. to which no other routes are open. The routes through Mobile to these destinations are indirect, in some instances circuitous, and the public interest does not require their continuation. HELD: Suspended schedules justified except the Miss. Cent. has failed to justify the reasonableness of the combination rates which would result from the proposed cancellation of its rates on lumber from points on its line to Mobile. It proposed a joint rate of 14c for the future. The public interest requires the publication and maintenance of joint rates on lumber from points on that line west of Hattiesburg over the B. & H. S. and G. M. & N. to Mobile. HELD: Further, following rates will be reasonable on lumber to Mobile: Brookhaven to Tallahala, but not including Hattiesburg, 13c and west of Brookhaven, to and including Natchez, 14c. Reasonable divisions will be 5.5c to G. M. & N., 2.5c to B. & H. S., remainder to Miss. Cent. Cancellation of Rates and Routes via Miss. Cent., 100 I. C. C. 71.

(w) Respondents proposed to cancel joint rates on coal, carloads, from Mines on the Brazil branch of the C. I. & W. to numerous destinations and to eliminate the C. A. & S. from participation in the joint rate to Chicago and other points. The C. & E. I. had published a tariff August 10, 1919, carrying joint rates on coal. When the C. I. & W. took over the Brazil branch it adopted this tariff so far as it applied from or to points on the Brazil branch. Previously the rate to Chicago was restricted to the C. & E. I., but the C. I. & W. made it applicable over all routes of participating carriers. On Oct. 29, 1923, the C. A. & S. was added as a participating carrier and so the Chicago rate became applicable via West Melcher, the C. A. & S., Morocco and N. Y. C., which makes the short line distance. The elimination of the C. A. & S., as a participating carrier was due solely to the dispute over divisions. The dispute over divisions affords no grounds for eliminating the C. A. & S. as a participating carrier to any of the destinations. HELD: Schedules not justified. Coal from Indiana Mines, 100 I. C. C. 350.

(x) Respondents proposed to cancel the application of the so-called Kelly combination rule published in Jones I. C. C. U. S. 1, in connection with the rates on cotton and cotton linters from Louisiana and Arkansas to destinations in the south. The proposed cancellation would increase the rates 18c per 100 pounds on cotton and cotton linters from Arkansas and Louisiana points to points principally in the southeast, central territory, and trunk line territory in all instances where the rates through New Orleans are made on the combinations to and from that point under the so-called Kelly combination rule. HELD: Proposed schedules not justified. Combination Rule on Cotton and Cotton Linters, 101 I. C. C. 63.

(y) Respondents proposed to cancel present joint rates on lumber, carloads, from certain points on the main line and branches of N. & W., respondent, in southwestern Virginia, West Virginia and Tennessee over routes through Kenova,

W. Va., and other western gateways, including Buffalo, N. Y., to trunk line and New England territories, with the result that higher combinations would become applicable. Two sets of joint thru rates on lumber are in effect from and to the points considered. One set applies via eastern junction points, Hagerstown Md., Shenandoah Jct., W. Va., and Norfolk, Va. These rates are from 6 to 9c lower than those in the other set applicable over the so-called western routes via Kenova and other junctions including Buffalo. In connection with traffic moving from the points here dealt with the latter routes are materially longer than the former. The rates which it is proposed to cancel are of many years standing and are not shown to be unreasonably low. The sole justification of-Chicago was restricted to the C. & E. I., fered for their cancellation is that there to justify the expense of continuing them in the tariffs. HELD: Suspended schedules not justified. Lumber from Virginia, West Virginia to East, 101 I. C. C. 727.

(ya) Proposed cancellation of commodity rates on furniture, c. l. and l. c. l. from and to points in c. f. a. territory and substitution therefor of classification basis and in certain instances exception basis, which would result in both advances and reductions, found not justified except as to l. c. l. traffic. Proposed cancellation while at same time continuing relatively lower commodity basis from producing points in adjoining territories would seriously disturb long-standing and important relationships, and create undue prejudice against southern Indiana manufacturers. Furniture from C. F. A. Territory, 92 I. C. C. 97.

(z) Proposed cancellation of proportional commodity rate on strawboard from Delphi and Lafayette, Ind., to upper Mississippi River crossings, leaving in effect rates 90 per cent of sixth class, found not justified. Resulting increased through rates to points west of Mississippi River would not conform to relationship with rates from Chicago group to same destinations, prescribed in Indiana Public Service Commission. 88 I. C. C. 728. Strawboard from Delphi and Lafayette, 92 I. C. C. 113.

(aa) Proposed cancellation of special commodity rates on woven-wire cloth from points in defined territories to points in Arkansas, leaving higher class rates in effect, found justified as to copper, brass, and bronze woven-wire cloth, but not justified as to iron woven-wire cloth. In many instances proposed schedules would increase rates on iron woven-wire cloth over 100 per cent, result of which would be to materially affect continuance of manufacture of screen doors and windows at points in Arkansas where plants are now located and which have built up and fostered the industry under the present commodity rates. Woven-Wire Cloth to Arkansas, 92 I. C. C. 120.

(bb) Proposed cancellation of routing via M. & O. R. R., in connection with joint rates on lumber from points on the Gulf, Mobile & Northern, and Jackson & Eastern to points on the C. & O. Ry., found not justified. Only justification offered was that there is not enough revenue in the business to pay for handling, the M. & O. apparently being dissatisfied with divisions it receives out of the joint rates. Lumber from Alabama and Mississippi Points, 92 I. C. C. 156.

(cc) Proposed cancellation of joint commodity rates on lumber from points in Alabama and Mississippi to points on the C. & O., which would leave in effect full combination rates and result in rates to Ashland, Ky., and Huntington, W. Va., higher than to points immediately beyond, found not justified. Lumber from Alabama and Mississippi, 92 I. C. C. 156.

(dd) Proposed cancellation of transit privileges by M.-K.-T. R. R. of Texas on grain originating on or moving via the C., R. I. & P. and C., R. I. & G., found not justified. Sole justification offered by respondent is demand of the Rock Island for proportion of the rate from origin to transit station, instead of division from origin to ultimate destination, but a dispute among carriers over divisions is no justification for increased rates. The Rock Island is a party to the joint through rates under which transit is accorded and is not concerned with transit privileges accorded by respondent, as transit privileges are local to carrier according them. Transit Privileges on Grain, 92 I. C. C. 161.

(ee) Proposed withdrawal of D., L. & W., Erie, and Lehigh Valley from participation in through joint lake-and-rail and rail-lake-and-rail rates from and via various Great Lakes ports to points on certain of their eastern connections, which will result in increased rates via such routes, found justified except as to

routes the continuance of which is necessary and desirable in the public interest. Purpose of proposed withdrawal is to throw burden of handling traffic upon carriers who are able to handle it most expeditiously and economically, and proposed restrictions will not leave any destination territory without a practicable route. Lake and Rail Rates to Eastern Destinations, 92 I. C. C. 183.

(ff) Proposed elimination of wire, nails, and staples from list of iron and steel articles permitted to be shipped in mixed carloads, for purpose of making tariffs in southwestern territory uniform, found not justified. Respondents' endeavor is prompted by request of parties who desire an adjustment that will force movements through Texas jobbers. Increased rates can not be justified solely upon showing of desire for uniformity in tariff provisions. Moreover, shippers or dealers, whose interests are not to be considered subordinate to others, avail themselves of mixtures now in effect, and desire of other dealers to bring about purchases from them is no warrant for increasing transportation burden to be borne by consumers. Iron and Steel Articles to Southwest, 93 I. C. C. 31.

(gg) Proposed cancellation of joint commodity rates on cement plaster from Pyramid and Sweetwater, Tex., to certain destinations on the St. L.-S. W. Ry., leaving in effect higher combinations, found not justified. The joint rates were published contrary to instructions and sole justification offered is carrier's desire to correct this error. However, no rate change is proposed from competing points at which cement-plaster plants are located, and such a rate disadvantage would exclude protestant from markets at local Cotton Belt points. While protestant would be able to reach competitive points at equal rates, it would not enjoy as liberal routing privileges as its competitors. Moreover, protestant is as favorably situated with respect to distance as are its competitors, and no reason appears why it should not have same basis of rates. Cement Plaster from Pyramid and Sweetwater, 93 I. C. C. 315.

(hh) Proposed joint rates on cedar lumber and shingles from north Pacific coast points to southern points, which would result in both increases and reductions, the former predominating, but not reflecting lowest available combinations now in effect, found not justified. Lumber and Shingles from North Pacific Coast, 93 I. C. C. 501.

(ii) Proposal to cancel joint commodity rates on cotton linters, uncompressed, from points in Texas and Oklahoma to Indianapolis and Marion, Ind., leaving in effect higher combinations based on upper Mississippi River crossings, found not justified. Present rates on this traffic to Indianapolis and Marion are the same as to Chicago, to which point they are intermediate over certain routes through East St. Louis, and proposed rates would result in violations of the long-and-short-haul clause of section 4 of the act. Cotton Linters to Indiana Points, 95 I. C. C. 514.

(jj) Proposal to cancel rates and minimum weights on wooden hoops from Group C points to western destinations and establish higher rates based upon lower minima, in compliance with carriers' interpretation of the commission's order in Ozark Cooperage & Lbr. Co., 91 I. C. C. 329, found not justified. Reasonableness of the rate was not in issue in the case cited and in pointing out that carriers should not protect themselves from unduly lower charges per car by prescribing minimum weights which can not be loaded in ordinary equipment available the commission merely intended to dispose of a contention that the minimum assailed was justified because earnings under the rate applicable in connection therewith were less than reasonable. The commission did not intend to sanction an increase in rates. Carriers do not contend here that present rates are unreasonable and offered no justification of the proposed rates which reflect substantial increases. Wooden Hoops to Western Destinations, 95 I. C. C. 519.

(kk) Proposal to cancel application of wrought-iron pipe commodity rates on iron or steel sucker and pull rods from St. Louis and points in c. f. a. territory to destinations in Kansas and Missouri, leaving in effect higher class rates, found not justified. Pull rods and sucker rods have hitherto been accorded same rates and no justification was offered for the proposed rates under which rates on pull rods would be materially higher than on sucker rods. While evidence indicates that present rates are in need of revision and that present relationship of these rates with those to Oklahoma points results in prejudice to localities

in the latter territory, the class rates proposed would result in some instances in rates higher than those to Oklahoma points and considerably higher in many cases than those proposed by carriers in a pending proceeding. Sucker and Pull Rods from St. Louis, 95 I. C. C. 599.

(ll) Proposed adjustment of joint rates on soapstone or talc, crude or ground, from points in North Carolina to points located principally in central territory, which would result in both increases and reductions, the former predominating, found not justified with respect to increases. Present rates are based on proportionals on talc to Ohio River crossings, plus proportionals on Georgia clay beyond. Proposed rates base on same proportionals to Ohio River and 80 per cent of sixth class beyond, except to Chicago and Milwaukee. In 95 I. C. C. 704, rates on talc from Hemp, N. C., to East St. Louis and Vandalia, Ill., were found unreasonable to extent they exceeded substantially present basis. Schedules ordered canceled without prejudice to filing of new ones publishing the reduced rates. Soapstone or Talc from North Carolina, 96 I. C. C. 191.

(mm) Proposed cancellation of joint rates on lumber from points in Alabama served by the A., T. & N. and the Washington & Chotaw, two shortline carriers, to certain Canadian points, which would result in the application of higher rates, found not justified. Lumber from Alabama to Canadian Points, 96 I. C. C. 709.

(nn) Proposed cancellation of joint rates on lumber, from points in Alabama, served by the A., T. & N. and the Chotaw, two short-line carriers, to Canadian destinations would result in undue prejudice to shippers of lumber on those lines, and in undue preference of their competitors, who will continue to enjoy joint rates participated in by the Mobile & Ohio. Lumber from Alabama to Canadian Points, 96 I. C. C. 709, 710.

(oo) Proposed joint rates to Omaha, Nebr., via Kansas City lower than the existing combinations on intermediate markets on grain, grain products, and articles taking same rates, in carloads from points in Minnesota, Iowa and Missouri on the Chicago Great Western and certain connecting short lines, to destinations in Texas, found to result in undue prejudice to Omaha and undue preference of Kansas City in so far as the carriers interested may participate in the movement via both gateways and maintain transit service at both, but in all other respects to have been justified. Grain to Texas, 96 I. C. C. 727.

(pp) Proposal to cancel interstate commodity rates on iron and steel articles from certain points on W. & L. E. in Ohio to destinations on P. & L., E. in Ohio and Pennsylvania, and to apply the higher fifth-class rates in lieu thereof, found not justified. The fact that the class basis is maintained over other lines from and to points involved is not controlling. Iron and Steel Articles from Ohio to Pennsylvania Points, 98 I. C. C. 151.

(qq) Following 73 I. C. C. 396, and other cases cited, proposed cancellation of numerous l. c. l. and any-quantity commodity rates from points in southeastern and Carolina territories to destinations in Mississippi Valley, leaving effective generally higher-class rates, found justified, except as to such rates on marble, granite and stone. This adjustment will place l. c. l. shippers on an equality and at the same time correct fourth-section departures. Commodity Rates between Points in Southern Territory, 98 I. C. C. 627.

(qqa) Proposal to cancel l. c. l. commodity rates on clean rice from, to, and between points in southern territory, designed primarily for purpose of bringing about uniformity and to remove discriminations, leaving in effect higher class rates, found not justified. Rates on basis of those approved in Southern Class Rate Investigation, 100 I. C. C. 513, approved. Rice between Points in Southern Territory, 102 I. C. C. 79.

(qqb) Proposal to increase rates on potatoes from Michigan, Minnesota, and Wisconsin groups to Jellico, Knoxville, and Birmingham, by cancelling joint through rates, leaving in effect higher Ohio River combinations, and designed to correct a maladjustment, escape widespread reductions, remove discriminations, and comply with the long-and-short-haul rule, found not justified. Joint commodity rates on heavy traffic moving long distances are usually less than combinations, and on potatoes joint rates are maintained from Texas and the northern groups here involved to other Mississippi Valley points. Joint rates have been car-

ried in these tariffs and reissues thereof for the past 15 years. Moreover, carriers were expected to revise commodity rates somewhat in line with distance class rates prescribed in 100 I. C. C. 513, 663, and neither the through rates nor combinations here in issue conform to any distance standard. Potatoes from Alabama and Tennessee, 102 I. C. C. 183.

(qqc) Proposal to increase rates on potatoes, c. l., from certain groups in Michigan, Minnesota and Wisconsin to Jellico and Knoxville, Tenn., and Birmingham, Ala., by cancellation of joint through rates and application of Ohio River combination rate, for the avowed purpose of correcting maladjustment, establishing a uniform and non-discriminatory basis of rates to southeastern territory, and complying with long-and-short-haul rule, found not justified. Upon contention by respondents that joint rates to destinations here involved were published in error and that southern carriers' attention was only recently directed to these joint rates by the commission's refusal to longer permit fourth-section departures by the maintenance of higher rates at intermediate points than to Birmingham, Jellico, and Knoxville, HELD: These tariffs have been reissued many times during the past 15 years, and the joint rates have been carried in all of them. Suspended schedules ordered cancelled and proceeding discontinued. Potatoes to Alabama and Tennessee, 102 I. C. C. 183.

(qqd) Proposed cancellation of commodity rates on tanning extract from Norfolk and Newport News to Memphis, Chicago, and other destinations in c. f. a. territory, leaving in effect higher class rates, found not justified. Suspended schedules would create departures from long-and-short-haul provisions of fourth section of the act. Tanning Extract from Norfolk and Newport News, 102 I. C. C. 196.

(rr) Respondents proposed to cancel certain joint commodity rates on poles, piling, and on box and crate shooks from Sand Point, Kootenai, and Culver, Ida., to group points in California on the W. P., and Sacramento Northern. The points of origin are on the N. P., about 70 miles east of Spokane, Wash. Sand Point is served by two other carriers. Generally speaking, the territory of destination lies southward from Marysville toward San Francisco, but not south of Stockton and San Jose. At present a joint commodity rate of 62c applies on poles. The principal justification advanced was the failure to discover any movement under the present rates during and subsequent to 1924. HELD, justification not justified. Forest Products from California and Nevada, 102 I. C. C. 224.

(rra) Proposal to cancel commodity rates on salt cake from Pacific coast and related points to certain destinations in Wisconsin, leaving in effect higher class rates, found not justified. The present rates compare favorably with those on like and similar traffic between points in same general territory. Carriers propose their cancellation here, but such rates would continue in effect to other destinations in that territory. Salt Cake from Pacific Coast, 102 I. C. C. 261.

(rrb) Proposed cancellation of joint commodity rates on certain forest products, including doors, not screened or glazed, door panels, veneered, and kindling wood from points in north Pacific coast territory to Michigan City and Gary, Ind., which will leave in effect the same basis of rates as that now accorded other points in c. f. a. territory and, on articles other than doors, not screened or glazed, and panels, will result either in no increases or in very small increases, found justified. The changes proposed appear to be the only practicable method under present conditions of placing Michigan City and Gary on a uniform basis with surrounding territory, and leave something to be desired, particularly in comparison with the considerably lower rates to points directly west of the Chicago rate group. Forest Products from North Pacific Coast, 102 I. C. C. 319.

(ss) Respondents proposed to cancel the present commodity rate of 35.5c on clean rice, carloads, from New Orleans, La., to Bowling Green, Ky., thereby making effective to Bowling Green by intermediate rule of the tariff the carload rate of 47c now applicable from New Orleans to Louisville, Ky. Bowling Green is on the L. & N., 73 miles northeast of Nashville, Tenn., 114 miles south west of Louisville, Ky., and 693 miles from New Orleans. On traffic from New Orleans over respondents line Nashville is intermediate to Bowling Green and the latter point is intermediate to Louisville. There is and has been no carload movement of rice to

Bowling Green from New Orleans. HELD, schedules justified. Rice from New Orleans, 104 I. C. C. 333.

(tt) Respondents proposed to eliminate the Wabash as a participant in the joint rates on grain products, in carloads, from Chicago, Joliet, Lockport, and Peoria, Ill., to destinations in Arkansas on the M. P., and its connections. The elimination of the Wabash from the carriers named will effect only the rates from Chicago, as the Wabash does not serve the other points of origin. It will result, however, in increases in the rates on grain products from Chicago to destinations in Arkansas on the M. P., when shipped over the Wabash. The increase in the rate on corn products to Little Rock will amount to 5.5c, the present joint rate from Chicago being 30c and resulting combination based on St. Louis, Mo., 35.5c. The burden of justifying these increased rates rests upon respondents. To urge that combination rates are the general basis for constructing rates from points on the Wabash to the territory of destination is not sufficient. In fact, it is contrary to the frequently expressed view that the through rate should be somewhat less than the sum of the rates to and from an intermediate point. It is important to note that the Wabash is at no disadvantage by reason of circuity of route and that no evidence has been submitted which in any way tends to indicate that the joint rates from Chicago to the destinations on the M. P., in Arkansas are depressed. Grain products to Arkansas points, 104 I. C. C. 742.

(uu) Respondents proposed to cancel joint commodity rates on wheat, oats and flour, carloads, from points on the L. A. & S. L., to destinations in Louisiana, Oklahoma and Texas, which would result generally in the application of higher combination rates. Respondents state that the purpose of the suspended schedules is to remove from the tariffs certain departures from the long and short haul provision of the fourth section the existence of which was developed at the hearing in No. 16112 now pending. In that proceeding rates on grain and grain products from Utah and other western states to the destination territory here considered are in issue. The proposed rates would create new fourth section departures. Respondents admit that the rates proposed would not accomplish the results desired. HELD, schedules not justified. Grain and grain products to Louisiana, 104 I. C. C. 753.

(vv) Respondents proposed the elimination of the Pennsylvania as a participant in joint rates on grain and grain products, in carloads, from Minneapolis and other points in Minnesota and Wisconsin and from Missouri river points to New Orleans, La., and other Gulf ports and destinations in Mississippi drawal of the Pennsylvania from participation in these rates had its origin in a dispute over divisions. Respondents are willing to cancel the proposed schedules in so far as rates from points in Minnesota and Wisconsin are affected. The carriers evidence is confined to justification of the withdrawal of the Pennsylvania from participation in the joint rates from Omaha, Neb., South Omaha, Neb., and Council Bluffs, Iowa to New Orleans, La. Although the question of fourth section relief is not here presented the principles as to wasteful transportation applied in fourth section as in other cases have equal application here. HELD, proposed withdrawal of the Pennsylvania from participation in the joint rates from the Missouri river to New Orleans justified. Grain and grain products to Mississippi valley, 107 I. C. C. 167.

(ww) Respondents proposed to cancel the carload and less carload commodity rates on cheese from southern Wisconsin points to Chicago, Ill., and certain other destinations and leave the higher third class rates to apply. The territory here concerned is substantially that part of Wisconsin south of the line of the G. B. & W., running between Green Bay, Wis., and Winona, Minn. The movement is regular throughout the year. Production is steadily increasing. Claims for loss and damage of cheese in carload shipments are negligible. Cheese from the northern part of Wisconsin, from New York state, the second largest producing territory in this country and from substantially all other producing points to Chicago moves on third class rates. Respondents purpose is to align the rates on cheese from Wisconsin with the general level of rates to Chicago on that commodity. The present commodity rates from Wisconsin points to Chicago which it is here proposed to cancel average about 25% less than third class over the North-

western and about 27% less than third class over the Milwaukee. Many of the present rates which it is here proposed to cancel are those prescribed by this Commission in 16 I. C. C. 85, as modified by subsequent general changes. HELD, schedules not justified. Cheese to Illinois and Wisconsin 107 I. C. C. 340.

(xx) Respondents proposed to cancel the present commodity rates on peanuts, carloads and less carloads, from producing, shelling and cleaning points in Virginia and North Carolina to destinations in southeastern and Mississippi valley territories, and to apply in lieu thereof sixth class rates carloads and fourth class rates less carloads. The territory of origin from which the proposed rates apply includes points in southeastern Virginia and points in North Carolina taking Virginia cities rates. Of these points Suffolk, Va., may be used as a representative point. Under the proposed adjustment, the present rates to New Orleans, 63.5c carloads and $1.0035 less carloads, would apply as proportional rates to New Orleans, Natchez, Vicksburg, and Memphis, on shipments destined to points west of the Mississippi river, except to points in Colorado, New Mexico and Wyoming. Peanuts, not roasted or salted, are rated in the southern classification sixth class, carloads, and fourth class, less carloads. Except to the points to which increases are proposed, the sixth class rates from the Virginia and North Carolina points apply. The commodity rates to the points herein issue are lower than the rates to intermediate points the rates proposed representing the highest rate to any intermediate point, and the fourth section departures being thereby eliminated. The rates on peanuts from Suffolk to Louisville, Ky., and Cincinnati, O., are now lower than the rates to Knoxville, Chattanooga, or Atlanta, and rates to the river crossings apply over routes through these points. Any increase in the rates to the intermediate points would increase the discrimination against those points. The present rates to Nashville do not exceed the rates to Evansville, Ind., but the increased rates to Nashville would exceed the rates to Evansville, thereby creating a departure from the provisions of the fourth section. Apparently, except for rates between comparatively few points, there are no less carload commodity rates in southeastern and Mississippi valley territories at least there is no general line of such rates and to the destinations here in issue no less carload commodity rates are shown to apply except from the Virginia and Carolina points here proposed to be canceled. HELD, carload rates not justified. less carloads justified. Peanuts from Virginia and North Carolina, 107 I. C. C. 343.

(yy) Proposed tariff changes in rates, fares and charges over the Natchez route issued in connection with the discontinuance of the Mississippi Central's operation and trackage arrangements between Hattiesburg, Miss., and Mobile, Ala., in order to remove the existing anomalous tariff situation herein described, found justified except that the Mississippi Central has failed to justify the reasonableness of the combination rates which would result from the proposed cancellation of its rates on lumber from points on its line to Mobile. Reasonable rates on lumber prescribed, and order entered requiring the establishment of a through route and joint rates, and just, reasonable, and equitable divisions of such joint rates prescribed for the future. Adjustments of divisions on all interstate shipments handled by B. & H. S., and G., M. & N., for account of the Mississippi Central by reason of the existing anomalous tariff situation should be based upon strict mileage prorates. Cancellation of Rates and Routes via Mississippi Central, 100 I. C. C. 71.

(zz) Proposed concellation of through routes and joint rates on lumber from certain points in Mississippi to Mobile, Ala., over the Natchez route found not justified. The N. O. G. N. and G. & S. I., can reach Mobile in connection with the Louisville & Nashville and the commission should not require them to continue in effect rates from points on the upper portions of their lines over the Natchez route and thus short-haul themselves. Moreover, from points on the lower portions of their lines their two-line hauls in connection with the L. & N. are so much shorter than the three, four or five line route through Hattiesburg and Beaumont that the latter may be regarded as unduly circuitous and impracticable. Lumber will not move on rates higher than the blanket rates and

the prescription of higher reasonable rates over such routes would be futile. Reasonable rates prescribed for the future, and order entered requiring the establishment of through routes and joint rates and just, reasonable, and equitable divisions of such joint rates prescribed for the future. Cancellation of Rates and Routes via Mississippi Central, 100 I. C. C. 71, 75.

(3a) Proposal to eliminate Chicago, Attica & Southern as a participating carrier in joint rates on coal from mines on Brazil branch of Cincinnati, Indianapolis & Western to numerous interstate destinations, due solely to dispute over divisions, found not justified. Coal from Indiana Mines, 100 I. C. C. 350.

(3b) Proposed cancellation of joint rates on lumber from points on the Norfolk & Western in southwestern Virginia and related points, via routes through Kenova, W. Va., to eastern destinations, leaving in effect higher combinations, found not justified. Sole justification offered for the proposed cancellation is that there is not sufficient movement under such rates to justify expense of continuing them in tariffs. However, the rates are of many years' standing and are not shown to be unreasonably low. Lumber from the Virginias to Eastern Destinations, 101 I. C. C. 727.

(3c) Respondent proposed to cancel joint rate of 5c maintained by S. A. L., and Southern on common brick from Van Wyck, S. C., to Charlotte, N. C., and to leave in effect respondents single line rate of 5c between the same points. Distance over joint route is 38 miles, and over respondents line 46 miles. If the joint rate is cancelled the rate over the two line route will be a combination of intermediate rates. or the rate to some point beyond Charlotte held as maximum to Charlotte, and will be higher than 5c. Respondents route is not unduly long. Rate over that route is the rate prescribed by the Commission on common brick for the distance, and the record of past routing by protestant does not argue for the maintenance of the joint route as a real necessity to protestant. HELD, schedules justified. Routing brick and clay products, 112 I. C. C. 252.

VII. DUTY TO FURNISH FACILITIES.

See Supra §24; Cars and Car Supply.

§26. Restriction of Routes and Rates.

(a) Proposed restriction of proportional rates on grain and products from Missouri river points to Cairo, Ill., for beyond, to traffic moving beyond Cairo "via rail lines," which would result in increased rates when outbound movement is by water, found not justified. Respondents failed to establish beyond doubt necessity for differentiating between traffic moving beyond Cairo by water and that moving beyond by rail. Moreover, if suspended schedules were allowed to became effective proportional joint rate would exceed aggregate of intermediate proportionals and, in its application to shipments to Cairo for beyond by water, would thus violate fourth section. Grain and Products from Missouri River, 91 I. C. C. 365.

(b) Proposed restriction of routing on grain and products originating upon line of Missouri Pacific in Kansas and Nebraska and destined to Texas so that one-factor rates south of Kansas City will not apply via Frisco, M. K. & T., or Kansas City Southern, found justified. Commission has recognized that carriers may ordinarily insist upon long haul for traffic which they originate provided routes afforded by them are not unreasonably long. No undue prejudice or preference will result, for if proposed tariffs are permitted to become effective only routes of which Missouri Pacific is initial carrier will be available south of Kansas City. Grain from Western Trunk Line Points, 91 I. C. C. 632, 647.

(c) Proposed withdrawal of certain southern carriers from participation in joint rates on carbide of calcium from Sault Ste. Marie, Mich., to various southern points, and cancellation of joint rates to Birmingham, Ala., rate points and to Chattanooga, Tenn., leaving higher combination rates in effect, found justified. Present joint rates are subnormal as compared with rates from other producing points, and proposed rates will compare favorably with rates for like distances from Sault Ste. Marie and other producing points to destinations in Alabama, Georgia and Tennessee to which commodity rates are published. Carbide of Calcium from Sault Ste. Marie, 91 I. C. C. 649.

(d) Proposed cancellation by International-Great Northern R. R. Co. of its participation in rates on cotton and linters from the Southwest, via rail and water, to eastern points when moving through New Orleans, La., which would result in substantial increases, prevent movement to New Orleans, and thereby increase movement through Texas ports, found not justified. Only justification offered is that respondent serves Texas ports more directly than it serves New Orleans, that there is an additional haul beyond its lines to move cotton through New Orleans, and that it desires to retain all revenues accruing out of joint rates for rail haul from points of origin to ports. Cotton and Linters from Southwest, 91 I. C. C. 717.

(e) Respondents proposed to restrict the application of joint rates on grain and grain products, carloads, from certain primary markets, such as St. Paul and Minneapolis, Minn., Chicago and Peoria, Ill., and St. Louis, Mo., and intermediate territory between those points and Missouri river cities, to destinations in Colorado, Kansas, Missouri, Nebraska, Oklahoma and Wyoming, so that they will apply only on shipments originating beyond the primary markets named. Generally speaking, the proposed schedules would have the effect of increasing the rates on shipments originating at the Twin Cities and at most intermediate points to the basis of the combination of local rates on the Missouri river. It is proposed to increase the rates on local shipments from Chicago and the other primary markets mentioned in the same amount as the rates from the Twin Cities are increased. From a few intermediate points the establishment of rates on the combination basis would result in reductions. The present rates from the Twin Cities, Chicago, and the other primary markets above named to these destinations apply both on local traffic from those markets and on traffic originating beyond, and are generally the same in amount as those mentioned in the opposite direction. They apply as maxima at intermediate points and have been in effect upon the present basis for a number of years. The present rates from the Twin Cities are constructed on basis of arbitraries or components of 17.5c on wheat and 16c on coarse grain to the Missouri river, plus the rates beyond. These arbitraries or components to the Missouri river are the same as the rates applying proportionally in the opposite direction. A set of local rates to the Missouri river higher than those on basis of the proportional rates in the opposite direction is in effect from these primary markets and most of the intermediate points. It is these local rates, most of them higher and some of them lower, that respondents are seeking to apply on local traffic from these primary markets and intermediate points, except in instances where flat increases of 6c on wheat and 5.5c on corn are proposed to be made, as later appears, leaving the rates now applicable to apply only as proportional rates from the primary markets named. HELD: Proposed schedules not justified. Grain from Western Trunk Lines, 100 I. C. C. 745.

(f) Proposal to restrict basis for computing distance for application of mileage rates on brick and articles taking same rates between points in Oklahoma and Texas and between points in Arkansas and Oklahoma, to distances over routes embracing as a maximum, lines or parts of lines of not more than three carriers, without exception, found not justified. Increases in rates will result to certain destinations in Texas to which the short line distances from Oklahoma are now figured over four or more lines; Texas intrastate rates are figured by use of routes embracing more than three lines; and schedules on other commodities are not similarly limited. Brick between Oklahoma and Texas Points, 93 I. C. C. 210.

(g) Proposal of carriers in c. f. a. territory to restrict application of combination rule on livestock so that it will only apply where all factors used in arriving at through rates from origin to

ultimate destination carry reference thereto and authorize an affirmative application thereof, found not justified. Such restriction would not merely relieve respondents of assumption of deductions from western lines' separately established rates, but also from their own, since the rule would not apply where any carrier in the through route did not make appropriate reference thereto. This would result in increased charges, the burden of justifying which rests upon respondents. Moreover, from some origin points tariff of western carriers still refer to the rule, and an inadmissible result of the restriction would be to make rates to be applied by respondent eastern lines depend upon separate tariffs of western lines. This would not accord with requirements of section 6 of the act. Combination Rule on Livestock, 93 I. C. C. 458.

(h) Proposed cancellation of a route, in connection with the Southern Ry., on peaches, under joint commodity rates from points in Georgia and Alabama and from Chattanooga, to interstate destination and Canada, found not justified. This proceeding arises out of a disagreement between carriers as to proper distribution of the peach traffic, the Southern's action being motived by a desire to obtain greater revenues by an increased volume of traffic instead of by increased divisions. Such disputes, however, afford no justification for increased rates; moreover, proposed cancellation, if permitted, will deprive shippers of a practicable route maintained for many years, unless they assume responsibility of routing over that route at increased rates which would result. Peaches from Alabama, Georgia, and Tennessee, 93 I. C. C. 534.

(i) Shipments of apples and pears moving on through rates may be stopped in transit at points in c. f. a. territory for storage, regardless of point of origin, provided storage point is on a direct line and directly intermediate between point of origin and final destination. Proposal of the B. & O. to restrict application of joint rates to shipments moving into and out of transit points over its own rails, found not justified. Numerous increases and an abnormal rate situation would result, which carrier made no attempt to justify. Storage in Transit of Apples and Pears, 95 I. C. C. 101.

(j) Proposed elimination of Salt Lake & Utah R. R. as an intermediate participating carrier in routing of westbound transcontinental traffic, found not justified. Its elimination from through routes on traffic moving into Salt Lake City over the Union Pacific's lines will result in increased rates over that route to points on the Salt Lake & Utah. Moreover, various transit services would remain available to competing shippers served by the D. & R. G. under transcontinental rates whereas shippers on the Salt Lake would be compelled to pay higher combinations. Respondent offered no justification for the resulting increases. Routing via S. L. & U. R. R., 95 I. C. C. 237.

(k) Proposed restricted application of joint rates on grain and grain products from certain primary markets, such as St. Paul and Minneapolis, Minn., Chicago and Peoria, Ill., and St. Louis, Mo., and intermediate territory between those points and Missouri River cities, to destinations in Colorado, Kansas, Missouri, Nebraska, Oklahoma and Wyoming, so as to apply only to shipments originating beyond the primary markets named, resulting in many instances of violations of the aggregate of intermediates clause of fourth section of the act, which the proposal designs to eliminate, found not justified. Grain from Western Trunk Lines, 100 I. C. C. 745.

TIME ZONES

(a) Upon petitions, Commission reopened the case to determine whether the boundary line between the Eastern time zone and Central time zone should be so modified as to include Marysville, Kenton and Findlay, O., and any portions of central Ohio in the Eastern time zone. In the tenth supplemental report 88 I. C. C. 135 the Commission modified previous orders defining the limits of Eastern and Central time zones in Ohio so as to include within the eastern time zone the city of Columbus and that portion of the state lying between Toledo and Columbus on and east of the eastern division of the Ohio Central lines of the N. Y. C., from Walbridge to Fostoria; and H. V. Ry., from Fostoria to Columbus. In the eleventh report, 88 I. C. C. 343 the Commission authorized the N. Y. C., to operate under eastern time its Ohio Central line from Toledo through Bowling Green, Findlay, Kenton, Peoria and Marysville, to Columbus

and its branch from Peoria to St. Marys, all of which railway is in the central time zone. Commercial relations of Findlay, Kenton and Marysville are with Toledo on the north, Columbus on the south, and Cleveland and Pittsburgh on the east all of which observe eastern time. HELD, previous orders modified so as to include Marysville, Findlay and Kenton and that part of Ohio on and east of the Ohio Central lines from Toledo to Kenton, the Big Four from Kenton to Bellefontaine, and Ohio Central from Bellefontaine to Columbus within the eastern time zone. Standard Time Zone Investigation, 91 I. C. C. 686.

(b) Upon supplemental report, previous orders defining limits of United States standard Eastern and Central time zones modified so as to include cities of Findlay, Kenton and Marysville, Ohio, and that part of Ohio on and east of Ohio Central lines of New York Central R. R. from Toledo to Kenton, C. C. C. & St. L. Ry., from Kenton to Bellefontaine, and Ohio Central lines from Bellefontaine to Columbus. Inclusion within Eastern zone of such municipalities will remove many inconveniences to commerce, simplify operations of trains with respect to time to be observed, and will not interfere with safe operation of railways or necessitate any change of division points. Standard Time Zone Investigation, 91 I. C. C. 686.

(c) Law prescribing standard time mentions no particular occupations or trades as entitled to special consideration in fixation of zone boundaries, but makes "convenience of commerce and the existing junction points and division points of common carriers" of controlling importance. Standard Time Zone Investigation, 91 I. C. C. 686, 688.

ALL OTHER CITATIONS

Standard Time Zone Investigation, 88 I. C. C. 343.

TOLLAGE CHARGES

(a) Domestic class rate, which included absorption of part of tollage charges at New Orleans, on imported flint pebbles shipped to Dewey, Okla., assessed as a result of cancellation of import commodity rate on account of no movement, under general policy of director general with respect to unused rates, found unreasonable as compared with import rate to Kansas City, a farther distant point, which rate included absorption of all tollage charges and was subsequently established to Dewey. Reparation awarded. Dewey Portland Cement Co. v. A., T. & S. F., 93 I. C. C. 311.

TOP ICING

See Perishable Freight; Refrigeration §3½a.

(a) In 104 I. C. C. 79 Commission found new schedules should be published which will provide for transporting not to exceed 7,500 pounds of top ice at rates named in the schedules under suspension. Subsequently at a conference held by the director of public service with counsel for protestants and respondents an agreement satisfactory to all concerned was reached whereby the amount of top ice which should be permitted to be placed on top of the load was to remain at a maximum of 7,500 pounds on all commodities, except cauliflower in straight or mixed carloads and on cauliflower the maximum amount of top ice permitted was to be increased from 7,500 pounds to 9,600 pounds. This action is without prejudice to either side again bringing up the matter when the results of the cooperative investigation now being conducted by the Department of Agriculture shall have become known. Protective service rules on perishable freight, 109 I. C. C. 657.

TOWAGE

See Water Carriers.

(a) Service of towing vessels from and to piers, in connection with the dumping and trimming of coal, found not to be "transportation" within the meaning of section 1 (3) of the act and beyond the commission's jurisdiction. The tugboat service is a marine service performed for the vessel and not in connection with the delivery of the coal. The towing is done before and after delivery, can not reasonably be said to be in connection with it, and the service is clearly not within the law. Southern Transp. Co. v. N. & W., 101 I. C. C. 211, 223.

TRACK STORAGE

See Demurrage; Storage.

(a) Off track storage not in transit, track storage, and demurrage are con-

trolled by the tariffs in effect contemporaneously with the accrual of these services, and therefore are subject to such changes as lawfully may be made in the applicable tariffs during the period of accrual. Humphreys Co. v. Director General, 96 I. C. C. 317, 318.

(b) "Track-storage charges" are very similar to demurrage charges, except that instead of being for detention of cars they are primarily for use of the track space occupied by cars in yards. Team-Track Storage at Chicago, 92 I. C. C. 117, 118.

TRACKAGE CHARGES

ALL CITATIONS

Swift & Co. v. T. & P. Ry. Co., 88 I. C. C. 610; Trackage Charges at St. Louis, 38 I. C. C. 693.

TRACKAGE CONTRACTS

(a) A carrier's right of way, which is merely a right of user in common with use made of the same property by others, may be compared with trackage rights given by one railroad to another, the tracks being used jointly, or with the right of a railroad in a street used in common with the public. In either case the right is not valued the same as though the right of way were owned or used exclusively by carrier being valued. See Texas Midland R. R., 75 I. C. C. I, 123. New York Dock Ry. v. B. & O. R. R. Co., 89 I. C. C. 695, 705.

(b) Contention that there is no violation of long-and-short-haul provision of section 4 of the act where carrier, under a trackage agreement, operates over another carrier's line between given points and there is no concurrence on part of latter in published rate of former, but a higher rate is charged to an intermediate point in which both lines concur, not sustained. See 81 I. C. C. 497. Shanks & Gannon Co. v. C., C., C. & St. L., 102 I. C. C. 462, 464.

TRAIN CONTROL EQUIPMENT

(a) This report is made after inspection and test of the automatic train stop system of the Miller Train Control Corporation on the Chicago division of the C. & E. I. Ry., following 69 I. C. C. 258. The C. & E. I., will be expected to comply at once with the following requirements as to inspection, tests, and maintenance: 1. Arrangements should be made for careful inspection and test of the train stop equipment on all locomotives operated in train stop equipped territory upon arrival at and before departure from designated inspection and repair points. The inspection and test should include all parts of the apparatus, and before each trip the sealed cutout valve should be inspected to see that its seal is unbroken and the apparatus properly cut in for service. The roadside apparatus should be frequently inspected and tests for crosses and grounds and the ramps frequently inspected to insure that they are in proper operative condition. In the following specific respects the railway company should promptly take the necessary action to carry into effect the recommendations made: 1. The interval between a ramp and the signal in advance should be sufficient in all cases to provide adequate braking distance. 2. At crossovers such arrangements should be made as to afford maximum signal protection to main track traffic. 3. All movements leading to main tracks should be protected through the signal system. 4. For movements at and through interlocking plants ramps should only be energized for high speed routes. Automatic train control devices, 96 I. C. C. 345.

I. WHAT IS TRANSPORTATION SERVICE.

§1. In General.

(a) The word "transportation" as used in section 1 (12) of the act is not limited in its meaning to transportation for compensation, but includes also transportation of carrier's own coal over its line. Assigned Cars for Bituminous Coal Mines, 93 I. C. C. 701, 715.

(b) What is transportation within meaning of the act is a question of fact as well as law. Where a carrier sets a car at a warehouse used by an auction company, and at which no freight other than that to be sold at auction by that company is handled, carrier thereafter having no further connection with the shipment, transportation service ceases with unloading of the car at the warehouse, the same as it would cease with unloading of a car at team tracks in yards if warehouse were located blocks away from the yards and had to be reached by truck, whether such warehouse is leased from carrier or someone else. Storage Rules on Fruits and Vegetables, 95 I. C. C. 87, 90.

(c) Service of docking and undocking, running lines, and furnishing fresh water to ships in connection with the dumping and trimming of coal into vessels found not to be "transportation" within the meaning of section 1 (3) of the act, and beyond the commission's jurisdiction. Southern Transp. Co. v. N. & W. Ry., 101 I. C. C. 211, 221, 223.

II. DUTY OF CARRIER TO TRANSPORT.

§2. In General.

See Cars and Car Supply IV, V; Common Carrier §6; Facilities and Privileges II; Routing and Misrouting II.

(a) The Pine Bluff & Northern discontinued the station at Fletcher, Ark., reached by a movement over track owned by an individual, but failed to so notify the Rock Island who continued to carry it in tariffs in which the P. B. & N. concurred. Individual owned the private track was then permitted to exact a charge of $50 per car on traffic moving thereover, and employees of the P. B. & N. were instructed to refuse traffic at that point until such charges were paid. HELD: Such refusal was a failure to furnish transportation within meaning of section 1 (4) of the act. Reparation awarded. Miles Lumber Co. v. C., B. & Q. R. R. Co., 89 I. C. C. 761.

(b) Fact that an individual is permitted to make a charge for service which the carrier is bound under its tariff to furnish, can not deprive shippers of their right to hold the carrier responsible for the consequence of its act, and a carrier is answerable in damage for a refusal to accept cars for transportation to a certain point, resulting in shippers being put to expense of having them transported to a station where they would be accepted. Miles Lumber Co. v. C. B. & Q. R. R. Co., 89 I. C. C. 761, 764.

(c) Complainant alleged that defend-

ant Pine Bluff & Northern, unlawfully refused and failed to provide transportation for 12 cars of lumber tendered during the period of June 25, 1920 to May 16, 1921, for shipment to points in Illinois and Indiana and that charges collected were illegal. The P. B. & N., lies wholly in Arkansas. Its own line extends 7.1 miles practically due south from its junction at McCreanor with the Rock Island to Cullor. It operates 0.9 miles south of Cullor to Shullville over rails belonging to H. N. Street, its general manager, who has an equitable interest in the P. B. & N., by virtue of a partly completed contract of purchase. A Rock Island tariff issued June 30, 1919 effect throughout the time covered by the shipments, published rates from Fletcher to the destinations of the shipments or which could be used in combination with rates in other tariffs to make rates to such destinations, which were the same as the rates from Cullor. The P. B. & N., concurred in the tariff. Motive power on the P. B. & N., when these shipments moved, was provided by a locomotive owned by Street, but operated by the receiver. Subsequent to the discontinuance of service to Fletcher by the receiver, Street agreed to permit his locomotive to haul cars to Cullor from points beyond Shullville for $4 per car but not less than four cars at one time, to be paid to him by Shull. The latter notified complainants that thereafter there would be a charge of $50 per car on lumber moved from his track from Fletcher to the connection with the P. B. & N., at Cullor and directed the employees of the P. B. & N., at Cullor not to move any cars loaded at Fletcher until this charge had been paid. Complainants offered the shipments in issue to the P. B. & N., at Fletcher, but that road refused to accept them there. Its employees advised complainants that before the cars were placed at Fletcher it would be necessary for complainants to pay Shull the $50 charge. Complainants made such payments to Shull or to other employees of the railroad acting at the time as his agents, the cars were hauled to Cullor by the locomotive and crew which moved traffic for the P. B. & N., and the railroad accepted them at Cullor and issued bills of lading from that point. The charges of $50 were imposed before the P. B. & N., accepted the shipments. Since neither the P. B. & N., nor its connections at McCreanor and beyond received more than the published tariff rate from Fletcher, the charges attacked were not overcharges above the legal tariff rate. In a legal tariff the P. B. & N., represented Fletcher to be a point on its own line and named a rate therefrom. By this tariff it held itself out to serve shipper as a common carrier from that point. HELD the wrongful refusal of the agents of the P. B. & N., to accept cars for shipment at a point indicated by its tariffs as a station on its line put complainants to the expense of having the cars transported to the station at which they were accepted, reparation awarded. Miles Lumber Co. v. C. B. & Q. R. R., 89 I. C. C. 761.

(d) Refusal of defendant carrier, under appropriate tariff provisions, to accept shipments of rags (except in compressed covered bales) and waste paper at Piers 41 and 68, North River, Manhattan Borough, New York, N. Y., because of the fire hazard, endangering other and more valuable property, and even life itself, found not unreasonable, but unreasonable as to Pier 13, North River, and Pier 26, East River, to extent the restrictions preclude receipt at and shipment from such piers of carload shipments of dry rags and dry waste paper so baled as to prevent loss of pieces (sifting) from the bales, and reasonably free from loose edges, strips, pieces, fibers, or other parts protruding from the bales or surrounding them. National Asso. Waste Material Dealers v. D., L. & W. R. R. Co., 98 I. C. C. 606.

(e) Proposal of L. & N. to refuse to accept l. c. l. shipments of alcoholic liquors, and to cancel rates thereon, on ground that cost of guarding such shipments under its present transportation facilities and rates is not remunerative, found not justified. Movement of l. c. l. shipments solely by express would deprive shippers, located where there are no express company offices, of any transportation facilities, respondent has expressly held itself out to accept this traffic by obtaining the necessary Government permit, the traffic is not inherently any more dangerous or objectionable from a transportation standpoint in l. c. l. than in c. l. lots, and it does not appear that requests for transportation in l. c. l. have been or are likely to be unreasonable. Alcoholic Liquors via L. & N., 102 I. C. C. 202.

§5. Delivery by Carrier.

See Infra §5a; Drayage; Express Companies §2; Side Tracks and Spur Tracks; Spotting; Stock Yard Companies; Switch Tracks and Switching §5.

(a) A legal duty is imposed upon all common carriers of freight to receive for carriage all proper articles tendered at suitable places of receipt. A carrier may not select preferred freights and refuse to handle other articles because they are less remunerative or more inconvenient to handle. National Asso. Waste Material Dealers v. D. L. & W. Ry., 98 I. C. C. 606, 611.

(b) Delivery charge on ex-lake iron ore at Carnegie Steel Company's plant at Youngstown, Ohio, found applicable and not unreasonable. Contention that movement of the ore within yards of complainant to its incline tracks, where it is received and handled by an unloading mechanism operated by complainant, does not constitute spotting of cars or placing of cars for unloading within meaning of the tariffs, not sustained, the service being performed at convenience of complainant and almost wholly under its directions. Mere fact that the special service following delivery at interchange tracks may be less than that generally included in deliveries at private sidings does not prove the charge unreasonable. Carnegie Steel Co. v. Director General, 96 I. C. C. 527.

(c) Line-haul rates were limited to delivery on "interchange tracks" in Iron Ore Rates Cases, 41 I. C. C. 181, 44 I. C. C. 368, this delivery being regarded as equivalent to usual team-track or private-siding delivery. It was contemplated that the interchange tracks would be so located the service under the line-haul rates would end at or near the plant gate. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 532.

(d) Difference of location of interchange tracks at which delivery is made without charge other than the line-haul rate constitutes undue prejudice to complainant and undue preference of the Youngstown and Haselton plants, which should be removed by locating points of interchange at latter-plants within a reasonable distance of point of connection between the rails of the line-haul carriers and the industry tracks. Carnegie Steel Co. v. Director General, 96 I. C. C. 527, 535.

(e) In the absence of instructions to the contrary, it is the right of a carrier, and ordinarily would be the appropriate course, to place a car for unloading promptly upon arrival at destination. Milne Lumber Co. v. C. & N. W. Ry. 107 I. C. C. 653, 655.

(f) Refusal of defendant carriers to permit cars to be unloaded without the surrender of original bills of lading and payment of proper charges on shipments on which the charges were subject to prepayment, but which were not collected at point of origin, can not be construed as improper tender of delivery under the tariffs. Johnson v. O. S. L. R. R., 101 I. C. C. 39, 42.

§5a. Delivery to Carrier.

See Supra §5.

ALL CITATIONS

Divisions Received by Brimstone R. R. & Canal Co., 88 I. C. C. 62.

§5½. Extension of Line.

(a) Contention that installation of switch connection sought would complete a new connecting railway between the Illinois Central and defendant without a certificate of public convenience and necessity having been first obtained, as required by law, for extension of line, not sustained. Dering Coal Co. v. C., C., C. & St. L., 96 I. C. C. 143, 151.

§7½. Receipt by Consignee.

ALL CITATIONS

Smokeless Fuel Co. v. N. & W. Ry. Co., 85 I. C. C. 395.

§10. Unloading or Loading at Terminal.

See Facilities and Privileges §10; Loading and Unloading; Minimums; Terminal Facilities.

(a) Shippers urge that line-haul rates include loading and unloading services, and under the law carriers not only must justify charges for such services, but burden is upon them to show that line-haul rates heretofore contemplating loading and unloading services are reasonable when demanded for road-haul alone. FOUND: Same line-haul rates are assessed on shipments to and from industrial sidings and outlying team tracks, also to or from other points in same group or for similar distance, under which rates no loading or unloading is included. Such facts indicate that the general measure of rates

are not unreasonable for line-haul service alone and warrant conclusion that if carriers justify charges for loading and unloading, they have borne their burden of proof under the law. Loading and Unloading C. L. Freight, 101 I. C. C. 394, 413.

III. OPERATION OF RAILROAD.

§11½. In General.

(a) It is neither necessary nor practicable to reflect in a general rate structure all the differences in transportation conditions that affect particular movements. Nebraska Livestock Cases, 89 I. C. C. 453, 457.

(b) Ordinarily the service of making up and breaking up trains is an operating incident compensation for which is included in the transportation rate. Where, however, such service is rendered in some instances and not in others, and in still others is only service performed by a common carrier, the charge for that service should be separately stated. Peoria & Pekin Union, 93 I. C. C. 3, 22.

ALL OTHER CITATIONS

C. M. & St. P. Ry. Co. v. U. P. R. R. Co., 88 I. C. C. 312.

§15. Right to Traffic.

See Explosives and Dangerous Articles (c).

TRANSPORTATION ACT

See Act to Regulate Commerce VI; Claims §1½; Statute of Limitations.

TRAP CARS

See Demurrage §10; Ferry Charges.

(a) Switching charges collected by Hoboken Manufacturers R. R. Co. on trapcar loads of l. c. l. freight switched by it from complainant's warehouse at Hoboken, N. J., to C. R. R. of N. J. at Weehawken, N. J., for interstate movement, found inapplicable. The Hoboken Manufacturers may not lawfully make a charge in addition to line-haul rate for switching cars direct from complaint's plant to line-haul carrier, as that would be charging for a service not actually rendered, and the hauling of such cars to its freight station before delivering to line-haul carrier is for its own convenience, is not required under the contract of transportation, and the shipper may not be assessed a charge therefor in addition to line-haul rate. Reparation awarded. Jewel Tea Co. v. C. R. R. Co. of N. J., 98 I. C. C. 424.

TRUCK COMPANIES

See Motor Truck Service.

(a) A trucking company is not a carrier subject to the act. Consequently the trucking company is not a proper party to a joint tariff. Tariffs embracing motor truck or wagon transfer service, 91 I. C. C. 539, 547.

TWENTY-EIGHT HOUR LAW

(a) Railroad does not "knowingly and willfully' violate 28-Hour Law (Comp. St. §§ 8651-8654), unless, with knowledge that statute is about to be violated, it purposely and intentionally disregards statute. United States v. Southern Ry. Co., 1 Fed. (2d) 607.

See Claims §1 (i); Freight Charges; Reparation §20½.

II. DUTY OF CARRIER TO COLLECT.

§2 . In general.

(a) Where contract of shipment of cut stone provided for rate less than published schedule filed with interstate commerce commission, carrier could recover difference, since scheduled rate formed part of contract of shipment by operation of law, and parties could not contract for less rate than schedule filed

with commission. Missouri Pac. R. Co. v. Pfieffer Stone Co. (Ark., 1924) 266 S. W. 82.

(b) Carrier of interstate shipment, under Interstate Commerce Act (U. S. Comp. St. § 8563 et seq), cannot estop itself from collecting undercharge of freight rates. Nashville C. & St. L. Ry. Co. v. Gilliam (Ala. 1924), 101 So. 889.

(c) Carrier of interstate shipment may collect undercharge, though agent made mistake as to amount due, and lien was lost by delivery of freight on payment of less than legal rate. Nashville C. & St. L. Ry. Co. v. Gilliam (Ala., 1924) 101 So. 889.

(d) Director General of Railroads was not estopped to sue for balance due on freight on coal billed by mistake at less than proper rate, though defendant sold the coal at a small profit under supervision of federal government, taking freight rate into account, so that payment of difference would result in loss in view of Const. § 214, and Ky. St § 817, relative to preferences. Davis, Director General of Railroads v. Moody (Ky., 1924), 261 S. W. 1101.

III. EVIDENCE.

See Evidence.

§6. Testimony as to Rate.

See Tariffs §19.

ALL CITATIONS

Beaumont Chamber of Commerce v. Director General, as Agent, 85 I. C. C. 139.

IV. LIABILITY TO PAY.

§7. In general.

(a) That weighing coal on railroad scales would have required carrier to make an extra haul, which was impracticable under war-time conditions, did not excuse billing of coal without notice to consignee at inaccurate tipple weights, and carrier should have attempted to reach an agreement with consignee for a proper allowance, or made allowance in its best judgment subject to adjustment. New York & Pennsylvania Co. v. New York Cent. R. Co. (Pa., 1924) 124 Atl. 428.

(b) Receipt in full "of the above account" given by carrier upon payment of the freight on an import shipment at the current rate of exchange HELD not to preclude a recovery by it of additional freight figured at the nominal exchange provided for in the bill of lading. Pennsylvania R. Co. v. Cameron (Pa., 1924) 124 Atl. 638.

(c) A showing that a railroad, seeking to recover freight on an import shipment at the normal rate of exchange provided for in bill of lading rather than at current rate, had paid steamship at the normal rate, HELD to establish it was not attempting to recover for itself alone. Pennsylvania R. Co. v. Cameron (Pa., 1924) 124 Atl. 638.

(d) The provisions of Interstate Commerce Act requiring carriers to charge no less than their published rates, and giving them the right to recover the difference if a lower rate is paid, are not for the benefit of the carrier, but for the protection of the public from discriminations, and a limitation by Congress of the time within which an action for such recovery may be brought violates no vested right of the carrier. Button v. Atchison, T. & S. F. Ry. Co., 1 Fed. (2d) 709.

(e) Director General of Railroads was not estopped to sue for balance due on freight on coal billed by mistake at less than proper rate, though defendant sold the coal at a small profit under supervision of federal government, taking freight rate paid into account, so that payment of difference would result in loss in view of Const. §214, and Ky. St. §817, relative to preferences. Davis v. Moody (Ky., 1924) 261 S. W. 1101.

(f) On interstate shipments carrier can compel shipper to pay difference between legally established interstate rate and lower rate quoted or collected by mistake or otherwise. Missouri Pac. R. Co. v. Pfieffer Stone Co. (Ark., 1924) 266 S. W. 82.

(g) Under Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.), fixing freight charges, defendants, named as ones to be notified, in bill of lading, naming shipper both as consignor and consignee, who paid freight and received shipment, became in lay the consignees and owners, and were liable to railroad for undercharge of freight, and no agreement with shipper nor estoppel by conduct of railroad could relieve them. Nashville C. & St. L. Ry. Co. v. Gilliam, (Ala., 1924) 101 S. 889.

(h) A common carrier must collect the amount of an undercharge on an interstate shipment from one legally liable, and under the facts of this case the defendants, who brought merchandise then in the course of transportation, to be delivered, agree to pay and paid the freight charges as a part of the purchase price, accepted the shipment, and undercharge was made, are liable to the carrier therefore, though they were not named consignees in the bill of lading. Chicago Great Western Ry. Co. v. Schmit (Minn., 1925) 203 N. W. 618.

(i) Where consignee of a shipment of coke, purchased f. o. b. point of shipment, contracted to pay freight, and carrier collected from it the freight then considered due, though by error an undercharge, it cannot collect the deficiency from shipper. Louisville & N. R. Co. v. Central Iron & Coal Co., 44 Sup. Ct. 441.

§8. Waiver.

(a) Outstanding undercharges on past shipments of pea hullers, being the difference between the first-class rates erroneously assessed and the double first-class rates applicable, defendants should waive collection of that portion representing the excess of the double first-class rates over the rates of one and one-half times first-class found reasonable herein, and the remaining portion should be collected. Star Pea Huller Co. v. C., N. O. & T. P. Ry. Co., 98 I. C. C. 357, 360.

(b) Upon further hearing, former report 58 I. C. C. 164, collection of separate charges for loading and unloading livestock at the Chicago stockyards, in addition to the line-haul rates found unlawful and unreasonable, and amount of reparation due and parties entitled thereto determined herein. So far as applicable to shipments coming under the jurisdiction of the commission, collection of undercharges may be waived. Chicago Live Stock Exchange v. A., T. & S. F., 100 I. C. C. 266, 273.

(c) On shipments of liquid asphalt from Port Neches, Tex., to Morrilton, Conway, and Galla, Ark., on which there has not yet been a final adjustment of charges, undercharges should be waived to the basis of the rate herein found reasonable. Texas Co. v. K. C. S., 101 I. C. C. 177.

§10. Statute of Limitations.

See Statute of Limitations.

(a) An action by a railroad company to recover charges, before the passage of Transportation Act 1920 (Comp. St. §8563 et seq.), was governed as to limitation by the state statutes. Button v. Atchison, T. & S. F. Ry. Co. 1 Fed. (2d) 709.

(b) Where an action by a carrier to recover charges was not barred by the state statute of limitation of three years, but a reasonable time for commencement of the action still remained at the time of enactment of Transportation Act Feb. 28, 1920, §424 (3), being Comp. St. Ann. Supp. 1923, §8584, and providing that such actions shall be begun within three years from the time the cause of action accrues, "and not after," the federal statute should not be construed to extend the time for bringing the action for three years from the date of its passage and beyond the time fixed by the prior state statute, which it superseded, but should be construed as it reads, and the action is barred in three years after the cause of action accrued. Button v. Atchison, T. & S. F. Ry. Co. 1 Fed. (2d) 709.

UNPUBLISHED RATES

See Evidence §60; Interstate Commerce Commission §13; Reparation §15; Routing and Misrouting §12.

(a) Where rates assessed are attacked as being unreasonable, and there are no specific rates or ratings applicable on the commodity transported, it is the commission's duty to determine whether charges collected were unreasonable. Memphis Frt. Bureau, 17 I. C. C. 90; Refinite Co., 68 I. C. C. 545. Atlas Portland Cement Co. v. Director General, 92 I. C. C. 171, 172.

USE OF COMMODITY

See Classification §10; Discrimination §7½.

VALUE

See Classification §11; Evidence §61; Reasonableness of Rates §38.

WAGON TRANSFER

See Allowances §8 (7) (a); Motor Truck Service.

WAR TAXES

(a) The Commission is without power to order refund of war taxes. McClintick & Company v. P. M. Ry., 93 I. C. C. 69, 70.

(b) The Commission is without jurisdiction to award reparation for excess war taxes paid. Randall Bros v. L. N. R. R., 96 I. C. C. 342, 345.

(c) The commission is without power to order refund of war taxes. Gullikson v. Director General, 102 I. C. C. 327, 330.

ALL OTHER CITATIONS

West End Chemical Co. v. L. A. & S. L. R. R. Co., 85 I. C. C. 339; Wyoming Sugar Co. v. Director General, as Agent, 88 I. C. C. 213.

WAREHOUSES

See Facilities and Privileges §16½; Storage.

(a) Practice of carriers in employing certain warehouse companies to perform terminal services in connection with the loading and unloading of c. l. package freight at Baltimore, for which allowances are paid, while refusing to employ other warehouse companies to perform similar services, found not to result in discrimination, preference, or prejudice. Complainant's primary business is that of a public storage warehouse, and its sole purpose in bringing its complaint is to make more profit of its warehouse business. Moreover, complainant is not a shipper or receiver of freight and has no relation with a common carrier which would result in a discrimination against it in violation of the act, the discrimination forbidden therein being in respect of transportation. See 51 I. C. C. 535. McCormick Warehouse Co. v. P. R. R., 95 I. C. C. 301.

(b) Contention that a warehouse company can not lawfully be agent of shipper and carrier in respect of same transaction at same time not sustained, following Diffenbaugh Case, 222 U. S. 42, where the agency for the railroad includes unloading, sending of notices, collection of freight charges, etc.; and that for the shipper storage after free time, separation of traffic, etc. McCormick Warehouse Co. v. P. R. R., 95 I. C. C. 301, 306.

CROSS REFERENCES

See Bills of Lading §3; Break Bulk Rates; Coastwise Traffic; Discrimination §8 (5); Export Rates and Facilities; Foreign Commerce; Merchant Marine Act; Panama Canal Act; Port to Port Rates; Rail and Water Rates; River Crossings; Special Contracts §2 (b); Towage; Water Competition.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In General.

(a) The policy of Congress "To promote, encourage, and develop water transportation, * * * and to foster and preserve in full vigor both rail and water transportation as declared in section 500 of the transportation act, 1920, can be effectuated only under rate adjustments which will permit of an equitable distribution of the available traffic. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512, 538.

(b) It is the policy of Congress as declared in section 8 of merchant marine act, 1920, and §500 of transportation act, 1920, to promote, encourage, and develop transportation by water and to foster and preserve in full vigor both rail and water

transportation. Wool Rates Investigation, 1923, 91 I. C. C. 235, 248.

(c) It is important that all ports be kept open and in as vigorous condition as possible so that water lines may be attracted thereto and the public given the cheapest and most efficient service, both by water and by rail. Galveston Commercial Asso. v. G. H. & S. A. Ry., 100 I. C. C. 110, 122.

(d) It is the policy of Congress as declared in section 500 of the transportation act, 1920, to promote, encourage, and develop water transportation, service, and facilities in connection with the commerce of the United States, and to foster and preserve in full vigor both rail and water transportation, and the provisions of section 8 of the merchant marine act, 1920, are of the same tenor. Galveston Commercial Asso. v. G., H. & S. A. Ry. Co., 100 I. C. C. 110, 122.

(e) The national policy is that a navigable river is a public highway, a natural avenue of commerce, and the public interests demand that its advantages be utilized to the fullest extent. The same language is applicable to the ocean. Nelson S. S. Co. v. B. A. & P. Ry., 109 I. C. C. 529, 536.

§2. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) The Supreme Court held that common carriers by water having joint tariffs on file with the Commission under which they operate jointly with railroads in transporting interstate passengers and property over through routes partly by railroad and partly by water are agents of interstate commerce, and as such may be lawfully required to classify their accounts and make statistical reports of their entire business as common carriers. Wool rates investigation, 1923, 91 I. C. C. 235, 276.

(b) Congress has not placed intercoastal steamship lines under Commission's jurisdiction to same extent as rail carriers. Their port-to-port rates are exclusively under jurisdiction of United States Shipping Board, and water carriers are free to charge any rate so long as they do not exceed maximum schedules on file with that board. Wool Rates Investigation, 1923, 91 I. C. C. 235, 275.

(c) Common carriers by water having joint tariffs on file with Commission under which they operate jointly with railroads in transporting interstate passengers and property over through routes partly by railroad and partly by water are agents of interstate commerce, and as such may be lawfully required to classify their accounts and make statistical reports of their entire business as common carriers. Goodrich Transit Co. Case, 224 U. S. 194. Wool Rates Investigation, 1923, 91 I. C. C. 235, 276.

(d) Commission has no power to prevent a water carrier, over which it has jurisdiction by reason of its participation in joint interstate rates with carriers by railroad, from abandoning operation of its vessels. Duty to furnish reasonable service while engaged in business as a common carrier is to be distinguished from obligation to continue in business. Lucking v. D. & C. Nav. Co., 265 U. S. 346. Routing to and from Eastern and New England Territories, 91 I. C. C. 455, 456.

(e) Hauls by motor truck from inland points to the docks of a water carrier can not be said to be transportation over which Commission has jurisdiction or a service that can be required of a common carrier. Trucking companies can not, under such conditions, be acting as agents for common carriers, and since they are not carriers subject to the Act, they are not proper parties to joint tariffs. Conf. Ruling 441. Motor-Truck or Wagon Transfer Service, 91 I. C. C. 539, 540, 548.

(f) The commission is directed "to foster and preserve in full vigor both rail and water transportation." But water transportation can not enjoy full vigor if it is confined to traffic which moves from port to port. If water lines are to thrive they must be able to draw traffic from interior points. U. S. War Dept. v. A. & S. Ry., 92 I. C. C. 528, 538.

(g) The commission has power under section 6 (13-b) of the act to establish through routes between rail and water carriers and prescribe maximum rail-and-water and rail-water-and-rail rates over the rail and water lines even though the water line is not used under a common control, management, or arrangement for continuous carriage or shipments. Houston Cotton Exchange v. A. & A. R. R. Corp., 93 I. C. C. 268.

(h) While Congress has expressed a policy looking to development of public

terminals at port cities, it has not delegated authority to the commission to enforce that policy. Scope of the commission's activities is limited by terms of the interstate commerce act, and unless proposed terminal charges are found to be in contravention of some provision of that action it is beyond the commission's power to condemn them. Handling Charges on Cement, Fertilizer, and Salt, 93 I. C. C. 640, 643, 644.

(i) The transportation act, 1920, gave the commission the power, which it did not theretofore possess, to require the establishment of through routes "where one of the carriers is a water line," even though the rail line would thereby be shorthauled. (Paragraph 4, section 15, of the act.) Southern Class Rate Investigation, 100 I. C. C. 513, 680.

(j) Complaint alleging unreasonableness of intrastate rates on fuel oil previously transported via tank steamers from interstate points of origin dismissed for want of jurisdiction, no common control, management, or arrangement for continuous carriage or shipment existing between rail carrier and tank steamers, the latter being owned and operated exclusively for transportation of its own commodities. Washington Dehydrated Food Co. v. G. N. Ry., 102 I. C. C. 363.

ALL OTHER CITATIONS

North Carolina Pine Asso v. A. C. L. R. R. Co., 85 I. C. C. 270.

II. DISCRIMINATION AND REASONABLENESS.

See Infra VI; Discrimination; Reasonableness of Rates.

§3. In General.

(a) It is important that all ports be kept open and in as vigorous a condition as possible so that water lines may be attracted thereto and the public given the cheapest and most efficient service, both by water and by rail. Galveston Commercial Asso. v. G., H. & S. A. Ry. Co., 100 I. C. C. 110, 122.

III. TARIFFS AND CONSTRUCTION

See Tariffs.

§5½. Bills of Lading.

See Bills of Lading.

(a) Failure or refusal of rail and water carriers to establish through routes and joint rates and issue through bills of lading on shipments of wool and mohair from interior point via Pacific ports and Panama Canal to Boston, Mass., and other north Atlantic ports found not unjust, unreasonable or otherwise unlawful. There is no evidence to indicate that present all-rail and rail-and-water routes are inadequate to expeditiously handle traffic under normal conditions; moreover, rail and water lines do not participate in arrangements for continuous carriage and shipment, separate bills of lading being required for rail and water hauls. Wool Rates Investigations, 1923, 91 I. C. C. 235, 276, 277.

IV. THROUGH ROUTES AND JOINT RATES.

§6. In General.

See Through Routes and Joint Rates.

(a) Where either the rail or the water carrier has suitable dock facilities, the ownership or control by the one or the other is immaterial, at least in so far as concerns a prescription of through routes and joint rates or of proportional rail rates to or from the port from or to which the traffic affected is taken by the water carrier, except as the ownership or control may bear upon the question of reasonable compensation for the use of the facilities. State of New York v. N. Y. C. R. R., 95 I. C. C. 119, 127.

(ab) Failure or refusal of rail and water carriers to establish through routes and joint rates and issue through bills of lading on shipments of wool and mohair from interior points via Pacific ports and Panama Canal to Boston, Mass., and other north Atlantic ports, found not unjust, unreasonable, or otherwise unlawful. There is no evidence to indicate that present all-rail and rail-and-water routes are inadequate to expeditiously handle traffic under normal conditions; moreover, rail and water lines do not participate in arrangements for continuous carriage and shipment, separate bills of lading being required for rail and water hauls. Wool Rates Investigation, 1923, 91 I. C. C. 235, 277.

(b) Common carriers by water having joint tariffs on file with Commission under which they operate jointly with railroads transporting interstate commerce over through routes partly by railroad and partly by water are agents of interstate commerce, and as such may be law-

fully required to classify their accounts and make statistical reports of their entire business as common carriers. Goodrich Transit Co. Case, 224 U. S. 194. Wool Rates Investigation, 1923, 91 I. C. C. 235, 276.

(c) Proposed change in routing of traffic between Texas and southwestern territory and eastern and New England territories, by cancellation of all class and commodity rates applicable as proportionals from or to Port Arthur, Tex., and as joint rates in connection with rail lines of Transmarine Corporation, a water carrier, and proposed substitution of Beaumont, Tex., for Port Arthur as a port of call for its vessels, found justified. Routing in through traffic will only be changed from "via Port Arthur" to "via Beaumont," and only change in rates will be cancellation of rates to or from Port Arthur, and substitution of increased rates to or from that point applicable via Beaumont, when in connection with Transmarine Corporation. Routing to and from Eastern and New England Territories, 91 I. C. C. 455.

(d) The law does not prohibit either a rail or water carrier subject to the Act from interchanging business with motor trucks an entering into proper arrangements to acquaint the shipping public with total charges for full movement. But such arrangements are not required by law, and fact that they may be entered into does not extend terms of the act to include motor-truck service. Motor-Truck or Wagon Transfer Service, 91 I. C. C. 539, 540, 548, 549.

(e) Complainant attacked failure and refusal of defendants to establish and maintain through routes and joint and/or proportional rates over defendants and complainant's water line between points in California, Oregon, Washington, Idaho, Montana, North Dakota, South Dakota and Minnesota subject to the same terms and conditions and divisions of rates as are maintained and observed in connection with traffic moving over the Pacific Steamship Company McCormick Steamship Co. and defendant's lines has prevented complainant from enjoying freight traffic which it could rightfully expect to receive, and is unjust, unreasonable, discriminatory, unduly preferential of said steamship companies, and unduly prejudicial to complainant. G. N. Ry. agreed to establish the rates prayed for in connection with its lines. Tariffs naming the Nelson Steamship Company as a participating carrier on joint through business by its line have been filed with the Commission by the G. N. Ry. The record convinces the Commission that the Nelson Steamship Company is financially responsible, that its service is satisfactory, and that the establishment of the through routes and rates prayed for is desirable in the public interest. Complainant is shown to be transporting the same classes of freight at the same time between the same ports at the same agreed rates and under substantially similar circumstances and conditions as its competitors. While it is likewise true that the service rendered by the intervening steamship lines is also satisfactory, yet this fact alone is not sufficient under the law to warrant the defendants in preferring the interveners to the disadvantage and prejudice of complainant. HELD, defendants are ordered to join complainant in establishing through routes and joint rates to same extent as maintained by them with Pacific Steamship Company and McCormick Steamship Company between the same points. Nelson S. S. Co. v. B. A. & P. Ry., 109 I. C. C. 529.

(f) The Commission has repeatedly declined to sustain the pleas of rail carriers that their existing water line connections were ample and satisfactory as a reason for not requiring them to make similar arrangements with another water line. Nelson S. S. Co. v. B. A. & P. Ry., 109 I. C. C. 529, 536.

(g) If rail carriers are permitted to choose the particular boat lines with which they will establish through routes and joint rates, they will be able to dictate who shall operate on the water and who shall not, for a boat line which is accorded a monoply of the through rail and water traffic will soon be able to drive its competitors out of business. The spirit of the act is to maintain the freedom of our ports and to allow boat lines to engage in traffic upon equal terms. To permit the rail carriers serving a port to favor one boat line or another would destroy the freedom of competition between boat lines which the act is intended to preserve, and would practically close ports to all but the favored vessels. Nelson S. S. Co. v. B. A. & P. Ry., 109 I. C. C. 529, 536.

(h) Complainant attacked failure of

defendants to establish and maintain joint rail and water commodity rates on plain iron wire, carloads, and less carloads, from Fostoria, O., to Savannah, Ga., and Jacksonville, Fla., while maintaining joint rail and water commodity rates from Pittsburgh, Pa., and from Youngstown, Cleveland and Greenwich, O., to the same destinations, as unduly prejudicial. Fostoria is on the main line of the B. & O., 243 miles west of Pittsburgh. The related points in Ohio in the order of distance west of Pittsburgh, are Youngstown, 78 miles, Cleveland 168 miles, Greenwich 194 miles, Lorain 198 miles and Plymouth 212 miles. From Baltimore shipments moved over M. & M. Transportation Co. The latter is a defendant in this case and is the delivering carrier in connection with the rail and water rates whether the traffic originates at Pittsburg, Cleveland or other points. HELD, rates attacked unduly prejudicial to Fostoria to extent they exceed by more than 2.5c the rail and water rates from Cleveland. Seneca Wire & Mfg. Co. v. B. & O. R. R., 112 I. C. C. 95.

§6½a. Barge Lines and Rail Carriers.

See Barge Lines; Free Transportation.

(a) Complainant, State of New York, operating the barge canal, alleged defendant be required to furnish a transportation service between said Erie basin terminal and shippers located on defendants tracks in Buffalo, shippers located on its tracks at any other point in said state, and shippers located at any other point in said state on the tracks of any other railroad with which defendant can interchange traffic; that such transportation service shall include the furnishing by defendant of necessary rolling stock for movement of traffic between said terminal and shippers located on defendants tracks at all points in said state, the operation upon the said terminal tracks, by defendants motive power and servants, of all rolling stock moving to or from said terminal, and the spotting, placing and removal of rolling stock therein and therefrom; and that defendant establish proper rates for such service. Defendants tracks adjacent to the terminal are also used by the M. C., T. H. & B., and G. T., and about 100 passenger trains pass over them each day. They are also used in switching service between defendants facilities and interchange points with its connecting rail lines. Defendant has on occasion spotted cars on the switch connection and removed cars therefrom and expresses willingness to do so in the future, but it refused to operate over the States tracks. As the state and the canal carriers have no railroad motive power or cars, and it would be impracticable and uneconomical for them to purchase and operate the same, the practical effect of this refusal is to preclude any interchange of traffic at the terminal between the rail and canal carriers. The docks and other terminal facilities for interchange at Buffalo are the property of the state of New York but they are fully available to all canal craft and appear to be adequate for the purpose contemplated by the complaint. It is to be observed that the presence in any case of a common carrier by water is an essential element only in an establishment of through routes and joint rates, in the nature of things, for such a purpose the presence of a rail line and a water line would be necessary. In an establishment of rail line proportional rates the Commission may also designate the vessels in connection with which they are to apply, but that is not obligatory. But neither through routes and joint rates nor proportional rates are defendant with its already available here sought. All that is asked is that motive power and other equipment, provide the transportation service and perform upon the terminal tracks the operating service necessary to an interchange of traffic at the terminal. Under the terms of the statute the power of the Commission to require it is distinct and complete. Under another section of the act the Commission has power to require a railroad to extend its line and for obvious reasons this includes authority to require the carrier to operate the extension. So, the power of the Commission to require this defendant rail line to construct or connect with the terminal tracks necessarily includes the power to require that line to perform the operating service. That power is expressly invoked in this case, and nothing is asked of the canal lines. HELD, it is in the public interest that defendant should perform the transportation and operating services in accordance with the prayer of the complaint, subject to the usual tariff provisions

with respect to the opening and closing of navigation of the canal. State of New York v. N. Y. C. R. R., 95 I. C. C. 119.

V. EVIDENCE.

See Evidence.

§7. In General.

(a) In a comparison of water transportation with rail transportation, where a ratio is used for the water haul, the ratio used can not be supposed to be the exact equivalent of the water haul expressed in terms of rail mileage. A comparison of such dissimilar services can not be made with mathematical accuracy. Reduced Commodity Rates to Pacific Coast, 89 I. C. C. 512, 524, 525.

VI. REASONABLENESS OF RATES.

See Supra II; Loss and Damage; Reasonableness of Rates.

§9. Port Differentials.

See Port Differentials.

(a) Differential adjustment of rates applying through various Atlantic and Gulf ports found not to result in unreasonableness or undue prejudice to Boston and other New England ports. Rate-making lines serving Canadian ports are beyond the commission's jurisdiction, while those reaching other competing Atlantic and Gulf ports are served by lines which have no control over rates to the New England ports. While there is basis for finding undue prejudice to Boston in view of its advantage in distance and transportation conditions, in instances where carriers controlling rates to that point also reach the competing ports, complaints failed to show that Boston suffers injury from the present relationship or that a change therein would inure to its benefit. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 95 I. C. C. 539.

(b) Upon contention that theory of port differentials violates provision of clause 6, section 9, Article I of the Constitution of the United States which reads, "No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another," HELD: Complaints are brought before the commission under the interstate commerce act and invoke exercise of powers thereby delegated by Congress under the commerce clause of the Constitution. Clause 3, section 8, Article I. As an agency of Congress the commission must assume that in laying statutory duties upon it the Congress has not transcended its powers. Maritime Asso. Boston Chamber of Commerce v. A. A. R. R., 95 I. C. C. 539, 542.

(c) For many years prior to the World War there was a generally prevailing policy to offset inland rail differentials in whole or in part by differences in the ocean rates to and from north Atlantic ports. Since the World War it has been and is now the generally prevailing policy to equalize these ocean rates. Maritime Asso. Boston Chamber of Commerce v. A. A. R. R., 95 I. C. C. 539, 554.

WATER COMPETITION

CROSS REFERENCES

See Bills of Lading §7; Classification §4, §11½, §21; Evidence §65; Express Companies §11 (3); Mails; Minimums; Reasonableness of Rates §41; Refrigeration V.

II. METHODS OF COMPUTING CHARGES.

§2½. In General.

(a) The Commission has approved the principle of the graduated scale, but it has repeatedly said that if carriers desire to protect themselves from unduly low charges per car they should not do so by prescribing minimum weights which can not be loaded in the ordinary equipment available, and that it is unreasonable to base charges on a minimum to which cars are incapable of being loaded. Cotton batting in W. T. L., territory, 91 I. C. C. 535, 537.

(b) Complainant attacked the charge of 50c collected by the Terminal Ry. for weighing on their industry track scale numerous cars of freight shipped from their plants to interstate destinations during and since federal control as inapplicable, unreasonable, unjustly discriminatory and unduly prejudicial. Certain of complainants employees, by agreement, are also sworn weighmasters of the inspection bureau look after the weighing and keep the records thereof. These and other obligations are assumed by complainants in consideration of the carriers members of the inspection bureau accepting the weights and descriptions as certified on shipping orders, bills of lading, or weight certificates by such weighmasters as the basis for assessing freight charges. The charges assessed is named in an individual tariff of the terminal company and its subsidiary lines, to apply on cars weighed in transit over consignees or consignors private scales located within the plant or adjacent thereto on lead to plant. The record as a whole indicates the conclusion that the cars were weighed at complainants request and primarily for their own benefit. The applicable charges can not be said to be unreasonable. HELD, rates attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaints dismissed. Walsh Fire Clay Products Co. v. Director General, 95 I. C. C. 439.

(c) Respondents proposed to make certain changes in the method of assessing freight charges in the carload minimum weights, in the weights per package and in the commodity descriptions, applicable in connection with gathering charges, or proportional rates, on citrus fruits, carloads, from interior points in Florida to Jacksonville, Fla., and other gateways to transcontinental territory. Present proportional rates when for beyond are based on a distance scale, naming rates in cents per box, minimum 24,000 pounds, prescribed in 22 I. C. C. 11. Present proportional rate on citrus fruit, carloads, from Orlando to Jacksonville, when for beyond, is 23c per box, minimum 300 boxes. Proposed rate is 29c per 100 pounds, minimum 30,000 pounds, 95 pounds per box of oranges and 85 pounds per box of grapefruit, to be applied. The proposed rate of 29c was arrived at by converting the rate of 23c per box, based upon 80 pounds, into a rate in cents per 100 pounds, which was done by adding 25% to the rate per box to obtain the rate per 100 pounds. Then, in order to avoid the scale weighing of cars, respondents provided for the assessment of charges under the proposed rates by multiplying the weights of 95 pounds per box of oranges and 85 pounds per box of grapefruits by the number of the boxes in the car. This would result in substantial increases. There are no transportation or traffic conditions which would warrant higher proportional rates from interior Florida to Jacksonville when destined to transcontinental territory than when destined to eastern territory. Respondents have not proved that the actual weight per box have increased in an amount which would warrant increases in freight charges. The conclusion herein will be without prejudice to the filing of new schedules on short notice naming specific joint rates from interior Florida points to this transcontinental territory no higher than the aggregate of the proposed proportionals and the reduced proportionals beyond, provided that no departures from the fourth section will result. HELD, proposed schedules not justified. Citrus fruit between points in Florida, 95 I. C. C. 532.

(d) Complainant attacked overcharges collected on 20 cars of coal during federal control from Indiana, Kentucky, and West Virginia and Ohio to Tipton

and Hartford City, Ind., as result of defendants failure to comply with tariff provisions governing the weight of such shipments. Upon complainants request, the cars were reweighed at destinations by the delivering line, the L. E. & W., under a tariff published by that carrier which provided in substance that destination weights would govern, subject to a tolerance of 1% of the lading weight, minimum 500 pounds. Charges were assessed on the highest weights ascertained, which in 12 out of 15 shipments were those obtained on scales of originating lines. HELD, applicable charges were collected on the two shipments that originated on the H. V., at Pomeroy and Nelson Yards, O., on the shipment that originated on the N. & W., at Chattaroy, W. Va., and on the three shipments on which charges were collected based on weights ascertained on scales of delivering line. HELD, further, charges collected exceeded charge based on weights ascertained on scales of the delivering line on the remaining 11, shipments were overcharged, reparation awarded. Burkhart & Company v. Director General, 96 I. C. C. 77.

(e) Shipments of coal on which charges were based on weights ascertained on scales of originating lines found overcharged to extent they exceeded those based on delivery line's weights. Tariffs naming applicable rates provided that they were subject to reweighing charges published in participating carriers' tariffs, and shipments were, therefore, entitled to reweighing privilege published in a tariff of delivering carrier naming rules and regulations governing weighing and reweighing of c. l. freight. Reparation awarded. Burkhart & Co. v. Director General, 96 I. C. C. 77.

(f) Rates on fresh vegetables, not otherwise specified, in certain packages, from producing points in South Carolina to New England, eastern trunk line, and central territories found unreasonable to extent the rates on the 1 and 1.5 bushel packages exceed one-third and one-half, respectively, of the present rates on similar traffic in 3-bushel packages, in connection with a carload minimum of 600 bushels in each case. Revenues would be the same on a carload minimum regardless of the size of the package used and while there is probably some additional service by and expense to defendants in connection with handling of shipments in smaller packages it is not such as to warrant a difference in the rates. Reasonable rates prescribed for the future. South Carolina Produce Asso. v. A. & R. R. R., 96 I. C. C. 107.

(g) Rates on cabbage from Charleston, S. C., to New England, eastern trunk line and central territories, in 1-bushel packages found unreasonable to extent they exceed the present rates per 100 pounds on cabbage in 1.5 and 3 bushel packages from and to the same points. Reasonable rates prescribed for the future. South Carolina Produce Asso. v. A. & R. R. R., 96 I. C. C. 107, 110.

(ga) Rules, regulations, and practices of southern carriers with respect to weighing of c. l. shipments of hay found not unreasonable, discriminatory, or unduly prejudicial. Allegation that defendants customarily assess charges on basis of destination weights not sustained, record showing that practice under rules is to accept weight which circumstances indicate most nearly comports with actual weight, whether it be the weight certified by shipper, ascertained at track scales of carrier, or reported by consignee at destination. While latter is accepted in certain specific instances, it by no means follows that it would be proper in all instances. However, rules and regulations with respect to weighing of this traffic should be published in a tariff. Toberman, Mackey & Co. v. S. Ry., 102 I. C. C. 359.

(h) Complainant attacked through rate charged on a car of yellow pine lumber shipped from Franklinton, La., to Jackson, Miss., on June 4, 1922 there dressed and forwarded to Bloomington, Ind., as illegal. Shipment moved over N. O. G. N., to Jackson, Miss., and I. C., beyond, charges based 11.5c on 84,100 pounds of rough lumber which moved from Franklin to Jackson in two cars and 27c the balance of the through rate of 38.5c on dressed lumber, weighing 38,640 pounds, which moved from Jackson to Bloomington in a single car. No satisfactory evidence was offered to show that the rough lumber did not, in fact, weigh 84,100 pounds. There is manifest discrepancy in the inbound and outbound weights, but the record does not disclose which was erroneous or warrant the conclusion that the charges collected were in excess of those applicable. HELD, complaint dismissed. Milne Lumber Co. v. N. O. N. E. R. R. 104 I. C. C. 493.

§3. Actual weight.

(a) Complainant attacked less carload rates charged on lubricating oil, crude oil, fuel oil, and fuel oil distillate, from Jacksonville, Fla., to Georgia between March 2 and Oct. 16, 1922, based upon actual weight of the shipment as unreasonable, unduly prejudicial and unduly preferential of intrastate traffic in Georgia and Florida. The actual weights applied to complainants shipments resulted in higher charges than would have resulted from the use of estimated weights. Estimated weights applied and now apply on intrastate shipments in Florida, and prior to May 1, 1923, intrastate in Georgia. Intrastate traffic in Georgia is now on the same basis as interstate traffic from Jacksonville. Estimated weights on petroleum are still applicable in conection with intrastate Florida on both carload and less carload traffic. There was no evidence relating to the movement in Florida. The actual weight of complainants shipments of lubricating oil in wooden barrels was 455 pounds as against the estimated weight sought of 410 pounds. HELD, charges assessed based on actual weights not unreasonable or unduly prejudicial, complaint dismissed. Gulf Refining Co. v. A. & W. P. R. R., 95 I. C. C. 731.

(b) Charges resulting from use of actual weights on l. c. l. shipments of petroleum and products, in packages, from Jacksonville to points in Georgia, found not reasonable or unduly prejudicial as compared with lower charges based upon estimated weights applying intrastate in Georgia and Florida. Comparison was also made with tariff which provided for use of estimated weights from Jacksonville to Georgia destinations but record establishes that such weights were for use in connection with c. l. shipments only. Moreover, actual weight of complainant's shipments exceeded estimated weight sought. Gulf Rfg. Co. v. A. & W. P., 95 I. C. C. 731.

(c) Charges on one locomotive crane, with detached parts, found to have been assessed on basis of greater weight than provided for in tariff. Applicable tariff item provided for assessment of charges on actual weight, minimum 60,000 pounds, for crane and minimum of 24,000 pounds for each additional car. Actual weight of shipment exceeded total minimum for crane and 2 additional cars used, and charge should never have been assessed on basis of actual weight. Raleigh Granite Co. v. S. A. L. Ry. Co., 96 I. C. C. 573.

(d) Complainant alleged that the refusal of defendants to refund to complainant amounts collected on carload shipments of hay in excess of the charges based on the weight of the shipments at destination as established by affidavits, certificates, or other evidence, while customarily assessing charges on that basis against hay dealers generally, was and is unreasonable, unduly prejudicial and unjustly discriminatory. The allegation that defendants customarily assess charges on the basis of destination weights is not sustained. On the contrary the record shows that it is the practice of defendants under the rules to accept the weight which the circumstances indicate most nearly comports with the actual weight of the shipment, whether it is the weight certified by the shipper ascertained at the track scales of the carrier, or reported by the consignee at destination. While the latter is accepted in certain specific instances, it by no means follows that it would be proper in all instances. HELD, rules not unreasonable, unduly prejudicial or unjustly discriminatory, complaint dismissed. Toberman Mackey Co. v. Southern Ry. 102 I. C. C. 359.

§5. Estimated Weight.

See Estimated Weight.

(a) Respondents proposed to establish in southern territory an estimated weight of 1,000 pounds per animal on shipments of horses and mules, carloads, where actual weights are not furnished by the shipper. The schedules under suspension provide that where actual weights on horses and mules are not furnished, an estimated weight of 1,000 pounds for each animal will be applied. When shipments of horses and mules move on actual weights ascertained by the carriers there is often delay and frequently the through fast trains are missed. This results from the fact that tare weights stenciled on the cars mean little when they are loaded with such animals, because bedding and sometimes partitions are put in the cars by the shippers, the weight of which can not be ascertained. It follows that the car must be weighed twice, once after they

have been prepared by the shipper to receive the animals and again after the loading has been completed. The application of a reasonable estimated weight on horses and mules is desirable from the standpoint of both shippers and carriers, as it has the effect of reducing delays, such as are incident to weighing, and the cost of feeding in transit. The proposed estimated weight does not appear to be excessive. HELD, proposed schedules justified. Estimated weights on horses and mules, 91 I. C. C. 215.

(b) Complainant attacked weight and rate charged on three cars of grapes shipped from Decatur, Mich., to Chicago, Ill., during Sept. 1921 as unreasonable, unjustly discriminatory and unduly prejudicial. Charged 55.5c per 100 pounds. The 20,000 pound minimum is prescribed by the official classification but under exceptions thereto, and in the absence of a weight agreement provided for by the exceptions, complainants shipments were subjected to an estimated weight of 20 pounds per basket. If complainant was not satisfied to ship under the estimated weight provision of the tariff he should have entered into a weight agreement under which he could move his shipments at their actual weights. These provisions do not appear on this record to have been or to be unreasonable. HELD, charges attacked not unreasonable or otherwise unlawful, complaint dismissed. Odell v. M. C. R. R., 92 I. C. C. 643.

(c) Complainant attacked commodity rate charged on one car of yellow pine lumber shipped July 22, 1922 from Tupelo, Miss., to Memphis, Tenn., as unlawful in violation of section 6. The car contained 19,105 feet of lumber. The tariff provided that where shipments do not pass over track scales, the following estimated weights will be used: 4,000 pounds when green and 3,250 pounds when seasoned. The car was not weighed, charged 7.5c per 100 pounds at estimated weight of 80,000 pounds. Defendant admitted that the car was not weighed and also admitted complainants statement of its footage contents. Notwithstanding the absence of any definite rule which may be followed, it seems clear from the facts of record that the material comprising complainants shipment may not be classed as green lumber and, therefore, under defendants tariff was subject to the estimated weight provided for seasoned lumber. HELD, charges collected inapplicable to extent they exceeded those at rate of 7.5c weight 62,091 pounds, reparation awarded. Leake & Goodlett v. St. L. S. F. Ry., 93 I. C. C. 73.

(d) Complainant attacked weights on 50 cars of gravel shipped from Detroit, Minn., to Lake Park, Minn., between Sept. 10 and Nov. 19, 1919, as inapplicable and unreasonable. Points of origin and destination are on the N. P. Shipments were not weighed or measured. There were no track scales either at the loading or the unloading point. No tariff provision was made for ascertaining the weight of gravel shipped in cars which were not weighed. Based upon an estimated weight freight charges were collected based on rate of 2.5c per 100 pounds, weight of gravel 3,200 pounds per cubic yard. The record will not support a finding that the weight used were erroneous. HELD, shipments overcharged, complaint dismissed. County of Becker, Minn., v. Director General, 93 I. C. C. 368.

(e) By appropriate tariff provision an estimated weight is frequently substituted for the actual weight in order to expedite the service and reduce the cost of transportation. Gulf Refining Co. v. A. & W. P. R. R., 95 I. C. C. 731, 732.

(f) Complainant attacked charges collected on spinach, carloads, between Dec. 1920 and Jan. 1922 from Texas to various destinations, based on the gross weight per basket at the point of origin, including ice, as unjust, unreasonable, unduly prejudicial and illegal to extent they exceeded charges which would have accrued at an estimated weight of 20 pounds per basket, including ice. The commodity is transported, either by freight or express, in refrigerator cars the bunkers of which are filled with ice by the carrier. For some years spinach was shipped both by freight and by express at an estimated weight of 20 pounds per bushel basket, with or without ice. Effective Feb. 28, 1920 the Director General canceled the provisions for estimated weights on spinach shipped by freight and adopted a rule that charges thereafter would be assessed upon basis of actual weights. Effective Jan. 30, 1922 the billing weight of 20 pounds per basket with or without ice, was reestablished and has since been

maintained. There is no showing that the weights on which charges were based were erroneous. In fact complainants evidence lends support to the conclusion that the weights were substantially correct. HELD, charges attacked not unreasonable or otherwise unlawful, complaints dismissed. Frost v. A. & G. Ry., 96 I. C. C. 15.

(g) Proposal to establish in southern territory an estimated weight of 1,000 pounds per animal on horses and mules, when actual weights are not furnished by shipper, found justified. Purpose of proposed schedules is to provide a method for fair ascertainment of charges without delays incident to weighing and without temptation for overcrowding that a charge per car offers. Application of a reasonable estimated weight is desirable from standpoint of both shippers and carriers, as it has effect of reducing delays, such as are incident to weighing, and cost of feeding in transit, and estimated weight here proposed does not appear excessive. Estimated Weights on Horses and Mules, 91 I. C. C. 215.

(h) Proposed cancellation of estimated weights on shipments of asparagus by express from points in Arizona and California found not justified, but in view of fact that actual weights to-day are in excess of estimated weights an increase in estimated weights so as to more nearly approximate average weights of present-day shipments, found justified. Express Weights on Asparagus from Arizona and California, 92 I. C. C. 254.

(i) Charges, based upon estimated weight per basket, assessed on grapes, found not unreasonable or otherwise unlawful because not based on actual weights or minimum prescribed by governing classification. Such minimum was published under exceptions to the classification, which provided that in absence of a weight agreement, shipments would be subject to an estimated weight per basket. Complainant did not enter into agreement under which he could have moved shipments at actual weights, and if he was not satisfied to ship under estimated-weight provision such an agreement should have been entered into. In absence of such agreement shipments were properly subject to estimated-weight provision. Odell v. M. C. R. R., 92 I. C. C. 643.

(j) Charges, based on estimated weight of green lumber, collected on shipment of yellow-pine lumber found inapplicable to extent they exceeded charges based on estimated weight of dry lumber. Shipment here involved was accumulated in complainant's yard over a period of six months, and notwithstanding absence of any definite rule which may be followed in determining when lumber passes from green to dry stage, material comprising this shipment may not be classed as green lumber, and was therefore subject to estimated weight on seasoned lumber. Shipment found overcharged and reparation awarded. Leake & Goodlett v. St. L.-S. F., 93 I. C. C. 73.

(k) Charges resulting from use of actual weights on l. c. l. shipments of petroleum and products, in packages, from Jacksonville to points in Georgia, found not unreasonable or unduly prejudicial as compared with lower charges, based upon estimated weights applying intrastate in Georgia and Florida. Comparison was also made with tariff which provided for use of estimated weights from Jacksonville to Georgia destinations, but record establishes that such weights were for use in connection with c. l. shipments only. Moreover, actual weight of complainant's shipments exceeded estimated weight sought. Gulf Rfg. Co. v. A. & W. P., 95 I. C. C. 731.

(l) Charges on spinach from Texas to various destinations, based on gross weight per basket at point of origin, including ice, found not unreasonable or otherwise unlawful as compared with charges based upon an estimated weight of 20 pounds per basket, including ice. Director General canceled provision for estimated weights on shipments moving by freight, but on express shipments they were continued in effect. After Federal control terminated express competition developed to such an extent that it was necessary for rail carriers to reestablish the billing weight of 20 pounds per basket if they wished to continue to participate in the transportation. Frost v. A. & C. Ry., 96 I. C. C. 15.

(m) Complainant attacked charges collected on three tank cars of petroleum black oil shipped April 8, 9 and 11, 1921 from Houston, Tex., to Cleveland, O., as unjust, unreasonable and in violation of section 6 of the act in that they were based on an estimated weight of 7.4 pounds per gallon instead of 6.6 pounds

per gallon. Petroleum or petroleum products, including crude oil, gas oil, and fuel oil, in tank cars are rated fifth class in western classification. Petroleum black oil is not specifically named in the list. The estimated weight of these products for tariff application is 6.6 pounds per gallon, except that for crude, gas and fuel oils it is 7.4 pounds per gallon. A witness for complainant admitted that its weight is from 7.8 to 7.9 pounds per gallon. HELD, estimated weight of 7.4 pounds per gallon not unreasonable or otherwise unlawful, complaint dismissed. Warren Refining & Chemical Co. v. C. N. O. & T. P. Ry. 102 I. C. C. 277.

(ma) Charges collected on petroleum black oil, in tank-car loads, based on estimated weight of 7.4 pounds per gallon, which was the same estimated weight as applies on crude, gas, and fuel oils, found not unreasonable or otherwise unlawful. While other petroleum and its products carried an estimated weight of 6.6 pounds per gallon, black oil was not specifically named in the list of oils carrying such estimated weight. Moreover, actual weight of the black oil here shipped exceeded estimated weight upon which basis charges were assessed. Warren Refining & Chemical Co. v. C., N. O. & T. P., 102 I. C. C. 277.

(n) Complainant attacked present estimated billing weights on shipments of ice cream, by express, and the rates and charges resulting therefrom, as excessive, unreasonable and unjustly discriminatory. Ice cream moves by express throughout the United States. It is shipped in quantities ranging from 1 to 5 gallons or more. The 5 gallon shipment is the common, or standard, package and the testimony relates to that size. In the year 1891 the express companies extended to ice cream shipments a 25% reduction from the gross weight, in accordance with their general rule covering all perishable food products moving under ice, which represented a shrinkage allowance for the melting of the ice. In 1904 estimated billing weights were voluntarily established by the carriers on ice cream shipments, as follows: 1 gallon 30 pounds, 2 gallons 50 pounds, 3 gallons 60 pounds, 4 gallons 80 pounds, 5 gallons 100 pounds; over 5 gallons in the same tub, 18 pounds per gallon. The use of the estimated weights served the convenience of the express company, the shippers, and the consignees, permitted more expeditious handling through the saving of the time required to weigh the shipments, and made the charges per can or per tub uniform. In 59 I. C. C. 265 the Commission approved an increase in the above estimated billing weights, that for the 5 gallon shipment being increased from 100 to 115 pounds, and the other sizes in proportion. In that case weight tests of a considerable number of 5 gallon packages at several points disclosed averages ranging from 145 to 172 pounds. The recent weighing tests, now incorporated in the record, do not support the contention of complainant that the present estimated billing weight of ice cream in 5 gallon tubs is unreasonable. On the contrary, it is shown that the average gross weight of shipments in new style gallon tubs exceeds the average gross weight of old style 5 gallon tubs, and that the actual average gross weight of all shipments, in 5 gallon tubs is greater than that upon which the present estimated billing weight is based. HELD, estimated billing weights not unreasonable or unjustly discriminatory, complaint dismissed. National Asso. of Ice Cream Mfrs. v. Amer. Ry., Exp. 107 I. C. C. 267.

(o) Respondents proposed to increase estimate weights on lettuce in crates of specified dimensions moving transcontinentally eastbound from points west of Albuquerque, Belen and Deming, N. M., El Paso, Tex., and Salt Lake City, Utah, also certain points in northern California on the Southern Pacific. There are four socalled standard crates. Three of these, the Brawley standard, the Brawley special and the Los Angeles standard, each measure, on the inside, 13 inches in depth and 18 inches in width; all measure 24.5 inches in length on the outside but inside, the Brawley standard is 23 1-8 inches, the Brawley special 21 7-8 inches, and the Los Angeles standard 21 5-8 inches. The traiffs permit the loading in each crate of a maximum of 30 pounds of ice and the evidence is that between 25 and 30 pounds per crate are actually loaded. The average carload consists of 320 crates, and if 30 pounds are loaded per crate, the crate ice aggregates 9,600 pounds. Originally all lettuce was shipped with ice in the crates and under standard refrigeration. In about 1920 the practice became general of loading additional ice, of a weight varying during different seasons from

1,500 to 9,600 pounds or even more, on top of the load. This ice, generally in small pieces, melts slightly during loading and later freezes again, forming an ice blanket over the load. During the past year approximately 90% of the shipments from the Imperial Valley moved with no ice in the bunkers and with only crate and top ice to protect them. During very warm periods shipments move under standard refrigeration, with top and crate ice. Hearing in this case was had before decision in 104 I. C. C. 79, wherein the Commission found carriers had justified the assessment of charges on a maximum of 7500 pounds of ice placed in the bodies of cars of $5 per car if the transportation is confined within the limits of two contiguous origin groups, and in all other cases 20% of the stated refrigeration charge which otherwise would be applicable. Prior to Feb. 15, 1925 respondents tariffs contained no provision for estimated weights on lettuce. Prior to Jan., 1, 1922 respondents made estimates of average weights and then deducted 5 pounds for ice meltage. Since Jan. 1, 1922, estimated weights, carried in bulletins not on file with the Commission, have been used, with a meltage allowance of 10 pounds. The note provided "above weight applies when not more than 30 pounds (gross) of ice is placed in each crate. When a greater amount of ice is used per crate or crates not conforming to above dimensions are used, actual weights will apply subject to tariff minimum weight." Respondents published a supplement which so amended the note that an estimated weight of 76 pounds would apply on all four sizes of crates. The average load of a car of lettuce is 320 crates, and each additional 5 pounds in the estimated weight of the crates means an increase in the weight of the loading of 1,600 pounds, additional revenue to New York of $28 per car, car mile earnings 13.2c. HELD, respondents have justified estimated weight of 76 pounds named in the schedules under suspension. Lettuce from Pacific coast territory, 107 I. C. C. 559.

(p) Complainant attacked rates charged on fresh and green vegetables, in carloads, from South Carolina to New England, eastern trunk line and central territory as unreasonable. Former report in 96 I. C. C. 107. The burden is upon the complainants to show the unlawfulness of the present method of stating the rates. The basis proposed by complainants would necessitate the use of minimum weights on some of these commodities which can not be loaded, a practice which has been condemned. If rates on these commodities were published on a weight basis, it would be a practical necessity, in the interest of economical and expeditious handling, that estimated rather than actual weights be used. This record does not contain a sufficient showing upon which to base a schedule of estimated weights. The record discloses no convincing reason why rates on vegetables, generally, should be made with relation to rates on potatoes, except perhaps the matter of convenience. Cabbage is transported from this territory either in refrigerator cars under ice or ventilator cars. Commodity rates have been the rule from South Carolina and other southern producing points for a long period of time. They are not made, nor is there any convincing reason shown of record why they should be made with relation to class rates. From this territory along the coast of South Carolina, moreover, class rates are shown to be on relatively low basis, because, it is stated, of the influence of water competition. Lettuce and spinach, move in considerable volume from this territory, spinach principally in ventilator cars and lettuce in refrigerator cars under ice. HELD, rates under attack not unreasonable, reparation awarded on such rates as were found unreasonable in the former report. Fourth section denied. South Carolina Produce Asso. v. A. & R. R. R. 107 I. C. C. 613.

§5½. Origin Weights.

(a) Complainant alleged that in Feb. 1919 a carload of coal was shipped from Hazard, Ky., to Monon, Ind., that it paid freight charges on a weight of 109,000 pounds and that charges collected were inapplicable to extent they exceeded charges computed on a weight of 89,000 pounds. Complainants evidence proves only that the actual weight of the car was 4,000 pounds greater than the marked weight, and upon that weight complainant is entitled to reparation. Were the Commission to base its opinion in cases of this character upon the invoice weight of the shipment the door would be open to collusion and fraud, making rebating an easy matter. HELD, shipment overcharged

$4.90, reparation awarded. Monon Lumber Co. v. Director General, 109 I. C. C. 429.

§6. Reweighing.

(a) Complainant attacked defendants rules, regulations and practices relating to the weighing and reweighing of interstate shipments of bituminous coal as unreasonable and otherwise unlawful. Most of the testimony related to the so-called tolerance rules and defendants practice thereunder. Tolerance is the allowable margin of error between the origin and destination scale readings, arising from difference in scales, or errors in weighing, or absorption of evaporation of moisture by the shipment in transit, which must be exceeded as a condition precedent to the correction of the billed weight and the reweighing of the shipment free. Carriers rules generally provide that freight charges will be assessed on the basis of weights obtained at initial weighing stations, and that such origin weights must be adhered to unless shown to be incorrect. In cases where consignees question the accuracy of origin weights and request a reweighing, the tolerance rule of the delivering carrier is applied in the settlement of the controversy. The tariffs of the Big Four, a defendant herein, provide a tolerance on coal of 1% with a minimum of 1,000 pounds, and in addition contain the note relating to differences in weight due to evaporation, whereas the tariffs of the Pennsylvania, and some other lines referred to, provide a tolerance of 1% with a minimum of 500 pounds, for variation in scales or errors in weighing, with an additional allowance of 1% of the origin weight on account of moisture evaporation. HELD: Rules attacked not unreasonable or otherwise unlawful, complaints dismissed. Smith & Duckworth v. C. C. C. & St. L. Ry., 100 I. C. C. 300.

(b) Complainant alleged that because of failure of defendant to reweigh two cars of anthracite coal shipped from Parsons and Mahoney Plain scale, Pa., and received at Mentone, Ind., Dec. 31, 1923, and to show gross, tare and net weights on the freight bills, and because of demand by defendant for weighing and additional transportation charges for movement to and from Fort Wayne, Ind., it has been damaged in the sum of $500. Mentone is a local point on the N. Y. C. & St. L., 48 miles west of Fort Wayne, Ind. There are no track scales at Mentone and the nearest intermediate point at which there are scales is Fort Wayne. Prior to their delivery complainant made request of defendant's agent at Mentone, apparently not in writing, that all of its shipments of coal and coke be reweighed, and upon arrival of the two cars it refused to receive them until they had been reweighed. The cars were taken to Fort Wayne, reweighed and again tendered for delivery with a charge of $3.60 per car for reweighing and a transportation charge, the amount of which is not shown on record. On Jan. 1, 1924, complainant made a request in writing that all of its coal and coke shipments be reweighed prior to delivery. Under the present rules complainant is entitled to have shipments reweighed upon proper request, but it can not be held that a general request that all of its shipments be reweighed comes within the meaning of the rules. HELD: Complaint dismissed. Mentone Lumber Co. v. N. Y. C. & St. L. Ry., 101 I. C. C. 421.

(c) Shipments of coal on which charges were based on weight ascertained on scales of originating lines found overcharged to extent they exceeded those based on delivering line's weights. Tariffs naming applicable rates provided that they were subject to reweighing charges published in participating carriers' tariffs, and shipments were, therefore, entitled to reweighing privilege published in a tariff of delivering carrier naming rules and regulations governing weighing and reweighing of c. l. freight. Reparation awarded. Burkhart & Co. v. Director General, 96 I. C. C. 77.

(d) Rules, regulations and practices of defendant carriers relating to the weighing and reweighing of interstate shipments of bituminous coal, under the so-called tolerance provisions of the tariffs, found not unreasonable or otherwise unlawful as compared with the tolerance provisions of other carriers. Moreover, such rules, regulations, and practices conform generally to the code of rules governing the weighing and reweighing of carload freight, incorporating many of the principles enunciated in 28 I. C. C. 7, adopted by American Railway Association and endorsed by the commission. Smith & Duckworth v. C., C., C. & St. L. Ry. Co., 100 I. C. C. 300.

(e) Under its tariff, defendant found not required to reweigh all shipments of coal and coke prior to delivery upon a general request, without definite information as to particular shipments. Mentone Lbr. Co. v. N. Y., C. & St. L., 101 I. C. C. 421.

(f) Complainant attacked commodity rates charged on carloads of coal shipped between Dec. 31, 1917 and Oct. 15, 1919, from Brazil, Carbon and Superior, Ind., to Muncie, Ind., as based on excessive weights and in excess of the applicable charges under the weighing rules and regulations under the applicable tariffs. The coal was shipped from Carbon and Superior and moved over the Central Indiana to Muncie. The carrier did not maintain track scales at either Carbon or Superior. Defendant states that the coal from Carbon and a portion of that from Superior was weighed on track scales at those points maintained and operated by the mines; that the weight of the remainder of the coal from Superior was determined by the net weights maintained and operated from tipple scales at the mines; and that the weights so obtained were used by the mining companies for invoice purposes and were furnished to the carrier for waybilling. Complainants paid for the coal on the basis of the weights furnished to the carrier and the freight charges were assessed on those weights. The question of the weight of shipments is one of fact, and the actual weight constitutes the true basis upon which the assessment of freight charges should be made. Complainants made no request to have the shipments reweighed, as they were entitled to do, and apparently did not weigh them on arrival at destination. HELD, complaint dismissed. Curtis v. Director General, 109 I. C. C. 378.

§7. Scaleage and Shrinkage.

See Facilities and Privileges §12.

(a) Shipment of cedar posts from Noxon, Mont., to Rushville, Nebr., found overcharged, due to inadequate allowance having been made for snow on the load in weighing. Noll Lumber Co. v. C. & N. W. Ry. Co., 98 I. C. C. 589.

§7a. Tolerance.

(a) Rules, regulations, and practices of defendant carriers relating to the weighing and reweighing of interstate shipments of bituminous coal, under the so-called tolerance provisions of the tariffs, found not unreasonable or otherwise unlawful as compared with the tolerance provisions of other carriers. Moreover, such rules, regulations, and practices conform generally to the code of rules governing the weighing and reweighing of carload freight, incorporating many of the principles enunciated in 28 I. C. C. 7, adopted by American Railway Association and endorsed by the commission. Smith & Duckworth v. C., C., C. & St. L. Ry. Co., 100 I. C. C. 300.

(b) Code of rules governing weighing and reweighing provides that tolerance on coal and coke does not include evaporation tolerance but that it shall be determined and published in initial carrier's tariff. These rules have not been adopted in their entirety by all carriers. Smith & Duckworth v. C., C., C. & St. L. Ry. Co., 100 I. C. C. 300, 301.

(c) Tolerance is the allowable margin of error between origin and destination scale readings, arising from differences in scales, or errors in weighing, or absorption or evaporation of moisture by the shipment in transit, which must be exceeded as a condition precedent to the correction of the billed weight and the reweighing of the shipment free. In cases where consignees question the accuracy of origin weights and request a reweighing, tolerance rule of delivering carrier is applied in settlement of the controversy. Smith & Duckworth v. C., C., C. & St. L. Ry. Co., 100 I. C. C. 300, 301.

§7½. Track Scales.

See Supra §5½.

(a) No track scales were located at either loading or unloading point, and no tariff provision was made for ascertaining weights of gravel shipped in unweighed cars. Charges assessed on shipments not weighed or measured, based upon an unfiled circular issued by carrier to station agents and conductors, which provided for use of certain estimated weights on this commodity when shipped under above conditions, found legally applicable. Practice of carriers in issuing circulars respecting use of estimated weights on unweighed shipments was considered by commission in weighing of Freight by Carriers, 28 I. C. C. 7 and not condemned. Moreover, un-

less these rules are incorporated in tariffs they are not usually filed with regulatory bodies. Becker County v. Director General, 93 I. C. C. 368.

(b) Charge for weighing outbound freight on private scales of certain shippers at St. Louis, Granite City, Madison, and East St. Louis, served by the Terminal R. R. Asso. of St. Louis and its subsidiaries, found not unreasonable, discriminatory, or unduly prejudicial. Evidence merely stated that other concerns and competing manufacturers at St. Louis and various sections of the country operate private track scales and are assessed no weighing charge by carriers serving them. These facts, however, are insufficient to sustain allegations of discrimination and prejudice. In support of allegation of unreasonableness it was contended that service performed by carriers is substantially the same whether cars are weighed on private or carrier scales, and, as it is duty of carrier to weigh freight, any charge is unreasonable. However, the weighing was performed at complainants' request and primarily for their own benefit, and it follows that they should properly pay for the service. Walsh Fire Clay Products Co. v. Director General, 95 I. C. C. 439.

(c) The Commission has repeatedly expressed the view in cases involving claims for refunds of charges based upon alleged improper weights that the scale weight must govern in the absence of convincing proof of error. Monon Lumber Co. v. Director General, 109 I. C. C. 429, 439.

IV. EVIDENCE AND BURDEN OF PROOF.

§9. In general.

See Bills of Lading §7; Evidence I.

(a) Complainant attacked charges on a car of red cedar posts shipped Dec. 9, 1922 from Noxon, Mont., to Rushville, Mont., as unreasonable in that allowance was made for only 4 inches of snow on the car instead of 2 feet as stated in the bill of lading. When the car was weighed at Paradise, Mont., only 4 inches was visible to the weigher, on which basis charges were collected. The weather bureau maintains stations at Heron and Plains, Mont., short distances northwest of Noxon and Paradise, respectively. Readings are taken at 5 o'clock daily. The record data show 1 inch of snowfall at Heron on Dec. 8 and 29 inches on the following day. Only a trace of snow fell at Plains on Dec. 8 and a light rain occurred on Dec. 9 prior to 5 o'clock P. M., on the 9th, although snow was falling at Paradise at 10:30 P. M., on the 9th. Inasmuch as this car was not billed out of Noxon until some time on the 9th it apparently encountered the heavy snowfall in that vicinity. Consequently the notation in the bill of lading of 2 feet on the load seems correct. At 175 pounds per inch of depth and a rate of 59c per 100 pounds, the overcharge amounted to $20.65. HELD, refund of overcharge ordered. Noll Lumber Co. v. C. & N. W. Ry., 98 I. C. C. 589.

(b) Where it was impossible to estimate weight of coal hauled, over carrier's tracks, and billed by carrier at false weights, except by approximation, due to carrier's failure to weigh, all doubts were resolvable against carrier. New York & Pennsylvania Co. v. New York Cent. R. Co. (Pa., 1924) 124 Atl. 428.

V. REPARATION.

See Reparation.

§10. In general.

(a) That carrier's failure to weigh coal and its issuance of waybills, etc., based on tipple weights, enabled shipper to make excess charges against consignee did not make carrier liable therefor; such overcharge constituting a new and independent wrong not within carrier's contemplation, and carrier being under no obligation to weigh in order that accounts for purchase could be adjusted. New York & Pennsylvania Co. v. New York Cent. R. Co. (Pa., 1924) 124 Atl. 428.

VI. TARIFFS AND CONSTRUCTION.

See Tariffs.

§11. In General.

(a) No track scales were located at either loading or unloading points, and no tariff provision was made for ascertaining weights of gravel shipped in unweighed cars. Charges assessed on shipments not weighed or measured, based upon an unfiled circular issued by carrier to station agent and conductors, which provided for use of certain esti-

mated weights on this commodity when shipped under above conditions, found legally applicable. Practice of carriers in issuing circulars respecting use of estimated weights on unweighed shipments was considered by commission in Weighing of Freight by Carriers, 28 I. C. C. 7, and not condemned. Moreover, unless these rules are incorporated in tariffs they are not usually filed with regulatory bodies. Becker County v. Director General, 93 I. C. C. 368.

VII. REASONABLENESS OF CHARGES.

§13. In general.

See Reasonableness of Rates.

(a) Complainant attacked class rates charged on locomotive cranes, with detached parts, from Gilmerton, Va., to Greystone, S. C., as unreasonable, unjustly discriminatory and unduly prejudicial. Moved, June 22, 1922. Locomotive cranes or derricks on own wheels are rated 80% of sixth class, and item provides for use of actual weight of car of contents, minimum 60,000 pounds subject to a note which provides that if additional car or cars are required on account of detached or overcharging parts, the minimum shall be increased 24,000 pounds for each additional car. The sixth class rate prior to July 1, 1922 was 49c, rate applicable 39.2c. Charged originally on 108,000 pounds, but subsequently collected on 156,500 pounds. Gilmerton is on the N. & W., 15 miles east of Suffolk, Va. Greystone is on the S. A. L., 127 miles west of Norfolk. Shipments moved N. & W., to Norfolk, N. & P. Belt to Portsmouth, Va., and Seaboard to destination, 135 miles. There is no showing other than a statement of the rates and the location of the points that the rate attacked was unjustly discriminatory or subjected complainant to undue prejudice. HELD, rate attacked not unreasonable or otherwise unlawful, but weight used should have been 116,860, overcharges to be refunded. Raleigh Granite Co. v. S. A. L. Ry., 96 I. C. C. 573.

(b) Where carrier wrongfully failed to weigh coal, but billed it at tipple weights, thereby overcharging consignee, carrier, in view of its tariff, HELD entitled to be paid on basis of minimum carload weights only, in absence of evidence of greater weights. New York & Pennsylvania Co. v. New York Cent. R. Co. (Pa., 1924) 124 Atl. 428.

(c) Consignee was entitled to recover from initial carrier excess freight paid to connecting carrier on coal; such overpayment being a natural consequence of initial carrier's act in billing coal at tipple weights and in failing to weigh coal on its own scales. New York & Pennsylvania Co. v. New York Cent. R. Co. (Pa., 1924) 124 Atl. 428.

WHARFAGE

See Allowances §8 (8); Dockage; Facilities and Privileges §16; Water Carriers §6¾.

WORDS AND PHRASES

See Classification §28 (l) (m) (q).

(a) Bars, as well as rods, may be straight, crooked, bent, curved, deformed, and presumably may be coiled. New England Drawn Steel Co. v. Director General, 93 I. C. C. 171, 172.

(b) "Stringpiece" is the raised outer edge of a dock. Coastwise Lumber & Supply Co. v. P. R. R., 93 I. C. C. 288, 289.

(c) A bicycle is neither a freight nor a passenger vehicle. United Cycle & Supply Co. v. B. & O., 93 I. C. C. 689, 690; Jones v. P. R. R., 93 I. C. C. 697, 698.

(d) A rig-iron outfit consists of certain parts of a well-drilling outfit, and comprises two steel shafts, two steel bands, two pieces of small pipe, one box of bolts, three pieces of bar iron, machine castings, and five kegs of nails, and also certain wooden parts, such as bull-wheel and calf-wheel cants and arms and pins in the rough. A set of rig irons does not include the essential parts of a well-drilling outfit, such as engine boiler, derrick, drilling tools, cable, and crown block, without which it would be impossible to drill a well with rig irons. Parkersburg Rig and Reel Co. v. C., R. I. & P., 95 I. C. C. 181, 182.

(e) "Lumber." As that commodity is carried in railroad tariffs it is well understood to embrace a prepared, usually or always sawed, product of the forests. The Standard Dictionary defines it as "Timber sawed into merchantable form, especially boards." National Reduction Corp. v. Director General, 95 I. C. C. 284, 285.

(f) "Haydite," a substitute for sand, gravel, and crushed stone in concrete

construction, made from any clay from which brick can be made. The clay is broken up and baked into clinkers in rotary kilns, then ground or pulverized. Haydite Co. v. A., T. & S. F., 96 I. C. C. 312, 313.

(g) Balsam wool: A builders' material manufactured from the fibre of spruce or balsam trees It is competitive with other insulating materials. Dower Lumber Co. v. N. P. Ry. Co., 98 I. C. C. 9.

(h) Plates, ship: Term can mean only plates for use in the construction of ships, and even if there was anything obscure or uncertain about the term, the lower rate would have been applicable or the shipments here involved, since an obscure or uncertain tariff provision must be construed against its framers. Sabin v. S., P. & S. Ry. Co., 98 I. C. C. 471, 474.

(i) Value for remelting purposes as used in the tariffs in connection with "Scraps or pieces of iron or steel," defines the nature of the article, and they do not make the rate to be applied dependent upon its use. Steel articles having a recognized commercial value other than that of the elementary metal from which they are manufactured do not properly come within the description scrap steel. Alaska Junk Co. v. Spokane, Portland & Seattle Ry. Co., 98 I. C. C. 551.

(j) Viz, is generally read "namely or "to wit" and is commonly employed to make specific that which has theretofore been stated in general terms. St. Louis Fruit & Vegetable Asso. v. L. &. N. R. R. Co., 98 I. C. C. 553, 556.

(k) A bicycle is a means of conveyance or travel for persons, is non-self-propelling and comes within the definition of a "light, non-self-propelling passenger vehicle." United Cycle Supply Co. v. B. & O., 101 I. C. C. 334, 336.

(l) The term "car service" as used in the act relates to vehicles used in the transportation of property. Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, 426.

(m) Docking and undocking, defined. Southern Transp. Co. v. N. & W., 101 I. C. C. 211, 221.

(n) Dumping and trimming, defined. Southern Transp. Co. v. N. & W., 101 I. C. C. 211, 212, 213, 216, 217.

(o) A fleshing is described as the scrapings of meat from the inside of cattle and calf hides and the skins of larger meat animals used generally in canneries. Glue stock in Official Classification Territory, 101 I. C. C. 601, 603.

(p) Service of running lines in connection with the docking and undocking of vessels at piers, defined. Southern Transp. Co. v. N. & W., 101 I. C. C. 211, 223.

(q) A "split-delivery" car contains a c. l. shipment under a single bill of lading from one consignor to one consignee, made up of separate shipments to be delivered to two or more ultimate consignees. Loading and Unloading C. L. Freight, 101 I. C. C. 394, 403.

(r) "Joint mine": In Ridge Coal Mining Co., 62 I. C. C. 259, the commission defined a joint mine as being one located on the rails of only one railroad but served by one or more additional railroads. Brady v. B. & O., 102 I. C. C. 19, 23.

(s) "Rough rice": Rice, after being threshed and while still in the hull is known as rough rice, and in this state is sold to the rice mills. New Orleans Joint Traffic Bureau v. B., S. L. & W., 102 I. C. C. 686, 687.

(t) "Specific rates": Rule 6 of Tariff Circular 18-A provides that commodity rates must be specific and that they must not be applied to analogous commodities. If a tariff should be filed naming commodity rates on "grain products," for example, the commission could require carriers to correct it by specifying a full list of articles to be included within that designation. A commodity rate on a specific article of transportation, stated definitely as so many cents per 100 pounds, is a specific commodity rate, notwithstanding the fact that the same rate is not repeated in the tariff in conection with each point of origin and each point of destination from and to which the rate is made to apply. Miller & Lux v. S. P., 102 I. C. C. 137, 139.

(u) "That is, all-rail, or rail-and-water:" Conference Ruling 214 (c) provides that in absence of specific through routing by shipper it is duty of carrier's agent to route shipments via cheapest route; that is, all-rail, or rail-and-water.

Contention that words "that is, all-rail or rail-and-water" were intended to be illustrative and not to define the only two possible classes of routes, not sustained. Natural meaning attached to wording of ruling indicates that it was intended to state explicitly the kinds of classes embraced therein. Petertyl v. N. Y., N. H. & H., 102 I. C. C. 693, 694, 695.

(v) "Unclaimed shipments": The term "unclaimed" implies, in absence of actual refusal, the failure of consignee to claim or accept shipment. Advice given carrier by consignee to effect that he would be unable to pay freight charges for several days, which may be construed to mean that shipment would be accepted within a few days, is not the equivalent to claiming shipment, which contemplates a demand for delivery and a readiness to pay charges. National Fire Proofing Co. v. Bellfonte Central R. R. Co. 102 I. C. C. 345, 346.
